Preface

From time to time, the Bureau of Labor Statistics has issued selected lists of its publications. The listing in this volume, however, represents the only complete record of bulletins published by the Bureau. The first section of this volume covers the period from the date of the Bureau's organization (as the Bureau of Labor in the Department of the Interior in January 1885) to December 31, 1959. It lists the titles of the bulletins in numerical order and also shows the date of publication (in parentheses).

The second section of this publication indexes all bulletins published since 1915 (Nos. 175 through 1263) alphabetically by subject and provides cross-references. A subject index of Bulletins 1 through 173 was provided in Bulletin 174 (1915). Selected bulletins are annotated in the numerical listing and such annotated publications are indicated in the subject index by asterisks. Annotations are provided for those bulletins which report on comprehensive investigations of subject matter, covering major industries and broad geographical areas; provide basic information on various phases of the Bureau's program and explain its survey techniques; present the latest data from the Bureau's leading historical series; or analyze major economic and labor developments. The report series of the Bureau is not included either in the numerical listing or in the subject index, nor are special or periodical publications.

Supplies of all bulletins numbered from 1 to 949 inclusive are exhausted, as are a considerable number of later bulletins. These publications can, however, be consulted at most large public libraries, as well as in most university and college libraries. The depository libraries, by State, which now receive the publications of the Bureau are listed in an appendix. In foreign countries, libraries of national and State labor and statistical offices and many universities receive the bulletins of the Bureau.

Prices are given for bulletins which are still in print. Such publications may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington 25, D.C., or from any of the regional offices of the Bureau of Labor Statistics.

The numerical listing and index were prepared in the Office of Publications of the Bureau of Labor Statistics by M. Frances Marshall and Gladys B. Wash. Miss Marshall was largely responsible for the preparation of the subject classifications of the bulletins, Mrs. Wash for the numerical listing. The work was planned and to a large extent supervised by Bernard Yabroff.

A study of the early extension of national and international trade union activities beyond their traditional interests in improving wages, hours, and working conditions into such broader areas as general employee welfare, housing for union members, union business enterprises and investments, and economic and industrial problems. Included among the employee welfare activities discussed are the provisions made by labor organizations for unemployment, disability, and death benefits; care of the aged; health services; and recreational activities. Efforts by unions to prevent and to relieve the effects of unemployment, union-management cooperation in industrial matters of mutual concern, and economic and statistical research are also examined as expressions of unions' expanded interests.

- 600 Union Scales of Wages and Hours of Labor, May 15, 1933 (1934).
Presents data on union scales of wages and hours in 72 trades in 67 important industrial cities. Between 1912 and 1933, the Bureau published results of its surveys of organized trades each year, with data back to 1907. The first such bulletin was published in 1913. Some data have appeared in the Monthly Labor Review and in Serial reprints, rather than in bulletin form. Data on 5 selected trades only were published annually, between 1933 and 1952; data on 4 trades only, since 1953.
For annotations on union scales in these latter 4 selected trades, see Bulls. 1244 (local-transit), 1245 (building), 1246 (motortruck drivers and helpers), and 1247 (printing), this listing.

Summary of the findings of the Bureau's nationwide study of money disbursements of wage

- and clerical workers in 1934-36. The survey provided a general picture concerning the plane of living available in this period to moderate-income urban families in 42 cities with populations exceeding 50,000, as reflected by sources of their incomes, kinds of goods and services they bought within a 12-month consecutive period, and kinds of dwellings they occupied. Detailed data from the 1934-36 study, by region, and by city were presented in other bulletins. See Bulls. 636, 637, 639, 640, 641-649, and 691 this listing. Appendixes provide a comprehensive description of the survey methodology.

Revision of Bull. 276.
Makes available to administrators of State workmen's compensation laws suggested methods for preparing adequate statistical reports required to be submitted in cases of industrial injuries. The material is organized around 3 focal points: (1) Facts concerning the efficiency of administration, e.g., volume, type, and disposition of cases handled, processing time, and difficulties which cause operating delays; (2) practical functioning of medical and benefit provisions of the law, i.e., how the law affects the injured workers; and (3) the incidence and causes of accidents. Suggestions are given on the type of statistical tables to be developed, the codes to be used for this purpose and useful means of classifying accident-cause data.

Discusses the development and extent in Europe of various types of cooperatives—consumers', workers' productive and labor associations, credit associations, housing associations, agricultural associations, etc.—and their potential role in post-World War II reconstruction.
Part I provides a comparative analysis of the cooperative movement in European countries, including the types of cooperatives, extent of development, the importance of cooperatives in the national economy and the development of international cooperative organizations. Part II deals

- with the formation, growth, and activities of the cooperative movement in individual countries. It provides in most cases some historical background showing how the economic events of the time, as well as changes in governments and national boundaries, affected the cooperative movement and helped to speed or retard its development or alter its direction.

- 898 Labor in the South (1947).
An analysis of selected basic factors affecting labor in Southern States. Key population, migration, and labor force characteristics and the rise of industry in the South are examined to provide a broad base for understanding the position of labor in the region. Income trends and levels, wage levels and wage differentials, and changes in consumer prices are analyzed to provide insight into the relative economic position of the southern industrial worker and of other segments of the southern population. Efforts by southern workers to improve their economic position are traced in the development of the trade union and consumers' cooperative movements in the South. In addition, the study appraises the impact of the Fair Labor Standards Act on southern industries and workers, describes the operation of the old-age and survivors insurance and unemployment insurance programs of the Social Security Act, and presents principal provisions of protective labor legislation enacted in Southern States.

The analysis, which was designed to supplement the description of guaranteed wage plans in Bull. 906, was prepared as a supplement to the Guaranteed Wage Study Staff's Final Report to the Advisory Board of the Office of War Mobilization and Reconversion. Comments on the analysis by other eminent economists are included also. See also Bulls. 544, 906, and 925 this listing.
- 908 Union-Security Provisions in Collective Bargaining (1947).
This bulletin, and those that follow (908-2 to 908-19, incl.), reproduce a variety of sample union-management agreement provisions, each stressing a major area or significant problem in collective bargaining, e.g., union security; apprentices and learners; seniority; guaranteed employment and wage plans; grievance and arbitration provisions, etc. Bull. 908-17 includes texts of selected health, welfare, and pension plans in addition to sample clauses concerning these subjects. This group of bulletins (908 to 908-19) constitutes a revision of Bull. 686 which also included a brief description of procedural and structural arrangements for collective bargaining and a reproduction of 15 sample agreements.

- 1016 Handbook of Labor Statistics, 1950 ed. (1951) \$1.25; and 1951 supp. (1953). 50¢.
Earlier editions in this series were: Bulls. 439 (1924-26), 491 (1929), 541 (1931), 616 (1936), 694 (1941), and 916 (1947).
Prior to the 1947 edition, the Handbooks consisted of digests of the Bureau of Labor Statistics bulletins and Monthly Labor Review articles considered to be of current and permanent interest. Beginning with the 1947 edition, the form of the Handbook was changed to serve exclusively as a basic statistical source book providing continuing measures of economic activity and changes in the position of labor. Coverage is limited to major BLS statistical series and selected labor and related economic series compiled by other Federal agencies. Brief and generally nontechnical explanations of each series are also provided. The 1950 Handbook and the 1951 supplement contain the following statistical

series: Employment, Unemployment and Payrolls; Labor Turn-Over; Earnings, Hours and Wage Rates; Prices and Cost of Living; Industrial Relations; Output per Man-Hour; Work Injuries; Building and Construction; Housing and Rents; Social Security and Related Programs; Consumers' Cooperatives; and Production, Income, and Expenditures.

- 1026 Elements of Soviet Labor Law (1951). 15¢.
A significant contribution to critical analysis of the Soviet economy, relating to the period between 1920 and 1951. Through textual use of laws, decrees, and official pronouncements, this study (1) demonstrates the punitive character of Soviet labor law as it applied to the Soviet equivalent of "free" labor, and (2) describes the creation of conditions for industrial conflict through pressures on management and workers, the deterioration of the trade unions, and the collapse of collective bargaining. It also includes

an account of Soviet labor policies that (1) have caused loss of freedom on the job; (2) subjected the determination of wages and hours of work to severe government restriction; (3) provided for financial responsibility of workers for damages to the employer caused by the workers, and (4) established conscript labor of youth.

- 1046 Productivity Trends in Selected Industries, Indexes Through 1950 (1951).
Summarizes the statistics regularly presented in individual industry productivity reports issued

- regularly by the Bureau of Labor Statistics. (The individual reports contain analyses of the factors causing changes in output per man-hour and unit man-hour requirements, as well as more detailed statistics and information on the methods used in computing these indexes.) In addition to current changes in productivity, historical trends covering the last decade are presented for most industries. Technical notes explaining the methods used in computing the indexes are included for each of the 35 industries and industry groups covered in this report. The report contains 95 series on output per worker and per man-hour, as well as many series on production, employment, man-hours, and labor requirements per unit of output.
- 1047 Construction. Annual Review, 1950 (1951). 40¢. Incorporates comprehensive listings of reference aids in the field of construction, viz: (1) articles describing methods of preparing the statistical series appearing in the Bureau's monthly publication, *Construction*; (2) feature articles in *Construction*, 1949-50; and (3) published sources of continuous historical data on construction, covering leading series compiled by the Bureau of Labor Statistics and the Bureau of Apprenticeship.
- 1048 Employment Outlook in Accounting (1952). 20¢.
- 1049 Consumers' Cooperatives: Operations in 1950 (1952). 20¢.
A report on membership, business, and operating results of consumer cooperatives in 1950, by the various types of cooperatives. Earlier bulletins in this series (313, 437, 531, 612, 659, 725, 757, 796, 843, 890, 922, 948, 971, and 1013) contain similar information.
The information presented includes estimates of membership and business of the consumer cooperatives by type of association, local and federated (e.g., local retail-distributive associations; service associations, including medical-care, housing and cold-storage; and commercial federations including wholesale, productive, and service associations). The reports also show the amount of distributive and service business, earnings, and patronage refunds of cooperative wholesales; operating expenses of farm and non-farm consumers' cooperatives; the value of goods produced by the productive associations; and employment and earnings in local and central cooperatives.

Third in a series of pilot studies covering the work experience, mobility, training, and personal characteristics of workers in occupations vital in defense mobilization. The report evaluates the findings of the study in terms of their significance for manpower planning in a mobilization period. It was prepared as part of a general program of the Department of the Air Force to develop systematic methods of determining the manpower feasibility of military programs. The two preceding studies in this series relate to Electronic Technicians (Bull. 1150) and Tool and Die Makers (Bull. 1120). For studies of the occupational mobility of scientists (chemists, biologists, and physicists with Ph. D.'s), see Bull. 1121, and of professional engineers, see Bull. 968.

A description of the similarities and differences in methodologies of these series and a selected bibliography for each series are also provided.
- 1169 Personnel Resources in the Social Sciences and Humanities (1954). 70¢.
This report is based on information reported by approximately 25,000 social scientists and humanists in 14 fields of specialization, in response to a questionnaire survey conducted in 1952 by the American Council of Learned So-

- cities. The report presents detailed information on specialization, age, and educational backgrounds of the respondents in each major social science and humanistic field as well as the specialties in which they were employed, the functions they were performing, and the types of employing organizations. Wherever possible, separate data are given for graduate students and women. Salaries and supplementary professional income of the respondents employed full time are also discussed.
- 1170 Structure of the Residential Building Industry in 1949 (1954). 30¢.
Presents and interprets the final and complete results from a nationwide study of the organization and scale of residential builders' operations. The survey, conducted by the Bureau of Labor Statistics in 1951 and covering residential builders' private housing activities in 1949, provides comprehensive and reliable data answering for the first time such fundamental questions as: Is there a true residential building industry, readily distinguished from other segments of the construction industry? What share of all new housing is produced by the various types of builders and how large are their respective scales of operations? Is there a substantial difference between large and small communities in the scale of home builders' operations and in the share of new house production by the various types of builders? Do residential builders serve only a local market? In the absence of precise statistics, the report analyzes the direction of organizational changes in the residential building industry since 1949, on the basis of an interpretation of historical developments.

- 1197 Average Retail Prices, 1955 (1956). 55¢
Presents retail prices for approximately 150 commodities and services in certain major expenditure categories for the 20 largest cities surveyed regularly by the Bureau of Labor Statistics for the Consumer Price Index. These data, covering the last quarter 1954 through 1955, include important items in all major index groups except foods and fuels, which are published separately, and rents and certain homeownership costs, which involve unique problems. The first bulletin to present average retail prices for items other than foods and fuels was published in 1955 as Bull. 1182. That bulletin presented retail prices for 125 articles and services and was applicable to 10 cities. Prior to that report, regular bulletins of basic average prices from which the CPI was computed were confined to fuels and foods which, unlike other items, were relatively easy to describe and price and did not involve major problems of quality variation. A few retail price bulletins published in the early 1920's presented average prices for a limited list of "dry goods" but publication of these data was discontinued because of problems relating to quality definition. For a listing of BLS retail price bulletins, by item, see Subject index under Prices, retail. For current indexes on items covered in these bulletins other than food, see the Monthly Labor Review and other BLS publications.

- 1201 Collective Bargaining Clauses: Labor-Management Safety, Production, and Industry Stabilization Committees (1957). 30¢.
A report, based on the study of collective agreements covering more than 7 million workers, on the structure, function, and procedures of labor-management committees created by formal contract provisions to deal with problems of safety, production, and industry stabilization. Plant-safety committees were most frequently provided for. Only 31 of the more than 1,500 agreements studied contained provisions establishing committees to deal with such production problems as quality control, efficiency and elimination of waste, or to work toward stabilization of the industry. Production-problem committees were usually established in individual companies, while contracts setting up stabilization of industry committees were for the most part concluded between multiemployer groups and unions in the apparel and construction industries. Sample provisions relating to the committees are presented.

Presents detailed statistics on the provisions of 300 selected health and insurance plans under collective bargaining. Types of benefits included life insurance, accidental death and dismemberment, accident and sickness (excluding sick leave, State workmen's compensation, and temporary disability payments), and hospital, surgical, and medical care. Special benefits such as those provided for poliomyelitis and accidental injury, and during extended periods of illness are treated separately, as are provisions applying to maternity cases.
- 1222 Directory of National and International Labor Unions in the United States, 1957 (1957).
Replaces Bulls. 901, 937, 980, 1127, and 1185.
Provides current general information concerning the structure and activities of the American labor movement and lists and gives details about all known national and international unions and State labor bodies. Information assembled from responses by unions relates to the number of members and local union affiliates of the organizations listed; the number of women who are union members, and information on union conventions and publications. Headquarters addresses and names of principal officers of national and international offices are also listed.
- 1223 Comparative Job Performance by Age: Large Plants in the Men's Footwear and Household Furniture Industries (1957). 45¢.
This bulletin continues earlier work on the relationship between age and work performance (Bull. 1203), compares actual on-the-job performance of older production workers with the performance of the younger workers. The extensive data provided enable the reader to draw more definitive conclusions than was possible from the pilot study, which was primarily methodological in nature. This later study is focused on the measure of the relationship between age and the three aspects of job performance: output per man-hour, attendance, and continuity of service.

Presents data on selected characteristics of 1-family houses authorized by building permit in 1954-56, in cities of 25,000 population and over and, in lesser detail, data on characteristics of 2- to 4-family and 5-or-more-family structures. The introductory analysis of trends during 1954-56 includes comparisons with 1940 and 1950 data from the Federal Housing Administration regarding new 1-family housing processed by the FHA for mortgage insurance under the National Housing Act. These trend data cover the general plan and size of houses; walls, floors, roofing, insulation, and rain-carrying equipment; windows, screens, and storm windows; heating facilities and fuel; electrical services; and kitchen, laundry, and other equipment. Among other comparisons, the data are distributed by selling-price class, region, and metropolitan or non-metropolitan area.

- 1237 Injuries and Accident Causes in the Boilershop-Products Industry (1958). 50¢.
Latest in a series of work injury and accident statistics bulletins which are published as part of the Bureau's regular program. Annual bulletins present summary statistics on disabling work injuries for each of the major industries in the United States. Other bulletins present detailed breakdowns of injuries and accident causes in selected industries, occupations, or activities during specified periods of time. Sufficient information is collected to make national estimates of the number of work injuries occurring each year and of the resultant total economic loss expressed in man-days of work and to indicate the varying degrees of hazards existing in specific industries. The general purpose of these surveys is use in accident prevention work. For some years, statistics were published in other than bulletin form; for example, in the Monthly Labor Review and serial reprints.

- 1238 **The Earnings and Employment of Seamen on U.S. Flag Ships (1958).** 60¢.
A report prepared at the request of and in cooperation with the Federal Maritime Board and the Maritime Administration, U.S. Department of Commerce. It analyzes the employment experience, daily and annual earnings, and fringe benefits of seamen on U.S. flag ships. Included are brief summaries on the operations of the American Merchant Marine and on the history of collective bargaining in the maritime industry.
- 1239 **Union Constitution Provisions: Election and Tenure of National and International Union Officers, 1958 (1958).** 30¢.
Analyzes the rules in union constitutions which govern the qualifications, election, and terms of union officers, and those providing for the remuneration and the removal of union presidents. The bulletin is basically a summary of the union rules effective in 1958, and does not include any analysis of union practices. Rules governing the election of AFL-CIO officers are summarized in the appendix.

- 22 **Wages and Related Benefits, 20 Labor Markets, 1958-59 (1959).** 50¢.
Consolidated in this bulletin are the summaries and analyses of the results of the individual area surveys made in late 1958 and early 1959 (published separately in Bulls. 1240-1 through 1240-21). Shows occupational earnings of office and plant workers for all industries combined, by broad industry group, and by region and selected cities. Includes data on the nature and prevalence of selected establishment practices, supplementary wage provisions, and fringe benefits in 11 of the 20 areas surveyed. Also provides data on the trends in occupational earnings during 1953-59. For a listing of other wage surveys conducted in this and many other major labor market areas, See Subject index—Wages and Hours, Occupational Wage Surveys.
- 1241 **Automation and Employment Opportunities for Officeworkers. A report on the effect of electronic computers on employment of clerical workers with a special report on programmers. (1958).** 15¢.
Designed primarily for use in vocational guidance, discusses the development and use of electronic computers and their effect on the employment of clerical workers. Provides a description of programming, one of the new occupations which has emerged with the development of automation, and outlines the qualifications and employment prospects for programmers.
- 1242 **Population and Labor Force Projections for the United States, 1960 to 1975 (1959).** 40¢.
Briefly reviews population growth in the United States from 1900 to 1955 and analyzes some effects of population change. Includes population and labor force projections to 1975, and a description of the methods used in preparing the projections. Points up the increasing labor force participation of women and the trend toward more part-time employment.
- 1243 **Trends in Building Permit Activity (1959).** 65¢.
Includes monthly building permit statistics for 1954-56 on a national basis and annual figures from 1949-58 for cities of 100,000 population and over, with selected tabulations on metropolitan-nonmetropolitan and central city-suburban building during 1957-58. Describes the characteristics and limitations of the data, and explains the shift from the "old series" on "urban building authorized" (1920-June 1954) to the "new series" on "building permit activity" (January 1954-1958). A selected reference list is appended. See also Bull. 545 this listing.
- 1244 **Union Wages and Hours: Local Transit Operating Employees, July 1, 1958, and Trend 1929-58 (1959).** 15¢.
Latest in a series of bulletins presenting union wages and hours of operating employees in the local-transit industry. This bulletin presents results of the 38th annual survey by the Bureau and is based on union scales in effect on July 1, 1958, for approximately 70,000 operating employees in 52 cities with populations of 100,000 or more. The first bulletin in this series was printed in 1922 and presents wages as of May 15, 1920, and May 15, 1921. Surveys have been made for all ensuing years, but from 1932 to 1940, inclusive, results were printed in the Monthly Labor Review and in serial reprints,

rather than in bulletin form. Hours of work were not included in some of the earlier bulletins because of their irregularity. The Bureau first surveyed collectively bargained insurance and pension plans in 1954 and the results for the local-transit industry were first published in Bull. 1177. See also annotation for Bull. 600 this listing.

- 1245 Union Wages and Hours: Building Trades, July 1, 1958, and Trend 1907-58 (1959). 30¢.

Latest in a series of bulletins presenting union wages in effect for building trades workers. In this bulletin, rates are presented for 24 journeyman trades and 9 helper and laborer classifications in 52 cities with populations of 100,000 or more. The first bulletin in this series was published in 1913 and presents wage and hour data back to 1907. Data have been published for most of the ensuing years. The Bureau first surveyed collectively bargained insurance and pension plans in 1954 and the results for the building trades were first published in Bull. 1175. See also annotation for Bull. 600, this listing.

- 1246 Union Wages and Hours: Motortruck Drivers and Helpers, July 1, 1958, and Trend 1936-58 (1959). 30¢.

Latest in a series of bulletins presenting union wage scales for motortruck drivers and helpers. This bulletin presents information based on union scales in effect on July 1, 1958, and covers approximately 265,000 drivers and 37,000 helpers in 52 cities with populations of 100,000 or more. The first bulletin in this series was published in 1915 and presents union wage scales in effect as of 1913 and 1914; however, the majority of quotations for the early years are for Teamsters rather than for Motortruck drivers. Data have been published in bulletin form for most of the ensuing years. The Bureau first surveyed collectively bargained insurance and pension plans in 1954 and the results for motortruck drivers and helpers were first published in Bull. 1178. See also annotation for Bull. 600 this listing.

- 1247 Union Wages and Hours: Printing Industry, July 1, 1958, and Trend 1907-58 (1959). 35¢.

Latest in a series of bulletins presenting union wages and hours in the printing industry. In this bulletin, information is based on union scales in effect on July 1, 1958, for approximately 115,000 printing trades workers in 53 cities with populations of 100,000 or more. The first bulletin in this series was published in 1913 and presents wage and hour data back to 1907. Data have been published in bulletin form for most of the ensuing years. The Bureau first surveyed collectively bargained insurance and pension plans in 1954 and the results for the printing industry were first published in Bull. 1176. See also annotation for Bull. 600 this listing.

- 1248 Paid Holiday Provisions in Major Union Contracts, 1958 (1959). 25¢.

- 1249 Trends in Output per Man-Hour in the Private Economy, 1909-1958 (1960). 50¢.

Presents indexes and average rates of change in output per man-hour in the private economy for the post-World War II period, 1947-58, and for the long-term period, 1909-58. Discusses the factors affecting the long-term increase in output per man-hour, such as technological innova-

tion, capital investment, the role of Federal, State, and local government investment in services and facilities, and the skillful blending of human resources. Summarizes the major elements in deriving the estimates of real product and man-hours, and compares the Bureau's man-hour measures in the total private economy with those of the U.S. Bureau of the Census. Includes discussions of the problems of comparing real product and man-hour estimates, and of the limitations and qualifications of output per man-hour measures. An appendix includes a detailed discussion of the methods and sources used in estimating output per man-hour.

- 1250 Health and Insurance Plans Under Collective Bargaining. Accident and Sickness Benefits, Fall 1958 (1959). 25¢.

Analyzes the key features of accident and sickness benefits and the extent of the provisions for such benefits in 300 selected plans under collective bargaining in the fall of 1958. This is the first in a planned series of bulletins dealing separately with specific health and insurance benefits. A section on maternity benefits is included.

- 1251 Premium Pay for Night, Weekend, and Overtime Work in Major Union Contracts (1959). 30¢.

- 1252 Factory Workers' Earnings, May 1958 (1959). 40¢.

This study is part of the broad program initiated by the U.S. Department of Labor to study the economic effects of the \$1 Federal minimum wage. Bulletin 1252 analyzes the manufacturing wage structure, in May 1958, on the basis of a broad survey of the straight-time hourly earnings (exclusive of premium pay for overtime and work on weekends, holidays, and late shifts) of factory workers in the United States. Levels and distributions of wages of production and related workers are set forth for the United States as a whole, major regions, broad industry groups and some industries more narrowly defined, and metropolitan and non-metropolitan areas. Changes between April 1954 and May 1958 in the wages of production and related workers are summarized. Also included are data for office and clerical employees in manufacturing in 16 of the 21 major industry groups.

For an earlier study of factory workers' earnings in relation to minimum wage legislation, see Bull. 1179.

- 1253 Earnings in Wholesale Trade, June 1958 (1959). 30¢.

- 1254 Retail Prices of Food, 1957-58. Indexes and Average Prices (1959). 30¢.

- 1255 Occupational Outlook Handbook, Employment Information on Major Occupations for Use in Guidance. 1959 Edition (1959). \$4.25. Replaces Bulls. 940, 998, and 1215.

The fourth edition of the Handbook provides the latest available information on each of more than 600 occupations of interest in vocational guidance. These include the skilled trades; clerical, sales, and service occupations; and major types of farming. Each occupational report describes the employment trends and outlook, nature of the work, industries and localities in which workers are employed, training and qualifications required, earnings and working conditions, and sources of further information.

Trend data on population, employment, and the broad industrial and occupational groups are provided as background for an understanding of the individual occupations. Important occupational groups added since the third edition include sales personnel, technicians, clergymen, school counselors, protective service workers, programmers, office machine operators, motor vehicle drivers, instrument repairmen, stationary engineers, and workers in the missile, paper and pulp, and baking industries.

(Reprints of material on selected occupations and industries from the Handbook were issued in early 1960 as Bulls. 1255-1 through 1255-89; for listing, see inside back cover this publication.)

1256 Consumer Prices in the United States, Price Trends and Indexes, 1953-58 (1959).

Presents the history, scope, and meaning of the Consumer Price Index; traces adjustments in the series and compares movements of the old and the adjusted series. Discusses the comprehensive revision which resulted in the introduction of the revised Index in January 1953, and the uses of the Index. Tables of indexes and related data for earlier years are included.

See Bulls. 699, 710, 966, 1039, and 1165 for analyses of price changes and for Index methodology in earlier periods. See also Bull. 1140.

1257 Wholesale Prices and Price Indexes, 1958 (1959). \$1.50.

Latest in a series of bulletins presenting primary market prices and index numbers (relative prices) dating back to 1890. The first bulletin in this series, published in 1900, was designed to bring up to date as nearly as practicable the record of prices in a report of the United States Committee on Finance for 1840 to 1891 (S. Rept. No. 1394, 52d Cong., 2d Sess.). Bulletins have been published annually through 1931 (except for the war years 1917 and 1918) and again beginning in 1942. Data for intervening years were published in other Bureau publications. Revisions in the index are made when it is deemed necessary to expand coverage and to change weighting patterns to allow for shifts in the composition of the economy. Several major revisions involved changes in the method of calculation. Despite these major revisions, the continuity of the index has been preserved as nearly as possible throughout the years since its inception.

1258 Analysis of Work Stoppages, 1958 (1959).

Latest in a series of bulletins presenting information on strikes and lockouts in the United States. Statistics are presented by State and industry group on the number of work stoppages beginning in the year, workers involved, and total man-days of idleness. In addition, data are presented concerning unions involved; major issues, duration, and results of the strikes; and methods used in their termination. Data have been collected by the Bureau for many years, but have been published in other than bulletin form for some of the years. See also annotation for Bull. 651, this listing.

1259 Pension Plans Under Collective Bargaining.

Pt. I. Vesting Provisions and Requirements for Early Retirement;

Pt. II. Involuntary Retirement Provisions, Late 1958 (1959). 25¢.

Analyzes provisions concerning vesting, benefits, and eligibility contained in selected pension plans under collective bargaining. Bull. 1259, which deals with 300 plans in late 1958, is the first in a new series of pension plan studies; it does not include information on disability retirement provisions. Bull. 1147 contains similar information on 300 plans in the fall of 1952.

1260 Nonfarm Housing Starts, 1889-1958 (1959). 30¢.

Estimates of new permanent nonfarm dwelling units started during 1889-1958. Includes distributions from 1920 by type of structure (1-family, etc.), ownership (private, public), and location (urban, rural nonfarm); by years from 1920; and by months from 1939 or 1940. Presents data for 20 selected States in 1954-58, by ownership. This bulletin, which includes also an analysis of the historical series and selected references, represents a final report of the work done by the Division of Construction Statistics of the U.S. Department of Labor's Bureau of Labor Statistics in the development of the nonfarm housing starts series. See also Bulls. 915 and 941, this listing, for annotations.

1261 Labor Supply and Mobility in a Newly Industrialized Area (1960). 35¢.

Provides information on the character of the labor supply attracted to manufacturing employment in the chronically depressed rural area of Ravenswood, W. Va., near which the Kaiser Aluminum and Chemical Corp. established a mill. Analyzes work histories of employees of the mill and a small sample of unaccepted applicants; their geographical and occupational mobility; their age, sex, marital status, and education. The study examines the standards for employment established by the company and points out that only by employing persons who lived considerable distances from the plant, and by transferring professional employees from other plants, was the company able to meet those standards.

1262 Military Manpower Requirements and Supply, 1959-63 (1959). 15¢.

Analyzes military manpower requirements and supply in the United States from the standpoint of the current military manpower situation and the size and characteristics (age and sources of supply) of the military manpower pool. Indicates underlying assumptions and guiding principles. Bull. 1262 provides estimates for 1958 through 1963 and an earlier bulletin, No. 1161, provides estimates for 1954 through 1960, with more extensive discussion.

1263 Union Constitution Provisions: Trusteeship (1959). 30¢.

Analyzes the formal rules stipulated in union constitutions governing the establishment of trusteeships, the grounds for such action, hearing requirements, the status of the local unions and their officers during trusteeship, and the provisions applying to termination and appeal. The bulletin does not extend to union practices, and is essentially a summary of union laws in effect before enactment of the Labor-Management Reporting and Disclosure Act of 1959. The section in this act covering trusteeships is reproduced in appendix B.

Depository Libraries Receiving BLS Bulletins

Under provisions of the law, certain libraries are designated depositories for Government publications. Through them Federal Government documents are made available to residents of every State, the District of Columbia, and Puerto Rico. Distribution to the libraries is made by the Office of the Superintendent of Documents. Each library selects the classes of publications of interest to its particular clientele.

The following list shows the locations and names of the depository libraries which receive BLS bulletins.
