# BULLETIN OF THE U. S. BUREAU OF LABOR STATISTICS.

NO. 274.

WASHINGTON.

SEPTEMBER, 1920.

## UNION SCALE OF WAGES AND HOURS OF LABOR, MAY 15, 1919.

### SUMMARY.

This report contains the union scale of wages and hours of labor of 912,900 union members in the leading organized trades and occupations of 61 of the principal cities of the United States as of May 15, 1919.

In all trades taken collectively the increase in weekly wage rates on May 15, 1919, over May 15, 1918, was 14 per cent; over 1916, 39 per cent; over 1913, 43 per cent; over 1910, 55 per cent; and over 1907, 62 per cent.

While wage rates have increased, working time has slightly decreased. In 1919, the regular hours of labor had decreased 2 per cent as compared with 1918; 4 per cent as compared with 1916; 5 per cent as compared with 1913; 6 per cent as compared with 1910; and 8 per cent as compared with 1907.

Rates of wages per hour advanced slightly more than weekly wage rates because of the the reduction in hours. Taken collectively, rates per hour in 1919 were 16 per cent higher than in 1918, 44 per cent higher than in 1916; 55 per cent higher than in 1913; 64 per cent higher than in 1910; and 72 per cent higher than in 1907.

All of the trades and occupations herein reported received an average increase in weekly rates in 1919 as compared with 1918. The bakery trades received an increase of 25 per cent. All of the 42 building trades listed received an increase ranging from 2 to 21 per cent. Chauffeurs received 18 per cent and teamsters and drivers 23 per cent increase in weekly rates. Freight handlers received an increase of 8 per cent. Granite cutters had an increase of 18 per cent and stonecutters 19 per cent. Laundry workers gained 22 per cent. All of the metal trades made gains, ranging from 6 per cent for blacksmiths to 20 per cent for coppersmiths.

Millwork carpenters had an increase of 16 per cent, glaziers 35 per cent, and millwork painters (hardwood finishers) 21 per cent. In book and job printing, the increases ranged from 14 per cent for electrotypers, finishers and molders, and machinist operators to 29 per cent for bindery women and press feeders. In newspaper print-

ing trades, the increases ranged from 5 per cent for machinist operators, daywork, to 28 per cent for machine tenders, daywork. In theatrical employment, carpenters gained 10 per cent, electricians 10 per cent, and motion-picture machine operators 21 per cent.

The hours per week are stated in this report for 95 trades and occupations, or subdivisions and groups of trades and occupations. Of this number 34 had a reduction, 3 had an increase, and 58 had no change in working hours between May 15, 1918, and May 15, 1919.

The foregoing statements, concerning changes in rates and hours, apply to the average for each trade, or subdivision or group as a whole. They must not be understood, however, as applying to each and every local union in the trade.

There are 5,956 wage quotations tabulated for 1919, of which 173 show no comparable data for 1918, either because there were no effective scales on May 15, 1918, or because the unions were not then organized. Of the 5,783 wage quotations for which there are comparable data for 1918, 1,114 had not changed during the year, and 4,669 had changed in rates or hours or both of these items. There are 77 instances of a reduction in weekly rates in 1919 as compared with 1918, 14 instances of reduction in rates per hour, and 36 instances of an increase in hours of labor. Of the 36 instances of increase in hours of labor, 11 occurred in the newspaper printing trades, 9 in the metal trades, 6 in the chauffeurs, teamsters, and drivers' unions, 6 in the theatrical employees' unions, 2 in the building trades, 1 in the book and job printing trades, and 1 in the waiters' unions.

For ready comparison the scales prevailing on May 15, 1918, are shown in parallel columns.

This is the eighth bulletin published by the Bureau of Labor Statistics on the subject of union scales of wages and hours of labor. The scales for 39 cities as prevailing on May 15 of each year from 1907 to 1912 were published in Bulletin No. 131. In Bulletin No. 143 were published the scales for 40 cities on May 15, 1913; in Bulletin No. 171 were published the scales for 41 cities on May 1, 1914; in Bulletin No. 194 were published the scales for 47 cities on May 1, 1915; in Bulletin No. 214 were published the scales for 48 cities on May 15, 1916; in Bulletin No. 245 were published the scales for 56 cities on May 15, 1917; and in Bulletin No. 259 were published the scales for 58 cities on May 15, 1918. This bulletin includes 61 cities.

The trades and occupations here covered are divided into 12 groups, as follows:

|                                     |                                        |
|-------------------------------------|----------------------------------------|
| Bakery trades.                      | Metal trades.                          |
| Building trades.                    | Millwork.                              |
| Chauffeurs, teamsters, and drivers. | Printing and publishing: Book and job. |
| Freight handlers.                   | Printing and publishing: Newspaper.    |
| Granite and stone trades.           | Theatrical employees.                  |
| Laundry workers.                    | Waiters.                               |

The 61 cities included in this report are located in 36 States. The cities selected are generally the largest in their respective sections of the country.

The cities included are as follows:

North Atlantic division:

Boston, Mass.  
 \*Bridgeport, Conn.  
 Buffalo, N. Y.  
 Fall River, Mass.  
 Manchester, N. H.  
 Newark, N. J.  
 New Haven, Conn.  
 New York, N. Y.  
 Philadelphia, Pa.  
 Pittsburgh, Pa.  
 \*Portland, Me.  
 Providence, R. I.  
 \*Rochester, N. Y.  
 Scranton, Pa.  
 \*Springfield, Mass.  
 \*Worcester, Mass.

South Atlantic division:

Atlanta, Ga.  
 Baltimore, Md.  
 Charleston, S. C.  
 Jacksonville, Fla.  
 \*Norfolk, Va.  
 Richmond, Va.  
 Washington, D. C.

North Central division:

Chicago, Ill.  
 Cincinnati, Ohio.  
 Cleveland, Ohio.  
 \*Columbus, Ohio.  
 \*Davenport, Iowa.  
 \*Dayton, Ohio.  
 \*Des Moines, Iowa.  
 Detroit, Mich.

North Central division—Concluded.

\*Grand Rapids, Mich.  
 Indianapolis, Ind.  
 Kansas City, Mo.  
 Milwaukee, Wis.  
 Minneapolis, Minn.  
 \*Moline, Ill.  
 Omaha, Nebr.  
 \*Peoria, Ill.  
 \*Rock Island, Ill.  
 St. Louis, Mo.  
 \*St. Paul, Minn.  
 \*Toledo, Ohio.  
 \*Wichita, Kans.  
 \*Youngstown, Ohio.

South Central division:

Birmingham, Ala.  
 Dallas, Tex.  
 Houston, Tex.  
 Little Rock, Ark.  
 Louisville, Ky.  
 Memphis, Tenn.  
 \*Nashville, Tenn.  
 New Orleans, La.

Western division:

\*Butte, Mont.  
 Denver, Colo.  
 Los Angeles, Calif.  
 Portland, Oreg.  
 Salt Lake City, Utah.  
 San Francisco, Calif.  
 Seattle, Wash.  
 \*Spokane, Wash.

The asterisks in the preceding list indicate the cities added since the first report. Under each trade in the general table the cities appear in the order as listed.

The several trades and occupations for which the union scales are given in this bulletin are shown in the table next following.

A few trades not appearing in Bulletin No. 131 were added in Bulletin No. 143. In Bulletin No. 171 the scope of the inquiry was materially enlarged, four new groups of occupations being included: Brewery and bottling-house workmen; chauffeurs, teamsters, and drivers; freight handlers; and soft-drink establishment employees.

A few trades were added in Bulletin No. 194, a few in Bulletin No. 214, and in Bulletin No. 245 four trades were included for the

first time—mosaic and terrazzo workers, ship carpenters, glaziers, and photo-engravers. In Bulletin No. 259 the scales for brewery and bottling-house workmen and for soft-drink establishment employees were discontinued and the scales for laundry workers, theatrical employees, and waiters were included for the first time. In this bulletin no material changes appear in the list of trades reported.

The table that follows shows for each trade, and for each year for which data are available, the per cent of increase in rates of wages per week on full time in 1919, as compared with each of the 12 years preceding, in all cities covered, taken collectively.

TABLE 1.—PER CENT OF INCREASE IN RATES OF WAGES PER WEEK, FULL TIME, 1919 COMPARED WITH EACH OF THE 12 YEARS PRECEDING.

| Occupation.                                      | Per cent higher in 1919 than in— |      |      |      |      |      |      |      |      |      |      |      |

1 No data.

The union scale, as the term is here used, is a statement, either written or definitely understood, of wages and hours of labor agreed to or accepted by an organization of union men and an employer or group of employers, under which agreement, expressed or implied, union men actually work. The union scale usually fixes the limit in only one direction. It sets a minimum wage and a maximum of hours for a regular day's work. This report shows such minimum wage and maximum hours as are established by the agreed or accepted scale. In certain cities and trades, however, some workmen, and in some few instances all or nearly all workmen, actually are paid more than the scale, and in some instances employees work less than the scale hours.

In addition to ordinary increases in wages, a considerable number of increases were reported in 1918 as war bonuses. Practically all of these and some other bonuses were in effect in 1919. In such cases where bonuses were definitely reported in one fixed amount and were to remain in effect until the end of the war or indefinitely, such bonuses were combined with the regular rate. If the increases were various or indefinite, or applied only to some individuals or to only a part of the union membership, the general rate was entered in the table as the scale, and the bonuses mentioned in footnotes. As a general rule the union scale represents the prevailing wage of a locality for efficient labor.

In cases where the returns showed that a considerable percentage of the membership received more than the scale, the facts, so far as ascertainable, are stated in footnotes, which are generally self-explanatory, such as "more than half received more than the the scale; amount not reported," "nominal rate, all received more; average \$35," "25 per cent received \$4 per week more than the scale," etc. No note is made where the number who received the higher rate embraced less than 25 per cent of the membership of the union. Agreements occasionally provide that old or infirm men may work for less than the scale.

The observance of Labor Day as a holiday is so general and the fact is so widely understood that it was deemed unnecessary to refer to the many agreements which prohibit the performance of ordinary work on that day. However, in instances where the prohibition of work had been extended to other days or parts of days, such as July 4 and Saturday afternoons and also included Labor Day, the conditions have been stated in footnotes.

The rates of wages of railroad-shop occupations included herein are the rates awarded by the United States Railroad Administration<sup>1</sup> and not rates agreed upon by negotiation between employers and unions in the usual way of arriving at a union scale. The railroad

---

<sup>1</sup> See pp. 131 to 134 of the *Monthly Labor Review* for September, 1918.

rates are shown, however, for only such cities as have union members employed in railroad shops.

In the printing trades of compositor and linotype operator contracts are found in certain cities in which there are maximum hours stated that may not be exceeded except by payment of an overtime rate, and a minimum of hours for which work must be provided or payment made when a man undertakes a day's work. When such contract exists there may be further a commonly accepted working time, within the limits provided, so well established that such time is in effect the standard working day. In such instances the tabulation shows such actual working hours, and notes state the maximum and minimum hours.

It was sometimes found that a union had asked for a certain standard scale but had not actually obtained it or had obtained it for only a part of its members. No scale is published here unless it was so far established that at least 50 per cent of the members of the union were receiving the scale or above it. Information obtained on this question indicates that an insignificant number of union members were working for less than the scale, while a considerable number were receiving more than the scale. Some trades were not organized in certain cities, and some were organized only in part. When organized in part, with a scale in force for such men as were organized, the scale is published.

The union scales presented in this report are almost entirely time-rate scales. Piece-rate scales are published for compositors, linotype operators, and lathers only. These occupations have simple units of payment which are commonly understood. Some trades, especially the metal trades, work to a considerable extent on piece rates. Such rates are so great in number and the units of payment so variable that it is not practicable to quote them. The earnings at piece rates usually exceed the full-time earnings at the time rates of the trade. For localities where piece rates prevail almost exclusively and the time rate provided for in the scale is only infrequently paid, such time rate has not been tabulated.

The terms of time-rate scale as agreed to by employers and trade-unions state wages for different units of time. Some scales designate the rates of wages by the hour, others by the day, week, or month. To make comparison easy, the varying rates have been reduced to both an hourly rate and a weekly rate.

The general table shows the rates of wages per hour and the rates per week on full time, the rates for overtime, Sunday, and holiday work, the regular hours for a full day, for Saturday, and for a full week, and the number of months in the year for which the agreement provided for a Saturday half holiday. When for a period of more

than three months of the year the number of hours differed from those shown for May, the difference has been noted in the table.

All information here published was obtained by special agents of this Bureau in personal visits to business agents and secretaries of the respective unions in the several cities, except in Massachusetts and Ohio. The labor bureaus of these two States collect union wage scale figures and publish reports on the subject. To avoid duplication of field work these State bureaus consented to furnish copies of so much of their original data as was desired by this office. All of the material collected by the Ohio bureau was obtained by personal visits of special agents. The Massachusetts bureau collected its data in part by correspondence and in part by sending out special agents. In the work of this Bureau and of the two State bureaus wage scales, written agreements, and trade-union records were consulted wherever available. The field work involved an interview with the officials of about 2,000 local unions. In many instances two or more calls had to be made before the officials sought could be met.

Scales for apprentices are not shown, but scales for helpers are given in a number of trades. In some trades the work of helpers is performed in part by apprentices. Whenever it is found that the work of helpers is largely done by apprentices, the scales for such helpers have been omitted.

An inspection of the general table shows a great variation for some occupations in trade terms and classifications in different cities. For example, bakers in some cities are classed as first hands, second hands, and third hands; in other cities as mixers, benchmen, oven men, etc. In many cities there are separate unions and scales of bakers baking different kinds of bread, as ordinary bread (often known as German bread), Hebrew bread, Italian bread, etc. The difference in occupation name makes a comparison between cities difficult. Inquiry has shown that the terms first hand, second hand, etc., do not cover identical work in different cities where these terms are used. Certain work may be considered first-hand work in one city and second-hand work in another city. Of necessity, this Bureau has followed the terminology of each city.

There are also great variations in classification and in the extent of subdivision of chauffeurs, teamsters, and drivers, and of book-binding and presswork occupations, making comparison of city with city quite difficult; and similar conditions, less in degree, are found in several other trades.

General Table A, pages 69 to 281, shows 4,669 instances of changes in scales during the year ending May 15, 1919, either as to wage rates, or hours, or both. A table is here given summarizing these 4,669 changes as they affected each of the three phases of the scale, wages per hour, earnings per week, and hours per week.

TABLE 2.—NUMBER OF INCREASES AND DECREASES IN RATES PER HOUR, EARNINGS PER WEEK, AND IN HOURS PER WEEK, AS INDICATED IN THE 4,669 CASES IN WHICH CHANGES WERE MADE IN ONE OR MORE OF THESE ITEMS DURING THE YEAR ENDING MAY 15, 1919.

| Industry or occupation.                    | Total number of scales changed. | Wages per hour.     |                 |                  | Earnings per week.  |                 |                  | Hours per week.  |                    |                     |

<sup>1</sup> Not including 2 instances of change from piece to time rate basis.<sup>2</sup> Not including 2 instances of change from piece to time rate basis, and including 31 instances of piece rates.<sup>3</sup> Including 1 instance of piece rates.<sup>4</sup> Including 1 instance of piece rates and 2 instances where hours were variable but not reported.<sup>5</sup> Including 2 instances where hours were variable but not reported.<sup>6</sup> Including 1 instance where wages for 1918 were not reported.<sup>7</sup> Including 4 instances of piece rates.<sup>8</sup> Including 14 instances of piece rates.<sup>9</sup> Including 16 instances of piece rates.<sup>10</sup> Including 15 instances where hours were variable, 14 of which were not reported.<sup>11</sup> Including 1 instance where hours were variable.<sup>12</sup> Including 14 instances where hours were variable but not reported.<sup>13</sup> Not including 2 instances of change from piece to time rate basis and including 50 instances of piece rates.<sup>14</sup> Not including 2 instances of change from piece to time rate basis and including 1 instance where wages for 1918 were not reported.<sup>15</sup> Not including 2 instances of change from piece to time rate basis and including 52 instances of piece rates and 17 instances where hours were variable, 16 of which were not reported.<sup>16</sup> Not including 2 instances of change from piece to time rate basis and including 1 instance where hours were variable.<sup>17</sup> Not including 2 instances of change from piece to time rate basis and including 16 instances where hours were variable but not reported.

From the foregoing table it is seen that of the 296 changes reported in the bakery trade scales, all effected an increase in wages per hour; 292 resulted in an increase in the earnings per week, and 4 made no change in earnings, the increase in the hourly rate being offset by a reduction in the number of hours worked; and 107 produced a decrease and 189 no change in the number of hours per week. The other items of the table are read in like manner.

It is further seen that for eight trade groups all the changes in the wages per hour were increases, and that for the four other trade groups there were only 14 instances of decreases in wages per hour. For six trade groups all the changes in the earnings per week were increases, and for six trade groups there were collectively but 77 instances of decreases in earnings. For five trade groups all the changes in the hours per week were decreases, and for seven trade groups there were collectively only 36 instances of increases in hours.

Expressed in percentages, of the total of 4,669 changes, 98.9 per cent resulted in increases, and 0.3 per cent in decreases in the wages per hour; 97.4 per cent made increases and 1.6 per cent decreases in the earnings per week; and 0.8 per cent made increases and 14.1 per cent decreases in the hours per week.

It will be observed that comparatively few of the changes made in the scales affected hours per week, and that with only 36 exceptions the changes made were reductions.

Each agent in his visit to a city made note of all changes in scales which had taken place after May 15 up to the time of his visit, and each union official visited was asked to report by letter any changes occurring later in the year.

Many agreements contain provisions for changes to take place on dates subsequent to those on which the agreements were made, and some provide for successive changes to become effective at specified intervals until a stated limit is reached.

All changes after May 15 in the year 1919 coming to the knowledge of the Bureau are indicated by footnotes in General Table A.

### RELATIVE RATES OF WAGES AND HOURS OF LABOR.

A table of relative numbers (percentages) has been computed to show for all cities taken collectively the extent of the changes that have occurred from year to year in the occupations included in the report. To make it convenient to compare war conditions with normal conditions closely preceding the war it was deemed desirable to use as the base, or 100, the figures for 1913. Occupations for which the Bureau has no figures as far back as 1913 are omitted from the table, since the figures for 1913 are used as a base.

Referring to Table 3, which follows, it is seen that the average rate of wages per week on full time for all bakers on May 15, 1919, was 170 per cent of the average rate in 1913, or 70 per cent higher. The rate in 1907 was 85 per cent of the rate in 1913; thus from 1907 to 1919 the relative number changed from 85 to 170. This explanation will apply to all the years and all the relative numbers in the table.

These relative numbers were derived from the actual wages and hours in all the localities reported. All figures used are from local unions which supplied comparable data. In making the computations the actual wages and hours of each trade in each city for 1918 and 1919, respectively, were weighted (multiplied) by the number of union members employed in the trade in the city in 1919. The products for the several cities were added together for each year, producing aggregate wages and hours for the trade in each of the years. The per cent of change in these aggregates indicates the change for the trade as a whole in the year. This percentage was

then applied to the relative number for 1918, which brings down to 1919 the relative number for each trade or occupation so computed.

It should be borne in mind that the relative numbers in Table 3 are percentages, not actual hours or amounts of money. In studying this table its three parts should be observed. Thus, referring again to bakers for illustration, it is seen that the relative hours per week decreased from 111 in 1907 to 93 in 1919, and that the relative rate of wages per hour increased from 76 in 1907 to 186 in 1919. The reduction in hours partly offsets the increase of wages per hour; thus the relative rates of wages per week increased from 85 in 1907 to 170 in 1919 as compared with 76 to 186, the increase in the relative rates of wages per hour.

Caution should be used in considering these relative numbers. A subtraction of relative numbers does not represent the per cent of increase or decrease between the different years. For example, the relative rate of wages per week of bakers in 1907 was 85, as compared with 170 in 1919, making an increase of 85 points in the relative number. Eighty-five is 100 per cent of 85, thus making the increase in 1919 over 1907 100 per cent, as shown in Table 1, page 9.

TABLE 3.—RELATIVE HOURS OF LABOR PER WEEK AND RELATIVE RATES OF WAGES PER HOUR AND PER WEEK ON FULL TIME, 1907 TO 1919.

[1913=100.]

| Year.     | Bakers.                            |                                  |                                             | Buildings trades.                  |                                  |                                             |                                          |                                  |                                             |                                    |                                  |                                             |

## GENERAL INDEX.

A table of index numbers is now presented. In these index numbers are combined the data for all localities and for all occupations except theatrical employees and waiters, which are omitted because of incomplete data, especially as to hours.

The data of preceding reports have been used so as to produce a series of general index numbers from 1907 to 1919. The method of computation is the same as used in computing the relative numbers of the several occupations as explained on page 14.

TABLE 4.—INDEX NUMBERS OF UNION WAGE RATES AND HOURS OF LABOR, 1907 TO 1919.

[1913=100.]

| Year.     | Rates of wages per hour. | Full-time hours per week. | Rates of wages per week, full time. |
|-----------|--------------------------|---------------------------|-------------------------------------|
| 1907..... | 90                       | 103                       | 92                                  |
| 1908..... | 91                       | 102                       | 93                                  |
| 1909..... | 92                       | 102                       | 93                                  |
| 1910..... | 94                       | 101                       | 95                                  |
| 1911..... | 96                       | 101                       | 96                                  |
| 1912..... | 98                       | 100                       | 98                                  |
| 1913..... | 100                      | 100                       | 100                                 |
| 1914..... | 102                      | 100                       | 102                                 |
| 1915..... | 103                      | 99                        | 102                                 |
| 1916..... | 107                      | 99                        | 106                                 |
| 1917..... | 114                      | 98                        | 112                                 |
| 1918..... | 133                      | 97                        | 130                                 |
| 1919..... | 155                      | 95                        | 148                                 |

In the preparation of the above indexes of rates of wages and of hours of labor, the numbers were extended to two decimal places for closer accuracy in computation, but in the tables published the decimals of the indexes have been dropped, so that the indexes appear as whole numbers.

An index number is, as before stated, a percentage computed from the actual figures for each year compared with a base year. In table 4 the figures for 1913 are made the base, as was done in Table 3, pages 15 to 21, in order that later conditions may be compared readily with normal conditions closely preceding the war.

As some readers may desire to start comparisons with the initial year, a table of index numbers computed from the same basic figures are given with 1907 taken as the base, or 100.

TABLE 5.—INDEX NUMBERS OF UNION WAGE RATES AND HOURS OF LABOR, 1907 TO 1919.

[1907=100.]

| Year.     | Rates of wages per hour. | Full-time hours per week. | Rates of wages per week, full time. |
|-----------|--------------------------|---------------------------|-------------------------------------|
| 1907..... | 100                      | 100                       | 100                                 |
| 1908..... | 101                      | 100                       | 101                                 |
| 1909..... | 102                      | 99                        | 102                                 |
| 1910..... | 105                      | 99                        | 104                                 |
| 1911..... | 107                      | 98                        | 105                                 |
| 1912..... | 109                      | 98                        | 107                                 |
| 1913..... | 111                      | 97                        | 109                                 |
| 1914..... | 114                      | 97                        | 111                                 |
| 1915..... | 115                      | 97                        | 112                                 |
| 1916..... | 119                      | 96                        | 116                                 |
| 1917..... | 127                      | 96                        | 123                                 |
| 1918..... | 148                      | 95                        | 142                                 |
| 1919..... | 172                      | 92                        | 162                                 |

## UNION SCALE OF WAGES AND HOURS OF LABOR IN 13 CITIES.

Index numbers have also been prepared for each of 13 important cities. In Table 6 the data for important selected trades of the city have been consolidated in general index numbers from 1907 to 1919. In Table 7 actual rates and hours and relative rates and hours are given through the same period of time for each of the several trades consolidated in Table 6. The trades included in this table number from 14 to 22 in the different cities. The figures for preceding years are drawn from earlier bulletins. In these two tables 1907 is taken as the basis of comparison or 100.

TABLE 6.—INDEX NUMBERS OF UNION SCALES OF WAGES PER HOUR AND PER WEEK AND HOURS OF LABOR PER WEEK PREVAILING IN MAY OF EACH YEAR, 1907 TO 1919, FOR ALL TRADES LISTED IN TABLE 7, TAKEN COLLECTIVELY.

| Year.     | Atlanta.        |                      |                                     | Baltimore.      |                      |                                     | Boston.         |                      |                                     | Chicago.        |                      |                                     |
|-----------|-----------------|----------------------|-------------------------------------|-----------------|----------------------|-------------------------------------|-----------------|----------------------|-------------------------------------|-----------------|----------------------|-------------------------------------|
|           | Rates of wages— |                      | Hours of labor per week, full time. | Rates of wages— |                      | Hours of labor per week, full time. | Rates of wages— |                      | Hours of labor per week, full time. | Rates of wages— |                      | Hours of labor per week, full time. |
|           | Per hour.       | Per week, full time. |                                     | Per hour.       | Per week, full time. |                                     | Per hour.       | Per week, full time. |                                     | Per hour.       | Per week, full time. |                                     |
| 1907..... | 100             | 100                  | 100                                 | 100             | 100                  | 100                                 | 100             | 100                  | 100                                 | 100             | 100                  | 100                                 |

25 Scale became 70 cents on June 1, 1919.

26 Double time after midnight.

32 Time and one-half on Saturday afternoon.

36 More than half received more than the scale; amount not reported.

41 Double time after 10 p. m.

45 Nominal rate. All received more; amount not reported.

63 Scale became 80 cents on July 1, 1919.

77 Scale became 80 cents on Aug. 1, and 87.5 cents on Sept. 18, 1919.

78 Scale became 92.5 cents on Nov. 1, 1919.

79 Scale became 85 cents on June 1, and \$1 on Sept. 22, 1919.

80 Scale became 90 cents on Nov. 1, 1919.

81 Double time after 6 p. m.

82 Scale became \$1 on Sept. 2, 1919.

83 Scale became 67.5 cents on June 1, 1919.

84 44 hours per week, June to August, inclusive.

85 Work 47 hours, paid for 48; during July and August work 45, paid for 46.

86 Four times single rate after 5 p. m.

87 Double time after 10 p. m.

88 Work 47 hours; paid for 47 hours and 47 minutes.

TABLE A.—UNION SCALE OF WAGES AND HOURS, ETC.—Continued.

## BUILDING TRADES—Continued.

## SHEET-METAL WORKERS—Concluded.
