## Preface

In this bulletin, the Bureau of Labor Statistics annually has assembled information on anticipated contract adjustments for the calendar year. This statistical information identifies major situations by company and union in which during the year, contracts will terminate, deferred wage increases will become due, changes in the Consumers Price Index will be reviewed, and contracts will reopen. Because of the Federal Government's regulation of wages and prices, these data take on added dimensions as timely indicators of some of the important movements that might be expected in the economy.

This bulletin combines the Bureau's annual wage calendar article, which appeared in the January 1973 issue of the *Monthly Labor Review*, and the Bureau's listing of major agreements which expire during the year. Each contract covers 1,000 workers or more. Virtually all of these agreements are on file in the Bureau's Division of Industrial Relations and are open to public inspection. Information for a few situations was taken from published sources.

Table 8 lists agreements scheduled to expire in 1973 by month and table 9 arranges them by industry. Users should refer to appendix A for a list of common abbreviations and to appendix B for codes used in identifying the entries by industry, State, union, and employer unit.

Table 10 lists 1973 contract reopenings (for wages, benefits, and working conditions) by month for selected collective bargaining agreements each covering 1,000 workers or more.

Expirations that were reported to the Bureau too late to be included in table 8 and 9 are listed in table 11.

This bulletin was prepared jointly in the Division of Trends in Employee Compensation and the Division of Industrial Relations by David G. Larson and Lena W. Bolton.

# Wage Calendar, 1973

IN 1973, for the first time in two decades, negotiators in the transportation, automobile, and other key industries will come to the bargaining table in a setting of Government pay controls. Altogether, negotiations affecting at least 4.7 million workers are scheduled during the year; this approximates the peak years 1970 and 1971, when contracts covering 4.75 million workers expired.

Traditionally, first-year increases in contracts have tended to be higher than those scheduled for subsequent years. However, in 1973 the size of wage and benefit increases going into effect may be influenced by actions of the Pay Board and the Construction Industry Stabilization Committee, if economic controls remain in effect. Deferred wage increases due in 1973 will average 4.9 percent, more than 1 percentage point below the 1972 level. While the fewest workers since 1967 are scheduled to receive deferred wage increases this year, the number covered by cost-of-living escalator clauses will remain substantially at last year's level, which was an all-time high.

Data are presented in this article on wage increases *scheduled* to become effective in 1973, as well as information on contract expirations and reopenings. Deferred increases have been included in this article as they were negotiated by the parties, without regard to possible subsequent action by stabilization authorities.

At the time this article was completed, the Bureau of Labor Statistics had information on 1,727 contracts covering 8.6 million of the 10.2 million workers under all 2,237 major private-nonfarm-industry collective bargaining agreements (those covering 1,000 workers or more<sup>1</sup>). The data in this article are generally limited to these 8.6 million workers.

Contracts covering the remaining 1.6 million workers, for which the necessary information was not available, fall into the following four categories:

1. Agreements which expire subsequent to late November 1972 (72 contracts, covering 216,000 workers).
2. Contracts which expired earlier in the year, but where negotiations were continuing (81 contracts, covering 247,000 workers).
3. Situations where a settlement had been reached, but had not yet been approved by the stabilization agencies (322 contracts, covering 990,000 workers); and
4. Situations whose status was unknown, or where the terms of the agreement were not available (35 contracts, covering 81,000 workers).

## Collective bargaining activity

Collective bargaining will quicken markedly from last year's pace, as contracts covering almost 2 million more workers will be renegotiated. Several key industries may set the bargaining climate this year. Negotiations are scheduled in transportation (including railroads and trucking), in construction, in the automobile and farm implement industries, in electrical machinery, apparel, rubber, and retail trade industries. (See tables 1 and 2.) Early in the year, bargaining will cover 250,000 workers in the apparel industry. Negotiations in the rubber industry are scheduled during April, May, and June for approximately 100,000 workers. Nearly 610,000 construction workers are under contracts up for negotiation during 1973, with the major portion of the expirations occurring during the first 6 months.

Midyear bargaining is scheduled for the majority of the 330,000 workers whose agreements expire in

electrical manufacturing. Contracts expire in June for most workers in the general trucking and the railroad industries, where agreements cover approximately 500,000 and 525,000 employees, respectively.

September marks the expiration for the auto industry agreements (covering 700,000 workers) as well as for contracts in auto parts. Contracts covering about 75,000 workers in meatpacking are up for negotiation in August and September. The bulk of the farm implement industry contracts expire in September and October.

Some 60,000 workers whose agreements expire

on December 31, 1973, are not scheduled to receive any deferred wage increase during the year. About 110,000 workers are covered by contracts expiring after that date with no specific deferred wage increases or unconditional wage reopening provisions during 1973. These workers may receive a wage change at some time during the year, however. For example, contracts covering a number of workers in the textile industry do not contain a specific date for a wage reopening, but characteristically are reopened after the nonunion sector of the industry grants general wage hikes.

<sup>1</sup> See table 1, footnote 1 for notes on data limitations.

<sup>2</sup> See table 1, footnote 2 for notes on data limitations.

NOTE: Only bargaining situations in the private, nonagricultural economy are considered in this table. Because of rounding, sums of individual items may not equal totals.

Other workers may receive an unscheduled wage hike during the year. In some industries, a rise in the Consumer Price Index may trigger a reopening, although no deferred increases are scheduled. These provisions cover approximately 300,000 workers, chiefly in the women's apparel industry.

*Contract duration.* Contracts with shorter durations began replacing the prevalent 3-year cycle of bargaining in late 1971 and continued in 1972. This trend has been accentuated by a large jump in the number of 1-year contracts, primarily in the construction industry. The last time contracts were con-

cluded by bargainners scheduled to meet this year, the average duration was 33 months and the average annual rate of wage increase (including subsequent cost-of-living increases) was 9.1 percent.<sup>2</sup> Bargainners in manufacturing last agreed to contracts with an average 35-month duration and 7.4-percent annual wage increase. In nonmanufacturing, contracts called for an average duration of 32 months and annual increases of 10.8 percent. (Construction contracts averaged 30 months in length, with 11.0 percent annual wage increases.)

### Deferred wage increases

Deferred wage increases are scheduled for approximately 4.9 million workers in 1973. (See table 3.) As the following tabulation indicates (though data for 1972 and 1973 are preliminary), this is the lowest number of workers receiving deferred increases since 1967:

	<i>Workers (in millions)</i>
1973 .....	4.9
1972 .....	6.7
1971 .....	5.8
1970 .....	5.7
1969 .....	7.6
1968 .....	5.6
1967 .....	4.5

In the nonmanufacturing sector, deferred increases will be most prevalent in the transportation industries (mainly in railroads and trucking), where 1.1 million workers are scheduled to receive gains, and in communications, where some 650,000 workers will receive increases. In manufacturing, metalworking has the largest concentration of scheduled increases, primarily reflecting gains for workers in the steel, aluminum, and can industries.

About 2.6 million workers, or 55 percent of all those due increases in 1973, will receive gains in the first half of the year. (See table 4.) Nearly 140,000 of these workers will receive additional gains in the second half of the year. Also, because of contract expirations in the railroad and trucking industries, a quarter of those workers receiving deferred increases in 1973 will have their agreements come up for renegotiation by the end of the year.

Deferred increases scheduled for 1973 will average 4.9 percent, down from the average 6.1-percent gain in 1972. The decline is due to the drop in wage

increases in the nonmanufacturing sector, where workers will receive an average 5.3-percent gain in 1973 compared with 8.1 percent in 1972. (Most workers in the railroad and trucking industries will receive only one deferred increase in 1973, compared with two in 1972.) In the manufacturing industries, workers will receive an average increase of 4.4 percent in 1973, the same amount as last year. The metalworking industries, with 1.3 million workers receiving an average boost of 3.7 percent, tend to lower the overall average for manufacturing. Though down considerably from the 1972 average of 11.6 percent, the 7.3-percent average gain for 410,000 construction workers causes the nonmanufacturing average to be above that for all industries combined.<sup>3</sup>

Following the pattern of recent years, the average deferred increase is higher in contracts without cost-of-living escalator provisions than in those with such provisions. Contracts without escalator clauses cover 2.4 million workers; their deferred increases will average 6.1 percent in 1973. Contracts with escalators cover another 2.4 million workers. Deferred increases scheduled under these contracts average 3.8 percent; this will rise when cost-of-living provisions go in effect. If a 3-percent rise in the Consumer Price Index is arbitrarily assumed for 1973, these workers would receive total hikes averaging 5.7 percent. On this assumption, the average gain for all workers receiving deferred increases in 1973 would rise to 5.9 percent. The comparable figure for 1972 was 7.1 percent.

The growing popularity of fringe benefits, which make up from 20 to 25 percent of total compensation, has led to the study of these benefits in addition to wage hikes. When the cost of deferred benefit improvements is added to the wage increases, the average gain for wages and benefits combined in 1973 will be 5.4 percent in agreements covering 5,000 workers or more. (See table 5.) The comparable average increase for 1972 was 6.5 percent.

### Cost-of-living escalator provisions

Basically the same number of workers covered by cost-of-living escalator clauses in 1972 are again covered in 1973.<sup>4</sup> Nearly 2.4 million of the workers scheduled to receive deferred increases in 1973 are covered by agreements containing escalator clause provisions. With the exception of some 115,000

<sup>1</sup> Includes workers in the following industry groups for which separate data are not shown: tobacco (26,000); textiles (18,000); furniture (18,000); paper and allied products (30,000); printing (31,000); chemicals (38,000); petroleum refining (1,000); rubber (5,000); leather (37,000).

<sup>2</sup> Includes 134,000 workers in the mining industry and 69,000 in finance, insurance, and real estate for which separate data are not shown.

<sup>3</sup> Insufficient information to compute amount of increase.

<sup>4</sup> Industry contains no contracts with escalator clauses.

<sup>5</sup> Percent of estimated straight-time average hourly earnings.

NOTE: Workers are distributed according to the average adjustment for all workers in each bargaining unit considered. Deferred wage increases include guaranteed minimum adjustments under cost-of-living escalator clauses. The number of workers affected in each industry is based on data available in late November, 1972, and thus may understate the number of workers receiving deferred wage increases. Only bargaining situations in the private, nonagricultural economy are considered in this table. Because of rounding, sums of individual items may not equal totals.

workers tied to various Bureau of Labor Statistics' city indexes, workers are covered by clauses tied to the Bureau's national Consumer Price Index.

The number of workers affected by escalator clauses has more than doubled since the midsixties, as the following tabulation indicates (figures for 1972 and 1973 are preliminary):

<i>January</i>	<i>Workers (in millions)</i>	<i>January</i>	<i>Workers (in millions)</i>
1973 .....	4.1	1964 .....	2.0
1972 .....	4.3	1963 .....	1.85
1971 .....	3.0	1962 .....	2.5
1970 .....	2.8	1961 .....	2.5-2.8
1969 .....	2.66	1960 .....	4.0
1968 .....	2.46	1959 .....	4.0
1967 .....	2.2	1958 .....	4.0
1966 .....	2.0	1957 .....	3.5
1965 .....	2.0		

Table 6 provides a record of the frequency of cost-of-living reviews in selected industries since 1958.

While the number of workers covered by formal escalator provisions remains relatively unchanged from last year, the number actually to be covered by reviews in 1973 will drop to 3.2 million from nearly 3.8 million in 1972. This decline is mainly attributable to the trucking and electrical machinery industries, where reviews are not scheduled for 1973 as contracts expire during the year.

**Table 4. Distribution of workers receiving deferred wage increases in 1973 in bargaining situations covering 1,000 workers or more, by month**

(Workers in thousands)

Effective month	Workers	Principal industries affected
Total <sup>1</sup> .....	4,873	
January.....	1,014	Trucking (excluding Chicago); railroads.
February.....	175	Food; fabricated metals; transportation equipment.
March.....	188	Trucking (automobile transportation); chemicals.
April.....	758	Railroads; transportation equipment.
May.....	261	Construction; transportation equipment.
June.....	544	Construction; lumber; primary metals; maritime.
July.....	986	Communication; electrical equipment; construction.
August.....	751	Steel; communication.
September.....	242	Transportation equipment.
October.....	200	Longshoring; transportation equipment.
November.....	157	Mining.
December.....	53	Transportation equipment.
Month unknown.....	8	

<sup>1</sup> This total is smaller than individual items since 443,750 workers will receive two increases, and 10,600 will receive three increases. The total is based on data available in late November 1972 and thus may understate the number of workers receiving deferred wage increases.

NOTE: Only bargaining situations in the private, nonagricultural economy are considered in this table.

**Table 5. Distribution of workers in bargaining situations affecting 5,000 workers or more in 1973, by deferred wage and benefit increases**

(Numbers in thousands)

Average deferred wage and benefit increase as a percent of existing wage and benefit expenditures	Workers

<sup>1</sup> The total excludes those workers covered by contracts expiring in 1973 receiving a deferred benefit change only.

NOTE: Only bargaining situations in the private, nonagricultural economy are considered in this table. Because of rounding, sums of individual items may not equal totals.

Some 2.1 million workers of the 4.1 million covered under cost-of-living clauses will be having annual reviews. More frequent reviews are specified for 1.9 million on a quarterly basis, for 38,000 semiannually, and for 11,000 monthly. In addition, 130,000 will have minimum guarantees and maximum limits on increases, 670,000 minimums only, and 1.1 million maximums only. In this article, guaranteed minimum escalator adjustments are generally treated as deferred increases—workers receiving a 10-cent deferred increase plus a 3-cent guaranteed cost-of-living minimum are considered to have received a 13-cent deferred wage increase. However, guaranteed minimum increases in the steel, can, and aluminum industries have been excluded from the deferred totals because they apply to a total of increases under several quarterly reviews, rather than to a minimum amount set for a single review, as in other industries.

At least four major industries are scheduled for cost-of-living reviews in 1973. In the steel industry, reviews will be quarterly, with an allowance of at least 12½ cents by August 1 and no maximum limit.<sup>5</sup> In the communications industry (mainly the Bell System operating companies), contracts provide for an annual review in July and no minimum guar-

<sup>1</sup> Escalator reestablished during the year.

<sup>2</sup> Escalator clauses discontinued during the year.

<sup>3</sup> Escalator clauses established during the year.

\* Averages were based on increases in industries where escalation was in effect during the entire year (excludes minimum guarantees and escalator increases diverted toward the establishment or improvement of a fringe benefit).

NOTE: X Indicates a cost-of-living escalator review took place during the year.  
 0 Indicates a cost-of-living clause was in effect, but no review took place during the year.  
 — Indicates no cost-of-living provision was in effect during the year.

antee or maximum adjustment. In the auto industry, reviews will take place in March and June (before existing contracts expire in September) with no minimum or maximum provisions. In the aerospace industry, agreements covering about one-third of the workers provide for annual reviews; contracts for the remainder of the workers contain quarterly reviews. Most aerospace contracts do not have minimum guarantees or maximum limits in the escalator clauses.

### Provisions in selected contracts

Table 7 (pp. 10-6) lists key provisions of selected agreements, each affecting 5,000 workers or more in a broad range of industries, excluding construction. These agreements were chosen as representative of deferred increases, contract expirations, wage reopenings, or cost-of-living reviews in 1973. □

### FOOTNOTES

<sup>1</sup> These agreements include multiplant or multifirm agreements covering 1,000 workers or more, even though individual units may be smaller.

<sup>2</sup> The averages referred to in the text are arithmetic means.

Both means and medians are shown in the tables.

<sup>3</sup> Some 75,000 of these construction workers will receive deferred increases under settlements in which the parties agreed to a total wage and benefit package, with the ultimate allocation between wages and benefits subject to determination by the union. Since the final division was not known at the time this article was written, the entire amount was treated as a wage hike. For example, a 50-cent wage and benefit package negotiated in 1971 and scheduled to go into effect in July 1973 was treated as a 50-cent deferred wage increase for July.

<sup>4</sup> To these workers should be added some 600,000 production workers in nonunion and small union manufacturing plants. (Comparable data for workers in nonunion and small union nonmanufacturing establishments are not available.) The 4.1 million includes workers in those situations where agreements had not been concluded at the time this article was written or, if an agreement had been reached, it had not yet been approved by stabilization authorities. It was assumed that escalator clauses would be continued in these industries. Another important use of the Consumer Price Index is to adjust the pensions of nearly 1.85 million retired military and Federal Civil Service employees and survivors.

<sup>5</sup> The first adjustment under agreements negotiated in 1971 was in August 1972, with quarterly reviews thereafter. The amount workers will receive as a result of the guarantee, over and above what the cost-of-living formula would provide, was unknown at the time this article was written and hence is excluded from the tabulations.

See footnotes at end of table.

**Table 7. Expiration, reopening, and wage-adjustment provisions of selected collective bargaining agreements, 1973—Continued**

[Provisions presented are as negotiated by the parties and may be subject to Pay Board approval. The 1973 expirations are shown in boldface.]

Company or association <sup>1</sup>	Union <sup>2</sup>	Approximate number of employees covered <sup>3</sup>	Contract term <sup>4</sup>	Provisions effective in 1973 for—		
				Wage reopening	Automatic cost-of-living review <sup>5</sup>	Deferred wage increase (hourly rate unless otherwise specified)
<b>30. Hotels</b>						
Chicago Downtown Hotels (Chicago, Ill.)	Hotel and Restaurant Employees.	11,000	Apr. 1, 1970 to <b>Mar. 31, 1973.</b>			
Hotel Association of New York City, Inc. (New York, N.Y.) <sup>6</sup>	New York Hotel and Motel Trades Council.	25,000	June 1, 1972 to May 31, 1976.			June 1: 9.8 percent.
Nevada Resort Association, Resort Hotels (Las Vegas, Nev.)	Hotel and Restaurant Employees.	13,000	Mar. 10, 1970 to <b>Mar. 9, 1973.</b>			
<b>31. Amusement and recreation</b>						
Television and Radio Commercial Announcement Agreement.	Musicians	8,000	Feb. 1, 1971 to <b>Apr. 30, 1973.</b>			
<b>32. Medical and other health services</b>						
League of Voluntary Hospitals and Homes of New York (New York, N.Y.)	Retail, Wholesale, and Department Store.	26,000	July 1, 1972 to June 30, 1974.			Second year of contract, a minimum of \$12 a week.

<sup>1</sup> Interstate unless otherwise specified.

<sup>2</sup> Unions affiliated with the AFL-CIO, except where noted as independent (Ind.).

<sup>3</sup> Employee coverage may not be current.

<sup>4</sup> Contract term refers to the date the contract is to go into effect, not the date of signing. Where a contract has been amended or modified and the original termination date extended, the effective date of the changes becomes the new effective date of the agreement.

For purposes of this listing, the expiration is the formal termination date established by the agreement. In general, it is the earliest date on which termination of the contract could be effective, except for special provisions for termination as in the case of dis-

agreement arising out of wage reopening.

Many agreements provide for automatic renewal at the expiration date unless notice of termination is given. The Labor Management Relations Act of 1947 requires that a party to an agreement desiring to terminate or modify it shall serve written notice upon the other party 60 days prior to the expiration date.

<sup>5</sup> Date shown indicates the month in which adjustment is to be made, not the month of the Consumer Price Index on which adjustment is based.

<sup>6</sup> Information is from the newspaper.

SOURCE: Contracts on file with the Bureau of Labor Statistics, November 1, 1972, except where footnote indicates that information is from newspaper source.

- 95 Hawaii

OTHER AREAS

- 00 Interstate

NOTE: Agreements covering employees or operations wholly within one State will be designated by the State code listed.

The regional code (10, 20, 30, 40, 50, 60, 70, 80, or 90), is used where an agreement covers employees or operations in two States or more but does not go beyond the limits of the region.

The interstate code (00) is used where the agreement covers employees or operations in two States or more in more than one region.
