## Preface

The Bureau of Labor Statistics conducts annual surveys of wage rates and weekly straight-time hours of work for specified crafts or jobs as provided in labor-management agreements in the construction, printing, local transit, and local trucking industries. A biennial survey of grocery stores also is included in this program. These studies present the wage rates in effect on July 1, as reported to the Bureau by the appropriate local labor organization officials in each of the surveyed cities.

Preliminary listings of union wage rates and hours for printing trades employees in each city were issued before this bulletin. Copies of these listings are available from the Bureau of Labor Statistics, Washington, D. C. 20212, or any of its regional offices listed on the inside back cover of this bulletin.

This study of printing trades wage rates was conducted in the Bureau's Office of Wages and Industrial Relations. Mary Kay Rieg of the Division of Occupational Wage Structures prepared this bulletin, which provides a comprehensive account of the current study and also includes indexes of wage rates for printing trades employees from 1907-72.

## Printing Industry

### Summary

On July 1, 1972, union wage rates for printing trades workers in cities of 100,000 inhabitants or more averaged \$5.89 an hour—an advance of 8.0 percent, or 43 cents, over the figure for the preceding year. This percentage increase, down somewhat from the 10.2 percent recorded for the year ending July 1, 1971, brought the Bureau's index for straight-time union wage rates for all printing trades to 144.2 (1967=100). The wage index for book and job workers was 144.4 and for newspaper workers was 144.2. (See table 1.) The slackened rate of rise in 1972 broke a 7-year pattern of accelerating annual increases between 1964 and 1971. (See text table 2.)

During the July 1971-72 period, nine-tenths of all printing tradesmen surveyed received hourly wage-rate increases, the majority (76 percent) of which ranged from 6 to 12 percent. (See table 8. Cents-per-hour increases appear in table 7.)

Advances in pay scales were recorded for a larger percentage of lithographic workers (96 percent) than for those in either the book and job (89 percent) or newspaper fields (88 percent). These advances continued a pattern established in 1968, when lithography wage trends were first incorporated into the survey. However, the 6.9 percent average wage increase in lithography shops during the July 1971-72 period was below the

national average increase for all printing trades (8.0 percent) and the average increases recorded for book and job and newspaper workers (8.0 percent and 8.3 percent respectively). (See table 5.)

Wage rates for workers in book and job shops averaged \$5.49 an hour on July 1, 1972, compared with \$6.09 for those in newspaper establishments and \$6.56 for workers in lithography (offset printing) plants. These differences result from the way workers in the three industry branches are distributed among the cities surveyed and industry pay relationships within cities.

The text table below illustrates variations in industry pay relationships and employment mix among the six largest cities studied (those having 1 million or more inhabitants).

It shows, for example, that pay averages in lithography and newspaper establishments were about the same for the six largest cities, combined, compared with an 8 percent nationwide advantage for lithography. Although lithography was typically the highest paying industry branch, averages for newspaper establishments were reported highest in two of the largest cities—New York and Detroit. Also in New York City, where the largest concentration of printing trades workers was found, average wage rates were nearly equal for workers in book and job shops and lithography establishments, a marked contrast to their other pay relationships shown in text table 1.

**Text table 1. Average wage rates of printing trades workers in the 6 largest U.S. cities, July 1, 1972**

<sup>1</sup> All cities of 100,000 inhabitants or more, 1970 census.

<sup>2</sup> All cities of 1 million inhabitants or more, 1970 census.

<sup>3</sup> Less than .5 percent.

Since 1962, union wage rates for printing trades workers have advanced at an average annual rate of 5.4 percent. The annual rate of rise averaged 3.2 percent for 1962-67 contrasted with 7.6 percent during the 1967-72 period. The annual percentage increases for the decade are shown in text table 2.

Regional and city averages of union wage rates by industry branch are presented in tables 10 and 11, respectively. These averages are influenced by various factors, including differences in union wage rates for individual cities and the differences in the occupational composition for a given industry branch among cities. Also, a particular craft may not be covered by a collective bargaining agreement in some cities and thus is excluded from the survey, whereas all or part of the workers in the craft may be covered in other cities. In addition, certain types of work are more prevalent in some cities than in others. Table 13 presents, by city and industry branch, wage rates for specific occupations, and provides the best intercity comparison at this level.

Average hourly wage rates varied by occupation with each of the industry branches. In book and job shops, they ranged from \$3.54 for bindery women to \$6.67 for photoengravers. Daywork rates in newspaper plants averaged highest (\$6.46) for photoengravers and lowest (\$5.55) for mailers. For nightwork, corresponding averages ranged from \$6.81 to \$6.04 an hour. In lithography (offset) shops, average hourly wage rates varied from a low of \$5.72 for press assistants and feeders to a high of \$6.88 for offset pressmen.

Weekly hours paid at straight-time rates averaged 35.9 for all printing trades workers on July 1, 1972. (See table 9.) Averages were about 36 hours in book and job shops and newspaper establishments and 35 hours in lithography.

**Text table 2. Percent increases in average union hourly wage rates in printing trades, United States, 1962-72**

Year	All printing trades workers	Book and job shop workers	Newspaper establishment workers
1962-63	2.9	3.0	2.8
1963-64	2.6	2.9	2.4
1964-65	2.8	3.1	2.5
1965-66	3.3	3.4	3.1
1966-67	4.1	3.5	4.8
1967-68	5.0	5.2	5.1
1968-69	6.6	6.3	6.6
1969-70	8.3	8.2	7.9
1970-71	10.2	10.5	10.2
1971-72	8.0	8.0	8.3

Contract provisions for employer financed health and welfare and pension plans applied to most workers surveyed. Where available, information on these plans concerning the amount employers contributed by trade and area is presented in table 13.

### Scope and method of survey

Union wage rates and hours reported in this bulletin were agreed on through collective bargaining between trade unions and employers, and defined as (1) the basic (minimum) wage rates (excluding holiday, vacation, or other benefit payments made regularly or credited to the worker each pay period) and (2) the maximum schedules of hours at straight-time rates. Rates over the negotiated minimum, which may be paid for special qualifications or for other reasons, are excluded.

Information presented in this bulletin was based on union rates in effect on July 1, 1972, for approximately 116,500 printing trades workers in 69 cities.<sup>1</sup> Data were obtained primarily from local union officials by mail questionnaire; in some instances, Bureau economists visited local union officials to obtain the desired information.

The survey was designed to reflect union wage rates of printing industry employees in all cities of 100,000 inhabitants or more, excluding Honolulu, and is based on the 1970 Census of Population. All cities that had 500,000 inhabitants or more were included, as were most cities with 250,000 to 500,000 inhabitants. Data for some cities were weighted to compensate for cities not surveyed. To provide appropriate regional representation, each region was considered separately when city weights were assigned.

Average wage rates, designed to show current levels, were based on wage rates reported in each city on July 1, 1972. The wage rates were weighted by the number of union members at the rate in the area. These averages were not designed for precise year-to-year comparisons because of fluctuations in membership in the classifications studied. Average cents-per-hour and percent changes from July 1, 1971, to July 1, 1972, however, were based on comparable quotations for the various job classifications in both periods, and weighted by the memberships reported for the current (1972) survey. The index series, designed for trend purposes, was constructed similarly.

<sup>1</sup> Largely as a result of efforts made to eliminate overestimations of union membership, the number of workers covered by the 1972 study was lower than the 1971 figure (121,000).

1972: July 1	143.4	145.0	142.7	151.2	144.2	141.8	137.8	141.3	142.2

<sup>1</sup> Index series designed for trend purposes; periodical changes in union rates are based on comparable quotations for the various occupations in consecutive periods,

weighted by number of union members reported at each quotation in the current survey period.

Artists . . . . .	6.84	42	6.5
Cameramen . . . . .	6.75	43	6.8
Platemakers . . . . .	6.63	42	6.8
Press assistants and feeders . . . . .	5.72	40	7.4
Pressmen, offset . . . . .	6.88	44	6.9
Strippers . . . . .	6.57	42	6.9

<sup>1</sup> Average rates based on all rates in effect July 1, 1972; each union rate was weighted by the number of union members at each reported rate.

<sup>2</sup> Based on comparable quotations for 1971 and 1972, and weighted by the

number of union members at each reported quotation in 1972.

<sup>3</sup> Relatively few workers in book and job or lithography shops were employed on nightwork; therefore, data on such workers were excluded from the survey.

**Table 6. Wage rate distribution by trade: United States**

(Distribution of union members in the printing trades by hourly wage rates and trade, July 1, 1972)

Trade	Average hourly rate	Percent of union workers whose rates per hour were—																		
		Under \$3.60	\$3.60 and under \$3.80	\$3.80	\$4.00	\$4.20	\$4.40	\$4.60	\$4.80	\$5.00	\$5.20	\$5.40	\$5.60	\$5.80	\$6.00	\$6.40	\$6.80	\$7.20	\$7.60	\$8.00 and over

<sup>1</sup> The average in the book and job tabulation includes rates for semiskilled—bindery women and press assistants and feeders—as well as the highly skilled journeymen,

composing room and pressroom workers, and others. The number of semiskilled workers organized in a city may influence the average for the city.

<sup>1</sup>Basic (minimum) rates, excluding holiday, vacation, or other benefit payments regularly made or credited to the worker each pay period.

<sup>2</sup>Maximum schedules of hours at straight-time rates.

<sup>3</sup>Shown in terms of cents-per-hour or as percent of rate; in actual practice, however, some employer payments are calculated on the basis of total hours or gross payroll. These variations in method of computation are not indicated in the above tabulation.

<sup>4</sup>Includes life insurance, hospitalization, and other types of health and welfare benefits; excludes payments into holiday, vacation, and unemployment funds when such programs have been negotiated.

<sup>5</sup>Agreement provides for employer-financed plan; amount of employer payment not available.

<sup>6</sup>Rate in effect prior to July 1, 1972; on that date, a new rate was in negotiation or was pending Pay Board approval.

<sup>7</sup>Information not available for rate on July 1, 1971.

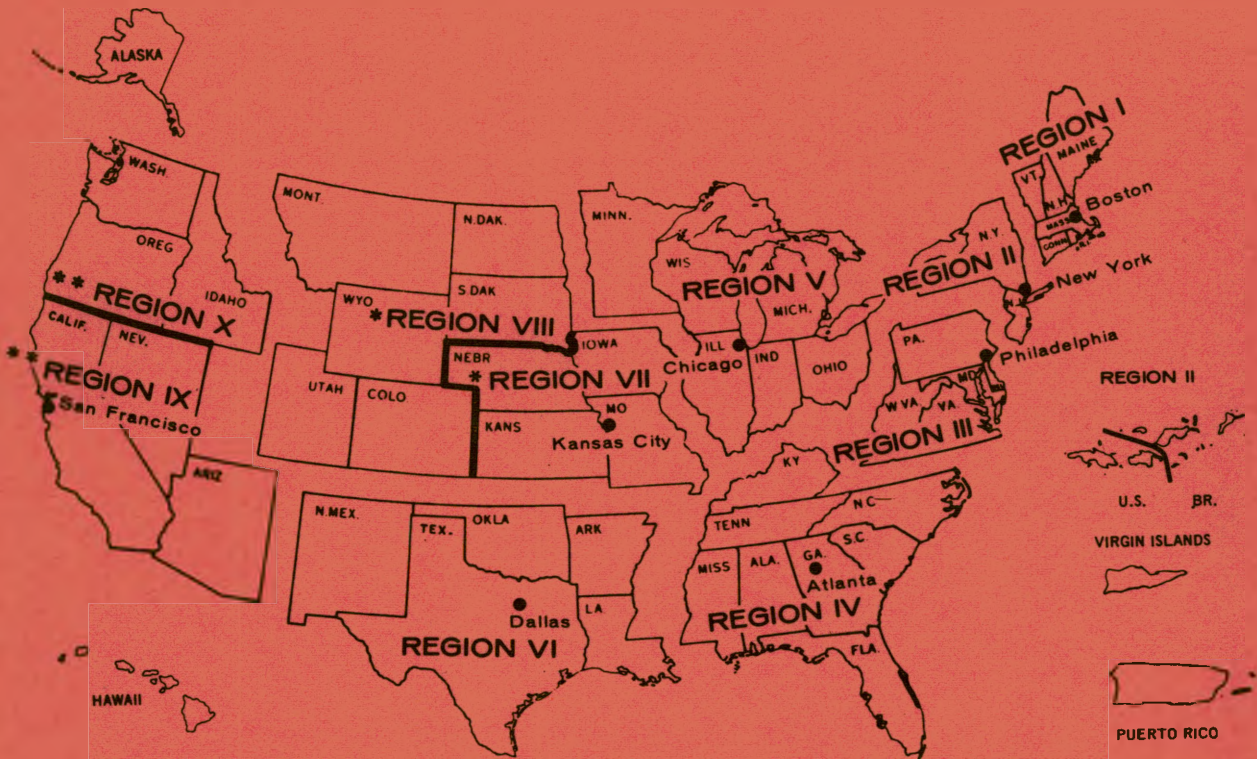

<sup>8</sup>35-hour workweek on July 1, 1971.

<sup>9</sup>37-1/2 hour workweek on July 1, 1971.

<sup>10</sup>36-1/4-hour workweek on July 1, 1971.

<sup>11</sup>40-hour workweek on July 1, 1971.
