**BUILDING PERMITS IN THE PRINCIPAL CITIES OF THE
UNITED STATES IN 1921.**

INTRODUCTION.

Last year the Bureau of Labor Statistics issued its first annual report on this subject, collecting information for the year 1920 from cities of 35,000 population and over. In this, the second investigation, the scope of the survey has been extended in an effort to cover all cities of 25,000 and over in the United States—287 cities in all.

A report was obtained from each of 265 cities. From some cities the report was secured by mail direct from the local building inspectors, in other cities by personal visits of agents of the bureau. In cities in which the work was done by agents the data were taken either directly from the applications for permits on file in the building inspector's office or from record books kept by the building inspector.

No report was secured for 22 cities above 25,000 in population. A number of these cities have no building code and no building inspector. Such cities require no permit to be issued and therefore no record of the amount of building done is available. In a few cities the work of building inspection is done in part by the chief of the fire department. In cities with building codes of this class the fire chief inspects all buildings erected in the fire zone—that is, in a certain restricted area in the heart of the business district only. It can be seen, then, that when any records at all are kept in these cities they are not for the city as a whole, and hence they have been omitted from the report.

The bureau collected information for 1920 not only as to the uses of the buildings erected but also as to the material of which they were built. It was found, however, that a clear-cut classification according to the material used in constructing a building could not be made, for buildings were reported according to materials used in their outer walls, and sometimes the walls of the first story of a dwelling house would be of brick and those of the upper story of wood. In large office buildings and stores the lower stories would sometimes be built of stone and the upper stories of brick. Then again steel skeleton buildings sometimes had brick outer walls and sometimes concrete or stone outer walls. All this made it difficult to classify buildings in regard to material used.

Nor was it possible to make a very satisfactory classification of fire-resisting and nonfire-resisting buildings, as a building might be

placed under the heading of brick because it had brick outer walls and yet have a nonfireproof roof and wooden floors and stairways. The bureau therefore decided to drop that part of the investigation calling for a classification of buildings according to material used, and to confine the investigation to the proposed use of the building and the number of families provided for in the dwelling houses erected.

An attempt was made to find out the number of additional families cared for by alterations and additions to dwellings, such as changing a one-family dwelling into a two-family dwelling, etc. It was found, however, that comparatively few of the cities kept such records. Some cities which had no records of this kind promised to try to obtain this information in the future. Undoubtedly quite a number of additional families have been provided for in this manner. Agents found in some towns that what had formerly been a one-family house had been altered so as to house as many as four and five families, and also that garages and barns with a little alteration had been made habitable for one or more families. Such conditions were more usually found in the foreign sections of a factory or mill town.

Previous to the year 1920 the Geological Survey of the United States Department of the Interior collected and published data concerning the number and cost of buildings according to the material used in their construction. The figures shown below are the total amounts of money spent in 131 identical cities from which information was obtained during the years 1914 to 1921, inclusive. From 1914 to 1919, inclusive, the figures are taken from the publications of the Geological Survey, for 1920 and 1921 from the records of the Bureau of Labor Statistics.

1914.....	\$749,515,813	1918.....	\$401,770,354
1915.....	776,978,256	1919.....	1,259,044,808
1916.....	982,028,585	1920.....	1,343,629,036
1917.....	650,802,375	1921.....	1,602,496,737

These figures giving the cost of buildings, as shown by building permits, can not be interpreted to indicate the relative physical amount of building construction, because the costs of both materials and labor used in such construction have varied from year to year.

Table 1 shows the index number of the wholesale prices of building materials and the index number of the changes in the union scale of wages in the building trades as a whole from 1913 to 1921, inclusive, as compiled by the Bureau of Labor Statistics.

TABLE 1.—INDEX NUMBERS OF WHOLESALE PRICES OF BUILDING MATERIALS AND UNION SCALE OF WAGES IN BUILDING TRADES.

Year.	Index numbers.	
	Wholesale prices.	Union wages.
1913.....	100	100
1914.....	92	102
1915.....	94	103
1916.....	120	106
1917.....	157	113
1918.....	172	126
1919.....	201	145
1920.....	264	197
1921.....	165	200

Table 2 shows the total number and estimated cost of the different kinds of buildings covered by permits in 265 cities, the per cent that each kind is of the total number, and the per cent that the cost of each kind is of the total cost, together with the average cost per building.

TABLE 2.—BUILDING PERMITS ISSUED IN 265 CITIES IN 1921, BY INTENDED USE OF BUILDINGS.

Use of buildings.	Number of buildings.	Per cent of total number.	Cost of buildings.	Per cent of total cost.	Average cost per building.
RESIDENTIAL BUILDINGS.					
Housekeeping dwellings:					
One-family dwellings.....	132,665	38.4	\$526,317,604	33.3	\$3,967

Stables and barns.....	10,213	3.0	5,440,477	.3	533
Stores and warehouses.....	11,516	3.3	101,229,133	6.4	8,790
All other.....	5,366	1.6	12,872,101	.8	2,399
Total nonresidential.....	186,092	53.9	639,123,480	40.4	3,434
Grand total.....	345,085	100.0	1,582,125,138	100.0	4,585

It will be seen from the table that 46.1 per cent of the total number of buildings erected were residential buildings, and that 59.6 per cent of the total amount of money expended was spent for them.

Of the residential buildings by far the greater number were one-family houses—being 38.4 per cent of the total number of buildings and costing 33.3 per cent of the total cost of all buildings.

The greater number of nonresidential buildings were private garages, comprising 34.5 per cent of the total number of buildings and over 60 per cent of the nonresidential buildings.

It will be noticed that \$3,967 was the average cost for the construction of a one-family house. The average cost of a one-family house as shown by the 1920 figures was \$4,319. The average cost of a two-family house was \$6,700 in 1921 and \$7,441 in 1920. This lowering of average cost was due mainly to a drop in the price of building material.

A study of this table shows that the increased building in 1921 was mainly in the building of dwelling houses or domestic outbuildings; for while the figures show that only 46.1 per cent of the total amount of buildings erected were for residential purposes, if deduction is also

made of the private garages (34.5 per cent of the total buildings erected), of sheds (8 per cent), and of stables and barns (3 per cent), it will leave only 8.4 per cent for all other buildings. When it is considered that the average cost of private garages is only \$500, of sheds \$326, and of stables and barns \$553, it will be seen that while the number of these items is large, still they are of minor importance.

The preponderance of dwelling houses over business establishments is a swinging of the pendulum from the war-time construction period. During the war and for a short time after the building of dwelling houses was neglected. The overcrowding in cities and the resultant high rents created a serious condition all over the country. On the other hand, many large manufacturing concerns expanded; large factories and mills of all kinds were built. This further crowded the cities, as it drew large numbers of workmen to these centers without providing them with a place in which to live.

The events of the past year or so have shown that gradually the country is getting back to normal conditions, the table showing that comparatively few large factories or commercial buildings were built during 1921. On the other hand, numbers of people have left the cities, going back to the small towns and to the country, but the great need is still the building of dwelling houses. In most cities 1921 was a year of construction of this class of buildings, and from all indications the year 1922 will surpass 1921.

It is interesting to note that in spite of industrial depression the amount of money spent in 1921 for amusement buildings was considerably more than the combined amounts spent for churches and hospitals, and that the amount spent for amusement buildings and private garages combined was greater than that spent for either schools, office buildings, stores, or factories.

Table 3 shows the total number of families provided for in 1921 and the per cent of families provided for by each different kind of dwellings. There were 227,259 families provided for in the cities covered by this report. Assuming 5 persons to a family this shows homes were provided for 1,136,295 people. The population of these cities as shown by the 1920 census was 36,850,406. Since the normal rate of increase for cities of 25,000 or over in the United States is 2.7 per cent, the population of these cities has presumably increased 994,961. The building of dwellings during 1921, therefore, was somewhat above the increased population demand and a start was made in reducing the housing shortage.

TABLE 3.—BUILDING PERMITS ISSUED IN 1921, BY NUMBER OF FAMILIES TO BE HOUSED.

Kind of dwelling.	Number of buildings.	Number of families provided for.	Per cent of total families.
One-family dwellings.....	132,665	132,665	58.4
Two-family dwellings.....	17,117	34,234	15.1
One-family and two-family dwellings with stores combined.....	3,451	5,269	2.3
Multi-family apartments.....	4,930	52,173	23.0
Multi-family apartments with stores combined.....	572	2,918	1.3
Total.....	158,735	227,259	100.0

When it is considered that these data were collected from cities as small as 25,000 it may be somewhat startling to discover that almost one-fourth of the new family accommodations are in apartment houses. The trend toward apartment houses, which started in the larger cities, is spreading to the smaller ones. One of the reasons for this is that very few single dwellings were built to rent and therefore a family that could not afford to buy a home was almost compelled to live in an apartment. This, of course, is not the only explanation, for the construction of the more expensive apartments shows that many families prefer apartment dwellings to separate homes.

Table 4 shows the number and cost of each of the different kinds of buildings for 189 cities from which reports were obtained for both 1920 and 1921, and the percentage of increase or decrease in both number and cost in 1921 as compared with 1920.

TABLE 4.—BUILDING PERMITS ISSUED IN 189 IDENTICAL CITIES IN 1920 AND 1921, BY INTENDED USE OF BUILDINGS.

Use of buildings.	Buildings for which permits issued.				Per cent of increase (+) or decrease (-) in 1921 compared with 1920.

Public garages.....			2,402	24,856,416		
Private garages.....	91,892	94,021,610	106,454	55,340,797	+15.8	-41.1
Service stations.....	842	3,598,172	1,340	3,143,370	+59.1	-12.6
Institutions.....	91	20,702,369	140	17,242,370	+53.8	-16.7
Office buildings.....	1,087	132,170,885	1,358	110,021,790	+24.9	-16.8
Public buildings.....	188	16,325,420	134	15,285,389	-28.7	-6.4
Public works and utilities.....			204	12,569,250		
Schools and libraries.....	535	48,863,854	686	83,525,584	+28.2	+70.9
Sheds.....	11,531	4,090,561	26,040	8,618,567	+125.8	+110.7
Stables and barns.....	1,318	1,101,615	9,778	5,272,539	+641.9	+378.6
Stores and warehouses.....	6,639	143,120,638	9,997	94,605,645	+50.0	-33.9
All other.....	8,951	42,136,640	5,003	12,346,624	-44.1	-70.7
Total nonresidential.....	129,250	753,555,139	168,408	597,032,200	+30.3	-20.8
Grand total.....	205,284	1,194,264,804	310,773	1,466,485,609	+51.4	+22.8

It will be noted that there was a large increase in both number and cost of all classes of housekeeping dwellings in 1921; the increase in number ranging from 74.3 per cent for one-family dwellings to 283.6 per cent for one-family and two-family dwellings with stores combined, and in cost from 62.4 per cent for one-family dwellings to

249.2 per cent for one-family and two-family dwellings with stores combined. In every case except multi-family apartments with stores combined the percentage of increase in cost is less than the percentage of increase in number. This would tend to show that the cost of building construction had materially decreased since the previous year. The reason that the increase in the cost of multi-family apartments was practically the same as the increase in the number of such buildings, and that the increase in the cost of multi-family apartments with stores combined was greater than the increase in number, was that these apartments were built to house a larger number of families than those erected in 1920.

The number of hotels fell off 16 per cent, yet the amount expended in their construction increased 62.5 per cent, showing that, although fewer hotels were built in 1921 than in 1920 those that were erected were much larger. There was an increase of 87.2 per cent in the total number of residential buildings and an increase of 97.3 per cent in their aggregate cost.

Of the nonresidential buildings, amusement buildings, churches, private garages, service stations, institutions, office buildings, schools, sheds, stables, and stores show an increase in the number erected ranging from 15.8 per cent in the case of private garages to 641.9 for stables and barns. Factories, public buildings, and "all other" nonresidential buildings show a loss in the number constructed.

The total amount expended was higher for amusement buildings, churches, schools and libraries, sheds, and stables and barns, and less for factories, garages, service stations, institutions, office buildings, public buildings, stores, and "all other" nonresidential. The total number of nonresidential buildings increased 30.3 per cent, while their cost decreased 20.8 per cent.

EXPLANATION OF GENERAL TABLE.

General Table A, which shows detailed information concerning building operations for 189 cities for the year 1920 and 265 cities for 1921, is divided into three parts. Part 1 relates to new residential buildings, giving the number and cost of each kind of dwelling and the number of families provided for by each kind. The information regarding the number of families provided for was not obtained in a number of cases in 1920. In 1921, however, this information was secured from every city shown in the report.

Comparing the work done in each city for the two years it will be seen that in the vast majority of them many more dwelling houses were built in 1921 than in 1920. There are of course a few exceptions to this rule; some cities where there was an exceptional growth in the past few years due to abnormal war activities show a falling off in the number of dwelling houses erected. The factories and mills in such towns are now running on a normal peace-time basis or below it, and many of the workers drawn from the surrounding country districts have returned, so these cities are not so much in need of new homes as some of the others.

In comparing the figures shown in Part 2, the new nonresidential group; it will be noticed that in almost every city there was a notable falling off in the building of large factories and stores in 1921 from that of the previous year.

In 1920 both public and private garages were included under one heading; for 1921 these are reported separately.

"Public buildings" and "Public works and utilities," grouped in 1920, are shown separately for 1921.

Part 3 shows the number and cost of additions, alterations, and repairs, the grand total of all buildings, both new construction and repairs, for the years 1920 and 1921, and in addition installation permits for 1921.

For 1920 all additions, alterations, and repairs were reported together, while for 1921 they are divided under the headings of repairs for housekeeping dwellings, nonhousekeeping dwellings, and nonresidential buildings.

The number of permits issued for repairs in 1921 was much larger in most cities than in 1920, but the amount spent per building was less. This is accounted for partially by the fact that building material was somewhat cheaper and partially by the fact that many more minor alterations were made, while few large additions to factories were erected in 1921. In 1921, 229,896 additions, alterations, and repairs were made in the 265 cities at a cost of \$274,669,536. This covers both residential and nonresidential buildings inseparably combined in the reports from many cities.

The number of installation permits and their construction cost were obtained in 1921 wherever such permits were issued by the building inspector. In a number of cities no permits were required for installations of signs, tanks, etc.; in other cities these permits were issued by officers other than that of the building inspector. The number of installation permits reported were 50,777 and the aggregate cost \$17,938,064. In summing up the building operations for the year 1921 it can be said that the outstanding feature is the erection of much needed dwelling houses in larger numbers than for many years.

* Repairs not reported.

* See notes to details.

GENERAL TABLE.

SERIES OF BULLETINS PUBLISHED BY THE BUREAU OF LABOR STATISTICS

*The publication of the annual and special reports and of the bimonthly bulletins was discontinued in July, 1912, and since that time a bulletin has been published at irregular intervals. Each number contains matter devoted to one of a series of general subjects. These bulletins are numbered consecutively, beginning with No. 101, and up to No. 236 they also carry consecutive numbers under each series. Beginning with No. 237 the serial numbering has been discontinued. A list of the series is given below. Under each is grouped all the bulletins which contain material relating to the subject matter of that series. A list of the reports and bulletins of the Bureau issued prior to July 1, 1912, will be furnished on application. The bulletins marked thus * are out of print.*

Wholesale Prices.

- *Bul. 114. Wholesale prices, 1890 to 1912.
- Bul. 149. Wholesale prices, 1890 to 1913.
- *Bul. 173. Index numbers of wholesale prices in the United States and foreign countries.
- *Bul. 181. Wholesale prices, 1890 to 1914.
- *Bul. 200. Wholesale prices, 1890 to 1915.
- Bul. 226. Wholesale prices, 1890 to 1916.
- Bul. 269. Wholesale prices, 1890 to 1919.
- Bul. 284. Index numbers of wholesale prices in the United States and foreign countries. [Revision of Bulletin No. 173.]
- Bul. 296. Wholesale prices, 1890 to 1920.

Retail Prices and Cost of Living.

- *Bul. 105. Retail prices, 1890 to 1911: Part I.
Retail prices, 1890 to 1911: Part II—General tables.
- *Bul. 106. Retail prices, 1890 to June, 1912: Part I.
Retail prices, 1890 to June, 1912: Part II—General tables.
- Bul. 108. Retail prices, 1890 to August, 1912.
- Bul. 110. Retail prices, 1890 to October, 1912.
- Bul. 113. Retail prices, 1890 to December, 1912.
- Bul. 115. Retail prices, 1890 to February, 1913.
- *Bul. 121. Sugar prices, from refiner to consumer.
- Bul. 125. Retail prices, 1890 to April, 1913.
- *Bul. 130. Wheat and flour prices, from farmer to consumer.
- Bul. 132. Retail prices, 1890 to June, 1913.
- Bul. 136. Retail prices, 1890 to August, 1913.
- *Bul. 138. Retail prices, 1890 to October, 1913.
- *Bul. 140. Retail prices, 1890 to December, 1913.
- Bul. 156. Retail prices, 1907 to December, 1914.
- Bul. 164. Butter prices, from producer to consumer.
- Bul. 170. Foreign food prices as affected by the war.
- *Bul. 184. Retail prices, 1907 to June, 1915.
- Bul. 197. Retail prices, 1907 to December, 1915.
- Bul. 228. Retail prices, 1907 to December, 1916.
- Bul. 270. Retail prices, 1913 to 1919.
- Bul. 300. Retail prices, 1913 to 1920.
- Bul. 315. Retail prices, 1913 to 1921. [In press.]

Wages and Hours of Labor.

- Bul. 116. Hours, earnings, and duration of employment of wage-earning women in selected industries in the District of Columbia.
- *Bul. 118. Ten-hour maximum working day for women and young persons.
- Bul. 119. Working hours of women in the pea canneries of Wisconsin.
- *Bul. 128. Wages and hours of labor in the cotton, woolen, and silk industries, 1890 to 1912.
- *Bul. 129. Wages and hours of labor in the lumber, millwork, and furniture industries, 1890 to 1912.
- *Bul. 131. Union scale of wages and hours of labor, 1907 to 1912.
- *Bul. 134. Wages and hours of labor in the boot and shoe and hosiery and knit goods industries, 1890 to 1912.
- *Bul. 135. Wages and hours of labor in the cigar and clothing industries, 1911 and 1912.
- Bul. 137. Wages and hours of labor in the building and repairing of steam railroad cars, 1890 to 1912.
- Bul. 143. Union scale of wages and hours of labor, May 15, 1913.

Wages and Hours of Labor—Concluded.

- Bul. 146. Wages and regularity of employment and standardization of piece rates in the dress and waist industry of New York City.
- *Bul. 147. Wages and regularity of employment in the cloak, suit, and skirt industry.
- *Bul. 150. Wages and hours of labor in the cotton, woolen, and silk industries, 1907 to 1913.
- *Bul. 151. Wages and hours of labor in the iron and steel industry in the United States, 1907 to 1912.
- Bul. 153. Wages and hours of labor in the lumber, millwork, and furniture industries, 1907 to 1913.
- *Bul. 154. Wages and hours of labor in the boot and shoe and hosiery and underwear industries, 1907 to 1913.
- Bul. 160. Hours, earnings, and conditions of labor of women in Indiana mercantile establishments and garment factories.
- Bul. 161. Wages and hours of labor in the clothing and cigar industries, 1911 to 1913.
- Bul. 163. Wages and hours of labor in the building and repairing of steam railroad cars, 1907 to 1913.
- Bul. 168. Wages and hours of labor in the iron and steel industry, 1907 to 1918.
- Bul. 171. Union scale of wages and hours of labor, May 1, 1914.
- Bul. 177. Wages and hours of labor in the hosiery and underwear industry, 1907 to 1914.
- Bul. 178. Wages and hours of labor in the boot and shoe industry, 1907 to 1914.
- *Bul. 187. Wages and hours of labor in the men's clothing industry, 1911 to 1914.
- *Bul. 190. Wages and hours of labor in the cotton, woolen, and silk industries, 1907 to 1914.
- *Bul. 194. Union scale of wages and hours of labor, May 1, 1915.
- Bul. 204. Street railway employment in the United States.
- Bul. 214. Union scale of wages and hours of labor, May 15, 1916.
- Bul. 218. Wages and hours of labor in the iron and steel industry, 1907 to 1915.
- Bul. 221. Hours, fatigue, and health in British munition factories.
- Bul. 225. Wages and hours of labor in the lumber, millwork, and furniture industries, 1915.
- Bul. 232. Wages and hours of labor in the boot and shoe industry, 1907 to 1916.
- Bul. 238. Wages and hours of labor in woolen and worsted goods manufacturing, 1916.
- Bul. 239. Wages and hours of labor in cotton goods manufacturing and finishing, 1916.
- Bul. 245. Union scale of wages and hours of labor, May 15, 1917.
- *Bul. 252. Wages and hours of labor in the slaughtering and meat-packing industry, 1917.
- Bul. 259. Union scale of wages and hours of labor, May 15, 1918.
- Bul. 260. Wages and hours of labor in the boot and shoe industry, 1907 to 1918.
- Bul. 261. Wages and hours of labor in woolen and worsted goods manufacturing, 1918.
- Bul. 262. Wages and hours of labor in cotton goods manufacturing and finishing, 1918.
- Bul. 265. Industrial survey in selected industries in the United States, 1919. Preliminary report.
- Bul. 274. Union scale of wages and hours of labor, May 15, 1919.
- Bul. 278. Wages and hours of labor in the boot and shoe industry, 1907 to 1920.
- Bul. 279. Hours and earnings in anthracite and bituminous coal mining.
- Bul. 286. Union scale of wages and hours of labor, May 15, 1920.
- Bul. 288. Wages and hours of labor in cotton goods manufacturing, 1920.
- Bul. 289. Wages and hours of labor in woolen and worsted goods manufacturing, 1920.
- Bul. 294. Wages and hours of labor in the slaughtering and meat-packing industry in 1921.
- Bul. 297. Wages and hours of labor in the petroleum industry.
- Bul. 302. Union scale of wages and hours of labor, May 15, 1921.
- Bul. 305. Wages and hours of labor in the iron and steel industry, 1907 to 1920.
- Bul. 316. Hours and earnings in anthracite and bituminous coal mining.
- Bul. 317. Wages and hours of labor in lumber manufacturing, 1921. [In press.]

Employment and Unemployment.

- *Bul. 109. Statistics of unemployment and the work of employment offices.
- Bul. 116. Hours, earnings, and duration of employment of wage-earning women in selected industries in the District of Columbia.
- Bul. 172. Unemployment in New York City, N. Y.
- *Bul. 182. Unemployment among women in department and other retail stores of Boston, Mass.
- *Bul. 183. Regularity of employment in the women's ready-to-wear garment industries.
- Bul. 192. Proceedings of the American Association of Public Employment Offices.
- *Bul. 195. Unemployment in the United States.
- Bul. 196. Proceedings of the Employment Managers' Conference held at Minneapolis, January, 1916.
- Bul. 202. Proceedings of the conference of the Employment Managers' Association of Boston, Mass., held May 10, 1916.
- Bul. 206. The British system of labor exchanges.
- Bul. 220. Proceedings of the Fourth Annual Meeting of the American Association of Public Employment Offices, Buffalo, N. Y., July 20 and 21, 1916.
- Bul. 223. Employment of women and juveniles in Great Britain during the war.
- *Bul. 227. Proceedings of the Employment Managers' Conference, Philadelphia, Pa., April 2 and 3, 1917.
- Bul. 235. Employment system of the Lake Carriers' Association.
- Bul. 241. Public employment offices in the United States.

Employment and Unemployment—Concluded.

- Bul. 247. Proceedings of Employment Managers' Conference, Rochester, N. Y., May 9-11, 1918.
- Bul. 310. Industrial unemployment: A statistical study of its extent and causes.
- Bul. 311. Proceedings of the Ninth Annual Meeting of the International Association of Public Employment Services.

Women in Industry.

- Bul. 116. Hours, earnings, and duration of employment of wage-earning women in selected industries in the District of Columbia.
- *Bul. 117. Prohibition of night work of young persons.
- *Bul. 118. Ten-hour maximum working-day for women and young persons.
- Bul. 119. Working hours of women in the pea canneries of Wisconsin.
- *Bul. 122. Employment of women in power laundries in Milwaukee.
- Bul. 160. Hours, earnings, and conditions of labor of women in Indiana mercantile establishments and garment factories.
- *Bul. 167. Minimum-wage legislation in the United States and foreign countries.
- *Bul. 175. Summary of the report on condition of woman and child wage earners in the United States.
- *Bul. 176. Effect of minimum wage determinations in Oregon.
- *Bul. 180. The boot and shoe industry in Massachusetts as a vocation for women.
- Bul. 182. Unemployment among women in department and other retail stores of Boston, Mass.
- Bul. 193. Dressmaking as a trade for women in Massachusetts.
- Bul. 215. Industrial experience of trade-school girls in Massachusetts.
- *Bul. 217. Effect of workmen's compensation laws in diminishing the necessity of industrial employment of women and children.
- Bul. 223. Employment of women and juveniles in Great Britain during the war.
- Bul. 253. Women in the lead industry.

Workmen's Insurance and Compensation (including laws relating thereto).

- *Bul. 101. Care of tuberculous wage earners in Germany.
- *Bul. 102. British National Insurance Act, 1911.
- Bul. 103. Sickness and accident insurance law of Switzerland.
- Bul. 107. Law relating to insurance of salaried employees in Germany.
- *Bul. 126. Workmen's compensation laws of the United States and foreign countries.
- *Bul. 155. Compensation for accidents to employees of the United States.
- *Bul. 185. Compensation legislation of 1914 and 1915.
- Bul. 203. Workmen's compensation laws of the United States and foreign countries.
- Bul. 210. Proceedings of the Third Annual Meeting of the International Association of Industrial Accident Boards and Commissions.
- Bul. 212. Proceedings of the conference on social insurance called by the International Association of Industrial Accident Boards and Commissions.
- *Bul. 217. Effect of workmen's compensation laws in diminishing the necessity of industrial employment of women and children.
- Bul. 240. Comparison of workmen's compensation laws of the United States.
- Bul. 243. Workmen's compensation legislation in the United States and foreign countries.
- Bul. 248. Proceedings of the Fourth Annual Meeting of the International Association of Industrial Accident Boards and Commissions.
- Bul. 264. Proceedings of the Fifth Annual Meeting of the International Association of Industrial Accident Boards and Commissions.
- Bul. 272. Workmen's compensation legislation of the United States and Canada, 1919.
- *Bul. 273. Proceedings of the Sixth Annual Meeting of the International Association of Industrial Accident Boards and Commissions.
- Bul. 275. Comparison of workmen's compensation laws of the United States and Canada.
- Bul. 281. Proceedings of the Seventh Annual Meeting of the International Association of Industrial Accident Boards and Commissions.
- Bul. 301. Comparison of workmen's compensation insurance and administration.
- Bul. 304. Proceedings of the Eighth Annual Meeting of the International Association of Industrial Accident Boards and Commissions.
- Bul. 312. National Health Insurance in Great Britain, 1911 to 1920. [In press.]

Industrial Accidents and Hygiene.

- *Bul. 104. Lead poisoning in potteries, tile works, and porcelain enameled sanitary ware factories.
- Bul. 120. Hygiene of the painters' trade.
- *Bul. 127. Dangers to workers from dust and fumes, and methods of protection.
- Bul. 141. Lead poisoning in the smelting and refining of lead.
- *Bul. 157. Industrial accident statistics.
- Bul. 165. Lead poisoning in the manufacture of storage batteries.
- *Bul. 179. Industrial poisons used in the rubber industry.
- Bul. 188. Report of British departmental committee on the danger in the use of lead in the painting of buildings.

Industrial Accidents and Hygiene—Concluded.

- *Bul. 201. Report of committee on statistics and compensation insurance cost of the International Association of Industrial Accident Boards and Commissions. [Limited edition.]
- Bul. 205. Anthrax as an occupational disease.
- Bul. 207. Causes of death by occupation.
- Bul. 209. Hygiene of the printing trades.
- *Bul. 216. Accidents and accident prevention in machine building.
- Bul. 219. Industrial poisons used or produced in the manufacture of explosives.
- Bul. 221. Hours, fatigue, and health in British munition factories.
- Bul. 230. Industrial efficiency and fatigue in British munition factories.
- Bul. 231. Mortality from respiratory diseases in dusty trades.
- *Bul. 234. Safety movement in the iron and steel industry, 1907 to 1917.
- Bul. 236. Effect of the air hammer on the hands of stonemasons.
- Bul. 251. Preventable death in the cotton manufacturing industry.
- Bul. 253. Women in the lead industries.
- Bul. 256. Accidents and accident prevention in machine building. Revision of Bul. 216.
- Bul. 267. Anthrax as an occupational disease. [Revised.]
- Bul. 276. Standardization of industrial accident statistics.
- Bul. 280. Industrial poisoning in making coal-tar dyes and dye intermediates.
- Bul. 291. Carbon monoxide poisoning.
- Bul. 293. The problem of dust phthisis in the granite-stone industry.
- Bul. 298. Causes and prevention of accidents in the iron and steel industry, 1910 to 1919.
- Bul. 306. Occupation hazards and diagnostic signs: A guide to impairments to be looked for in hazardous occupations.

Conciliation and Arbitration (including strikes and lockouts).

- *Bul. 124. Conciliation and arbitration in the building trades of Greater New York.
- *Bul. 133. Report of the industrial council of the British Board of Trade on its inquiry into industrial agreements.
- Bul. 139. Michigan copper district strike.
