## UNION SCALE OF WAGES AND HOURS OF LABOR, MAY 15, 1921.

### SUMMARY.

This report contains the union scale of wages and hours of labor of 930,903 members of organized trades and occupations in 66 of the principal cities of the United States as of May 15, 1921, and for ready comparison the scales prevailing on May 15, 1920, are shown in parallel columns. For a list of the trades and occupations see pages 4 and 5.

In all trades taken collectively the increase in weekly wage rates on May 15, 1921, over May 15, 1920, was 3 per cent; over 1917, 72 per cent; over 1913, 93 per cent; over 1910, 103 per cent; and over 1907, 111 per cent.

In 1921 the regular hours of labor were relatively at the same level as in 1920; 5 per cent lower than in 1917; 6 per cent lower than in 1913; 7 per cent lower than in 1910; and 8 per cent lower than in 1907.

Taken collectively, rates per hour in 1921 were 3 per cent higher than in 1920; 80 per cent higher than in 1917; 105 per cent higher than in 1913; 117 per cent higher than in 1910; and 129 per cent higher than in 1907.

The weekly wage rates of the trades and occupations herein reported show the following: Bakers received in 1921 an increase of 4 per cent over the rates received in 1920. Building-trades changes ranged from a decrease of 10 per cent for wharf and bridge carpenters, to an increase of 10 per cent for slate and tile roofers. Chauffeurs received 1 per cent and teamsters and drivers 2 per cent increase in weekly rates. Freight handlers' rates showed an increase of 1 per cent. Granite cutters had an increase of 10 per cent, and stonecutters 3 per cent. Laundry workers had an increase of 4 per cent. Linemen had an increase of 6 per cent in weekly rates. Changes in the metal trades group ranged from a decrease of 9 per cent for core makers to an increase of 11 per cent for boiler makers' helpers.

Millwork carpenters had an increase of 10 per cent, glaziers 4 per cent, and millwork painters (hardwood finishers) 4 per cent. In book and job printing, all trades had increases ranging from 1 per cent for press assistants and feeders to 24 per cent for electrotypers (battery-men and builders). In newspaper printing trades, all hands had advances ranging from 3 per cent for machine tenders (machinists), nightwork, to 30 per cent for machinists-operators, daywork. See pages 4 and 5 for per cent of increase or decrease for each trade.

The hours per week are stated in this report for 91 trades and occupations or subdivisions, and groups of trades and occupations. Of this number 28 had a reduction, 5 had an increase, and 58 had no change in working hours between May 15, 1920, and May 15, 1921.

The foregoing statements, concerning changes in rates and hours apply to the average for each trade, or subdivision or group as a whole. They must not be understood, however, as applying to each and every local union in the trade.

There are 5,968 wage quotations tabulated for 1921, of which 51 show no comparable data for 1920, either because there were no effective scales on May 15, 1920, or because the unions were not then organized. Of the 5,917 wage quotations for which there are comparable data for 1920, 3,174 had not changed during the year, and 2,743 had changed in rates or hours or both of these items. There are 710 instances of a reduction in weekly rates in 1921 as compared with 1920, 619 instances of reduction in rates per hour, and 46 instances of an increase in hours of labor. Of the 46 instances of increase in hours of labor 14 occurred in chauffeurs, teamsters, and drivers' unions, 14 in metal trades, 13 in building trades, 2 in linemen's unions, 1 in freight handlers' unions, 1 in millwork trades, and 1 in the newspaper printing trades.

This is the tenth bulletin published by the Bureau of Labor Statistics on the subject of union scales of wages and hours of labor. A list follows showing the serial number of union-wage reports, the bulletin number, the date of the scales included, and the number of cities reported.

BULLETIN NUMBER, DATE OF SCALES USED, AND NUMBER OF CITIES REPORTED, FOR EACH BULLETIN ON UNION SCALE OF WAGES AND HOURS OF LABOR PUBLISHED BY THE BUREAU OF LABOR STATISTICS.

The trades and occupations here covered are divided into 12 groups as follows:

Bakery trades.  
Building trades.  
Chauffeurs, teamsters, and drivers.  
Freight handlers.  
Granite and stone trades.  
Laundry workers.

Linemen.  
Metal trades.  
Millwork.  
Printing and publishing: Book and job.  
Printing and publishing: Newspaper.  
Street railway motormen and conductors.

The 66 cities included in this report are located in 36 States. The cities selected are generally the largest in their respective sections of the country.

The cities included are as follows:

|                      |                       |
|----------------------|-----------------------|
| Atlanta, Ga.         | *Muskegon, Mich.      |
| Baltimore, Md.       | *Nashville, Tenn.     |
| Birmingham, Ala.     | Newark, N. J.         |
| Boston, Mass.        | New Haven, Conn.      |
| *Bridgeport, Conn.   | New Orleans, La.      |
| Buffalo, N. Y.       | New York, N. Y.       |
| *Butte, Mont.        | *Norfolk, Va.         |
| Charleston, S. C.    | Omaha, Nebr.          |
| Chicago, Ill.        | *Peoria, Ill.         |
| Cincinnati, Ohio.    | Philadelphia, Pa.     |
| Cleveland, Ohio.     | Pittsburgh, Pa.       |
| *Columbus, Ohio.     | *Portland, Me.        |
| Dallas, Tex.         | Portland, Oreg.       |
| *Davenport, Iowa.    | Providence, R. I.     |
| *Dayton, Ohio.       | *Reading, Pa.         |
| Denver, Colo.        | Richmond, Va.         |
| *Des Moines, Iowa.   | *Rochester, N. Y.     |
| Detroit, Mich.       | *Rock Island, Ill.    |
| *Erie, Pa.           | *Saginaw, Mich.       |
| Fall River, Mass.    | St. Louis, Mo.        |
| *Grand Rapids, Mich. | *St. Paul, Minn.      |
| *Houston, Tex.       | Salt Lake City, Utah. |
| Indianapolis, Ind.   | San Francisco, Calif. |
| Jacksonville, Fla.   | Scranton, Pa.         |
| Kansas City, Mo.     | Seattle, Wash.        |
| Little Rock, Ark.    | *Spokane, Wash.       |
| Los Angeles, Calif.  | *Springfield, Mass.   |
| Louisville, Ky.      | *Toledo, Ohio.        |
| Manchester, N. H.    | Washington, D. C.     |
| Memphis, Tenn.       | *Wichita, Kans.       |
| Milwaukee, Wis.      | *Worcester, Mass.     |
| Minneapolis, Minn.   | *York, Pa.            |
| *Moline, Ill.        | *Youngstown, Ohio.    |

The asterisks in the preceding list indicate the cities added since the first report. Under each trade in Table A the cities appear in the order as listed.

A few trades not appearing in Bulletin No. 131 were added in Bulletin No. 143. In Bulletin No. 171 the scope of the inquiry was materially enlarged, four new groups of occupations being included: Brewery and bottling-house workmen; chauffeurs, teamsters, and drivers; freight handlers; and soft-drink establishment employees.

A few trades were added in Bulletin No. 194, a few in Bulletin No. 214, and in Bulletin No. 245 four trades were included for the first time—mosaic and terrazzo workers, ship carpenters, glaziers, and photo-engravers. In Bulletin No. 259 the scales for brewery and bottling-house workmen and soft-drink establishment employees were discontinued and the scales for laundry workers, theatrical employees, and waiters were included for the first time. Bulletins No. 274 and No. 286 presented practically the same trades and occupations as Bulletin No. 259. In this report the scales for theatrical employees and waiters are discontinued and linemen and street railway motormen and conductors are included.

The several trades and occupations for which the union scales are given in this bulletin are shown in the table next following.

This table shows for each trade, and for each year for which data are available, the per cent of increase or decrease in rates of wages per week on full time in 1920, as compared with each of the 14 years preceding, in all cities covered, taken collectively.

# 4 UNION SCALE OF WAGES AND HOURS OF LABOR, MAY 15, 1921.

TABLE 1.—PER CENT OF INCREASE IN RATES OF WAGES PER WEEK FULL TIME: 1921 COMPARED WITH EACH OF THE 14 YEARS PRECEDING.

| Occupation.                                      | Per cent higher in 1921 than in— |      |      |      |      |      |      |      |      |      |      |      |      |      |

<sup>1</sup> No data.<sup>2</sup> Lower.<sup>3</sup> No change.

The union scale, as the term is here used, is a statement, either written or definitely understood, of wages and hours of labor agreed to or accepted by an organization of union men and an employer or group of employers, under which agreement, expressed or implied, union men actually work. The union scale usually fixes the limit in only one direction. It sets a minimum wage and a maximum of hours for a regular day's work. This report shows such minimum wage and maximum hours as are established by the agreed or accepted scale. In certain cities and trades, however, some workmen, and in

some few instances all or nearly all workmen, actually are paid more than the scale, and in some instances employees work less than the scale hours. As a general rule, however, the union scale represents the prevailing wage of a locality for efficient labor.

In addition to ordinary increases in wages, a considerable number of increases were reported in 1918 as war bonuses. Nearly all of these, and some other bonuses, were in effect in 1919 and in 1920. In 1921 some of the bonuses had been made a part of the regular scale, some had been modified, and some were carried as emergency or cost of living bonuses. In such cases where bonuses were definitely reported in one fixed amount and were to remain in effect indefinitely, such bonuses were combined with the regular rate. If the increases were various or indefinite, or applied only to some individuals or to only a part of the union membership, the general rate was entered in the table as the scale, and the bonuses mentioned in footnotes.

In cases where the returns showed that a considerable percentage of the membership received more than the scale, the facts, so far as ascertainable, are stated in footnotes, which are generally self-explanatory, such as "more than half received more; amount not reported," "nominal rate, all received more; average \$35," "25 per cent received \$4 more per week," etc. No note is made where the number who received the higher rate embraced less than 25 per cent of the membership of the union. Agreements sometimes provide that old or infirm men may work for less than the scale.

The observance of Labor Day as a holiday is so general and the fact is so widely understood that it was deemed unnecessary to refer to the many agreements which prohibit the performance of ordinary work on that day. However, in instances where the prohibition of work had been extended to other days or parts of days, such as July 4 and Saturday afternoon and also included Labor Day, the conditions have been stated in footnotes.

The rates of wages of railroad-shop employees included herein are the rates awarded by the United States Railroad Labor Board, on July 20, 1920, made retroactive to May 1, 1920, and not rates agreed upon by negotiation between employers and unions in the usual way of arriving at a union scale. The railroad rates are shown, however, for only such cities as have union members employed in railroad shops.

In the printing trades of compositor and machine operator contracts are found in certain cities in which there are maximum hours stated that may not be exceeded except by payment of an overtime rate, and a minimum of hours for which work must be provided or payment made when a man undertakes a day's work. When such contract exists, there may be further a commonly accepted working time, within the limits provided, so well established that such time is in effect the standard working-day. In such instances the tabulation shows such actual working hours, and notes state the maximum and minimum hours.

No scale is published here unless it was so far established that at least 50 per cent of the members of the union were receiving the scale or above it. Information obtained on this question indicates that an insignificant number of union members were working for less than the scale, while a considerable number were receiving more than the scale. Some trades were not organized in certain cities, and some were organized only in part. When organized in part, with a scale in force for such men as were organized, the scale is published.

The union scales presented in this report are almost entirely time-rate scales. Piece-rate scales are published for machine operators and machinist operators, printing trades, and lathers only. These occupations have simple units of payment which are commonly understood. Some trades, especially the metal trades, work to a considerable extent on piece rates. Such rates are so great in number and the units of payment so variable that it is not practicable to quote them. The earnings at piece rates usually exceed the full-time earnings at the time rates of the trade. For localities where piece rates prevail almost exclusively and the time rate provided for in the scale is only infrequently paid, such time rate has not been tabulated.

The terms of time-rate scales as agreed to by employers and trade-unions state wages for different units of time. Some scales designate the rates of wages by the hour, others by the day, week, or month. To make comparison easy, the varying rates have been reduced to both an hourly rate and a weekly rate.

The general table shows the rates of wages per hour and the rates per week on full time, the rates for overtime, Sunday, and holiday work, the regular hours for a full day, for Saturday, and for a full week, and the number of months in the year for which the agreement provided for a Saturday half holiday. When for a period of more than three months of the year the numbers of hours differed from those shown for May, the difference has been noted in the table.

Nearly all the information here published was obtained by special agents of this bureau in personal visits to business agents and secretaries of the respective trade-unions in the several cities. The State labor bureaus of Massachusetts, Ohio, and Pennsylvania, for their own purposes, collect union wage scales within their respective States. To avoid duplication of field work in these States, the State and Federal bureaus cooperated.

In Pennsylvania agents of the State bureau worked with an agent of this bureau and the data were obtained by personal visits to the trade-unions. A copy of all data collected was returned both to the State and Federal offices. The Ohio data were collected entirely by the Ohio bureau by personal visits of special agents. The Massachusetts bureau collected its data in part by correspondence and in part by sending out special agents. Both Massachusetts and Ohio furnished copies of their data to this bureau.

In the work of this bureau and of the three State bureaus wage scales, written agreements, and trade-union records were consulted wherever available. The field work involved an interview with the officials of about 2,200 local unions.

Scales for apprentices are not shown, but scales for helpers are given in a number of trades. In some trades the work of helpers is performed in part by apprentices. Whenever it is found that the work of helpers is largely done by apprentices, the scales for such helpers are omitted.

An inspection of the general table shows a great variation for some occupations in trade terms and classifications in different cities. For example, bakers in some cities are classed as first hands, second hands, and third hands; in other cities as mixers, benchmen, oven men, etc. The difference in occupation name makes a comparison between cities difficult. Inquiry has shown that the terms first hand, second hand, etc., do not cover identical work in different cities where these terms are used. Certain work may be considered first-hand work in

one city and second-hand work in another city. Of necessity, this bureau has followed the terminology of each city.

There are also great variations in classification and in the extent of subdivision of chauffeurs, teamsters, and drivers, and of book-binding and presswork occupations, making comparison of city with city quite difficult; and similar conditions, less in degree, are found in several other trades.

General Table A, pages 64 to 219, shows 2,743 instances of changes in scales during the year ending May 15, 1921, either as to wage rates or hours, or both, out of a total of 5,917 scale statements in which there are comparable data. A table is here given summarizing these 2,743 changes as they affected each of the three phases of the scale—wages per hour, earnings per week, and hours per week. The changes in the small number of piece-rate scales quoted in this report are included in this table on the same basis as the time-rate scales.

TABLE 2.—NUMBER OF WAGE QUOTATIONS TABULATED FOR 1921 AND 1920, AND NUMBER OF INCREASES AND DECREASES IN RATES PER HOUR, EARNINGS PER WEEK, AND IN HOURS PER WEEK, AS INDICATED IN THE 2,743 CASES IN WHICH CHANGES WERE MADE IN ONE OR MORE OF THESE ITEMS DURING THE YEAR ENDING MAY 15, 1921.

<sup>1</sup> Not including 1 instance of change from piece to time rate basis.

<sup>2</sup> The hours per week were not reported in the 112 cases where changes in wages per hour were reported for this group.

<sup>3</sup> The earnings per week were not reported in these cases, but the wages per hour having changed, it is assumed that there was a corresponding change in the earnings per week.

<sup>4</sup> Including 75 cases where changes in wages per hour but not in earnings per week were reported.

<sup>5</sup> Including 37 cases where changes in wages per hour but not in earnings per week were reported.

From the foregoing table it is seen that of the 94 changes reported in the bakery trade scales, 65 effected an increase and 29 a decrease in wages per hour; 61 resulted in an increase and 29 in a decrease in earnings per week, the increase in the hourly rate in 4 instances being offset by a reduction in the number of hours worked; and 6 produced a decrease and 88 no change in the number of hours per week. The other items of the table are read in like manner.

Owing to shifting of trips and variation of hours in the operation of street cars, the hours per week and rates per week of motormen and conductors are omitted from this report. Of the 112 changes reported in this group, 75 effected an increase and 37 a decrease in rates per hour. For the purposes of this table it has been assumed that a change in the hourly rates in the street railway group resulted in a corresponding change in the weekly rates; therefore the changes in weekly rates are tabulated as coincident with the changes in hourly rates. No hours per week having been reported for these 112 cases, they have not been included in the totals for that item.

Expressed in percentages of the total of 2,743 changes, 75.4 per cent resulted in increases and 22.6 per cent in decreases in wages per hour; 69.7 per cent made increases and 25.9 per cent decreases in earnings per week; and 1.5 per cent made increases and 20.6 per cent decreases in the hours per week.

## INDEX NUMBERS.

### UNION SCALE OF WAGES AND HOURS OF LABOR IN ALL CITIES.

A table of index numbers (percentages) has been computed to show for all cities taken collectively the extent of the changes that have occurred from year to year in the occupations included in this report. To make it convenient to compare war and readjustment conditions with normal conditions closely preceding the war it was deemed desirable to use as the base, or 100, the figures for 1913. Occupations for which the bureau has no figures as far back as 1913 are omitted from the table, since the figures for 1913 are used as a base.

Referring to Table 3, which follows, it is seen that the average rate of wages per week on full time for all bakers on May 15, 1921, was 245 per cent of the average rate in 1913, or 145 per cent higher. The rate in 1907 was 85 per cent of the rate in 1913; thus from 1907 to 1921 the index number changed from 85 to 245. This explanation will apply to all the years and all the index numbers in the table.

These index numbers were derived from the actual wages and hours in all the localities which supplied comparable data. In making the computations the actual wages and hours of each trade in each city for 1920 and 1921, were weighted (multiplied) by the number of union members employed in the trade in the city in 1921 each year, respectively. The products for the several cities were added together for each year, producing aggregate wages and hours for the trade in each of the years. The aggregate wages and hours for each trade were then divided by the aggregate number of union members reported in the trade to obtain averages for each year. The per cent of change in these averages indicates the change for the trade as a whole between 1920 and 1921. This percentage was then applied

to the index number for 1920, as previously computed in the preceding report, thus bringing down to 1921 the index number for each trade or occupation.

It should be borne in mind that the index numbers in Table 3 are percentages, not actual hours or amounts of money. In studying this table its three parts should be observed. Thus, referring again to bakers for illustration, it is seen that the index number for hours per week decreased from 111 in 1907 to 90 in 1921, and that the index number for rate of wages per hour increased from 76 in 1907 to 279 in 1921. The reduction in hours partly offsets the increase of wages per hour; thus the index number for rates of wages per week increased from 85 in 1907 to 245 in 1921 as compared with 76 to 279, the increase in the index number for rates of wages per hour.

Caution should be used in considering these index numbers. A subtraction of index numbers does not represent the per cent of increase or decrease between the different years. For example, the index number for rate of wages per week of bakers in 1907 was 85, as compared with 245 in 1921, making an increase of 160 points in the index number. One hundred and sixty is 188 per cent of 85, thus making the increase in 1921 over 1907, 188 per cent, as shown in Table 1, pages 4 and 5.

TABLE 3.—INDEX NUMBERS OF UNION SCALE OF HOURS OF LABOR PER WEEK AND RATES OF WAGES PER HOUR AND PER WEEK ON FULL TIME, 1907 TO 1921.

[1913=100.]

| Year.     | Bakers.                   |                         |                                    | Building trades.          |                         |                                    |                                          |                         |                                    |                           |                         |                                    |

## GENERAL INDEX.

A table of index numbers is now presented in which are combined the data for all localities and for all occupations except street-railway motormen and conductors, which are omitted because of incomplete data, especially as to hours.

The data of preceding reports have been used so as to produce a series of general index numbers from 1907 to 1921. The method of computation is the same as used in computing the index numbers of the several occupations as explained on pages 9 and 10.

TABLE 4.—INDEX NUMBERS OF UNION WAGE RATES AND HOURS OF LABOR, 1907 TO 1921.

[1913=100.]

| Year.     | Rate of wages per hour. | Full-time hours per week. | Rate of wages per week, full time. |
|-----------|-------------------------|---------------------------|------------------------------------|
| 1907..... | 90                      | 103                       | 92                                 |
| 1908..... | 91                      | 102                       | 93                                 |
| 1909..... | 92                      | 102                       | 93                                 |
| 1910..... | 94                      | 101                       | 95                                 |
| 1911..... | 96                      | 101                       | 96                                 |
| 1912..... | 98                      | 100                       | 98                                 |
| 1913..... | 100                     | 100                       | 100                                |
| 1914..... | 102                     | 100                       | 102                                |
| 1915..... | 103                     | 99                        | 102                                |
| 1916..... | 107                     | 99                        | 106                                |
| 1917..... | 114                     | 98                        | 112                                |
| 1918..... | 133                     | 97                        | 130                                |
| 1919..... | 155                     | 95                        | 148                                |
| 1920..... | 199                     | 94                        | 189                                |
| 1921..... | 205                     | 94                        | 193                                |

In the preparation of the above index numbers of rates of wages and of hours of labor the numbers were extended to two decimal places for closer accuracy in computation, but in the tables published the decimals of the indexes have been dropped, so that the indexes appear as whole numbers.

An index number is, as before stated, a percentage computed from the actual figures for each year compared with a base year. In Table 4 the figures for 1913 are made the base, as was done in Table 3, pages 10 to 16, in order that later conditions may be compared readily with normal conditions closely preceding the war.

As some readers may desire to start comparisons with the initial year, a table of index numbers computed from the same basic figures is given with 1907 taken as the base, or 100.

TABLE 5.—INDEX NUMBERS OF UNION WAGE RATES AND HOURS OF LABOR, 1907 TO 1921.

[1907=100.]

| Year.     | Rate of wages per hour. | Full-time hours per week. | Rate of wages per week, full time. |
|-----------|-------------------------|---------------------------|------------------------------------|
| 1907..... | 100                     | 100                       | 100                                |
| 1908..... | 101                     | 100                       | 101                                |
| 1909..... | 102                     | 99                        | 102                                |
| 1910..... | 105                     | 99                        | 104                                |
| 1911..... | 107                     | 98                        | 105                                |
| 1912..... | 109                     | 98                        | 107                                |
| 1913..... | 111                     | 97                        | 109                                |
| 1914..... | 114                     | 97                        | 111                                |
| 1915..... | 115                     | 97                        | 112                                |
| 1916..... | 119                     | 96                        | 116                                |
| 1917..... | 127                     | 96                        | 123                                |
| 1918..... | 148                     | 95                        | 142                                |
| 1919..... | 172                     | 92                        | 162                                |
| 1920..... | 222                     | 91                        | 206                                |
| 1921..... | 229                     | 92                        | 211                                |

UNION SCALE OF WAGES AND HOURS OF LABOR FOR SELECTED TRADES  
IN 13 CITIES.

Index numbers have also been prepared for each of 13 important cities. In Table 6 the data for selected trades in each of these cities have been consolidated in general index numbers from 1907 to 1921. In Table 7 actual rates and hours and index numbers for rates and hours are given through the same period of time for each of the several trades consolidated in Table 6. The trades included in this table number from 14 to 22 in the different cities. The figures for preceding years are drawn from earlier bulletins. In these two tables 1907 is taken as the basis of comparison, or 100.

TABLE 6.—INDEX NUMBERS OF UNION SCALES OF WAGES PER HOUR AND PER WEEK AND HOURS OF LABOR PER WEEK PREVAILING IN MAY OF EACH YEAR, 1907 TO 1921, FOR ALL TRADES LISTED IN TABLE 7, TAKEN COLLECTIVELY.

[1907=100.]

| Year.     | Atlanta.        |                      |                                     | Baltimore.      |                      |                                     | Boston.         |                      |                                     | Chicago.        |                      |                                     |

TABLE A.—UNION SCALE OF WAGES AND HOURS OF LABOR IN SPECIFIED TRADES, BY CITIES, MAY 15, 1921, AND MAY 15, 1920.

## BAKERY TRADES.

## BAKERS.

[In some instances the rate for overtime and for Sunday and holidays is indicated by figures closely followed by the letter c, which means that the amount given is the rate in cents per hour. When two entries are given for overtime rate the first represents an initial overtime and the second a further period of overtime. When overtime work is prohibited it is indicated by "Pro." When two entries are given for Sunday and holiday rate the first applies to Sunday and the second to holidays, except for railroad occupations, for which the first represents the initial rate, the second the extended overtime rate. When no statement is given for 1920 there was no union, or if a union, no effective scale.]
