Letter of Transmittal

UNITED STATES DEPARTMENT OF LABOR,
BUREAU OF LABOR STATISTICS,
Washington, D. C., July 21, 1943.

The SECRETARY OF LABOR:

I have the honor to transmit herewith the 1943 supplement to the Selected List of the Publications of the Bureau of Labor Statistics, 1940 edition (Bulletin No. 683). This supplement includes references to the bulletins and the more important articles in the Monthly Labor Review and the Labor Information Bulletin published during the period covered—October 1940 to July 1943.

There is extensive current interest in the Bureau's publications, and it is felt that this new list will greatly facilitate their use.

A. F. HINRICHS, Acting Commissioner.

HON. FRANCES PERKINS,
Secretary of Labor.

APPENDIX.—Libraries designated as Government depositories	40

*Bulletin No. 747 of the
United States Bureau of Labor Statistics*

1943 Supplement to
Selected List of the Publications of the Bureau of
Labor Statistics, 1940 Edition

This list supplements the 1940 edition (Bulletin No. 683) of the Selected List of the Publications of the Bureau of Labor Statistics. It contains references not only to the publications of the Bureau but also to articles of special interest in the Labor Information Bulletin. The Labor Information Bulletin was issued by the Bureau of Labor Statistics from its inception in September 1934 to June 1942; since June 1942 it has been issued by the Office of the Secretary of Labor.

The 1940 edition of the Selected List of the Publications of the Bureau of Labor Statistics included references to the more significant reports of the Bureau recent enough to be of value, as well as to those which seemed to be of current general interest at the time of preparation of the list. The present supplement includes all bulletins and the more important articles in the Monthly Labor Review published from October 1940 to July 1943, with the exception that in the case of reports in a continuing series on the same subject only the most recent study is noted. References to the Labor Information Bulletin cover the numbers from October 1940 to June 1943.

Because of the increased interest in labor and economic developments in foreign countries, the more important articles on foreign conditions published in the Monthly Labor Review and the Labor Information Bulletin during the period covered by this list have been brought together in part II, by country. All references in part I apply to the United States.

As in the previous list of publications, articles in the Monthly Labor Review are indicated by the letters M. L. R. Many of the articles in the Review have been reprinted to make the material available in more convenient form, and where this has been done the number of the bulletin or pamphlet containing the reprinted article is shown in the reference.

Files and Indexes of Publications

For a complete picture of material on a particular subject published in the Monthly Labor Review or the Labor Information Bulletin, reference should be made to the various issues of those publications or to the subject indexes to their contents. A detailed index to the articles in the Review is published for each volume (6 numbers). A cumulative index for the period from July 1915 to December 1920 (volumes 1 to 11) was published as Bulletin No. 695 (20 cents), and a similar index for the issues from January 1921 to December 1940 (volumes 12 to 51)

was published as Bulletin No. 696 (40 cents). An index to the articles in the Labor Information Bulletin will be found in the issue for December of each year from 1935 to 1941, inclusive. A complete list of all printed bulletins and special reports of the Bureau of Labor Statistics, as well as of the other bureaus and divisions of the Department of Labor, is given in a pamphlet issued by the Department.

The Monthly Labor Review, Labor Information Bulletin, and other publications of the Bureau are available for reference in many local libraries which have been designated as depositories for publications of the Federal Government. A list of these libraries is given at the end of this bulletin.

Distribution of Publications

As a wartime economy, it has been necessary for the Bureau to limit free distribution of its publications to those who require them for official governmental use, or for some essential civilian activity related to the war effort. Persons requesting publications for either of these purposes should state their specific need for them.

Regular distribution of the Monthly Labor Review is on a subscription basis, the subscriptions being handled by the Superintendent of Documents. The price is \$3.50 per year in the United States, Canada, and Mexico, and in other countries, \$4.75; single copies are 30 cents. Prices of the printed bulletins, on sale by the Superintendent of Documents, vary from 5 cents upward.

Orders and remittances for the purchase of publications should be sent direct to the Superintendent of Documents, U. S. Government Printing Office, Washington, D. C. Payment must be made in advance, either by the coupons sold by the Superintendent in sets of 20 for \$1 and good until used, or by check or money order payable to him. Currency may be sent at sender's risk. Postage stamps are not acceptable.

Announcements of the issuance of all printed reports of the Bureau, or of reports on particular subjects only, will be sent to persons who ask that their names be placed on the appropriate mailing lists to receive them. The reports are grouped under the following major classifications: Building construction; Consumers' cooperative organizations; Cost of living and retail prices; Employer-employee relations (including strike statistics); Employment; Family expenditures; Industrial accidents; Latin American labor conditions; Occupational outlook; Productivity of labor; Wages and hours of labor; Wholesale prices.

As the demand for the Bureau's publications frequently exceeds the supply, persons who have publications of the Bureau for which they have no further use are requested to notify the Bureau so that franked mailing labels (requiring no postage) may be forwarded for the return of the publications. One frank is required for each package weighing 4 pounds or less.

Employment and Unemployment

Data on employment and pay rolls in private industry, employment in Federal Government services, and employment created by public-works projects are published by the Bureau of Labor Statistics in each issue of the *Monthly Labor Review*. The report also contains data on

average hours worked per week and on average hourly and weekly earnings in industrial and business employment. Data on employment and pay rolls and on hours and earnings are made available in mimeographed reports in advance of their publication in the Monthly Labor Review. In addition, indexes of wage-earner employment in manufacturing industries, for each of 95 manufacturing areas or cities, are issued monthly in mimeographed form. As an economy measure, the monthly printed pamphlet on employment and pay rolls, formerly issued by the Bureau, has been discontinued, but printed bulletins will be published from time to time.

Housing and Building Construction

Information on the trend of building construction in urban areas of the United States, as shown by building permits issued, is collected by the Bureau of Labor Statistics and made available monthly in a mimeographed report. The report shows the number and estimated cost of building construction projects and the number of families to be provided for in new dwelling units. Figures on the value of contracts

awarded for construction projects financed from Federal funds are also included. Monthly summary data, as well as reports for semiannual and annual periods, are published in the Monthly Labor Review. As an economy measure, the monthly printed pamphlet on building construction, formerly issued by the Bureau, has been discontinued, but printed bulletins will be published from time to time.

Industrial Accidents and Accident Prevention

Annual surveys of accidents to workers in manufacturing and non-manufacturing industries are made by the Bureau of Labor Statistics. Surveys of accidents in the iron and steel industry also are made annually, and special surveys for other individual industries are made from time to time. Reports on all these studies are published in the Monthly Labor Review and later reprinted in bulletin or pamphlet form. In addition, the Bureau is now publishing a monthly report on industrial injuries in a group of manufacturing industries selected for their importance in the war. The first of these monthly reports was published in the Monthly Labor Review for May 1943, giving figures for January 1943. A mimeographed tabulation of the monthly figures is made available in advance of their publication in the Monthly Labor Review.

Accidents and safety measures in specified industries:

Labor Statistics (General)

Handbook of labor statistics, 1941 edition: Volume I, All topics except wages; Volume II, Wages and wage regulation. Bull. 694. Vol. I, \$1; Vol. II, 45 cents.

This is the fifth Handbook of Labor Statistics to be published by the Bureau of Labor Statistics. The first, issued in 1927 as Bulletin 439, brought together in summary form such of the earlier published material of the Bureau as seemed to be of permanent value. The 1929, 1931, 1936, and 1941 editions (Bulls. 491, 541, 616, 694) present similar summarizations for the intervening intervals. The material contained in these volumes represents in large part the original work of the Bureau of Labor Statistics, but this is not entirely the case, as the Bureau avoids making original studies in fields of labor interest which are already adequately covered by other official agencies. Digests of some of the published reports of these other agencies, therefore, as well as of certain responsible private bodies, were included to give a well-rounded picture of labor and related conditions.

S. Department of Labor.

Wages, Salaries, and Hours of Labor

Data on average hourly and weekly earnings and average hours worked per week in all major manufacturing industries and in a large number of nonmanufacturing industries are compiled monthly by the Bureau of Labor Statistics and made available in mimeographed reports. Essentially the same statistics are later printed in the Monthly Labor Review in connection with the regular monthly reports on employment and pay rolls. From time to time the Bureau makes special surveys of wages and hours of labor in individual industries, data being obtained by sex, racial groups, occupation, and geographical location, and on union membership, etc. Also, union scales of wages and hours of labor are obtained by the Bureau each year for several important trades. Reports on these union scales and on the special surveys for individual industries are published in the Monthly Labor Review and later reprinted in bulletin or pamphlet form, frequently with additional data.

Wartime Conditions and Policies and Post-War Problems*Historical Studies, World War I*

A series of reports concerning governmental controls of consumer goods during World War I has been prepared by the Bureau of Labor Statistics. Selection of subjects for consideration was based on recognition that parallel situations would inevitably arise during the development of the current war program. The primary purpose of the reports was to assist those responsible for meeting today's problems. A second series of studies dealing with post-war problems of demobilization of manpower, and industrial readjustment, is in progress. All the reports comprising the first series and those issued so far in the second are listed below. The majority of the reports were issued in mimeographed form only. In addition to these special reports, several chronologies of important events have been prepared.

The reports, together with the chronologies, have been numbered consecutively without regard to series, and the number of each is shown in parentheses following the title entry.

Chronologies:

- Chronology of important events, August 1914–December 1918. (No. 1.)
- Labor relations in the United States—summary of historical events in the World War period, 1912–19. (No. 2.)

Wholesale Prices

The Bureau of Labor Statistics collects wholesale prices and compiles index numbers thereof for many individual commodities. Weekly index numbers for groups of commodities, monthly indexes for groups and subgroups of commodities, and daily indexes (issued weekly) for 28 basic commodities are made available in separate reports. Actual prices of individual commodities are issued monthly. In addition, the Bureau compiles monthly prices and index numbers of machine tools (issued quarterly), and weekly index numbers of strategic and critical materials and of waste and scrap materials (issued monthly). All these reports are issued in mimeographed form. As an economy measure, the monthly printed pamphlet on wholesale prices, formerly published by the Bureau, has been discontinued. However, index numbers of groups and subgroups of commodities are carried in each number of the Monthly Labor Review, and printed bulletins giving more detailed data will be published from time to time.
