WHOLESALE PRICES, 1945

Bulletin No. 877

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C.

Price 25 cents

Letter of Transmittal

UNITED STATES DEPARTMENT OF LABOR,
BUREAU OF LABOR STATISTICS,
Washington, D. C., January 29, 1947.

The SECRETARY OF LABOR:

I have the honor to transmit herewith a report on wholesale prices during the year 1945. This bulletin gives a record of each of the primary market price indexes published during 1945 and monthly prices for approximately 900 commodities, selected from the more than 10,000 primary market price series regularly maintained by the Bureau. The data shown in this report are first released in mimeographed statements giving preliminary information. These preliminary reports are available upon request to persons who need the indexes or individual commodity prices.

The data were collected by the Consumers' Prices Division, Ethel D. Hoover, Chief; and the Industrial Prices Division, Jesse M. Cutts, Chief. The bulletin was prepared under the direction of Galen B. Price, in the General Price Research and Indexes Division.

EWAN CLAGUE, *Commissioner.*

Hon. L. B. SCHWELLENBACH,
Secretary of Labor.

Bulletin No. 877 of the

United States Bureau of Labor Statistics

Wholesale Prices, 1945

Summary

Primary market¹ prices continued their wartime advance during 1945. In December 1945 prices were 2.3 percent above late 1944, and 42.8 percent above August 1939, the month before the outbreak of war in Europe. Prices increased steadily until the summer months, when decreases in farm products and foods lowered the wholesale price index to a point, in September, on a par with early 1945. The downward trend of the index was reversed during later months under the influences of price increases in agricultural commodities and continued advances for industrial goods.

Pressures for higher prices were marked during the early months of the year. The unexpected expansion of demands for military goods intensified shortages, and there were further wartime rises in labor and other costs. During this period increases in price ceilings were granted by OPA for several important industrial commodities including pig iron, steel products, wood pulp, newsprint, and cotton textiles. Mill prices for 14 basic steel products were increased in May, and ceiling prices for bituminous coal and anthracite were advanced in May and June.

Inflationary pressures remained strong after VE-day, and the close of the war in Europe had no immediate effect on prices. Some Government controls over production were relaxed during the period between victory in Europe and victory over Japan. After VJ-day the Government's reconversion program was embodied in the Executive order of August 18 under which many War Production Board controls over production and distribution were modified. By the end of the year, rationing had been suspended for all commodities except sugar. Price controls were generally maintained, however, preventing marked increases in prices. Despite relaxation of controls over production, shortages of goods remained acute. Toward the end of the year black-market operations were reported for many commodities, including corn, livestock, butter, apparel, and lumber, and new devices for circumventing price regulations developed. After VJ-day, pres-

¹ The Bureau of Labor Statistics wholesale price data, for the most part, represent prices in primary markets. In general, the prices are those charged by manufacturers or producers or are those prevailing on commodity exchanges. The monthly index is calculated from a monthly average of 1-day-a-week prices. It should not be compared directly with the weekly wholesale price index, which is designed as an indicator of week-to-week changes.

sure for relief from price ceilings to cover higher costs and to encourage production was intensified by new demands for wage increases in some important industries.

FARM PRODUCTS AND FOODS

Rises of 4.8 percent and 2.9 percent in farm products and foods, respectively, were the largest advances shown for major groups of commodities from December 1944 to December 1945. Most agricultural commodities shared in the rise over the year, with the largest advances in fresh fruits and vegetables and grains. A fractional decline during the early months in foods and sharp decreases during the summer months for farm products and foods were offset during the last quarter, when farm products advanced 5.8 percent and foods 3.5 percent. The declines were due chiefly to seasonal decreases in prices of eggs, to improved supplies of livestock, and to greater-than-seasonal price declines for certain fresh vegetables. Removal of distribution and slaughter controls followed VJ-day; a program of subsidy removal, including in most cases compensating ceiling-price increases, was begun with butter and peanut butter on November 1. Price control over white potatoes and citrus fruits was suspended September 14 and November 19, respectively (controls on citrus fruits were re-established in January 1946). At the year's end farm products prices were at a level 4.6 percent above prices in May 1943 and 115.6 percent above August 1939. Food prices were 1.7 percent lower than in May 1943 and 61.6 percent above prices prevailing at the outbreak of the war in Europe.

BUILDING MATERIALS

Primary market prices of building materials advanced steadily during 1945, reaching a point in December 2.7 percent above late 1944 and 33.4 percent above August 1939 prices. Price increases reflected chiefly upward adjustments in OPA ceilings to improve profit margins and stimulate production, particularly of material needed for home construction. Brick and tile prices showed the largest increase, 10.8 percent—more than half as much in one year as in the 5 preceding years. Increases for other groups of building materials during the year ranged from 1.4 percent for paints and paint materials to 3.1 percent for cement. Revocation in October of WPB order L-41, on construction, led to further tightening of supplies of building materials and reportedly to reduced shipments of materials through normal distribution channels. This situation led to partial restoration of controls over building by the Civilian Production Administration in December.

TEXTILE PRODUCTS

Textile products advanced 1.9 percent during the year, largely influenced by a sharp rise in raw cotton prices, to the highest level in over 20 years—14 percent above December 1944. Advancing prices of cotton staple resulted in increased price ceilings for cotton yarns and many popular cotton fabrics during the last half

of 1945 under the provisions of the Bankhead amendment to the Stabilization Extension Act of 1944. Mill quotations for cotton goods reached a 25-year peak in the fourth quarter of 1945. Prices of hides and leather products rose 1.3 percent over the year, with increases for hides and skins and leather and slightly higher prices for shoes.

FUEL AND LIGHTING MATERIALS

Advances in prices for coal and coke were responsible for an increase of 2.0 percent in fuel and lighting materials. Utility rates, gasoline, and petroleum heating fuels, declined during the year. On May 1 an average increase of 16 cents per ton for bituminous coal was granted by OPA to cover the higher costs of new wage contracts, and on June 18 anthracite ceilings were raised 75 cents per ton to cover the higher labor costs of new wage contracts and restore profit margins. All anthracite and some bituminous coal price ceilings were raised again in December to assure producers minimum-profit margins. Higher prices of bituminous coal also necessitated upward adjustment of ceilings for coke. During 1945 anthracite prices reached the highest level in almost 20 years and bituminous coal prices the highest point in 22 years. Discontinuance of fuel rationing at the end of the summer, together with labor disputes and manpower shortages, caused shortages of coal and fuel oil. There were competitive price decreases for gasoline in the fourth quarter, as large stocks were accumulated.

METALS AND METAL PRODUCTS

An upward movement in prices of metals and metal products began in January and February with increases for 5 basic steel products and pig iron, and continued throughout 1945. In December, prices were at the highest level in 20 years—1.7 percent above December 1944 and 13.3 percent above August 1939. Additional ceiling increases ranging from \$2 to \$7 per ton were allowed in May for carbon-steel products. Short supplies of many metals and machines led to increased demands during the later months for upward revision in OPA ceilings in order to encourage production. Steel industry spokesmen claimed that price increases granted in January and May were not sufficient to insure volume production. The authorized increases, the first industry-wide advances since 1939, raised prices for iron and steel products about 4 percent during 1945. Manufacturers of construction machinery were granted an interim 5.0 percent ceiling increase by OPA pending a cost study of the industry in order not to retard production, but many manufacturers took only part of the allowed increases. The supplies of both pig iron and scrap were inadequate to meet demands. Ceiling prices of pig iron were advanced 75 cents per gross ton in October in addition to the \$1-per-ton increase granted in February.

Prices for major nonferrous metals remained stable as subsidy payments remained in effect. Prices for mercury varied, dropping to \$95.75 per flask in September with cancellation of

the Government's dry-cell battery program—the lowest monthly average since August 1939—and increasing to \$108.50 per flask at the end of the year with increased export demand.

CHEMICALS AND ALLIED PRODUCTS

Prices of chemical products rose 1.4 percent during 1945 and at the year's end were 0.4 percent less than the May 1942 war-time peak and 29.5 percent higher than in August 1939. Prices for oils and fats and mixed fertilizers remained generally unchanged throughout the year, while drugs and pharmaceuticals and chemicals rose 5.1 percent and 1.6 percent, respectively. Prices of drugs and pharmaceuticals in December were at the highest level since October 1942. Prices for glycerin, alcohol, ergot, nux vomica, chestnut and logwood extracts, and silver nitrate increased during the year. In October, price controls over both imported and domestic botanical drugs, emetine hydrochloride, and other fine chemicals were lifted and in November the price of emetine hydrochloride in the open market rose from \$21.00 to \$44.50 per ounce.

HOUSEFURNISHING GOODS

Primary market prices of housefurnishing goods rose fractionally during the year. There were increases for bed linen, cotton blankets, and furniture. Shortages in the supply of most items continued to be of major importance. At the end of the year, OPA granted ceiling increases to furniture manufacturers in order to encourage output of low- and medium-priced articles. These increases ranged from 5 to 25 percent for all-wood furniture and from 5 to 12 percent for upholstered furniture.

OTHER COMMODITIES

The fractional increase in the group index for miscellaneous commodities was due chiefly to an advance of 1.8 percent in prices for paper and pulp, which rose to the highest level since 1926. There were price increases during the year for boxboard, wood pulp, and newsprint.

Index Numbers, by Groups and Subgroups of Commodities— 1945, Year and Months, and Selected Years

Index numbers of wholesale prices by groups and subgroups of commodities are shown for each month and the year 1945 in table 1, and for selected years in table 2. The commodities included in the groups "raw material," "semimanufactured articles," and "manufactured products" are listed in Wholesale Prices, 1944 (Bull. No. 870).

TABLE 2.—Annual Index Numbers of Wholesale Prices by Groups and Subgroups of Commodities
[1926=100]

Group and subgroup	1945	1944	1943	1942	1941	1940	1939	1929
All commodities.....	105.8	104.0	103.1	98.8	87.3	78.6	77.1	95.3
Farm products.....	128.2	123.3	122.6	105.9	82.4	67.7	65.3	104.9
Grains.....	129.7	126.9	116.3	92.9	76.9	68.0	58.6	97.4
Livestock and poultry.....	132.5	124.6	128.7	117.8	91.6	69.2	72.2	106.1
Other farm products.....	124.3	120.7	119.8	101.6	77.8	66.1	62.6	106.6
Foods.....	106.2	104.9	106.6	99.6	82.7	71.3	70.4	99.9
Dairy products.....	111.1	110.5	111.1	100.0	87.3	77.6	69.5	105.6
Cereal products.....	95.2	94.8	93.7	89.2	80.7	78.3	74.8	88.0
Fruits and vegetables.....	122.8	121.3	121.3	95.5	67.5	63.1	62.0	97.8
Meats.....	107.8	106.1	110.3	111.8	90.4	73.3	77.2	109.1
Other foods.....	96.6	95.0	97.3	92.3	78.9	63.5	64.1	93.9
Hides and leather products.....	118.1	116.7	117.5	117.7	108.3	100.8	95.6	109.1
Shoes.....	126.4	126.3	126.4	125.7	113.5	107.6	102.6	106.3
Hides and skins.....	117.0	109.9	114.7	117.6	108.4	91.9	84.6	112.7
Leather.....	102.2	101.3	101.3	101.3	97.9	92.5	87.5	113.2
Other leather products.....	115.2	115.2	115.2	114.9	104.7	99.9	97.1	106.4
Textile products.....	100.1	98.4	97.4	96.9	84.8	73.8	69.7	90.4
Clothing.....	107.4	107.1	107.0	106.9	92.6	85.2	82.0	90.0
Cotton goods.....	121.4	115.7	112.7	112.4	94.2	71.4	67.2	98.8
Hosiery and underwear.....	71.7	70.9	70.8	70.5	63.1	62.3	61.4	88.5
Silk.....	(1)	(1)	(1)	(1)	(1)	46.8	46.1	82.7
Rayon.....	30.2	30.2	30.3	30.3	29.7	29.5	28.8	68.4
Woolen and worsted goods.....	112.7	112.7	112.5	110.4	96.6	85.7	79.8	88.3
Other textile products.....	101.1	100.6	98.8	97.9	90.7	74.5	69.2	93.1
Fuel and lighting materials.....	84.0	83.0	80.8	78.5	76.2	71.7	73.1	83.0
Anthracite.....	99.0	95.6	90.4	85.5	82.7	78.9	75.8	90.1
Bituminous coal.....	123.1	120.3	116.1	109.7	104.3	97.6	97.5	91.3
Coke.....	132.5	130.3	122.7	122.1	119.3	110.2	105.6	84.6
Electricity.....	62.3	59.6	59.5	63.8	68.3	74.5	78.6	94.5
Gas.....	77.9	77.2	76.5	78.4	78.6	82.0	84.1	93.1
Petroleum products.....	63.5	63.9	62.5	59.8	57.0	50.0	52.2	71.3
Metals and metal products.....	104.7	103.8	103.8	103.8	99.4	95.8	94.4	100.5
Agricultural implements.....	97.8	97.3	96.9	96.9	93.5	92.5	93.4	98.7
Farm machinery.....	98.8	98.4	98.0	98.0	94.5	93.7	94.6	98.0
Iron and steel.....	99.2	97.2	97.2	97.2	96.4	95.1	95.8	94.9
Motor vehicles.....	112.8	112.8	112.8	112.7	103.3	96.7	93.4	100.0
Nonferrous metals.....	85.8	85.8	86.0	85.7	84.4	81.3	78.0	106.1
Plumbing and heating.....	93.4	92.2	90.7	95.4	84.8	80.4	79.2	95.0
Building materials.....	117.8	115.5	111.4	110.2	103.2	94.8	90.5	95.4
Brick and tile.....	112.4	101.7	99.1	98.0	93.7	90.5	91.4	94.3
Cement.....	99.4	95.8	93.8	94.0	92.0	90.8	91.3	89.0
Lumber.....	155.1	² 153.3	² 141.4	133.0	122.5	102.9	93.2	93.8
Paint and paint materials.....	106.9	105.2	102.3	100.3	91.4	85.7	82.8	94.9
Plumbing and heating.....	93.4	92.2	90.7	95.4	84.8	80.4	79.2	95.0
Structural steel.....	107.3	107.3	107.3	107.3	107.3	107.3	107.3	98.1
Other building materials.....	104.4	103.1	102.0	103.5	98.3	93.3	90.3	97.7
Chemicals and allied products.....	95.2	² 95.2	² 94.9	² 95.5	² 84.4	77.0	76.0	94.0
Chemicals.....	96.1	96.1	96.5	96.2	87.2	85.1	84.7	99.7
Drugs and pharmaceuticals.....	109.0	² 108.8	² 106.2	² 116.0	² 102.6	88.9	78.2	66.8
Fertilizer materials.....	81.6	81.3	80.0	78.7	73.5	69.4	67.9	95.6
Mixed fertilizers.....	86.6	86.4	86.1	82.7	76.0	73.8	73.0	95.2
Oils and fats.....	102.0	102.0	101.9	105.1	77.6	44.3	48.4	89.0
Housefurnishing goods.....	104.5	104.3	102.7	102.4	94.3	88.5	86.3	94.3
Furnishings.....	107.6	107.3	107.2	107.3	99.9	94.7	91.1	93.6
Furniture.....	101.5	101.4	98.1	97.4	88.4	81.8	81.3	95.0
Miscellaneous.....	94.7	93.6	92.2	89.7	82.0	77.3	74.8	82.6
Automobile tires and tubes.....	73.0	73.0	73.0	72.5	61.0	57.8	59.5	54.5
Cattle feed.....	159.6	159.6	152.7	134.4	104.2	87.8	83.3	121.6
Paper and pulp.....	108.8	107.1	104.1	100.8	98.2	91.7	82.4	88.9
Crude rubber.....	46.2	46.2	46.2	46.3	46.1	41.5	37.2	42.3
Other miscellaneous.....	98.9	97.0	95.8	93.4	87.8	84.1	82.6	98.4
Raw materials.....	116.8	113.2	112.1	100.6	83.5	71.9	70.2	97.5
Semimanufactured articles.....	95.9	94.1	92.9	92.6	86.9	79.1	77.0	93.9
Manufactured products.....	101.8	100.8	100.1	98.6	89.1	81.6	80.4	94.5
All commodities other than farm products.....	100.8	99.6	98.7	97.0	88.3	80.8	79.5	93.3
All commodities other than farm products and foods.....	99.7	98.5	96.9	95.5	89.0	83.0	81.3	91.6

¹ Data not available.
² Revised.

Weekly Fluctuations

Table 3 shows weekly indexes of wholesale prices by groups of commodities during 1945. These indexes are computed from 1-day-a-week prices to show week-to-week fluctuations. They are not directly comparable with the monthly wholesale price indexes given in tables 1 and 2.

TABLE 3.—*Weekly Index Numbers of Wholesale Commodity Prices, by Groups*

[1926=100]

Week ending—	All commodities	Farm products	Foods	Hides and leather	Textile products	Fuel and lighting	Metals and metal products	Building materials
<i>1945</i>								
Jan. 6	104.6	125.9	104.6	117.9	99.0	83.6	103.9	116.4
13	104.7	126.3	104.7	117.9	99.0	83.9	104.0	116.4

Daily Index of 28 Basic Commodities

Daily indexes of 28 basic commodities are presented in table 4. Most of these commodities are quoted on organized exchanges, and the index is, therefore, more sensitive to changes in market conditions than is the Bureau's comprehensive wholesale price index. The indexes are calculated for the 28 commodities combined and for 5 important subgroups. They are based on the August 1939 average as 100, and are unweighted geometric means of the individual daily price quotations.

The 28 commodities included in the index are described below. A list of the commodities included in each subgroup was given in Wholesale Prices, July-December and Year 1943 (Bull. No. 785).

LIST OF 28 BASIC COMMODITIES

Wheat, average, per bushel:
 No. 2 hard winter, Kansas City.
 No. 2 dark northern spring, Minneapolis.
Flaxseed, No. 1, per bushel, Minneapolis.
Barley, good, malting, per bushel, Minneapolis.
Corn, No. 3 yellow, per bushel, Chicago.
Butter, extra, 92 score, per pound, Chicago.
Tallow, packers' prime, per pound, Chicago.
Hogs, good to choice, 200-220 pounds, per 100 pounds, Chicago.
Steers, good, 900-1,100 pounds, per 100 pounds, Chicago.
Lard, prime steam, per pound, Chicago.
Sugar, raw, 96°, duty paid, per pound, New York.
Coffee, Santos, No. 4, per pound, New York.
Cocoa beans, Accra, per pound, New York.
Shellac, T. N., per pound, New York.
Rubber, plantation, ribbed, s.s., per pound, New York.
Hides, cow, light native packers', per pound, Chicago.
Rosin, "H" grade, per 100 pounds, Savannah.
Cottonseed oil, prime summer bleachable, per pound, New York.
Print cloth, 38½-inch, 64 x 60, 5.35 yards to pound, per yard, New York.
Silk, raw, Japan, 13-15 denier, 78 seriplane, per pound, New York.
Wool tops, spot market, per pound, New York.
Burlap, 10½-ounce, 40-inch, per yard, New York.
Cotton, middling, 15/16-inch staple, per pound, average 10 spot markets.
Steel scrap, heavy melting, per ton:
 Chicago.
 Philadelphia.
Tin, straits, pig, per pound, New York.
Copper, electrolytic, ingot, per pound, New York.
Lead, desilverized, pig, open market, per pound, New York.
Zinc, prime western, pig, per pound, New York.

The indexes are available each weekday, except Saturday, at 6 p.m., by telephone, EXecutive 2420, Extension 451, or by collect telegram. A press statement giving figures for the preceding week is issued each Monday. The following table gives the indexes, by groups, from January 1 to December 31, 1945.

Strategic and Critical Materials—Indexes of Market Prices

During the war period the Bureau prepared, for the use of defense and war agencies of the Government, indexes of market prices of materials classified by the Army-Navy Munitions Board as strategic or critical for national defense. With the end of the war these indexes were discontinued. Weekly index numbers from January 6 to September 1, 1945, are shown in table 5. A mimeographed statement is available upon request giving the history of these indexes, a list of the commodities included, and weekly index numbers from August 1939 through August 1945.

TABLE 5.—Weekly Index Numbers of Market Prices of Strategic and Critical Materials

Waste and Scrap Materials—Indexes of Market Prices

Index numbers showing changes in market prices for waste and scrap materials, by groups of commodities, from January 6 through December 29, 1945, are presented in table 6. A list of the 44 waste and scrap materials included in the index, together with the weekly indexes back to January 1939, was published in Wholesale Prices, October 1941 (Serial No. R. 1407).

TABLE 6.—Index Numbers of Market Prices of Waste and Scrap Materials
[August 1939=100]

Week ending	All waste and scrap materials	Scrap metals			Waste textiles					Waste paper	Scrap rubber
		Iron and steel	Non-ferrous metals	All metals	Cotton	Wool	Rayon and silk	Old burlap and cordage	All textiles

Standard Machine Tools—Price Indexes

Index numbers of prices of 11 types of standard nonspecialty machine tools from January through December 1945 are shown in table 7. Comparable data back to January 1937 have been given in previous wholesale price pamphlets, beginning with Wholesale Prices, June 1941 (Serial No. R. 1349).

Construction Machinery—Indexes of Manufacturers' Prices

Table 8 gives monthly index numbers of manufacturers' prices of construction machinery from January through December 1945, by groups of commodities. A description of the 60 types of construction machinery included in the index, together with monthly indexes back to August 1939, is given in Wholesale Prices, 1944 (Bull. No. 870).

² Revised.

General and Auxiliary Machinery and Equipment— Indexes of Manufacturers' Prices

In April 1945, the Bureau began publication of a special index of prices of general and auxiliary machinery and equipment. This index was developed in response to requests from government agencies and industrial organizations for information on prices of general industrial equipment.

The index is based on prices of about 180 different types and sizes of machines, obtained from approximately 200 manufacturers located in the major producing areas of the country. In selecting the types of machines to be priced, the Bureau had the cooperation and advice of industry representatives. These various types of machines and equipment are used extensively in a number of different applications throughout industry. Normally production of this type of equipment represents about 25 percent of total machinery output.

The index is computed by the fixed-base weighted aggregative method, with prices in August 1939 as 100. The weights used are based on production for sale during the year 1939.

Table 9 shows monthly index numbers by groups and subgroups of commodities from January 1939 through December 1945.

Wholesale Prices, Index Numbers, and Relative Importance of Individual Commodities

Table 10 gives monthly and annual wholesale prices and index numbers during 1945 for approximately 900 individual commodities, and the average relative importance during 1945 for each of the commodities included in the Bureau's comprehensive wholesale price index.

The prices and index numbers shown in this table represent "net" prices after the deduction of applicable discounts. The figures giving relative importance show the percentage that the aggregate value of each commodity was of the aggregate value of all commodities included in the comprehensive wholesale price index in 1945. The aggregate value for each commodity is the product of the average price during 1945 and the quantity weighting factor used for that commodity. In general the quantity weighting factor reflects commercial sales during the years 1929-31.
