Preface

The Bureau of Labor Statistics conducted a survey of miscellaneous retail stores for a June 1965 payroll period. Data on employment, average hourly and weekly earnings, and weekly hours of work of nonsupervisory employees were obtained and are presented in this bulletin. This information bridges the period since June 1962, when a similar survey was conducted. (See Employee Earnings in Miscellaneous Retail Stores, June 1962, BLS Bulletin 1380-7.) Data are provided for the United States; the Northeast, South, North Central, and West regions; metropolitan and nonmetropolitan areas; men and women; and retail enterprises and establishments by annual volume of sales.

A bulletin containing comprehensive statistical data for the entire retail trade industry (except eating and drinking places) will be available. Data for each of the major retail groups which retail trade comprises, and for selected lines of retail business, will be available in the individual bulletins which are listed on the last page.

The survey was part of a broad program of studies initiated by the U. S. Department of Labor's Wage and Hour and Public Contracts Divisions for continuing appraisal of Federal legislation relating to minimum wages and maximum hours standards. In this connection, data from the survey were published in the Report Submitted to the Congress in Accordance With the Requirements of Section 4(d) of the Fair Labor Standards Act - January 1966.

The study was conducted in the Bureau's Division of National Wage and Salary Income by Norman J. Samuels, Chief of the Division, under the general direction of L. R. Linsenmayer, Assistant Commissioner, Office of Wages and Industrial Relations. This bulletin was prepared under the supervision of Alvin Bauman.

Employee Earnings and Hours in Miscellaneous Retail Stores, June 1965

Scope and Method of Survey

Scope of Survey

This bulletin relates to those retail establishments which were classified, according to the 1957 edition of the Standard Industrial Classification Manual, as part of the miscellaneous retail stores major industry group (SIC 59). Stores within this group were further identified as drug and proprietary stores (SIC 591). The major group covers retail stores not elsewhere classified and includes stores such as drug, liquor, antique and secondhand, book and stationery, sporting goods and bicycles, farm and garden supply, jewelry, fuel and ice dealers, florists, cigar, newspaper, cameras and photography supplies, gifts and souvenirs, and optical goods.

Drug and proprietary stores are included on the basis of their usual trade designation rather than on the more strict interpretation of commodities handled. These establishments are primarily engaged in the retail sale of prescription drugs and patent medicines and any combination of such merchandise as cosmetics, toiletries, tobacco and novelty merchandise; and they may or may not operate a soda fountain or lunch counter.

Geographically, the 50 States and the District of Columbia are covered. The data reflect earnings and hours of work of nonsupervisory employees for a payroll period including June 12, 1965.

Sample Design

The sample was designed to yield national and regional estimates for the major industry group and for the line of business for which separate data are shown. A stratified sample design was used with variable sampling ratios depending on the kind of business and employment size. For example, the sample size for the line of business shown separately was proportionately larger than for those not published and the probability of selection increased with the employment size of the unit.

The following tabulation shows the number of units included in the sample of the miscellaneous retail stores group and in the drug and proprietary stores for which separate data are published:

Kind of business	Number of units
Miscellaneous retail stores group -----	3,724
Drug and proprietary stores -----	2,173

Establishment samples were obtained from three different sources: (1) State unemployment insurance listings furnished employer reporting units with four or more employees. (2) The large chainstore enterprises provided current lists of retail stores and auxiliary units from which a sample of such units was selected. It was necessary to obtain these lists from the large chainstore enterprises because State unemployment insurance listings frequently provide data on a statewide or county basis for such companies rather than on an individual establishment basis. (3) The Bureau of the Census sample used in conjunction with its Monthly Survey of Retail Sales covered single-unit retail stores with fewer than four employees. The Census coverage of small units was necessary to supplement the Bureau's universe list for retail trade, since State unemployment insurance laws in many States do not cover employers with fewer than four employees.

Method of Collection

The majority of the establishments included in the sample were solicited for information by mail. The largest units were visited in person by field economists of the Bureau of Labor Statistics, as were the smallest units by the Bureau of the Census enumerators acting as agents for the BLS. Personal visits were also made to a sample of the nonrespondents to the mail questionnaire.

Estimating Procedure

Data collected for each sampling unit were weighted in accordance with the probability of selecting that unit. For example, where 1 unit out of 10 was selected from an industry-size group, data for that unit were considered as representative of the 10 units in the group. Thus, each segment of the retail trade industry was given its appropriate weight in the total, regardless of the disproportionate coverage of large and small establishments.

No assumption has been made that the wage structures of the units not responding to the mail questionnaire were similar to those of the units responding. To minimize the bias resulting from nonresponse, data obtained by personal visits from a sample of nonrespondents were weighted to represent all other nonrespondents in similar industry-size groups. To compensate for schedules with unusable data, their weights were assigned to usable schedules of the same industry-size group and from the same or related area.

For drug stores, all estimated totals derived from the weighting process were further adjusted to the employment levels for June 1965, as reported in the Bureau of Labor Statistics monthly employment series. The published estimates for drug stores in this report are, thus, consistent with the nonsupervisory worker employment shown in the monthly series. Employment estimates for all miscellaneous retail stores, which the Bureau does not publish monthly, were prepared especially for purposes of this survey. Current regional estimates, which could not be prepared from the monthly series, were based on regional distributions from the most recent Census of Business, prepared by the Bureau of the Census.

The adjustment of the survey totals to the predesignated totals for June 1965 was confined, for the most part, to that segment of the survey for which the sample units were obtained from State unemployment insurance listings. The lists generally were prepared prior to the time of the survey and consequently do not account for units opened or closed after the date of the lists. In the Census and the large chainstore enterprise samples, the best unbiased estimates of totals were presumed to be the weighted-up sample totals, since there was no apparent problem of unrepresented business births in these groups.

Criteria for Publication of Estimates

The results of this survey differ from those that would have been obtained by a complete canvass of all retail operations, since the survey was conducted on a sample basis. These differences may be substantial in those instances where the sample was small. It has not been possible, therefore, to present data for all cases. No earnings distributions are shown for groupings of fewer than 50 stores.

Definitions of Terms

Nonsupervisory employees include all full-time, part-time, seasonal, and casual employees below the supervisory level, such as salespersons, shipping, receiving, and stock clerks, laborers, warehousemen, caretakers, office clerks, driver-salesmen, deliverymen, installation and repairmen, elevator operators, porters, janitors, food service employees, and working supervisors.

Enterprise is defined as a company which operates, directs, or controls a group of establishments engaged in the same general business. In the case of single unit companies, the single unit was considered the enterprise.

Establishment is generally defined as a single physical location where business is conducted. In the case of two separate business entities transacting business at a single physical location (for example, a leased shoe department in a department store), each was treated as a separate establishment. On the other hand, a drug store which also operated a food counter was treated as a single establishment.

Annual volume of sales excludes excise taxes at the retail level.

Earnings data relate to straight-time earnings and exclude premium pay for over-time and for work on weekends, holidays, and late shifts. Commission and bonus earnings and special sales bonuses, such as "P.M.'s" and "stims" paid quarterly or oftener, are included.

Individual average hourly earnings for employees not paid by the hour (e.g., salary, commissions) were obtained by dividing individual earnings reported by the number of hours worked during the corresponding period.

Individual weekly earnings were obtained by multiplying the individual average hourly earnings by the number of hours worked during a single week in June 1965.

Group average hourly earnings published in this report were obtained by dividing total individual weekly earnings by total individual weekly hours worked.

Group average weekly earnings were obtained by dividing the sum of the individual weekly earnings by the number of employees represented in the group total.

Weekly hours of work are for a 1-week period and include hours paid for vacations, holidays, sick leave, etc.

Group average weekly hours were obtained by dividing total weekly hours worked by total number of nonsupervisory employees.

Regions used in this study include the following: Northeast—Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, and Vermont; South—Alabama, Arkansas, Delaware, District of Columbia, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia; North Central—Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin; and West—Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming.

Metropolitan areas as used in this report refers to those cities and county areas defined by the Bureau of the Budget as "Standard Metropolitan Statistical Areas." Metropolitan areas include those counties containing at least one central city of 50,000 population and those counties around such cities which are metropolitan in character and economically and socially integrated with the county containing the central city. For a more detailed description, see Standard Metropolitan Statistical Areas, 1964, prepared by the Bureau of the Budget.

Table Note

Because of rounding, sums of individual items may not equal totals.

Dash (-) indicates no employees.

Asterisk (*) indicates fewer than 50 employees or less than 0.05 percent.

RETAIL TRADE
Individual Hours and Earnings

BLS USE ONLY

1. COMPANY IDENTIFICATION:

State	Area	Ent. sales	SIC	Wgt.

The data, except for Item 2 which relates to the entire company, should cover all establishments (retail stores, warehouses, central offices, etc.) in the county or area designated to the left.

2. ANNUAL GROSS SALES FOR THE COMPANY OR ENTERPRISE:

(Check appropriate box.)

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Under \$250,000	\$250,000 to \$1,000,000	\$1,000,000 or more

Check the block which indicates the annual gross volume of sales (exclusive of excise taxes at the retail level) from all related activities of the enterprise. Include receipts from stores covered by this report as well as all other related activities. Use the last calendar or fiscal year.

3. ESTABLISHMENT INFORMATION:

Please enter the information requested in the columns below for each separate establishment (retail store, warehouse, or central office) covered by this report. Each retail store in a separate location is considered a separate establishment for the purpose of this survey. However, if the records for main store and suburban branch are kept on a combined basis, they may be considered as one establishment.

- (a) **Location:** Identify each establishment by its street address and city.
- (b) **Type of Retail Activity:** Enter for each establishment the major retail activity such as department store, drug store, gas station, etc.
- (c) **Employment:** Include all full-time, part-time, seasonal, and casual employees who received pay for any part of the payroll period including June 12, 1965. Exclude employees, such as those in leased departments and demonstrators, who received all or a substantial part of their pay from another employer.

Total—Enter total number of employees including officers and other principal executives, such as buyers, department heads, and managers whose work is above the working supervisory level.

Nonsupervisory—Enter total number of employees below the supervisory level, such as salespersons, shipping and receiving clerks, laborers, warehousemen, caretakers, office clerks, driver-salesmen, installation and repairmen, elevator operators, porters, janitors, watchmen, and other employees whose services are closely associated with those listed above. Do not include officers and other principal executives, such as buyers, department heads, and managers whose work is above the working supervisory level.

- (d) **Annual Gross Sales for the Establishment:** Check the column which indicates the annual gross volume of sales (exclusive of excise taxes at the retail level).

(a) Location (street address and city)	(b) Type of retail activity	(c) Employment for payroll period including June 12, 1965		(d) Gross establishment sales (were last year's sales \$250,000 or more?)	
		Total	Non-supervisory	Yes	No

4. PAYROLL PERIOD:

Employment and earnings data reported should correspond to your payroll period (for example, weekly, biweekly, or monthly) including June 12, 1965. Indicate the dates for the payroll period used. If the length of the payroll period varies among employees, enter the dates affecting the greatest number.

From _____, 19__ to _____, 19__.

5. EARNINGS AND HOURS OF WORK OF NONSUPERVISORY EMPLOYEES:

This study is designed to provide information on hourly earnings and weekly hours of work for both male and female nonsupervisory employees and working supervisors for a payroll period including June 12, 1965. The number of employees in each establishment for which earnings and hours data are reported should correspond with the number of nonsupervisory employees shown in item 3(c) on page 1. The information requested should be reported separately for each establishment and the establishment identified. Earnings data for food counter, cafeteria, or restaurant workers in Department, Drug, or Variety Stores should be entered only on the blue supplement provided. Data for all other employees should be reported in Item 5 of this form.

Report earnings and hours separately for each employee unless these data are identical for two or more employees. Do not report aggregate earnings and hours for several employees. For convenience of reporting for employees paid on other than an hourly basis, columns 5 through 8 are provided. Data will not, however, be published separately by various methods of pay. Instructions and examples for reporting the necessary data in each column are listed below.

INSTRUCTIONS

(Please read carefully to avoid correspondence)

<p>Complete columns 1, 2, and 3 for all nonsupervisory employees covered by this report (see examples 1-5).</p>	<p>Column (1)—Indicate whether the employee is male (M) or female (F).</p> <p>Column (2)—Use a separate line for each employee and enter "1," unless two or more employees of the same sex work the <u>same number</u> of hours during the selected week, and receive <u>identical hourly or salary rates</u> (see example 1). Data are to be reported individually for each employee whose earnings are based entirely or in part on commissions or bonuses (see examples 3, 4, and 5).</p> <p>Column (3)—Enter the number of hours worked during the week of June 6 to June 12, 1965. Include hours paid for sick leave, holidays, vacations, etc. These hours should relate to a 1-week period regardless of the length of the payroll period.</p>
<p>Use column 4 to report earnings of employees paid on an hourly basis (see example 1).</p>	<p>Column (4)—Enter the base (straight-time) hourly rate. Premium pay for overtime work should <u>not</u> be reported. This column may also be used to report earnings of employees paid on other than an hourly basis if average straight-time hourly earnings are available. For employees paid a commission or bonus in addition to an hourly rate, also complete columns 7 and 8 (see example 4).</p>
<p>Use columns 5 and 6 to report earnings of employees paid on a weekly, bi-weekly, monthly, or semimonthly basis (see example 2).</p>	<p>Column (5)—Enter for each employee the straight-time earnings for the salary period (weekly, biweekly, monthly, or semimonthly) including June 12, 1965. Include straight-time pay for overtime, but exclude overtime premium. Do not include "draws" against commission as salary.</p> <p>Column (6)—Enter the number of hours worked during the salary period (weekly, biweekly, monthly, or semimonthly). Include hours paid for sick leave, holidays, vacations, etc. For employees paid a commission or bonus, also complete columns 7 and 8 (see example 5).</p>
<p>Use columns 7 and 8 to report earnings of nonsupervisory employees based entirely or in part on commissions and bonuses (see example 3).</p>	<p>Column (7)—Enter for each employee the total commission and/or bonus earnings, including "PM's," "Stims," or any special bonuses based on sales paid quarterly or oftener by the store. These earnings are to be reported for the commission or bonus period including June 12, 1965. If the commissions earned during that pay period are not representative of normal commission earnings, a longer period may be used. If store employees receive both commission and bonus payments for an identical period of time, report the combined figure (see example 4). If bonus payments cover a period longer than the commission period, add only the prorated amount of the bonus to the commission earnings that correspond to the commission period (see example 5).</p> <p>Column (8)—Enter the number of hours worked during the commission or bonus period. (The hours should refer to the total hours worked during the period (weekly, biweekly, monthly, or semimonthly) and not necessarily only to those hours during which commissions or bonuses were earned.) For employees paid an hourly rate or salary in addition to commissions or bonuses, it is also necessary to complete column 4, or columns 5 and 6 (see examples 4 and 5).</p>

EXAMPLES

(See illustrations on next page)

- Two women each worked $36\frac{1}{4}$ hours during the selected week, and each was paid a straight-time hourly rate of \$1.05.
- One man worked 40 hours during the selected week, and received a salary of \$125, exclusive of premium pay for overtime, for 88 hours worked during the salary period ($\frac{1}{2}$ month).
- One man worked $32\frac{1}{2}$ hours during the selected week and was paid on a straight commission basis, receiving \$215.70 for 168 hours.
- One woman worked 40 hours during the selected week and was paid an hourly rate of \$1.25; she also received \$35 in commissions and \$7.50 in "PM's" for 173.6 hours worked during the commission period (1 month).
- One man worked $37\frac{1}{2}$ hours during the selected week, and was paid a weekly salary of \$75; he also earned commissions of \$102 during a 1-month period (162 hours) and \$150 in bonuses during a 3-month period. Only $\frac{1}{3}$ of the bonus, or \$50 is reported so that the bonus period corresponds to the commission period.

5. EARNINGS AND HOURS OF WORK OF NONSUPERVISORY EMPLOYEES —Continued

BLS USE ONLY
