Preface

The Bureau of Labor Statistics conducts annual surveys of wage rates and scheduled hours of work for specified crafts or jobs as provided in labor-management agreements in four industries: Building construction, printing, local transit, and local trucking. The studies present the wage rates in effect as of July 1 of each year, as reported to the Bureau by the appropriate local labor organizations in each of the cities included in the survey.

Information on the union scales and hours prevailing for the printing trades in each city surveyed is available in October of each year on request to the Bureau's regional offices which are shown on the inside back cover. A release summarizing the rates for the printing trades on a nationwide basis was issued in April 1967. This bulletin provides additional data and indexes of the trend of wages and hours for the period 1907-66.

This study was conducted in the Bureau's Division of National Wage and Salary Income by Norman J. Samuels, Chief. Field work for the survey was directed by the Assistant Regional Directors for Wages and Industrial Relations.

Union Wages and Hours:

Printing Industry, July 1, 1966

Summary

Hourly wage scales of unionized printing-trades workers averaged \$3.85 on July 1, 1966, in cities of 100,000 population or more, according to the Bureau of Labor Statistics annual survey of such scales in the printing industry. Scales averaged \$3.69 an hour in book and job shops (commercial) and \$4.07 an hour in newspaper plants.

Labor-management contract scale revisions which became effective between July 1, 1965, and July 1, 1966, raised the hourly scale for 92 percent of the printing-trades workers surveyed. Average hourly scales advanced 12 cents or 3.3 percent for all of the printing craftsmen combined, 12 cents or 3.4 percent in book and job shops, and 12 cents or 3.1 percent for those in newspaper establishments. The hourly advance ranged from 10 and under 20 cents for close to one-half of the workers and amounted to less than 10 cents for about three-tenths.

Straight-time weekly work schedules averaged 36.3 hours on July 1, 1966, compared with 36.4 hours the previous year. The most common workweek, 37 $\frac{1}{2}$ hours, applied to two-fifths of the workers. Straight-time workweeks of 35 hours were specified for close to two-fifths of the printing-trades workers and of 36 $\frac{1}{4}$ hours for nearly a sixth.

Health and welfare (insurance) programs financed wholly or in part by the employers were specified in labor-management agreements applicable to 5 out of 6 of the printing tradesmen. Similarly financed pension plans were provided in contracts covering 2 of every 3 workers.

Scope and Method of Study

Union scales are those agreed on through collective bargaining between trade unions and employers, and defined as (1) the basic (minimum) wage scales (excluding holiday, vacation, or other benefit payments regularly made or credited to the worker each pay period), and (2) the maximum schedules of hours at straight-time rates. Rates in excess of the negotiated minimum, which may be paid for special qualifications or other reasons, are not included.

The information presented in this bulletin was based on union scales in effect on July 1, 1966, and covered approximately 105,000 printing-trades workers in 69 cities with

populations of 100,000 or more. Data were obtained primarily from local union officials by mail questionnaire; in some instances, Bureau economists visited local union officials to obtain the desired information.

The current survey reflects union wage scales in the printing industry in all cities of 100,000 population or more, excluding Honolulu. All cities with 500,000 population or more were included, as were most cities in the 250,000 to 500,000 group. The cities in the 100,000 to 250,000 group selected for study were distributed widely throughout the United States. Data for some of the cities included in the study were weighted to compensate for cities not surveyed. To provide appropriate representation in the combination of data, each geographic region was considered separately when city weights were assigned.

Average hourly scales, indicating current levels, were based on all scales reported in effect on July 1, 1966. Individual scales were weighted by the number of union members at each rate. These averages are not designed for precise year-to-year comparisons because of fluctuations in membership and in job classifications studied. Average cents-per-hour and percent changes from July 1, 1965, to July 1, 1966, were, however, based on comparable quotations for the various occupational classifications in both periods, weighted by the membership reported for the current (1966) survey. The index series, providing long-term trend data, is similarly constructed.

The city and regional averages, presented in tables 8 and 9, are designed to show current wage rate levels; they do not measure differences in union scales among areas. Scales for individual crafts, of course, varied from city to city. The city averages are influenced not only by differences in rates among cities, but also by differences in the proportion of organized workers in the various crafts. Thus, a particular craft or classification may not be organized in some areas or may be organized less intensively in some areas than in others. In addition, certain types of work are found in some areas but not in others. These differences are reflected in the weighting of individual rates by the number of union members at the rate. Therefore, even though rates for all individual crafts in two areas may be identical, the average for all crafts combined in each area may differ.

¹ The averages in the book and job tabulation include rates for the semiskilled—bindery women and press assistants and feeders—as well as the highly skilled journeymen, composing room and pressroom workers, and others. The number of semiskilled workers organized in a city may have influence on the average for the city.

Table 9. Average Union Hourly Wage Rates in the Printing Trades by Region¹ and by Trade, July 1, 1966

Trade	United States	New England	Middle Atlantic	Border States	Southeast	Great Lakes	Middle West	Southwest	Mountain	Pacific
All printing trades.....	\$3.85	\$3.85	\$3.93	\$3.75	\$3.51	\$3.81	\$3.69	\$3.48	\$3.61	\$4.15
Book and job.....	\$3.69	\$3.63	\$3.81	\$3.45	\$3.28	\$3.63	\$3.40	\$3.17	\$3.29	\$4.03
Bindery women.....	2.31	2.00	2.33	1.98	2.06	2.19	2.17	1.86	2.12	2.86
Bookbinders.....	3.89	3.58	3.95	3.34	3.59	3.76	3.75	3.17	3.63	4.39
Compositors, hand.....	4.05	3.79	4.20	3.70	3.59	4.07	3.80	3.46	3.65	4.35
