Preface

This bulletin presents a detailed statistical analysis of work stoppages in 1967, continuing an annual feature of the Bureau of Labor Statistics program in the field of industrial relations. Preliminary monthly estimates of the level of strike (or lockout) activity for the United States as a whole are issued about 30 days after the end of the month of reference and are available on request. Preliminary estimates for the entire year are available at the year's end; selected final tabulations are issued in the spring of the following year.

The chronologies of the two disputes in which the emergency provisions of the Taft-Hartley Act were invoked by the President in 1967 are presented in appendixes B and C.

The methods used in preparing work stoppage statistics are described in appendixes D and E.

The Bureau wishes to acknowledge the cooperation of employers and employer associations, labor unions, the Federal Mediation and Conciliation Service, and various State agencies in furnishing information on work stoppages.

This bulletin was prepared in the Division of Industrial Relations by Howard N. Fullerton. The analysis of the individual work stoppages was done by William F. Aden, Alroy E. Derr, and James T. Hall, Jr., under the direct supervision of Dixie L. King who prepared the chronologies which appear in appendixes B and C.

Analysis of Work Stoppages, 1967

Summary

The 4,595 work stoppages recorded in 1967 exceeded only slightly the previous year's level, but they marked the highest level in 14 years. The number of workers involved (2,870,000) reached its highest level since 1952. (See chart.) Idleness resulting from strikes¹ which were in effect during the year amounted to 42.1 million man-days, or 0.30 percent of estimated private, nonfarm working time. Strikes ending in the year averaged 22.8 calendar days, up slightly from 22.2 in 1966.

Strike idleness in the first quarter was far above the levels for similar periods in earlier years of the 1960's, and remained above these levels throughout 1967. Twenty-eight major stoppages (involving 10,000 workers or more) began in 1967 and accounted for about one-half the year's worker and idleness totals. Three of the major strikes, including one against Ford Motor Company, were in effect in October when monthly idleness reached its peak.

Three stoppages occurring during the year, two affecting defense production and one against railroads, were considered serious enough to receive special attention. In the case of the Pacific Coast shipbuilding industry and the Avco-Lycoming Division of Avco Corporation, the provisions of the Taft-Hartley Act were invoked. In the railroad dispute, legislation was passed amending the Railway Labor Act to provide "mediation to finality" to end the stoppage.

For the second year, one-half the stoppages involved groups of at least 100 workers. Three-fourths of all workers and idleness were attributable to 381 strikes involving 1,000 workers or more. For the first time since 1952, there were three stoppages in the year involving more than 100,000 workers each.

Although less than one-half the strikes (47 percent) resulted from renegotiation disputes, they accounted for seven-eighths of the idleness. One-third of all strikes occurred during the term of the agreement and did not involve negotiation of new contract terms.

Work stoppages over economic issues were responsible for 75 percent of the idleness; another 15 percent was attributable to demands relating to union organization and security.

Idleness in manufacturing, after declining for 2 years, doubled from the 1966 level. However, the number of workers involved in strikes was almost equally divided between manufacturing and nonmanufacturing. The transportation equipment industry had the highest level of idleness, followed by contract construction.

Trends in Work Stoppages

In 1967, for the fifth consecutive year, the number of work stoppages increased over the previous year. The 4,595 stoppages, which involved at least six workers and lasted a full workday or shift, represented a 4-percent increase over the previous year. This was the lowest annual rate of increase over the 5-year period. The number of stoppages beginning during the year was the highest since 1953 (table 1). The 2,870,000 workers involved in these stoppages was the largest number in 15 years, and has been exceeded only in three other years since World War II. Workers involved as a percent of total employed (4.3 percent) was above the proportions of recent years. However, this percentage is below those for all the years from 1948 through 1953.

Strike idleness in 1967, at 42.1 million man-days or 0.25 percent of the total economy working time (0.30 percent of the private, nonfarm working time), reached its highest level since 1959. Idleness as a proportion of total working time was above 0.15 percent for the first time in 8 years. It was, however, below the postwar average of 0.27 percent.

Contract Status

The distribution of work stoppages by the contract status of the parties involved changed little from year to year and showed no trend over the 1960's, despite the changing level of strikes. Idleness by contract status does

¹ The terms "work stoppage" and "strike" are used interchangeably in this bulletin and include lockouts.

Trends in Work Stoppages, 1927-67

vary more, though the relative status of the three main categories has not changed. The 88 percent of man-days idle recorded in 1967 for renegotiation disputes was the highest proportion ever recorded for this category. The proportions of stoppages and idleness, by contract status, appear in the following tabulation.

	Percent of—					
	Stoppages			Man-days idle		
	1967	1966	1965	1967	1966	1965
All stoppages --	100.0	100.0	100.0	100.0	100.0	100.0
Negotiation of first agreement or union recognition -----	16.0	17.1	17.5	4.8	7.5	7.9
Renegotiation of agreement (expira- tion or reopening) --	46.9	44.1	45.5	87.6	79.8	80.0
During term of agree- ment (negotiation of new agreement not involved) -----	33.9	36.5	34.7	7.3	12.3	11.6
Other -----	2.7	2.0	1.7	.3	.4	.2
Insufficient informa- tion to classify -----	.5	.3	.7	-	.1	.2

NOTE: Because of rounding, sums of individual items may not equal totals.

Strikes occurring during the renegotiation or reopening of an existing agreement accounted for 47 percent of the stoppages in 1967. Almost all (89 percent) were over economic issues (table 4). The next most prevalent issue was union security and organization which, because of the copper strike, accounted for 13 percent of the idleness attributable to renegotiation disputes. Renegotiation strikes are typically larger than the other categories; in 1967, they averaged 978 workers per strike, compared to 423 per strike occurring during the term of the agreement. Twenty-four of the 28 major strikes occurred during renegotiation, including the 3 that directly affected more than 100,000 workers each.

Strikes during the term of an agreement (when the negotiation of a new agreement is not involved) ranked second in frequency. The number of these strikes declined slightly from 1966. The dominant issues in these strikes were plant administration or interunion (or intraunion) matters. As well as being fewer in number than the renegotiation strikes, they also did not last as long; slightly less than one-half lasted more than 3 days in 1967 (table 15). Two industries, mining

and contract construction, accounted for almost one-half of these strikes. Strikes during the term of the agreement accounted for four-fifths of all stoppages in mining and three-fifths of those in construction (despite a 20 percent decline from 1966); however, they accounted for only one-sixth of construction idleness. About 25 percent of the strikes occurring during the term of the agreement were ended by an understanding to resolve the issues after work had been resumed (against 3 percent in renegotiation disputes).

The major issue in strikes that occurred during attempts to establish a collective bargaining relationship was union organization and security. These stoppages accounted for four-fifths of the union security strikes. Economic demands were the second most frequent issue. Most of the initial contract strikes involved a small number of workers. More than one-half lasted 15 days or longer (14 percent lasted more than 3 months). Although these strikes occurred in various industries, there was a noticeable cluster in wholesale and retail trade.

Major Issues

The incidence of major issues in strikes followed the pattern of the previous year. At the same time, the occurrence of several larger work stoppages caused sizable changes in the proportion of idleness attributable to the various issues.

	Percent of man-days of idleness		
	1967	1966	1965
Economic issues -----	74.5	70.4	59.1
Union organization and security -----	15.3	12.4	12.8
Working conditions -----	8.1	15.3	26.1
Interunion or intraunion -----	2.1	1.8	1.9
Not reported -----	-	1.0	1.0

Strikes over economic issues accounted for more than one-half of all the strikes beginning in 1967 and four-fifths of the idleness (table 5). Since large strikes tend to be over this issue, the idleness is proportionately greater. One economic demand alone, that of a general wage increase plus supplementary benefits, accounted for one-fourth of all strikes and more than one-half the idleness. One-half the strikes over this demand lasted longer than 2 weeks.

The number of interunion or intraunion disputes declined from 1966, primarily because of the drop in construction strikes over this issue. (The contract construction industry still accounted for more than four-fifths of these stoppages in 1967.) The doubling of man-days idle from 1966 was attributable to the 41-day construction stoppage by the Teamsters Union in the Baton Rouge area. Over 95 percent of the interunion strikes, including the Baton Rouge walkout, occurred during the term of the contract (table 4). Three-fifths, however, lasted less than a week; only 14 percent persisted for more than 2 weeks. The bargaining unit involved in these issues is generally small; about one-fourth of these strikes covered less than 20 workers each.

Approximately 13 percent of all 1967 stoppages resulted from issues involving union organization and union security (table 5). These disputes tended to be small, and only two involved more than 5,000 workers. Almost three-fourths directly affected less than 100 workers. Union organization and union security strikes lasted longer; about one-fourth extended beyond 2 months. One of these, the copper industry strike, started in July and lasted into 1968.

Strikes over plant administration and job security accounted for 20 percent of the stoppages and workers involved but only about 7 percent of the idleness. These issues are likely to involve a small number of workers because only 15 percent of these stoppages affected 1,000 workers or more. Over one-half of these strikes were terminated within 4 days. Of the six major stoppages over these issues, three occurred during the contract period and involved plant administration matters; two affected telephone companies; and the other, the Newport News Shipbuilding and Dry Dock Company. Two major strikes over plant administration occurred during renegotiations with General Motors Corporation. The Meat Cutters dispute with the Food Employers Council, in Southern California, was the only major strike to involve job security.

Duration

Mean duration in the 1960's has been at a consistently high level, compared with the earlier postwar years. Strikes during the 1948-58 period averaged 20 days; over the past decade, the average has been 23.2, including no year in the 1960's below 22.2.

Mean duration in 1967, higher than the year before, was at the second lowest level in the 1960's. Median duration for the past 10 years has been far below mean duration, but the two series do not seem to move together. Median duration has remained unchanged for the last 3 years.

	<u>Mean duration</u>	<u>Median duration</u>	<u>Number of prolonged strikes</u>
1958-----	19.7	8	133
1959-----	24.6	10	221
1960-----	23.4	10	201
1961-----	23.7	9	191
1962-----	24.6	9	224
1963-----	23.0	8	203
1964-----	22.9	8	189
1965-----	25.0	9	221
1966-----	22.2	9	210
1967-----	22.8	9	232

Another important characteristic of the 1960's has been the increase in the number of prolonged disputes (lasting 90 days or more). The 232 such strikes (table 14) in 1967 is the highest number recorded since 1946. Many of these stoppages had several common characteristics. One-third of the prolonged disputes were over union organization and security, which accounted for one-eighth of all strikes in 1967. Strikes occurring during the establishment of the initial contract accounted for 44 percent of the prolonged strikes, compared with 16 percent of all strikes. Wage and renegotiation disputes occurred in the same proportion in prolonged strikes as in strikes of all duration. However, plant administration and job security disputes, which accounted for 20 percent of all strikes, and interunion disputes (12 percent) were together responsible for only 10 percent of the prolonged disputes.

The 316-day copper strike, which began in July 1967 and ended in May 1968, was the longest industrywide strike recorded. The basic issue was the structure of the collective bargaining unit. The unions attempted to gain a companywide unit for wage and supplemental benefit bargaining, while management (supported in an initial hearing by the NLRB) attempted to maintain the old structure.

As the median duration figure implies, most strikes do not last very long; in 1967, three-fifths ended in 2 weeks or less. Over one-third of the workers were involved in strikes that were settled in less than 4 days.

Size of Stoppages

The increase of strikes in 1967 was almost evenly divided between those involving groups of more than and less than 100 workers (table 11). The median size strike was 97 workers.

Of the larger strikes, 381 directly involved 1,000 workers or more, the highest level since 1953. Although they accounted for only 8 percent of the stoppages, they included three-fourths of the workers involved in strikes beginning in the year; they also were responsible for three-fourths of the idleness. About three-fifths occurred during renegotiation, and most of the remainder occurred during the term of the agreement. One-half were over economic demands, resulting in 75 percent of the idleness.

Twenty-eight stoppages in 1967 involved as many as 10,000 workers,² and they accounted for one-half of all idleness (table 2). The largest strike was the 2-day walkout of some 459,000 railroad workers. The 65-day Ford strike involved fewer workers but resulted in considerably more idleness. (See table 13.) There were 14 major strikes in both nonmanufacturing and manufacturing. Transportation equipment and the transportation and communication industries had five strikes each. Major strikes in construction dropped sharply from the previous year, from 12 to 4. Other major stoppages affected the trucking industry, rubber manufacturers, and teachers in New York City and Detroit.

Establishment and Employer Units

Single establishment disputes constituted over three-fourths of the strikes in 1967 (table 12). The proportion of workers involved in them dropped sharply from 1966 (46 to 32 percent). Stoppages affecting more than 10 establishments accounted for one-half the workers involved and man-days idle during the year.

The proportion of stoppages confined to a single employer operating one plant or more has remained at slightly under 90 percent. However, the strikes involving two employers or more were larger and involved

² For further information, see "Major Strikes During 1967," *Monthly Labor Review*, April 1968, pp. 42-43.

two-fifths of the workers. Seven-eighths of the multiemployer strikes occurred during renegotiation. All but 3 percent of the strikes occurring during the term of the contract affected only one employer.

Type of employer unit	Stoppages beginning in 1967		
	Number	Workers involved	Man-days idle during 1967 (all stoppages)
All stoppages -----	4,595	2,870,000	42,100,000
Single establishment or more than 1 but under the same ownership or management -----	4,085	1,690,000	25,000,000
2 employers or more—no indication of a formal association or joint bar- gaining arrangement -----	175	600,000	8,730,000
2 employers or more in a formal association-----	335	584,000	8,400,000

NOTE: Because of rounding, sums of individual items may not equal totals.

Industries Affected

Manufacturing idleness, which has been declining for the past 2 years, rose to its highest level since 1959, reflecting an increase of 14 million man-days over 1966. Nonmanufacturing idleness increased from 11,700,000 to 14,300,000 man-days. The number of strikes was evenly divided between manufacturing and nonmanufacturing (table 6); the worker involvement, however, was slightly greater in nonmanufacturing.

Contributing to the increase in idleness over 1966 levels were stoppages in such manufacturing industries as ordnance, textiles, paper, and petroleum. More than 1 million man-days were lost in chemicals, rubber, primary metals, fabricated metal products, machinery, and transportation equipment. Two industries, tobacco and chemicals, recorded their highest idleness levels since 1947. Idleness in the machinery industry, affected by farm equipment strikes at Deere and Company and at Caterpillar Tractor Company, reached its highest level since 1950. Textile idleness was at its highest level since 1956. Two industries, apparel and printing, were below their 1966 levels, though above 1965.

Transportation equipment, affected by five major stoppages, had the highest idleness figure than any industry in 1967. However, man-days idle were below the levels of 1964,

when General Motors, rather than Ford, was the major firm struck. Idleness in primary metals and fabricated metal products, affected by the copper strike and by some of the auto strikes, reached their highest levels since 1959. The rubber industry, affected by prolonged strikes at 4 of the 5 major manufacturers, has the highest level of idleness ever recorded for the industry.

Idleness in most manufacturing industries was significantly above the previous year's level, as it was in most nonmanufacturing industries. Trade, finance, mining, and government had higher idleness levels than in 1966. In government, the idleness level was almost three times the previous high recorded in 1966. Services and contract construction idleness dropped from the previous year. Transportation and communication, affected by five major stoppages (two involving more than 100,000 workers), had the greatest number of workers involved since 1946, but idleness was only slightly above the level of 1966.

Stoppages by Location

Region. The East North Central Region ranked first in idleness in 1967 (table 7). The percent of estimated working time lost in this region (0.56) was exceeded in the Mountain States (0.79), the result of one prolonged strike in the copper industry. The South Atlantic Region, the only one to experience a drop in idleness, recorded a 0.10 idleness ratio.

States. Nine major strikes were responsible for the 6 million man-days of idleness that occurred in Ohio in 1967, the highest level for any State in that year (table 8). Michigan, having the second highest idleness level was affected by auto and rubber strikes; this was its highest idleness level since 1950. Idleness attributable to work stoppages in government and communication and transportation caused New York to have the third highest idleness level, followed by Illinois and Pennsylvania. Six other States had more than 1 million man-days of idleness each.

In addition to the States having high idleness totals, several other States had a level of idleness as a percent of estimated total private, nonfarm working time substantially above the national figure of 0.30. For the first time since 1960, individual States recorded idleness ratios above 1 percent. Montana (2.52 percent), Arizona (1.53 percent), and Utah (1.43 percent) suffered from the effects of the prolonged copper strikes.

Nevada and New Mexico were not as severely affected. Lengthy construction strikes were responsible for the high percentage figures in Connecticut and Louisiana. The high idleness level in Iowa was due to stoppages in the farm equipment industry.

Metropolitan areas. Detroit, which sustained the highest idleness level (3,660,000 man-days) of any metropolitan area in 1967, exceeded the amount of idleness for any previous round of auto negotiations since 1950 (table 9). The New York City area, which was second, experienced two major strikes; one by the telephone workers and the other by the teachers. Three other areas, Chicago, Cleveland, and Akron had more than 1 million man-days of idleness each in 1967.

For the eighth consecutive year, New York (268) and Philadelphia (136) ranked first and second in strike incidence. Four other areas, Detroit, Chicago, Los Angeles-Long Beach, and St. Louis sustained more than 100 stoppages each in 1967.

Monthly Trends

Idleness was lowest in January and increased monthly through June (table 3). After a large decline in August, idleness rose sharply in September, peaking in October when three major strikes affecting the Ford Motor Company, the copper industry, and the Caterpillar Tractor Corporation were in effect the whole month. November and December had significantly lower idleness levels than October, though substantially above the levels for recent years.

The 769 stoppages in effect during May 1967 was the highest monthly level for the year and represented a record since July 1953. The number of strikes beginning in May, the peak for the year, also was the highest since July 1953. All strike measures at the end of the year, though below the levels of the peak months, were above the 1966 figures.

The number of workers involved in new strikes reached a peak in July, when the railroad strike was in effect, dropping in August to below the level for January, then rising sharply in September before declining to the lowest level of the year in December. As the year ended, 11 large strikes, including the copper strike, were in effect. The tabulation that follows presents the monthly distribution of new strikes involving 1,000 workers or more for 1965-67.

Month	1967	1966	1965
January-----	22	21	14
February-----	21	14	9
March -----	22	18	24
April-----	36	30	34
May -----	53	42	24
June -----	43	33	44
July-----	33	39	32
August -----	20	29	19
September-----	36	28	22
October-----	34	33	19
November-----	42	24	24
December-----	19	10	3

Affiliation of Unions Involved

Unions affiliated with the AFL-CIO were involved in about three-fourths of the stoppages beginning in 1967, and accounted for a slightly higher proportion of the idleness (table 10). National affiliated unions were responsible for more than one-fifth of the strikes and lower proportions of workers involved and man-days idle. In 68 disputes, no unions were involved.

Mediation

Slightly more than one-half of the stoppages ending in 1967 did not use the services of mediators (table 16). As the number of workers involved figures indicate, mediators did participate in strikes involving large numbers of workers. Federal mediators were involved in 84 percent of the disputes requiring mediation, or 39 percent of all the strikes. These disputes accounted for 62 percent of the idleness incurred during 1967.

Slightly more than three-fourths of the stoppages in which mediation was required occurred during renegotiation. The 1,780 stoppages involving Federal mediation amounted to four-fifths of all renegotiation disputes that ended during the year. Mediation was used in slightly more than 45 percent of the strikes resulting from attempts to establish collective bargaining.

Settlement

As in recent years, nine-tenths of the stoppages that ended in 1967 were terminated by a settlement or by an agreement for a procedure to resolve the issues remaining in the dispute. (See table 17.) Eight percent ended without a formal agreement and employers resumed operations either with new employees or with returning strikers. About one-fifth of all workers involved in stoppages were in this group.

Settlements were reached in 77 percent of those stoppages occurring during attempts to establish a collective bargaining relationship. On the other hand, settlements were concluded in 96 percent of the stoppages occurring during the renegotiation of a contract and 92 percent during the term of the agreement.

Procedures for Handling Unsettled Issues

In some instances, stoppages were terminated by an agreement to resolve unsettled issues after work has been resumed. Information was available for 542 cases in 1967 (table 18). In about one-fifth of the cases, the parties agreed to submit all unresolved issues to final and binding arbitration, and

another one-fifth were to be settled by direct negotiations. In 8 percent of the cases, the issues were submitted to government agencies, whereas more than one-half of the unresolved issues were handled by various other methods.

Stoppages occurring during the term of the agreement accounted for 69 percent of all those submitted to arbitration. About two-thirds of the referrals to government agencies were cases involving the negotiation of the initial contract.

Interunion (or intraunion) matters accounted for slightly more than one-half of the issues remaining, as the tabulation shows.

	Stoppages		Workers involved		Man-days idle	
	Number	Percent	Number	Percent	Number	Percent
Total stoppages covered -----	537	100.0	198,000	100.0	1,490,000	100.0
Wages and hours -----	60	11.2	28,100	14.2	430,000	28.9
Fringe benefits -----	9	1.7	5,940	3.0	44,300	3.0
Union organization-----	46	8.6	3,770	1.9	45,900	3.1
Working conditions-----	101	18.8	93,400	47.3	482,000	32.3
Interunion matters -----	280	52.1	27,200	13.8	118,000	7.9

1965	3,963	25.0	1,550	2.5	23,300	.15	.18
1966	4,405	22.2	1,960	3.0	25,400	.15	.18
1967	4,595	22.8	2,870	4.3	42,100	.25	.30

¹ The number of stoppages and workers relate to those stoppages beginning in the year; average duration, to those ending in the year. Man-days of idleness include all stoppages in effect.

Available information for earlier periods appears in *Handbook of Labor Statistics*, BLS Bulletin 1600 (1968), tables 130-135. For a discussion of the procedures involved in the collection and compilation of work stoppage statistics, see *BLS Handbook of Methods for Surveys and Studies*, BLS Bulletin 1458 (1966), ch. 19. Agricultural and government employees are included in the total employed.

² In these tables, workers are counted more than once if they were involved in more than 1 stoppage during the year.

³ Figures are simple averages; each stoppage is given equal weight regardless of its size.

⁴ Not available.

Table 2. Work Stoppages Involving 10,000 Workers or More, 1945-67

Period	Number	Workers involved		Man-days idle	
		Number (thousands)	Percent of total for period	Number (thousands) ¹	Percent of total for period
1945	42	1,350	38.9	19,300	50.7
1946	31	2,920	63.6	66,400	57.2
1947	15	1,030	47.5	17,700	51.2
1948	20	870	44.5	18,900	55.3
1949	18	1,920	63.2	34,900	69.0
1950	22	738	30.7	21,700	56.0
1951	19	457	20.6	5,680	24.8
1952	35	1,690	47.8	36,900	62.6
1953	28	650	27.1	7,270	25.7
1954	18	437	28.5	7,520	33.3
1955	26	1,210	45.6	12,300	43.4
1956	12	758	39.9	19,600	59.1
1957	13	283	20.4	3,050	18.5
1958	21	823	40.0	10,600	44.2
1959	20	845	45.0	50,800	73.7
1960	17	384	29.2	7,140	37.4
1961	14	601	41.4	4,950	30.4
1962	16	318	25.8	4,800	25.8
1963	7	102	10.8	3,540	22.0
1964	18	607	37.0	7,990	34.8
1965	21	387	25.0	6,070	26.0
1966	26	600	30.7	7,290	28.7
1967	28	1,340	46.5	21,400	50.7

¹ Includes idleness in stoppages beginning in earlier years.

Table 3. Work Stoppages by Month, 1966-67

State -----	12	4,670	16,300	(⁴)
Local -----	169	127,000	1,230,000	(⁴)

¹ Stoppages extending into 2 industry groups or more have been counted in each industry affected; workers involved and man-days idle were allocated to the respective groups.

² Excludes government and agriculture.

³ Less than 0.005 percent.

⁴ Not available.

NOTE: Because of rounding, sums of individual items may not equal totals.

Table 7. Work Stoppages by Region,¹ 1966-67

Region	Stoppages beginning in—		Workers involved in stoppages beginning in—		Man-days idle (all stoppages)		Percent of estimated total working time	
	1967	1966	1967	1966	1967	1966	1967	1966
United States -----	² 4,595	² 4,405	2,870,000	1,960,000	42,100,000	25,400,000	0.30	0.19
New England-----	332	309	136,000	102,000	2,320,000	1,670,000	0.24	0.18
Middle Atlantic-----	1,178	1,155	603,000	469,000	7,320,000	5,610,000	.22	.18
East North Central-----	1,383	1,258	1,060,000	570,000	17,200,000	7,370,000	.56	.25
West North Central-----	369	350	244,000	138,000	2,740,000	1,900,000	.26	.19
South Atlantic-----	577	492	253,000	201,000	2,050,000	2,840,000	.10	.15
East South Central-----	304	321	152,000	171,000	2,200,000	1,840,000	.30	.25
West South Central-----	279	259	134,000	100,000	2,140,000	1,420,000	.19	.13
Mountain-----	147	169	87,700	54,700	3,480,000	728,000	.79	.17
Pacific-----	474	426	198,000	149,000	2,650,000	1,950,000	.15	.12

¹ The regions are defined as follows: New England—Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont; Middle Atlantic—New Jersey, New York, and Pennsylvania; East North Central—Illinois, Indiana, Michigan, Ohio, and Wisconsin; West North Central—Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota; South Atlantic—Delaware, District of Columbia, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia, and West Virginia; East South Central—Alabama, Kentucky, Mississippi, and Tennessee; West South Central—Arkansas, Louisiana, Oklahoma, and Texas; Mountain—Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, and Wyoming; and Pacific—Alaska, California, Hawaii, Oregon, and Washington.

² Stoppages extending across State lines have been counted in each State affected; workers involved and man-days idle were allocated among the States.

NOTE: Because of rounding, sums of individual items may not equal totals.

Table 8. Work Stoppages by State, 1967¹

State	Stoppages beginning in 1967		Man-days idle (all stoppages)

				York, Pa -----	11	3,610	25,200
				Youngstown-Warren, Ohio -----	40	21,100	166,000

¹ Includes data for each of the metropolitan areas in which 5 stoppages or more began in 1967. Some metropolitan areas include counties in more than 1 State, and hence, an area total may equal or exceed the total for the State in which the major city is located. Stoppages in the mining and logging industries are excluded. Intermetropolitan area stoppages are counted separately in each area affected; the workers involved and man-days idle were allocated to the respective areas.

² Included in the Chicago, Ill.-Northwestern Ind. consolidated area.

³ Included in the New York SMSA.

Table 10. Work Stoppages by Affiliation of Unions Involved, 1967

Affiliation	Stoppages beginning in 1967				Man-days idle, 1967 (all stoppages)	
	Number	Percent	Workers involved			
			Number	Percent	Number	Percent
Total-----	4,595	100.0	2,870,000	100.0	42,100,000	100.0
AFL-CIO -----	3,366	73.3	2,260,000	78.6	31,800,000	75.6
Unaffiliated unions -----	1,001	21.8	471,000	16.4	3,960,000	9.4
Single firm unions -----	38	.8	28,500	1.0	373,000	.9
Different affiliations ¹ -----	63	1.4	94,900	3.3	5,840,000	13.9
Professional employee association -----	59	1.3	14,000	.5	76,300	.2
No union involved -----	68	1.5	6,490	.2	36,100	.1

¹ Includes work stoppages involving unions of different affiliations—either 1 union or more affiliated with AFL-CIO and 1 unaffiliated union or more, or 2 unaffiliated unions or more.

NOTE: Because of rounding, sums of individual items may not equal totals.

Table 11. Work Stoppages by Contract Status and Size of Stoppage, 1967

Contract status and size of stoppage (number of workers involved)	Stoppages beginning in 1967				Man-days idle, 1967 (all stoppages)	
	Number	Percent	Workers involved

¹ An establishment is defined as a single physical location where business is conducted, or where services or industrial operations are performed; for example, a factory, mill, store, mine, or farm. A stoppage may involve 1 or 2 establishments or more of a single employer, or it may involve different employers.

² Information available indicates more than 11 establishments involved in each of these stoppages.

NOTE: Because of rounding, sums of individual items may not equal totals.

Table 13. Work Stoppages Involving 10,000 Workers or More, Beginning in 1967

Beginning date	Approximate duration (calendar days) ¹	Establishment(s) and location	Union(s) involved ²	Approximate number of workers involved ²	Major terms of settlement
Feb. 1	11	Honeywell, Inc. (12 plants), Minneapolis-St. Paul, Minn., area.	International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (Ind.).	10,000	3-year contract providing a 10- to 25-cent increase effective each year; additional inequity adjustment; 3 weeks' paid vacation after 9 years and improved vacation pay; \$5 monthly pension benefits for each year's credited service with maximum 35-year service limitation; vesting after 15 years' service regardless of age; improved life insurance; improved Blue Cross plan; up to 3 days' paid funeral leave established; and improved stock purchase plan.
Feb. 4	49	Elevator Manufacturers.	International Union of Elevator Constructors.	11,000	5-year contract which retained all the former benefits and provided a new wage determination formula keyed to the average rates of the 4 highest-rated building trades crafts.
Mar. 16	7	Bell Telephone Company of Pennsylvania, statewide.	Pennsylvania Telephone Union (affiliated with the International Brotherhood of Electrical Workers).	18,000	3-year contract providing an immediate \$3.50 to \$5.50 weekly wage increase; a wage reopeners after 18 months; and increased pensions, vacations, and insurance benefits. The contract also provides for maintenance of dues, insuring continued union membership during the life of the contract.
Apr. 1	³ 46	Trucking Industry, national.	International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (Ind.) and Chicago Truck Drivers Union (Ind.).	193,000	3-year national master freight agreement, including area supplements for local cartage and over-the-road operations. ⁴
Apr. 21	97	B.F. Goodrich Co., Firestone Tire and Rubber Co., and Uniroyal, Inc., interstate.	United Rubber, Cork, Linoleum and Plastic Workers of America.	50,000	The B.F. Goodrich Co. agreement provided for an immediate 15-cent-an-hour wage increase, additional increases of 15 and 13 cents in 1968 and 1969, respectively, and an additional 10 cents to the skilled trades; other terms similar to the settlement with the General Tire and Rubber Co., ⁵ except for the following reported differences—no change in the number of paid holidays; vacation improvements consisted of 2 weeks after 1 year, 3 weeks after 5 years, 5 weeks after 22 years, and establishment of a 6th week after 30 years; and the SUB plan was revised to provide 6-cent-an-hour company financing during periods when the fund falls below 100 percent level (instead of the 5-cent normal financing), in addition to increased weekly benefits at 80 percent.
					<u>Firestone and Uniroyal</u> agreements provided identical wage increases and other terms similar to the B.F. Goodrich settlement.
					All agreements were effective upon ratification by the local unions and run through Apr. 20, 1970. ⁶
May 1	14	Construction Industry, Rochester, N.Y.	Bricklayers, Masons and Plasterers' International Union of America.	11,000	3-year contract providing a \$1.40-an-hour package increase; a 40-cent increase in welfare and vacation benefits effective May 1, 1967; and an increase of 5 cents an hour in 1968 and 1969.
May 4	⁷ 5	Heavy and Highway Construction Industry, Ohio—statewide.	International Union of Operating Engineers.	20,000	5-year contract providing an immediate wage increase of 30 cents an hour; 10 cents additional increase in November 1967; 30 cents in May 1968; 10 cents in November 1968; and 50 cents effective May 1969, November 1969, May 1970, and May 1971. The Cleveland schedule increments are different, but the \$2.80-total-wage package is the same; the union has the option to allocate wage increases to benefits.
May 15	5	Bell Telephone Company of Pennsylvania, statewide.	Federation of Telephone Workers of Pennsylvania (Ind.).	17,000	The stoppage, which resulted from a dispute over a 5-hour suspension of an employee for violation of a safety rule, was terminated after agreement to submit the issue to arbitration.

See footnotes at end of table.

Table 13. Work Stoppages Involving 10,000 Workers or More, Beginning in 1967—Continued

Beginning date	Approximate duration (calendar days) ¹	Establishment(s) and location	Union(s) involved ²	Approximate number of workers involved ²	Major terms of settlement
May 16	43	Connecticut Ready-mix Concrete Association, New England Road Builders Association, and Connecticut In-Plant Operators Association, Connecticut—statewide.	International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (Ind.).	20,000	5-year contract providing an immediate 30-cent-an-hour wage increase; 25 cents additional in each of the next 3 years; and 30 cents in 1971; employers' pension fund contribution will be increased by 5 cents in each of the first 3-contract years; and health and welfare contributions will be increased $7\frac{1}{4}$ cents immediately, $2\frac{1}{2}$ cents in 1968, and $1\frac{1}{4}$ cents in 1969.
June 5	31	Radio Corporation of America, Calif., Fla., Ind., N.J., Ohio, and Pa.	International Brotherhood of Electrical Workers.	26,000	3-year contract providing an immediate 4-percent wage increase (minimum 10 cents), and an additional 4 percent (minimum 9 cents) June 1, 1968 and 1969; additional 2- to 15-cent skill adjustment; double time after 11 hours of work time; 9th paid holiday effective in 1968; and time study committee established. Other terms similar to RCA-IUE settlement. ⁸
June 12	19	San Francisco Employers Council and Industrial Employers and Distributors Association, Northern California.	International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (Ind.), and International Longshoremen's and Warehousemen's Union (Ind.).	13,000	3-year contract providing a 20-cent-an-hour wage increase, retroactive to June 1, and additional increases of 25 and 20 cents on June 1, 1968 and 1969, respectively; shift differentials increased to 12 and 17 cents an hour in 1969; 4 weeks' vacation after 15 years effective in 1969; and increased contributions to health and welfare fund.
June 20	41	Construction Industry, Baton Rouge, La., area.	International Brotherhood of Electrical Workers and International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (Ind.).	18,000	The stoppage, which resulted from a dispute over work assignments, was terminated following the signing of a memorandum of understanding agreeing to abide by terms of contracts and to use established procedures for settling grievances and jurisdictional disputes.
July 1	16	Newport News Shipbuilding and Dry Dock Company, Newport News, Va.	Peninsula Shipbuilders Association (Ind.).	13,000	The stoppage, which resulted from a dispute over the suspension of 3 workers for refusal to work overtime, was terminated when shipyard officials agreed to bring no retaliatory measures against the workers.
July 14	11	Goodyear Tire and Rubber Company, interstate.	United Rubber, Cork, Linoleum and Plastic Workers of America.	20,000	Settlement similar to agreements with other rubber companies. ⁹
July 15	316	Copper Industry.	United Steelworkers of America and 23 AFL-CIO unions, and the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (Ind.).	37,000	3-year settlements following the 3-tier separate agreement structure recommended by a 3-member panel appointed by the Secretaries of Labor and Commerce. The unions did not achieve a common expiration date and uniform benefits within each company. ¹⁰
July 16	112	Railroad Industry, nationwide.	6 shopcraft unions.	459,000	The stoppage, which resulted from a dispute over wages, was terminated after President Johnson signed legislation allowing the Attorney General to obtain an injunction ordering workers to return to their jobs.
July 31	8	New York Telephone Company, statewide.	Communications Workers of America.	19,000	The stoppage, which resulted from a dispute over protection for workers on assignment in areas having a high crime rate, was terminated when company and union officials agreed to submit the issue to binding arbitration if no settlement could be reached through direct negotiations within 45 days.
Sept. 5	13	Public Schools, Detroit, Mich.	American Federation of Teachers.	16,000	2-year contract providing wage increases of \$850 in both years, raising the minimum starting salary to \$7,500 and the maximum for teachers holding master's degrees to \$11,700.

See footnotes at end of table.

Table 13. Work Stoppages Involving 10,000 Workers or More, Beginning in 1967—Continued

Beginning date	Approximate duration (calendar days) ¹	Establishment(s) and location	Union(s) involved ²	Approximate number of workers involved ²	Major terms of settlement
Sept. 7	65	Ford Motor Company, Companywide, 26 states.	United Automobile, Aerospace and Agricultural Implement Workers of America.	159,000	3-year contract providing an immediate 20-cent-an-hour increase, plus an additional 3 percent in November 1968 and 1969. Skilled workers received an additional 30-cent-an-hour increase in the first year. The cost-of-living escalator was modified by providing annual instead of quarterly reviews, and instituting minimum and maximum limits on the size of the adjustments. Other benefit changes included liberalized SUB provisions, increased pensions, holidays, and vacations for workers having less than a year's service. ¹²
Sept. 7	13	General Motors Corp., Frigidaire Division, Dayton, Ohio.	International Union of Electrical Radio and Machine Workers.	12,000	The stoppage, which resulted from a dispute over grievances and local issues, was terminated by the settlement of the grievances, and agreement that local issues would be incorporated into the new national contract.
Sept. 11	18	Public Schools, New York City.	American Federation of Teachers.	47,000	26-month contract retroactive to July 1, providing a basic pay scale ranging from \$6,200 to \$10,350 effective September 1967; \$6,600 to \$11,000 effective September 1968; and \$6,750 to \$11,150 effective Mar. 1, 1969. Groups of teachers having special qualifications received an additional \$750 over the contract term. Other terms included a reduction in teacher pension contributions; an increase in the city's contributions to UFT Welfare Fund; and provision for teachers to receive half pay for unused sick leave on termination of employment. Teachers were relieved of some clerical and administrative responsibilities, and those in disadvantaged areas gained an additional 50-minute preparation period a week.
Oct. 1	31	Caterpillar Tractor Co., Colo., Ill., Iowa, Ohio, and Pa.	United Automobile, Aerospace and Agricultural Implement Workers of America.	26,000	3-year contract providing 17- to 51-cent-an-hour wage increase effective the first year; other reported terms generally similar to the Ford Motor Co.-UAW agreement described above, includes: Additional 3-percent wage increases in 1968 and 1969; annual cost-of-living reviews; \$7 monthly pension for each year's credited service; and effective October 1968, increases of up to \$1 monthly, depending on employee's hourly rate; current retirees' pension increase of \$1 per month; "income security" plan established which guarantees workers their rate of pay in the event of a downgrade and provides that employees laid off after being scheduled to work the 1st Monday of the month receive full pay for the rest of the month; and for a continuing layoff, they receive SUB payments (including State benefits) equal to take-home pay for periods ranging up to 7 weeks for employees having 10 years' service, followed by regular SUB payments, which were increased to 85 percent of take-home pay.
Nov. 3	13	General Motors Corp., Ga., Ind., Md., Mich., Mo., N.J., N.Y., and Ohio.	United Automobile, Aerospace and Agricultural Implement Workers of America.	44,000	1-day stoppage staggered over various plants protested scheduled overtime to prevent company stock-piling.
Nov. 7	10	Chrysler Corporation, Ind. and Mich.	United Automobile, Aerospace and Agricultural Implement Workers of America.	17,000	The stoppages, which occurred at 7 plants over local issues and grievances, terminated as settlements were reached. Tentative agreement on a national contract was reached on November 8, shortly before the union's strike deadline. Most locals voted November 17 and 18 on ratification of the national agreement, which includes improvements similar to those won at Ford plus better pension provisions. ¹³
Nov. 9	1	General Motors Corp., Pontiac, Mich.	United Automobile, Aerospace and Agricultural Implement Workers of America.	15,000	Work resumed after 1-day protest against lack of bargaining on local issues and grievances.
Nov. 13	17	First National Stores Incorporated, Conn., Mass., Maine, N.H., and N.Y.	Amalgamated Meat Cutter and Butcher Workmen of North America.	10,000	Contracts ranging in length from 27 to 42 months providing increases to various locals as follows: Local 2—\$4 a week increases to full-time employees; unspecified increases to part-time employees; additional \$4 to \$5 a week to full-time employees and unspecified in-

See footnotes at end of table.

Table 13. Work Stoppages Involving 10,000 Workers or More, Beginning in 1967—Continued

Beginning date	Approximate duration (calendar days) ¹	Establishment(s) and location	Union(s) involved ²	Approximate number of workers involved ²	Major terms of settlement
Nov. 13—Continued.					Increases to part-time employees effective November 1968. Local 521—\$4 to \$5 a week increases to full-time employees, and $7\frac{1}{2}$ to $12\frac{1}{2}$ cents an hour to part-time employees; additional \$5 to \$6 a week to full-time employees and $7\frac{1}{2}$ to 15 cents an hour to part-time employees effective November 1968. Additional \$5 to \$7 a week to full-time employees and 10 to 17 cents an hour to part-time employees effective November 1969. Locals 33 and 371—\$4 to \$5 a week increases to full-time employees and $7\frac{1}{2}$ to $12\frac{1}{2}$ cents to part-time employees; additional \$5 to \$6 a week to full-time employees and $7\frac{1}{2}$ to 15 cents to part-time employees effective November 1968. Additional \$5 to \$6 a week to full-time employees and 10 to 17 cents an hour to part-time employees effective November 1969. Locals 314 and 385—\$4 a week increases to full-time employees and $7\frac{1}{2}$ to $12\frac{1}{2}$ cents an hour to part-time employees. Additional \$3 to \$5 a week to full-time employees and $7\frac{1}{2}$ to 15 cents an hour to part-time employees effective November 1968. Additional \$2 to \$5 a week increases to full-time employees and 10 to 17 cents an hour to part-time employees effective November 1969. Supplementary benefits (essentially the same for all locals) include: Major medical plan established for both groups; improved hospital benefits; sick leave and funeral leave; and surgical benefits established for part-time employees.
Nov. 13	29	Food Employers Council Retail Stores, Southern California.	Amalgamated Meat Cutters and Butcher Workmen of North America.	10,000	3-year contract providing an immediate wage increase of 12 cents an hour for wrappers and weighers and 15 cents to meatcutters; additional 10 cents an hour to wrappers and weighers and 12 cents to meatcutters effective November 1968; additional 10 cents to wrappers and weighers and 13 cents to meatcutters effective November 1969; funded vacation plan established with companies paying $3\frac{1}{2}$ cents an hour, effective July 1968; 4-weeks' vacation after 15 years effective January 1969; \$5 a month pension benefit for each year of service; companies pay 19 cents an hour to pension fund; companies pay an additional 3 cents an hour to health and welfare fund; major medical plan established; annual physical examination. Maximum \$25 a year optical benefits; increased prescription and dental benefits; companies pay 5 cents an hour to disability fund, effective July 1968, and increased to $12\frac{1}{2}$ cents effective July 1969; travel pay increased to 10 cents a mile for employees working in more than 1 store per day.
Nov. 18	41	Deere and Company (8 plants), Ill. and Iowa.	United Automobile, Aerospace and Agricultural Implement Workers of America.	21,000	3-year contract providing an immediate $17\frac{1}{2}$ -cent-an-hour increase and an additional 30 cents an hour to skilled tradesmen; other terms also generally similar to Ford Motor Co.—UAW and Caterpillar Tractor Co.—UAW agreements ¹⁴ including additional 3-percent wage increases effective both in the second and third years; \$100 vacation bonus; vacation closing between Christmas and New Year's; income security and long-term disability plans; and prepaid drug plan.

¹ Includes nonworkdays, such as Saturdays, Sundays, and established holidays.² The unions listed are those directly involved in the dispute, but the number of workers involved may include members of other unions or nonunion workers idled by disputes in the same establishments. The unions are affiliated with the AFL-CIO, except where they are noted as independent (Ind.).

Number of workers involved is the maximum number made idle for 1 shift or longer in establishments directly involved in a stoppage. This figure does not measure the indirect or secondary effects on other establishments or industries whose employees are made idle as a result of material or service shortages.

³ Peak idleness was reached in the first 2 weeks of April; about 50,000 drivers and related workers, mostly in the Chicago area, continued to strike until early May.⁴ See Current Wage Developments, No. 234, June 1, 1967, and No. 235, July 1, 1967, for details.⁵ Ibid., No. 236, Aug. 1, 1967.⁶ Agreement was reached with B. F. Goodrich on July 15, with Firestone on July 20, and with Uniroyal on July 26.⁷ Majority of the workers returned June 13, 1967.⁸ See Current Wage Developments, No. 235, July 1, 1967, for details.⁹ Ibid., No. 236, Aug. 1, 1967.¹⁰ See Current Wage Developments, No. 244, Apr. 1, 1968, for details.¹¹ Almost three-fourths of the workers were idle only 1 day.¹² See Current Wage Developments, No. 239, Nov. 1, 1967, for details.¹³ Ibid., No. 240, Dec. 1, 1967.¹⁴ Ibid., No. 239, Nov. 1, 1967.

Table 14. Work Stoppages Ending in 1967 by Duration and Major Issues¹

¹ Excludes stoppages on which there was no information on issues unsettled or no agreement on procedure for handling.² Less than 0.05 percent.

NOTE: Because of rounding, sums of individual items may not equal totals.

Appendix A. Tables

Table A-1. Work Stoppages by Industry, 1967

Industry	Stoppages beginning in 1967		Man-days idle, 1967 (all stoppages)	Industry	Stoppages beginning in 1967		Man-days idle, 1967 (all stoppages)
	Number	Workers involved			Number	Workers involved	
All industries	1 4,595	2,870,000	42,100,000	Manufacturing—Continued			
Manufacturing	1 2,328	1,350,000	27,800,000	Furniture and fixtures	76	16,000	361,000
Ordnance and accessories	15	18,800	224,000	Household furniture	54	11,600	272,000
Guns, howitzers, mortars, and related equipment	1	1,090	4,360	Office furniture	4	870	10,900
Ammunition, except for small arms	9	8,330	53,600	Public building and related furniture	4	1,350	37,600
Tanks and tank components	-	-	-	Partitions, shelving, lockers, and office and store fixtures	10	1,570	25,500
Sighting and fire control equipment	-	-	-	Miscellaneous furniture and fixtures	4	590	15,200
Small arms	2	2,200	30,100	Paper and allied products	109	37,200	776,000
Small arms ammunition	1	5,500	132,000	Pulp mills	1	270	270
Ordnance and accessories, not elsewhere classified	2	1,720	3,640	Pulp mills, except building paper mills	21	12,900	163,000
Food and kindred products	228	63,700	770,000	Paperboard mills	17	3,600	37,100
Meat products	48	13,200	174,000	Converted paper and paperboard products, except containers and boxes	26	9,880	301,000
Dairy products	20	6,930	33,700	Paperboard containers and boxes	40	9,940	250,000
Canned and preserved fruits, vegetables, and sea foods	15	4,110	41,500	Building paper and building board mills	4	550	25,100
Grain mill products	24	5,060	127,000	Printing, publishing, and allied industries	58	18,100	286,000
Bakery products	27	7,310	102,000	Newspapers: Publishing, publishing and printing	23	9,640	235,000
Sugar	3	1,790	41,200	Periodicals: Publishing, publishing and printing	3	2,820	5,290
Confectionery and related products	6	2,000	9,310	Books	6	2,350	12,000
Beverages	62	16,800	153,000	Miscellaneous publishing	-	-	-
Miscellaneous food preparations and kindred products	23	6,430	88,100	Commercial printing	15	2,470	14,900
Tobacco manufactures	5	6,620	84,600	Manifold business forms	3	330	12,100
Cigarettes	1	3,200	9,600	Greeting card publishing	-	-	-
Cigars	4	3,420	75,000	Blankbooks, loose leaf binders, and bookbinding work	5	420	5,030
Textile mill products	54	15,900	328,000	Service industries for the printing trade	3	40	2,500
Broadwoven fabric mills, cotton	3	1,090	5,110	Chemicals and allied products	127	36,700	1,100,000
Broadwoven fabric mills, man-made fiber and silk	1	140	140	Industrial inorganic and organic chemicals	52	17,000	434,000
Broadwoven fabric mills, wool: Including dyeing and finishing	5	2,570	29,300	Plastics materials and synthetic resins, synthetic rubber, other man-made fibers, except glass	28	11,000	414,000
Narrow fabrics and other small-wares mills: Cotton, wool, silk, and man-made fiber	1	380	1,920	Drugs	15	3,710	169,000
Knitting mills	13	1,630	83,900	Soap, detergents, and cleaning preparations, perfumes, cosmetics, and other toilet preparations	8	1,410	12,800
Dyeing and finishing textiles, except wool fabrics and knit goods	5	3,600	51,000	Paints, varnishes, lacquers, enamels, and allied products	8	480	12,800
Floor covering mills	3	510	13,000	Agricultural chemicals	4	200	6,680
Yarn and thread mills	2	390	29,600	Miscellaneous chemical products	12	3,030	50,900
Miscellaneous textile goods	21	5,610	114,000	Petroleum refining and related industries	23	9,570	116,000
Apparel and other finished products made from fabrics and similar materials	96	21,200	238,000	Petroleum refining	15	8,490	103,000
Men's, youths', and boys' suits, coats, and overcoats	5	610	12,300	Paving and roofing materials	7	1,070	12,800
Men's, youths', and boys' furnishings, work clothing, and allied garments	13	2,510	85,300	Miscellaneous products of petroleum and coal	1	10	300
Women's, misses', and juniors' outerwear	48	13,200	72,900	Rubber and miscellaneous plastics products	98	101,000	3,730,000
Women's, misses', children's, and infants' under garments	3	210	1,450	Tires and inner tubes	15	58,200	2,340,000
Hats, caps, and millinery	1	10	580	Rubber footwear	2	8,030	535,000
Girls', children's, and infants' outerwear	8	2,940	8,470	Reclaimed rubber	-	-	-
Fur goods	1	50	90	Fabricated rubber products, not elsewhere classified	35	24,900	672,000
Miscellaneous apparel and accessories	7	1,110	37,800	Miscellaneous plastics products	46	10,100	175,000
Miscellaneous fabricated textile products	10	610	19,400	Leather and leather products	30	11,700	109,000
Lumber and wood products, except furniture	60	11,700	273,000	Leather tanning and finishing	4	770	14,900
Logging camps and logging contractors	4	1,170	9,170	Industrial leather belting and packing	-	-	-
Sawmills and planing mills	19	3,880	29,600	Boot and shoe cut stock and findings	-	-	-
Millwork, veneer, plywood, and prefabricated structural wood products	25	3,460	86,300	Footwear, except rubber	17	9,540	65,800
Wooden containers	2	100	3,450	Leather gloves and mittens	1	80	2,740
Miscellaneous wood products	10	3,100	145,000	Luggage	2	180	2,430
				Handbags and other personal leather goods	4	1,040	19,500
				Leather goods, not elsewhere classified	2	60	3,250

See footnote at end of table.

Table A-1. Work Stoppages by Industry, 1967—Continued

Industry	Stoppages beginning in 1967		Industry	Stoppages beginning in 1967			
	Number	Workers involved		Man-days idle, 1967 (all stoppages)	Number	Workers involved	
Manufacturing—Continued							
Stone, clay, glass, and concrete products	160	29,900	621,000	Electrical machinery, equipment, and supplies—Continued			
Flat glass	3	3,570	149,000	Communication equipment	13	29,300	380,000
Glass and glassware, pressed or blown	14	6,870	24,900	Electronic components and accessories	26	46,900	779,000
Glass products, made of purchased glass	6	1,090	35,000	Miscellaneous electrical machinery, equipment, and supplies	18	10,400	237,000
Cement, hydraulic	9	2,160	67,400	Transportation equipment	168	347,000	5,530,000
Structural clay products	19	1,660	57,300	Motor vehicles and motor vehicle equipment	111	286,000	4,810,000
Pottery and related products	8	1,170	61,400	Aircraft and parts	22	28,800	161,000
Concrete, gypsum, and plaster products	66	5,760	109,000	Ship and boat building and repairing	18	23,300	476,000
Cut stone and stone products	2	160	7,310	Railroad equipment	9	8,050	40,100
Abrasive, asbestos, and miscellaneous nonmetallic mineral products	33	7,460	109,000	Motorcycles, bicycles, and parts—Miscellaneous transportation equipment	2	370	7,370
Primary metal industries	222	118,000	4,070,000	Professional, scientific, and controlling instruments; photographic and optical goods; watches and clocks	24	2,700	51,200
Blast furnaces, steel works, and rolling and finishing mills	62	40,600	498,000	Engineering, laboratory, and scientific and research instruments and associated equipment	3	90	670
Iron and steel foundries	52	26,600	665,000	Instruments for measuring, controlling and indicating physical characteristics	6	940	18,600
Primary smelting and refining of nonferrous metals	12	18,000	1,420,000	Optical instruments and lenses	3	190	520
Secondary smelting and refining of nonferrous metals	11	2,640	201,000	Surgical, medical, and dental instruments and supplies	6	1,080	13,700
Rolling, drawing, and extruding of nonferrous metals	32	18,000	850,000	Ophthalmic goods	1	10	650
Nonferrous foundries	26	7,650	328,000	Photographic equipment and supplies	4	310	13,100
Miscellaneous primary metal products	27	4,500	110,000	Watches, clocks, clockwork operated devices, and parts	1	90	4,100
Fabricated metal products, except ordnance, machinery, and transportation equipment	278	107,000	2,270,000	Miscellaneous manufacturing industries	56	8,290	240,000
Metal cans	6	1,220	19,800	Jewelry, silverware, and plated ware	3	960	19,100
Cutlery, hand tools and general hardware	19	7,330	157,000	Musical instruments	6	920	26,000
Heating apparatus (except electric) and plumbing fixtures	20	4,590	79,600	Toys, amusement, sporting and athletic goods	9	2,270	101,000
Fabricated structural metal products	116	35,300	740,000	Pens, pencils, and other office and artists' materials	3	190	2,130
Screw machine products, and bolts, nuts, screws, rivets	8	1,600	32,400	Costume jewelry, costume novelties, buttons, and miscellaneous notions, except precious metal	2	80	1,400
Metal stampings	29	42,000	956,000	Miscellaneous manufacturing industries	33	3,870	90,000
Coating, engraving, and allied services	11	320	14,000	Nonmanufacturing	1,267	1,530,000	14,300,000
Miscellaneous fabricated wire products	15	3,350	67,000	Agriculture, forestry, and fisheries	18	7,730	70,400
Miscellaneous fabricated metal products	54	10,800	203,000	Mining	256	102,000	3,030,000
Machinery, except electrical	264	177,000	4,010,000	Metal	14	35,600	2,790,000
Engines and turbines	10	4,530	106,000	Anthracite	3	800	1,400
Farm machinery and equipment	23	42,100	679,000	Bituminous coal and lignite	207	62,900	158,000
Construction, mining, and materials handling machinery and equipment	52	57,100	1,230,000	Crude petroleum and natural gas	5	550	10,100
Metalworking machinery and equipment	43	17,300	560,000	Mining and quarrying of nonmetallic minerals, except fuels	27	2,520	75,000
Special industry machinery, except metalworking machinery	33	6,520	162,000	Contract construction	867	305,000	5,160,000
General industrial machinery and equipment	40	17,300	627,000	Transportation, communication, electric, gas, and sanitary services	345	866,000	3,450,000
Office, computing, and accounting machines	13	15,700	274,000	Railroad transportation	28	481,000	687,000
Service industry machines	24	7,110	94,000	Local and suburban transit and interurban highway passenger transportation	60	18,500	202,000
Miscellaneous machinery, except electrical	26	9,230	287,000	Motor freight transportation and warehousing	132	234,000	1,580,000
Electrical machinery, equipment, and supplies	209	191,000	2,630,000	Water transportation	38	27,600	165,000
Electric transmission and distribution equipment	59	25,700	452,000	Transportation by air	17	7,380	45,300
Electrical industrial apparatus	28	15,700	192,000	Pipe line transportation	-	-	-
Household appliances	28	37,500	310,000	Transportation services	4	610	10,300
Electric lighting and wiring equipment	32	16,500	232,000	Communication	32	78,800	426,000
Radio and television receiving sets, except communication types	5	8,770	47,100	Electric, gas, and sanitary services	34	19,000	334,000

See footnote at end of table.

Table A-1. Work Stoppages by Industry, 1967—Continued

Industry	Stoppages beginning in 1967		Industry	Stoppages beginning in 1967			
	Number	Workers involved		Man-days idle, 1967 (all stoppages)	Number	Workers involved	Man-days idle, 1967 (all stoppages)
Nonmanufacturing—Continued							
Wholesale trade -----	237	34,100	335,000	Holding and other investment companies -----	-	-	-
Retail trade, building materials, hardware, and farm equipment dealers -----	23	3,150	47,300	Hotels, rooming houses, camps, and other lodging places -----	18	4,310	96,300
Retail trade, general merchandise stores -----	21	3,790	87,200	Personal services -----	23	2,950	14,300
Retail trade, food stores -----	42	33,900	405,000	Miscellaneous business services -----	37	2,470	26,100
Retail trade, automotive dealers and gasoline service stations -----	48	6,030	58,400	Automobile repair, automobile services, and garages -----	9	340	3,770
Retail trade, apparel and accessory stores -----	-	-	-	Miscellaneous repair services -----	5	640	15,700
Retail trade, furniture, home furnishings, and equipment stores -----	11	1,120	6,010	Motion pictures -----	3	50	1,740
Retail trade, eating and drinking places -----	39	4,310	38,200	Amusement and recreation services, except motion pictures -----	12	810	22,600
Retail trade, miscellaneous retail stores -----	13	860	16,500	Medical and other health services -----	27	1,550	71,400
Banking -----	19	10,700	91,800	Legal services -----	-	-	-
Credit agencies other than banks -----	4	40	1,110	Educational services -----	14	1,940	13,300
Security and commodity brokers, dealers, exchanges, and services -----	1	450	1,350	Museums, art galleries, botanical and zoological gardens -----	-	-	-
Insurance carriers -----	2	460	6,770	Nonprofit membership organizations -----	4	80	400
Insurance agents, brokers, and service -----	-	-	-	Private households -----	-	-	-
Real estate -----	12	9,740	82,600	Miscellaneous services -----	2	80	280
Combinations of real estate, insurance, loans, law offices -----	-	-	-	Government -----	181	132,000	1,250,000
				State -----	13	4,740	16,500
				Local -----	168	127,000	1,230,000

¹ Stoppages extending into 2 industries or industry groups or more have been counted in each industry or group affected; workers involved and man-days idle were allocated to the respective industries.

Table A-2. Work Stoppages by Industry Group and Major Issues, 1967

Industry group	Total		General wage changes		Supplementary benefits	
	Stoppages beginning in 1967		Man-days idle, 1967 (all stoppages)	Stoppages beginning in 1967		Stoppages beginning in 1967
	Number	Workers involved		Number	Workers involved

¹ Stoppages extending into 2 industries or industry groups or more have been counted in each industry or group affected; workers involved and man-days idle were allocated to the respective industries.

² Includes other finished products made from fabrics and similar materials.

³ Excludes ordnance, machinery, and transportation equipment.

⁴ Includes professional, scientific, and controlling instruments; photographic and optical goods; watches and clocks.

⁵ Idleness in 1967 resulting from stoppages that began in 1966.

NOTE: Because of rounding, sums of individual items may not equal totals.

¹ No work stoppages were recorded during 1967 for the industry groups for which no data are presented.² Idleness in 1967 resulting from a stoppage that began in 1966.³ A large proportion of the 1967 idleness resulted from a stoppage that began in 1966.⁴ Stoppages affecting more than 1 industry group have been counted in each group affected; workers involved and man-days idle were allocated to the respective groups.⁵ Fewer than 10 workers idled in the State portion of this interstate stoppage.

NOTE: Because of rounding, sums of individual items may not equal totals.

¹ Stoppages affecting more than 1 industry group have been counted in each group affected; workers involved and man-days idle were allocated to the respective groups.

² Includes other finished products made from fabrics and similar materials.

³ Excludes ordnance, machinery, and transportation equipment.

⁴ Includes professional, scientific, and controlling instruments; photographic and optical goods; watches and clocks.

NOTE: Because of rounding, sums of individual items may not equal totals.

Appendix B. Chronology—The Shipbuilding Industry

The Pacific Coast Shipbuilders' Association—vs. International Brotherhood of Electrical Workers, AFL-CIO³ 1966–67

- November 4,
1966 ----- Despite months of intermittent negotiations, often with the assistance of Federal mediators, electricians stopped working at West Coast shipyards, thus curtailing work on vessels used in transporting war materials to Viet Nam.⁴ Originally, the electricians demanded a 70-cent hourly increase and additional fringe benefits amounting to 22 cents. By November 8, this demand was pared down to 5 percent each year under a 2-year contract, retroactive to July 1, 1965. The association rejected this proposal, contending that it was "out of line" with wages paid other craftsmen.
- November 11 ____ Negotiators for the shipyards and union agreed to meet with Federal mediators in Washington, D. C., on November 15, but the union declined to urge its members to return to work pending the talks, as requested by William E. Simkin, Director of the Federal Mediation and Conciliation Service.
- November 15 ____ FMCS mediators opened talks in Washington. The mediators recessed the talks indefinitely on November 17, stating that the parties were as far apart on terms of a new contract as they were when the dispute began. A union proposal to submit all terms of the contract to arbitration was rejected by the shipbuilders.
- December 1 ____ Negotiations resumed in San Francisco. Representatives of the shipbuilders proposed that the Director of FMCS name a panel of men familiar with the shipbuilding and repair industry to determine the relevant facts on the unresolved economic issues, but the union rejected the proposal.
- December 7 ____ Negotiations were recessed and no progress reported.
- January 5,
1967 ----- Federal mediators met jointly with union and association representatives, but the meeting was adjourned when it was learned that neither side had anything new to offer.
- January 27 ----- Negotiators for the shipbuilders and representatives of the Metal Trades Department of the AFL-CIO met in Washington, D. C., in a new effort to reach a settlement. Gordon M. Freeman, president of the IBEW, participated in the talks. Representatives of the Metal Trades Department proposed (a) that all unions in the shipyards agree to negotiate jointly with the

³ The dispute stemmed from a 1965 decision by the IBEW to cease bargaining through the Metal Trades Council, which previously negotiated a single contract for all crafts employed at the shipyards. Consequently, the IBEW was not a party to a 3-year agreement reached in July 1965 between the association and member unions represented by the Council.

⁴ The sanctioned stoppage was preceded by a 2-day strike October 11-12, called by union members to force their international officers and employer representatives to resume negotiations.

- January 27—Continued shipbuilders; (b) that the shipbuilders agree to open all contracts June 30 and negotiate a new 3-year contract; and (c) that electricians return to work under the old contract terms pending these new negotiations. The shipbuilders accepted this proposal and the union agreed to submit the proposal to its members for a vote. Voting began February 1, and, as union officials had predicted, the proposal was rejected.⁵
- March 2 ----- Stating that the strike, if permitted to continue, would imperil the national safety, President Johnson invoked the emergency provisions of the Taft-Hartley Act and appointed a Board of Inquiry to investigate the dispute. Board members were J. Keith Mann, Assistant Professor of Law at Stamford University, who was chairman; George E. Reedy, former White House press secretary; and Paul D. Hanlon of Portland, Oreg., attorney.
- March 6 ----- After notice to the parties, the Board held hearings in San Francisco on March 6 and 7. Management representatives testified that shipbuilding and repair had continued to a substantial degree during the strike, but had reached a point at which such work could not continue without the services of electricians.
- The parties agreed that the specific issues in dispute were subordinate to the different collective bargaining approaches. The association contended that a shipyard was an integrated operation, and that the mechanic's base rate must be uniformly applied to all skilled employees, although they were represented by several unions. The IBEW demanded separate bargaining and wages and benefits based upon electricians' skills.
- March 7 ----- The Board reported to the President, stating that intensive negotiations and mediation efforts had failed to achieve an agreement, and that "The firm insistence of the association on adherence to the traditional industry pattern of a uniform hourly rate for all crafts, and the equally firm determination of the union to break from this pattern and to obtain a higher rate for electricians through individual bargaining created the impasse."
- The report concluded that it was the judgment of the Board that "resumption of normal operations in the yards is not soon to be anticipated nor is early agreement foreseeable."
- March 9 ----- President Johnson announced that he had directed the Attorney General to seek an injunction under the national emergency provisions of the Taft-Hartley Act. A petition to halt the strike was immediately filed with the U.S. District Court in San Francisco. An affidavit from Secretary of Defense Robert S. McNamara stated that the strike was interfering with procurement and replacement of equipment for the war in Viet Nam, and, if allowed to continue, would "result in an unacceptable and irretrievable loss of time in supplying the ships essential to the national defense and security of the United States."
- March 10 ----- Judge Albert C. Wollenberg ruled that the strike had affected a substantial part of the industry and imperiled the national safety. He issued an injunction ordering the electricians back to work and prohibiting a lockout by the shipbuilders until May 29.
- Picket lines were immediately withdrawn from the yards, and a union spokesman stated that the union would make every effort to comply with the order.

⁵ Peak idleness of almost 10,000 workers was reached in late January.

- March 13 ----- Electricians returned to work.
- April 13 ----- The first negotiating session after the injunction was granted was held in Seattle. Talks continued through April 14. No progress was reported, but the parties agreed to meet again April 27.
- April 27 ----- Federal mediators met with the parties in San Francisco.
- May 2 ----- A resumption of the strike was averted when the parties accepted a FMCS proposal to (a) submit specific unresolved issues to the 3-member Board of Inquiry to make findings of fact and recommendations, if necessary; (b) not to strike or lockout at least until July 1, 1967; and (c) before a strike or lockout, to submit the final management offer to the membership for a vote to be conducted by the National Labor Relations Board. The Board of Inquiry asked the parties to submit briefs by May 22.
- June 12 ----- J. Keith Mann, chairman of the Board, announced that the parties had agreed to extend the no-strike-no-lockout commitment from July 1 to July 23. The Board requested the extension for time in which to pursue the inquiry and present its findings June 30.
- June 27 ----- The Board announced that the parties had reached an agreement and stated that the provisions would be submitted to IBEW members for ratification.
- July 5 ----- The NLRB mailed ballots to the IBEW members.
- July 18 ----- A spokesman for the NLRB announced in San Francisco that the electricians had voted to accept the contract.⁶

⁶ The 1-year contract provided a 15-cent-an-hour wage increase effective July 1, 1967; an additional 5 cents, effective Jan. 1, 1968; a 4-cent-an-hour increase in employer contributions to pension or health and welfare funds, effective July 1, 1967; and provisions for a tool allowance or company-supplied tools. The association agreement with Carpenters, Machinists, and unions composing the Pacific Coast District Metal Trades Council was amended to provide additional wage increase to maintain parity with the IBEW. IBEW officials agreed to bargain jointly with other crafts in 1968, but stated that they would sign a separate agreement.

Appendix C. Chronology—The Aerospace Industry

The Avco Corp., Lycoming Division, Stratford, Conn.—vs. United Automobile, Aerospace and Agricultural Implement Workers of America, AFL-CIO, 1967⁷

- February 13 — Company and union negotiators met to discuss new contract proposals submitted by the union. Wages and fringe benefits, including supplementary unemployment insurance, were the issues of major importance.
- Negotiations continued through March 14.
- March 23 ----- The two parties called in State and Federal mediators to assist in the negotiations. The mediators met with company and union representatives through April 14; however, no significant progress was reported.
- April 2 ----- Members of UAW Local 1010 adopted a resolution "to empower the negotiating committee to call a strike on April 15, 1967, if no acceptable agreement, in the opinion of the committee, has been agreed upon."
- April 13 ----- Labor Secretary Willard Wirtz sent telegrams to company and union representatives and the mediators, requesting them to meet with him in Washington, D. C., April 14.
- April 14 ----- The two parties met with Secretary Wirtz, the mediators, and members of the Secretary's staff for several hours. During the meetings, the company representatives agreed to present a counter-proposal on supplemental unemployment insurance and other fringe benefits.
- April 15 ----- Stating that the dispute threatened to result in a strike that would, if permitted to occur or continue, imperil the national safety, President Johnson invoked the national emergency provisions of the Taft-Hartley Act and appointed a 3-member Board of Inquiry to investigate. Board members were the Reverend Leo C. Brown, S. J., of the Center for Social Studies, Cambridge, Mass., chairman; Clyde W. Summors, Yale University; and J. C. Hill, New York arbitrator. After notifying the parties, the Board held a hearing in Stratford, Conn. Their report to the President stated that the parties had not reached a meeting of minds on many issues of major importance; nor had bargaining proceeded to the point where the parties had been able to formulate a precise statement of their differences. The board concluded that "There is every indication that a settlement of this dispute will require difficult and extended negotiations."
- April 16 ----- More than 2,000 employees began leaving their jobs, halting production of gas turbine engines for helicopters.
- April 17 ----- After Defense Secretary Robert S. McNamara informed the President that interruption of production at Avco (which was the sole manufacturer of engines for troop-carrying helicopters) would have serious consequences in Viet Nam, President Johnson directed the Justice Department to seek an injunction to halt the strike, under the national emergency provisions of the Taft-Hartley Act.
- Judge William H. Timbers, of the U.S. District Court in New Haven, Conn., issued a 10-day restraining order, halting the strike. Employees began returning to work on the 3 p.m. shift.

⁷ The dispute involved members of UAW Local 1010, representing production and maintenance workers; and Local 376, representing office and technical workers.

- April 19 ----- Federal and State mediators resumed their efforts. They were joined by Reverend Brown, chairman of the Board of Inquiry.
- April 25 ----- Judge Timbers extended the restraining order to a preliminary 80-day injunction, retroactive to April 17.
- June 7 ----- The National Labor Relations Board set June 20 as the date for the union's membership to vote on the company's final offer.
- June 10 ----- The UAW Executive Board unanimously recommended that union members reject the company's final offer, which did not include supplementary unemployment benefits.
- June 14 ----- Company and union representatives met with members of the Board of Inquiry to present statements of their respective positions. Federal mediators and representatives of NLRB also attended the meeting.
- June 16 ----- In its second report to the President, the Board summarized the mediative efforts made toward settlement of the dispute and reported that although most noneconomic issues had been settled, no significant progress has been made on the economic issues. Avco estimated the cost of its last offer at approximately 43 cents an hour. The Board also reported that although it lacked data for a reliable estimate of the magnitude of the differences between the costs of the union's requests and the employer's last offer, the difference was substantial.
- June 20 ----- Union members rejected the company's offer in the balloting conducted by the NLRB.
- June 27 ----- Because no settlement was in sight, Undersecretary of Labor James J. Reynolds called union and management officials to Washington again. The parties met with Defense and Labor Department officials, and, on June 28, announced that they had reached an agreement.
- July 3 ----- The agreement was ratified by members of UAW Local 1010, and subsequently by members of Local 376.⁸

⁸ Terms of both agreements were similar—a 3-year contract provided for an immediate wage increase averaging 18 cents an hour (including 10 cents retroactive to April 16), and increases in 1968 and 1969, averaging 17 cents and 18 cents, respectively. An additional 10 cents was provided for skilled workers, and night-shift differentials were increased. Pensions were increased from \$2.70 to \$4 a month for each year's credited service, effective Jan. 1, 1968, and to \$4.75 Jan. 1, 1969. Other pension improvements included vesting after 10 years' service instead of age 40, and company-paid hospital-surgical insurance for present retirees. The settlement also provided for liberalizations in sick leave and health and welfare provisions, including hospital-medical benefits; a SUB plan replaced the Extended Layoff Benefits plan.

Appendix D. Scope, Methods, and Definitions⁹

Work Stoppage Statistics

The Bureau's statistics are intended to include all work stoppages occurring in the United States involving as many as six workers and lasting the equivalent of a full day or shift or longer.

Definitions

Strike or Lockout. A strike is defined as a temporary stoppage of work by a group of employees (not necessarily members of a union) to express a grievance or enforce a demand. A lockout is a temporary withholding of work from a group of employees by an employer (or group of employers) in order to induce the employees to accept the employer's terms. Because of the complexities involved in most labor-management disputes, the Bureau makes no effort to determine whether the stoppages are initiated by the workers or the employers. The terms "strike" and "work stoppage" are used interchangeably in this bulletin.

Workers and Idleness. Figures on "workers involved" and "man-days idle" include all workers made idle for one shift or longer in establishments directly involved in a stoppage.¹⁰ They do not measure secondary idleness—that is, the effects of a stoppage on other establishments or industries whose employees may be made idle as a result of material or service shortages.

The total number of workers involved in strikes in a given year includes workers counted more than once if they were involved in more than one stoppage during that year. (Thus, in 1949, 365,000 to 400,000 coal miners struck on three different occasions; they accounted for 1.15 million of the year's total of 3.03 million workers.)

In some prolonged stoppages, it is necessary to estimate in part the total man-days of idleness if the exact number of workers idle each day is not known. Significant changes in the number of workers idle are secured from the parties for use in computing man-days of idleness.

Idleness as Percent of Total Working Time. In computing the number of workers involved in strikes as a percent of total employment and idleness as a percent of total working time, the following employment figures have been used:

From 1927 to 1950, all employees were counted, except those in occupations and professions in which little, if any, union organization existed or in which stoppages rarely, if ever, occurred. In most industries, all wage and salary workers were included except those in executive, managerial, or high supervisory positions, or those performing professional work the nature of which made union organization or group action unlikely. The figure excluded all self-employed persons; domestic workers; workers on farms employing fewer than six persons; all Federal and State Government employees; and officials, both elected and appointed, in local governments.

From 1951 to 1966, the Bureau's estimates of total employment in nonagricultural establishments, exclusive of government, have been used. Idleness computed on the basis of nonagricultural employment (exclusive of government) usually differs by less than one-tenth of a percentage point from that obtained by the former method, while

⁹ More detailed information is available in BLS Handbook of Methods for Surveys and Studies, BLS Bulletin 1458 (1966), ch. 19.

¹⁰ Aggregate figures on workers and strike idleness are rounded to three significant digits. Figures to the right of the third significant digit appear as zeros; the last digit is always rounded to zero. To illustrate: an unrounded figure of 5,014,000 man-days would appear as 5,010,000; an unrounded total of 26,457 would be presented as 26,500; and a figure of 493 workers would appear as 490. Totals and percentages, however, are computed from unrounded figures.

the percentage of workers idle (compared with total employment) differs by about 0.5 of a point. For example, the percentage of workers idle during 1950 computed on the same base as the figures for earlier years was 6.9, and the percent of idleness was 0.44, compared with 6.3 and 0.40, respectively, computed on the new base.

Beginning with 1967, two estimates of employment have been used. One is the former series of nonagricultural employment (exclusive of government), which is used to calculate private nonfarm working time, nationally and for the States. This idleness series differs slightly from the old series. The second estimate of employment is the Bureau's estimate of nonagricultural employment plus agricultural wage and salaried workers from the household series. This series is used both to calculate the number of workers involved in strikes as a percent of employment and to compute idleness for the total economy. Idleness computed on this basis is always lower than the older series; for the period 1941-48 the difference was as much as 25 percent.¹¹

"Estimated working time" is computed by multiplying the average number of workers employed during the year by the number of days typically worked by most employees. In the computations, Saturdays (when customarily not worked), Sundays, and established holidays as provided in most union contracts are excluded.

Duration. Although only workdays are used in computing man-days of total idleness, duration is expressed in terms of calendar days, including nonworkdays.

State Data. Stoppages occurring in more than one State are listed separately in each State affected. The workers and man-days of idleness are allocated among each of the affected States.¹² The procedures outlined on the preceding page have also been used in preparing estimates of idleness by State.

Metropolitan Area Data. Information is tabulated separately for the areas that currently comprise the list of standard metropolitan areas issued by the Bureau of the Budget in addition to a few communities historically included in the strike series before the standard metropolitan area list was compiled. The areas to which the strike statistics apply are those established by the Bureau of the Budget. Information is published only for those areas in which at least five stoppages were recorded during the year.

Some metropolitan areas include counties in more than one State, and, hence, statistics for an area may occasionally equal or exceed the total for the State in which the major city is located. Stoppages in the mining and logging industries are excluded from metropolitan area data.

Unions Involved. Information includes the union(s) directly participating in the dispute, although the count of workers includes all who are made idle for one shift or longer in establishments directly involved in the dispute, including members of other unions and nonunion workers.

Sources of Information

Occurrence of Strikes. Information as to actual or probable existence of work stoppages is collected from a number of sources. Clippings on labor disputes are obtained from a comprehensive coverage of daily and weekly newspapers throughout the country. Information is received regularly from the Federal Mediation and Conciliation Service. Other sources of information include State boards of mediation and arbitration; research divisions of State labor departments; local offices of State employment security agencies, channeled through the Bureau of Employment Security of the U.S. Department of Labor; and trade and union journals. Some employer associations, companies, and unions also furnish the Bureau with work stoppage information on a voluntary cooperative basis, either as stoppages occur or periodically.

¹¹ For more detailed information on the components and methods of calculating the new series see appendix E.

¹² The same procedure is followed in allocating data on stoppages occurring in more than one industry, industry group, or metropolitan area.

Respondents to Questionnaire. A questionnaire is mailed to the parties reported as involved in work stoppages to obtain information on the number of workers involved, duration, major issues, location, method of settlement, and other pertinent information.

Limitations of Data. Although the Bureau seeks to obtain complete coverage, i.e., a "census" of all strikes involving six workers or more and lasting a full shift or more, information is undoubtedly missing on some of the smaller strikes. Presumably, allowance for these missing strikes would not substantially affect the figures for number of workers and man-days of idleness.

In its efforts to improve the completeness of the count of stoppages, the Bureau has sought to develop new sources of information as to the probable existence of such stoppages. Over the years, these sources have probably increased the number of strikes recorded, but have had little effect on the number of workers or total idleness.

Beginning in mid-1950, a new source of strike "leads" was added through a cooperative arrangement with the Bureau of Employment Security of the U.S. Department of Labor by which local offices of State employment security agencies supply monthly reports on work stoppages coming to their attention. It is estimated that this increased the number of strikes reported in 1950 by about 5 percent, and in 1951 and 1952, by approximately 10 percent. Since most of these stoppages were small, they increased the number of workers involved and man-days of idleness by less than 2 percent in 1950 and by less than 3 percent in 1951 and 1952. Tests of the effect of this added source of information have not been made since 1952. In 1966, BES was the sole source for 17 percent of the strikes recorded.

As new local agencies having knowledge of the existence of work stoppages are established or changes are made in their collection methods, every effort is made to establish cooperative arrangements with them.

Appendix E. Total Economy Measure of Strike Idleness

In assessing the trend of idleness caused by work stoppages over a long period, a meaningful measure must be used that reflects changes in the size of the labor force. For this reason, idleness measures have been expressed as a percentage of the total employed force and of the total time worked. In previous calculations of this ratio, agricultural and government workers have not been included in the employment and working time measures because their strikes were negligible. Recent developments in these sectors have necessitated a reevaluation of this method. To reflect the influence of these developments, it has been decided to compute two sets of measures—one based on the wage and salary workers in the civilian work force, and the other on those in the private nonfarm sector.

Total Economy Measure

The new private nonfarm series closely approximates the former BLS series which, as noted, excluded government and agricultural workers from employment totals, but accounted for time lost by such workers while on strike. In recent years, the old method has resulted in an increasingly distorted measure of the severity of strikes; with the likely growth of strike activity among the two groups, it may distort the measure even more in the future. The new "total economy" measure of strike idleness will include government and agricultural workers in its employment count as well as in the computation of idleness ratios. On the other hand, data for the private nonfarm sector will henceforth exclude agricultural and government workers from employment totals, and these groups also will be removed from strike figures in arriving at a percentage of working time lost. To facilitate comparison over time, the private nonfarm series has been recalculated for all years beginning with 1950, while the figure for the total economy has been carried back to 1939. The differences resulting from the use of the new methods are illustrated in table E-1; the various components of each series and the methods of computation are set forth in table E-2.

Table E-1. Idleness as a Percent of Estimated Working Time, 1939-67

Year	New series		Old series
	Total economy ¹	Private nonfarm	
1939 -----	0.21	-	0.28
1940 -----	.08	-	.10
1941 -----	.23	-	.32
1942 -----	.04	-	.05
1943 -----	.10	-	.15
1944 -----	.07	-	.09
1945 -----	.31	-	.47
1946 -----	1.04	-	1.43
1947 -----	.30	-	.41
1948 -----	.28	-	.37
1949 -----	.44	-	.59
1950 -----	.33	0.40	.44
1951 -----	.18	.21	.23
1952 -----	.48	.57	.57
1953 -----	.22	.26	.26
1954 -----	.18	.19	.21
1955 -----	.22	.26	.26
1956 -----	.24	.29	.29
1957 -----	.12	.14	.14
1958 -----	.18	.22	.22
1959 -----	.50	.61	.61
1960 -----	.14	.17	.17
1961 -----	.11	.12	.14
1962 -----	.13	.16	.16
1963 -----	.11	.13	.13
1964 -----	.15	.18	.18
1965 -----	.15	.18	.18
1966 -----	.15	.18	.19
1967 -----	.25	.30	.31

¹ Civilian wage and salary workers, except domestics.

Table E-2. Comparative Methods of Estimating the Strike Idleness Ratio by Means of Employment and Working Time

Components and method	Total economy	Private sector	Old series
Employment -----	Establishment series plus wage and salaried farm workers. ¹	Establishment series less government.	Establishment series less government.
Working time -----	Above employment times working days.	Above employment times working days.	Above employment times working days.
Man-days of idleness as a percent of estimated total working time.	$\frac{\text{Total idleness}}{\text{Above working time}} \times 100$	$\frac{\text{Total idleness less farm and government}}{\text{Above working time}} \times 100$	$\frac{\text{Total idleness}}{\text{Above working time}} \times 100$

¹ From the BLS household series.

As in the past, the "estimated total working time" is computed by multiplying the average number of workers employed during the year by the number of days worked by most employees.¹³ In these computations, Saturdays, Sundays, and established holidays as provided in most union contracts are excluded.

Since the employment figures may be regarded as being reduced by strike idleness, especially in the case of a prolonged industrywide strike, time lost could exceed working time. Such instances, as in the past, will be described in BLS reports on a case-by-case basis. A systematic adjustment would require assumptions about the number of workers that would have worked had there been no strike, and also the number of strikers who continue to work at another job in the same industry. Hence, the ratios are computed on the basis of actual employment. In most instances, the difference is negligible.

The new "total economy" data will appear in national strike tabulations only, beginning with this bulletin. Stoppage data by State, it should be noted, will be limited to nonfarm employment and idleness, primarily because State agricultural employment figures are not always readily available. A further factor is the preponderance of agricultural employment in some States, which would invalidate comparisons with other States in which such employment comprises only a small proportion of the total work force.

History of the Measure

Strike idleness as a percent of estimated working time was first published in 1941, after the Bureau had examined several approaches for developing measures of the effect of strikes on the economy. The worktime estimates for the 1927-50 period were based upon the number of "potential strikers."¹⁴ The numbers of such strikers were estimated primarily on a selection of gainfully occupied persons 10 years old and over, with adjustment for unemployment, and the figures were collected in the decennial census. For each census year of 1890 to 1950, the approximate number of potential strikers was established simply as the sum of the workers in the various occupations which the Bureau considered to be "exposed" to strikes. All workers in some occupations were considered to be exposed to work stoppages, while only portions of the workers in other occupations were considered potential strikers.

¹³ For example, the total economy figure for 1967 was computed by taking average employment for the year and multiplying it by the number of working days ($67,366,000 \times 254 = 17,110,964,000$), and this figure was divided into the total number of man-days lost because of strikes for the year (42,100,000) to give a percent of total working time lost of 0.25. Computations for States and industries are made in a similar manner.

"Workers employed" include both permanent and temporary employees and those working either full or part time. Workers on the payroll who are on paid sick leave (when pay is received directly from the employer), paid holiday, or paid vacation, or who work during only part of the specified pay period of the employment survey, are counted as employed. Persons on the payroll and reported by two establishments are counted twice, whether the duplication is due to turnover or dual jobholding. Persons are considered employed if they receive pay for any part of the specified pay period. Not counted as employed are those who are laid off, on leave without pay, or on strike for the entire period; or who are hired but do not report to work during the period. Since proprietors, the self-employed, and unpaid family workers do not have the status of "paid employees," they are not included. Domestic workers in households are excluded from the data. Government employment statistics refer to civilian employees only. Nonagricultural figures are derived from the BLS establishment series survey, and agricultural wage and salaried workers from the household series.

¹⁴ This estimate of "potential strikers" is also used to compute the number of workers involved in strikes as a percent of total employment for the 1890-1967 period.

For example, of the total number of blacksmiths in the country, those employed in factories, mines, and other establishments were considered as exposed to strikes, but those in business for themselves were not. In general, the Bureau attempted to include all employees subject to strikes and to exclude all proprietors, supervisory officials, government employees, civil and military, and any other employees who, because of the nature of their work, seldom participated in strikes, such as domestic servants, clergymen, and college professors.

Once labor force totals for each census year had been established, estimates for the intervening years were obtained by interpolation. These figures were adjusted to obtain total employment. The basis for the adjustment from 1890 to 1927 was the estimate of unemployment in manufacturing, transportation, construction, and mining, given by Paul H. Douglas in his work, Real Earnings in the United States;¹⁵ for 1928 and 1929, the adjustment was based upon the BLS employment estimates; for 1930, the census figures on unemployment were used. For the years 1931-50, the BLS figures on average employment were used, with adjustments consisting of additions for agricultural workers, share croppers, and Works Progress Administration (WPA) workers; and the elimination of all government employees, supervisory employees, and certain other occupational groups.

By this process, the following portions of the total employment in the various industry divisions were treated as "potential strikers" from 1941 to 1950:

Industry division	Percent of total em- ployment regarded as potential strikers
Manufacturing -----	92.15
Mining -----	96.98
Construction -----	94.64
Transportation and public utilities -----	93.75
Trade -----	85.87
Finance, service and miscellaneous -----	66.41
Government (municipal workers)-----	15 to 20
Agriculture (hired workers) -----	22.00

Data for 1951-66 were calculated on a completely different basis. The Bureau's figures for total employment in nonagricultural establishments, exclusive of government, were used. No adjustments were made for occupations. Idleness computed on this basis differed by less than one-tenth of 1 percent from that obtained previously. However, large strike idleness of either agricultural workers or public employees would increase the idleness percentage more than it actually did for the total economy. These considerations led the Bureau to redefine the concepts used in this series.
