UNION SCALE OF WAGES AND HOURS OF LABOR, MAY 15, 1926

SUMMARY

The Bureau of Labor Statistics presents in this report the union wage scales as of May 15, 1926, for 824,313 members of organized trades as found in 66 important industrial cities. Seventy-eight trades and subdivisions of trades have been included. Most agreements for the year are settled before May 15.

The average rates for the several trades and groups of trades in 1926 in comparison with the rates in 1925 appear in Table 1, page 3. The hourly rate of wages for all trades herein shown taken collectively, exclusive of the street railway occupations, shows an advance from \$1.091 per hour in 1925 to \$1.148 per hour in 1926, an increase of 5.2 per cent. Following is a list of trade groups for which data are shown in this report and the per cent of change in hourly wages as compared with 1925:

Trade groups showing increase in hourly wages in 1926 over 1925

	Per cent of increase
Building trades.....	6.6
Chauffeurs and teamsters and drivers.....	1.1
Granite and stone cutters.....	11.5
Linemen.....	6.2
Longshoremen.....	.8
Printing and publishing: Book and job.....	2.3
Printing and publishing: Newspaper.....	2.2
Street railways (motormen and conductors).....	.2

Trade groups showing decrease in hourly wages in 1926 under 1925

	Per cent of decrease
Bakers.....	5.5
Laundry workers.....	.7

The rates and hours of street railway motormen and conductors do not enter into the grand averages for all trades combined, as men in these occupations do not have uniform hours.

Weekly hours for all trades taken as a unit have changed but slightly since 1925, having decreased 0.2 per cent. The largest decrease for any one group was that of chauffeurs and teamsters and drivers, which showed 1.5 per cent reduction. Two groups showed slight increases, bakers an increase of 0.8 per cent and newspaper printing an increase of 0.1 per cent.

The average hours for the United States in all trades herein covered, not including street railways, are 45.4 per week. In the following statement the average hours for the several groups are shown:

Average hours per week in 1926, by trade groups

Trade group	Hours per week
Bakers.....	47.8
Building trades.....	43.8
Chauffeurs and teamsters and drivers.....	55.5
Granite and stone cutters.....	44.0
Laundry workers.....	47.8
Linemen.....	46.0
Longshoremen.....	45.3
Printing and publishing: Book and job.....	44.3
Printing and publishing: Newspaper.....	45.3

For convenience in comparisons, all rates are shown per full-time week as well as per hour. The average full-time weekly rates for 1926 for all trades combined showed an advance of 5.0 per cent over the 1925 figures.

The greatest per cent of increase in weekly earnings is shown by granite and stone cutters, which amounts to 11.2 per cent, while building trades show 6.4 per cent, and linemen 4.5 per cent. With the exception of bakery trades, which show a decrease in full-time earnings of 4.3 per cent, and longshoremen and laundry workers, which show a quite negligible decrease, other groups show small increases.

It is impossible, of course, to follow up the thousands of individual union members and get from them the amount of time they work and the amount of time they do not work; hence no statement can be made of their actual earnings in a week or in a year. This report can treat only of *rates* of wages as distinct from actual earnings.

For a description of the scope of this report and the methods followed see page 54.

AVERAGE HOURLY RATES OF WAGES AND NUMBER OF CHANGES IN UNION SCALES, BY TRADES

The average money rates of wages per hour as of May 15, 1926 and 1925, for the country as a whole are given for each trade and for trade groups in Table 1. These averages were obtained by multiplying each hourly rate by the number of members of the union, then adding the products and the number of members and dividing the aggregate wages by the aggregate number of members. The membership is held strictly confidential and is used only for the purpose of computing the averages.

There are tabulated for 1926, 4,570 union-scale quotations, for 401 of which there are no comparable data for 1925. Of the 4,169 union-scale quotations for which there are comparable data for 1925, 2,655 had not changed during the year and 1,514 had changed in rates or hours or in both of these items. There are 1,379 instances of an increase in hourly wage rates in 1926 as compared with 1925, 1,297 instances of an increase in wage rates per week, and 44 instances of an increase in hours of labor. There are 94 instances of a reduction in hourly wage rates in 1926 as compared with 1925, 105 instances of a reduction in wage rates per week, full time, and 152 instances of a reduction in hours of labor. Of the 44 instances of increase in the hours of labor, 16 occurred in the building trades, 6 in the chauffeurs and teamsters and drivers, 1 in linemen and 20 in the newspaper printing trades.

TABLE 1.—AVERAGE RATE OF WAGES PER HOUR AND NUMBER OF UNION-SCALE QUOTATIONS FOR MAY 15, 1926, COMPARED WITH MAY 15, 1925, IN SPECIFIED TRADES FOR THE UNITED STATES

¹ Weekly rates for pieceworkers not reported.
² Per 1,000 ems.
³ Not reported.

⁴ Not including piece workers or street railway motormen and conductors.
⁵ Not including street railway motormen and conductors.

Table 1 shows that of the 247 bakery trade quotations comparable with 1925, 38 had an increase, 1 a decrease, and 208 had no change in wage rates per hour; 36 had an increase, 2 a decrease, and 209 no change in wage rates per week, full time; while 2 had a decrease and 245 no change in the number of hours per week. The other items of the table may be read in like manner.

Owing to the shifting of trips and the many variations of hours of work in the operation of street cars, the hours per week and rates of wages per week of motormen and conductors are omitted from this report. The 28 changes reported for this group were all increases in rates of wages per hour.

Expressed in percentages of the total number (1,514) of union-scale quotations in which there were changes, 91.1 per cent resulted in increases and 6.2 per cent in decreases in rates of wages per hour; 85.7 per cent provided increases and 6.9 per cent decreases in earnings per week; and 2.9 per cent provided increases and 10 per cent decreases in the hours per week.

WEEKLY HOURS OF LABOR, BY TRADES

Table 2 shows the percentage of members in each trade or occupation working certain classified hours per week on May 15, 1926.

It will be observed from the table that 94.5 per cent of the bakers had a week of 48 hours or less; that 97.1 per cent of the building trades had a week of 44 hours or less; that 79.5 per cent of all the union membership covered had a week of 44 hours or less and 90.3 per cent a week of 48 hours or less.

The combined organized trades herein represented have thus nearly reached the 8-hour day, and more than three-fourths of their membership have also secured the Saturday half-holiday, resulting in a 44-hour week.

TABLE 2.—PER CENT OF TRADE-UNION MEMBERS IN THE UNITED STATES WORKING EACH CLASSIFIED NUMBER OF HOURS PER WEEK, MAY 15, 1926

1 Decrease.

2 No data.

3 Decrease of less than one-tenth of 1 per cent.

Table 3 above shows very interesting figures. According to the table the weekly rate of bakers increased 150.3 per cent between 1913 and 1926. This means that the bakers' full-time weekly wage rate in 1926 was two and one-half times the rate of 1913. Between 1907 and 1926 the bakers' weekly rate increased 194.2 per cent. In other words, bakers' wages in 1926 were almost three times those of 1907. Data for all trades were not available back as far as 1913. So far as shown, the greatest increase in any trade between 1913 and 1926 was in cement finishers' helpers. Here the increase was 186 per cent, making the rate 2.86 times as much in 1926 as in 1913. The greatest increase between 1907 and 1926 is shown for steam and sprinkler fitters' helpers. In this trade the rate in 1926 was more than three and one-third times the rate in 1907.

INDEX NUMBERS OF ALL TRADES COMBINED, 1907 TO 1926

A table of index numbers is now presented. These index numbers are simply percentages in which the rates for all of the years were compared with the rate in a selected base year which is taken as 100. Table 4 shows the extent of the changes in all cities and all trades combined, in union wage scales taken as a whole for each year from 1907 down; the data for preceding years are drawn from earlier reports. The pre-war year 1913 is taken as the base.

TABLE 4.—INDEX NUMBERS OF UNION WAGE RATES AND HOURS OF LABOR FROM 1907 TO 1926 AS COMPARED WITH 1913

[1913=100]

Year	Index numbers of—			Year	Index numbers of—		
	Rate of wages per hour	Full-time hours per week	Full-time rate of wages per week		Rate of wages per hour	Full-time hours per week	Full-time rate of wages per week
1907.....	89.7	102.6	91.5	1917.....	114.1	98.4	112.4
1908.....	91.0	102.1	92.5	1918.....	132.7	97.0	129.6
1909.....	91.9	101.9	93.3	1919.....	154.5	94.7	147.8
1910.....	94.4	101.1	95.2	1920.....	199.0	93.8	188.5
1911.....	96.0	100.7	96.5	1921.....	205.3	93.9	193.3
1912.....	97.6	100.3	97.7	1922.....	193.1	94.4	183.0
1913.....	100.0	100.0	100.0	1923.....	210.6	94.3	198.6
1914.....	101.9	99.6	101.6	1924.....	228.1	93.9	214.3
1915.....	102.8	99.4	102.3	1925.....	237.9	93.0	222.3
1916.....	107.2	98.8	106.2	1926.....	250.3	92.8	233.4

The table shows that union wage rates per hour were higher in 1926 than in any preceding year, the index for 1926 being 250.3. This means that union wage rates per hour as a whole were two and one-half times as much in 1926 as they were in 1913.

Full-time hours per week were 7.2 per cent lower in 1926 than in 1913 and full-time weekly earnings were two and one-third times as much in 1926 as in 1913.

As some readers may desire to make comparisons with the initial year, 1907, a table of index numbers has been computed from the same basic figures, starting with 1907 as 100.

TABLE 5.—INDEX NUMBERS OF UNION WAGE RATES AND HOURS OF LABOR FROM 1907 TO 1926 AS COMPARED WITH 1907

[1907=100]

Year	Index numbers of—			Year	Index numbers of—		
	Rate of wages per hour	Full-time hours per week	Full-time rate of wages per week		Rate of wages per hour	Full-time hours per week	Full-time rate of wages per week
1907.....	100.0	100.0	100.0	1917.....	127.2	95.9	122.8
1908.....	101.4	99.5	101.1	1918.....	147.9	94.6	141.6
1909.....	102.5	99.3	102.0	1919.....	172.2	92.3	161.5
1910.....	105.3	98.6	104.0	1920.....	221.8	91.4	204.0
1911.....	107.1	98.2	105.4	1921.....	228.8	91.6	211.2
1912.....	108.8	97.7	106.8	1922.....	215.3	92.0	199.9
1913.....	111.5	97.5	109.3	1923.....	234.7	91.9	216.9
1914.....	113.6	97.1	111.0	1924.....	254.2	91.5	234.1
1915.....	114.5	96.9	111.7	1925.....	265.1	90.6	242.8
1916.....	119.4	96.3	116.1	1926.....	279.0	90.5	253.0

Table 5 shows an index for wage rates per hour of 279 in 1926 as compared with 100 in 1907. This means that the rates per hour were more than two and three-fourths times as much in 1926 as in 1907. The index for full-time hours per week in 1926 is 90.5, meaning that since 1907 full-time hours per week had decreased 9.5 per cent. The index for full-time rates of wages per week stands at 255 in 1926, meaning that full-time weekly earnings were more than two and one-half times as much in 1926 as in 1907.

INDEX NUMBERS OF BUILDING TRADES

Because of the particular interest of the public in the changes in rates in the building trades taken as a whole, the following table is given. Index numbers have not been computed for any of the other trade groups.

TABLE 6.—INDEX NUMBERS OF WAGE RATES PER HOUR IN THE BUILDING TRADES, 1913 TO 1926

[1913=100]

Year	Index number	Year	Index number
1913.....	100	1920.....	197
1914.....	102	1921.....	200
1915.....	103	1922.....	187
1916.....	106	1923.....	207
1917.....	113	1924.....	224
1918.....	126	1925.....	233
1919.....	145	1926.....	243

INDEX NUMBERS BY TRADES, 1907 TO 1926

In preceding tables all trades have been combined into a general index number. In Table 7, following, index numbers are given, all cities combined, for each trade for which data are available back to 1913.

In this table each other year is compared with 1913, the base.

TABLE 7.—INDEX NUMBERS OF UNION HOURS OF LABOR PER WEEK, RATES OF WAGES PER HOUR, AND FULL-TIME WAGES PER WEEK, 1907 TO 1926

(1913=100)

Year	Bakers			Building trades																				
				Bricklayers			Bricklayers: Sewer, tunnel, and caisson			Building laborers			Carpenters			Carpenters: Parquetry-floor layers			Cement finishers			Cement finishers' helpers		
	Full-time hours per week	Rate of wages per hour	Rate of full-time wages per week	Full-time hours per week	Rate of wages per hour	Rate of full-time wages per week	Full-time hours per week	Rate of wages per hour	Rate of full-time wages per week	Full-time hours per week	Rate of wages per hour	Rate of full-time wages per week	Full-time hours per week	Rate of wages per hour	Rate of full-time wages per week	Full-time hours per week	Rate of wages per hour	Rate of full-time wages per week	Full-time hours per week	Rate of wages per hour	Rate of full-time wages per week	Full-time hours per week	Rate of wages per hour	Rate of full-time wages per week

INDEX NUMBERS—Continued

SELECTED TRADES

In Table 8 actual wage rates and hours of labor, and index numbers therefor, from 1907 to 1926, are given for selected trades in 13 representative cities. These trades number from 8 to 18 in the different cities. The figures for years other than 1926 were taken from earlier bulletins. In this table 1907 is taken as the basis of comparison, or 100. Limited space does not permit the compilation for all cities and all trades.

TABLE 8.—UNION SCALES AND INDEX NUMBERS OF WAGES PER HOUR AND PER WEEK AND OF HOURS OF LABOR PER WEEK, MAY, 1907 TO 1926, IN SELECTED TRADES IN 13 CITIES—Continued

ATLANTA, GA.

[1907=100. The figures for compositors and machine operators apply only to those working on English text.]

SCOPE OF DATA

This is the fifteenth bulletin published by the Bureau of Labor Statistics on the subject of union scale of wages and hours of labor. A list follows, showing the bulletin number, the date of scales included, and the number of cities reported.

LIST OF BULLETINS ON UNION SCALE OF WAGES AND HOURS OF LABOR PUBLISHED BY THE BUREAU OF LABOR STATISTICS

Bulletin	Date of scale	Number of cities reported	Bulletin	Date of scale	Number of cities reported
No. 131.....	May 15, 1907 to 1912..	39	No. 286.....	May 15, 1920.....	66
No. 143.....	May 15, 1913.....	40	No. 302.....	May 15, 1921.....	66
No. 171.....	May 1, 1914.....	41	No. 325.....	May 15, 1922.....	66

No. 259.....	May 15, 1918.....	53	No. 431.....	May 15, 1926.....	66
No. 274.....	May 15, 1919.....	61			

Data for several of the principal trades and cities for 1913 to 1926 are given by years in an abridged form in the Monthly Labor Review for September, 1926.

The trades and occupations covered in this bulletin are divided into 10 groups as follows:

Bakery trades.
 Building trades.
 Chauffeurs and teamsters and drivers.
 Granite and stone trades.
 Laundry workers.
 Linemen.

Longshoremen.
 Printing and publishing: Book and job.
 Printing and publishing: Newspaper.
 Street-railway motormen and conductors.

The 66 cities for which data are given are located in 36 States. The cities selected are generally the largest in their respective sections of the country. They are as follows:

Atlanta, Ga.
 Baltimore, Md.
 Birmingham, Ala.
 Boston, Mass.
 *Bridgeport, Conn.
 Buffalo, N. Y.
 *Butte, Mont.
 Charleston, S. C.
 Chicago, Ill.
 Cincinnati, Ohio.
 Cleveland, Ohio.
 *Columbus, Ohio.
 Dallas, Tex.
 *Davenport, Iowa.
 *Dayton, Ohio.
 Denver, Colo.
 *Des Moines, Iowa.
 Detroit, Mich.
 *Erie, Pa.
 Fall River, Mass.
 *Grand Rapids, Mich.
 *Houston, Tex.
 Indianapolis, Ind.
 Jacksonville, Fla.
 Kansas City, Mo.

Little Rock, Ark.
 Los Angeles, Calif.
 Louisville, Ky.
 Manchester, N. H.
 Memphis, Tenn.
 Milwaukee, Wis.
 Minneapolis, Minn.
 *Moline, Ill.
 *Muskegon, Mich.
 *Nashville, Tenn.
 Newark, N. J.
 New Haven, Conn.
 New Orleans, La.
 New York, N. Y.
 *Norfolk, Va.
 Omaha, Nebr.
 *Peoria, Ill.
 Philadelphia, Pa.
 Pittsburgh, Pa.
 *Portland, Me.
 Portland, Oreg.
 Providence, R. I.
 *Reading, Pa.
 Richmond, Va.
 *Rochester, N. Y.

*Rock Island, Ill.	*Spokane, Wash.
*Saginaw, Mich.	*Springfield, Mass.
St. Louis, Mo.	*Toledo, Ohio.
*St. Paul, Minn.	Washington, D. C.
Salt Lake City, Utah.	*Wichita, Kans.
San Francisco, Calif.	*Worcester, Mass.
Scranton, Pa.	*York, Pa.
Seattle, Wash.	*Youngstown, Ohio.

Certain other trades and trade groups not included in this report have been carried by the bureau in the union wage report in preceding years. A list of these trades and the bulletins in which they appear are stated in Bulletin 404, page 57.

The asterisks in the preceding list indicate cities added since the first report. In Table A, page 59, data for each of the cities are given for each trade in which a scale was in effect.

EXPLANATION OF TERMS AND METHODS

A union scale, as the term is here used, is a statement, either written or definitely understood, of wages and hours of labor agreed to or accepted by an organization of union men and an employer or group of employers, under which agreement, expressed or implied, union men actually work. A union scale usually fixes the limit in only one direction. It sets a minimum wage and a maximum of hours for a regular day's work. This report shows such minimum wage and maximum hours as are established by the agreed to or accepted scale. In certain cities and trades, however, some workmen, and in some few instances all or nearly all workmen, actually are paid more than the scale, and in some instances employees work fewer hours than the scale calls for. As a general rule, however, the union scale represents the prevailing wage of a locality.

In cases where bonuses are definitely reported in one fixed amount and apparently are to remain in effect indefinitely, such bonuses have been combined with the regular rate.

The observance of Labor Day as a holiday is so general and the fact is so widely understood that it has been deemed unnecessary to refer to the many agreements which prohibit the performance of ordinary work on that day. However, in instances where the prohibition of work has been extended to other days or parts of days, such as July 4 and Saturday afternoon, and also includes Labor Day, the conditions are stated in footnotes.

In the newspaper printing trades, compositor and machine operator agreements are found in certain cities in which there are stated maximum hours that may not be exceeded except by payment of an overtime rate, and a minimum of hours for which work must be provided or payment made if a man undertakes a day's work. When such contract exists there may be further a commonly accepted working time, within the limits provided, so well established that such time is in effect the standard working-day. In such instances the tabulation shows such actual working hours, and notes state the maximum and minimum hours.

No scale for any trade is published here unless it was so well established that at least 50 per cent of the members of the union were receiving the scale or above it. Information obtained on this question indicates that an insignificant number of union members

were working for less than the scale, while a considerable number were receiving more than the scale. Some trades were not organized in certain cities, and some were organized only in part. When organized in part, with a scale in force for such men as were organized, the scale is published.

The union scales in this report are almost entirely time-rate scales. The only piece-rate scales shown are for lathers, and for machine operators in the printing trades, and one quotation for longshoremen. These occupations have simple units of payment which are commonly understood. Many trades work to a large extent on piece rates. Such rates are so great in number and the units of payment so variable that it is not practicable to quote them. And further, though the piece units were described in great detail, the amount of the workers' time involved would be understood by few who were not acquainted with the industry.

The various scales agreed to by employers and trade-unions state wages for differing units of time. Some scales designate the rates of wages by the hour, others by the day, week, or month. The varying rates have been converted into common terms, and both hourly and weekly rates are shown.

General Table A (p. 59) shows the rates of wages per hour and the rates per full-time week, the rates for overtime, Sunday, and holiday work, the regular hours for a full day, for Saturday, and for a full week, the number of months in the year for which the agreement provided for a Saturday half holiday, and the per cent of members receiving more than scale and the amount or range received. Corresponding figures for 1925 are reproduced in part, in this table.

Certain unions have agreements that Saturday or some other week day shall be a day of rest instead of Sunday. In such cases the provision for this day has been tabulated as equivalent to the usual Sunday provision. Likewise, if there is a short day in the week other than Saturday, it has been tabulated as equivalent to a Saturday provision. In other words, "Sunday" is considered as comprehensive enough to cover any fixed rest day.

Where two or more quotations of rates and hours are shown for the same occupation in the same city, such quotations represent two or more agreements between unions and employers, sometimes different unions, sometimes different employers, sometimes both. The letters A, B, C, etc., are used to designate different quotations, but have no other significance.

When for a period of three months or more of the year the number of hours differed from that shown for May, the difference has been noted in the table.

When a strike or lockout was pending on May 15, the scale which was in effect before the strike or lockout began has been tabulated with a note, "Old scale; strike pending."

Nearly all the information here published was obtained by special agents of the bureau through personal visits to business agents and secretaries of the respective trade-unions in the several cities. The State labor bureaus of Massachusetts, Ohio, and Pennsylvania, for their own purposes, collect union wage scales within their respective States. To avoid duplication of field work in these States, they have furnished such information as is necessary to this compilation.

The Ohio and Pennsylvania data were collected entirely by personal visits of special agents of those States. The Massachusetts bureau collected its data in part by correspondence and in part by sending out special agents. About 1,800 union representatives were visited.

In the work of this bureau and of the three State bureaus named, wage scales, written agreements, and trade-union records were consulted wherever available.

Scales for apprentices are not shown, but scales for helpers in a number of trades are given. In some trades the work of helpers is performed in part by apprentices. Whenever it was found that the work of helpers is largely done by apprentices, the scales for such helpers have been omitted.

An inspection of the general table shows for some occupations a great variation in trade terms and classifications in the different cities. For example, bakers are classed in some cities as first hands, second hands, and third hands; in other cities as mixers, benchmen, oven men, etc. The difference in occupation name makes a comparison between cities difficult. Inquiry has shown that the terms "first hand," "second hand," etc., do not cover identical work in the different cities where these terms are used. Certain work may be considered first-hand work in one city and second-hand work in another city. Of necessity, this bureau has followed the terminology used in each city.

There are also great variations in classification and in the extent of subdivision of chauffeurs, teamsters, and drivers, and of book-binding and presswork occupations, making comparison of city with city quite difficult; and similar conditions, less in degree, are found in several other trades. Special rates for inconsequential groups within these occupations have been omitted in some cities.

As stated before, the average rates shown in preceding tables were obtained by multiplying the rate for each city by the number of union members, adding the products for all cities, and dividing the sum by the aggregate membership in all cities. The same method was used in computing average hours.

The averages are based on all data available each year. There may be an effective scale in a city one year and not in the next year. If there is no effective scale the city does not enter into the average. A change in the average, therefore, is possible though there be no change in any of the other cities.

Further, there may be a change in the average when there is no change in the rate or hours for any city, all due to a change in the relative number of members. If there is an increase in membership in high-rate cities and not in low-rate cities the average for the country is raised. Conversely, if the low-rate cities increase membership rather than the high-rate cities the average is lowered.

A few changes in the large widespread trades may cause but little change in the average, while a few changes in a trade limited as to cities or as to membership may materially affect the average.

Index numbers are computed to make comparisons easier as between years. They are only percentages which show the increase or decrease in all other years as compared with one year selected as the base. In most of the tables 1913 is taken as the base. In other tables 1907, the first year of this series of reports, is taken as the base.

The index numbers for rates have been obtained by computing ratios from the rates for each two successive years and, beginning with the base year, compounding the ratios each year. The ratio of the 1914 rate and the 1913 rate is the index number for 1914. The index number for 1914 thus found, multiplied by the ratio of 1915 to 1914, gives the index number for 1915, etc.

In the earlier years the ratio was based on the average as computed from identical unions that reported for both years, old quotations dropping out and new quotations coming in being omitted from the average. In the later years the averages are based on all data received each year.

The same method was used in computing index numbers of hours. In computing the general index number when an industry is added or omitted the ratio is based on the data for identical industries. Here it is not a question of a trade or an industry coming into existence or passing out, but a question of discontinuing or taking on an industry that is in existence. To illustrate, the metal industry and the millwork industry were both omitted in 1925 and 1926, as it was known that more representative data for these two industries could be obtained from establishment pay rolls. These trades were covered in 1924 and earlier years and entered into the general index for all trades in those years. Before computing the general index for 1925 a new grand average was computed for all trade groups, with these trade groups omitted. Then the ratio between 1924 and 1925 for all the remaining trade groups combined was computed and the general index for 1924 was multiplied by this ratio to get the general index for 1925.

Caution should be used in considering these index numbers. The result obtained by a subtraction of index numbers does not represent the per cent of increase or decrease between the different years. For example, referring to page 12, the index number for rates of wages per week of bakers in 1907 was 85.1 as compared with 250.3 in 1926, making an increase of 165.2 points in the index number. One hundred and sixty-five and two-tenths is 194.2 per cent of 85.1, thus making the increase in 1926 over 1907, 194.2 per cent, as shown in Table 3.

TABLE A.—UNION SCALE OF WAGES AND HOURS OF LABOR IN SPECIFIED TRADES, MAY 15, 1926, AND MAY 15, 1925, BY CITIES

BAKERY TRADES

BAKERS

[In some instances the rate for overtime and for Sunday and holidays is indicated by figures closely followed by the letter c, which means that the amount given is the rate in cents per hour. The rate shown for overtime is for the primary overtime only, secondary and other further rates being considered of small importance. When overtime work is prohibited it is indicated by "Pro." When no statement is given for 1925 there was no union or, if a union, no effective scale. The few cases in which the day of rest is other than Sunday have been tabulated as Sunday, and those in which the short day is other than Saturday have been tabulated as Saturday]

LIST OF BULLETINS OF THE BUREAU OF LABOR STATISTICS

The following is a list of all bulletins of the Bureau of Labor Statistics published since July, 1912, except that in the case of bulletins giving the results of routine surveys of the bureau, only the latest bulletin on any one subject is here listed.

A complete list of the reports and bulletins issued prior to July, 1912, as well as the bulletins published since that date, will be furnished on application. Bulletin marked thus () are out of print.*

Wholesale Prices.

- No. 234. Index numbers of wholesale prices in the United States and foreign countries. [1921.]
- No. 415. Wholesale prices, 1890 to 1925.

Retail Prices and Cost of Living.

- *No. 121. Sugar prices, from refiner to consumer. [1913.]
- *No. 130. Wheat and flour prices, from farmer to consumer. [1913.]
- *No. 164. Butter prices, from producer to consumer. [1914.]
- No. 170. Foreign food prices as affected by the war. [1915.]
- No. 357. Cost of living in the United States. [1924.]
- No. 369. The use of cost-of-living figures in wage adjustments. [1925.]
- No. 418. Retail prices, 1890 to 1925.

Wages and Hours of Labor.

- *No. 146. Wages and regularity of employment and standardization of piece rates in the dress and waist industry of New York City. [1914.]
- *No. 147. Wages and regularity of employment in the cloak, suit, and skirt industry. [1914.]
- No. 161. Wages and hours of labor in the clothing and cigar industries, 1911 to 1913.
- No. 163. Wages and hours of labor in the building and repairing of steam railroad cars, 1907 to 1913.
- *No. 190. Wages and hours of labor in the cotton, woolen, and silk industries, 1907 to 1914.
- No. 204. Street railway employment in the United States. [1917.]
- No. 225. Wages and hours of labor in the lumber, millwork, and furniture industries, 1915.
- No. 265. Industrial survey in selected industries in the United States, 1919.
- No. 297. Wages and hours of labor in the petroleum industry, 1920.
- No. 348. Wages and hours of labor in the automobile industry, 1922.
- No. 356. Productivity costs in the common-brick industry. [1924.]
- No. 358. Wages and hours of labor in the automobile-tire industry, 1923.
- No. 360. Time and labor costs in manufacturing 100 pairs of shoes. [1924.]
- No. 365. Wages and hours of labor in the paper and pulp industry, 1923.
- No. 371. Wages and hours of labor in cotton-goods manufacturing, 1924.
- No. 374. Wages and hours of labor in the boot and shoe industry, 1907 to 1924.
- No. 376. Wages and hours of labor in the hosiery and underwear industry, 1907 to 1924.
- No. 377. Wages and hours of labor in woolen and worsted goods manufacturing, 1924.
- No. 381. Wages and hours of labor in the iron and steel industry, 1907 to 1924.
- No. 387. Wages and hours of labor in the men's clothing industry, 1911 to 1924.
- No. 394. Wages and hours of labor in metalliferous mines, 1924.
- No. 407. Labor cost of production and wages and hours in the paper box-board industry, 1925.
- No. 412. Wages, hours, and productivity in the pottery industry, 1925.
- No. 413. Wages and hours of labor in the lumber industry in the United States, 1925.
- No. 416. Hours and earnings in anthracite and bituminous coal mining, 1922 and 1924.
- No. 421. Wages and hours of labor in the slaughtering and meat-packing industry, 1925.
- No. 422. Wages and hours of labor in foundries and machine shops, 1925.
- No. 431. Union scale of wages and hours of labor, May 15, 1926.

Employment and Unemployment.

- *No. 109. Statistics of unemployment and the work of employment offices in the United States. [1913.]
- No. 172. Unemployment in New York City, N. Y. [1915.]
- *No. 183. Regularity of employment in the women's ready-to-wear garment industries. [1915.]
- *No. 195. Unemployment in the United States. [1916.]
- No. 196. Proceedings of the Employment Managers' Conference held at Minneapolis, Minn., January, 1916.
- *No. 202. Proceedings of the conference of Employment Managers' Association of Boston, Mass., held May 10, 1916.
- No. 206. The British system of labor exchanges. [1916.]

Employment and Unemployment—Continued.

- *No. 227. Proceedings of the Employment Managers' Conference, Philadelphia, Pa., April 2 and 3, 1917.
- No. 235. Employment system of the Lake Carriers' Association. [1918.]
- *No. 241. Public employment offices in the United States. [1918.]
- No. 247. Proceedings of Employment Managers' Conference, Rochester, N. Y., May 9-11, 1918.
- No. 310. Industrial unemployment: A statistical study of its extent and causes. [1922.]
- No. 409. Unemployment in Columbus, Ohio, 1921 to 1925.

Proceedings of Annual Meetings of International Association of Public Employment Services.

- No. 192. First, Chicago, December 19 and 20, 1913; Second, Indianapolis, September 24 and 25, 1914; Third, Detroit, July 1 and 2, 1915.
- No. 220. Fourth, Buffalo, N. Y., July 20 and 21, 1916.
- No. 311. Ninth, Buffalo, N. Y., September 7-9, 1921.
- No. 337. Tenth, Washington, D. C., September 11-13, 1922.
- No. 355. Eleventh, Toronto, Canada, September 4-7, 1923.
- No. 400. Twelfth, Chicago, Ill., May 19-23, 1924.
- No. 414. Thirteenth, Rochester, N. Y., September 13-17, 1925.

Women and Children in Industry.

- No. 116. Hours, earnings, and duration of employment of wage-earning women in selected industries in the District of Columbia. [1913.]
- *No. 117. Prohibition of night work of young persons. [1913.]
- *No. 118. Ten-hour maximum working-day for women and young persons. [1913.]
- *No. 119. Working hours of women in the pea canneries of Wisconsin. [1913.]
- *No. 122. Employment of women in power laundries in Milwaukee. [1913.]
- No. 160. Hours, earnings, and conditions of labor of women in Indiana mercantile establishments and garment factories. [1914.]
- *No. 167. Minimum-wage legislation in the United States and foreign countries. [1915.]
- *No. 175. Summary of the report on conditions of women and child wage earners in the United States. [1915.]
- *No. 176. Effect of minimum-wage determinations in Oregon. [1915.]
- *No. 180. The boot and shoe industry in Massachusetts as a vocation for women. [1915.]
- *No. 182. Unemployment among women in department and other retail stores of Boston, Mass. [1916.]
- No. 193. Dressmaking as a trade for women in Massachusetts. [1916.]
- No. 215. Industrial experience of trade-school girls in Massachusetts. [1917.]
- *No. 217. Effect of workmen's compensation laws in diminishing the necessity of industrial employment of women and children. [1918.]
- No. 223. Employment of women and juveniles in Great Britain during the war. [1917.]
- No. 253. Women in lead industries. [1919.]

Workmen's Insurance and Compensation (including laws relating thereto).

- *No. 101. Care of tuberculous wage earners in Germany. [1912.]
