Table H.—Average full-time hours, hours actually worked, full-time weekly earnings and amounts actually earned, and number of employees working each classified per cent of full time and earning each classified amount, during one pay-roll period, for piece workers and time workers, by States, 1918.....	138-147

BULLETIN OF THE U. S. BUREAU OF LABOR STATISTICS.

NO. 262.

WASHINGTON.

NOVEMBER, 1919

WAGES AND HOURS OF LABOR IN COTTON-GOODS MANUFACTURING AND FINISHING, 1918.

INTRODUCTION AND SUMMARY.

Earnings per hour, hours of labor per week, and full-time and actual weekly earnings in the cotton-goods manufacturing and finishing industry of the United States for the year 1918 are presented in this report. Separate figures are shown for cotton-goods manufacturing and cotton-goods finishing. Comparable figures are shown for 1916, and summaries for each year, except 1915 and 1917, from 1907 to 1918 for cotton-goods manufacturing and from 1911 to 1918 for cotton-goods finishing are also shown. Data were not collected for 1915 and 1917 nor for cotton-goods finishing prior to 1911.¹

In 1918 the average full-time weekly earnings of male employees in the selected occupations in cotton-goods manufacturing varied from \$11.37 for drawing-frame tenders to \$26.40 for mule spinners. The average full-time weekly earnings of female employees varied from \$10.28 for trimmers or inspectors to \$17.06 for beamer tenders.

In cotton-goods finishing the average full-time weekly earnings of male employees in the selected occupations varied from \$14.39 for bleach house laborers to \$43.38 for the skilled occupation of printers. Data were obtained for the wages of females in cotton-goods finishing for only one occupation—knotters—in which the average full-time weekly earnings in 1918 were \$11.19.

A summary of the rates of wages and hours of labor in the principal occupations of the two branches of the industry is presented in Table 1, which follows. This table shows very clearly the general reduction of hours and increase of earnings between 1907 and 1918, as well as the prevailing rates and hours of labor in 1918.

¹ Previous reports of wages and hours of labor in cotton-goods manufacturing and finishing have been published by the bureau, as follows: Nineteenth Annual Report, covering 1890 to 1893; Bulletin No. 59 (July, 1905), covering 1903 and 1904; Bulletin No. 65 (July, 1906), covering 1904 and 1905; Bulletin No. 71 (July, 1907), covering 1905 and 1906; Bulletin No. 77 (July, 1908), covering 1906 and 1907; Bulletin No. 128 (August, 1913), covering 1907 to 1912; Bulletin No. 150 (May, 1914), covering 1912 and 1913; Bulletin No. 190 (May, 1916), covering 1913 and 1914; and Bulletin No. 239 (April, 1918), covering 1914 and 1916.

[TABLE 1.—AVERAGE AND CLASSIFIED FULL-TIME HOURS PER WEEK AND EARNINGS PER HOUR, AND AVERAGE FULL-TIME WEEKLY EARNINGS IN THE PRINCIPAL OCCUPATIONS, 1907 TO 1918.]

6

MANUFACTURING.

[The figures opposite each group of years are for identical establishments. When a second line is shown for 1918 it contains all data obtained for 1918, whether or not comparable data for 1916 were available.]

Occupation, sex, and number of establishments.	Year.	Number of employees.	Average full-time hours per week.	Average earnings per hour.	Average full-time weekly earnings.	Per cent of employees whose full-time hours per week were—					Per cent of employees whose earnings per hour were—									
						Under 54.	54 and under 57.	57 and under 60.	60.	Over 60.	Under 8 cts.	8 and under 9 cts.	9 and under 10 cts.	10 and under 12 cts.	12 and under 14 cts.	14 and under 16 cts.	16 and under 18 cts.	18 and under 20 cts.	20 and under 25 cts.	25 cts. and over.

¹ Less than 1 per cent.

Table 1 and General Tables A and B show figures for identical establishments from year to year. Where changes were made in the number or identity of establishments it was necessary to show two sets of figures for each year.

To aid in making comparisons from year to year, relative or index numbers have been computed for full-time hours, earnings per hour, and full-time weekly earnings for each occupation for the years 1910 to 1918, inclusive. These relatives are based on the averages shown in General Table A. In computing the relatives the averages for the larger number of establishments for each year were used. The relatives are simply percentages in which the figures for 1913 are taken as the base or 100 per cent. The year 1913 is used as the base for relative or index numbers, as it represents the close of a distinct economic period.

Thus the facts for the earlier and later years are brought into direct comparison with the facts for the year immediately preceding the war, namely, 1913.

The relative number for each year preceding and subsequent to 1913 is the per cent that the average for that year is of the average for 1913. For example: Table 2 shows that relatively the full time weekly earnings of card strippers in 1910 were but 88 per cent of their weekly earnings in 1913. In 1912 they had increased to 97 per cent; in 1916 to 118 per cent, and in 1918 to 188 per cent of their earnings in 1913.

Table 3 is a summary, showing by States the number and per cent of employees working certain classified percentages of full time, during the period for which data were obtained.

This table is divided into two sections for each branch of the industry, one relating to employees whose time was reported for one week, and the other relating to those whose time was reported for two weeks in such a way that it could not be divided. In a majority of establishments a part of the force is on a one-week pay roll and a part on a two-week pay roll, hence such plants have a representation in each section of the table.

A few establishments having other than a one-week or two-week pay roll are omitted from this table, as are also some employees for whom data were incomplete.

Total.....	8	1,334	833	62	501	38	210	16	111	8	46	3

According to the first section of the cotton-manufacturing branch of this table, 69 per cent of the employees worked full time or over during the period covered by the pay rolls, and 31 per cent did not work full time. Seventeen per cent worked under 75 per cent full time and by deduction it is seen that 14 per cent of the employees worked 75 per cent and under 100 per cent of full time. In the two-week period a smaller per cent of employees made full time, as would be expected. An employee might make full time the first week, yet lose time the second week, or vice versa.

Table 4 is a summary of General Table D (pp. 88-121), showing for each occupation the average full-time hours per week of the establishments in comparison with the average hours actually worked in the pay-roll period reported, and comparing the average full-time weekly earnings with the average amount actually earned in the week.

Like Table 3, this table is divided first into two branches of the industry and each branch is divided into two sections, one representing one-week pay rolls, and the other two-week pay rolls. As in Table 3, certain establishments have been omitted from this table because the pay rolls were for other periods than one or two weeks; also some employees are omitted because of incomplete data.

TABLE 4.—AVERAGE FULL-TIME HOURS AND HOURS ACTUALLY WORKED, FULL-TIME WEEKLY EARNINGS, AND AMOUNTS ACTUALLY EARNED DURING ONE PAY-ROLL PERIOD, 1918.

MANUFACTURING.

EXPLANATION OF SCOPE AND METHOD.

The manufacturing section of this report includes data from establishments which make cambrics, chambrays, checks, converters' goods, colored goods, combed goods, cotton flannels, crêpes, damasks, denims, drills, foulardines, ginghams, lawns, madras, napped fabrics, organdies, percales, print cloths, sateens, sheetings, shirtings, stripes, tickings, twills, etc. Mills making mixed cotton and silk goods are not included.

Some of the establishments furnishing data concerning cotton manufacturing have finishing departments, for which data were obtained at the same time. In addition, data were obtained from several establishments engaged exclusively in finishing cotton goods.

All data were obtained from pay rolls of the various establishments by agents of the Bureau.

The number of establishments included or summarized in the report has varied considerably since 1907, as follows:

Manufacturing.

1907 to 1910.....	36 identical establishments.
1910 and 1911.....	59 identical establishments.
1911 and 1912.....	88 identical establishments.
1912 and 1913.....	88 identical establishments.
1913 and 1914.....	90 identical establishments.
1914 and 1916.....	88 identical establishments.
1916 and 1918.....	105 identical establishments.

Finishing.

1911 and 1912.....	30 identical establishments.
1912 and 1913.....	27 identical establishments.
1913 and 1914.....	33 identical establishments.
1914 and 1916.....	32 identical establishments.
1916 and 1918.....	34 identical establishments.

In addition to the 105 manufacturing establishments from which data were obtained for both 1916 and 1918, data were obtained from one establishment for 1918 only, making a total of 106 establishments from which data for 1918 are presented.

In the finishing branch of the industry data from 34 establishments were obtained for both 1916 and 1918.

In selecting establishments from which to obtain data, the Bureau undertook to represent all States in which cotton manufacturing and cotton finishing are of material importance, the measure of importance being the number of employees as reported by the United States Census of Manufactures.

Table 5 which follows shows, by States, the number of employees in this industry as reported by the United States Census, 1910, the number of establishments from which the Bureau obtained data for 1918, and the number of employees in such establishments:

TABLE 5.—TOTAL NUMBER OF EMPLOYEES IN COTTON-GOODS MANUFACTURING AND NUMBER OF EMPLOYEES FOR WHICH DATA ARE SHOWN FOR 1918.

State.	Number of employees reported by the U. S. Census, 1910.	Establishments and employees for which data are shown for 1918 in this report.	
		Number of establishments.	Number of employees.
Massachusetts.....	108,914	20	22,017
North Carolina.....	47,231	22	8,209
South Carolina.....	45,451	20	8,976
Rhode Island.....	28,786	3	3,500
Georgia.....	27,803	12	6,478
New Hampshire.....	22,290	5	15,529
Pennsylvania.....	16,293	5	1,299
Maine.....	14,634	5	5,785
Connecticut.....	14,370	4	2,634
Alabama.....	12,731	8	4,906
New York.....	10,663	2	1,748
Other States.....	29,721		
Total.....	378,880	106	81,121

According to the census of 1910, more than 92 per cent of the total number of employees in the industry are found in the States in which the establishments furnishing information to the Bureau of Labor Statistics are located. The number of employees for which the Bureau obtained 1918 data and for which detailed information for 1918 is presented in this report, is over 21 per cent of the total in the industry in 1909, the year to which the census figures apply.

The number of employees in cotton-goods finishing for whom data for 1918 are shown is as follows:

Massachusetts.....	5,222	Maine.....	535
Rhode Island.....	3,528	Pennsylvania.....	469
New York.....	1,700	Other States.....	219
Connecticut.....	1,195		
New Hampshire.....	1,039	Total.....	14,553
New Jersey.....	646		

Full-time hours per week are the regular hours during which, under normal conditions, employees in an occupation are on duty. Full-time hours do not in any way indicate the extent of unemployment. Employees may work overtime, or broken time, or be laid off, or a temporary reduction may be made in working hours without affecting the full-time hours as here presented.

The rates of wages per hour appearing in the tables include the wages of time workers and the earnings of piece workers. All time rates not already on an hourly basis have been reduced to rates per hour, and the earnings of piece workers and of persons working at both time and piece rates have been reduced to rates per hour by dividing the earnings by the hours worked. For 1918 the piece workers and time workers of each occupation are shown separately and also combined as one group.

Where there was no record regularly kept of the actual time worked by employees, the establishments, at the request of the Bureau, kept a record for the pay-roll period selected.

The full-time weekly earnings are the earnings of employees working full time, or the earnings on broken time reduced to equivalent earnings for a full week. The actual earnings of employees during one pay-roll period are shown in Table D. In this table low earnings may be due either to a low rate or to broken time.

The averages of full-time hours per week, earnings per hour, full-time weekly earnings, and actual earnings are computed by adding the data for each employee and dividing the total by the number of employees.

Descriptions of all the operations in a representative cotton mill may be found in Bulletin No. 239 of the Bureau. Figures relating to wages and hours are shown separately for 15 of the more important occupations in cotton manufacturing and 8 occupations in cotton finishing. The sex is shown for each occupation. Of the 15 occupations tabulated in cotton manufacturing, data are shown for males alone in 4 occupations, for females alone in 3 occupations, and for both males and females in 8 occupations.

Of the 8 occupations tabulated in cotton finishing, data are shown for males alone in 7 occupations, and for females alone in 1 occupation. The occupations arranged in order of manufacture are as follows:

<i>Manufacturing.</i>	<i>Finishing.</i>
Card strippers.	Laborers, bleach house.
Drawing-frame tenders.	Laborers, dyehouse.
Slubber tenders.	Laborers, color mixing.
Speeder tenders.	Engravers.
Spinners, mule.	Printers.
Spinners, frame.	Calender tenders.
Doffers.	Folders.
Spooler tenders.	Knotters.
Warper tenders.	
Beamer tenders.	
Slasher tenders.	
Drawers-in.	
Loom fixers.	
Weavers.	
Trimmers or inspectors.	

All employees not included under any of the above selected occupations are combined and shown under "Other employees."

GENERAL TABLES.

In addition to the text tables already shown, 8 general tables are presented as follows:

Table A.—Average and classified full-time hours per week, and earnings per hour, and average full-time weekly earnings, in the United States, by years, 1907 to 1918.

In this table the figures opposite each group of years are for identical establishments. When a second line is shown for 1918 it contains all data secured for 1918, whether or not comparable data for 1916 were available.

Table B.—Average and classified full-time hours per week, and earnings per hour, and average full-time weekly earnings, in each State, by years, 1916 and 1918.

In this table the figures for both years are for identical establishments, and do not include data from establishments furnishing information for 1918 only.

Table C.—Average and classified full-time hours per week, and earnings per hour, and average full-time weekly earnings, for piece workers and time workers, by States, 1918.

This table includes all data secured for 1918, whether or not comparable data for 1916 were available.

Table D.—Average full-time hours, hours actually worked, full-time weekly earnings and amounts actually earned, and number of employees working each classified per cent of full time and earning each classified amount, during one pay-roll period, for piece workers and time workers, by States, 1918.

This table includes data for all establishments from which information was secured for 1918. The table is divided into two sections, one relating to employees whose time and earnings were reported for one week, and the other relating to those whose time and earnings were reported for two weeks in such a way that they could not be divided. The purpose of this table is to compare the time actually worked by employees with the full working time of the establishments and the average amount actually earned, with more or less broken time of some employees, with the possible full-time earnings. A few establishments having other than one-week or two-week pay-rolls are omitted from this table, as are also some employees because of incomplete data.

Tables E, F, G, and H, respectively, show for cotton finishing the same facts that Tables A, B, C, and D show for manufacturing.

TABLE A.—AVERAGE AND CLASSIFIED FULL-TIME HOURS PER WEEK, AND EARNINGS PER HOUR, AND AVERAGE FULL-TIME WEEKLY EARNINGS, IN THE UNITED STATES, BY YEARS, 1907 TO 1918.

MANUFACTURING.

[In this table the figures opposite each group of years are for identical establishments. When a second line is shown for 1918 it contains all data obtained for 1918, whether or not comparable data for 1916 were available.]
