Employment Security Memorandum No. 17

Research and Statistics Division  
Washington, D.C.  
August 1941

## Foreword

The Federal-State unemployment compensation program yields data which, together with the wage and employment data supplied by the program of old-age and survivors insurance, fill one of the major gaps in our knowledge of the labor market. The unemployment compensation program makes it possible to obtain at regular intervals from every firm of any significant size in the major industries, except railroads, a report of the number of workers in their employ and the amount of wages paid. Prior to the initiation of the program, the only regularly available data in this extremely important field were voluntary reports from a relatively small number of employers. With approximately 90 percent of the workers in industries subject to unemployment compensation employed by the reporting establishments, the data obtained regularly on employment and wages represent virtually a complete census for the industries covered.

The usefulness of these statistics will be further enhanced as all State employment security agencies submit reports on a more refined industrial classification basis beginning with the year 1942. The industrial classification of each firm is to be checked at least once every 3 years in order that the data may accurately reflect industrial patterns.

This volume presents in detail the data collected for 1939. A previous monograph, issued as Employment Security Memorandum No. 6, contained similar data for 1938, the first year for which data became available in most States. Only a few States compiled comparable information for 1937.

We wish to acknowledge the cooperation of the research and statistics units of State employment security agencies in making the issuance of these data possible.

Ewan Clague, Director,  
Bureau of Employment Security

EMPLOYMENT AND WAGES, 1939

## EMPLOYMENT AND WAGES, 1939

### 1 Changes, 1938-1939

Industries covered by State unemployment compensation laws probably participated to a greater extent than industry as a whole in the general economic improvement that characterized the year 1939. Covered employment in 1939 averaged 21,377,500, approximately 7 percent above 1938.<sup>1/</sup> The Bureau of Labor Statistics estimates indicate an increase from 1938 of only 4.6 percent for employees in nonagricultural establishments. Wages <sup>2/</sup> earned in covered employment in 1939 aggregated \$28,518 million, about 11 percent more than in 1938. The comparable gain in total nonagricultural wages and salaries in the Nation as a whole, however, was only 7.9 percent, according to recently revised estimates of the Bureau of Foreign and Domestic Commerce.

Comparisons with the volume of covered employment and wages in the previous year indicate the persistence in 1939 of the upward trend which began late in 1938. In March 1939, employment of covered workers totaled 20,754,000, 4.6 percent above the level of March 1938. By June, the gain over the same month of the previous year was 9.2 percent and in September it reached 9.6 percent. Although covered employment declined in the last 2 months of the year, the December 1939 total of nearly 22 million was 9.1 percent above the last month of 1938.

Similar increases were reported <sup>3/</sup> for workers included under the Federal old-age and survivors insurance program which covers all employers, irrespective of size of establishment, in virtually the same industries and services as those included under State unemployment compensation programs. The average number of employees reported as earning taxable wages under this program on the last day or last pay roll of March, June, September, and December 1939 was 8.8 percent above the average of similar figures for 1938. In March 1939 the number of such

- 
- <sup>1/</sup> All comparisons between 1938 and 1939 are based on figures excluding data for railroad and other groups transferred to coverage under the Railroad Unemployment Insurance Act on July 1, 1939.
- <sup>2/</sup> "Wages" include the earnings of all employees of firms subject to unemployment compensation laws. Many of these employees are salaried workers.
- <sup>3/</sup> Social Security Bulletin, August 1941.

workers was 6.5 percent higher than in March 1938. By the end of June employment had increased by 10 percent over the same month of the previous year and in September by 9.7 percent—an increase almost identical with that indicated by State unemployment compensation figures. Likewise, in spite of the slight decline that followed, employment of workers covered by the old-age and survivors insurance program was 8.9 percent higher in December 1939 than in the last month of 1938.

Wages of workers included under State unemployment compensation programs in the first quarter of 1939 exceeded earnings during the corresponding period of 1938 by 6.8 percent. By the second quarter the relative increase was 10.9 percent, and by the third quarter 13.1 percent. As in the case of employment, there was a slight decline in relative position at the end of the year, but earnings in the last 3 months were 12.1 percent above those in the same period of 1938. Between the first and fourth quarters of 1939, wages earned in covered employment increased 19.0 percent, as against a corresponding rise of only 13.3 percent in 1938.

Variations in the inclusiveness of the data for the 2 years prevent accurate analysis of industrial differences in covered employment from 1938 to 1939 for the country as a whole. Such comparisons as are feasible,<sup>1/</sup> however, indicate that average monthly covered employment in construction in 1939 was 25 percent above 1938, in manufacturing about 10 percent, and in trade more than 7 percent. The increases in the corresponding period in wages earned in these industrial divisions were even more striking. Wages earned in construction rose more than 30 percent, in manufacturing 15 percent, and in trade 8 percent.

## 2 Character and Limitations of the Data

Comprehensive monthly data on employment and wages, by major industry group, were reported to the Social Security Board in 1939 by the 51 State agencies administering the State unemployment compensation laws.<sup>2/</sup> Only a few States compiled such statistics in 1937, and although all States submitted reports for 1938, complete data by major industry group for all States

---

<sup>1/</sup> Covered employment and wages in Pennsylvania, for which no industry data were reported in 1938, were excluded from the totals for 1939 in making these comparisons.

<sup>2/</sup> Including Alaska and Hawaii in addition to the 48 States and the District of Columbia.

first became available in 1939. Figures for 1938 have already been published,<sup>1/</sup> and 1939 figures are presented in this volume. Final data for 1940 were not due from State employment security agencies until July 31, 1941, but preliminary estimates have been prepared and published.<sup>2/</sup>

Employers subject to unemployment compensation laws are required to report to State employment security agencies the number of workers on their pay rolls during the last pay period of any type ending within the month. Thus, an employer who reimburses his employees on more than one basis reports a figure which is the sum of the number of workers on a weekly pay basis who were employed during the last week of the month, plus the number paid on a semi-monthly basis who were employed during the last half of the month, plus the number employed on a monthly pay roll basis. Should the employer have other types of pay periods, such as 10-day or daily, the number of employees during the last pay period of each type ending within the month is included.

Wages are reported on a quarterly basis. Except for New York, they represent the total amount of wages paid or payable to all covered workers during each calendar quarter, even though the entire amount may not be subject to taxation for unemployment compensation purposes. Under most State laws, the cash value of such perquisites as tips, bonuses, and meals are regarded as taxable wages and included in the employers' reports. New York reported taxable wages only, thus excluding all but \$3,000 of the wages of individual employees with annual earnings from any one employer in excess of \$3,000. It is estimated that this limitation reduced the reported figure for total wages earned in covered employment for the 51 States by about 3 percent; it especially distorts the wage pattern for industries in which high salaries are frequent and in which New York predominates, particularly finance, insurance, and real estate.

Because of the differences in the bases upon which they are reported, employment data are not strictly comparable with wage data. The wages of all workers employed at any time in the calendar quarter are included in the State reports, but their employment is excluded unless it occurred during the last

---

<sup>1/</sup> Bureau of Employment Security, Employment and Pay Rolls in State Unemployment Compensation Systems 1938, Employment Security Memorandum No. 6, Washington, D.C., April 1940.

<sup>2/</sup> Social Security Bulletin, July 1941.

pay period of a month. Quotients obtained by dividing wages by employment, therefore, have little significance.1/

Unemployment compensation reports cover all persons whose wages are subject to taxation for unemployment compensation purposes and, therefore, include many officers, executives, and other supervisory employees as well as wage earners.

Covered employment and wages are classified and reported on an establishment and not on an employer basis and so are properly allocated to the State in which they originate. Data for many States, therefore, reflect the employment of workers who reside in neighboring States.

Various limitations which must be taken into consideration in any interpretation of the figures, attach to the use of employment and wage data for covered workers as measures of total employment and wages. Large groups of the working population are excluded from coverage by most State unemployment compensation laws. These exclusions, moreover, vary considerably among the States.2/ In general, unemployment compensation coverage is limited by two broad conditions--the nature of the business and the size of the firm.

"Nature of business" is negatively defined in most State laws in terms of the types of employment exempt from contribution requirements. Generally excluded in 1939 were:

1. Agricultural labor.
2. Domestic service in a private home;
3. Service performed as an officer or member of a crew of a vessel on the navigable waters of the United States;
4. Service performed by an individual in the employ of his son, daughter, or spouse, and service performed by a child under the age of twenty-one in the employ of his father or mother;
5. Service performed in the employ of the United States Government or of an instrumentality of the United States;
6. Service performed in the employ of a corporation, community chest, fund, or foundation, organized and

---

1/ The average annual wage earned in covered industries could be computed by dividing total wages earned by the number of workers with wage credits.

2/ See Comparison of State Unemployment Compensation Laws, as of October 1, 1940. Employment Security Memorandum No. 8, Washington, D.C., November 1940.

operated exclusively for religious, charitable, scientific, literary, or educational purposes, or for the prevention of cruelty to children or animals, no part of the net earnings of which inures to the benefit of any private shareholder or individual.

Deviations from this general pattern are frequent. New York, for example, covers domestic service in a private home if the employer has four or more servants.

These are, however, not the only types of excluded employment. As a consequence of the joint conditions that govern liability for unemployment compensation contributions, there are large groups of employers engaged in subject industries and services who are exempt because they do not employ a specified number of workers for a period of sufficient duration, usually a portion of one day in each of twenty different weeks. Thus, some employers operating the year round in covered industries are exempt because they do not employ the minimum number specified in the State law. Others are exempt, even though they employ the minimum number of workers in employments subject to the State law, because they did not employ the required number of workers over the required period. In 1939, in 8 States an employer's minimum annual or quarterly pay roll was a factor in determining coverage.

A change in industrial coverage was made in 1939 by Wisconsin whereby about 8,500 out of approximately 13,500 government (non-Federal) employees who were formerly included were excluded after July 1. The most important change in the "nature-of-business" exclusions in 1939 became effective July 1, when, by Federal statute, employees of interstate railroads and certain allied employers were transferred from coverage by State unemployment compensation systems to a special Federal system of unemployment insurance.

Massachusetts reduced its "size-of-firm" limitation from employers of at least eight to employers of at least four workers, effective January 1, 1939. Six States, all of which had previously covered employers of less than eight workers, changed their coverage in 1939 by basing it on the size of the employer's pay roll as well as on the number of workers employed; the new basis extended coverage in New Mexico and Utah and reduced it slightly in Idaho, Montana, Nevada, and Wyoming. More

than half of the States were still following the pattern of the Federal Unemployment Tax Act in 1939 and covering only firms employing eight or more.<sup>1/</sup> The other laws covered smaller firms; in December 1939, 11 States, all (with the exception of Pennsylvania) relatively small in terms of the volume of employment, required contributions from all employers in covered industries, provided their businesses had been in operation for the requisite period of time during the year.

The "size-of-firm" coverage limitations in State laws in December of each of the years 1938-1940 were as follows:

<u>Coverage Limitation</u>	<u>Number of States 2/</u>		
	<u>1938</u>	<u>1939</u>	<u>1940</u>
Employers of:			
8 or more	28	26	25
7 or more	1	0	0
6 or more	0	1	2
5 or more	1	1	1
4 or more	9	3/9	3/9
3 or more	2	2	2
2 or more	0	1	1
1 or more	10	11	11

It is believed that there is no serious understatement or distortion in the 1939 figures resulting from delinquency on the part of employers in submitting contribution reports to the State agencies.

### 3 Industrial Classification

The Social Security Board Industrial Classification Code, designed primarily to serve the needs of the Social Security program, is similar to but not identical with systems used by

- 
- <sup>1/</sup> Most States permit elective coverage to employers of fewer workers than specified in the State law and to certain types of employment specifically excluded by these laws. The extent of such voluntary coverage is not known.
- <sup>2/</sup> States having coverage based on both number of workers employed and size of pay roll are tabulated according to the number of workers.
- <sup>3/</sup> Includes Kentucky where, as an alternative to coverage of employers of 4 or more workers paid at least \$50 each in each of 3 quarters, there is provision for the coverage of firms employing 8 or more workers in 20 weeks.

other Federal agencies. Under the Social Security Board industrial classification procedure adopted by all State unemployment compensation agencies, each place of business is coded on the basis of its principal activity. If a firm conducts different activities at its various establishments, separate industry identification numbers are assigned to each establishment. For example, should a firm which is engaged primarily in manufacturing also operate retail outlets, separate employment and wage data would be reported for each of the functions. Thus, employment and wages for multi-unit employers reported to the Bureau of Employment Security are classified under the industrial activity and State to which they properly belong rather than according to the primary industry or location of the reporting employer.

There have been several editions of the Social Security Board Industrial Classification Code. During 1939, most State unemployment compensation agencies used the latest (1939)<sup>1/</sup> edition, some classified employers according to the March 1937 edition and four State agencies—Massachusetts, North Carolina, West Virginia, and the District of Columbia—were still using the 1936 Code. Industrial classification of employment and wage data for 1940 and subsequent years will be made by all State agencies on the basis of the 1939 edition of the Code.

Classifications in the 1936 edition were almost identical to those in the 1937. The 1939 Code provided for a few changes in 2-digit industry classifications. In addition, while the 1937 code provided only for classifications by major industry groups (2-digits) full use of the 1939 code makes possible subclassification into smaller industry groups (3-digits) or even industries (4-digits). Employment and wage data by industry groups (3-digits) for all States will first become available with the 1942 figures. The detailed classification will make possible similarly detailed analyses of Nation-wide and State trends in employment and wages.

#### 4 Unemployment Compensation Coverage

Estimates based on figures supplied by State unemployment compensation agencies indicate that 31,530,500 workers,<sup>2/</sup> or nearly 50 percent more than the average of 21,377,500

---

<sup>1/</sup> For a description of major industry groups (2-digits) in the 1939 edition of the code see pp. 37-54.

<sup>2/</sup> Adjusted to exclude estimated duplicate reporting among the States.

covered workers reported as employed during the last pay period of each month, obtained wage credits toward unemployment benefits during 1939. This figure represents the maximum number of workers who may be eligible for benefits during their periods of unemployment. The total number of employees who received some wages taxable under the old-age and survivors insurance program in 1939 was 33,100,000, 5 percent more than under the unemployment compensation program.

Workers with wage credits under the unemployment compensation program in 1939 constituted approximately 60 percent of the total labor force of the continental United States, including employers and the self-employed.<sup>1/</sup> To an indeterminate extent, this proportion overstates the degree to which the labor force is covered by unemployment compensation because certain individuals regarded as not in the labor force during the Census week undoubtedly had earned wages in covered employment in the preceding year. Women cannery workers who are ordinarily housewives are one example, students another, of workers with wage credits but not included in the labor force by the Census Bureau.

The ratio of the number of workers with wage credits under unemployment compensation laws to the total labor force in 1939 ranged from 21.0 percent in North Dakota to 91.3 percent in Rhode Island.<sup>2/</sup> The ratio is, of course, higher in industrialized States than in States in which a large part of the working population is employed in agriculture or other industries not usually included under unemployment compensation laws. The ratio of coverage to total labor force is also affected by the size-of-firm limitations in State laws.

The average number of workers employed during the last pay period of each month in establishments covered by State unemployment compensation programs in 1939 amounted to 85 percent of the average employment of workers covered by the Federal

---

<sup>1/</sup> The Bureau of the Census preliminary figure of 52,841,000 for the total labor force of the United States (excluding Alaska and Hawaii) as of the last week in March 1940 is used here. It includes all persons 14 years old and over with a job, at work on public emergency projects (WPA, NYA, CCC, etc.), or seeking work.

<sup>2/</sup> See Table I, p. 33.

old-age and survivors insurance program <sup>1/</sup> and 93 percent of all employees in covered industries, as derived from estimates of the Bureau of Labor Statistics.<sup>2/</sup>

A comparison of employment in covered industries as derived from Bureau of Labor Statistics estimates with employment under the unemployment compensation program by industry division, presented on page 12, clearly indicates that the ratios of unemployment compensation coverage were lowest in industries generally characterized by small establishments. The inverses of the ratios of coverage for employment in trade and in transportation, communication, and other public utilities probably represent fairly good indications of the proportion of workers excluded from unemployment compensation coverage by size-of-firm and employment requirements in State laws. The same factor affects the degree of

<sup>1/</sup> Social Security Bulletin, August 1941. Comparison is based on employment in the 4 months of March, June, September, and December, the only months for which old-age and survivors insurance data are available. The difference in coverage under the two programs is due principally to size-of-firm limitations under State unemployment compensation laws. A further difference between the figures is that under the old-age and survivors insurance program employers are asked to report the number of employees on the last day or last pay roll of the month; under the employment security program they report the number on the last pay roll of the month. Old-age and survivors insurance data have been adjusted upward to cover delinquent reporting; the corresponding proportion before the adjustment was 88 percent. See table, p. 12.

<sup>2/</sup> The Bureau of Labor Statistics series used is the estimates of the number of employees in all nonagricultural establishments, excluding self-employed persons, casual workers, domestic servants, and the military and naval forces of the government, revision of April 1941. There have been some observations that these estimates are too low. See W. S. Woytinsky "Controversial Aspects of Unemployment Estimates in the United States," Review of Economic Statistics, Volume XXIII, No. 2, May 1941, and Arthur H. Reede, "Adequacy of Employment Statistics," Journal of the American Statistical Association, March 1941.

Comparison of average monthly employment, by industry divisions, as estimated by the Bureau of Labor Statistics and as reported under the State unemployment compensation and the Federal old-age and survivors insurance programs, for covered industries, 1939

1/ Social Security Yearbook, 1939, p. 68-9; adjusted for employment in secondary industries. Averages are derived from the 4 month data for March, June, September, and December, the only months for which OASI data are available. Monthly data represent employment as of the last day or last pay period ending in the month, not adjusted for delinquent reporting.

2/ Averages derived from employment as of the last pay period in the 4 months of March, June, September, and December, the comparable months for which OASI data are available.

3/ Estimates of employees in nonagricultural establishments, Department of Labor, Bureau of Labor Statistics, release of April 1941; adjustments for noncovered industries obtained directly from the BLS. Averages derived from the 12 monthly estimates of employment as of the pay period ending nearest the 15th of the month.

4/ Averages derived from the 12 months of employment as of the last pay period ending in the month.

5/ Includes Alaska and Hawaii.

6/ Includes Alaska and Hawaii, but excludes certain covered domestic service and government employment reported by New York and Wisconsin respectively.

7/ Excludes employment for interstate railroads and allied employers, government and maritime employment, government banks, private education, and nonprofit hospitals and other medical services. BLS estimates already exclude domestic service and agricultural labor.

8/ Excludes employment for Alaska and Hawaii; and certain covered domestic service and government employment reported by New York and Wisconsin respectively.

9/ Includes approximately 488,000 workers reported on employer returns which did not carry industrial codes.

coverage for the construction industry;<sup>1/</sup> the exclusion from coverage by most State unemployment compensation laws of small contractors, who may have a marked increase in employment during the seasonal peak—an increase which does not, however, extend over 20 or more weeks—may account for most of this difference. The excess of covered employment in manufacturing as compared with the Bureau of Labor Statistics estimate may be due to differences in definition—the unemployment compensation series includes administrative offices and auxiliary units which are classified with the principal manufacturing activity to which they are related. Figures for employment in mining in 1939 are greatly affected by the stoppage in bituminous production which began on April 1 and continued for approximately 7 weeks. The prevalence of small establishments in service and in finance, insurance, and real estate is undoubtedly responsible for the low ratio of unemployment compensation coverage for those industries.

Limitations in State laws relating to the minimum size-of-firm, i.e., the minimum number of covered employees which a firm must employ for a specified period in order to be subject to the unemployment compensation law, had the effect of excluding from unemployment compensation coverage 12 percent of the employees in trade and 25 percent of those in services who were covered by old-age and survivors insurance, as indicated in the tabulation on page 12. Comparisons of covered employment under the two programs, however, are of limited significance for some industries because of differences in the method of classifying multi-industry employers. Under the old-age and survivors insurance program, employment for multi-industry employers is classified according to the primary industry of the company, rather than by establishment, and an estimated adjustment is then made for secondary employment. This factor especially affects comparisons of covered employment under the two programs in manufacturing and mining.

As indicated in the tabulation on page 14, 87 percent of estimated total wages and salaries earned in industries and services covered by State unemployment compensation laws in 1939, as derived from estimates of the Bureau of Foreign and

---

<sup>1/</sup> Unemployment compensation data are used extensively by the Bureau of Labor Statistics for measuring monthly trends in the construction industry, especially by States.

Comparison of total wages, by industry division, as estimated by the Bureau of Foreign and Domestic Commerce and as reported under the State unemployment compensation programs, for covered industries, 1939

(Wages in millions)

1/ U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce, National Income Division, Survey of Current Business, June 1941, with adjustments for noncovered industries obtained directly from the National Income Division.

2/ Represents total wages earned in covered employment, including nontaxable individual employee annual earnings from one employer in excess of \$3,000 (such wages were estimated for New York which reported taxable wages only).

3/ Excludes wages for agricultural labor, interstate railroads and allied employers, government and maritime employment, domestic service, national banks, and certain private and nonprofit enterprises not covered by State unemployment compensation programs.

4/ Excludes Alaska and Hawaii and certain covered domestic service and governmental employment reported by New York and Wisconsin respectively.

5/ Wage data for restaurants have been excluded from Service and included with Trade to make the two series comparable.

Domestic Commerce,<sup>1/</sup> was earned by covered workers. Only 74 percent of all wages in construction and 58 percent in service, finance, insurance, real estate, and miscellaneous industries was earned by covered employees. On the other hand, covered employees earned 92 percent of all wages in transportation, communication, and other public utilities and 89 percent in trade. Differences in industrial classification between the two series probably account for the indicated excess of wages earned in establishments covered by State unemployment compensation programs over estimated wages earned in all mining establishments and for the very high ratio of coverage in manufacturing.

Comparisons of wages earned in employment covered by State unemployment compensation programs with wages taxable under the Federal old-age and survivors insurance program have little significance because, in addition to differences due to size-of-firm exclusions under the State laws, wages taxable under the Federal program exclude wages of an individual employee in excess of \$3,000 a year from a given employer, whereas, except for New York, figures for wages of employees covered by State unemployment compensation programs include such earnings.

In 8 States the number of employees covered by the unemployment compensation program equaled or exceeded the number estimated by the Bureau of Labor Statistics to be employed in covered industries.<sup>2/</sup> In these 8 States coverage extended to all firms regardless of size.<sup>3/</sup> In 31 States covered employment accounted for 90 percent or more of all employment in covered industries. In the 11 States in which the proportion was less than 85 percent, coverage did not extend to employers having less than 8 workers.

The Bureau of Labor Statistics figures used for comparison are based on unpublished preliminary estimates subject to revisions which may materially affect the ratios for some States. Such revisions may reduce the ratios for States in which covered employment exceeds the present estimates of all employment in covered industries, and, for example, may increase the present ratios of 68 and 72 for North and South Dakota, respectively.

---

<sup>1/</sup> Estimates of the National Income Division. See Survey of Current Business, June 1941.

<sup>2/</sup> See p. 16 and Table II, p. 34.

<sup>3/</sup> Except for the District of Columbia, however, all these States had pay roll or employment requirements.

Distribution of States according to ratio of covered employment to total employment in covered industries, 1939 <sup>1/</sup>

Ratio (percent)	Total number of States <sup>2/</sup>	Number of States limiting coverage to employers of:			Number of States hav- ing change in size-of-firm coverage during year
		1 or more	3-6 or more	8 or more	
100 and over	8	8			
95-99	7	1	5	1	
90-94	16		6	8	2
85-89	7		2	5	
80-84	7			7	
75-79	2			2	
70-74	1			1	
Under 70	1			1	

A similar comparison between wages earned by covered employees and all wages and salaries earned in covered industries, derived from estimates compiled by the Bureau of Foreign and Domestic Commerce, <sup>1/</sup> indicates that in 8 States earnings of covered workers accounted for 90 percent or more of all earnings in covered industries. Four of these 8 were States which had no size-of-firm limitation to coverage. <sup>3/</sup> In 25 States earnings of covered workers accounted for 80 to 89 percent of all earnings in covered industries. Of the 16 States in which the ratio was less than 80 percent, 15 did not cover firms employing less than 8 workers.

The Bureau of Foreign and Domestic Commerce figures, like those of the Bureau of Labor Statistics, represent estimates which are undergoing constant revision. When final adjustments of the estimates are made, some of the more unusual relationships, such as the 92 percent coverage of wages for a State (Illinois) which excludes from coverage firms having less than 8 workers, may be modified. Similarly, the coverage of only 72 percent for a State (Nevada) which subjects all firms, regardless of size, to unemployment compensation contributions may be adjusted upward.

<sup>1/</sup> See p. 17 and Table II, p. 34.

<sup>2/</sup> Excluding Alaska and Hawaii for which the Bureau of Labor Statistics does not estimate employment.

<sup>3/</sup> There were, however, employment requirements.

Distribution of States according to ratio of wages earned in covered employment to total wages and salaries in covered industries, 1939 <sup>1/</sup>

Ratio (percent)	Total number of States <sup>2/</sup>	Number of States limiting coverage to employers of:			Number of States hav- ing change in size-of-firm coverage during year
		1 or more	3-6 or more	8 or more	
90 and over	8	4	2	1	1
84-89	12	2	6	3	1
80-84	13	2	5	6	
75-79	7			7	
70-74	6	1		5	
Under 70	3			3	

The total coverage of the State unemployment compensation program in 1939 would probably have been increased about 11 percent if the size-of-firm exclusions in all State laws had been eliminated, estimates based on comparisons with data of the Bureau of Old-Age and Survivors Insurance indicate. These data indicate further that coverage in the nine States in which it was limited to employers of four or more workers, would have been increased an average of 7.9 percent in 1939 if it had extended to all employers regardless of size, and the total coverage of the State unemployment compensation program would have been increased 2.5 percent. Similarly, had coverage provisions been altered in the 26 States covering only employers of eight or more to include all employers regardless of the size-of-firm, coverage in those States would have been increased 18.3 percent and the total coverage of the State unemployment compensation program 7.7 percent.

### 5 Industrial Trends

Except for relatively slight declines in April and July, covered employment rose moderately but steadily during the

<sup>1/</sup> See Table II, p. 34, for ratios by State.

<sup>2/</sup> Excluding Alaska and Hawaii for which the Bureau of Foreign and Domestic Commerce does not estimate wages.

first 10 months of 1939 from 20.2 million in January to a peak of 22.5 million in October, an increase of 11.1 percent. The decline in April was caused by the widespread work stoppage in the bituminous coal industry which was reflected in sharp decreases in employment in Alabama, Kentucky, Pennsylvania, and West Virginia. The down-turn in July is attributable largely to normal seasonal factors, such as the reduction of employment in Michigan resulting from lay-offs during the period when preparations are made for producing new models in automobile manufacturing establishments. Customary shutdowns to take year-end inventories and seasonal declines in construction, mining, and certain manufacturing industries such as food, clothing, and tobacco probably accounted for the 2.1 percent decline in covered employment in the last 2 months of the year. December 1939 employment, however, was still 9.2 percent above the level of December 1938.

Wages earned in covered employment increased steadily from \$6.6 billion in the first quarter to \$7.8 billion in the last, a 19 percent rise, reflecting fuller employment as well as the usual year-end bonuses. Declines in some industries for a single quarter, as in bituminous coal mining in April-June and in automobile manufacturing in July-September were insufficient to reverse the upward national trend.

The expansion in the number of covered workers employed, which characterized the last half of 1939, was led by a substantial increase in mining, after the stoppage in the Spring, and was shared by manufacturing, utilities, and wholesale and retail trade. Increases of about 200,000 from July to December in the number of covered workers employed in the manufacture of iron and steel and their products, 180,000 in the manufacture of automobiles and automobile equipment, and 109,000 in the production of electrical and other machinery, accounted for the larger part of the rise in manufacturing. Employment in trade increased 413,000 from July to December. More than 70 percent of this increase was due to expansion of employment in retail general merchandising, which is greatly affected by the year-end holidays.

In the service industries, of which personal service is the largest, covered employment rose gradually from January to June, then declined slightly during the summer before attaining

a peak in September, attributable to an increase in employment in the amusement and recreation industry. Thereafter, it declined and, by the end of December, was only 2.2 percent above the January figure.

Construction and finance furnished contrasts to the generally persistent upward tendency. Covered employment in the highly seasonal construction industry fluctuated widely during 1939. From a low of 733,000 in February, it rose 52.7 percent to a peak in August, and then declined 27.5 percent to 811,000 at the end of December, although 8.9 percent above the first month of the year. Covered employment in finance, insurance, and real estate remained comparatively steady throughout the year and was slightly lower in December than in January.

The pattern of industrial trends in quarterly wages earned in covered employment in 1939 generally followed that of employment. The distortion in the wage figures due to the exclusion from the New York reports of wages for an individual worker in excess of \$3,000 a year from any single employer is especially apparent in the high-wage finance, insurance, and real estate division, for which reported wages declined more than \$10 million from the first to the second quarter, and an almost equal drop took place between the second and third quarters, although no comparable decrease occurred in the number of workers employed. If data for New York were omitted from the total for the industry division, wages earned in finance and related industries would have shown a steady increase from \$298 million in the first quarter to \$338 million in the fourth. The effect of the wage exclusion in New York was to increasingly understate the amounts paid during the last 3 quarters of the year.<sup>1/</sup> Christmas and other bonus payments during the last quarter tend to offset this factor somewhat.

## 6 Industrial and Geographical Concentrations

Due both to the statutory exclusion from coverage of certain classes, such as agricultural, maritime, and domestic employees, and also to size-of-firm and pay roll limitations which have the effect of excluding a wide variety of industries and services characterized by small establishments, covered employment and wages are highly concentrated.

---

<sup>1/</sup> After the first \$3,000 has been reported, employer reports in New York exclude wages paid to an employee for subsequent periods of the year.

Manufacturing industries in 1939 accounted for 45.5 percent of the average monthly employment of all workers covered by State unemployment compensation programs and 45.7 percent of their wages. Covered employment within the manufacturing division was almost equally divided between industries producing durable and nondurable goods. Durable goods industries accounted for 46.3 percent and nondurable goods industries for 53.7 percent of covered employment in the division.<sup>1/</sup> In spite of the exclusions arising from size-of-firm limitations, the wholesale and retail trade division <sup>2/</sup> ranked second, with 25.2 percent of the employment and 23.7 percent of the wages. Thus, more than 70 percent of all covered employment and wages in 1939 was to be found in these two industry divisions combined. The remaining 30 percent was distributed among five industry divisions—transportation, communication, and other public utilities <sup>3/</sup> had 7.5 percent of all employment and 8.5 percent of wages; service industries 8.1 percent of total employment and 7.1 percent of wages; finance, insurance, and real estate 4.9 percent of employment and 6.2 percent of wages; construction 4.5 percent of employment and 4.4 percent of wages; and mining 3.8 and 3.9 percent, respectively.

The concentration of covered employment in certain industry divisions accounts for a similar concentration in States with large numbers of workers in such industries. The 8 highly industrialized States of California, Illinois, Massachusetts, Michigan, New Jersey, New York, Ohio, and Pennsylvania had 58 percent of all covered workers and 63 percent of total wages earned in covered employment. On the other hand, 24 States, mostly located in the Rocky Mountain area and the agricultural West, each had less than 1 percent, and together only about 10 percent of total covered employment.

In both New York and Pennsylvania more than a million covered workers were employed in manufacturing. These States, together with the 6 others mentioned above, accounted for about 60 percent of all covered employment and 65 percent of the total wages earned by covered workers in manufacturing—

- 
- <sup>1/</sup> Durable goods industries include major industry groups 24, 25, 32-39; nondurable include groups 20-23, 26-31.
  - <sup>2/</sup> Includes garages and filling stations, and eating and drinking places.
  - <sup>3/</sup> Excludes interstate railroads and certain of their subsidiaries.

a distribution which corresponds closely to that shown by the 1939 Census of Manufactures. These 8 States also embraced 57 percent of covered employment and 61 percent of wages in wholesale and retail trade. The ratios for wages would have been higher if New York had reported total, instead of merely taxable, wages.

New York, partly because its coverage provisions extend to employers of 4 or more workers, and California, because of its motion-picture industry, had more than 513,000 of the 1,723,240 covered workers employed in service industries. In the service division, these two States, together with Illinois, Ohio, and Pennsylvania, accounted for 52 percent of all covered employment and 59 percent of total wages.

Workers in transportation, communication, and other public utilities (excluding railroads and other employers under the jurisdiction of the Railroad Retirement Board) were similarly concentrated with slightly more than half of the covered workers in California, Illinois, New York, Ohio, Pennsylvania, and Texas.

There was even less geographical dispersion among covered workers in finance, insurance, and real estate. Because of the concentration of large financial institutions in New York City, New York State alone accounted for 325,235, or 31 percent, of the average covered employment in that industry division—more than the combined total of California, Illinois, and Pennsylvania, which had the next largest numbers.

Pennsylvania, where much of the bituminous, and the entire anthracite, mining industry of the country is located, together with West Virginia, Illinois, Kentucky, and Texas, (where there were 55,437 covered workers engaged in the production of crude petroleum and natural gas) accounted for approximately 56 percent of both the average monthly covered employment and the wages earned by covered workers in mining industries.

Covered employment in construction was more evenly distributed geographically, although 29 percent of the covered workers and 34 percent of the wages were concentrated in New York, Pennsylvania, and California.

The higher proportions of wages than of employment for some industry divisions and groups of States reflect higher

annual per capita earnings, resulting from more regular employment or higher wage rates.

### 7 State Industrial Patterns

The industrial composition of covered employment and wages within the boundaries of each State is highly significant in relation to the unemployment compensation program. While covered employment in some States is highly diversified, in others it is concentrated in a few major industry groups. Untoward developments of a cyclical, seasonal, technological, or fortuitous nature, which may affect these industries, will have repercussions on the operation of the unemployment compensation program in these States, through heavy administrative burdens, and possibly also serious drains on funds.

The relative importance of each industry division and major industry group in each of the 51 jurisdictions is shown in the tables which follow.<sup>1/</sup> The distributions are based on employment covered by State unemployment compensation laws and consequently are influenced by size-of-firm and other limitations which greatly affect their broad economic significance. Consideration of such limitations is also extremely important in drawing comparisons between States, and even in interpreting data for a single State, since size-of-firm limitations will have the effect of understating the proportion of employment in industries characterized by small establishments.

No single major industry group accounted for as much as 10 percent of all covered employment in 15 States, including New York, New Jersey, and Illinois. In Alaska, on the other hand, more than 60 percent of covered employment was concentrated in two major industry groups--the manufacture of food and kindred products and the mining of metals. A single major industry group--textile manufacturing--accounted for 50 percent of covered employment in South Carolina, 44 percent in North Carolina, 34 percent in Rhode Island, and 26 percent in Georgia. Similarly, nearly 43 percent of all covered workers in Hawaii were employed in food manufacturing alone, 37 percent in West Virginia in bituminous coal mining, and 28 percent in Nevada in metal mining. New Hampshire had 38 percent of its covered employment in leather products factories and textile mills. The manufacture of automobiles and automobile equipment accounted for 29 percent of all covered employment

---

<sup>1/</sup> See Series B, State Tables, pp. 98-199.

in Michigan, and lumber and basic timber products for more than 22 percent in Oregon. In 26 States, between 10 and 20 percent of all covered employment was concentrated in one major industry group.

The following tabulation indicates States with more than 10 percent of their total covered employment in a single major industry group:

40-50 percent

Food and kindred products	Hawaii
Textile-mill products	North Carolina, South Carolina

30-40 percent

Bituminous and other soft-coal mining	West Virginia
Food and kindred products	Alaska
Metal mining	Alaska
Textile-mill products	Rhode Island

20-30 percent

Automobiles and automobile equipment	Michigan
Leather and leather products	New Hampshire
Lumber and timber basic products	Oregon
Metal mining	Nevada
Textile-mill products	Georgia

10-20 percent

Bituminous and other soft-coal mining	Kentucky, Wyoming
Crude-petroleum and natural-gas production	Oklahoma
Food and kindred products	Iowa, Kansas, Nebraska, North Dakota, South Dakota
Iron and steel and their products	Alabama, Connecticut, Indiana, Ohio, Pennsylvania
Leather and leather products	Maine
Lumber and timber basic products	Arkansas, Idaho, Mississippi, Washington
Machinery (except electrical)	Wisconsin
Metal mining	Arizona, Idaho, Montana
Other wholesale and retail trade	North Dakota
Paper and allied products	Maine
Retail general merchandise	North Dakota
Textile-mill products	Alabama, Maine, Massachusetts, New Hampshire, Tennessee, Vermont
Wholesale distributors	Florida

The proportion of total covered employment in the highly seasonal construction industry in no State exceeded 13 percent, and ranged between 5 and 10 for most. In 19 States, less than 5 percent of the covered workers were engaged in construction. The generally low ratios of covered workers in this industry division are due largely to size-of-firm exclusions in State laws.

The size-of-firm factor also affected the State patterns of covered employment in the service industries. There were higher proportions in this industry division in Arizona, Arkansas, District of Columbia, Idaho, Minnesota, Montana, Nevada, and Wyoming—all of which cover employers of 1 or more—than in most other States. California led all the remaining States with 13.8 percent of its total covered employment in service industries, which include the motion picture industry, hotels, and personal services. New York had 10.8 percent of its covered employment in services. In spite of the effect of size-of-firm limitations and of the exclusion of domestic service in private homes, service industries accounted for not less than 3.6 percent of all covered employment in every State.

The proportion of covered employment in the transportation, communication, and public utilities division, which comprised between 10 and 20 percent of all covered employment in 34 States in 1938, was sharply reduced in 1939 by the removal from State coverage of interstate railroads and certain of their subsidiaries. The bulk of covered employment in the industry division in 1939 was concentrated in the communication, public utilities, and trucking groups. In relation to total employment, the proportion of covered workers in this industry division did not vary greatly among the States, ranging from 3.5 percent in North Carolina to 13.2 percent in Texas.

Although there were 13 States in which the number of covered employees in trade comprised less than one-half of one percent of the Nation's total, for no jurisdiction was employment in this industry division less than 10 percent of its total coverage. The lowest proportion, 10.9 percent, was for Alaska. In the remaining States, it ranged from about 14 to a high of 51 percent, most States having between 25 and 35 percent of their total covered employment in trade.

Workers engaged in finance, insurance, and real estate, on the other hand, exceeded 6 percent of total covered employment only in California, Delaware, the District of Columbia, and New York.

### 8 Monthly Fluctuations in Employment

Measures of monthly fluctuations in covered employment, for industries and States, are presented below. They are coefficients which represent the mean deviation of employment in each month from the average monthly employment during the year, expressed as a percentage of the average monthly employment.<sup>1/</sup> They are uncorrected for secular trend.

Although the coefficient of monthly fluctuation in employment for all industries was only 3.1, the sharply divergent patterns of individual industries are indicated by a range from 0.7 to 12.4 for industry divisions, from 0.6 to 18.4 for major industry groups, and from 1.7 to 40.5 for States. These figures, moreover, are based on total employment in groups of industries or in a State, and so may conceal wider fluctuations in employment in individual industries through the cancellation of possible coinciding peaks and troughs.

For industry divisions, the coefficients of monthly fluctuation in employment were as follows:

<u>Industry division</u>	<u>Coefficient of monthly fluctuation, 1939</u>
Mining	6.4
Construction	12.4
Manufacturing	4.1
Transportation, communication, and other public utilities	1.8
Wholesale and retail trade	2.9
Finance, insurance, and real estate	0.7
Service industries	2.4
Miscellaneous <sup>2/</sup>	9.4

<sup>1/</sup> The coefficient may be expressed mathematically as:

$$C = \left[ \frac{\sum d}{12} \div M \right] \times 100 \text{ where}$$

C = coefficient

M = average monthly employment for the 12 months of 1939.

$\sum d$  = sum of the monthly deviations from M.

<sup>2/</sup> Includes establishments in agriculture, forestry, and fishing which may be covered, and others not elsewhere classified.

Within these divisions, there was considerable variation among major industry groups.<sup>1/</sup> Although the coefficient for the entire mining division averaged 6.4, it was 14.4 for bituminous and other soft-coal mining and 8.6 for non-metallic mining and quarrying. Included in mining is one of the most stable major industry groups--crude petroleum and natural gas production, with a coefficient of 1.4--which reduced the average for the division.

Covered employment in all branches of the construction industry showed sharp monthly fluctuations. The range of the measure of monthly fluctuation for groups in the manufacturing division was comparatively narrow--from 0.6 in printing, publishing and allied industries to 8.1 in the manufacture of automobiles and automobile equipment. The industrial coverage of many major industry groups in this division, however, is so wide as to allow for mutual cancellation of peaks and troughs among individual industries and possibly to conceal wide monthly fluctuations. The apparel group, for example, has a coefficient of only 3.8 although it includes the men's and women's clothing industries, which are subject to wide monthly fluctuations.

Even the relatively stable utilities division includes a major industry group with fairly wide monthly fluctuations in employment--trucking and/or warehousing for hire has a coefficient of 6.0. Due to the requirements of a specified number of weeks during which a minimum number of workers must be employed in a year, many seasonal employers in trade, as in other industries, are not subject to unemployment compensation programs. Even after these exclusions, however, covered employment in retail general merchandising had a coefficient of monthly fluctuation of 8.2. Other coefficients in the trade division ranged from 1.6 for the retailing of food (including liquor stores) to 7.0 for the retailing of apparel and accessories.

Covered employment in all major industry groups in the finance, insurance, and real estate division was quite stable. The only exception was employment in holding companies (except real estate holding companies) which had a coefficient of 4.0. The service division embraces both some of the most stable and some of the most unstable industry groups. The coefficient of

---

<sup>1/</sup> See Table III, p. 35, for coefficients of monthly fluctuation in employment by major industry group.

fluctuation was 1.0 for business services (not elsewhere classified), and 1.2 for motion pictures, for medical and other health services, and for law offices and related services; but for the amusement and recreation group it was 10.6, and for educational institutions and agencies, 11.6.

Inclusion in the miscellaneous division of covered employment in establishments engaged in agricultural activities accounts for the high coefficient of 9.4.

For the country as a whole, the major industry groups with the highest coefficients 1/ of monthly fluctuation in employment in 1939 were:

<u>Major industry group</u>	<u>Coefficient of monthly fluctuation, 1939</u>
General contractors, other than building	18.4
Bituminous and other soft-coal mining	14.4
Educational institutions and agencies	11.6
Construction--special trade contractors	10.6
Amusement and recreation and related services, not elsewhere classified	10.6
Building construction--general contractors	10.0
Nonmetallic mining and quarrying	8.6
Retail general merchandise	8.2
Manufacture of automobiles and automobile equipment	8.1
Manufacture of food and kindred products	7.6
Manufacture of iron and steel and their products	7.1
Retail apparel and accessories	7.0
Manufacture of lumber and timber basic products	6.8

---

1/ "Regular government agencies" (major industry group 94) has been omitted because the coefficient was greatly affected by a change during the year in the coverage provision of the Wisconsin State law.

The major industry groups in the country as a whole with the lowest coefficients of monthly fluctuation were:

<u>Major industry group</u>	<u>Coefficient of monthly fluctuation, 1939</u>
Insurance carriers	0.6
Printing, publishing and allied industries	0.6
Insurance agents and brokers	0.8
Communication: Telephone, telegraph and related services	0.9
Finance agencies, not elsewhere classified	0.9
Business services, not elsewhere classified	1.0
Banks and trust companies	1.2
Motion pictures	1.2
Medical and other health services	1.2
Law offices and related services	1.2
Crude petroleum and natural gas production	1.4
Employment agencies and commercial and trade schools	1.4
Street, suburban, and interurban railways (other than those in group 40) and city and suburban bus lines	1.5
Other transportation, except water transportation	1.5

A similar ranking of States,<sup>1/</sup> shown on page 29, indicates that, in general, the highest coefficients of fluctuation were associated with States in which covered employment was either not diversified or was concentrated in a few unstable industries, and the lowest with States which had either a high degree of diversification or a high proportion of employment in relatively stable industries.

---

<sup>1/</sup> See Table IV, p. 36, for coefficients of monthly fluctuation in employment by State.

<u>State</u>	<u>Highest coefficients of monthly fluctuation, 1939</u>	<u>State</u>	<u>Lowest coefficients of monthly fluctuation, 1939</u>
Alaska	40.5	Texas	1.7
Oregon	10.1	Missouri	1.8
Wyoming	10.1	Oklahoma	1.9
Idaho	9.8	New York	2.2
Hawaii	7.4	Tennessee	2.2
Florida	7.3	Arizona	2.3
Nevada	6.9	Kansas	2.4
West Virginia <sup>1/</sup>	6.7	District of Columbia	2.5
Montana	6.3	Massachusetts	2.5

Covered employment in almost every State with a high coefficient of fluctuation was dominated by one or two industry groups in which employment fluctuated widely. The coefficient in each of the predominant groups of industries in these States in 1939 was as follows:

<u>State</u>	<u>Industry division or major industry group</u>	<u>Percentage of all covered employment in the State, 1939</u>	<u>Coefficient of monthly fluctuation, 1939</u>
Alaska	Manufacture of food and kindred products	30.5	89.1
	Metal mining	30.8	25.1
Oregon	Manufacture of lumber and basic timber products	22.3	16.7
Wyoming	Total construction	11.0	32.7
Idaho	Manufacture of lumber and basic timber products	13.9	30.5
Hawaii	Manufacture of food and kindred products	42.8	16.7
Florida	Wholesale distributors	10.5	24.7
West Virginia	Bituminous and other soft-coal mining	37.4	13.2
Montana	Total construction	8.4	28.4

<sup>1/</sup> Unadjusted for the increase in the coefficient caused by the stoppage of work in bituminous coal mining in April-May.

In some of these States, such as Alaska and Hawaii, climatic conditions are the major factor determining the monthly pattern of covered employment. In others, a lack of industrial diversification contributes to the immobility of labor; workers are dependent on a few, often seasonal, industries and when layoffs occur there are rare opportunities for employment in other kinds of enterprise.

Covered employment in New York and Missouri, on the other hand, is highly diversified and there are many opportunities for interindustry migration in times of slack. A single stable industry—crude petroleum and natural gas production—dominates covered employment in Texas and Oklahoma. The coefficient of fluctuation for this major industry group in Texas was only 1.3, and in Oklahoma, 2.5. The pattern of covered employment in Kansas is determined by a few relatively stable industries. The textile manufacturing industry of Tennessee, which accounted for 13 percent of all covered employment in the State in 1939, had a coefficient of fluctuation of only 1.9.

## **Analytical Tables**

Workers with wage credits for unemployment compensation, 1/ 1939, compared with total labor force, 2/ last week of March 1940, by States

1/ Estimated number of different workers in each State who have earned wages in covered employment during some period in 1939.  
 2/ Estimated by Bureau of the Census on basis of 5 percent sample. Persons 14 years old and over who, during week of March 24-30, 1940, were at work or had a job, were working on public emergency projects, or were seeking work.  
 3/ Since these ratios are based on a comparison of the number of workers who obtained a wage credit at any time during an entire year with the number of workers in the labor force in a particular week, they are probably all higher than they would have been if the two factors involved had been on an exactly comparable basis.  
 4/ Excludes Alaska and Hawaii.  
 5/ Or total annual wages of \$6,000 or more if employer's records do not permit accurate count of workers.  
 6/ Any employer of 4 or more workers in each of 3 calendar quarters to each of whom at least \$50 in wages was payable in each such quarter; or 8 or more workers in each of 20 different weeks in current or preceding calendar year.  
 7/ Or 12 or more workers in 10 different weeks as an alternative to 4 or more in 20 weeks.  
 8/ Any employer of 4 or more in any one day during a calendar quarter in which the unit has a total pay roll of \$500 or more.  
 9/ Any employer having a quarterly pay roll of \$78 or more.  
 10/ Any employer having a total annual pay roll of \$500 or more.  
 11/ Any employer having a quarterly pay roll of \$225 or more.  
 12/ Any employer having a quarterly pay roll of \$150 or more.  
 13/ For January-June, employers of 4 or more workers in 20 weeks; for July-December, any employer of 2 or more workers during 13 weeks, or wages during a quarter of \$450 or more.  
 14/ For January-June, employers of 4 or more workers; for July-December, any employer having wages during a calendar quarter of \$140 or more.

Ratio of employment covered by State Unemployment Compensation programs and of wages earned in covered employment to total employment and to total wages and salaries in covered industries, by State, 1939

- <sup>1/</sup> Total employment in covered industries derived from the Bureau of Labor Statistics estimates of the number of employees in nonagricultural establishments, adjusted to exclude employment in noncovered industries for interstate railroads and allied employers, government service, government banks, private education, and nonprofit hospitals and other medical services. The BLS State estimates already exclude agriculture, domestic and maritime service.
- <sup>2/</sup> Total wages and salaries in covered industries derived from estimates of the Bureau of Foreign and Domestic Commerce, National Income Division; adjusted to exclude salaries and wages in noncovered industries—domestic service, agriculture, interstate railroads and allied employers, government services, government banks, maritime employment, private education, and nonprofit hospitals.
- <sup>3/</sup> Or total annual wages of \$6,000 or more if employer's records do not permit accurate count of workers.
- <sup>4/</sup> U. C. data, from which these ratios were derived, adjusted to exclude covered government employment and wages.
- <sup>5/</sup> Any employer of 4 or more workers in each of 3 calendar quarters to each of whom at least \$50 in wages was payable in each such quarter; or 8 or more workers in each of 20 different weeks in current or preceding calendar year.
- <sup>6/</sup> Or 12 or more workers in 10 different weeks as an alternative to 4 or more in 20 weeks.
- <sup>7/</sup> U. C. data, from which these ratios were derived, adjusted to exclude covered domestic service.
- <sup>8/</sup> U. C. data, from which these ratios were derived, adjusted to exclude domestic service. An estimate for total wages was used as State reported taxable wages only, excluding employee annual wages in excess of \$3,000 from one employer.
- <sup>9/</sup> Any employer of 4 or more in any one day during a calendar quarter in which the employer has a total payroll of \$500 or more.
- <sup>10/</sup> Any employer having a quarterly payroll of \$78 or more.
- <sup>11/</sup> Any employer having a total annual payroll of \$500 or more.
- <sup>12/</sup> Any employer having a quarterly payroll of \$225 or more.
- <sup>13/</sup> Any employer having a quarterly payroll of \$150 or more.
- <sup>14/</sup> U. C. data unadjusted for change in coverage. For January-June, employers of 4 or more workers in 20 weeks; for July-December, any employer of 2 or more workers during 13 weeks, or wages during a quarter of \$450 or more.
- <sup>15/</sup> U. C. data unadjusted for change in coverage. For January-June, employers of 4 or more workers; for July-December, any employer having wages during a calendar quarter of \$140 or more.

## Description of Major Industry Groups

The following descriptions are intended as an aid to a more comprehensive interpretation of the data reported by industry division and major industry group. For a more complete description of the 2-, 3-, and 4-digit codes, reference should be made to the more complete "Industrial Classification Code," part 2 of volumes I and II, released by the Research and Statistics Division of the Bureau of Employment Security. Included in this description of the industry groups are many industries and establishments excluded from coverage, in varying degrees, by the various State laws because of the nature of the activity, such as agricultural service, domestic and maritime service, government employment, and service for certain nonprofit organizations.

## DESCRIPTION OF MAJOR INDUSTRY GROUPS

Major  
industry  
group code  
number

Mining

- 10 Metal mining -- The extraction of metal ores from the earth; the dressing and beneficiating of ores regardless of whether the plants are located at the mine or elsewhere, or whether the plants are operated by the mining enterprise or are operated by independent contractors; and mining contract services, such as removal of over-burden, tunnelling, digging, stripping, etc.
- 11 Anthracite mining -- The mining of anthracite coal from underground or surface mines, and the operation of anthracite breakers and preparation plants. Anthracite mines are located only in the State of Pennsylvania.
- 12 Bituminous and other soft-coal mining -- The extraction, from underground and surface mines, of any type of coal except Pennsylvania anthracite, such as bituminous coal and other soft-coal varieties, and the operation of soft-coal breakers and preparation plants.
- 13 Crude-petroleum and natural-gas production -- The production of crude petroleum and natural gas from wells. Contract oil and gas-field service operations are also included.
- 14 Nonmetallic mining and quarrying -- The mining and quarrying of stone and nonmetallic minerals, such as sand and gravel, clays, ceramic and refractory minerals, and gypsum. The mining of rock salt and the mining of phosphate rock, pyrites, sulphur, and other nonmetallic minerals, used predominantly as raw materials in chemical manufacturing, are included in this group. The grinding and pulverizing of certain earths, rocks, or minerals, by establishments not engaged in mining or quarrying, is included in major group 32.

Major  
industry  
group code  
number

Construction

- 15 Building construction -- general contractors --  
General contractors engaged in the construction of residential, farm, industrial, or public buildings.
- 16 General contractors, other than building -- General contractors engaged in engineering projects, such as highway and street construction; heavy construction, such as bridges, tunnels, docks, subways, and sewers; marine construction, such as dredging, underwater rock removal, and harbor and waterway construction; and the erection of structures and appurtenances other than buildings.
- 17 Construction -- special trade contractors -- Sub-contractors engaged in special trades in the field of construction, such as plumbing, painting, plastering, electrical work, and carpentering. Special trade contractors for the most part perform their work at the site of construction. Certain related services performed by repair shops, such as tinsmithing and electrical work, are included in major group 76.

Manufacturing

- 20 Food and kindred products -- The manufacture of foods and beverages for human consumption, and certain related products such as artificial ice, chewing gum, and prepared feeds for animals and fowls.
- 21 Tobacco manufactures -- The manufacture of cigarettes, cigars, smoking and chewing tobacco, and snuff.
- 22 Textile-mill products -- Establishments engaged in manufacturing cotton, silk, rayon, and woolen and worsted goods; knit goods; carpets, rugs, and other floor coverings; and miscellaneous textile goods. Also included are the dyeing and finishing of fibers, yarns, and cloths.

Major  
industry  
group code  
number

---

- 23 Apparel and other finished products made from fabrics and similar materials -- The production of clothing and other fabricated products by cutting up and sewing fabrics woven or knitted in other establishments. All types of textiles and furs are utilized as well as leather, rubber, and other materials. Custom tailors and dressmakers, not operating on a factory basis, are not considered to be part of the manufacturing industries.
- 24 Lumber and timber basic products -- The production of lumber and timber basic products in logging camps, sawmills, veneer mills, lathe mills, shingle mills, cooperage-stock mills, planing mills, and plywood mills.
- 25 Furniture and finished lumber products -- The manufacture of furniture made of wood or other materials; finished articles made entirely or mainly of wood or wood substitutes; articles related to those made of wood, such as mattresses and studio couches; and the treatment of wood with creosote and other preservatives. Equipment specifically designed for use in beauty and barber shops, pianos, and wooden musical instruments, and wooden toys and playground equipment are included in major group 39.
- 26 Paper and allied products -- The manufacture of pulp primarily from wood, and from rags and other fibers; the conversion of these pulps into any kind of paper and paperboard; the manufacture of paper and paperboard into converted paper products such as coated paper, paper bags, paper boxes, cards, and envelopes. Abrasive paper is included in major group 32; carbon paper in major group 37; and photosensitized and blueprint paper in major group 39.
- 27 Printing, publishing, and allied industries -- Printing, publishing, lithographing, and engraving establishments, and establishments

Major  
industry  
group code  
number

---

performing services for the printing trades such as type-setting, photoengraving, electrotyping, stereotyping, rotogravure, and book-binding. This group includes publishers doing no printing, publishers doing their own printing, and printers doing no publishing. News syndicates and duplicating services such as photostating, blue printing, and mimeographing are included with business services in major group 73.

- 28 Chemicals and allied products -- The manufacture of basic chemicals such as acids, alkalis, salts, and organic chemicals; semifinished chemical products to be used in further manufacturing, such as rayon yarns, plastic materials, crude animal and vegetable oils, dry colors and pigments; finished chemical products to be used for ultimate consumption, such as drugs, cosmetics, and soaps; or for use as materials or supplies in other industries, such as paints, fertilizers, and explosives.
- 29 Products of petroleum and coal -- The refining of petroleum and the manufacture of coke and coke-oven products, paving and roofing materials, and other products made from petroleum and coal. Establishments manufacturing and distributing gas to consumers are included in major industry group 48.
- 30 Rubber products -- The manufacture from natural or synthetic rubber of such products as tires, rubber footwear, mechanical rubber goods, and rubber sundries. This group also includes establishments specializing in reclaiming rubber or in retreading rubber tires.
- 31 Leather and leather products -- The tanning, currying, and finishing of hides and skins, and the manufacture of finished leather products and some similar articles made of fabric, such as shoes, luggage, pocketbooks, and handbags.

Major  
industry  
group code  
number

---

- 32 Stone, clay, and glass products -- The manufacture of flat glass and glass containers, cement, structural clay products, pottery, concrete and gypsum products, cut-stone products, abrasive and asbestos products, etc. from materials principally taken from the earth in the form of stone, clay, and sand.
- 33 Iron and steel and their products -- The production of crude iron and steel from ore or scrap; the rolling, forging, or drawing of crude iron and steel into semifinished products; and the fabricating of a great variety of finished iron and steel products.
- \*34 Transportation equipment (except automobiles) -- The manufacture of equipment for transportation by air, land, and water. Establishments producing automobiles are classified in major industry group 38.
- 35 Nonferrous metals and their products -- The primary and secondary smelting and refining and the alloying, rolling, and drawing of nonferrous metals, and the manufacture of nonferrous metal products. Includes also the manufacture of ferrous and nonferrous sheet-metal products not elsewhere classified; electroplating, plating, and polishing, and engraving metal (except for printing purposes); and establishments engaged in lapidary work.

---

\* (The industry items in this major group were classified in major group 39 in the 1937 edition of the code, since the use of code 34 during 1939 was limited to but a few States data reported for major group 34 were combined with major group 39. For those States which had not adopted code 34 for 1939, some of the industries comprising this new major group may be included with other major groups, such as 36 (electric locomotives), 37 (aircraft engines), and 76 (boat and ship repair).

Major  
industry  
group code  
number

---

- 36 Electrical machinery -- The manufacture of any type of machinery, apparatus and supplies for the generation, storage, transmission, and transformation of electric energy. The manufacture of household electrical appliances is also included in this group, but machinery powered by built-in electric motors is classified in major group 37.
- 37 Machinery (except electrical) -- The manufacture of machinery and prime-movers other than electrical equipment (major group 36). Machines that are powered by a built-in electric motor (washing machines, sewing machines, electric refrigerators, etc.) ordinarily are included in this group, but electrical household appliances (vacuum cleaners, electric fans, irons, mixers, etc.) are included in major group 36.
- 38 Automobiles and automobile equipment -- The manufacture of complete passenger automobiles, buses, and trucks; the manufacture of bodies and engines, and trailers for attachment to passenger cars and commercial vehicles. This group also includes the manufacture of parts and accessories exclusively for use in motor vehicles, such as automobile brakes and brake parts, clutches, differentials and transmissions, and wheels.
- 39 Miscellaneous manufacturing industries -- The manufacture of a wide variety of products not included in other manufacturing major groups. The products fall into the following subclassifications: professional and scientific instruments, photographic apparatus, and optical goods; surgical and dental instruments, equipment and supplies; musical instruments; toys and sporting and athletic goods, etc.; pens, pencils, stencils, and artists' materials; buttons and buckles; costume jewelry and miscellaneous novelties; brooms and brushes; and other miscellaneous manufacturing industries.

industry  
group code  
number

Transportation, Communication, and Other  
Public Utilities

- 41 Street, suburban, and interurban railways, and city and suburban bus lines -- Companies operating street, suburban, and interurban railways, and city and suburban bus lines. Railway companies furnishing transportation to local scenic features, such as cable, cog, and funicular railways, are included. Companies operating bus lines other than city and suburban, and those operating chartered buses, school buses, and sightseeing buses, are included in major group 43.
- 42 Trucking and/or warehousing for hire -- Establishments engaged in local and long-distance transportation by truck and/or warehousing for hire. Warehouses operated by manufacturers or merchants for their own use are classified with the industries to which they are related.
- 43 Other transportation, except water transportation -- Companies engaged in furnishing miscellaneous transportation (other than those in major groups 41, 42, and 44) such as long-distance bus lines, common carrier air lines, ambulance service, school and sightseeing bus lines, taxicabs, automobile rental services, and petroleum and gasoline common carrier pipe lines.
- 44 Water transportation -- Companies engaged in local or long-distance passenger or freight transportation via water, including ferries, lake, river and ocean lines, and lighterage and towing services.
- 45 Services allied to transportation, not elsewhere classified -- Establishments engaged in furnishing miscellaneous services allied to transportation, such as forwarding, packing, and crating services, arrangement of transportation, the operation of stockyards, services auxiliary to water transportation (canal operation, dock operation, stevedoring, etc.) and the operation of airports and bus and truck terminals.

Major  
industry  
group code  
number

---

- 46 Communication: Telephone, telegraph, and related service -- Companies engaged in furnishing communication services to the general public by telephone, telegraph, and other communication systems. Radio broadcasting and television are considered business services and are included in major group 73.
- 48 Utilities: Electric and gas -- Companies engaged in the furnishing of electricity and gas (natural or manufactured) to the general public for heating, power, and illuminating purposes.
- 49 Local utilities and local public services, not elsewhere classified -- Local utility companies distributing water and steam and in destroying or processing waste, such as garbage and sewage.

Wholesale and Retail Trade

- 50 Full-service and limited-function wholesalers -- Full-service and limited-function wholesalers (wholesale merchants, distributors, jobbers, exporters, and importers) who are engaged in buying and selling on their own account. Full-service wholesalers generally perform all, and limited-function wholesalers perform some, of the following functions: carrying stocks; warehousing; handling; and delivery. In addition, they sometimes perform other operations incidental to wholesale sale, such as installing, renovating, and reconditioning.
- 51 Wholesale distributors, other than full-service and limited-function wholesalers -- This group includes the following types of wholesale establishments: sales branches and sales offices of manufacturing and mining companies, petroleum bulk tank stations, agents and brokers (relating to tangible goods), and assemblers of farm products.

Major  
industry  
group code  
number

---

- 53 Retail general merchandise — Stores which sell a general line of merchandise including dry goods, apparel and accessories, furniture and home furnishings, small wares, hardware, and food. These stores are known as department stores, limited-price variety stores, dry goods stores, general merchandise stores, country general stores, and mail-order houses selling general merchandise.
- 54 Retail food (includes liquor stores) — Stores selling food and beverages principally for home preparation and consumption. Retail bakeries, delicatessen stores, and confectionery stores will in some cases perform certain manufacturing operations and in others serve food or drinks for consumption on the premises. These establishments are classified in this group unless it is clear that they are primarily restaurants or lunch rooms.
- 55 Retail automotive — Retail dealers selling new or used automobiles, trucks, parts, and accessories. Dealers in this group may maintain repair facilities in connection with the sale of cars. The retail sale of motorcycles and bicycles is included in major group 57.
- 56 Retail apparel and accessories — Stores selling new and used clothing, shoes, hats, underwear, and related articles for personal wear and adornment. Custom tailors, furriers, and fur shops which make garments to individual order from stocks of merchandise carried on their shelves are also included in this group.
- 57 Retail trade, not elsewhere classified — Miscellaneous retail establishments not allocated to other retail groups, such as furniture stores, drug stores, hardware stores, book stores, and jewelry stores. Second-hand stores, except those included in major groups 55 and 56, are also included.

Major  
industry  
group code  
number

---

- 71 Eating and drinking places -- Establishments such as restaurants, bars, cafeterias, and lunch counters, primarily engaged in selling prepared foods and drinks for consumption on the premises.
- 75 Filling stations, garages, and automobile repair services -- Establishments primarily engaged in the retail sale of gasoline and lubricating oils, and in furnishing automobile repair, rental, and storage services to the general public.
- 52 Other wholesale and retail trade -- All lumber and building material dealers and trade establishments not elsewhere classified whose business is about equally divided between wholesale and retail trade. Motor-vehicle dealers engaged in both wholesale and retail trade are included in major group 55 and bakeries engaged in both wholesale and retail trade are classified as manufacturing bakeries and are included in major group 20.

Finance, Insurance, and Real Estate

- 60 Banks and trust companies -- Establishments engaged in banking, the administration of trusts when combined with banking, and closely related functions such as rediscount and financing institutions for banks. Investment banks, which are primarily engaged in dealing in securities, are included in major group 61.
- 61 Security dealers and investment banking -- Establishments engaged in the purchase, sale, and brokerage of securities; commodity brokers who are members of exchanges; and investment banks.
- 62 Finance agencies, not elsewhere classified -- Finance agencies, not elsewhere classified, such as loan agencies, investment trusts, foreign exchange brokers, and money-order companies.

Major  
industry  
group code  
number

- Certain types of services related to finance, such as financial advice, reporting, and research are classified in major group 73.
- 63 Insurance carriers -- Home and branch offices of insurance and reinsurance companies covering all kinds of insurance, such as life, fire, marine, liability, accident, health, and burglary insurance. Includes also insurance offices of fraternal societies. Independent insurance agents and brokers, not operating under the names of the carriers they represent, are included in major group 64.
- 64 Insurance agents and brokers -- Independent insurance agents and brokers engaged in the sale of insurance contracts and the placement or adjustment of insurance contracts with insurance carriers and not operating under the names of the carriers they represent. Also included are establishments engaged in rendering insurance services, such as insurance inspection and policyholders consulting service.
- 65 Real estate dealers, agents, and brokers -- Owners and operators of real estate (including speculative builders, subdividers, and developers of real property) and real estate agents, brokers, and managers.
- 66 Real estate, insurance, loans, law offices; any combination -- Establishments, generally small in size, which are engaged in any combination of real estate, insurance, loans, or the practice of law.
- 67 Holding companies (except real estate holding companies) -- Holding companies (except real estate holding companies which are included in major group 65) which control a number of operating companies by "holding" a major portion of

Major  
industry  
group code  
number

their stock. However, a holding company which is also an operating company is classified according to the type of business operated. Patent owners and lessors and copyright owners are also included in this group.

Service Industries

- 70 Hotels, rooming houses, camps, and other lodging places — Commercial establishments and membership organizations engaged in furnishing lodging, lodging and meals, and camping space and camping facilities on a fee basis.
- 72 Personal services — Establishments engaged in furnishing services of a personal nature, such as laundries, cleaning and dyeing plants, barber and beauty shops, clothing repair and pressing shops, shoe repair shops, funeral service (including crematories), and photographic studios.
- 73 Business services, not elsewhere classified — Establishments engaged in rendering business services not elsewhere classified, on a fee or contract basis. Includes advertising agencies, credit bureaus and collection agencies, duplicating, blueprinting and photostatic services, services to dwellings and other buildings, radio broadcasting, dental laboratories and other business services not elsewhere classified.
- 74 Employment agencies and commercial and trade schools — Private employment agencies and private vocational schools not attached to universities and not recognized as of college grade. Includes civil-service examination preparatory schools and correspondence schools.
- 76 Miscellaneous repair services and hand trades — Establishments engaged in miscellaneous repair

Major  
industry  
group code  
number

services and hand trades, such as electrical repair shops, watch, clock, and jewelry repair, and upholstery and furniture repair. Clothing repair, automobile repair, and motion-picture equipment repair are included with closely related activities in major groups 72, 75, and 78, respectively.

- 78 Motion pictures — Establishments producing and distributing motion picture films, exhibiting motion pictures in theaters, and furnishing services to the motion picture industry.
- 79 Amusement and recreation and related services, not elsewhere classified — Establishments whose primary function is to provide amusement or entertainment on payment of a fee or admission charge (except motion pictures, which are classified in major group 78).
- 80 Medical and other health services — Establishments engaged in providing medical, surgical, and other health services. Includes veterinary services and group health and similar groups formed for the purpose of providing medical and other health services to their members.
- 81 Law offices and related services — Establishments primarily engaged in offering legal advice or services on a fee basis.
- 82 Educational institutions and agencies — Establishments furnishing formal academic or professional courses. Also included are nonprofit educational and scientific research agencies, libraries, museums, and zoological gardens. Correspondence schools and commercial and trade schools are included in major group 74.
- 83 Other professional and social-service agencies and institutions — Establishments engaged in engineering and architectural services, on a fee

Major  
industry  
group code  
number

---

or contract basis, and religious and charitable organizations. Includes also miscellaneous professional services such as those rendered by actuaries, art studios, lecturers, and writers.

- 86 Nonprofit membership organizations -- Organizations operating on a nonprofit membership basis for the promotion of the interests of the members, such as trade associations, professional organizations, labor unions, and political organizations. This group does not include certain establishments organized on a nonprofit basis for the benefit of members, such as group health associations and credit unions, or commercial establishments operated by nonprofit membership organizations such as YMCA-operated hotels and fraternal-insurance offices.
- 90 Domestic service -- Private households which employ individuals who serve on or about the premises, such as cooks, maids, butlers, and chauffeurs, and gardeners, caretakers, and other maintenance and odd-job workers.
- 94 Regular government agencies -- This group includes legislative, administrative, and judicial activities performed by Federal, State, and local governments.

Agriculture, Forestry, and Fishery\*

- 00 to 06,  
and 77 Agriculture -- This combination of major groups includes establishments engaged in agricultural activities, such as general farms, dairy farms, cash-grain farms, cotton farms, fruit and nut farms, livestock and poultry farms, and truck

---

\* For purposes of this monograph, the industry divisions agriculture, forestry, and fishery and establishments not elsewhere classified have been combined into the industry division "miscellaneous."

Major  
industry  
group code  
number

---

farms; nurseries and greenhouses (except forest nurseries which are included in major group 08); farms producing crop specialties; and establishments primarily engaged in performing, on a fee or contract basis, agricultural services, such as custom milling, hay baling, farm management, animal husbandry services, and horticultural services.

- 08 Forestry -- Establishments engaged in the operation of timber tracts, forest nurseries, and related activities such as reforestation services and the gathering of gums, barks, balsam needles, and spanish moss.
- 09 Fishery -- Establishments engaged in commercial fishing, including the operation of oyster beds and farms and the gathering of sponges. Includes also miscellaneous fishery services, such as the operation of fish hatcheries and fishing preserves.

Establishments Not Elsewhere Classified\*

- 85 Establishments not elsewhere classified -- Includes miscellaneous industries not elsewhere classified. Includes such heterogeneous activities as ice harvesting (separate from retail trade), junk and waste (paper, rags) collectors, and administrators of private estates (except real estate).

Included in this division are also establishments not yet classified, and establishments classified by several States, under major group codes 68 and 40. Major group 68 includes auxiliary units maintained by manufacturing, mining, trading, hotel,

---

\* For purposes of this monograph, the industry divisions agriculture, forestry, and fishery and establishments not elsewhere classified have been combined into the industry division "miscellaneous."

Major  
industry  
group code  
number

and restaurant firms for their own use. This group has been deleted from the industrial classification code and these auxiliary units are now classified with the principal activity to which they are auxiliary. The number of units so classified is negligible. With but a few minor exceptions, all units formerly classified in major group 40 (interstate railroads) have been removed from State coverage by the Railroad Unemployment Insurance Act. Pending the outcome of court litigations and reclassification, the few units reported under major group 40 are included in this division.

1/ A subject employer is an employing unit (or group of units) which is subject to the State unemployment compensation law and which for the purpose of determining liability is considered one legal entity.

2/ Number of different individuals an employer must have in covered employment in a specified number of weeks in current or preceding calendar year. (For number of weeks see footnote 2 of Tables B-1 to B-51.)

3/ Number of different workers in each State who have earned wages in covered employment during some period in 1939. Includes approximately 745,000 workers with wage credits in more than one State.

4/ Or 12 or more in 10 different weeks as an alternative to 4 or more in 20 weeks.

5/ For January-June, employers of 4 or more workers in 20 weeks; for July-December, any employer of 2 or more workers during 13 weeks, or wages during a quarter of \$450 or more.

6/ For January-June, employers of 4 or more workers; for July-December, any employer having wages during a calendar quarter of \$140 or more.

7/ Or total annual wages of \$6,000 or more if employer's records do not permit accurate count of workers.

1/ See Table A-1 for coverage provisions of State laws (minimum size-of-firm inclusion) and changes in such provisions during the year.

2/ Excludes data for railroads and other groups subject to Railroad Unemployment Insurance Act.

3/ Less than 0.1 percent.

4/ Includes approximately 23,000 workers in domestic service in private homes. Such service is excluded under laws of other States.

5/ Includes 13,500 non-Federal Government workers in January-June and 5,000 in July-December, because of change in coverage provision of State law.

## Quarterly wages earned in covered employment, 1/ by States, 2/ and by quarters, 1939

Total, all industries  
(In thousands of dollars)

1/ Except in New York, includes remuneration in excess of \$3,000 paid to an individual in covered employment. In 3 States and New York, this excess was not taxable (see footnotes 3-6). Excludes for each quarter data for railroad and other groups subject to Railroad Unemployment Insurance Act.

2/ See Table A1 for coverage provisions of State laws (minimum size-of-firm inclusion) and changes in such provisions during the year.

3/ Of this amount, \$1,484,754,000 represents taxable wages under State law.

4/ Represents taxable wages; State law excludes wages in excess of \$3,000 a year for an individual from any one employer. Includes \$30,473,000 in taxable wages for domestic service in private homes. Such service is excluded under laws of other States.

5/ Represents total wages on which employers were taxable under State law. Employee contributions made on basis of first \$3,000 in annual wages.

6/ Of this amount, \$158,053,000 represents taxable wages under State law; wages in excess of \$3,000 from an employer nontaxable for July-December under amendment effective July 1, 1939.

7/ Includes \$8,886,000 in taxable wages paid to non-Federal Government employees, excluded under laws of other States; these wages were \$5,931,000 in January-June and \$2,955,000 in July-December, reflecting amendment effective July 1, 1939, which excluded certain Government employees.

Average monthly employment of covered workers, by industry divisions, and by States, 1939

1/ See Table A-1 for coverage provisions of State laws (minimum size-of-firm inclusion) and changes in such provisions during the year.

2/ Excludes data for railroad and other groups subject to Railroad Unemployment Insurance Act.

3/ Includes industry divisions agriculture, forestry, and fishery and establishments not elsewhere classified.

4/ Represents taxable wages only (individual employee annual wages in excess of \$3,000 from one employer are excluded); data for total wages earned in covered employment not available.

5/ Includes \$30,473,000 in taxable wages for domestic service in private homes. Such service is excluded under laws of other States.

6/ Includes \$8,886,000 for wages paid to non-Federal Government employees.

1/ See Table A-1 for coverage provisions of State laws (minimum size-of-firm inclusion) and changes in such provisions during the year.  
 2/ Includes major industry group 34 - transportation equipment (except automobiles).  
 3/ Less than 0.1 percent.  
 4/ Excludes data for railroads and other groups subject to Railroad Unemployment Insurance Act.  
 5/ See footnote 4, Table A-5a.  
 6/ Excluded from coverage by State law.  
 7/ Includes industry divisions agriculture, forestry, and fishery and establishments not elsewhere classified.

Percentage distribution, by industry divisions and major industry groups, of total wages earned in covered employment 1/ in each State, 2/ 1939

1/ Except in New York, includes remuneration in excess of \$3,000 paid to an individual in covered employment.  
 2/ See Table A-1 for coverage provisions of State laws (minimum size-of-firm inclusion) and changes in such provisions during the year.  
 3/ Includes major industry group 34 - transportation equipment (except automobiles).  
 4/ Less than 0.1 percent.  
 5/ See footnote 5, Table A-5b.  
 6/ See footnote 3, Table A-5a.  
 7/ See footnote 4, Table A-5a.  
 8/ Excluded from coverage by State law.  
 9/ Includes industry divisions agriculture, forestry and fishery and establishments not elsewhere classified.

Percentage distribution, by State, of average monthly covered employment in each industry division and major industry group, 1939

State 1/	Mining						Construction				Transportation, <sup>4/</sup> communication, and other public utilities								
	Total (10-14)	10 - Metal mining	11 - Anthracite mining	12 - Bituminous and other soft-coal mining	13 - Crude-petroleum and natural-gas production	14 - Nonmetallic mining and quarrying	Total (15-17)	15 - Building construction-general contractors	16 - General contractors, other than building	17 - Construction-special trade contractors	Total (18-26, 43, 45)	41 - Street, suburban, and interurban railroads and city and suburban bus lines 2/	42 - Trucking and/or warehousing for hire	43 - Other transportation, except water transportation	44 - Water transportation	45 - Services allied to transportation, not elsewhere classified	46 - Communication: Telephone, telegraph, and related services	48 - Utilities: Electric and gas 5/	49 - Local utilities and local public services, not elsewhere classified

- 1/ Except for New York, includes remuneration in excess of \$3,000 a year paid to an individual in covered employment.  
2/ Excludes data for railroads and other groups now subject to Railroad Unemployment Insurance Act.  
3/ Number of different workers an employer must have in covered employment in a specified number of weeks to be subject to State Law.  
4/ And total wages of \$78 or more in a quarter, effective January 1, 1939.  
5/ Wages of at least \$50 to each of 4 workers during each of 3 quarters; or 8 or more workers within 20 weeks.  
6/ January-September 1938, 8 or more in 20 weeks; since October 1, 1938, 4 or more in 20 weeks or 12 or more in 10 weeks.  
7/ In 1938, 8 or more; in 1939, 4 or more.  
8/ Partially estimated because of incomplete data, by months.  
9/ And total annual wages of \$500 or more, effective January 1, 1939.  
10/ And total wages of \$225 or more in a quarter, effective January 1, 1939.

The following tabulations contain the detailed  
data on which the preceding Summary Tables are based.

**Series B**  
**State tables**

This series consists of 51 tables, one for each of the States, Alaska, Hawaii, and the District of Columbia. Each table consists of 2 parts--a, monthly employment, and b, quarterly wages. Under each industry division in each State, data are shown for each major industry group in which the average monthly employment was more than 1 percent of employment in all industries in the State.

## Monthly employment of covered workers, by industry divisions and significant major industry groups, 1/ 1939

1/ Major industry groups, within each division, are not shown if the average monthly employment is less than 1 percent of the total all industries.

2/ Coverage in 1939: Any employer of 8 or more, for some portion of a day for 20 days during current or preceding year.

3/ For titles of codes see above.

4/ Banks and trust companies (major industry group 60) excluded from coverage during 1939.

5/ Same as total taxable wages.

1/ Major industry groups, within each division, are not shown if the average monthly employment is less than 1 percent of the total all industries.

2/ Coverage in 1939: Any employer of 1 or more, who in any calendar quarter, paid or became liable to pay wages amounting to \$78 or more.

3/ For titles of codes see above.

4/ Same as total taxable wages.

1/ Major industry groups, within each division, are not shown if the average monthly employment is less than 1 percent of the total all industries.  
 2/ Coverage in 1939: Any employer of 8 or more, on some portion of a day, within each of 20 or more calendar weeks, within either current or preceding calendar year.  
 3/ For titles of codes see above.  
 4/ Same as total taxable wages.

B-15a

1/ Major industry groups, within each division, are not shown if the average monthly employment is less than 1 percent of the total all industries.

2/ Coverage in 1939: Any employer of 8 or more in each of 20 different weeks within current or preceding calendar year.

3/ For titles of codes see above.

4/ Taxable wages are allocated by employer's main industrial activity; employment and total wages are allocated by individual establishment.

5/ Total taxable wages are less than total wages earned in covered employment as individual employee annual wages, from one employer, in excess of \$3,000 are not taxable.

## Monthly employment of covered workers, by industry divisions and significant major industry groups, 1/ 1939

1/ Major industry groups, within each division, are not shown if the average monthly employment is less than 1 percent of the total all industries.

2/ Coverage in 1939: Any employer of 4 or more in each of 15 or more days within current or preceding calendar year.

3/ For titles of codes see above.

4/ Includes major industry group 90, domestic service, covered by State law (average monthly employment, 22,533; total taxable wages, \$30,473,000).

5/ Represents taxable wages only (individual employee annual wages in excess of \$3,000 from one employer, are not taxable); data for total wages earned in covered employment not available.

1/ Major industry groups, within each division, are not shown if the average monthly employment is less than 1 percent of the total all industries.

2/ Coverage in 1939: Any employer of 1 or more, for some portion of each of some 20 days, each day being in a different week during the calendar year.

3/ For titles of codes see above.

4/ Same as total taxable wages.

<sup>1/</sup> Major industry groups, within each division, are not shown if the average monthly employment is less than 1 percent of the total all industries.<sup>2/</sup> Coverage in 1939: Any employer of one or more, for some portion of a day, in each of 20 different weeks within either current or preceding calendar year provided that wages payable amounted to \$150 or more during calendar quarter.<sup>3/</sup> For titles of codes see above.<sup>4/</sup> Same as total taxable wages.

Series C  
Industry tables

This series consists of 75 tables, one for each industry division and major industry group. Each table consists of 2 parts--a, monthly employment, and b, quarterly wages. Under each industry division and major industry group are shown data for each State with more than 0.1 percent of the total for the 51 States.

1/ States in which the average monthly employment is less than 0.1 percent of the total are not shown.

2/ See Table A-1 for State coverage provisions (minimum size-of-firm inclusion) and changes in such provisions during the year.

3/ Less than 0.1 percent.

4/ Represents taxable wages only (excluding individual employee annual wages in excess of \$3,000 from one employer); data for total wages earned in covered employment not available.

## C-20a

## Employment of covered workers, by States, 1/ and by months, 1939

## Major industry group 28 -- chemicals and allied products

1/ States in which the average monthly employment is less than 0.1 percent of the total are not shown.

2/ Includes major industry group 34 -- transportation equipment (except automobiles.)

3/ See Table A-1 for State coverage provisions (minimum size-of-firm inclusion) and changes in such provisions during the year.

4/ Less than 0.1 percent.

5/ Represents taxable wages only (excluding individual employee annual wages in excess of \$3,000 from one employer); data for total wages earned in covered employment not available.

## C-31a

1/ States in which the average monthly employment is less than 0.1 percent of the total are not shown.

2/ Some employment and wages for this major industry group may be included with major industry group 48 (utilities) where street railways, local bus lines, etc., are operated by electric light and power companies. Municipal corporations are not included when exempt from coverage by State law.

3/ See Table A-1 for State coverage provisions (minimum size-of-firm inclusion) and changes in such provisions during the year.

4/ Represents taxable wages only (excluding individual employee annual wages in excess of \$3,000 from one employer); data for total wages earned in covered employment not available.

1/ States in which the average monthly employment is less than 0.1 percent of the total are not shown.

2/ May also include employment in other industries, such as street railways, local bus lines, etc., where operated by electric light and power companies.

3/ Municipal corporations are not included when exempt from coverage by State law.

4/ See Table A-1 for State coverage provisions (minimum size-of-firm inclusion) and changes in such provisions during the year.

5/ Represents taxable wages only (excluding individual employee annual wages in excess of \$3,000 from one employer); data for total wages earned in covered employment not available.

1/ States in which the average monthly employment is less than 0.1 percent of the total are not shown.

2/ See Table A-1 for State coverage provisions (minimum size-of-firm inclusion) and changes in such provisions during the year.

3/ Represents taxable wages only (excluding individual employee annual wages in excess of \$3,000 from one employer); data for total wages earned in covered employment not available.

Employment of covered workers, by States, 1/ and by months, 1939

<sup>1/</sup> States in which the average monthly employment is less than 0.1 percent of the total are not shown.<sup>2/</sup> During the year, several States amended their coverage provisions to include banks and trust companies affiliated with the Federal Reserve System. In Alabama, all banks and trust companies were excluded from coverage.<sup>3/</sup> See Table A-1 for State coverage provisions (minimum size-of-firm inclusion) and changes in such provisions during the year.<sup>4/</sup> Represents taxable wages only (excluding individual employee annual wages in excess of \$3,000 from one employer); data for total wages earned in covered employment not available.<sup>5/</sup> Less than 0.1 percent.

1/ Includes major industry groups 70, 72, 73, 74, 76, 78-83, 86, 90, and 94.

2/ See Table A-1 for State coverage provisions (minimum size-of-firm inclusion) and changes in such provisions during the year.

3/ Less than 0.1 percent.

4/ Represents taxable wages only (excluding individual employee annual wages in excess of \$3,000 from one employer); data for total wages earned in covered employment not available.

## Employment of covered workers, by States, and by months, 1939

Major industry group 70 -- hotels, rooming houses, camps, and other lodging places
