APPENDIX.—Libraries designated as Government depositories 43

The publications noted in this list, as in previous editions, have been selected with a view to citing only the more significant material of the Bureau of Labor Statistics and such as seems to be of general present-day interest. As a rule, only the most recent reports are noted in those cases where the Bureau has published several on the same subject. All publications cited have reference to conditions in the United States, unless otherwise indicated by the entries.

References to articles in the Monthly Labor Review are indicated by the letters M. L. R., and when an article has been printed as a separate this is shown by the letter R. followed by the number of the pamphlet. Separates printed before the numbered series began are designated by the words "unnumbered separate." References to both the Monthly Labor Review and the Labor Information Bulletin cover the issues to and including September 1940.

The Bureau has a limited number of its bulletins for distribution, and they are furnished free upon request as long as the supply lasts. This also applies to the Labor Information Bulletin and to single copies of the Monthly Labor Review. Regular distribution of the Review, however, is on a subscription basis, the subscriptions being handled by the Superintendent of Documents, Government Printing Office, Washington, D. C. The price is $3.50 per year in the United States, Canada, and Mexico; in other countries, $4.75. In order to make the material available in more convenient form, many of the articles in the Monthly Labor Review have been reprinted as separate pamphlets. These pamphlets are furnished free by the Bureau upon request.

Some of the publications noted in this list are not now available for free distribution but in most cases can be purchased at a nominal cost from the Superintendent of Documents, or consulted in local libraries which are depositories for publications of the Federal Government. A list of these libraries is given at the end of this bulletin.

A complete list of all printed bulletins and special reports of the Bureau of Labor Statistics, and of the other bureaus and divisions of the Department of Labor, is given in a pamphlet issued at frequent
PUBLICATIONS OF BUREAU OF LABOR STATISTICS

intervals by the Department. A detailed index to the articles in the Monthly Labor Review is published for each volume (6 numbers); an index to the articles in the Labor Information Bulletin is carried in the issue for December of each year.

Child Labor and Child Welfare

Since the creation of the Children's Bureau of the United States Department of Labor, all original investigations of matters pertaining to child labor and child welfare in the United States, conducted by the Department of Labor, have been made by that Bureau, which will be glad to furnish lists of publications upon request.

Cost, Standards, and Planes of Living

Data on changes in cost of living are published monthly by the Bureau of Labor Statistics, preceded by a press release giving summary figures.

Studies of family expenditures in the United States have been made from time to time by the Bureau. A general study was made in 1918-19 and the results published in Bulletin 357. A similar investigation was begun in 1934. This survey covered money disbursements of wage earners and lower-salaried clerical workers. A second survey of broader scope was conducted in 1935-36. It covered family incomes and expenditures of native-born families in all income and occupational groups. The detailed data obtained in these surveys are being made available in the bulletins listed below. Some of these bulletins have already been published; others are in press. Summary articles for certain localities, and for particular phases of the study, have been published in the Monthly Labor Review, and references to these articles are also given below. The Bureau of Home Economics of the United States Department of Agriculture cooperated in the second survey and is publishing a series of reports giving its findings.

The proceedings of the 1935, 1936, and 1937 meetings were published by the Division of Labor Standards of the U. S. Department of Labor.

Employment and Unemployment

Trends in employment and pay rolls are shown in a pamphlet issued monthly by the Bureau, as well as in the Monthly Labor Review. The data cover employment and pay rolls in private industry, employment in Federal Government services, and employment created by public-works projects. The report also contains data on average hours worked per week and on average hourly and weekly earnings. Summary data on employment and pay rolls are issued in a press release in advance of the printed report.

Index numbers of employment and pay rolls, supplementing, and in some instances revising, the figures in Bull. 610 are available in mimeographed form.

Labor in depression and recovery, 1929-37 (including data on employment). M. L. R., Nov. 1937 (R. 651).

Labor Statistics (General)

This is the fourth Handbook of Labor Statistics to be published by the Bureau of Labor Statistics. The first, issued in 1927 as Bull. 439, brought together in summary form such of the earlier published material of the Bureau as seemed to be of permanent value. The 1929, 1931, and 1936 editions (Bulls. 491, 541, 616) present similar summarizations for the intervening intervals. The material contained in these volumes represents in large part the original work of the Bureau of Labor Statistics, but this is not entirely the case, as the Bureau avoids making original studies in fields of labor interest which are already adequately covered by other official agencies. Digests of some of the published reports of these other agencies, therefore, as well as of certain responsible private bodies, were included to give a well-rounded picture of labor and related conditions.

What are labor statistics for? Bull. 599, 1933.

Labor Turn-over

Monthly labor turn-over rates by industry and by State, for a number of manufacturing industries, are published in each issue of the Monthly Labor Review.

Wholesale Prices

The Bureau collects wholesale prices and compiles index numbers for many individual commodities. Index numbers for groups of commodities are issued weekly in a press release; indexes for groups and subgroups of commodities are published monthly in a printed pamphlet, which also includes data on purchasing power of the dollar at wholesale; daily indexes of 28 commodities are made available weekly in a mimeographed release. Actual prices of commodities are issued monthly in mimeographed form, and printed semiannually, in the June and December pamphlets on wholesale prices. The latest report on wholesale prices published by the Bureau in bulletin form (No. 572) gave actual prices and index numbers for 1931 and earlier years.
