WASHINGTON

OCTOBER, 1923

BUILDING PERMITS IN THE PRINCIPAL CITIES OF THE UNITED STATES IN 1922.¹

INTRODUCTION.

In collecting the data here compiled concerning building permits issued in 1922, the Bureau of Labor Statistics sent a questionnaire to each of the 288 cities in the United States having a population of 25,000 or over. The majority of these reports were filled in and mailed by the building inspectors of the different cities, but because inspectors of some cities did not reply quite a number of reports had to be obtained by personal visits of agents of the bureau. Complete reports were finally received from 272 cities. The data were drawn either directly from the original applications for permits on file in the local building inspector's office or from record books kept by him.

From the remaining 16 cities having a population of 25,000 or over either no statement was obtained or a statement so fragmentary as to be of no use in compiling this report. In the main the reason for not obtaining data from these cities was that they either had no building code or had one that did not require full reports as to the number and cost of the different kinds of buildings specified by the questionnaire sent out by the bureau.

Table 1 shows the total number and estimated cost of each of the different kinds of new buildings covered by permits issued in the 272 cities from which reports were received, the per cent that each kind is of the total number, and the per cent that the cost of each kind is of the total cost, together with the average cost per building.

Also the table shows that 51.6 per cent of the total number of buildings for which building permits were issued were residential buildings and that 64.6 per cent of the total estimated cost of all new buildings was for residence construction.

Of the 235,991 residential buildings projected 183,538, or 40.2 per cent of the total number of buildings, were one-family houses, and the sum of \$772,359,368, or 30.7 per cent of the total estimated cost of all new buildings, was to be spent in their construction.

The average estimated cost per one-family house was \$4,208. In Bulletin No. 318 of the Bureau of Labor Statistics it is shown that the average estimated cost of a one-family house in 1921 was \$3,967 and in 1920 was \$4,319. This change in the average cost is probably due largely to fluctuation in the cost of building material. It must be borne in mind that the costs of buildings as stated in these tables are "estimated costs," the estimate being made by the builder when applying for his permit. Sometimes a change is made in the plans

¹ Preceding reports on this subject appear in Bul. Nos. 295 and 318, and in the Monthly Labor Review for June, 1921, April and October, 1922, and July, 1923.

which necessitates a change in the cost of the buildings; again, the cost may be understated, in some cities because the fees for permits are based on the stated cost of the building, and in others because the assessor looks over the records of the building inspector, some people hoping thus to keep the assessed value of the building low.

TABLE 1.—BUILDING PERMITS ISSUED IN 272 CITIES IN 1922, BY KIND OF BUILDING.

Kind of building.	Buildings for which permits were issued.		Cost of buildings.		Average cost per building.

¹ Less than one-tenth of 1 per cent.

Among nonresidential buildings the greatest number erected were private garages. They comprised 35.3 per cent of the total number of new buildings, but their cost was only 3 per cent of the total cost. Private garages are almost always built on the same lot as a dwelling house and have come to be considered almost as much a necessity as a kitchen. In the nonresidential group the largest amount of money spent was for stores and warehouses, 6.8 per cent of the whole cost being spent for this class of buildings.

In spite of the fact that the present has been denounced as a "jazz age," it will be noticed that in 1922, in cities having a population of 25,000 or over, there were built more churches than amusement buildings. Under the head of amusement buildings are listed theaters, motion-picture theaters, bathing beaches, grand stands, lodge rooms, etc. But while there were more churches than amusement buildings built, over \$10,000,000 more was spent for the construction of amusement buildings than for churches.

A careful study of this table shows that while only 51.6 per cent of the new buildings erected in 1922 were residential, this is of greater relative importance than the figure seems to indicate. For it will be seen that 35.3 per cent of the total number of new buildings were private garages and 5.5 per cent were sheds, and that while these two classes of buildings thus make up the vast majority of the nonresidential buildings erected, since their average cost was only \$464 and \$300, respectively, they were comparatively of minor importance. Therefore, although nonresidential buildings comprised 48.4 per cent of the total number of all new buildings, if the private garages and sheds are deducted, all other classes of nonresidential buildings combined account for only 7.6 per cent of the total number of new buildings.

This preponderance of dwelling houses over large nonresidential buildings shows that even more effort was being made to alleviate the shortage of dwelling houses during 1922 than during 1921.

Table 2 shows in comparison the number and per cent of families provided for in each of the different kinds of dwellings in the 262 cities from which reports were received for both 1921 and 1922.

TABLE 2.—NUMBER AND PER CENT OF FAMILIES TO BE HOUSED IN DWELLINGS FOR WHICH PERMITS WERE ISSUED IN 262 IDENTICAL CITIES IN 1921 AND 1922, BY KIND OF DWELLING.

Kind of dwelling.	Number of buildings for which permits were issued.		Families provided for.			
	1921	1922	Number.		Per cent.	
			1921	1922	1921	1922
One-family dwellings.....	132,121	181,128	132,121	181,128	58.3	47.7
Two-family dwellings.....	17,117	36,239	34,234	72,478	15.1	19.1
One-family and two-family dwellings with stores combined.....	3,449	4,993	5,267	7,820	2.3	2.1
Multi-family apartments.....	4,924	9,592	52,139	110,789	23.0	29.2
Multi-family apartments with stores combined.....	571	1,079	2,898	7,133	1.3	1.9
Total.....	158,182	233,031	226,659	379,348	100.0	100.0

The above table shows the tremendous increase in the number of families provided with new homes in 262 identical cities in 1922 as compared with 1921. Permits were issued in 1922 to provide for over 150,000 more families than were cared for by the buildings erected in 1921. Nearly 50,000 more families were to be housed in one-family dwellings built in 1922 than in 1921. The number of families to be accommodated in apartment houses was more than double that of 1921.

One of the most interesting facts brought out by this table is the increase in the number of families to be housed in multi-family apartment houses. In 1921, 55,037, or 24.3 per cent of the new family accommodations were in the two classes of apartment houses, while in 1922 the number had increased to 117,922 families, or 31.1 per cent of the total. There was also a marked gain in the number of families to be domiciled in two-family houses in 1922 as compared with the previous year, in 1922 72,478 families, composing 19.1 per cent of the total number of families provided for, being provided for in this class of dwellings as compared with 34,234, or 15.1 per cent, in 1921.

On the other hand, the percentage of the total number of families housed in one-family dwellings had fallen from 58.3 in 1921 to 47.7 in 1922 although the actual number increased by nearly 50,000.

This increase in the percentage of families in two-family and apartment houses is in a large measure accounted for by the fact that a very small percentage of the new one-family dwellings erected were built to rent, and therefore a family which could not afford to build was almost compelled to live in an apartment or a two-family house. The two-family house is gaining quite a foothold in cities which previously have had few, if any, of this class of dwelling. It is more economical in construction, and it is a common practice for the owner to rent one part to help him pay for the building. Many of these houses are so constructed that with very little expense they can be converted into one-family dwellings, the owner's intention often being to do this as soon as his home is paid for.

Table 3 shows the number and cost of each of the different kinds of buildings, for the 262 cities from which reports were received in both 1921 and 1922, and the percentage of increase or decrease in the number and in the cost in 1922 as compared with 1921:

TABLE 3.—NUMBER AND COST OF BUILDINGS FOR WHICH PERMITS WERE ISSUED IN 262 IDENTICAL CITIES IN 1921 AND 1922, BY KIND OF BUILDING.

Kind of building.	Buildings for which permits were issued in—				Per cent of increase (+) or decrease (—) in 1922 as compared with 1921.	
	1921		1922		Number of buildings.	Cost of buildings.
	Number.	Cost.	Number.	Cost.

Lodging houses.....	27	476,559	70	1,452,497	+159.3	+204.8
All other.....	132	7,638,505	147	24,199,869	+11.4	+216.8
Total.....	158,439	941,136,262	232,402	1,618,670,244	+47.3	+72.0
NONRESIDENTIAL BUILDINGS.						
Amusement buildings.....	777	62,511,117	807	52,672,270	+3.9	-15.7
Churches.....	918	29,291,444	1,043	42,699,670	+13.6	+45.8
Factories and workshops.....	3,754	73,517,959	4,835	108,731,201	+28.8	+47.9
Public garages.....	2,677	26,913,361	3,502	31,702,406	+30.8	+17.8
Private garages.....	118,854	59,472,234	159,029	73,016,607	+33.8	+22.8
Service stations.....	1,595	3,773,125	2,114	6,659,379	+32.5	+76.5
Institutions.....	161	19,132,734	269	34,667,796	+67.1	+81.2
Office buildings.....	1,492	114,111,049	1,499	154,165,785	+ .5	+35.1
Public buildings.....	157	16,461,532	209	19,953,081	+33.1	+21.2
Public works and utilities.....	241	14,591,976	339	23,952,892	+40.7	+64.2
Schools and libraries.....	780	90,239,217	943	146,266,604	+20.9	+62.1
Sheds.....	27,397	8,938,243	24,389	7,420,401	-11.0	-17.0
Stables and barns.....	10,207	5,431,047	1,383	1,550,795	-86.5	-71.5
Stores.....	11,477	101,098,276	15,230	169,853,232	+32.7	+68.0
All other.....	5,366	12,872,101	1,659	7,760,141	-69.1	-39.7
Total.....	185,853	638,355,415	217,250	881,072,273	+16.9	+38.0
Grand total.....	344,292	1,579,491,677	450,652	2,499,742,517	+30.9	+58.3

It will be seen that there was a large increase in both number and cost of all classes of residential buildings in 1922; the increase in number ranging from 11.4 per cent in the case of "all other" residential to 159.3 per cent for lodging houses, and the increase in cost from 40 per cent for one-family and two-family dwellings with stores combined to 216.8 per cent for "all other" residential.

In all cases, except two-family houses and one-family and two-family houses with stores combined, the increase in cost was greater than the increase in number. This would tend to show that construction costs had materially advanced since 1921. It will be seen that the number of one-family houses increased only 37.1 per cent while the number of two-family houses and apartment houses advanced 111.7 per cent and 94.8 per cent, respectively. There was an increase of 47.3 per cent in the total number of residential buildings in 1922 as compared with 1921, and an increase of 72 per cent in their cost.

The number of all the major classes of nonresidential building showed an increase (sheds, stables, and barns and "all other" non-residential being of small importance). The increases ranged from five-tenths of 1 per cent for office buildings to 67.1 per cent for institutions (hospitals, homes, etc.). The money expended in the construction of these major classes of nonresidential buildings, with one exception, also showed an increase. The exception was that of amusement buildings, which showed a decrease of 15.7 per cent. From this it would seem that a small type of theater and motion-picture theater was becoming more popular, which probably is especially true of the motion-picture house.

The total number of nonresidential buildings increased 16.9 per cent and the total cost 38 per cent. There was an increase of 30.9 per cent in the total number of all buildings (both residential and non-residential) and 58.3 per cent in the total cost.

EXPLANATION OF GENERAL TABLE.

General Table A shows detailed information concerning building operations for 187 cities for the year 1920, 262 for the year 1921, and 272 for 1922. This table is divided into three parts. Part 1 relates to new residential buildings, giving the number and cost of each kind of dwelling, the number of families provided for, and the ratio of families provided for to each 10,000 of population. The number of families provided for was not obtained in a number of cases in 1920. However, for 1921 and 1922 this information was secured from every city shown on the report.

The table shows complete reports from 162 cities in 1920. These cities had a population of 27,914,946 and homes were provided in the new buildings for 81,124 families, which is at the rate of 29.1 families per 10,000 of population. In 1921 schedules were received from 262 cities and the number of families provided for by the new buildings was 226,659. The population of these cities shown by the census of 1920 was 36,784,807. The ratio of families provided for was therefore 61.6 per 10,000 of population. The returns for 1922 are complete for 272 cities, having a population of 37,252,627 and providing for 382,272 families, a ratio of 102.6 per 10,000 of population.

It will be noticed that there is great unevenness in the distribution per 10,000 by cities and even by general sections of the country; for instance, such wide variations as the following occurred in 1922:

Butte, Mont.....	4.6	East Cleveland, Ohio.....	313.3
Hoboken, N. J.....	4.0	Lakewood, Ohio.....	417.7
Joplin, Mo.....	4.7	Long Beach, Calif.....	1,270.1
Newport, Ky.....	3.1	Los Angeles, Calif.....	486.1

The older cities seem to lag behind the newer communities; for example, Boston showed a ratio of 3.9 families to each 10,000 of population in 1920; this increased to 11.7 in 1921 and to 45.9 in 1922. On the other hand, in Los Angeles the ratio was 190.5 in 1920, 339.4 in 1921, and 486.1 in 1922. This difference is partly explained by the fact that Boston has used up most of the available building space in the city limits and has no way to expand in territory, as it is almost entirely surrounded by smaller cities and towns, each having its own municipal government.

New York City shows a remarkable increase in the ratio of building to population, advancing from 22.3 per 10,000 in 1920 to 91.4 in 1921 and 162.2 in 1922. A total of 12,521 families were provided for in 1920, as compared with 51,360 in 1921 and 91,164 in 1922. In the other two cities in the country with a population of over one million there was a material advance, Chicago increasing its ratio from 11.1 in 1920 to 45.3 in 1921 and 89.7 in 1922, while the ratio in Philadelphia increased from 13.2 in 1921 to 57.3 in 1922.

On the other hand, the ratio is decreasing in a few places. In Muskegon, Mich., for instance, the ratio was 88.6 in 1920; in 1921 it had dropped to 35.3 and in 1922 to 31.4. Birmingham, Ala., showed a slight decrease, dropping from 92.8 in 1921 to 81.5 in 1922. Johnstown, Pa., Newport News, Va., and Charleston, W. Va., are among the few other places which show a decrease for 1922 as compared with 1921.

Part 2 of Table A gives the number and cost of new nonresidential buildings. In 1920 public and private garages were included under one heading; in 1921 and 1922 they are shown separately. Public buildings and public works and utilities, grouped in 1920, are shown separately for 1921 and 1922.

Part 3 shows the number and cost of additions, alterations, and repairs to old buildings and the grand total of all buildings, both new and old, for all three years. It also shows the number of installation permits for 1921 and 1922.

For 1920 all additions, alterations, and repairs were grouped, while in 1921 and 1922 an attempt was made to classify them under the headings of repairs, etc., for housekeeping dwellings, nonhousekeeping dwellings, and nonresidential buildings. Many of the cities which reported by mail, however, grouped them. In 1920 permits were issued for 187,360 additions, alterations, and repairs in 187 cities, and \$281,465,884 was expended. In 1921 in the 262 cities reporting for that year 229,606 such permits were issued for \$274,495,105, while the 272 cities reporting in 1922 show 251,271 permits and \$287,942,953 as the amount expended.

The number of installation permits and their construction cost was obtained in 1921 and 1922 whenever issued by the building inspector. In a number of cities no permits were required for signs, tanks, etc.;

in other cities these permits were issued by offices other than that of the building inspector.

The last two columns in part 3 show the number of families provided for by alterations to old buildings. Very few of the cities, it will be noticed, give any report on this subject. Undoubtedly quite a number of additional family accommodations are provided for in this manner. Agents found in some towns one-family houses had been altered so as to provide for from two to five families, and that garages and barns with a little alteration had been made habitable for one or more families.

In 1922 the 272 cities covered in this report issued a grand total of 769,984 building permits and \$2,830,110,876 was the estimated cost of construction. As far as any records are available this is the largest amount ever expended in a single year.

Previous to the year 1920 the Geological Survey of the United States Department of the Interior collected and published data concerning the number and cost of buildings. The figures shown below are the total amounts of money spent in 130 identical cities from which information was obtained during the years 1914 to 1922, inclusive. From 1914 to 1919, inclusive, the figures are taken from the publications of the Geological Survey; for 1920, 1921, and 1922, from the records of the Bureau of Labor Statistics:

1914.....	\$748,209,763	1919.....	\$1,258,875,108
1915.....	776,228,606	1920.....	1,342,630,686
1916.....	980,323,685	1921.....	1,602,232,041
1917.....	649,961,875	1922.....	2,427,734,079
1918.....	401,565,104		

The figures giving the cost of buildings, as shown by building permits, can not be interpreted to indicate the relative physical amount of building construction, because the costs of both materials and labor used in such construction have varied from year to year.

The following table shows the index number of the wholesale prices of building materials and the index number of the changes in the union scale of wages in the building trades as a whole from 1913 to 1921, inclusive, as compiled by the Bureau of Labor Statistics:

TABLE 4.—INDEX NUMBERS OF WHOLESALE PRICES OF BUILDING MATERIALS AND UNION SCALE OF WAGES IN BUILDING TRADES.

Year.	Index numbers.	
	Wholesale prices.	Union wages.
1913.....	100	100
1914.....	92	102
1915.....	94	103
1916.....	120	106
1917.....	157	113
1918.....	172	126
1919.....	201	145
1920.....	264	197
1921.....	165	200
1922.....	168	187

TABLE A.—NUMBER AND PROPOSED COST OF BUILDINGS (NEW CONSTRUCTION, AND REPAIRS, ALTERATIONS, AND ADDITIONS TO OLD BUILDINGS) COVERED BY PERMITS ISSUED IN 1920, 1921, AND 1922, BY INTENDED USE OF BUILDINGS.

SERIES OF BULLETINS PUBLISHED BY THE BUREAU OF LABOR STATISTICS.

*[The publication of the annual and special reports and of the bimonthly bulletin was discontinued in July, 1912, and since that time a bulletin has been published at irregular intervals. Each number contains matter devoted to one of a series of general subjects. These bulletins are numbered consecutively, beginning with No. 101, and up to No. 236 they also carry consecutive numbers under each series. Beginning with No. 237 the serial numbering has been discontinued. A list of the series is given below. Under each is grouped all the bulletins which contain material relating to the subject matter of that series. A list of the reports and bulletins of the Bureau issued prior to July 1, 1912, will be furnished on application. The bulletins marked thus * are out of print.]*

Wholesale Prices.

- *Bul. 114. Wholesale prices, 1890 to 1912.
- Bul. 149. Wholesale prices, 1890 to 1913.
- *Bul. 173. Index numbers of wholesale prices in the United States and foreign countries.
- *Bul. 181. Wholesale prices, 1890 to 1914.
- *Bul. 200. Wholesale prices, 1890 to 1915.
- Bul. 226. Wholesale prices, 1890 to 1916.
- Bul. 269. Wholesale prices, 1890 to 1919.
- Bul. 284. Index numbers of wholesale prices in the United States and foreign countries. [Revision of Bulletin No. 173.]
- Bul. 296. Wholesale prices, 1890 to 1920.
- Bul. 320. Wholesale prices, 1890 to 1921.
- Bul. 335. Wholesale prices, 1890 to December, 1922.

Retail Prices and Cost of Living.

- *Bul. 105. Retail prices, 1890 to 1911: Part I.
Retail prices, 1890 to 1911: Part II—General tables.
- *Bul. 106. Retail prices, 1890 to June, 1912: Part I.
Retail prices, 1890 to June, 1912: Part II—General tables.
- Bul. 108. Retail prices, 1890 to August, 1912.
- Bul. 110. Retail prices, 1890 to October, 1912.
- *Bul. 113. Retail prices, 1890 to December, 1912.
- Bul. 115. Retail prices, 1890 to February, 1913.
- *Bul. 121. Sugar prices, from refiner to consumer.
- Bul. 125. Retail prices, 1890 to April, 1913.
- *Bul. 130. Wheat and flour prices, from farmer to consumer.
- Bul. 132. Retail prices, 1890 to June, 1913.
- Bul. 136. Retail prices, 1890 to August, 1913.
- *Bul. 138. Retail prices, 1890 to October, 1913.
- *Bul. 140. Retail prices, 1890 to December, 1913.
- Bul. 156. Retail prices, 1907 to December, 1914.
- Bul. 164. Butter prices, from producer to consumer.
- Bul. 170. Foreign food prices as affected by the war.
- Bul. 184. Retail prices, 1907 to June, 1915.
- Bul. 197. Retail prices, 1907 to December, 1915.
- Bul. 228. Retail prices, 1907 to December, 1916.
- Bul. 270. Retail prices, 1913 to 1919.
- Bul. 300. Retail prices, 1913 to 1920.
- Bul. 315. Retail prices, 1913 to 1921.
- Bul. 334. Retail prices, 1913 to 1922.

Wages and Hours of Labor.

- Bul. 116. Hours, earnings, and duration of employment of wage-earning women in selected industries in the District of Columbia.
- *Bul. 118. Ten-hour maximum working-day for women and young persons.
- Bul. 119. Working hours of women in the pea canneries of Wisconsin.
- *Bul. 128. Wages and hours of labor in the cotton, woolen, and silk industries, 1890 to 1912.
- *Bul. 129. Wages and hours of labor in the lumber, millwork, and furniture industries, 1890 to 1912.
- *Bul. 131. Union scale of wages and hours of labor, 1907 to 1912.
- *Bul. 134. Wages and hours of labor in the boot and shoe and hosiery and knit goods industries, 1890 to 1912.
- *Bul. 135. Wages and hours of labor in the cigar and clothing industries, 1911 and 1912.
- Bul. 137. Wages and hours of labor in the building and repairing of steam railroad cars, 1890 to 1912.
- Bul. 143. Union scale of wages and hours of labor, May 15, 1913.

Wages and Hours of Labor—Concluded.

- Bul. 146. Wages and regularity of employment and standardization of piece rates in the dress and waist industry of New York City.
- *Bul. 147. Wages and regularity of employment in the cloak, suit, and skirt industry.
- *Bul. 150. Wages and hours of labor in the cotton, woolen, and silk industries, 1907 to 1913.
- *Bul. 151. Wages and hours of labor in the iron and steel industry in the United States, 1907 to 1912.
- Bul. 153. Wages and hours of labor in the lumber, millwork, and furniture industries, 1907 to 1913.
- *Bul. 154. Wages and hours of labor in the boot and shoe and hosiery and underwear industries, 1907 to 1913.
- Bul. 160. Hours, earnings, and conditions of labor of women in Indiana mercantile establishments and garment factories.
- Bul. 161. Wages and hours of labor in the clothing and cigar industries, 1911 to 1913.
- Bul. 163. Wages and hours of labor in the building and repairing of steam railroad cars, 1907 to 1913.
- Bul. 168. Wages and hours of labor in the iron and steel industry, 1907 to 1918.
- *Bul. 171. Union scale of wages and hours of labor, May 1, 1914.
- Bul. 177. Wages and hours of labor in the hosiery and underwear industry, 1907 to 1914.
- Bul. 178. Wages and hours of labor in the boot and shoe industry, 1907 to 1914.
- Bul. 187. Wages and hours of labor in the men's clothing industry, 1911 to 1914.
- *Bul. 190. Wages and hours of labor in the cotton, woolen, and silk industries, 1907 to 1914.
- *Bul. 194. Union scale of wages and hours of labor, May 1, 1915.
- Bul. 204. Street railway employment in the United States.
- Bul. 214. Union scale of wages and hours of labor, May 15, 1916.
- Bul. 218. Wages and hours of labor in the iron and steel industry, 1907 to 1915.
- Bul. 221. Hours, fatigue, and health in British munition factories.
- Bul. 225. Wages and hours of labor in the lumber, millwork, and furniture industries, 1915.
- Bul. 232. Wages and hours of labor in the boot and shoe industry, 1907 to 1916.
- Bul. 238. Wages and hours of labor in woolen and worsted goods manufacturing, 1916.
- Bul. 239. Wages and hours of labor in cotton goods manufacturing and finishing, 1916.
- Bul. 245. Union scale of wages and hours of labor, May 15, 1917.
- Bul. 252. Wages and hours of labor in the slaughtering and meat-packing industry, 1917.
- Bul. 259. Union scale of wages and hours of labor, May 15, 1918.
- Bul. 260. Wages and hours of labor in the boot and shoe industry, 1907 to 1918.
- Bul. 261. Wages and hours of labor in woolen and worsted goods manufacturing, 1918.
- Bul. 262. Wages and hours of labor in cotton goods manufacturing and finishing, 1918.
- Bul. 265. Industrial survey in selected industries in the United States, 1919. Preliminary report.
- Bul. 274. Union scale of wages and hours of labor, May 15, 1919.
- Bul. 278. Wages and hours of labor in the boot and shoe industry, 1907 to 1920.
- Bul. 279. Hours and earnings in anthracite and bituminous coal mining.
- Bul. 286. Union scale of wages and hours of labor, May 15, 1920.
- Bul. 288. Wages and hours of labor in cotton goods manufacturing, 1920.
- Bul. 289. Wages and hours of labor in woolen and worsted goods manufacturing, 1920.
- Bul. 294. Wages and hours of labor in the slaughtering and meat-packing industry in 1921.
- Bul. 297. Wages and hours of labor in the petroleum industry.
- Bul. 302. Union scale of wages and hours of labor, May 15, 1921.
- Bul. 305. Wages and hours of labor in the iron and steel industry, 1907 to 1920.
- Bul. 316. Hours and earnings in anthracite and bituminous coal mining—anthracite, January, 1922; bituminous, winter of 1921-22.
- Bul. 317. Wages and hours of labor in lumber manufacturing, 1921.
