¹ The appendix table presents only those CPI series which have been used in the charts. More complete lists of CPI series are in the following reports published regularly by the Bureau of Labor Statistics: **The Monthly Report on the Consumer Price Index, Monthly Retail Food Prices by Cities, Monthly Retail Prices and Indexes of Fuels, and Electricity, and Quarterly Price Indexes for Selected Items and Groups.**

² The base period for the consumer price indexes has been changed over the years to keep it current and make it comparable with other Federal general-purpose indexes. As of January 1962, the indexes were converted from the former base of 1947-49=100 to the new base of 1957-59=100. Indexes prior to September, 1940 were rebased to 1957-59=100 only for four months each year.

Beginning with 1953, this group includes "food away from home" which had not been included in the CPI previously.

³ Includes restaurant meals and other food bought and eaten away from home.

⁴ Includes home purchase and real estate taxes for which separate indexes are not published.

⁵ For indexes not published monthly, annual averages are calculated by: (1) estimating monthly indexes for the year for which the annual average is computed by straight-line interpolation between pricing (or publishing) months; and (2) averaging the resulting 12 monthly indexes.

⁶ Includes natural, mixed, and liquefied petroleum gas types distributed through utility mains.

⁷ Includes bills for 40, 100, and 200 KWH.

⁸ Includes anthracite and bituminous coal.

⁹ Includes textiles, floor coverings, furniture and bedding, appliances (except radio and television sets), and miscellaneous housefurnishings.

¹⁰ The index for appliances includes radio and television sets which are excluded from the total for "housefurnishings" but are included in the total for "reading and recreation" under which they are listed separately.

¹¹ In addition to the "household operation" series which follow, this CPI group includes laundry soap and detergents, laundry services, domestic service, postage, and water which are not presented in the **Chartbook**.

¹²In addition to the "private transportation" series which follow (Tables 51-54, 88), this CPI group includes tires, motor oil, and auto registration which are not presented in the **Chartbook**.

¹³Includes transit fares and coach railroad fares.

¹⁴In addition to the "medical care" series which follow, this CPI group includes optometric examination and eyeglasses and surgical insurance which are not presented in the **Chartbook**.

¹⁵In addition to the "personal care" series which follow, this CPI group includes beauty shop services which are not presented in the **Chartbook**.

¹⁶In addition to the "reading and recreation" series which follow, this CPI group includes toys and television repairs which are not presented in the **Chartbook**.

¹⁷The "special group" indexes are made by regrouping the items in the consumer price index and were not published monthly prior to 1956. "All commodities" (Table 76) includes all the CPI items except services. "Nondurable commodities" (Table 77) includes food, apparel (except shoe repairs), house paint, solid fuels, petroleum fuels, laundry soaps and detergents, textile housefurnishings, paper napkins, toilet tissue, electric light bulbs, gasoline, motor oil, prescriptions and drugs, toilet goods, newspapers, toys (nondurable), tobacco products, and alcoholic beverages. "Durable commodities" (Table 81) includes new cars, used cars, appliances (sewing machines, washing machines, vacuum cleaners, refrigerators, stoves, toasters, and television sets), porch flooring, water heaters, central heating furnaces, kitchen sinks, sink faucets, floor coverings, furniture and bedding, dinnerware, saucepans, tires, toys (durable), and sporting goods. "Services" (Table 84) includes: "household operation services" (Table 85)--gas and electricity, laundry services, dry cleaning, domestic service, telephone, postage, and water; "transportation services" (Table 86)--auto repairs, auto registration, auto insurance, transit fares, and railroad fares; "medical care services" (Table 87)--physicians' fees, dentists' fees, optometric examination and eyeglasses, hospital daily service charge, hospitalization insurance, and surgical insurance; "rent" (Table 28); and "other services"--home purchase, real estate taxes, mortgage interest, property insurance, repainting rooms, repainting garage, refinishing floors, reshingling roof, shoe repairs, men's haircuts, beauty shop services, movie admissions, and television repairs.

¹⁸The base period for the consumer price indexes has been changed over the years to keep it current and make it comparable with other Federal general-purpose indexes. As of January 1962, the indexes were converted from the former base of 1947-49=100 to the new base of 1957-59=100.

¹⁹Out of order. Belongs with Tables 50-54 in the "private transportation" group.

¹In addition to the national CPI, consumer price indexes are computed separately for each of the 20 largest cities. City indexes are published monthly for the 5 largest cities, which are all included in this table. For the other 15 cities, of which only 7 are included, indexes are calculated every third month. The months vary as these cities are priced on a rotating cycle. (See Explanatory Notes.)

¹ The appendix table presents only those WPI series which have been used in the charts. A complete list of all WPI series is available in the monthly detailed report, **Wholesale Prices and Price Indexes**, published by the Bureau of Labor Statistics. Appendix table figures for the most recent month are preliminary and subject to revision. Each wholesale price index is assigned a code number which designates the group, subgroup, product class, or individual commodity series to which it belongs. Depending on the type of classification, the code varies from two to six digits.

² In addition to the "farm products" series which follow, this WPI group includes hay, hayseeds, and oil-seeds; green coffee, tea, and cocoa beans; and leaf tobacco which are not presented in the **Chartbook**.

³The base period for the wholesale price indexes has been changed over the years to keep it current and make it comparable with other Federal general-purpose indexes. As of January 1962, the indexes were converted from the former base of 1947-49 = 100 to the new base of 1957-59 = 100. The WPI was never published on the 1939 = 100 base which is used in the **Chartbook** for comparative purposes.

⁴In addition to the "processed food" series which follow, this WPI group includes poultry and fish; sugar and confectionary; packaged beverage materials; fats and oils; and miscellaneous processed foods which are not presented in the **Chartbook**.

⁵A special index which combines major groups 01 (farm products) and 02 (processed foods).

⁶Frequently referred to as "industrial commodities" or "industrial prices." This index combines all the major commodity groups from 03 through 15.

⁷In addition to the "textile products and apparel" series which follow, this WPI group includes silk products and miscellaneous textile products which are not presented in the **Chartbook**.

⁸In addition to the "hides, skins, leather, and leather products" series which follow, this WPI group includes "other leather products" which is not presented in the **Chartbook**.

⁹Formerly entitled "Fuel, power, and lighting materials." In addition to the "fuels and related products, and power" series which follow, this WPI group includes indexes for coal, coke, gas fuels, electric power, crude petroleum and natural gasoline, and refined petroleum products which are not presented in the **Chartbook**.

¹⁰Not available before 1958. This index is not comparable with the discontinued series for natural gas (Code 05-30-01).

¹¹Index not available before 1958. Specification for 300 KW demand between January 1958 and January 1961.

¹²In addition to the "chemicals and allied products" series which follow, this WPI group includes prepared paint, inedible fats and oils, mixed fertilizer, fertilizer materials, and other chemicals and allied products which are not presented in the **Chartbook**.

¹³In addition to the "rubber and rubber products" series which follow, this WPI group includes reclaimed rubber, tubes, and miscellaneous rubber products which are not presented in the **Chartbook**.

¹⁴In addition to the "pulp, paper, and allied products" series which follow, this WPI group includes building paper and board which are not presented in the **Chartbook**.

¹⁵In addition to the "metals and metal products" series which follow (Tables 72-79, 129), this WPI group includes metal containers, hardware, plumbing fixtures and brass fittings, and heating equipment which are not presented in the **Chartbook**.

¹⁶In addition to the "machinery and motive products" series which follow, this WPI group includes miscellaneous machinery and special industry machinery and equipment which are not presented in the **Chartbook**.

¹⁷In addition to the "furniture and other household durables" series which follow, this WPI group includes television, radio receivers, and phonographs as well as other household durables which are not presented in the **Chartbook**.

¹⁸Formerly entitled "nonmetallic minerals - structural." In addition to the "nonmetallic mineral products" series which follow, this WPI group includes plate and safety glass, gypsum products, prepared asphalt roofing, and other nonmetallic minerals which are not presented in the **Chartbook**.

¹⁹In addition to the "tobacco products and bottled beverages" series which follow, this WPI group includes cigars and other tobacco products which are not presented in the **Chartbook**.

²⁰Classified in WPI group "miscellaneous products" which also includes toys, sporting goods, small arms, notions and accessories, jewelry, watches, photographic equipments, and other miscellaneous products.

²¹The "stage of processing" indexes are made by regrouping commodities used in the comprehensive wholesale price index. The assignment of commodities to "crude", "intermediate" or "finished" stages is based primarily on the amount of processing, manufacturing, or assembling to which commodities are subjected before they enter the market. In addition to the series listed in the appendix tables (Tables 110-118, 130), the following indexes are available, although not presented in the **Chartbook: Crude--** crude fuel; **intermediate--**intermediate materials for food manufacturing, components for manufacturing, materials and components for construction, processed fuels and lubricants, nonreturnable containers, and supplies for manufacturing and nonmanufacturing industries; **finished goods--** consumer foods, consumer durables, and producer finished goods for manufacturing and nonmanufacturing industries.

²²The "durability of product" indexes are made by regrouping commodities used in the comprehensive wholesale price index and the four series-- durable manufactures, nondurable manufactures, durable raw or slightly processed foods, and nondurable raw or slightly processed foods--include all the series in the total WPI. In addition to the series listed in the appendix tables (Tables 119-124, 131), indexes are available for total raw or slightly processed goods. "Durable raw or slightly processed goods" is lowest (less than one percent) in relative importance, and composed only of four groups: iron ore; iron and steel scrap; nonferrous scrap; and sand, gravel, and crushed stone.

²³A special commodity group index calculated by combining finished steel products (Code 10-14) and semifinished steel products (Code 10-13).

²⁴A special commodity group index calculated by combining agricultural, construction, metalworking, general purpose, electrical, and miscellaneous machinery and equipment (Codes 11-1, 2, 3, 4, 5, and 7).

²⁵A special commodity group index calculated by combining farm and garden tractors (Code 11-11) and other tractors (Code 11-28).

²⁶A special commodity group index calculated by combining appropriate segments of pertinent commodity groups such as lumber and wood products; building paper and board; paint and paint materials, metals and metal products; machinery and motive products; nonmetallic mineral products; and household durables. A complete list of commodities in the WPI construction materials index is presented in Table 5 of each monthly report, **Wholesale Prices and Price Indexes**, published by BLS.

²⁷Out of order. Belongs with Tables 71-79 in the "metals and metal products" group.

²⁸Out of order. Belongs with Tables 116 - 118 in the "stage of processing" group. Listed as "consumer other nondurable goods" in WPI.

²⁹Out of order. Belongs with Tables 119 - 124 in the "durability of product" group.

Table D. **PRICES AND RELATED ECONOMIC TRENDS:** General, business cycle, farm and food, industrial commodities, construction, and consumer services¹ - Continued

¹Table D presents data for the "economic trend" series which appear in the charts in "Section I: Prices and Related Economic Trends". Figures for the WPI and CPI series used in Section I charts, however, are given in Appendix Tables A and C, except for those in the "business cycle" charts.

All dollar figures are in current prices, unless otherwise noted.

Figures for the latest month are usually preliminary and subject to revision.

²Source: **U.S. Income and Output: A Supplement to Survey of Current Business, 1958; and Survey of Current Business** (monthly), July 1962, and subsequent issues (U.S. Department of Commerce, Office of Business Economics, Washington).

³For charts dealing with the most recent business cycle, monthly data were computed by BLS into indexes based on February 1961=100; quarterly data were based on first quarter 1961=100. For earlier business cycles, August 1954=100 and April 1958=100. The trough and peaks of the cycles are as selected by the National Bureau of Economic Research. The computed business cycle indexes, for all series except CPI and WPI, were based on data published by the sources indicated in the specific footnotes.

⁷Book value of stock on hand at end of month; includes purchased materials, goods in process, and finished goods.

⁸The daily index of spot market prices is published by BLS, which also computes a monthly index. The Spot Market Index is not related to either the monthly or weekly Wholesale Price Index. The index for spot market raw industrials includes: Burlap, copper scrap, cotton, cowhides, lead scrap, print cloth, rosin, rubber, steel scrap, tallow, tin, wool tops, and zinc.

¹⁹Since July 1959, the construction statistics in tables D-43, 45, and 46 have been compiled by the Bureau of the Census, U.S. Department of Commerce. All these series appear regularly in **Construction Review**, published monthly by the Business and Defense Services Administration of the U.S. Department of Commerce. Current data on housing starts (tables D-45 and D-46) also appear in **Construction Reports: Housing Starts** (Series C-20) and, on new construction (table D-43), in **Construction Reports: Construction Activity** (Series C-30), published monthly by the Bureau of the Census. Prior to July 1959, responsibility for preparing the statistics was divided between the U.S. Department of Commerce and the U.S. Department of Labor. The data for this period also appear in **Construction Review** which was published jointly by the two agencies. Subsequent to the transfer of responsibility, the series given in tables D-43, D-45, and D-46 were revised back to January 1959. The "new" series are not comparable with the "old" series. Descriptions of the "new" series appear in **Construction Reports: Construction Activity** (Series C-30-25) July 1961, and in **Construction Review**, July 1960.

²³Published data for 2-family structures and for 3-or-more family structures were combined by BLS.

²⁴Indexes on 1957-59 base computed by BLS from total annual personal consumption expenditure data for each specific type of service, as follows: **Gas**; **movie admissions**; **rent--space rent** in tenant-occupied nonfarm dwellings (including lodging houses); **medical care**--includes physicians', dentists', and other professional services; privately controlled hospitals and sanitariums; and medical care and hospitalization insurance; **auto repairs**--includes automobile repair, greasing, washing, parking, storage, and rental of cars; and **public transportation**--street and electric railway and local bus fares.
