Bulletin No. 650 of the

United States Bureau of Labor Statistics

Statistics of Building Construction, 1920 to 1937

Scope of Report

Since 1920 the Bureau of Labor Statistics has been collecting data on building permits. These data, published annually from 1920 to 1928 and monthly from September 1929 to the present, show the trend of construction as measured by the value of permits issued and constitute important basic material for ease in estimating the probable future trend in construction and also in estimating total construction for the country. The monthly reports show the number of buildings, permit valuation, and families provided for in new residential buildings, and the number and estimated cost of new nonresidential buildings, additions, alterations, and repairs, and total building construction.

Part I of this bulletin shows the general trend of building construction over the period 1920 to 1937 as measured by the value of permits issued.

Part II presents the results of a special study of the building-permit records of more than 800 cities for the 7-year period, 1929 to 1935. This special study was made by the Bureau of Labor Statistics in 1935, with funds made available by the Works Progress Administration, and with the cooperation of the Federal Housing Administration, the Home Loan Bank Board, as well as the Works Progress Administration. The study dealt particularly with the items of building costs and kinds of materials used.

Part III presents a review of construction for 1936 and 1937 based on building permits issued in cities reporting to the Bureau. Tables are presented showing the number and cost of each type of building, such as one- and two-family dwellings, apartment houses, amusement buildings, churches, and factory buildings.

Data concerning building permits issued are collected by the Bureau of Labor Statistics from local building officials, except in the States of Illinois, Massachusetts, New Jersey, New York, North Carolina, and Pennsylvania, where State departments of labor collect and forward the information to the Bureau. The cost figures, as shown in this report, are estimates made by prospective builders on applying for permits to build. No land costs are included. Data

are shown only for buildings within the corporate limits of the cities enumerated.

In addition to permits issued for private construction, the tables include the value of contracts awarded for Federal, State, and municipal buildings in the cities covered by the report. The data concerning Federal and State buildings are collected by the Bureau from the various Federal and State agencies which have the power to award contracts for building construction. For 1937 the value of the Federal and State public buildings amounted to \$96,068,000 and for 1936 to \$148,772,000.

PART III
Building Construction, 1936 and 1937, by
Type of Structure

Review of Construction in 1936 and 1937

To obtain as complete a coverage as possible, the Bureau has steadily increased the number of reporting cities. From 1920 to 1932 reports were received from cities with a population of 25,000 or over. In January 1933 the coverage was extended to include cities having a population of 10,000 or over, and again in 1936 the scope was enlarged to cover cities with 2,500 and over population. In January 1938 the extent of the survey was increased further by including cities with a population of 1,000 or over. Data shown in part III of this bulletin are based on reports received for the years 1936 and 1937 from 1,728 cities having a population of 2,500 or over.

The revival of building construction which started in 1935 and increased materially in 1936 continued at a slower pace through 1937. The 1936 increase over 1935 amounted to 60.7 percent, while the increase in 1937 over the preceding year amounted to only 10.4 percent. Previous to 1935, building construction activity had declined steadily for 10 years.

The value of buildings for which permits were issued in 1937 in the 1,728 cities having a population of 2,500 or over, which reported to the Bureau of Labor Statistics, was \$1,698,732,000. Of this amount, expenditures for new residential buildings accounted for \$755,824,000, a gain of 4.9 percent over 1936. The value of new nonresidential buildings showed a gain of 15.3 percent. Indicated expenditures for additions, alterations, and repairs to existing structures also increased 15.3 percent over the preceding year. Decided increases were shown in expenditures for one-family and two-family dwellings in 1937. There was a decrease, however, in indicated expenditures for apartment houses.

Permit valuations for all types of new nonresidential buildings, except institutional buildings and public-utility buildings, showed gains in 1937 over the preceding year. Among nonresidential structures, expenditures in 1937 were highest for store and mercantile buildings; they totaled in excess of \$107,000,000 for these 1,728 cities. Permit valuations for schools and libraries amounted to nearly \$103,000,000 and for factory buildings to more than \$90,000,000. Expenditures for additions, alterations, and repairs in 1937 amounted to \$373,000,000.

A summary of the outstanding developments in building construction in 1936 and 1937 is given in table C1.

TABLE C1.—Summary of building construction in 1,728 identical cities, 1936 and 1937

Class of construction	Number of buildings			Estimated cost		
	1937	1936	Per-centage change	1937	1936	Per-centage change
All construction.....	665,032	627,167	+6.0	\$1,698,731,885	\$1,538,018,808	+10.4
New residential.....	134,138	120,868	+11.0	755,824,135	720,368,472	+4.9
New nonresidential.....	123,037	117,667	+4.6	509,923,697	494,274,191	+15.3
Additions, alterations, and repairs.....	407,857	388,632	+4.9	372,984,053	323,376,145	+15.3

Changes by Geographic Division

All geographic divisions, except the East South Central, showed gains in the value of building construction, comparing 1937 with the preceding year. The largest increase, 23.7 percent, occurred in the Middle Atlantic States. Six of the nine divisions showed increases in permit valuations for new residential buildings. The largest gain for expenditures in home building occurred in the Mountain States, followed in order by the Pacific States and the Middle Atlantic States. Only four divisions showed increases in indicated expenditures for new nonresidential buildings, the most pronounced gains being in the New England and the Middle Atlantic States. All geographic divisions registered sizeable gains in expenditures for additions, alterations, and repairs. In the East South Central States the gain amounted to more than 55 percent and in the Mountain States to 35 percent. (See table C2.)

New England.....	52,965	51,727	7,756	6,562	10,685	10,197	34,524	34,968
Middle Atlantic.....	132,923	125,637	23,331	20,352	19,675	19,215	89,917	86,070
East North Central.....	132,404	118,153	23,329	20,525	33,600	30,705	75,475	66,923
West North Central.....	44,456	42,668	8,597	8,718	10,542	10,479	25,317	23,471
South Atlantic.....	74,791	76,672	17,710	16,905	11,320	11,444	45,761	48,323
East South Central.....	28,446	27,512	5,037	4,868	3,555	3,471	19,854	19,173
West South Central.....	43,405	42,890	13,653	12,448	5,947	5,765	23,805	24,067
Mountain.....	22,904	20,454	4,896	4,178	4,089	3,810	13,919	12,466
Pacific.....	132,738	121,464	29,829	26,312	23,624	22,581	79,285	72,571

All geographic divisions, except the West North Central, showed gains in 1937 over 1936 in the number of new residential buildings, and all except the South Atlantic, in the number of new nonresidential buildings. An increase in the number of additions, alterations, and repairs to existing structures was shown in six of the nine geographic divisions.

Dwelling Units Provided, 1936 and 1937, by Cities

The number of family-dwelling units provided in new buildings is given in table C4 for the 1,728 cities for which the Bureau received reports for the years 1936 and 1937. New dwelling units were pro-

vided in New York City during 1937 for 38,354 families, 5,045 more than in 1936. The only other cities providing more than 1,000 dwelling units in 1937 were: Los Angeles, Calif., 9,772; Detroit, Mich., 5,746; Washington, D. C., 5,352; Houston, Tex., 2,534; Philadelphia, Pa., 2,221; Miami, Fla., 2,107; San Diego, Calif., 1,967; San Francisco, Calif., 1,946; Honolulu, Hawaii, 1,616; Cincinnati, Ohio, 1,524; Baltimore, Md., 1,494; Dallas, Tex., 1,469; Chicago, Ill., 1,278; Oklahoma City, Okla., 1,237; Minneapolis, Minn., 1,190; Long Beach, Calif., 1,120; Denver, Colo., 1,012; Portland, Oreg., 1,012; Oakland, Calif., 1,009; and Miami Beach, Fla., 1,008.

During 1936 more than 1,000 dwelling units were provided in the following cities: New York, N. Y., 33,309; Los Angeles, Calif., 8,923; Washington, D. C., 6,379; Detroit, Mich., 4,433; Cincinnati, Ohio, 4,134; Chicago, Ill., 3,059; Houston, Tex., 2,523; Philadelphia, Pa., 2,206; Miami, Fla., 2,160; San Francisco, Calif., 2,139; Milwaukee, Wis., 1,925; San Diego, Calif., 1,696; Dallas, Tex., 1,532; Oklahoma City, Okla., 1,403; Memphis, Tenn., 1,373; Boston, Mass., 1,339; Miami Beach, Fla., 1,296; Baltimore, Md., 1,139; and St. Louis, Mo., 1,029.

Type of Building, 1936 and 1937, by Cities

For the years 1936 and 1937 the number and estimated cost of new residential buildings, of new nonresidential buildings, of additions, alterations, and repairs, and of total building construction in each of the 1,728 cities for which reports were received are shown in table C5. As in earlier years, the largest volume of buildings for which permits were issued in 1937 was in New York City, where the total was nearly \$315,000,000, or about five times as great as in Los Angeles, the second ranking city with \$65,000,000. Building permits in excess of \$35,000,000 were also reported in Detroit, Washington, Chicago, and Philadelphia.

In 1936 the value of permits issued for building construction was highest in New York City with more than \$224,000,000. Building permits in excess of \$35,000,000 were also reported for the following cities: Los Angeles, Washington, Detroit, and Chicago.

TABLE C5.—Number and estimated cost of building construction for which permits were issued in 1,728 identical cities, by city, 1936 and 1937

Important Building Projects

Permits were issued during 1937 for the following important building projects: In Hartford, Conn., for store and mercantile buildings to cost over \$1,300,000; in New Haven, Conn., for office buildings to cost nearly \$1,700,000; in Boston, Mass., for apartment houses to cost over \$2,000,000, for institutional buildings to cost \$2,500,000, and for public buildings to cost \$6,000,000; in New York City—in the Borough of the Bronx, for apartment houses to cost over \$31,000,000 and for school buildings to cost over \$5,000,000; in the Borough of Brooklyn, for apartment houses to cost over \$22,000,000 and for school buildings to cost more than \$14,000,000; in the Borough of Manhattan, for apartment houses to cost nearly \$17,000,000 and for school buildings to cost nearly \$7,000,000; in the Borough of Queens, for apartment houses to cost more than \$38,000,000 and for school buildings to cost over \$10,000,000; in Philadelphia, Pa., for school buildings to cost more than \$7,000,000; in Chicago, Ill., for factory buildings to cost over \$3,300,000, for store and mercantile buildings to cost over \$2,800,000, and for school buildings to cost nearly \$4,000,000; in Dearborn, Mich., for factory buildings to cost over \$1,000,000; in Detroit, Mich., for apartment houses to cost nearly \$7,000,000, for factory buildings to cost nearly \$5,000,000, and for office buildings to cost \$1,500,000; in Toledo, Ohio, for school buildings to cost \$1,000,000; in Milwaukee, Wis., for school buildings to cost \$1,500,000; in Minneapolis, Minn., for apartment houses to cost \$2,400,000; in Washington, D. C., for apartment houses to cost over \$6,000,000; in Fernandina, Fla., for factory buildings to cost more than \$8,000,000; in Franklin, Va., for factory buildings to cost \$3,750,000; in Nashville, Tenn., for apartment houses to cost \$1,400,000; in Houston, Tex., for factory buildings to cost \$1,800,000; in Los Angeles, Calif., for store and mercantile buildings to cost more than \$1,600,000; in San Francisco, Calif., for public utility buildings to cost \$2,300,000; and in Bellingham, Wash., for factory buildings to cost \$2,000,000.

In 1936 important building projects included the following: In Baltimore, Md., for one-family dwellings to cost over \$4,400,000; in Boston, Mass., for apartment houses to cost over \$5,000,000 and for office buildings to cost over \$2,600,000; in Camden, N. J., for apartment houses to cost nearly \$2,600,000; in Chicago, Ill., for one-family dwellings to cost nearly \$5,000,000, for apartment houses to cost more than \$11,000,000, for school buildings to cost over \$2,000,000, and for store and mercantile buildings to cost over \$3,500,000; in Cincinnati, Ohio, for one-family dwellings to cost over \$6,000,000, for multifamily dwellings to cost over \$14,000,000; and for store and mercantile buildings to cost over \$1,500,000; in Dallas, Tex., for one-family dwellings to cost over \$2,000,000; in Denver, Colo., for

one-family dwellings to cost nearly \$3,500,000 and for public works and utility buildings to cost over \$1,130,000; in Detroit, Mich., for one-family dwellings to cost more than \$24,000,000, for factory buildings to cost over \$4,000,000, for store and mercantile buildings to cost nearly \$3,000,000, and for office buildings to cost over \$1,000,000; in Fort Worth, Tex., for amusement buildings to cost over \$2,500,000; in Houston, Tex., for one-family dwellings to cost over \$6,700,000, for institutional buildings to cost over \$2,300,000, and for school buildings to cost over \$2,800,000; in Indianapolis, Ind., for factory buildings to cost over \$1,800,000; in Long Beach, Calif., for one-family dwellings to cost over \$2,600,000; in Los Angeles, Calif., for one-family dwellings to cost more than \$24,000,000, for apartment buildings to cost over \$4,600,000, for factory buildings to cost over \$2,000,000, for school buildings to cost over \$10,500,000, and for store and mercantile buildings to cost over \$3,600,000; in Memphis, Tenn., for apartment buildings to cost over \$5,000,000; in Milwaukee, Wis., for one-family dwellings to cost over \$9,000,000 and for multifamily dwellings to cost over \$2,300,000; in Minneapolis, Minn., for one-family dwellings to cost over \$2,300,000; in Mount Vernon, N. Y., for apartment houses to cost nearly \$2,800,000; in Newark, N. J., for public works and utility buildings to cost over \$1,700,000; in New York City—in the Borough of the Bronx for apartment houses to cost nearly \$39,000,000; in the Borough of Brooklyn for one-family dwellings to cost over \$6,500,000, for apartment houses to cost nearly \$20,000,000, and for factory buildings to cost over \$2,400,000; in the Borough of Manhattan for apartment houses to cost over \$19,000,000 and for office buildings to cost over \$5,300,000; in the Borough of Queens for one-family dwellings to cost over \$16,000,000, for apartment houses to cost over \$14,500,000, and for store and mercantile buildings to cost over \$2,000,000; in Newton, Mass., for one-family dwellings to cost over \$3,500,000; in Oklahoma City, Okla., for one-family dwellings to cost over \$2,400,000 and for apartment houses to cost nearly \$2,000,000; in Peoria, Ill., for store and mercantile buildings to cost over \$1,800,000; in Philadelphia, Pa., for one-family dwellings to cost over \$8,800,000 and for school buildings to cost over \$3,300,000; in Portland, Oreg., for one-family dwellings to cost over \$2,600,000; in Providence, R. I., for school buildings to cost over \$2,500,000; in Rochester, N. Y., for factory buildings to cost over \$1,600,000; in Sacramento, Calif., for one-family dwellings to cost over \$2,000,000; in St. Louis, Mo., for one-family dwellings to cost over \$3,600,000; in St. Paul, Minn., for one-family dwellings to cost over \$2,800,000; in San Diego, Calif., for one-family dwellings to cost over \$4,500,000; in San Francisco, Calif., for one-family dwellings to cost over \$6,700,000 and for store and mercantile buildings to cost over \$2,000,000; in Seattle, Wash., for one-family dwellings to cost

over \$2,100,000; in Washington, D. C., for one-family dwellings to cost over \$12,800,000, for apartment buildings to cost over \$11,500,000, for public buildings to cost over \$11,200,000, and for store and mercantile buildings to cost over \$2,000,000; in Honolulu, Hawaii, for one-family dwellings to cost nearly \$2,700,000.

Comparison by Type of Building, 1936 and 1937

During 1937, in the 1,728 cities from which the Bureau received reports, permits were issued for 665,032 building projects (including new construction and repairs), with a valuation of \$1,698,731,885, of which 44.5 percent of the valuation was for new residential buildings, 33.5 percent for new nonresidential buildings, and 22.0 percent for additions, alterations, and repairs to existing structures. Compared with 1936, there was an increase of 10.4 percent in the value of permits issued for all types of building construction. Table C6 shows the number of buildings and indicated expenditures for building construction, by type of building.

TABLE C6.—Number of buildings and estimated cost of building construction for which permits were issued in 1,728 identical cities, 1936 and 1937

Type of building	Buildings for which permits were issued				Percentage change, 1937 compared with 1936

On residential buildings:						
Housekeeping dwellings.....	290,034	143,185,187	279,538	127,742,198	+3.8	+12.1
Nonhousekeeping dwellings.....	4,915	7,014,219	4,000	5,610,019	+22.9	+25.0
On nonresidential buildings.....	112,908	222,784,647	105,094	190,023,928	+7.4	+17.2

In 1937 more permits were issued for one-family dwellings than for any other type of new building. Private garages represented the next most numerous type of building, followed in order by sheds, stores, and warehouses.

One-family dwellings also accounted for the greatest permit valuation of any type of new construction. Apartment houses accounted for the next largest expenditure, followed by stores and warehouses and schools and libraries.

Dwelling units were provided in new buildings for 186,146 families in the 1,728 cities having a population of 2,500 or over which reported to the Bureau of Labor Statistics in 1937. This compares with 176,536 dwelling units in 1936. Of the total number of dwelling units provided during 1937, 123,548 or 66.4 percent were in one-family dwellings as against 50,360 or 27.1 percent in apartment houses. In 1936, 63.1 percent of the new dwelling units were provided in one-family dwellings and 31.5 percent in apartment houses. A slight increase was shown in 1937 over the preceding year in the percentage of dwelling units provided in two-family dwellings. (See table C7.)

TABLE C7.—Number and percentage of family-dwelling units provided in 1,728 identical cities, 1936 and 1937

Type of dwelling	Number of new dwellings for which permits were issued		Families provided for			
	1937	1936	Number		Percentage	
			1937	1936	1937	1936

Analysis by Size of City, 1937

Six of the seven city-size groups showed gains in total dollar volume of construction, comparing 1937 with 1936. (See table C8.)

TABLE C8.—Estimated cost of building construction for which permits were issued in 1,728 identical cities, by size of city, 1936 and 1937

Size of city	Number of cities	Total construction (estimated cost)			New residential buildings (estimated cost)		
		1937	1936	Percentage change	1937	1936	Percentage change
Total, all cities.....	1,728	\$1,698,731,885	\$1,538,018,808	+10.4	\$755,824,135	\$720,368,472	+4.9

2,500 and under 5,000....	29, 897, 631	34, 594, 790	-13. 6	9, 956, 736	7, 276, 398	+36. 8	1, 707, 547

In relation to population, the largest expenditures on new construction and repairs were in the smaller towns. Per capita expenditures for all types of construction in the 1,728 cities having a population of 2,500 or over during 1937 amounted to about \$28. In towns with a population of 2,500 to 5,000, per capita expenditures were in excess of \$44, while in cities having a population of between 100,000 and 500,000 they amounted to only a little more than \$22. (See table C9.)

Six of the seven city-size groups showed increases in per capita expenditures for new residential buildings. By far the highest expenditures per person for this type of construction were shown in cities having a population of between 2,500 and 5,000 and between 5,000 and 10,000. In both of these groups the expenditures were more than \$21 per capita. This contrasted with less than \$9 per capita in cities having a population of between 100,000 and 500,000.

The number of family dwelling units provided per 10,000 population was also much greater in the smaller cities than in the larger cities in 1936 and 1937. In cities having a population of between 2,500 and 5,000, 54.6 families were provided per 10,000 population, while in the urban area as a whole, only 30.6 families were provided for per 10,000 population in 1937; in 1936 these figures were 46.5 and 29.0 respectively.

The per capita expenditures for new nonresidential buildings in 1937 averaged \$9.38 compared with \$8.13 in the preceding year. The lowest per capita expenditure in 1937, \$7.83, was shown in cities having a population of between 100,000 and 500,000 and the highest, \$17.51, in cities having a population of between 2,500 and 5,000.

Per capita expenditures for residential repairs were, in general, higher in the smaller cities than in the larger cities. The expenditures for repairs to nonresidential buildings were higher in the cities having a population of over half a million.

TABLE C9.—Per capita expenditure for building construction and number of families provided for in 1,728 identical cities, 1936 and 1937

Size of city	Number of cities	Population (census of 1930)	Expenditure per capita				Families provided for per 10,000 population

The greatest gain in total permit valuation for building construction occurred in cities having a population of over half a million. Four city-size groups showed gains in excess of 10 percent in indicated expenditures for residential construction. The cities having a population of between 100,000 and 500,000 were the only group registering lower expenditures for residential buildings than in 1936.

The sharpest gain in indicated expenditures for new nonresidential buildings occurred in cities having a population of over half a million, where the increase amounted to more than 50 percent. Two other city-size groups showed increases in this type of structure and four showed decreases.

The greatest gain in expenditures for additions, alterations, and repairs occurred in the cities having a population of between 2,500 and 5,000. All size groups, however, showed increases in this type of construction.

The number of family dwelling units provided in the new house-keeping dwellings for which permits were issued in the 1,728 identical cities having a population of 2,500 and over is shown by city-size groups in table C10.

TABLE C10.—Number of families provided for in new dwellings, in 1,728 identical cities, by size of city, 1936 and 1937

¹ Includes 1- and 2-family dwellings with stores.² Includes multifamily dwellings with stores.

Six of the seven city-size groups showed increases in the number of dwelling units provided, comparing the current year with the preceding year. By far, the largest increase occurred in cities having a population of 10,000 to 25,000.

Construction from Public Funds, 1936 and 1937

During 1937 contracts were awarded and force-account work started on construction projects financed wholly or partially from Federal funds valued at over \$1,250,000,000. This is a decrease of approximately \$360,000,000, or 22.1 percent as compared with 1936. (See table C11.)

¹ Preliminary, subject to revision.² Includes \$17,020,684 low-cost housing projects (housing division, P. W. A.)³ Revised; includes \$63,464,694 low-cost housing projects (housing division, P. W. A.)⁴ Revised.⁵ Other than those for which contracts were awarded by the Bureau of Public Roads.

Although there was a sharp decrease in the total volume of contracts awarded, financed from Federal funds, increases occurred in the dollar volume of the following types of work: Electrification, construction of hydroelectric power plants, and the construction of naval vessels.

TABLE C12.—Expenditures for labor and materials on construction projects operated by the Works Progress Administration for the years 1936 and 1937

[Subject to revision]

Type of project	Pay rolls and materials	
	1937	1936
Total.....	¹ \$1,087,440,084	² \$1,463,938,544

During the year 1937 a decided gain was shown in the value of contracts awarded for buildings financed wholly from State funds. There was a slight decrease, however, in the value of awards for highway construction.

The value of contracts awarded and force-account work started for street paving financed wholly from municipal funds is shown in table C14 for the years 1936 and 1937, for cities having a population of 150,000 and over.

TABLE C14.—Value of contracts awarded and force-account work started for street paving, financed from municipal funds, 1936 and 1937

[Cities of the United States having a population of 150,000 and over included in the survey]
