#### PREFACE

Up-to-date and accurate manpower information is essential in making wise vocational decisions. In recognition of this need, Federal, State, and local government agencies are issuing an increasing number of publications which inform vocational counselors and others about trends and developments which have implications for career decisions. This Guide was prepared to encourage the wider use of these materials.

This bulletin was prepared by Gerard C. Smith, under the direction of Neal Rosenthal, in the Bureau's Division of Manpower and Occupational Outlook. Joseph J. Rooney, Gary G. Rubenstein, and John M. Sumansky assisted in the research and writing of the bulletin.

#### INTRODUCTION

In an ever growing and changing society, such as ours, the task of making sound vocational and educational decisions is a growing challenge. Consider, for example, the pace of technological change in recent years and its effect on job opportunities and job security. Hundreds of thousands of production jobs have disappeared in various regions, occupations, and industries. At the same time, new industries, products, and processes have generated employment opportunities—many of these in new occupations. Educational and training requirements have been raised across a broad range of occupations. Achievement of effective vocational and educational decisions is further complicated by the unusually large numbers of youths and women entering the labor force, and lingering high levels of unemployment among youth, older people, and minority group members.

To meet the challenge, counselors must be informed on the major aspects of the Nation's manpower trends. For example, they should be familiar with the changing job content of occupations; those occupations with excess workers and those with worker shortages; the new occupations resulting from technological change; and those with growing or shrinking employment opportunities. Commenting on the effectiveness of counselors without a full knowledge of occupations, an outstanding leader in the field of counseling points out that "the weak counselor pools his own ignorance of occupations with the ignorance of the client and from this shallow pool tries to help the client to select an appropriate occupation."<sup>1</sup>

A veritable storehouse of occupational and other manpower materials is published by government agencies—both Federal and State—which can help counselors and counselees to achieve the most effective vocational and educational decisions. These publications cover a wide range of subject matters including job descriptions, industry and occupation employment trends, changing occupational structure in industry, entry jobs, training requirements for specific occupations, and starting and managing a small business. Some publications include valuable bibliographies on subjects of particular interest to counselors. Much material published by State agencies deals with current and future occupational employment requirements in individual labor areas; or the duties and characteristics, qualifications required, employment prospects, and related information for individual occupations or groups of related occupations.

The Counselor's Guide to Manpower Information, previously published in 1964,<sup>2</sup> is a selected bibliography of representative materials from all Federal and many State agencies from 1962 through early 1968. Emphasis is placed on the latest available published materials.

In addition to the preceding separate publications which provide national information, many publications provide State and local area manpower information. State employment agencies affiliated with the U.S. Department of Labor publish much valuable information on occupations and employment opportunities in State and local areas. These State agencies prepare two principal types of studies—area skill surveys, which analyze current and future occupational requirements in individual labor areas; and occupational guides, which provide career information for individual occupations or groups of related occupations. State agencies also publish special manpower and labor market studies that deal with future manpower supply, characteristics of the work force, changes in State and area economic activity, and the employment structure of industries.

<sup>&</sup>lt;sup>2</sup>See the Counselor's Guide to Occupational and Other Manpower Information: An Annotated Bibliography of Selected Government Publications. U.S. Department of Labor (BLS Bulletin 1421, November 1964).

The Guide to Local Occupational Information, compiled by the U.S. Department of Labor's Bureau of Employment Security, lists local level occupational guides, occupational guidance publications, and area skill surveys. (See page 19.)

No attempt was made to tap the vast field of private publications; counselors should consult the NVGA Bibliography of Current Occupational Literature, 1966 Edition, published by the National Vocational Guidance Association.

#### Use of the Guide

For ease of finding publications pertaining to a specific subject, the *Guide* is divided into four basic sections: occupational and industry manpower literature; education, financial assistance, and placement information; manpower problems and issues; and special groups in the labor force. Introductions to each section identify the subject area and associated manpower problems. Where applicable, the section introductions describe governmental policies and programs related to them. Each section is divided into several sub-sections which focus on a specific subject. Annotated listings are presented on each subject in alphabetical order. The *Guide* also includes a section on basic statistics, available from government sources, that can be particularly useful to counselors; and a section on directories, catalogs, and bibliographies. Appendixes include helpful hints to counselors on how and where to order government publications.

In citing Federal publications, abbreviations have been used to conserve space. These abbreviations indicate, in order of their appearance, (1) the name of the issuing department and (2) the agency (abbreviation in parentheses) to which requests for free publications may be directed. When agencies within a department are responsible for publications, they are listed immediately after the departmental abbreviation. Free publications may be obtained as long as supplies last. Virtually all *priced* publications may be ordered from the Superintendent of Documents, U.S. Government Printing Office. Federal agencies are listed alphabetically, by their abbreviations, in Appendix B, along with their addresses. (See also Appendixes A through E for information on how and where to order Federal publications.)

Free State and local government publications may be requested from the agency whose name and address appear immediately following the publication title. Priced publications may be ordered from the organization whose name and address appear in parentheses.

Publication citations in the *Guide* that are preceded by an asterisk are considered suitable for counselees and counselors to use. The titles of periodicals are italicized for ease in identification. Information on subscriptions to selected periodicals is provided in Appendix D.

Many of the publications listed in the *Guide* are available free of charge; the others may be purchased. School and public libraries may be sources for some of these publications. Also, Federal depository libraries may be excellent for Government manpower information. (See Appendix E for list and explanation of Federal depository libraries.)

# COUNSELOR'S GUIDE TO OCCUPATIONAL AND OTHER MANPOWER INFORMATION

#### A BASIC MANPOWER BOOKSHELF

Of the hundreds of useful government manpower publications cited in this bibliography, several should be on every counselor's reference bookshelf because they are basic sources of comprehensive, practical, and up-to-date information. These selected publications are identified briefly below with references to the pages in this bibliography where they are discussed.

The Occupational Outlook Handbook is the most comprehensive source of occupational and industry career information available. Published every 2 years by the U.S. Department of Labor's Bureau of Labor Statistics, it provides information on the nature of work, long-term employment outlook, and related topics for hundreds of occupations, and major industries. (See page 4.)

The Occupational Outlook Report Series consists of individual reprints of statements published in the Occupational Outlook Handbook (119 for the 1968-69 edition). These reprints enable counselors to make occupation and industry information readily available to students interested in specific careers. (See page 4.)

The Occupational Outlook Quarterly supplements the Handbook by presenting up-to-date occupational outlook and other timely manpower information. (See pages 9, 86.)

The Dictionary of Occupational Titles (D.O.T.) published by the U.S. Department of Labor's Bureau of Employment Security, is an encyclopedia of job definitions and related data. The 1965 edition of the D.O.T. contains information on about 22,000 jobs, of which about 6,000 are new to the D.O.T. since the previous 1949 edition. (See page 21.)

The Handbook on Women Workers published every 2 years by the U.S. Department of Labor's Women's Bureau, is a sourcebook of facts on women's employment, occupations, earnings, education, and related subjects. (See page 63.)

The Manpower Report of the President including a Report on Manpower Requirements, Resources, Utilization, and Training published annually by the U.S. Department of Labor is the Federal Government's primary report on manpower problems. It discusses the many factors affecting manpower requirements, resources, utilization, and training. (See page 42.)

Each major branch of the Armed Forces publishes a comprehensive career handbook and other helpful materials, which describe occupations and training programs for enlisted men. These publications include: U.S. Army Opportunities; U.S. Navy Occupational Handbook; U.S. Air Force Occupational Handbook; and Occupational Specialties, issued by the U.S. Marine Corps. (See pages 26, 27.)

#### OCCUPATIONAL AND INDUSTRY MANPOWER LITERATURE

#### National Information

The Federal Government is the main source of occupational and industry manpower information that is primarily national in scope. A representative sample of the increasing volume of publications incorporating such information is shown below. The subject matter is varied, but in general deals with careers in individual occupations, employment changes in industries, and education and training programs which lead to jobs in specific fields.

#### OCCUPATIONAL OUTLOOK SERVICE INFORMATION

#### Occupational Outlook Handbook

The Occupational Outlook Handbook, compiled by the U.S. Department of Labor's Bureau of Labor Statistics, is a basic reference book of occupational information. The Handbook is based on information gathered from industry, labor organizations, trade organizations, trade associations, professional societies, Government agencies, and educational institutions. It draws upon an extensive program of research in industrial and occupational trends in the United States.

The *Handbook*, first published in 1949 and every other year since 1957, is now in its eighth edition. It provides comprehensive information for approximately 700 occupations and 30 major industries describing their work, earnings potential, training and educational requirements, and outlook. It also discusses future trends and conditions which are likely to affect employment outlook in the decade ahead. The 1968-69 edition contains 765 pages with many illustrative photographs and charts.

The Handbook and all other Occupational Outlook Service publications are available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, or from any of the eight regional offices of the U.S. Department of Labor's Bureau of Labor Statistics (See Appendix B, page 83 for addresses.) Send check or money order. (See appendix A, page 79 for: How to Obtain Federal Government Publications.)

#### **Occupational Outlook Report Series**

The reports in the *Handbook* are produced in a series of reprints, each of which covers a single occupation, industry, or a group of related occupations. These reprints enable counselors to make occupational information easily available to more students interested in specific careers. Teachers can use the reports as motivational aids in relating school subjects to earning a living. These reprints are invaluable to groups or organizations answering career inquiries with authoritative information. Single reprints can be ordered. (See text pages 4 through 9 for a complete list and prices.)

TOMORROW'S JOBS. Bulletin 1550-A. 12 pp. 10 cents. Special reprint of the introduction to the Occupational Outlook Handbook. It discusses, in nontechnical language, expected population and labor force growth, the changing occupational structure of the economy, and implications for education, training, and future employment opportunities. This reprint is directed to counselors, parents, teachers, and others who assist young people in making vocational choices.

#### Occupational Outlook Quarterly

The Occupational Outlook Quarterly supplements the Occupational Outlook Handbook. It expands and updates occupational outlook and manpower information between Handbook editions. Published four times during each school year (September, December, February, and May), the Quarterly presents timely articles on studies by Government and private organizations and valuable contributions from outstanding authorities on automation, manpower, economics, education, and guidance.

The following citations illustrate the types of occupational and other manpower literature published in the *Quarterly*.

THE MANY FACES OF TECHNOLOGY. Describes different trends in technological change and the net effects these changes will have on industry employment of various occupations.

SYSTEMS ANALYST: A SOFTWARE SPECIALIST. Explains the systems analyst's duties. It also provides information on where they are employed, how to enter the field, and what the outlook is for the next decade.

89 MILLION JOBS BY 1975? Gives information on projected employment growth and on the various factors affecting occupational employment.

OCCUPATIONAL OUTLOOK QUARTERLY. USDL. Bureau of Labor Statistics. Quarterly. 35 cents per copy. Annual subscriptions are \$1.25 domestic or \$1.75 foreign. Free reprints of *Occupational Outlook Quarterly* articles are available from the Bureau of Labor Statistics, Occupational Outlook Service. (See appendix C, page 86 for an index to recent *Quarterly* articles and a list of available reprints.)

#### **Occupational Outlook Slide Series**

This slide series entitled, LOOKING AHEAD TO A CAREER, represents a new visual aid for counselors. It is made up of a set of 36 color slides (2 inch by 2 inch, 35 mm.) which illustrate our Nation's changing occupational and industrial mix. The slide series provides answers to such relevant questions as: "What kind of jobs will there be?"; "What industries will provide these jobs?"; and "What fields of work look especially promising?" The slides also provide additional information about the future economic and educational framework within which individuals must choose their careers. A narrative for use in presenting the slides accompanies each set.

Order the Occupational Outlook Slide Series directly from the Occupational Outlook Service, U.S. Department of Labor, Bureau of Labor Statistics, Washington, D.C. 20212, or from any of the Bureau of Labor Statistics eight regional offices. (See appendix B, page 83 for addresses.) Complete set \$10. Enclose check or money order. The "slide series" cannot be purchased through the Superintendent of Documents.

#### Occupational Outlook Service - Miscellaneous Publications

In addition to the Occupational Outlook Handbook, the report series, and the Quarterly, other reports, studies, and pamphlets are available. A series of motivational pamphlets that describes the relationship between academic subjects and possible careers is available. Another series of reports describe the outlook for jobs in which less than high school, high school, or college educational backgrounds are required or desirable. These reports provide information on the number of workers employed, training requirements, and the employment outlook for a large number of occupations.

Occupational Outlook publications are announced in the *Quarterly* as they become available. The Occupational Outlook Service also has a mailing list for free publications. Write to, Occupational Outlook Service, U.S. Department of Labor, Bureau of Labor Statistics, Washington, D.C. 20212, to have your name placed on the mailing list.

Motivational Pamphlets: Education has become an important stepping stone to a career. It has grown in importance due to the increasing demand for the "specialist" in all occupations. The Bureau of Labor Statistics has prepared several free leaflets describing the relationship of a number of academic subjects to possible careers.

\*ENGLISH AND YOUR CAREER. USDL. Bureau of Labor Statistics. Leaflet. (OOS). 1966. Free. Describes the importance of English in every day activities and job hunting. Also discusses the possibilities that exist for making a living with a proficiency in English. Lists OOH reprints dealing with careers which require varying degrees of skill in English.

\*FOREIGN LANGUAGES AND YOUR CAREER. USDL. Bureau of Labor Statistics. Leaflet. (OOS). 1966. Free. Discusses careers in which knowledge of a foreign language is either essential or a handy extra tool. Lists OOH reprints describing job opportunities where a foreign language is helpful.

\*MATHEMATICS AND YOUR CAREER. USDL. Bureau of Labor Statistics. Leaflet. (OOS). 1966. Free. Explains the importance of training in mathematics for high school and college students. Tells how to find out whether mathematics is needed for a given career field. Lists *OOH* reprints describing job opportunities in occupations that require training in mathematics.

\*SCIENCE AND YOUR CAREER. USDL. Bureau of Labor Statistics. Leaflet. (OOS). 1966. Free. Explains the importance of training in the sciences for high school and college students. Tells how training fits into different careers and how to find out whether science is needed for a given career. Lists OOH reprints containing information on careers requiring training in science.

\*SOCIAL SCIENCE AND YOUR CAREER. USDL. Bureau of Labor Statistics. Leaflet. (OOS). 1966. Free. Discusses careers open to students of social science, and the value of social science courses in many occupations not directly related to the subject. Lists the OOH reprints describing job opportunities in the field.

\*YOUR JOB AS A REPAIRMAN OR MECHANIC. USDL. Bureau of Labor Statistics. Leaflet. (OOS). 1966. Free. Presents some of the opportunities available to those people who possess a mechanical aptitude. Briefly describes job prospects, nature of the work, where training is available, and where to go for further information. Lists the OOH reprints for occupations in which mechanical ability is helpful.

#### OCCUPATIONAL AND INDUSTRY MANPOWER STUDIES

Changes in the number of workers employed in occupations and industries are inevitable in an economy typified by changing markets, technology, resources, and other characteristics. Many agencies of the Federal Government prepare studies and reports on occupational and industry employment. These studies may cover the economy as a whole or individual occupations and industries. Examples of occupational and industrial manpower literature are listed below.

#### Occupational Manpower Studies

AMERICA'S INDUSTRIAL AND OCCUPATIONAL MANPOWER REQUIREMENTS, 1964-75. The Outlook for Technological Change and Employment, pp. 9-187. #### State and Local Area Information

A great deal of information on occupations and employment opportunities is published by State employment security agencies. These State agencies prepare two principal types of studies—area skill surveys and occupational guides. One or more such studies have been published by 50 State agencies since 1957. State agencies also publish special studies that deal with future manpower supply, characteristics of the work force, changes in State and area economics, and the employment structure of industries.

Area skill surveys analyze current and future occupational requirements in individual labor areas. Survey data provide a basis for anticipating the occupational needs of area industry and estimating the supply of qualified manpower. Some specific topics covered by most area skill surveys are: The occupational composition of current employment, by sex and broad age groups; future occupational requirements—usually 2 to 5 years hence; current occupational supply and demand situations; the supply of workers expected to be trained over the forecast period; information on apprenticeship and other training programs; the number of workers in training; and employer opinion regarding the need for pre-employment or supplementary vocational training.

Occupational guides contain information on job duties; employment prospects; working conditions; entry methods; advancement opportunities; hours and earnings; and education, training, and experience requirements for individual occupations or groups of related occupations. Occupations selected for analysis usually are those important to local industries, or those of interest to particular groups, such as young workers.

Special manpower and labor area studies cover a wide variety of subjects, including: (1) manpower projections, (2) studies of State and area economics, (3) studies of labor force characteristics, e.g., age, sex, racial composition, and (4) industry analyses.

Counselors should request lists and copies of published reports from the reports and analysis section of the individual State agencies. Also, the U.S. Department of Labor's Bureau of Employment Security has two free publications designed to promote wider acquaintance with and increased utilization of labor information issued by State employment security agencies. These publications are: (1) *Guide to Local Occupational Information*, which lists occupational guides and area skill surveys issued by State agencies through mid 1966; and (2) *Job Opportunities Information*, which lists occupational guides and skill surveys currently in process.

Examples of studies done by State employment security agencies are listed below:

For specific information about jobs in individual States or local areas, counselors should consult the following government agencies: (1) State employment service offices and (2) State apprenticeship agencies. The State employment service and its local offices have a list of hard-to-fill job vacancies compiled from Bureau of Employment Security interarea clearance lists. Such lists are valuable in locating job openings. State apprenticeship agencies can provide useful information about training opportunities and requirements in many skilled occupations.

The U.S. Department of Labor's Bureau of Employment Security, publishes a bimonthly report called AREA TRENDS IN EMPLOYMENT AND UNEMPLOYMENT. This publication reports on the adequacy of labor supply for 150 major labor areas and a number of smaller ones. Each area is classified into 1 of 6 categories ranging from labor shortage to high unemployment. Also presents a roundup of area labor developments, and employment outlook for selected industries and occupations.

#### Job Descriptions

Rapidly changing technology creates many new jobs and destroys many others. Also important, however, are the influences of technological advances on job content and, therefore, on the training requirements of occupations. Changes in job content are often obscured because job titles remain unchanged.

Job descriptions are available in various types of government publications, including many job guides and wage surveys. Some State governments publish handbooks of occupational briefs, which describe those jobs important to the State's economy. *The Dictionary of Occupational Titles*, popularly called "THE D.O.T." is an encyclopedia of job definitions and related information.

DICTIONARY OF OCCUPATIONAL TITLES, 3d Edition.

VOLUME I. DEFINITIONS OF TITLES. USDL. Bureau of Employment Security. 1965. 809 pp. \$5. Alphabetically lists over 36,000 different occupational titles. Defines and identifies by code number almost 23,000 separate occupations.

VOLUME II. OCCUPATIONAL CLASSIFICATION AND INDUSTRY INDEX. USDL. Bureau of Employment Security. 1965. 656 pp. \$4.25. Presents the occupational classification structure developed by the U.S. Employment Service, which is arranged under two systems. The first system groups jobs in numerical order according to some combination of work field, purpose, material, product, generic terms, and industry. The second system groups jobs according to a combination of required general educational development, specific vocational preparation, aptitudes, interests, temperaments, and physical demands. Lists all titles by industry.

SELECTED CHARACTERISTICS OF OCCUPATIONS-A SUPPLEMENT TO THE DICTIONARY OF OCCUPA-TIONAL TITLES. USDL. Bureau of Employment Security. 1966. 280 pp. \$2.75. Presents information on physical demands, working conditions, and training time for each job defined in the *Dictionary of Occupational Titles*.

## EDUCATION, FINANCIAL ASSISTANCE, AND PLACEMENT INFORMATION

#### Education, Training, and Retraining

Lack of education and training is a basic factor in unemployment. Although steady gains in the educational attainment and formal training of American workers have helped them meet the demands of rising job standards and shifting occupational patterns, millions still lack basic education and preparation for work. Thus, in March 1967, more than 750,000 of the unemployed were high school dropouts, and almost 750,000 had finished 8 or fewer years of school. These unemployed, because of their limited schooling, have difficulty not only in finding new jobs but also in finding training opportunities.

Education and training requirements for employment are increasing steadily. Yet, about 30 percent of all youths now drop out of school before finishing the twelfth grade. All aspects of the employment situation are less favorable for school dropouts than for young people who have completed at least high school. For example, the unemployment rate of school dropouts is much higher than that of high school graduates; dropouts have difficulty in obtaining full-time work; the jobs they do get are among the less desirable; and their lack of education handicaps them in acquiring training and adapting to technological and occupational changes.

Education and training problems affect manpower and the economy as a whole. Therefore, the Federal Government has instituted a number of programs to help achieve a work force using the skills and flexibility demanded in today's world. These programs include, for example, Federal grants to supplement State and local expenditures for vocational education and technical training; training institutes for science teachers and assistance to medical and dental schools; fellowships for postgraduate work in the natural and social sciences, engineering, and other professional fields; and inservice training for Federal civilian employees and the Armed Forces.

Congress has enacted legislation responsive to education and training needs. For example, the Manpower Development and Training Act of 1962 and its amendments provide for education and training programs to equip the unemployed and underemployed with marketable skills. Under the Trade Expansion Act of 1962, workers who are laid off or working only part time because of increased imports resulting from tariff concessions are eligible for retraining allowances and other financial aid. The Vocational Education Act of 1963 encourages States to establish and expand vocational education programs to provide more students with occupational training and help upgrade workers' skills. The Higher Education Act of 1965 provides funds to help financially weak colleges and universities; to give financial aid to students; and to improve the quality of undergraduate instruction. Under the 1963 amendments to the National Defense Education Act, the ceiling on Government loans to college students was raised. These amendments also provide increased funds for school counseling and testing. Money was made available to purchase a greater variety of teaching equipment in certain subject areas. In addition, the Economic Opportunity Act of 1964 established programs to increase opportunities for youth to obtain education, vocational training, and useful work experience.

The Department of Labor administers a number of manpower development programs, chiefly, the work-training programs (Neighborhood Youth Corps, Job Corps, and others) provided by the Economic Opportunity Act; the training activities under the Manpower Development and Training Act of 1962 (MDTA); and programs to promote apprenticeship training.

The various measures taken by the Government generally are designed to strengthen education, training, and retraining at all levels and for all groups. It is hoped that these measures lead to a long-run solution of the many educational problems.

Information on these problems and programs is available in the publications listed below. (For appenticeship information see page 53.)

#### **Financial Assistance To Students**

The costs of higher education prevent many gifted young people from attending college. At the same time, modern technology is altering manpower requirements towards more education and training. To relieve this problem, the Federal Government has developed an extensive program of scholarships, Government loans, and Government insured private loans under the National Defense Education Act of 1958. Work-study programs are provided by institutions of higher education under the Economic Opportunity Act of 1964, and outright grants to exceptionally needy high school graduates are being made through the Educational Opportunity Grant Program authorized by the Higher Education Act of 1965.

Some Federal Government agencies including the Atomic Energy Commission and the National Aeronautics and Space Administration separately sponsor financial assistance programs for needy and gifted students, often in conjunction with private groups. A vast number of private associations and institutions also give scholarships and loans to deserving students.

A new program, set up under the Veterans' Readjustment Benefits Act of 1966, authorizes aid up to 36 months of college or other institutional training for veterans who have had military service since January 1, 1955.

The following are examples of publications that provide information on the financial assistance available to help individuals achieve their educational goals:

AIDS TO STUDENTS. USDHEW. Office of Education. Booklet. (OE). 1966. 45 pp. Free. Provides information on financial aids to students in vocational, college, and graduate study programs. Gives financial aid information. Written in English, French, and Spanish.

# Job Placement Information

Many young people need assistance in securing employment or in choosing suitable work. The United States Employment Service and affiliated State employment service offices form a nationwide organization which, through trained employment counselors in 1900 local offices throughout the United States, finds jobs for workers and workers for jobs. Young people who are now, or soon will be, looking for a job can obtain help through their local State employment service office. Job placement help, counseling aid, and aptitude and proficiency testing are provided free.

The U.S. Department of Labor's Bureau of Employment Security and other Federal agencies publish information designed to aid young people seeking jobs. Examples of this type of publication are listed below.

\*CHOOSING YOUR OCCUPATION. USDL. Bureau of Employment Security. Pamphlet. 1965. 16 pp. 15 cents. Develops guidelines for choosing a vocation to fit the aptitudes and interests of the prospective worker. Lists other possible sources of information for answers to some specific occupational questions.

GETTING HIRED, GETTING TRAINED. USDHEW. Welfare Administration. Booklet. 1965. 112 pp. 40 cents. Discusses many of the training and experience problems faced by young workers.

\*HOW TO GET AND HOLD THE RIGHT JOB. USDL. Bureau of Employment Security. 1967. 19 pp. 10 cents. Enumerates tips on getting and holding a job. Includes: Considering job requirements in light of the jobseekers qualifications; how to prepare for an interview; how to write a letter of application; reasons people sometimes fail to get jobs; and why workers lose their jobs.

\*HOW TO PREPARE YOURSELF FOR JOB INTERVIEWS. USDL. Bureau of Employment Security. Pamphlet. 1965. 10 pp. 10 cents. Furnishes helpful hints on the preparation and conduct for job interviews.

\*JOB GUIDE FOR YOUNG WORKERS, 1963-64 Edition. USDL. Bureau of Employment Security. 1963. 78 pp. 45 cents. See page 66 for annotation.

Lists occupations handled by and locations of professional network offices.

\*MERCHANDISING YOUR JOB TALENTS. USDL. Bureau of Employment Security. Pamphlet. 1965. 20 pp. 25 cents. Presents some of the basic techniques and principles of preparing a job resume, and for writing a letter of application. Lists sources of job information and gives hints on preparing for job interviews and testing.

PLACEMENT SERVICES FOR COLLEGE TEACHERS. USDL. Manpower Administration. (MA). 1965. 240 pp. Free. Identifies and catalogues the different sources of college teacher placement assistance and explains the services they offer. Gives detailed descriptions of the activities of some of the best placement operations.

\*YOUR PUBLIC EMPLOYMENT OFFICE CAN SERVE YOU. USDL. Bureau of Employment Security. Leaflet. (BES). 1965. 3 pp. Free. Reports on the various manpower services, such as testing and recruitment, which are available at local public employment offices.

## MANPOWER PROBLEMS AND ISSUES

Unemployment and underemployment are two of the country's major economic problems. Although we have experienced rapid economic growth in recent years, we have not been able to improve the quality, adaptability, and mobility of the labor force sufficiently to obtain full employment. Even today, in the midst of an economic expansion, many workers cannot find employment or are forced to work at jobs that do not make full use of their skills and abilities.

Underlying unemployment, underemployment, and other serious manpower problems have been factors such as, a swelling labor force, rapid technological innovation, changes in defense requirements, and changes in consumer and business demand for goods and services. These developments have altered occupational requirements in favor of jobs requiring greater education and training. Employment in white-collar occupations has risen faster than in manual occupations. Also, among both blue-collar and white-collar occupations, there has been a shift away from jobs requiring relatively little skill.

Other factors contributing to imbalances in manpower supply and demand are the large number of youths who lack the education necessary for a rewarding adult life; the unwillingness or inability of many workers to respond quickly to employment opportunities and to adjust to changing job requirements; and the existence of serious manpower shortages in some occupations while, at the same time, there is a large supply of unused manpower. Also, developments such as the rapid growth in the number of young job seekers, along with technological and other changes in skill requirements, indicate a long-term persistence of manpower problems.

Our basic manpower problems, as well as measures designed to alleviate them, are the focus of the publications annotated in this section.

EDUCATION AND TRAINING: EXPANDING THE CHOICES. USDHEW. Office of Education. OE-87020. 1967. 107 pp. 60 cents. Previews and evaluates the programs set up under the Manpower Development and Training Act of 1962. Describes the characteristics of trainees, courses of instruction, training facilities, training costs, experimental and demonstration projects, and related subjects. Discusses the need to continue the manpower training program and steps that can be taken to make the program more effective. Includes a statistical appendix.

MANPOWER REPORT OF THE PRESIDENT INCLUDING A REPORT ON MANPOWER REQUIREMENTS, RESOURCES, UTILIZATION, AND TRAINING. Transmitted To The Congress, April 1968. USDL. 1968. 323 pp. \$2.25. Reports on the many factors affecting manpower requirements, resources, utilization, and training. Some examples of the many topics covered are: Industry employment trends; employment gains in the regions and States; Government and manpower requirements; manpower supply and demand; joblessness and poverty in urban slums; underemployment and poverty in rural areas; unemployment and underutilization of manpower; skill shortages and training needs; and much more. Includes an extensive statistical appendix. (Also available for 1963 through 1967).

MDTA: A SUMMARY OF THE MANPOWER DEVELOPMENT AND TRAINING ACT OF 1962, AS AMENDED. USDL. Manpower Administration. (MA). 1965. 28 pp. Free. Analyzes the provisions of the Manpower Development and Training Act and briefly describes the research and training activities undertaken since the act was passed.

QUIET REVOLUTION, THE. OEO. 2d. Annual Report. (OEO). 1966. 137 pp. Free. Reports on the progress made in implementation of the programs established by the Office of Economic Opportunity to eliminate the causes of poverty. Discusses the development of such programs as Job Corps, Neighborhood Youth Corps, Project Head Start, College Work-Study, Adult Basic Education, Legal Services, Rural Loans, and programs for Indians and migrants. Contains an appendix of statistics on the various programs.

VOCATIONAL EDUCATION AND MANPOWER NEEDS. USDL. Manpower Administration. Reprint No. 5. (MA). 1964. 4 pp. Free. Describes the purpose of the Vocational Educational Act of 1963 and the importance of integrating it with the various programs of the Departments of Labor, and Health, Education, and Welfare.

Manpower Research Bulletins, published by the U.S. Department of Labor's Manpower Administration, develop information on the country's manpower situation. Several of the bulletins provide research data on worker mobility in view of economic changes, and on manpower and training programs and their implications on the national and State level. Other bulletins provide training information for specific groups in the labor force. Descriptive profiles, training activities, job placement, and future employment possibilities are usually included in the reports on each group.

#### **Defense Expenditures and Manpower Needs**

Expenditures for national defense generate a large volume of employment. More than 8.7 million persons were employed in defense-related activities in early 1967. More than half of these workers were directly employed by the Federal Government—about 3.4 million military personnel and over 1.2 million civilians in the Defense Department. Nearly 4.1 million workers were employed in defense-related industries supplying missiles, research and development, and other goods and services.

Shifts in the size and types of defense programs can influence overall economic activity. For example, the increased importance of missiles has resulted in the need for additional thousands of scientists, engineers, and technicians, in some cases aggravating already short supplies. Changes in defense programs have a marked impact in States and communities where defense-related employment is a large proportion of total employment. The termination of defense contracts often creates pools of unemployment in these areas.

The Federal Government has established various programs to help counteract the employment effects of changing defense requirements. For example, the Manpower Development and Training Act of 1962 and its amendments encourage business firms to establish facilities in areas of high unemployment. Defense expenditures can be used as a tool to reduce unemployment; under certain conditions, plants in areas of high unemployment may receive special consideration in the awarding of contracts.

## **Depressed Areas**

Since World War II, economic growth and employment have lagged in some areas. Shifts in consumer demand, technological change, depletion of natural resources, and outmigration of industrial plants have created pockets of poverty. Often, these depressed areas are relatively small communities that are heavily dependent upon one industry, and offer little diversity of employment opportunities. Provisions of the Manpower Development and Training Act of 1962 seek to aid areas of high unemployment by encouraging firms to locate plants in these areas and by training unemployed workers to fill existing vacancies and anticipated new jobs. The Public Works and Economic Development Act of 1965 is designed to help communities, areas, and regions in the United States which are suffering from excessive unemployment or underemployment. Administered by the U.S. Department of Commerce, Economic Development Administration, the act provides for financial and technical assistance needed to create new jobs. Focuses on the composition of the population, labor force participation, and some key characteristics of the structure of unemployment in depressed areas. Considers policy implication for area redevelopment programs.

## Labor Standards

Legal statutes relating to minimum wage, overtime pay, hours of work, length of workday, minimum age for employment, accident compensation, working conditions, social security, unemployment insurance, and more recently discriminatory hiring practices, have been enacted to protect the health, wages, general welfare, and rights of workers. These laws cover groups in the economy such as women, children, Negroes, and farmworkers, who have, in the past, encountered some difficulty in maintaining either their position or rights as workers.

In 1961, Congress amended the Fair Labor Standards Act (FLSA) to raise minimum wages and extend the coverage of minimum wage and overtime pay laws to new industries, including retail trade. A 1966 amendment extended coverage to some farmworkers. Another recent amendment, the Equal Pay Act of 1963, requires that men and women receive equal pay for equal work. Other legislation applicable to women covers minimum wage, maximum daily and weekly hours, nightwork, meal periods, and industrial homework. The Equal Employment Opportunity Commission, appointed according to the Civil Rights Act, became effective in July 1965, and has moved to eliminate discriminatory practices by employers, unions, and employment offices. Also, there are child labor laws that restrict the kinds of work young people may do, and the number of hours they may work while school is in session. In addition to Federal labor laws, many State laws are designed to protect the standards of work and rights of employees.

Workers dealing with life, health, safety, general welfare, and property usually are required to be licensed. For example, professional workers, such as physicians, dentists, pharmacists, teachers, and certified public accountants, must be licensed. In addition, workers in more than 100 nonprofessional occupations such as optician, plumber, beautician, and well driller, require licenses in one State or more. Licensing requirements differ by State according to training, experience, and age.

# Technological Change

Technological change promises many social and economic advances including higher standards of living, better working conditions, and more leisure time. Advancing technology already has given rise to new industries and new jobs, and has relieved men of much heavy physical labor and much dangerous and repetitive work. However, these benefits have not been without cost. Although total employment has reached new peaks, unemployment and underemployment continue to be serious problems. Responsibility for trying to reduce the burdens imposed by technological change falls upon employers, workers and their representatives, and government. Recognizing their responsibility, all groups have acted to alleviate the hardships caused by technological progress. For example, some business firms have established personnel policies that call for the reassignment or retraining of displaced workers. Recent labor-management agreements provide for early retirements, lump sum severance pay, and relocation allowances. In addition, Congress has enacted legislation to provide for the training and retraining of workers. Examples of such legislation are: the Manpower Development and Training Act of 1962, as amended; the Economic Opportunity Act of 1964; and the Vocational Act of 1963.

## Worker Mobility

The efficient allocation of labor depends on both occupational and geographic mobility. In recent years, there have been substantial changes in the occupational distribution of employment and in job requirements. Yet, the labor force has met this problem without any major difficulties. A rising educational level has been the major force behind the rapid and successful adjustment of the labor force to changing occupational requirements. Nevertheless, for many individuals occupational mobility is limited by the lack of adequate education and the inability to acquire the necessary skills. Geographic mobility is restricted by lack of information and by the inability of jobseekers to finance transportation, job search, and change of residence. Moreover, the mobility of workers is limited by job discrimination against minority group members and the nontransferability of pension and seniority rights from job to job.

The Federal Government is sponsoring studies to aid in the development of policies to increase worker mobility while preserving the traditional right of workers to choose their own employment. An amendment to the Manpower Development and Training Act of 1962 (MDTA) authorizes the Secretary of Labor to carry out a number of labor mobility projects designed to assess the feasibility of relocation assistance (grants or loans) in reducing unemployment.

# SPECIAL GROUPS IN THE LABOR FORCE

## Agricultural Migrants

Migrant agricultural workers-numbering about 400,000 in recent years-are an economically and socially handicapped group. Their incomes are small and their work is seasonal. Most migrant workers are required to pay their own travel and living expenses while they are away from home. The availability of work when they reach their destination often is uncertain, as are their wage rates and the duration of work. Generally, they are not covered by laws providing for unemployment insurance, or the right to bargain collectively with their employers. In addition, migrant workers-with their low levels of education and training-seldom qualify for nonfarm jobs.

The special problems of migratory farmworkers recently have been the focus of attention by Federal, State, and local governments. In 1966, the Office of Economic Opportunity approved grants to 76 agencies operating in 35 States for education, day-care, housing, and sanitation projects for migrant and seasonal farmworkers. Approximately 150,000 farmworkers benefited from these programs. In addition, many adult education programs have been organized under which farmworkers receive a stipend while attending classes, thus equipping them for additional job training programs and better paying jobs.

The U.S. Department of Labor's Employment Service has expanded its Annual Worker Plan. Under this program, workers, employers, and employment service officers attempt to regulate and maximize migrant worker employment and plan their work schedules in the most beneficial manner. Under the Smaller Communities Program of the Employment Service, detailed information is collected on the manpower resources of rural communities in 18 States. This program offers employment services to sparsely populated areas which cannot support a permanent office, develops training proposals, and provides placement and counseling services. The Farm Labor Service also is experimenting with counseling, training, and relocation programs for rural workers.

#### Apprentices

Apprenticeship is training for those occupations, commonly known as skilled crafts or trades, that require a wide and diverse range of skills and knowledge, as well as extensive work experience. There are about 400 apprenticeable occupations, representing 90 trades.

Training for craftsmanship under apprenticeship programs is based largely upon on-the-job practice under the supervision of a skilled journeyman. Such training is often combined with classroom instruction in the practical and theoretical aspects of a trade. Apprenticeship provides a job and, at the same time, a long-term training program. The duration of apprenticeships generally ranges from 2 to 6 years, depending upon the complexities of the skills involved.

Only a small proportion of young persons currently are being trained in apprenticeship programs. At the end of 1966, about 208,000 apprentices were covered by programs registered by the Department of Labor or cooperating State agencies. Three major trade groups accounted for more than 85 percent of the registered apprentices. Fifty-nine percent were in the building trades (in the construction industry and elsewhere), almost 22 percent in the metal trades, and 6 percent in the printing trades.

The U.S. Department of Labor's Bureau of Apprenticeship and Training (BAT) has long been promoting apprenticeship training by encouraging the establishment of apprenticeship programs and by providing technical assistance for setting up such programs. The Bureau works closely with employers, labor, vocational schools, and others concerned with apprenticeship programs. In this undertaking, both labor and management have the assistance of the Bureau's field representatives located in each of the 50 States.

## Handicapped Workers

Vocational rehabilitation of the almost 2½ million physically handicapped persons of working age is a major problem in the United States. In addition, about 3 million mentally retarded persons are considered to have potential for earning a living. Despite their impairments, handicapped workers, as a group, have proven themselves to be efficient and dependable. After sufficient training they can compete with nonhandicapped workers. Placement of the handicapped, however, is hindered by bias on the part of many employers who believe that handicapped workers lack the ability and dedication to perform well on the job.

Action to combat employer prejudices is being taken on many fronts. For example, the Federal Coordination Program for Employment of the Handicapped, established in 1964, placed 9,000 handicapped workers in Federal Government jobs the first year, and 17,000 in 1966. Similarly, a cumulative total of 3,900 mentally retarded workers have been placed in 39 Federal Government agencies between the program's initiation in 1964 and late 1967. In addition, hundreds of mentally retarded persons are being trained annually for many different occupations under this program. The Vocational Rehabilitation Act amendments of 1965 made possible increased Federal participation in the rehabilitation of the severely handicapped. Handicapped workers who lose their jobs in distressed areas, or who are unemployed for long periods, may qualify for assistance under Federal manpower training and retraining programs. In addition, much work has been done by voluntary associations and large industrial employers to help the handicapped.

APPLICATION FOR EMPLOYMENT: TO AMERICAN INDUSTRY FROM THE PHYSICALLY HANDICAPPED. PCEH. (PCEH). 1965. 24 pp. Free. Discusses the importance of the handicapped worker in the accelerating search for trained manpower in the U.S. Compares the abilities and records of the handicapped with unimpaired workers. Presents several case histories of handicapped workers now gainfully employed.

WASTED ASSETS? PCEH. Booklet. (PCEH). 1965. 15 pp. Free. Gives brief summaries of how seven different communities have gone about informing and improving public understanding of the employment needs, abilities, and skills of the mentally restored.

## **Minority Groups**

The enactment of the Civil Rights Act of 1964 marked the efforts of the Federal Government to put an end to discrimination in the hiring and career advancement of minority groups. However, Negroes and other minority groups often are disadvantaged because of a lack of education and training. Although the economic status of Negroes has improved steadily in recent decades, they still lag behind the majority of citizens in economic well-being. Negroes continue to be concentrated in the low-skilled occupations and their rate of unemployment is about twice that for white workers. Members of other minority groups-for example, Puerto Ricans and Mexicans-have the additional problem of language barriers.

Federal efforts to promote equal job opportunities for Negroes and other minority groups have been intensified in recent years. The Economic Opportunity Act, enacted in 1964, is designed to improve the motivation, skills, employability, and social outlook of the young people of the country. Under the Manpower Development and Training Act, members of minority groups are being prepared for occupations that offer greater stability of employment. Also, in January 1964, the U.S. Department of Labor issued regulations barring the registration of apprenticeship programs that fail to ensure equality of opportunity.

AMERICA IS FOR EVERYBODY. USDL. Bureau of Employment Security. 1963. 19 pp. 30 cents. Reports on the progress of the Negro towards social and economic equality. Lists examples of projects designed to develop new or improve skills, conserve existing skills, prevent deterioration of work habits, or attain employment for older persons.

#### **Older Workers**

Although older workers are less likely than younger workers to lose their jobs, those who become unemployed often face serious difficulties in getting new jobs and may remain unemployed for long periods. Older workers are likely to have less formal education than younger people and their education may not be keyed to current occupational demands; they often encounter hiring age limits set by employers; and they may find it difficult to move to areas offering greater employment opportunities because of home ownership, and family and other community ties. Older workers also may be forced to take jobs that make little or no use of their previously acquired skills and experience.

In recent years, both the Federal and State Governments have taken steps to meet the problems of older workers. Notable among these steps is the Manpower Development and Training Act of 1962 (MDTA), which provides for training of unemployed and underemployed workers who lack the skills needed in today's labor market. Recent amendments to MDTA provide for basic literacy training. Provision is made for subsistence allowances during the training period and relocation allowances designed to assist individuals leaving an area to find appropriate employment. Similarly, the Economic Opportunity Act of 1964 established several programs that offer financial support or pay training costs for needy adults who enroll in projects intended to eliminate illiteracy and raise their levels of education or training.

Other programs include the assignment of older worker specialists to a number of State employment service agencies that are cooperating with training, rehabilitation, and welfare agencies serving older workers.

It advises the older person about drawing up a will, arranging control of assets, or beginning a small business.

#### Part-Time Workers

One of the notable postwar changes in the utilization of this country's manpower is a marked increase in part-time employment-employment for fewer than 35 hours a week. The great bulk of such employment is voluntary in the sense that the workers are not seeking full-time employment. Part-time workers are primarily housewives and students who are not available or willing to work full-time because of family, school, or other obligations. Another large group is composed of semiretired persons and others who prefer not to work a full week, or cannot because of ill health or partial disability.

Workers on part-time for economic reasons are those who want full-time work but cannot find it, or who are employed on jobs that are ordinarily full-time but have been cut back because of business conditions. In 1966, these workers accounted for nearly one-sixth of the total part-time employed.

The recent prolonged period of prosperity has helped the employment situation of those seeking part-time work. Employment among full-time workers rose 1.8 million in 1966, 230,000 less than in 1965; the increase in 1966 among part-time workers was 600,000, double that for the previous year.

Includes discussions of full and part-time employment.

#### Veterans

The serviceman who returns to civilian life has several alternatives as to what his future work status will be. He may choose to return to the job he held prior to entering the service, or he may decide to obtain training to better equip him in the civilian world of work.

The Universal Military Training and Service Act of 1947 guarantees to the veteran the same seniority, status, and pay he would have received if he had continued his employment from the time of his entering the Armed Forces until the time of his reemployment. Training allowances are available under the Manpower Development and Training Act of 1962, as amended, to ex-servicemen who are enrolled in vocational school programs to learn a skill needed in industry. On-the-job training and other programs for veterans are also available under the MDTA. Under the benefits of the Veterans Readjustment Act of 1966, veterans can receive aid for up to 36 months of college or other institutional training.

In addition to the training and education programs available to veterans, efforts are being made to make Armed Forces training equip the serviceman with skills and experience that will aid him in obtaining a civilian occupation as well as for his duties while in the service.

EMPLOYMENT SERVICES FOR VETERANS. USDL. Bureau of Employment Security. Booklet. (BES). 1967. 22 pp. Free. ## Women and Girls

The rising number of women workers and their expanding job opportunities attests to their growing contribution to economic activity. Between 1966 and 1980, the number of women in the labor force is expected to rise from about 28 million to 36 million, an increase of about 29 percent.

For some time women have been faced with problems that limit the full realization of their economic potential. For example, since women's occupational role traditionally has been narrowly conceived, the extent of their education and training often has been limited. Consequently, many of the lowest paid jobs in manufacturing and service industries have been filled by women. Many barriers to the employment of women were dropped when the Civil Rights and Equal Pay Acts of 1964 were enacted.

Since many married women now enter the labor market because home and family responsibilities take less time, they need specialized guidance and counseling in making decisions concerning education, employment opportunities, and leisure time activities. Women returning to work after years of homemaking often have job placement problems, because the skills they once possessed are obsolete. Young girls need to be made aware of the careers open to them and encouraged to enter occupations where their greatest interests lie.

#### Youth

An unprecedented number of young people will enter the labor force in the next few years. Although job prospects for young people who complete college will be highly favorable, school dropouts will face major job problems since, in many of the occupations traditionally open to them, employment is expected to increase slowly or, in some cases, decline. Also, many of the jobs for which dropouts qualify offer little security.

Unemployment is much higher among young people than adults. Because youths are relatively inexperienced and lack seniority they are often vulnerable to layoffs. Also, young people frequently quit jobs in hope of finding some suitable career fields.

The employment problems of many youths are complicated not only by inadequate training, but also because they lack vocational guidance and motivation. The special handicaps faced by racial minorities, rural youths, and physically or mentally handicapped youths create additional employment problems.

The Economic Opportunity Act of 1964 is heavily oriented toward aiding young workers. The Job Corps, Neighborhood Youth Corps, and Work-Study Program, established under the Act, enable young people to gain more education, vocational training, and work experience. Counselors and other educators, parents, representatives of management and labor, and government officials, both at the national and local level, face the challenge of developing action programs or in revising existing programs. This section provides examples of literature dealing with the special employment problems, policies, and programs concerning young workers.

## SCHOOL DROPOUTS

A boy or girl who enters today's job market without a usable skill is severely handicapped. For example, in October 1965, more than 1 of every 5 high school dropouts was unemployed-almost twice the ratio of high school graduates. The situation for dropouts can be expected to become worse in the coming years, because workers without a high school diploma will have increasing difficulty entering those expanding occupations where education and training qualifications are high.

Dropouts are handicapped, not only by their lack of education and experience, but also by the unfavorable image that dropouts have among employers. Dropping out of school often suggests lack of motivation and perseverance, difficulty in learning, and the absence of other qualifications that employers look for in job applicants.

CHARACTERISTICS OF SCHOOL DROPOUTS AND HIGH SCHOOL GRADUATES, FARM AND NONFARM, 1960. USDA. Economic Research Service. Agricultural Economic Report 65. (USDA). 1964. 32 pp. Free. Contains commentary and tables on the socio-economic characteristics of school dropouts and high school graduates, from ages 16 to 24. ## SOURCES OF STATISTICS USEFUL TO COUNSELORS

Federal and State Government agencies compile and publish a great variety of statistical information that details the characteristics of our population and labor force. Much of this information can be useful to counselors. For example, such statistics provide information on the number employed in an occupation; whether its workers are geographically concentrated or dispersed; whether the occupation employs more men than women, more white than nonwhite, more young persons than old; and the industries in which its workers are employed. Counselors can use such information to identify jobs for youth or to help determine the relative importance of particular occupations and industries in their localities.

The purpose of this section is to familiarize counselors with employment and related statistics available from several major Federal, State, and local sources. Examples of how counselors can use the statistics are given. The sources depict the social and economic characteristics of State and local populations or those of the Nation as a whole. These sources supply three main types of data; employment by occupation and industry, current employment and unemployment, and wages.

(See also: Occupational and Industry Manpower Literature, page 4.)

## I. Employment by Occupation And Industry

a. The U.S. Census of Population, compiled and published every tenth year, is the most comprehensive source of statistical information on employment by occupation and industry. The most recent Census data are for 1960. Counselors will find that the most useful of the many Census reports are those called "Detailed Characteristics," which are available for each State. These reports provide information on the population's social characteristics such as age, race, school enrollment, and school years completed; and economic characteristics, metropolitan areas with population exceeding 100,000 are tabulated separately.

b. Employment and Earnings Statistics for States and Areas, 1939-66 (reissued each year) provides historical data on employment, average weekly hours, and hourly and weekly earnings, by industry, for States and metropolitan areas. The major industries of each State and area are included.

These two statistical sources can help counselors obtain data for many of the employment characteristics of State and local areas. By examining *Employment and Earnings Statistics for States and Areas, 1939-66*, a counselor in Salt Lake City, Utah, for example, can determine many facts about employment in his local area and State. In 1966, there were 319,200 persons employed in nonagricultural jobs in the State of Utah. More than half of these people were employed in the Salt Lake City area. Most workers in the State were employed by government, wholesale and retail trade, or manufacturing concerns. Employment of government workers has increased rapidly between 1956 and 1966, rising from 54,700 to 90,900. Employment in the bituminous coal industry has been falling over the last few years. In 1956, there were 3,100 people employed in the industry; in 1966 only 1,400 people were so employed. Over sixty percent of those employed in Utah contract construction worked in the Salt Lake City area.

Utah counselors can find information about the occupations and industries in which workers in both Utah and the Salt Lake City area are employed in U.S. Census of Population: 1960 Detailed Characteristics, Utah.<sup>3</sup> According to this source, for example, there were 5,052 employed carpenters in 1960; nearly 3,500 of them worked in the contract construction industry. About 243 employed pharmacists were employed in the Salt Lake City area. In 1959, their average (mean) earnings were \$6,238, and nearly one-sixth earned between \$7,000 and \$9,999.

<sup>&</sup>lt;sup>3</sup> Industry employment totals for 1960 in *Employment and Earnings Statistics for States and Areas, 1939-66,* and in the U.S. *Census of Population* differ for several technical reasons. For example, establishment data in the former publication covers wage and salary workers only and are obtained from the payrolls of industrial establishments; Census data cover all workers in an industry (wage and salary, self-employed, and unpaid family workers) and are obtained through household interviews.

c. County Business Patterns furnishes detailed data on employment in industries, by county. State summaries and a U.S. summary are published annually. The latest U.S. summary contains data for the first quarter of 1966.

Whereas *Employment and Earnings for States and Areas, 1939-66*, gives employment data only for large industries, by State and metropolitan area, *County Business Patterns* provides such data for all industries, by county. Hence, counselors located outside metropolitan areas (e.g. small cities and rural areas) will find the data in this publication particularly useful. It shows, for example, that 108 persons were employed in furniture stores in the Kent County of Rhode Island in mid-March 1966.

d. Employment and Earnings Statistics for the United States, 1909-67 (reissued every year) furnishes historical average annual employment data for over 350 nonagricultural industries. Data are included on employment, by sex; production workers; hourly and weekly earnings; and overtime hours. The data in this publication are the national totals of the data for individual States published in Employment and Earnings Statistics for States and Areas, 1939-66.

BUREAU OF THE CENSUS CATALOG. USDC. Bureau of the Census. Annual edition published in quarterly issues cumulative to an annual volume with 12 monthly supplements. 1967. \$2.25. EMPLOYMENT AND EARNINGS STATISTICS FOR THE UNITED STATES, 1909-67. USDL. Bureau of Labor Statistics. Bulletin 1312-5. 1967. 884 pp. \$4.75.

OCCUPATIONAL EMPLOYMENT STATISTICS, 1960-66. USDL. Bureau of Labor Statistics. Bulletin 1579. 1967. 32 pp. 25 cents. This report is the second in a series. The first, Occupational Employment Statistics, Sources and Data, presented employment information for many occupations and selected industries through 1964. This report updates statistics thought to be of continuing importance and whenever possible includes the year 1966. In addition, new occupational employment data of potential interest to researchers and students of the social sciences are presented.

OCCUPATIONAL EMPLOYMENT STATISTICS, SOURCES, AND DATA. USDL. Bureau of Labor Statistics. Report 305. (BLS). 1966. 87 pp. Free. Brings together statistics from various sources on the number of persons employed nationwide in individual occupations and in selected industries. Describes briefly the sources of the data.

"STATISTICAL TABLES ON MANPOWER." USDL. Manpower Administration. Reprint from the 1967 Manpower Report of the President. (MA). 90 pp. Free. Reprint of the Statistical Appendix to the 1967 Manpower Report of the President. Presents current and historical data on labor force employment and unemployment; labor force characteristics; employment, hours, earnings, and labor turnover in nonagricultural establishments; State and area employment and unemployment; training and apprenticeship; and productivity, gross national product, and other manpower and related information.

## II. Current Employment and Unemployment

Employment and Earnings and Monthly Report on the Labor Force, presents comprehensive monthly statistics on the Nation's labor force; employment and unemployment trends; numbers of workers, and production workers; weekly hours; hourly and weekly earnings; payroll and man-hour indexes; and labor turnover rates. In addition, for States and selected metropolitan areas, statistics are provided on employment in major industries, gross hours and earnings of production workers, and labor turnover rates in manufacturing.<sup>4</sup> An annual supplement provides annual averages for all series for recent years.

Counselors can find much useful information in this publication. For example, in May 1967 manufacturing production workers in Denver, Colorado, averaged \$123.62 for a 42.2 hour workweek; total nonagricultural employment in Waterloo, Iowa increased from 48,600 in April 1967 to 49,400 in May 1967. Most of the employment increase in Waterloo in this period was in manufacturing, which increased from 20,700 to 21,300.

EMPLOYMENT AND EARNINGS AND MONTHLY REPORT ON THE LABOR FORCE. USDL. Bureau of Labor Statistics. Published monthly. \$7 a year; 65 cents an issue.

## III. Wages and Income

*Community Wage Surveys* are published annually by the Bureau of Labor Statistics for 86 labor areas. These studies are designed to provide data on occupational earnings, establishment practices, and supplementary wage provisions. The occupations selected for study are common to a variety of manufacturing and nonmanufacturing industries and are grouped as follows: Office clerical; professional and technical; maintenance and powerplant; and custodial and materials movement. The following examples of the types of information published are from a March 1965 wage survey of the Cincinnati, Ohio - Kentucky area: 660 maintenance electricians had average hourly earnings of \$3.26; one-half of the maintenance electricians earned between \$2.93 and \$3.51 an hour.

Industry Wage Surveys, conducted by the Bureau of Labor Statistics, provide information on the average straight-time earnings of workers in particular industries, such as basic iron and steel, foundries, and motor vehicles. Two types of industry wage surveys are conducted: (1) Those providing information on the average and distribution of employee earnings without regard to occupation; and (2) those providing information for selected occupations representative of jobs in particular industries. These surveys usually include information on supplementary benefits, e.g., paid holidays and paid vacations. From the surveys above, counselors can compare the earnings of workers in an occupation in various regions and metropolitan areas.

Union Scale Studies are published annually by the Bureau of Labor Statistics and provide information on the minimum wage scales and maximum schedules of hours at straight time rates agreed upon through collective bargaining in selected metropolitan areas. Such studies are available for building trades workers, local transit operating employees, motortruck drivers and employees, printing industry workers, and others. Counselors can use this information to compare union scales for particular occupations in their areas with those of other areas and the Nation as a whole.

 $<sup>^{4}</sup>$  Month-to-month changes in the statistical series should be interpreted with caution since they may reflect seasonal or short-run fluctuations in economic activity.

Reports are available that present, analyze, and interpret many of the basic statistics published by the Federal Government. Some that may be of interest to counselors are listed and annotated below under four general headings:

## 1. OCCUPATION AND INDUSTRY EMPLOYMENT TRENDS AND OUTLOOK

"CHANGES IN OCCUPATIONAL EMPLOYMENT OVER THE PAST DECADE." USDL. Bureau of Labor Statistics. *Monthly Labor Review*, August 1967, pp. 27-30. Special Labor Force Report 88. Reprint No. 2539. (BLS). Free. Reviews occupational employment trends over the 1956-66 time period.

EMPLOYMENT IN PROFESSIONAL MATHEMATICAL WORK IN INDUSTRY AND GOVERNMENT. NSF. Booklet No. NSF 62-12. 1962. 82 pp. 55 cents. Supplies commentary and statistics on mathematical personnel, positions, and income. Breaks down personnel by age, sex, educational attainment, professional experience, job changing, etc.; describes positions by type of employer, education required, functions of work, etc.; gives income by educational level, age, sex, and type of employer.

INDUSTRY GROUP BY OCCUPATION: 1960. USDC. Bureau of the Census. U.S. Census of Population: 1960. Supplementary Reports. PC(S1)-27. 1962. 8 pp. 10 cents. Gives the number of workers employed in each industry group, by occupation and sex, 1960.

INDUSTRY MANPOWER SURVEYS. USDL. Bureau of Employment Security. Series of reports issued irregularly. (BES). Free. Each survey usually describes industry employment trends and current labor needs by region, State, and metropolitan area. Also discusses changing occupational patterns in the industry being surveyed. (See page 18 for a listing of Industry Manpower Surveys available.)

INDUSTRY OF THE EXPERIENCED LABOR FORCE: 1960. USDC. Bureau of the Census. U.S. Census of Population: 1960. Supplementary Reports PC(S1)-33. 1962. 9 pp. 10 cents. Presents data on the number of employed workers, by industry of employment, race, and sex, 1960. Gives unemployment rates and ranges of earnings of workers, by industry, race, and sex, 1959.

"JOB TENURE OF WORKERS, JANUARY 1966." USDL. Bureau of Labor Statistics. *Monthly Labor Review*, January 1967, pp. 31-37. Special Labor Force Report 77. Reprint No. 2513. (BLS). Free. Examines differences in job tenure by age, sex, color, and occupation.

"LABOR FORCE AND EMPLOYMENT IN 1965." USDL. Bureau of Labor Statistics. Special Labor Force Report 69. Reprint No. 2494. (BLS). Free. Contains information on the civilian labor force by age, sex, and color. Also gives information on employed persons by type of industry and occupation. Has information on unemployment for a number of characteristics. Beginning in 1966, annual labor force and employment data are contained in the January issue of *Employment and Earnings and Monthly Report on the Labor Force*. See page 71 for annotation.

MANPOWER REPORT OF THE PRESIDENT INCLUDING A REPORT ON MANPOWER REQUIREMENTS, RESOURCES, UTILIZATION, AND TRAINING. Transmitted To The Congress, April 1968. USDL. 1968. 323 pp. \$2.25. See page 42 for annotation.

SCIENTIFIC AND TECHNICAL MANPOWER RESOURCES: SUMMARY INFORMATION ON EMPLOYMENT CHARACTERISTICS, SUPPLY, AND TRAINING. NSF. Book No. NSF 64-28. 1964. 184 pp. \$1.25. See page 15 for annotation.

"THE OCCUPATIONAL STRUCTURE OF U.S. EMPLOYMENT, 1940-60." USDL. Bureau of Labor Statistics. *Monthly Labor Review*, November 1962, pp. 1209-1213. Reprint No. 2403. (BLS). 1962. Free. Reports on the changing occupational structure of the labor force based on data from the 1940, 1950, and 1960 Censuses of Population. Shows employment trends for occupational groups and some individual occupations.

## 2. SOCIAL AND ECONOMIC CHARACTERISTIC OF WORKERS

"ADULT MEN NOT IN THE LABOR FORCE." USDL. Bureau of Labor Statistics. *Monthly Labor Review*, March 1967, pp. 5-15. Special Labor Force Report 79. Reprint No. 2520. (BLS). Free. Presents a discussion of historical trends and the characteristics of adult men not in the labor force. Also gives new data on work histories, incomes, and jobseeking intentions.

CHARACTERISTICS OF PROFESSIONAL WORKERS. USDC. Bureau of the Census. U.S. Census of Population: 1960. Subject Report PC(2)-7E. 1964. 161 pp. \$1. Provides statistics on the social and economic characteristics of workers in professional and technical occupations.

CHARACTERISTICS OF SCHOOL DROPOUTS AND HIGH SCHOOL GRADUATES, FARM AND NONFARM, 1960. USDA. Economic Research Service. Agricultural Economic Report 65. (USDA). 1964. 32 pp. Free. See page 67 for annotation.

"EDUCATIONAL ATTAINMENT OF WORKERS." USDL. Bureau of Labor Statistics. *Monthly Labor Review*, February 1968, pp. 26-34. Special Labor Force Report 92. Reprint No. 2559. (BLS). Free. Reports on recent trends in the educational attainment of workers and the relationship of educational attainment to occupation, employment, and income. Compares the changing educational attainment of groups in the labor force.

"LABOR FORCE PROJECTIONS FOR 1970-80." USDL. Bureau of Labor Statistics. *Monthly Labor Review*, February 1965, pp. 129-140. Special Labor Force Report 49. Reprint No. 2455. (BLS). Free. Contains projections of the labor force through 1980. Projections are developed by age and sex, and for young and older workers.

"LABOR FORCE PROJECTIONS BY COLOR, 1970-80." USDL. Bureau of Labor Statistics. Monthly Labor Review, September 1966, pp. 965-972. Special Labor Force Report 73. Reprint No. 2501. (BLS). Free. Presents characteristics and some implications of projected labor force growth among white and nonwhite groups. Discusses young workers, adult women, adult men, and older workers. Contains several charts and tables.

MANPOWER REPORT OF THE PRESIDENT INCLUDING A REPORT ON MANPOWER REQUIREMENTS, RESOURCES, UTILIZATION AND TRAINING. Transmitted To The Congress, April 1968. USDL. 1968. 323 pp. \$2.25. See page 42 for annotation.

"MARITAL AND FAMILY CHARACTERISTICS OF WORKERS, MARCH 1967." USDL. Bureau of Labor Statistics. *Monthly Labor Review*, April 1968, pp. 14-22. Special Labor Force Report 94. Reprint No. 2565. (BLS). Free. Analyzes the effect of business conditions, changing social mores, and other elements on the labor force participation of women. Examines characteristics such as age of labor force entrants, occupational similarities between husbands and wives, and employment and income characteristics among different types of families.

"OUT-OF-SCHOOL YOUTH – TWO YEARS LATER." USDL. Bureau of Labor Statistics. Monthly Labor Review, August 1966, pp. 860-866. Special Labor Force Report 71. Reprint No. 2497. (BLS). Free. Compares the achievements of school dropouts with those of high school graduates. Discusses differentials such as employment, unemployment, duration of employment, job training, and earnings. Contains many statistical charts and tables.

"POVERTY AREAS OF OUR MAJOR CITIES." USDL. Bureau of Labor Statistics. *Monthly Labor Review*, October 1966, pp. 1105-1110. Special Labor Force Report 75. Reprint No. 2508. (BLS). Free. Examines and compares the employment situation of Negro and white workers in metropolitan areas. Includes topics such as, unemployment rates, types of jobs held, and expected minimal employment needs.

The U.S. Department of Labor's Bureau of Labor Statistics, has published statistical studies of 36 cities that provide information on population, male civilian labor force, high school enrollment, educational attainment, income level, and unemployment, by ethnic group and neighborhood. Based on data collected during the 1960 Census of Population, these studies were made to help meet the needs of the President's Committee on Youth Employment for information on area environmental factors that could be associated with disadvantaged youth. These studies were prepared for cities that had populations of 500,000 or more, as well as for a few smaller cities. An illustrative citation follows:

INCOME, EDUCATION, AND EMPLOYMENT IN NEIGHBORHOODS – CHICAGO, ILL. USDL. Bureau of Labor Statistics. (BLS). 1963. 91 pp. Free.

Studies of the following cities are also available:

Atlanta, Ga.	Indianapolis, Ind.	Philadelphia, Pa.
Baltimore, Md.	Kansas City, Mo.	Phoenix, Ariz.
Birmingham, Ala.	Los Angeles, Calif.	Pittsburgh, Pa.
Boston, Mass.	Memphis, Tenn.	St. Louis, Mo.
Buffalo, N.Y.	Milwaukee, Wis.	San Antonio, Tex.
Cincinnati, Ohio	Minneapolis - St. Paul, Minn. <sup>5</sup>	San Diego, Calif.
Cleveland, Ohio	Newark, N.J.	San Francisco, Calif.
Dallas, Texas	New Orleans, La.	San Juan, P.R.
Denver, Colo.	New York, N.Y. <sup>6</sup>	Seattle, Wash.
Detroit, Mich.	Oakland, Calif.	Tampa - St. Petersburg, Fla. <sup>5</sup>
Houston, Tex.	Oklahoma City, Okla.	Washington, D.C.

Each of the Bureau of Labor Statistics regional offices also publishes special studies regarding a specific geographic area. Such studies may deal with employment in general or for a specific industry or occupation. For a complete listing of BLS Regional Office Publications see:

## 4. WAGES AND INCOME

NATIONAL SURVEY OF PROFESSIONAL, ADMINISTRATIVE, TECHNICAL, AND CLERICAL PAY. USDL. Bureau of Labor Statistics. Bulletin 1585. 1967. 83 pp. 50 cents. Surveys the compensation for selected occupations, such as, accountants, chemists, clerical workers, and others, in private industry. Consists of commentaries and statistical tables on average monthly and annual salaries, employment distribution by salary and by industry, average weekly hours for occupations by industry, and much more.

REVIEW OF DATA ON SCIENCE RESOURCES: SALARIES AND PROFESSIONAL CHARACTERISTICS OF U.S. SCIENTISTS, 1964. NSF. Review No. 2. NSF 64-27. 1964. 8 pp. 5 cents. Gives wage, educational, occupational, sex, and age characteristics for scientific and technical personnel. Breaks down salary data by occupational field, work activity, academic degree and type of employer.

SUMMARY OF MANUFACTURING EARNINGS SERIES, 1939-1965. USDL. Bureau of Labor Statistics. Report 229. 1966. (BLS). 17 pp. Free. Reports on trends in hourly and weekly earnings of factory production workers and changes in the Consumer Price Index since 1939.

SUPPLEMENTARY COMPENSATION FOR NONPRODUCTION WORKERS, 1963. USDL. Bureau of Labor Statistics. Bulletin 1470. 1965. 110 pp. 70 cents. Analysis of major supplements to regular pay for white-collar workers in private industry including paid leave, overtime pay, nonproduction bonuses, and insurance. Considers both employer expenditures for the supplements and the practices for which the payments are made.

\* \* \*

WAGE CHRONOLOGIES are reports issued by the Bureau of Labor Statistics on specific employers such as North American Aviation or Armour & Company. Each report traces, over a time period, the changes in wage scales and related benefits contained in agreements usually reached through collective bargaining. Tables list the agreement provisions, effective dates, applications, exceptions, and other related matters.

A DIRECTORY OF... WAGE CHRONOLOGIES 1948 – JANUARY 1967. USDL. Bureau of Labor Statistics. 1967. (BLS). 10 pp. Free. Lists the employers for which Wage Chronologies are available. Indicates for each employer the period covered, report number, price, and related *Monthly Labor Review* articles.

WAGES AND RELATED BENEFITS PART I: 86 METROPOLITAN AREAS, 1966-67. USDL. Bureau of Labor Statistics. Bulletin 1530-87. 1967. 96 pp. 50 cents. Brings data for each of the metropolitan areas studied in the *Occupational Wage Surveys* into one bulletin. Provides information on the movement of wages by occupation and skill level and the structure and level of wages among areas and industry divisions.

WAGES AND RELATED BENEFITS PART II: METROPOLITAN AREAS, UNITED STATES AND REGIONAL SUMMARIES, 1965-66. USDL. Bureau of Labor Statistics. Bulletin 1465-86. 1967. 113 pp. 60 cents. Summarizes, in national and regional form, information from metropolitan area statistics on the number of workers, average weekly hours and earnings, and the distribution of salaries for individual occupations. Gives industry wage differences among the metropolitan areas; trends of occupational earnings for regions; and data on establishment practices and supplementary wage provisions.

## DIRECTORIES, CATALOGS, AND BIBLIOGRAPHIES

## **Directories and Catalogs**

Comprehensive price lists of Federal Government publications, compiled by broad subject area, are published annually by the U.S. Government Printing Office. A few lists of particular interest to counselors are shown below:

### SELECTED PRICE LIST OF GOVERNMENT PUBLICATIONS

Education	PL-31	Annual	(GPO)	Free
Labor	PL-33	Annual	(GPO)	Free
Occupations	PL-33A	Annual	(GPO)	Free
Industrial Workers	PL-78	Annual	(GPO)	Free

A semimonthly selected list of priced publications is also issued free by the GPO. Requests for placement on the mailing list should be sent to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Most agencies within the Federal Government distribute booklets listing their publications. These booklets sometimes are annotated and often contain references to additional information related to each publication. Most booklets are updated periodically by brief lists that describe the most recently published materials.

## APPENDIX A. HOW TO OBTAIN GOVERNMENT PUBLICATIONS

The largest dealer in Government reports, pamphlets, and books is the Superintendent of Documents of the U.S. Government Printing Office. Approximately 25,000 pieces of mail are delivered each day in the world's largest printing house. These requests, orders, and inquiries reflect impressions of the Government Printing Office held in the mind of the public. Following are a few popular impressions-Are they true or false?

1. The GPO is a huge information agency that deals with all documents published by the Federal Government.

False. Although the GPO's Division of Public Documents, commonly known as Superintendent of Documents, maintains a reference department, searching is limited to identification of the titles available in its sales stock of over 25,000 different publications.

2. Because of its size, GPO is necessarily slow in filling orders.

False. Despite its size and heavy workload, GPO processes most orders relatively quickly; it compares favorably with its counterpart in private industry, the mail-order house. Many delays occur because of insufficient ordering information from the customer. Another frequent time-consuming error is the attempt by customers to order publications through the various Government agencies in Washington, D.C. Most agencies cannot sell publications and, therefore, must refer orders to the Superintendent of Documents.

3. The Government pays the postage on most publications ordered from GPO.

*True.* The price charged for Government publications includes the postage required to send them by regular mail to addresses in the United States.

4. GPO allows a discount on large orders.

*True.* A 25-percent discount is allowed on orders for 100 copies or more of the same publication mailed to one address. The discount can mean a big saving when a person is ordering for several classes or for different schools in the same system.

5. The GPO is an excellent source of free Government literature.

False. The GPO is not a source of free literature. It does the printing for the Congress, Executive Office, the judiciary, all executive departments, independent offices, and establishments of the Government, and sells to the public through its Superintendent of Documents.

For a free copy of a publication write directly to the issuing agency or department in Washington, D.C. If you do not know which Government agency issued the publication, consult your librarian. Bear in mind, however, that the issuing agencies have only limited supplies of their priced publications for free distribution.

Many people, when writing to a particular Government agency for a free copy of a publication, tack onto the address "Government Printing Office" or "c/o Superintendent of Documents." This practice amounts to a conflicting address and the post office will always deliver such letters to the GPO. Thus, your request for free material is classified as a "sales" transaction.

To make sure you will get a copy of the publication you want, it is safer to purchase it directly through the sales agent, the Superintendent of Documents. With very few exceptions, a remittance should not be sent directly to a Government agency. They are not authorized to handle such remittances and must either refer your order to GPO, or return it to you. Some agencies, however, do maintain regional offices throughout the country which, in addition to their specific functions, sell the publications prepared by their own agency. The Labor Department's Bureau of Labor Statistics, which has eight regional offices, is a case in point. (For BLS regional office addresses, see Appendix B, page 83.)

### How To Order

Many avoidable errors are made in ordering publications through the GPO. Be sure to include all of the following information: Title of the publication, quantity, price, your name and address, and the remittance.

If the need should arise to check on publications not received, all of the original identifying information should be restated in your inquiry. Preferably, an exact copy of the purchase order should be sent. References to the sender's purchase order number or the date of the original order are meaningless to the GPO in trying to locate your order. Should a second followup be necessary, include all identifying information and state that this is the second followup. In this way, the search will not be duplicated.

### Various Methods

Schools, boards of education, and other State and local agencies, in ordering publications from the Superintendent of Documents, may meet a seeming impasse: the GPO must have remittance before shipment; the schools cannot issue checks until publications have been delivered. In order to reconcile these differences, several systems have been devised to accommodate schools and other agencies. The following sections describe these systems.

*Claim Voucher:* One system of ordering involves claim vouchers, which are blank forms designed, printed, and used by individual schools. These vouchers are as varied in size, color, and text as they are in number. Whether attached to a purchase order or combined with one in a single form, the voucher basically states that the vendor (GPO) has delivered goods and has not received payment.

When such a claim voucher is received with a purchase order by the Superintendent of Documents, personnel there will stamp the voucher "Pro Forma Invoice," fill it out in accordance with the purchase order, sign, and even notarize it if requested to do so. Any changes in titles or prices are made on the voucher and purchase order. Both forms are then returned to the school or agency, which processes them and issues a check. The purchase order is then resubmitted with the covering check and the sale is transacted.

*Pro Forma Invoice:* This system is similar to the claim voucher system, except that the piece of paper necessary to support the disbursement is not preprinted by the school but is supplied by the Superintendent of Documents, on request. The pro forma invoice is filled out, as is the claim voucher, to conform with the purchase order, signed, notarized if necessary, and sent out to the school. There it is processed, a check is issued, and the purchase order and one copy of the pro forma invoice are resubmitted with the check.

Note that the first step in both the claim voucher and pro forma invoice systems is merely preliminary paperwork. No sale is transacted until the paper is returned with the check. Up until that point, the GPO has kept no record of the transaction, has not reserved publications, and has made no shipments. In fact, GPO does not guarantee that prices will remain the same or that publications will be available until the sale is consummated, although ordinarily discrepancies do not occur.

Certified Invoice; Paid Receipt: Many schools and agencies, either through special funds or by agreement with their disbursing officials, are able to send checks with their order but require a certified invoice or paid receipt to

support the disbursement of these funds. The Superintendent of Documents provides these either on forms provided by the schools or by issuing its own receipts, and the forms are sent with the shipment of publications. This system avoids the necessity of resubmitting the purchase order and thereby expedites shipment.

### **Combination Systems**

The following two methods of ordering are growing in popularity. Both methods are simple to set up and are paid for by just one check which is issued in accordance with the system described above (claim voucher, pro forma invoice, or certified invoice) which best suits a particular school.

*Coupons.* Special document coupons in 5-cent denominations are sold by the GPO in sets of 20. Discrepancies in price can be corrected and refunds made through this convenient means of exchange. The Superintendent of Documents, which as a rule makes refunds of less than \$1 in the form of coupons, finds them so popular that many customers request that all refunds be made in that form.

Schools using these coupons generally are small or are branches of larger school systems. In many cases, the board of education might purchase several hundred dollars worth of coupons and distribute blocks of \$25 or \$50 to its various schools.

Depositors' Accounts. Even more popular-and most suitable for schools which order rather frequently from the GPO-are the depositors' accounts. More than 40,000 of them are currently in use. Probably the ideal ordering system for schools, these accounts can be opened for as little as \$25. This method of ordering provides the maximum convenience for schools and State agencies, because it enables them to avoid obtaining quotations, sending individual remittances, and preparing claim vouchers for each order.

When such an account is opened, an individual account number is assigned, a supply of special depositors' order blanks is forwarded to the new depositor, and orders are filled as soon as they are received. Annotations are made on the order blanks as to the status of any nondelivered goods and are sent to the depositor, showing charges made and balance on hand. The Superintendent of Documents will advise the depositor when this balance becomes low. There is no charge for maintaining a deposit account.

With these last two methods, the check to cover the cost is procured through the system ordinarily used by the school. But in these instances the purchase order would read, for example, "Special Document Coupons: \$50" or "For Depositor's Account: \$100." The accompanying claim voucher or pro forma invoice, if requested, would be executed by the Superintendent of Documents and sent to the school. The check that would then be issued by the school or agency would cover the cost of several months' or perhaps a year's supply of Government publications and would eliminate many separate paper processings. Use of coupons or depositors' accounts also facilitates the ordering of low-price publications and subscriptions which might otherwise not have been placed, being thought of as "not worth all that paperwork."

### Points to Remember

1. Do include all the necessary identifying information when ordering publications from GPO.

2. Do write directly to the issuing agency for publications meant for free distribution. Do not add "GPO" to the address.

3. Do not add postage when totaling your bill if you want the publications sent by regular mail. Do add the postage if you request air mail, special delivery, or foreign delivery. One-fourth of the purchase price of publications should be added for foreign mail.

4. Do not send cash or postage stamps in payment. Do send check or money order, payable to the Superintendent of Documents, or special document coupons with your order unless you are charging the publications against your depositor's account.

5. Do remember the 25-percent discount allowed on orders for 100 copies or more of the same publication to be mailed to one address. You may find that you can consolidate your order with that of another teacher or counselor.

6. Do keep abreast of current Government publications for sale. Request that your name be added to the growing list (now over 1 million) of those who receive free the semimonthly list of selected Government publications. (See page 76 for information on how to obtain this list.)

7. Do separate any request for information from a direct order. If you do not, your order will be held up until the search for information has been completed.

Requests for information and orders for priced publications should be addressed to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Much Government issued occupational literature that is of interest to teachers and vocational guidance counselors is prepared by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor.

The BLS has eight regional offices located throughout the country. These offices have been designated as agents of the Superintendent of Documents for the purpose of selling priced publications. In addition, they distribute all of the free BLS publications. Each office sends out periodic announcements describing the free and priced materials available through them.

To be added to the mailing list of the regional office in your area, write to the office at the address nearest you:

Reprints of articles preceded by an x are available free of charge from the U.S. Department of Labor, Bureau of Labor Statistics, Occupational Outlook Service, Washington, D.C. 20212, as long as supplies last.

## APPENDIX D. PERIODICALS

In several sections of this Guide, references have been made to periodicals published by various departments of the Federal Government. Several of these periodicals frequently contain information that is of interest to counselors. Their titles and prices are listed below, by issuing department. The U.S. Government Printing Office (GPO), Washington, D.C. 20402, handles all requests for subscriptions that are priced. (See appendix A.)

### President's Committee on Employment of the Handicapped

PERFORMANCE - THE STORY OF THE HANDICAPPED. (PCEH). Free. Booklet issued monthly containing various articles of interest to the handicapped and to those dealing with the handicapped. Some typical subjects covered are architectural barriers, training opportunities for the retarded, and stories of people who have overcome their handicaps.

## U.S. Civil Service Commission

CIVIL SERVICE JOURNAL. 25 cents a copy. \$1 a year. Booklet contains articles on government employment, training, personnel, and related programs. Regular features include recruiting needs, incentive awards, personnel legislation, legal decisions, training news, and book reviews.

## U.S. Department of Health, Education, and Welfare

AMERICAN EDUCATION. USDHEW. Office of Education. 10 issues annually. 45 cents a copy. \$3.75 a year. Reports on the Federal Government's role in education. Consists of articles that discuss the important trends in education. Lists recent government publications concerned with education and also contains a special feature called the Statistic of the Month.

## U.S. Department of Labor

AREA TRENDS IN EMPLOYMENT AND UNEMPLOYMENT. USDL. Bureau of Employment Security. (BES). Bi-Monthly, Free. See page 20 for annotation.

EMPLOYMENT AND EARNINGS AND MONTHLY REPORT ON THE LABOR FORCE. USDL. Bureau of Labor Statistics. Monthly. 65 cents a copy. \$7 a year. Presents statistics on the labor force, employment, earnings, hours, and labor turnover, based on industry payrolls and household surveys. Provides data on employment in State and metropolitan areas, by industry. An *Annual Supplement* containing statistical averages for the preceding year is available toward the end of each year. See page 71 for annotation.

EMPLOYMENT SERVICE REVIEW. USDL. Bureau of Employment Security. Monthly. 40 cents a copy. \$4.50 a year. A monthly publication containing articles on employment service operations in the fields of manpower development and utilization. Presents articles on occupational developments, manpower trends, community and industry occupational surveys, training requirements, and other related subjects.

MONTHLY LABOR REVIEW. USDL. Bureau of Labor Statistics. Monthly. 75 cents a copy. \$7.50 a year. A monthly publication presenting studies, reports, and special articles on labor and related topics. Contains a separate section which provides current statistics on employment, labor turnover, earnings and hours, prices, etc. (reissued subsequently as an annual supplement). Special departments summarize developments in industrial relations and court decisions. Also includes book reviews, book notes, and a chronology of labor events.

OCCUPATIONAL OUTLOOK QUARTERLY. USDL. Bureau of Labor Statistics. 35 cents a copy. \$1.25 a year. A quarterly publication reviewing current developments affecting employment opportunities. Includes articles on

topics such as changing occupational employment and changing occupational structure, occupational and industry employment trends, education and training requirements, and other subjects of interest to counselors. Issued as a supplement to the biennial Occupational Outlook Handbook.

THE CURRENT EMPLOYMENT MARKET FOR ENGINEERS, SCIENTISTS, AND TECHNICIANS. USDL. Bureau of Employment Security. (BES). Semiannual. Free. See page 13 for annotation.

## U.S. Department of Defense

HIGH SCHOOL NEWS SERVICE REPORT. USDD. High School News Service. (HSNS). Free. Published monthly during the school year, the report is designed primarily as a reference source for counselors and others who are called upon to furnish students with specific information on current personnel programs of the U.S. Armed Forces. The first issue of the year describes basic facts about military service. The remaining monthly issues, intended primarily for student readership, contain illustrated articles featuring various facets of modern military techniques, organization, and specialized skills required for men and women in uniform today. Printed in detachable form to facilitate posting and classroom use.

HIGH SCHOOL NEWS SERVICE CLIPSHEET. USDD. High School News Service. (HSNS). Free. Published monthly during the school year as a supplement to the *High School News Service Report*. Clipsheet is designed for bulletin board use and deals with a single topic of interest to students who expect to serve in the Armed Forces.

## APPENDIX E. FEDERAL DEPOSITORY LIBRARIES

Certain libraries throughout the United States are designated depositories for Government publications. Through them Federal Government publications are made available to residents of every State, the District of Columbia, and Puerto Rico.

It is sometimes impossible to obtain desired publications from the Superintendent of Documents. Stocks may have been exhausted or the document may be out of print. In these instances, the depository libraries render an invaluable service by keeping such publications permanently available. Not every Government publication can be found at all depository libraries, as each library selects the classes of publications of interest to its particular clientele. The depository libraries are, nevertheless, an excellent source for locating Government published manpower and other counseling information.

The following list shows the location and names of each of the depository libraries as of February 1967. Those libraries designated as *REGIONAL* receive and retain at least one copy of all Government publications made available to depositories and provide interlibrary loans and reference services for the other depository libraries located within their region.
