Preface

The Bureau of Labor Statistics conducts annual surveys of wage rates and weekly straight-time hours of work for specified crafts or jobs as provided in labor-management agreements in the building construction, printing, local transit, and local trucking industries. A biennial survey of grocery stores also is included in this program. These studies present the wage rates in effect on July 1, as reported to the Bureau by the appropriate local labor organization officials in each of the surveyed cities.

Preliminary listings of union wage rates and hours for printing trades employees in each city were issued earlier. Copies of these are available from the Bureau of Labor Statistics, Washington, D.C. 20212, or any of its regional offices listed on the inside back cover of this bulletin.

The study was conducted in the Bureau's Office of Wages and Industrial Relations. This bulletin, which provides a comprehensive account of the current study and includes indexes of wage rates for 1907-71, was prepared by John F. Fitsock in the Division of Occupational Wage Structures.

Printing Industry

Summary

On July 1, 1971, union wage rates for printing trades workers in cities of 100,000 inhabitants or more averaged \$5.47 an hour—an increase of 10.2 percent, or 51 cents, over the previous year. The percentage rise exceeded the 8.3-percent increase for the year ending July 1, 1970, and was the largest since the years immediately after World War II.

The 10.2-percent increase advanced the Bureau's index for straight-time union wage rates for all printing trades to 133.6 on July 1, 1971. The wage index for book and job workers was 133.7 and for newspaper workers was 133.1 (1967=100). (See table 1.)

The annual survey showed that 92 percent of the workers studied received wage-rate increases during the July 1970-71 period. The increases varied considerably—nearly one-fifth of the workers were granted increases of less than 7 percent and slightly more than one-fifth received wage adjustments of 14 percent or more. (See table 8.) Cents-per-hour increases are shown in table 7.

Wage rates for workers in book and job shops averaged \$5.11 an hour on July 1, 1971, compared with \$5.65 for those in newspaper establishments and \$6.15 for workers in lithography (offset printing) plants. Part of these differences result from the way workers are distributed in the three industry branches among the cities surveyed. For example, Chicago, Los Angeles, Detroit, New York City, and San Francisco—five relatively high pay cities—accounted for 51 percent of the workers in lithography, 41 percent in book and job shops, and 24 percent in newspaper establishments. The relative differences in average wage rates for the three industry branches within these cities were generally smaller than the differences for all cities combined.

Since 1961, union wage rates for printing trades workers have advanced at an average annual rate of 4.8 percent. It amounted to 2.9 percent for 1961-66 contrasted with 6.8 percent during the 1966-71 period. The annual percentage increases for the decade are shown in text table 1.

Text table 1. Percent increases in average union hourly wage rates in printing trades, United States, 1961-71

Year	All printing trades workers	Book and job shop workers	Newspaper establishments workers
1961-62 -----	2.9	3.1	2.7
1962-63 -----	2.9	3.0	2.8
1963-64 -----	2.6	2.9	2.4
1964-65 -----	2.8	3.1	2.5
1965-66 -----	3.3	3.4	3.1
1966-67 -----	4.1	3.5	4.8
1967-68 -----	5.0	5.2	5.1
1968-69 -----	6.6	6.3	6.6
1969-70 -----	8.3	8.2	7.9
1970-71 -----	10.2	10.5	10.2

Regional and city averages of union wage rates by industry branch are presented in tables 10 and 11. These averages are influenced by differences in union wage rates for individual cities and by the differences in the occupational composition for a given industry branch among cities. A particular craft may not be covered by a collective bargaining agreement in some cities and thus is excluded from the survey, whereas all or part of the workers in the craft may be covered in other cities. In addition, certain types of work are more prevalent in some cities than others. Table 13 presents, by city and industry branch, wage rates for specific occupations, and provides the best intercity comparison at this level.

Average hourly wage rates varied by occupation within each of the industry branches. In book and job shops, they ranged from \$3.27 an hour for bindery women to \$6.20 an hour for photoengravers. Daywork rates in newspaper plants averaged highest (\$5.94) for photoengravers and lowest (\$5.17) for mailers. For nightwork, corresponding averages ranged from \$6.33 to \$5.64 an hour, respectively. In lithography (offset) shops, average hourly wage rates varied from a low of \$5.33 for press assistants and feeders to a high of \$6.44 for both offset pressmen and artists.

Weekly hours paid at straight-time rates averaged 35.9 for all printing trades workers on July 1, 1971. (See table 9.) Averages were about 36 hours in book and job shops and newspaper establishments and 35 hours in lithography.

Contract provisions for employer financed health and welfare and/or pension plans applied to about 85 percent of the workers surveyed. Where available, information on these plans concerning the amount employers contributed by trade and area is presented in table 13.

Scope and method of survey

Union wage rates and hours reported in this bulletin were agreed on through collective bargaining between trade unions and employers, and defined as (1) the basic (minimum) wage rates (excluding holiday, vacation, or other benefit payments made regularly or credited to the worker each pay period) and (2) the maximum schedules of hours at straight-time rates. Rates over the negotiated minimum, which may be paid for special qualifications or other reasons, are excluded.

Information presented in this bulletin was based on union rates in effect on July 1, 1971, for approximately 121,000 printing trades workers in 69 cities. Data were obtained primarily from local union officials by mail questionnaire; in some instances, Bureau economists visited local union officials to obtain the desired information.

The survey was designed to reflect union wage rates of printing industry employees in all cities of 100,000 inhabitants or more, excluding Honolulu, and is based on the 1960 Census of Population. All cities that had 500,000 inhabitants or more were included, as were most cities with 250,000–500,000 inhabitants. The cities selected for study from those having 100,000–250,000 inhabitants were distributed widely throughout the United States. Data for some cities were weighted to compensate for cities not surveyed. To provide appropriate regional representation, each region was considered separately when city weights were assigned.

Average wage rates, designed to show current levels, were based on wage rates reported in each city on July 1, 1971. The wage rates were weighted by the number of union members at the rate in the area. These averages were not designed for precise year-to-year comparisons because of fluctuations in membership and in the classifications studied. Average cents-per-hour and percent changes from July 1, 1970, to July 1, 1971, however, were based on comparable quotations for the various job classifications in both periods, and weighted by the memberships reported for the current (1971) survey. The index series, designed for trend purposes, was constructed similarly.

¹ Index series designed for trend purposes; periodical changes in union rates are based on comparable quotations for the various occupations in consecutive periods, weighted by number of union members reported at each quotation in the current survey period.

² Combined data for years 1907-10 not available.

³ Lithography workers were included in the index for the first time in 1968. The index excluding these workers was 105.2.

Table 5. Average wage rates and changes by trade: United States

(Average union hourly rates in the printing trades, July 1, 1971,
and changes in rates, July 1, 1970-71)

Trade	Average hourly rate ¹	Change from July 1, 1970 ²	
		Cents per hour	Percent
All printing trades.....	\$5.47	51	10.2
Book and job.....	\$5.11	49	10.5
Bindery women.....	3.27	35	12.0
Bookbinders.....	5.44	54	11.1
Compositors, hand.....	5.69	56	11.1
Electrotypers.....	5.28	34	7.0
Machine operators.....	5.62	54	10.6
Machine tenders (machinists).....	5.96	65	12.1
Mailers.....	4.52	45	11.1
Photoengravers.....	6.20	44	7.6
Press assistants and feeders.....	4.91	66	15.6
Pressmen, cylinder.....	5.51	47	9.4
Pressmen, platen.....	4.95	44	9.7
Stereotypers.....	5.56	43	8.2
Newspaper.....	5.65	52	10.2
Daywork.....	5.46	49	9.9
Nightwork.....	5.83	55	10.5
Compositors, hand.....	5.62	51	9.9
Daywork.....	5.50	49	9.9
Nightwork.....	5.74	52	9.9
Machine operators.....	5.76	51	9.7
Daywork.....	5.59	51	10.0
Nightwork.....	5.90	52	9.6
Machine tenders (machinists).....	5.61	51	10.1
Daywork.....	5.52	51	10.2
Nightwork.....	5.70	52	10.1
Mailers.....	5.41	67	14.1
Daywork.....	5.17	56	12.2
Nightwork.....	5.64	77	15.9
Photoengravers.....	6.12	46	8.0
Daywork.....	5.94	44	7.9
Nightwork.....	6.33	48	8.1
Pressmen (journeymen).....	5.63	51	9.9
Daywork.....	5.41	48	9.8
Nightwork.....	5.88	54	10.1
Pressmen-in-charge.....	5.93	41	7.4
Daywork.....	5.69	39	7.4
Nightwork.....	6.18	42	7.3
Stereotypers.....	5.58	47	9.2
Daywork.....	5.28	40	8.3
Nightwork.....	5.90	54	10.0
Lithography.....	6.15	53	9.5
Artists.....	6.44	55	9.4
Cameramen.....	6.36	54	9.3
Platemakers.....	6.22	54	9.4
Press assistants and feeders.....	5.33	50	10.3
Pressmen, offset.....	6.44	55	9.4
Strippers.....	6.17	52	9.2

¹ Average rates based on all rates in effect July 1, 1971; each union rate was weighted by the number of union members at each reported rate.

² Based on comparable quotations for 1970 and 1971, and weighted by the number of union members at each reported quotation in 1971.

Table 6. Wage rate distribution by trade: United States

(Distribution of union members in the printing trades by hourly wage rates and trade, July 1, 1971)

Trade	Average hourly rate	Percent of union workers whose rates per hour were—																	
		Under \$3.00	\$3.00 and under \$4.00	\$4.00	\$4.20	\$4.40	\$4.60	\$4.80	\$5.00	\$5.20	\$5.40	\$5.60	\$5.80	\$6.00	\$6.20	\$6.40	\$6.60	\$6.80	\$7.00 and over

¹ The average in the book and job tabulation includes rates for semiskilled—bindery women and press assistants and feeders—as well as the highly skilled journeymen, composing room and pressroom workers, and others. The number of semiskilled workers organized in a city may influence the average for the city.

¹ Basic (minimum) rates, excluding holiday, vacation, or other benefit payments regularly made or credited to the worker each pay period.² Maximum schedules of hours at straight-time rates.³ Shown in terms of cents-per-hour or as percent of rate; in actual practice, however, some employer payments are calculated on the basis of total hours or gross payroll. These variations in method of computation are not indicated in the above tabulation.⁴ Includes life insurance, hospitalization, and other types of health and welfare benefits; excludes payments into holiday, vacation, and unemployment funds when such programs have been negotiated.⁵ Agreement provides for employer financed plan; amount of employer payment not available.⁶ This rate in effect prior to July 1, 1971; new rate in negotiation at time of survey.⁷ 37½-hour workweek on July 1, 1970.⁸ Information not available for rate and hours on July 1, 1970.⁹ 36¼-hour workweek on July 1, 1970.¹⁰ 37¼-hour workweek on July 1, 1970.¹¹ 35-hour workweek on July 1, 1970.¹² Rate decrease between July 1, 1970, and July 1, 1971.¹³ 40-hour workweek on July 1, 1970.¹⁴ 39-hour workweek on July 1, 1970.
