* NOTE - Occupational earnings reports are available upon request for the following additional industries: auto repair shops (June 1951), ferrous foundries (June 1951), and power laundries (May 1951).

Introduction 1/

The Seattle Metropolitan Area

The Seattle area is one of 40 major labor markets in which the Bureau of Labor Statistics plans to conduct occupational wage surveys during the September 1951 - April 1952 period. Occupations that are common to a variety of manufacturing and nonmanufacturing industries were studied on a community-wide basis. Cross-industry methods of sampling were thus utilized in compiling earnings data for the following types of occupations: (a) office; (b) professional and technical; (c) maintenance and power plant; (d) custodial, warehousing, and shipping. In presenting earnings information for such jobs (tables A-1 through A-4) separate data have been provided wherever possible for individual broad industry divisions.

Occupations that are characteristic of particular, important, local industries have been studied on an industry basis, within the framework of the community survey. 2/ Earnings data for these jobs have been presented in Series B tables. Union scales (Series C tables) are presented in lieu of (or supplementing) occupational earnings for several industries or trades in which the great majority of the workers are employed under terms of collective bargaining agreements, and the contract or minimum rates are indicative of prevailing pay practices.

Data have also been collected and summarized on shift operations and differentials, hours of work, and supplementary benefits such as vacation and sick leave allowances, paid holidays, nonproduction bonuses, and insurance and pension plans.

1/ Prepared in the Bureau's regional office in San Francisco, California, by John L. Dana, Regional Wage and Industrial Relations Analyst. The planning and central direction of the program was carried on in the Branch of Community Wage Studies of the Bureau's Division of Wages and Industrial Relations in Washington, D. C.

2/ See appendix for discussion of scope and method of survey.

The population of the Seattle Metropolitan Area (King County) was estimated at 740,000 in 1951. About two-thirds of the population lived in Seattle.

Wage and salary workers in the area in September 1951 (excluding those in agricultural pursuits) numbered 272,000; and one of every 10 of these was employed in the manufacture of aircraft. Other manufacturing industries accounted for 36,000, mainly in food processing (9,000), fabricated metals (8,000), and logging and lumber products (7,700).

As a leading West Coast port city, however, economic activities in Seattle are largely based on commerce. The city is the hub of a trading area that extends inland throughout most of the Northwest United States and Western Canada, and seaward to Alaska and the farflung lands of the Pacific. In late 1951, wholesale and retail trade establishments provided employment for 68,000. Financial institutions including insurance carriers and real estate operators had 15,000 workers, and another 32,000 were employed in the service industries.

The combined employment of the communication, public utilities, and transportation industries, including railroads, was 29,000. In the construction industry, there were 15,000 workers, and in government--Federal, State, and local--38,000 were employed, with a large majority of these at the huge Puget Sound Naval Yard at nearby Bremerton.

Long known as an area characterized by the predominance of union labor, it is not surprising that Seattle had few nonunion plant workers in September 1951. Among the industry- and establishment-size groups surveyed, 97 of every 100 workers in nonoffice jobs were employed in establishments having written agreements with labor organizations. Collective bargaining is largely of the multi-employer, industry-wide, master-agreement type. Notable examples of labor-management relations on this scale are in food processing, lumbering and metalworking in manufacturing; and in retail trade and the maritime industry in nonmanufacturing.

Among office workers, the ratio employed under union contract provisions was 1 in every 4. Although this proportion is considerably less than that for unionized plant workers, it is relatively high for office workers generally. In retail trade, three-quarters of the office workers were employed under terms of collective bargaining agreements, and in the public utilities group, two-thirds were in unionized offices.

Occupational Wage Structure

Wages and salaries for nearly all office and plant workers were formally adjusted upward between January 1950 and September 1951. General increases in the 6-month period immediately preceding hostilities in Korea affected few workers, but subsequent revisions were widespread. In general, the pattern of adjustments was in keeping with the allowable limits prescribed by the Wage Stabilization Board, particularly during the period beginning with the January 26, 1951, wage "freeze."

Formalized rate structures were established for almost all Seattle plant workers. For about three-quarters of the workers, these structures set forth a single rate for each occupational classification. Among office workers, on the other hand, nearly one-half were employed in establishments that determined salaries on an individual basis. For other office workers, plans providing a range of rates for each job classification clearly were in the majority.

Seattle is generally recognized as an area with relatively high wage scales. In September 1951, the average hourly

earnings for production workers in all manufacturing industries was \$1.87.^{3/} High level pay is further indicated in established minimum entrance rates for plant workers with no previous work experience. Such minima were a part of formalized rate structures in all but a negligible number of Seattle firms. Fully 80 percent of the workers were employed in establishments having minima of \$1 an hour or more; more than half were in establishments which paid \$1.25 an hour or more. Highest minimum entrance rates were found in manufacturing industries and lowest in the service industry group.

Wages and salaries of workers in manufacturing industries were generally higher than those of workers in nonmanufacturing. In 23 of 25 office job classifications permitting comparison, salaries of workers in manufacturing plants averaged \$1 to \$10.50 more a week. Average hourly earnings for plant jobs studied in all industries were higher in manufacturing for 16 of 21 job categories for which comparisons were possible.

About a fourth of the workers in Seattle area manufacturing plants were employed on late shifts in September 1951. Almost all of these workers were paid shift premiums--typically a cents-per-hour differential over dayshift rates. The amount most commonly reported was 10 cents for both second- and third-shift work.

More than 85 percent of women office workers and a like proportion of plant workers in Seattle were scheduled to work a 40-hour week in September 1951. Chief variants from this schedule were found in the service industries where the 37½-hour week was established for a third of the women office workers.

^{3/} This earnings figure which was derived from the Bureau's employment and payrolls program includes premium pay for overtime and night work.

A: Cross-Industry Occupations

Table A-1: Office Occupations

(Average straight-time weekly hours and earnings 1/ for selected occupations studied on an area basis in Seattle, Wash., by industry division, September 1951)

^{1/} The study covered insurance carriers (Group 63) as defined in the Standard Industrial Classification Manual (1949 edition) prepared by the Bureau of the Budget, with more than 20 employees.

^{2/} Hours reflect the workweek for which employees receive their regular straight-time salaries and the earnings correspond to these weekly hours.

Occupational Wage Survey, Seattle, Wash., September 1951
U.S. DEPARTMENT OF LABOR
Bureau of Labor Statistics

C: Union Wage Scales

13.

(Minimum wage rates and maximum straight-time hours per week agreed upon through collective bargaining between employers and trade unions. Rates and hours are those in effect on dates indicated.)

Table C-15: *Building Construction*
January 1, 1952

Classification	Rate per hour	Hours per week
Bricklayers	\$3.300	40
Carpenters	2.420	40
Electricians (inside wiremen) and fixturs hangers	2.650	40
Painters	2.370	40
Plasterers	3.000	40
Plumbers	2.750	40
Building laborers	1.970	40

Table C-205: *Bakeries*
July 1, 1951

Classification	Rate per hour	Hours per week
Bread - hand and machine shops:		
Foremen	\$2.195	35
Mixers, ovenmen, machinemn	2.070	35
Bench hands	1.995	35
Helpers:		
1 year's experience	1.690	35
2 years' experience	1.810	35
Bread and cake - machine shops:		
Men-in-charge of miscellaneous	1.310	40
Miscellaneous help:		
1 to 6 months	1.110	40
7 to 12 months	1.160	40
After 1 year	1.250	40
Women employees:		
Floor ladies	1.230	40
Assistant floor ladies	1.180	40
Machine operators, experienced	1.170	40
General workers:		
1 to 6 months	0.910	40
7 to 12 months	0.960	40
After 1 year	1.050	40
Crackers and cookies:		
First mixers, machinemn	1.660	40
Second mixers, peelers	1.530	40
First ovenmen	1.510	40
Second ovenmen	1.460	40
Scalers, wrappers	1.410	40
Pan cleaners, feeders, other helpers:		
First 30 days	1.050	40
Second 30 days	1.150	40
Thereafter	1.280	40
Women workers:		
Experienced sponge packers	1.030	40
Hand bundlers	1.030	40
Plain sweet packers	0.980	40

Table C-282: *Malt Liquors*
October 1, 1951

Classification	Rate per week	Hours per week
Brewery department:		
Brewers	\$77.50	40
Loaders	74.50	40

Operating Employees
October 1, 1951

Classification	Rate per hour	Hours per week
1-man busses:		
First 6 months	\$1.705	-
After 6 months	1.760	-

Table C-42: *Motortruck Drivers and Helpers*
July 1, 1951

Classification	Rate per hour	Hours per week
Armored car	\$1.605	40
Baggage	1.708	48
Beer	1.988	40
Helpers	1.913	40
Building:		
Construction:		
Pickup truck	2.000	40
Dump truck:		
6 yards or less	2.100	40
7-12 yards	2.300	40
13-20 yards	2.400	40
Over 20 yards	2.550	40
Dumpster, Euclids	2.300	40
Bull lift operator	1.950	40
Material:		
Sand, gravel, and concrete hauling:		
Factory rated 3-yard truck mixer	2.100	40
Flat or warehouse truck	1.950	40
Food distribution - retail	2.013	40
Freight:		
Under 125 miles:		
Under 4 tons	1.645	48
4-6 tons	1.676	48
6-8 tons	1.708	48
Over 8 tons	1.739	48
Trailer or semi-trailer	1.770	48
Over 125 miles:		
Under 4 tons	1.676	48
4-6 tons	1.708	48
6-8 tons	1.739	48
8-10 tons	1.782	48
Over 10 tons	1.833	48
Trailer or semi-trailer	1.895	48
Local pickup delivery	1.645	48
Parcel delivery	1.700	40
Private carrier:		
Under 20,000 pounds	1.850	40
Over 20,000 pounds	1.900	40
Helpers	1.775	40
Fuel, solid, retail:		
1-5 tons	1.744	48
General:		
Drayage for hire:		
Furniture	1.708	48
Helpers	1.645	48
Up to and including 2½ tons	1.645	48
2½-4 tons	1.676	48
4-5 tons	1.708	48
Over 5 tons to semi-trucks	1.739	48
Helpers	1.583	48
Part-time helpers	1.695	48
Grocery - retail:		
After 1 year	1.625	40
Ice:		
Retail	1.600	48
Wholesale	1.635	40
Ice cream	1.900	40
Meat - packing house:		
5-7 tons, 6 wheels	1.900	40
Milk:		
Regular drivers	1.906	43 2/3
Relief drivers	2.064	43 2/3
Other dairy products	2.013	40
Oil - fuel	1.868	48
Bulk petroleum - intracity	1.770	48
Soft drink - retail	2.000	40
Tobacco - retail	2.013	40

Class B vessels	284.15	44

1/ All ratings receive \$7.50 per month clothing allowance which is included in the basic rates shown. All ratings of unlicensed departments also receive additional payment in accordance with conditions as follows:

- On vessels carrying explosives in 50-ton lots or over, 10 percent of basic monthly wages is added while such cargo is aboard, or is being loaded or unloaded.
- On vessels carrying sulphur in amount of 25 percent or more of dead weight carrying capacity, \$10 per voyage is added.
- On vessels operated in described areas of China coastal waters, 75 percent or 100 percent of daily basic wages, including allowances in lieu of overtime for Sunday day men, is added according to degree of proximity to the China coast and adjacent areas rendered unsafe by hostilities.

2/ The maximum straight-time hours which may be worked per week at sea. The maximum straight-time hours which may be worked per week in port are 40 for both day men and watchmen. At sea, the basic workweek for deck department watchmen is 56 hours with 8 hours being paid at the overtime rate. At sea, the basic workweek for deck department day men, engineroom day men and engineroom watchmen is 56 hours, with 12 hours being paid at the overtime rate.

3/ The maximum straight-time hours which may be worked per week both at sea and in port. At sea, the normal workweek for members of the steward's department is 56 hours with 12 hours being paid at the overtime rate.

Table C-44b: *Stevedoring*
October 1, 1951

Classification	Rate per hour	Hours per week
Longshoremen:		
General cargo	\$1.970	30
Miscellaneous penalty commodities	2.070	30
Paper and pulp in packages of 300 lbs. or more	2.070	30
Shoveling jobs	2.170	30
Phosphate rock in bulk	2.270	30
Boardmen stowing bulk grain	2.270	30
Bulk sulphur, soda ash, and crude untreated potash	2.420	30
Untreated or offensive bones in bulk	2.770	30
Damaged cargo	2.820	30
When fire is burning or cargo is smouldering in a hatch	3.170	30
Explosives	3.940	30
Burton men	2.070	30
Donkey drivers	2.070	30
Winch drivers	2.070	30
Hatch tenders	2.070	30
Sack turners	2.070	30
Side runners	2.070	30
Boom men	2.070	30
Blade truckers	2.070	30
Stowing-machine drivers	2.070	30
Combination lift-truck-jitney drivers	2.070	30
Lift-jitney drivers	2.070	30

Table C-541: *Grocery Stores
and Meat Markets*
October 1, 1951

Classification	Rate per week	Hours per week
Grocery and vegetable departments:		
Clerks:		
Under 3 months	\$43.50	40
3 to 6 months	48.50	40
6 to 9 months	54.90	40
9 to 12 months	58.90	40
Journeyman or demonstrators	65.00	40
Bakery departments:		
Clerks, male:		
Under 4 months	39.50	40
4 to 8 months	44.50	40
8 to 12 months	46.50	40
Journeyman	51.50	40
Head salespersons or demonstrators	54.50	40
Clerks, female:		
Under 4 months	38.50	40
4 to 8 months	40.50	40
8 to 12 months	42.50	40
Journeyman	45.50	40
Head salespersons or demonstrators	51.50	40
Meat department:		
Managers	88.50	40
Foremen	88.50	40
Head blockmen	88.50	40
Journeyman	81.00	40

Table C-541: *Grocery Stores and
Meat Markets - Continued*

Occupational Wage Survey, Seattle, Wash., September 1951
U.S. DEPARTMENT OF LABOR
Bureau of Labor Statistics

Appendix – Scope and Method of Survey

With the exception of the union scale of rates, information presented in this bulletin was collected by visits of field representatives of the Bureau to representative establishments in the area surveyed. In classifying workers by occupation, uniform job descriptions were used; these are available upon request.

Six broad industry divisions were covered in compiling earnings data for the following types of occupations: (a) office clerical, (b) professional and technical, (c) maintenance and power plant, and (d) custodial, warehousing, and shipping (tables A-1 through A-4). The covered industry groupings are: manufacturing; transportation (except railroads), communication, and other public utilities; wholesale trade; retail trade; finance, insurance, and real estate; and services. Information on work schedules and supplementary benefits also was obtained in a representative group of establishments in each of these industry divisions. As indicated in the following table only establishments above a certain size were studied. Smaller establishments were omitted because they furnished insufficient employment in the occupations studied to warrant their inclusion in the study.

Among the industries in which characteristic jobs were studied, minimum size of establishment and extent of the area covered were determined separately for each industry (see following table). Although size limits frequently varied from those established for surveying cross-industry office and plant jobs, data for these jobs were included only for firms meeting the size requirements of the broad industry divisions.

A greater proportion of large than of small establishments was studied in order to maximize the number of workers surveyed with available resources. Each group of establishments

of a certain size, however, was given its proper weight in the combination of data by industry and occupation.

The earnings information excludes premium pay for overtime and night work. Nonproduction bonuses are also excluded, but cost-of-living bonuses and incentive earnings, including commissions for salespersons, are included. Where weekly hours are reported as for office clerical, they refer to the work schedules (rounded to the nearest half-hour) for which the straight-time salaries are paid; average weekly earnings for these occupations have been rounded to the nearest 50 cents. The number of workers presented refers to the estimated total employment in all establishments within the scope of the study and not to the number actually surveyed. Data are shown for only full-time workers, i.e., those hired to work the establishment's full-time schedule for the given occupational classification.

Information on wage practices refers to all office and plant workers as specified in the individual tables. It is presented in terms of the proportion of all workers employed in offices (or plant departments) that observe the practice in question, except in the section relating to women office workers of the table summarizing scheduled weekly hours. Because of eligibility requirements, the proportion actually receiving the specific benefits may be smaller. The summary of vacation and sick leave plans is limited to formal arrangements. It excludes informal plans whereby time off with pay is granted at the discretion of the employer or other supervisor. Sick leave plans are further limited to those providing full pay for at least some amount of time off without any provision for a waiting period preceding the payment of benefits. These plans also exclude health insurance even though it is paid for by employers. Health insurance is included, however, under tabulation for insurance and pension plans.
