Bulletin 1985

Preface

This bulletin presents detailed expenditure and income data from the interview component of the 1972-73 Consumer Expenditure Survey. Historically, expenditure surveys have been conducted by the Bureau of Labor Statistics every 10-12 years to provide a basis for updating the Consumer Price Index and to provide a comprehensive body of data for market research and economic analysis.

This bulletin was prepared in the Division of Living Conditions Studies, Eva E. Jacobs, Chief, under the general direction of Stephen Baer, Chief of the Branch of Consumer Expenditure Studies. The bulletin was prepared under the supervision of George Weeden. Major contributions to the bulletin were made by William Passero and David Stallings, for preparation of the glossary and tables; and by Eugene Owens, for development of the computer data file.

Material in this publication is in the public domain and may be reproduced without permission of the Federal Government. Please credit the Bureau of Labor Statistics and cite the name and number of the publication.

Selected family characteristics and annual expenditures classified by:	
1. Family income before taxes (detail up to \$50,000 and over)	1
2. Housing tenure	31
3. Type of area	41
4. Education of family head	61
5. Family composition	71
6. Family income before taxes, for one-person families	81
7. Family income before taxes, for two-person families	101
8. Family income before taxes, for three-person families	121
9. Family income before taxes, for four-person families	141
10. Family income before taxes, for five-person families	161
11. Family income before taxes, for six or more person families	181
12. Family income before taxes, for families with head under 25 years	201
13. Family income before taxes, for families with head 25 to 34 years	221
14. Family income before taxes, for families with head 35 to 44 years	241
15. Family income before taxes, for families with head 45 to 54 years	261
16. Family income before taxes, for families with head 55 to 64 years	281
17. Family income before taxes, for families with head 65 years and over	301
18. Age of family head, for one-person families	321
19. Age of family head, for two-person families	331
20. Age of family head, for three-person families	341
21. Age of family head, for four-person families	351
22. Age of family head, for five-person families	361
23. Age of family head, for six or more person families	371
24. Family income before taxes, for black families	381
25. Family income before taxes, for white and other nonblack families	401
26. Family income before taxes, for families in the Northeast	421
27. Family income before taxes, for families in the North Central	441
28. Family income before taxes, for families in the South	461
29. Family income before taxes, for families in the West	481
Glossary	501

Annual Expenditures and Sources of Income Cross-Classified by Family Characteristics, 1972-73 Combined

The data in the tables below supplement BLS Report 455-4. As in previous reports in the BLS Report 455 series, the data are preliminary. Some values presented here may differ from earlier reports and releases in the interview survey series due to additional processing of the quarterly interview data base, slight changing of the definition, and the combining and averaging of data for the 2 years of the survey (1972 and 1973). Furthermore, data presented below may be subject to further processing or reclassification before being released in final form.

These tables contain a summary of all the expenditure data collected in the interview survey and also present detail on sources of income, net changes in assets and liabilities, personal taxes, information on goods and services received without direct expense, mortgage principal paid on owned property, and market value of financial assets. Most of these data are shown as annual averages, except for market value of financial assets and net changes in assets and liabilities, which are computed as the average of the two end-of-survey-year values. Percent reporting figures are shown for all data except for the family characteristics shown at the beginning of each table.

Twenty-nine tabulations are presented in this release. In five tabulations, families are classified by individual family characteristics, including family income before taxes, education of family head, housing tenure, family composition, and type of area. Eighteen tabulations present family income before taxes cross-classified by family size, race of family head, age of family head, and region. Six additional tabulations present family size cross-classified by age of family head. Expenditures are shown as annual averages for the combined 2-year period of the survey. Expenses which were incurred in connection with the operation of a business were not included in the survey.

Even though the data represent all expenditure categories in the interview survey, they do not constitute total expenditures because not

all items of expense were collected in the interview survey. For example, the household operations category does not include house-keeping supplies, which were reported exclusively in the diary survey. For the same reason, the medical care category does not include nonprescription drugs. In addition, it should be noted that food at home is not the sum of item detail, as in the diary survey, but is the response to a set of global questions. A more detailed account for food is available from the diary component and has been published in the BLS Report 448 series. The user should also be aware that expenditures for owned dwellings exclude payments on the mortgage principal, which appear as a separate line item and are included as a reduction in liabilities. A complete glossary appears on page 501.

The expenditures shown for each category do not include gifts to organizations or to persons outside the family. All gift expenditures are summed and tabulated in a separate category as gifts and contributions. Gift expenditures as a proportion of consumption expenditures tend to vary by consumption category. For example, the proportion of total clothing expenditures devoted to gifts is likely to be greater than the proportion of total furniture expenditures devoted to gifts.

Certain expenditures are tabulated by function. For example, gasoline appears under transportation and also under recreation as part of vacations and trips. Total gasoline is the sum of the two parts. Other components that are treated similarly are food, alcoholic beverages, lodging, and other transportation.

The average annual expenditure data shown are for all families with specified characteristics, regardless of whether the families incurred an expense for a given product or service during the survey period. Thus, Table 1 shows the average annual expenditure for television sets over the 2-year period to be \$46.54. However, only 15.8 percent of the families reported purchases of a TV set. By dividing \$46.54 by 15.8

percent, it can be determined that the average expenditure for those families making the purchases was \$294.55.

An individual family may spend more or less than the average, depending on its particular set of characteristics. For example, families in the South (Table 28) spent, on average, \$93.18 per year on major appliances, while the average for all three-person families in the United States (Table 20) was \$117.53. Even among families having similar characteristics, expenditures may differ substantially. Users should also keep in mind that prices for many goods and services have risen sharply since the survey was conducted.

Certain income and financial data contain values with negative signs. These occur either because of special processing requirements, or because losses or reductions in value were recorded. For example, net income from own business and own farm are negatively signed when losses were experienced; and data for assets and liabilities may be negatively signed to reflect reductions in these items. To compute the net change in assets and liabilities as a group, the user should subtract the signed liability value from the signed asset value. The items which

are negatively signed only because of special processing requirements are: personal taxes, union dues, occupational expenses, and mortgage principal payments.

Sample surveys are subject to two types of errors, sampling and nonsampling. Sampling errors occur because observations are not taken from the entire population. Table columns and cells which represent fewer than 217,500 and 18,500 families, respectively, are likely to have large sampling errors. Nonsampling errors can be attributed to many sources; such as inability to obtain information about all the respondents in the sample, definitional difficulties, differences in the interpretation of questions, inability or unwillingness of the respondent to provide correct information, mistakes in recording or coding the data obtained, and other errors of collection, response, processing, coverage, and estimation for missing data. This may apply especially to the alcoholic beverages and tobacco components, which have historically experienced low levels of reporting in household interview surveys. The accuracy of the results of a survey is determined by the joint effects of sampling and nonsampling errors.

The Bureau of Labor Statistics (BLS) completed its most recent Consumer Expenditure Survey in June 1974. The survey, covering the years 1972 and 1973, is the only comprehensive source of detailed information on family expenditures and income related to socioeconomic and demographic characteristics of U.S. families. The survey, conducted with the assistance of the Bureau of the Census, consisted of two separate components: (1) a diary or recordkeeping survey completed by respondents for two 1-week periods, and (2) an interview panel survey in which families reported information to interviewers every 3 months over a 15-month period. Both components of the survey were conducted for 2 successive years. The diary component covered the period July 1972-June 1974, and the interview component covered the 1972 and 1973 calendar years. In each 12-month period, responses were obtained from approximately 10,000 families. Background information concerning the design, conduct, and uses of both components of the survey appears in "The 1972-73 Consumer Expenditure Survey," published in the December 1974 issue of the *Monthly Labor Review*.

1/ Data in columns which represent less than 218,000 consumer units or in cells which represent less than 18,500 consumer units are likely to have large sampling errors.
 2/ Percents may not sum to 100 due to rounding.
 3/ Data represent only those expenditures collected in the interview survey, not the total of all family expenditures.
 4/ Value less than 0.05 percent
 ** Data not available.

^{1/} Data in columns which represent less than 218,000 consumer units or in cells which represent less than 18,500 consumer units are likely to have large sampling errors.

^{2/} Percents may not sum to 100 due to rounding.

^{3/} Data represent only those expenditures collected in the interview survey, not the total of all family expenditures.

1/ Data in columns which represent less than 218,000 consumer units or in cells which represent less than 18,500 consumer units are likely to have large sampling errors.

2/ Percents may not sum to 100 due to rounding.

3/ Data represent only those expenditures collected in the interview survey, not the total of all family expenditures.

** Data not available.

1/ Data in columns which represent less than 218,000 consumer units or in cells which represent less than 18,500 consumer units are likely to have large sampling errors.

2/ Value less than 0.05 percent

3/ Percents may not sum to 100 due to rounding.

4/ Data represent only those expenditures collected in the interview survey, not the total of all family expenditures.

** Data not available.

1/ Data in columns which represent less than 218,000 consumer units or in cells which represent less than 18,500 consumer units are likely to have large sampling errors.

2/ Value less than 0.05 percent

3/ Percents may not sum to 100 due to rounding.

4/ Data represent only those expenditures collected in the interview survey, not the total of all family expenditures.

** Data not available.

1/ Data in columns which represent less than 218,000 consumer units or in cells which represent less than 18,500 consumer units are likely to have large sampling errors.

2/ Percents may not sum to 100 due to rounding.

3/ Data represent only those expenditures collected in the interview survey, not the total of all family expenditures.

4/ Value less than 0.05 percent

** Data not available.

1/ Data in columns which represent less than 218,000 consumer units or in cells which represent less than 18,500 consumer units are likely to have large sampling errors.

2/ Percents may not sum to 100 due to rounding.

3/ Data represent only those expenditures collected in the interview survey, not the total of all family expenditures.

4/ Value less than 0.05 percent

** Data not available.

1/ Data in columns which represent less than 218,000 consumer units or in cells which represent less than 18,500 consumer units are likely to have large sampling errors.

2/ Percents may not sum to 100 due to rounding.

3/ Data represent only those expenditures collected in the interview survey, not the total of all family expenditures.

4/ Value less than 0.05 percent

** Data not available.

1/ Data in columns which represent less than 218,000 consumer units or in cells which represent less than 18,500 consumer units are likely to have large sampling errors.
2/ Value less than 0.05 percent
3/ Percents may not sum to 100 due to rounding.
4/ Data represent only those expenditures collected in the interview survey, not the total of all family expenditures.
** Data not available.

1/ Data in columns which represent less than 218,000 consumer units or in cells which represent less than 18,500 consumer units are likely to have large sampling errors.

2/ Value less than 0.05 percent

3/ Percents may not sum to 100 due to rounding.

4/ Data represent only those expenditures collected in the interview survey, not the total of all family expenditures.

** Data not available.

1/ Data in columns which represent less than 218,000 consumer units or in cells which represent less than 18,500 consumer units are likely to have large sampling errors.

2/ Value less than 0.05 percent

3/ Percents may not sum to 100 due to rounding.

4/ Data represent only those expenditures collected in the interview survey, not the total of all family expenditures.

** Data not available.

1/ Data in columns which represent less than 218,000 consumer units or in cells which represent less than 18,500 consumer units are likely to have large sampling errors.

2/ Value less than 0.05 percent

3/ Percents may not sum to 100 due to rounding.

4/ Data represent only those expenditures collected in the interview survey, not the total of all family expenditures.

** Data not available.

^{1/} Data in columns which represent less than 218,000 consumer units or in cells which represent less than 18,500 consumer units are likely to have large sampling errors.

^{2/} Value less than 0.05 percent

^{3/} Percents may not sum to 100 due to rounding.

^{4/} Data represent only those expenditures collected in the interview survey, not the total of all family expenditures.

** Data not available.

1/ Data in columns which represent less than 218,000 consumer units or in cells which represent less than 18,500 consumer units are likely to have large sampling errors.

2/ Value less than 0.05 percent

3/ Percents may not sum to 100 due to rounding.

4/ Data represent only those expenditures collected in the interview survey, not the total of all family expenditures.

** Data not available.

1/ Data in columns which represent less than 218,000 consumer units or in cells which represent less than 18,500 consumer units are likely to have large sampling errors.

2/ Value less than 0.05 percent

3/ Percents may not sum to 100 due to rounding.

4/ Data represent only those expenditures collected in the interview survey, not the total of all family expenditures.

** Data not available.

1/ Data in columns which represent less than 218,000 consumer units or in cells which represent less than 18,500 consumer units are likely to have large sampling errors.

2/ Value less than 0.05 percent

3/ Percents may not sum to 100 due to rounding.

4/ Data represent only those expenditures collected in the interview survey, not the total of all family expenditures.

** Data not available.

1/ Data in columns which represent less than 218,000 consumer units or in cells which represent less than 18,500 consumer units are likely to have large sampling errors.

2/ Value less than 0.05 percent

3/ Percents may not sum to 100 due to rounding.

4/ Data represent only those expenditures collected in the interview survey, not the total of all family expenditures.

** Data not available.

1/ Data in columns which represent less than 218,000 consumer units or in cells which represent less than 18,500 consumer units are likely to have large sampling errors.

2/ Value less than 0.05 percent

3/ Percents may not sum to 100 due to rounding.

4/ Data represent only those expenditures collected in the interview survey, not the total of all family expenditures.

** Data not available.

1/ Data in columns which represent less than 218,000 consumer units or in cells which represent less than 18,500 consumer units are likely to have large sampling errors.

2/ Value less than 0.05 percent

3/ Percents may not sum to 100 due to rounding.

4/ Data represent only those expenditures collected in the interview survey, not the total of all family expenditures.

** Data not available.

1/ Data in columns which represent less than 218,000 consumer units or in cells which represent less than 18,500 consumer units are likely to have large sampling errors.

2/ Value less than 0.05 percent

3/ Percents may not sum to 100 due to rounding.

4/ Data represent only those expenditures collected in the interview survey, not the total of all family expenditures.

** Data not available.

1/ Data in columns which represent less than 218,000 consumer units or in cells which represent less than 18,500 consumer units are likely to have large sampling errors.

2/ Value less than 0.05 percent

3/ Percents may not sum to 100 due to rounding.

4/ Data represent only those expenditures collected in the interview survey, not the total of all family expenditures.

** Data not available.

1/ Data in columns which represent less than 218,000 consumer units or in cells which represent less than 18,500 consumer units are likely to have large sampling errors.

2/ Percents may not sum to 100 due to rounding.

3/ Data represent only those expenditures collected in the interview survey, not the total of all family expenditures.

4/ Value less than 0.05 percent

** Data not available.

^{1/} Data in columns which represent less than 218,000 consumer units or in cells which represent less than 18,500 consumer units are likely to have large sampling errors.

^{2/} Percents may not sum to 100 due to rounding.

^{3/} Data represent only those expenditures collected in the interview survey, not the total of all family expenditures.

** Data not available.

1/ Data in columns which represent less than 218,000 consumer units or in cells which represent less than 18,500 consumer units are likely to have large sampling errors.

2/ Percents may not sum to 100 due to rounding.

3/ Value less than 0.05 percent

4/ Data represent only those expenditures collected in the interview survey, not the total of all family expenditures.

** Data not available.

1/ Data in columns which represent less than 218,000 consumer units or in cells which represent less than 18,500 consumer units are likely to have large sampling errors.

2/ Percents may not sum to 100 due to rounding.

3/ Value less than 0.05 percent

4/ Data represent only those expenditures collected in the interview survey, not the total of all family expenditures.

** Data not available.

1/ Data in columns which represent less than 218,000 consumer units or in cells which represent less than 18,500 consumer units are likely to have large sampling errors.

2/ Percents may not sum to 100 due to rounding.

3/ Value less than 0.05 percent

4/ Data represent only those expenditures collected in the interview survey, not the total of all family expenditures.

** Data not available.

1/ Data in columns which represent less than 218,000 consumer units or in cells which represent less than 18,500 consumer units are likely to have large sampling errors.
2/ Percents may not sum to 100 due to rounding.
3/ Data represent only those expenditures collected in the interview survey, not the total of all family expenditures.
4/ Value less than 0.05 percent
** Data not available.

Glossary

Family characteristics

Population coverage. The eligible population included the civilian noninstitutional population of the United States as well as that portion of the institutional population living in rooming or boarding houses or in doctors' and nurses' quarters of general hospitals. Armed forces personnel living outside military installations were included in the coverage while armed forces personnel living on post were excluded. Also excluded from the address sample were college dormitories, fraternity or sorority houses, prisons, monasteries, ships, or other quarters containing five unrelated persons or more.

Some sample families moved out during the survey period and were replaced by a new family at the same address. If the replacement family existed as a family unit from the beginning of the survey year, the family was considered a full-year family, and expenditures were reconstructed. If, on the other hand, the replacement family was newly formed during the survey year, each member of the family was considered a part-year, fractional person, and all data reported by the replacement family were adjusted to reflect the family's part-year participation. A more complete description of the treatment of fractional persons can be found in the family size section of this glossary.

A consumer unit (CU) is defined as (1) a group of two persons or more, usually living together, who pool their income and draw from a common fund for their major items of expense, or (2) a person living alone or sharing a household with others, or as a roomer in a private home, lodging house or hotel, but who is financially independent, that is, the person's income and expenditures were not pooled with other residents.

Head of consumer unit refers to the husband in husband/wife families. In other than husband/wife families, the head was considered to be the

person designated as such by the other consumer unit members. This is in accordance with Bureau of the Census practice at the time the survey was conducted.

Family income before taxes is equivalent to family income, which is defined elsewhere in this report.

Family income after taxes is equivalent to family income less personal taxes, which are defined elsewhere in this report.

Complete and incomplete reporting of income. This report contains tables in which families are classified by income. In the dollar class tables, each income class contains families whose combined income falls within the class range shown. Families who participated in the survey but failed to report sufficient income information for classification are shown separately in the tables. In general, when the primary family earner indicated being employed but did not report income from such employment, the family was tabulated as an incomplete income reporter. For cases where no members were employed during the income reference period—most typically, small families with retired heads—families were assigned incomplete income codes if they reported receiving pension, annuity, or Social Security income but did not provide dollar values for these income items. It is important to note that even complete income reporting families may not have provided a full accounting of all sources and levels of income but met the criteria for being designated as complete reporters.

For tables employing income dollar classes as a sorting variable, families from each year of the survey were classified according to their reported income estimates. Users should be aware that families reporting a particular level of income for 1972 may not be at the same point in the 1972 income distribution as families in the 1973 income distribution reporting an identical level of income. No attempt was made to adjust incomes or expenditures to a common annual period.

In future BLS reports presenting interview survey data classified by income, families will be arrayed by income deciles. Columns in these tables will contain families from each year of the survey whose incomes are at the same points of their respective survey year income distributions. This format will help users to make comparisons over time.

Family size refers to the number of persons in the consumer unit during the survey period. Some family members may not have been in the consumer unit for the entire survey period and were considered fractional persons. This could have occurred where (1) a survey family added or lost family members due to births, deaths, marriages, etc., occurring during the survey period; or (2) a survey family moved out during the survey period and was replaced by a newly-formed family for the remainder of the survey period. Each member of the replacement family was considered a fractional person. For example, consider a consumer unit consisting of a husband and wife that participated in the survey for 3 months. Each member would have been considered 1/4 person, so that together, the consumer unit would have been made up of 1/2, or of 0.5, persons. The general rule for computing family size was to sum the number of family member weeks for all eligible persons and divide that total by 52 weeks.

For classification purposes, the tables in this report define one person families as 0-1.0 persons, two person families as 1.1-2.0 persons, three person families as 2.1-3.0 persons, four person families as 3.1-4.0 persons, five person families as 4.1-5.0 persons, and six person or more families as 5.1 persons and over.

Age of family head refers to the age in years of the head of the consumer unit at the time of the first interview.

Geographic regions. Data are presented in this report for four regions of the United States—Northeast, North Central, South, and West. Families represented in the tables are grouped under one of the four regions depending on the address at which the family was residing during the survey period:

Northeast: Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont.

North Central: Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, Wisconsin.

South: Alabama, Arkansas, Delaware, District of Columbia, Florida, Georgia, Kentucky, Louisiana, Mississippi, Maryland, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, West Virginia.

West: Alaska, Arizona, Colorado, California, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, Wyoming.

Type of area refers to the particular area in which a family resides according to the address of the family during their participation in the survey. Two factors were used in determining the type of area in which a consumer unit resided:

(1) Inside versus outside a standard metropolitan statistical area (SMSA): In the 1972-73 Consumer Expenditure Survey, the classification of families conforms to 1970 decennial census definitions and boundaries relating to SMSA's. With the exception of certain places in New England, an SMSA was defined as a county or group of contiguous counties which contain at least one city of 50,000 inhabitants or more, or two cities having contiguous boundaries and constituting, for general economic and social planning purposes, a single community with a combined population of at least 50,000. Adjacent counties were included in an SMSA if, according to certain criteria, they were essentially metropolitan in character and were socially and economically integrated with the central city. In New England, where cities and towns are administratively more important than counties, and data were compiled locally for such divisions, the cities and towns, rather than counties, were the units used in defining SMSA's.

The survey further classified the families in SMSA's as to whether they resided inside or outside of central cities. With few exceptions, the largest city within an SMSA was defined as the central city. Areas outside the central city but within an SMSA were defined as urban or rural.

(2) Urban versus rural residence: the Bureau of Labor Statistics also conforms to the 1970 decennial census definitions of urban and rural. The urban population comprises all persons living in: (a) places of 2,500 inhabitants or more, incorporated as cities, boroughs, villages, and towns; (b) the densely settled urban fringe, whether incorporated or unincorporated places of urbanized areas; and (c) unincorporated places of 2,500 persons or more. Rural areas (both farm and nonfarm) are those remaining areas not falling into one of the categories set forth above.

Housing tenure refers to the family's principal place of residence during the survey. Owner includes families living in their own homes, cooperatives, or condominium apartments or townhouses for the entire survey year. Renter includes families paying rent as well as families living rent free for the entire survey year. Not reported includes consumer units that were both owners and renters during the survey, and CU's that did not report.

Education of family head refers to the years of formal education of the CU head on the basis of the highest grade completed. If enrolled at the time of the interview, the grade being attended was the one recorded. Persons not reporting the extent of their education were classified under 'no school or not reported.'

Race of family head refers to the race of the head of the consumer unit. All families were included in one of three racial groups: white, black, or other. The other group comprises such races as American Indian, Japanese, and Chinese. Families of mixed race were classified according to the race of the family head.

Occupation of family head refers to the occupation in which the most earnings were received during the survey period. The occupation categories of employed heads closely follow those of the 1970 Census of Population. The classification, armed forces personnel, includes only those families living outside military installations. The classification, retired, includes persons over the age of 50 who reported receiving retirement income and who did not work, either full or part time, during the survey period. The classification, not working and other, is a residual and includes unemployed persons, persons not reporting occupation status, and partially retired persons who worked less than 35 hours per week and received retirement income such as Social Security.

Number of earners refers to the number of family members, 14 years of age and older, recorded as having positive weeks worked during the year that the family participated in the survey.

Family composition refers to the classification of interview families according to (1) relationship of other family members to head, (2) age of children of head, and (3) combination of relationship to head and age of children. Step-children and adopted children were included with the head's own children.

Families were classified into seven types, five of which consisted of families in which husband and wife were both present. One of the classifications was husband-wife only; three others pertained to families with children classified according to the age of the oldest child (under 6 years, 6-17 years, 18 years and over); the fifth classification included husband and wife with or without children but with other persons in the family. The sixth classification was of families with children but only one parent. The remaining classification included all other consumer units plus one-person families.

Vehicle ownership refers to the percent of families owning at least one automobile at any time during the year in which the family participated in the survey.

Current consumption expenses

Excluding personal insurance, gifts and contributions refers to the transaction cost of goods and services acquired during the interview period for consumption within the consumer unit. Estimates include both excise and sales taxes and exclude purchases or portions of purchases directly assignable to business purposes. Also excluded are periodic credit or installment payments on goods or services already acquired. The full cost of each purchase was recorded even though full payment may not have been made at the date on purchase. The unpaid portion of such a transaction is included as an increase in liabilities.

Food, total

Food at home includes food and nonalcoholic beverage purchases at grocery and specialty stores; bulk purchases for canning and freezing; and board; excludes pet food, which is included in recreation.

Food away from home, excluding trips includes food and nonalcoholic beverages purchased in restaurants, cafeterias, and other establishments; school meals; and catered affairs.

Meals as pay includes any in-kind compensation received in the form of meals.

Alcoholic beverages includes purchases for home consumption, as well as purchases in restaurants, bars, and other establishments which dispense alcoholic beverages.

Tobacco products includes cigars, cigarettes, and pipe tobacco.

Housing: shelter, total

Rented dwellings includes rent paid for current and previous dwellings, special fees and commissions, garage rent and parking fees, rent received as pay, and expenses for repairs and redecorating (not reimbursed by landlord or deducted from rent).

Owned dwellings includes interest on mortgages, property taxes and insurance, refinancing and prepayment charges, ground rent, expenses for repairs and maintenance contracted out (including periodic maintenance and service contracts), and expenses of materials for owner-performed repairs and maintenance.

Other lodging, excluding vacation includes expenses for lodging at schools or colleges, and expenses for hotels, motels, cottages, trailer camps and other lodging while on out-of-town non-vacation trips.

Housing: fuel and utilities, total

Other fuels, coal and wood includes wood, coal, charcoal and charcoal briquets, and other specified fuels.

Water, trash, sewerage includes water, garbage and trash collection, sewerage maintenance, septic tank cleaning, and water softening.

Housing: housing expenses

Telephone charges, excluding coin phones includes regular telephone service, installation and removal charges, extra local message units, long distance calls, and telegraph and cable charges.

Other expenses, including domestic services includes domestic and other duties, babysitters, care for invalids and the elderly, lawn care and gardening services, day care centers, reupholstering and furniture repair, appliance repair and servicing, moving expenses, freight and express charges, storage charges (except for furs and clothing), fertilizers and pesticides.

Housing: housefurnishings and equipment, total

Household textiles includes sheets, pillow cases, pillows, blankets

and quilts, bedspreads, table linens, bathroom and kitchen towels, bathmats, shower curtains, ready-made and custom-made curtains, draperies, slipcovers and other furniture protectors, crochet thread, yarn, and materials for such things as making drapes and slipcovers.

Furniture includes living room, dining room, kitchen, bedroom, nursery, porch and lawn, and other outdoor furniture.

Floor coverings includes wall-to-wall carpets, room size rugs, and other soft floor coverings; excludes hard surface floor coverings which are subsumed under "Owned dwellings".

Major appliances includes refrigerators, home freezers, dishwashers, cooking ranges, garbage disposals, vacuum cleaners, electric brooms, electric shampoo polishers and other electric floor cleaning equipment, washing machines and dryers, dehumidifiers, demountable air conditioners, and sewing machines.

Small appliances includes range hoods, toasters, coffee makers, blenders and other electric kitchen equipment, electric irons, heaters, electric fans, humidifiers and vaporizers, and other portable heating and cooling equipment; excludes personal care appliances.

Housewares includes dinnerware, glassware, flatware, non-electric cooking ware and other non-electric kitchen equipment.

Miscellaneous includes typewriters, luggage, footlockers, trunks, lamps, window shades, blinds, and rods, clocks, bric-a-brac, mirrors, chandeliers and other light fixtures, garment bags, laundry hampers, shelves, lawn mowers, other hand and power tools, barbecue grills, office equipment for home use, floral arrangements, house plants, rental of furniture and equipment, insurance on furniture and personal effects, and service contracts for appliances and equipment.

Clothing, total

Clothing, males 2 and over includes coats, jackets, sweaters, suits and trousers, work clothes, leisure clothes, shirts, underwear, nightwear, hosiery, footwear, hats, gloves, jewelry, and other accessories.

Clothing, females 2 and over includes coats, jackets, sweaters, dresses, suits, underwear, nightwear, hosiery, footwear, hats, gloves, jewelry, and other accessories

Clothing, children under 2 includes coats, sweaters and sweater sets, jackets, caps and hoods, dresses, shirts, pants, other outerwear, underwear, washable and disposable diapers, sleeping garments, stockings, socks, booties, shoes, slippers, layettes, and jewelry.

Dry cleaning and laundry includes dry cleaning and laundry, both coin-operated and sent out, and dry cleaning of household items.

Materials and services includes yard goods, sewing notions, clothing upkeep such as shoe repairs and clothing alterations or repairs, and clothing rental and storage.

Transportation, total, excluding trips

Vehicle purchases (net outlay) includes the net outlay (purchase price minus trade-in value) on new and used, domestic and imported cars and trucks; excludes recreational vehicles such as attachable campers, trailers, motorcycles, boats, private planes and other such as snowmobiles and dunebuggies.

Vehicle finance charges includes the dollar amount of interest paid for a loan contracted for the purchase of the cars and trucks described above.

Vehicle operations: gasoline includes gasoline expenses for cars as well as combined gas and oil expenses for trucks, self-propelled campers, vehicles owned outside the family (e.g., car pools), and multiple vehicle types.

Vehicle operations: other includes the expense of lubrications, filters and oil changes for automobiles; the combined expense of gasoline and oil for other vehicles not mentioned above; and the expense of tires and tubes, batteries, air conditioners, other major equipment, vehicle insurance, and repairs not paid by insurance for all cars, trucks, and self-propelled campers.

Other transportation includes leased cars, rental cars, combined expenses for vehicle operations, State and local registration fees, vehicle

inspection fees, drivers license fees, parking fees, towing charges, and the cost of non-vacation travel within and outside the commuting area through use of public transportation such as buses, trains, ships, airplanes and other.

Health care, total

Health insurance includes premiums for private health insurance, both employees' share paid by family members and the amount paid by the self-employed; the portion of Social Security payroll taxes used to support hospital insurance benefits for persons aged 65 and over (Plan A under the Federal Medicare program); and premiums paid by persons aged 65 and over for voluntary enrollment in the medical insurance plan (Plan B under the Federal Medicare program).

Expenses not paid by insurance includes hospital and physicians' services billed by hospitals for in-patient care, physicians' services rendered outside hospitals, eye care, dental care, out-patient services at clinics and hospitals, and medicines and supplies such as prescriptions, medical appliances and equipment (purchased or rented); excludes nonprescription drugs.

Personal care (selected expenses) includes hair and scalp care for men, boys, women and girls; shampoos, sets, and haircuts; other beauty parlor and barber services, including toupees, hair pieces and wigs; electric appliances, including hair dryers, shavers, hair setters, toothbrushes, and other electric personal care items; and maintenance and repairs of personal care appliances.

Recreation, total

Owned vacation home includes interest on mortgages, property taxes and insurance, ground rent, and land rent on mobile homes; repairs, maintenance and replacements contracted out and expenses of materials for owner-performed repairs and maintenance; and maintenance charges either included in mortgages or billed periodically.

Vacation, pleasure trips, total includes the following expenses for both domestic and foreign trips:

Food includes meals at restaurants, cafes and other establishments; snacks and nonalcoholic beverages purchased; and food

and nonalcoholic beverages purchased for future preparation and consumption while on vacations.

Alcoholic beverages includes beverages purchased by the drink or by the package.

Lodging includes expenses for hotels, motels, cottages, trailer camps, or other lodging; excludes costs of owned vacation homes.

Transportation: gasoline includes gasoline and oil expenses for cars, campers, and other non-commercial vehicles to or from destination.

Transportation: other transportation includes toll charges, gasoline, tips, and other expenses for transportation at destination; expenses to or from destination for planes, trains, buses, boats, taxis, limousines, and other rented, commercial vehicles.

All-expense tours includes expenses for all-expense tours and summer camps, including food, lodging, transportation, and other.

Other vacation expenses includes admission fees to entertainment and sports events, and to sightseeing; sports and other participation fees; and sports equipment rental.

Boats, aircraft, and wheel goods includes purchases, repairs, and maintenance (including insurance) of new and used boats, outboard motors, related marine equipment, pleasure aircraft, two-wheeled vehicles (except bicycles), detachable trailers, and other recreational vehicles; operating costs of rented or leased boats, aircraft and other wheel goods; docking and landing fees for boats and airplanes; and finance charges for all such items.

Other recreation: other includes club membership dues; season tickets, admissions, and fees to theatrical, musical, and sporting events (except when on vacation); radios, phonographs and musical instruments, including purchases, rentals and repairs; rental and repairs of televisions; photographic equipment, including purchases and repairs; film and film developing; toys, bicycles and tricycles, playground and camping equipment, swimming pools, pool and pingpong tables, health

and exercise equipment, and other sports equipment and unpowered sports vehicles; lessons such as music and driving; and pets, pet supplies, veterinary and medical expenses, kennel expenses and animal licenses.

Reading includes subscriptions for newspapers, magazines, and book and record clubs; and purchases of nonsubscription magazines, books, encyclopedias and paperbacks.

Education includes tuition, fees (excluding room and board), books, supplies and equipment for public and private nursery schools, elementary and high schools, colleges and universities, business schools, secretarial schools, and technical and trade schools; and miscellaneous and combined living expenses, excluding room and board.

Miscellaneous includes all finance charges, except for mortgages and automobiles; expenses for real estate owned but not used by family, checks and other bank service charges, safe deposit box rent, accounting and legal fees, funeral and cemetery expenses, expenses for trips other than for pleasure (excluding lodging and transportation), and all other miscellaneous expenses.

Personal insurance and pensions, total

Life, endowment, annuities and income includes premiums for whole life and term insurance, endowments, accident, income, and other life insurance.

Other personal insurance includes premiums for personal liability, accident and disability, and other non-health insurance.

Retirement and pensions includes employees' contributions to Railroad Retirement, government retirement, and private pension programs; retirement programs for the self-employed; and the proportion of Social Security taxes (deducted from income) paid toward retirement and annuities.

Gifts and contributions includes cash, or goods and services contributed to persons outside the family unit or to religious, welfare, and other charitable organizations.

Sources of income and personal taxes

Family income. This concept was defined in the survey as the combined income earned by all family members 14 years old or over during the calendar year in which the family participated in the survey. Total income is derived from the following components:

Wages and salaries, civilians includes gross wages, salaries, commissions, and tips received by all family members through civilian occupations, before any deductions or payments in-kind.

Union dues includes union dues and assessments deducted from pay. This is a signed value, indicating a reduction in gross money wages and salaries.

Other occupational expenses includes union dues not deducted from pay, tools, uniforms, business or professional association dues, licenses, and permits. This is a signed value, indicating a reduction in money wages and salaries.

Rent as pay includes any in-kind compensation received in the form of rent.

Meals as pay includes any in-kind compensation received in the form of meals.

Wages and salaries, armed forces includes compensation for active or reserve duty with the armed forces.

Quarters and subsistence includes allowances received by armed forces personnel for living quarters and subsistence.

Net income from owned business includes net income from privately-owned businesses or professional practices. Negatively-signed values indicate net losses.

Net income from own farm includes net income from privately-owned farms. Negatively-signed values indicate net losses.

Social security and railroad retirement includes Social Security and Railroad Retirement benefits before deduction of insurance premiums under the medicare program.

Government retirement, veterans' payments and unemployment compensation includes Federal, State and local retirement benefits before deduction for health insurance benefits; veterans' compensation and benefits, including military retirement pay, disability pensions, and education and insurance benefits; and unemployment insurance income from public and private sources.

Rental income, royalties, and income from roomers and boarders includes net income or losses from rental properties; royalties; and income from roomers and boarders.

Income from interest, dividends, estates and trusts includes interest from bonds, savings accounts, loans, and mortgages; dividends from stocks, mutual funds, and other sources; and distributions from estates and trusts.

Welfare and public assistance includes income from public assistance or public welfare, including money received from Federal, State, or local assistance programs such as old-age assistance, aid to families with dependent children, and disability insurance (except service-related).

Private pensions includes pensions and retirement pay from private employers, labor unions, and other private sources.

Regular contributions for support includes regular contributions from persons or organizations outside the consumer unit, including child support, alimony, and armed forces allotments.

Other, including workers' compensation includes net profit (sales minus costs of purchases and broker fees) on sales of stocks, bonds, and mutual funds which were both purchased and sold within either of the survey calendar year periods; refunds from insurance policies; refunds of Federal, State and local income taxes received in the survey year as a result of overpayment or overwithholding of these taxes on income earned in the year prior to the survey; refunds of property and other taxes in the survey year, including overpayment or overwithholding of Social Security taxes on income earned in the year prior to the survey; workers' compensation; income from renting or subleasing; and value received from Federal food stamps, net of purchase costs.

Personal taxes, total

Federal income taxes includes Federal income taxes withheld in the survey year to pay for income earned in the survey year plus additional taxes paid in the survey year to cover any underpayment or underwithholding of taxes in the year prior to the survey. This is a negatively-signed value for processing purposes only, indicating a reduction in family income.

State and local income taxes includes State and local income taxes withheld in the survey year to pay for income earned in the survey year plus additional taxes paid in the survey year to cover any underpayment or underwithholding of taxes in the year prior to the survey. This is a negatively-signed value for processing purposes only.

Personal property and other personal taxes includes personal property and other personal taxes paid, including Social Security taxes for the self-employed paid in the survey year to cover any underpayment or underwithholding of taxes in the year prior to the survey. This is a negatively-signed value for processing purposes only.

Other financial information

Other money receipts includes lump-sum inheritances or bequests after taxes, attorneys' fees, and other expenses; other money received such as lump-sum settlements from casualty insurance less attorneys' fees and other expenses; and gifts of cash from persons or organizations outside the consumer unit.

Net change in assets and liabilities, defined as the net change in assets less the net change in liabilities, reflects averages of end-of-year values for both survey years.

Net change in assets includes changes in savings and checking accounts, in holdings of stocks, mutual funds, and bonds, and in balances of money owed to the consumer unit; purchases, improvements, and sales of dwellings occupied by the consumer unit, and of vacation homes, recreational property, unimproved land, and other property owned by the consumer unit; and changes in investments in unincorporated family businesses and farms. This is a signed value to indicate increases or decreases in assets.

Net change in liabilities includes changes in mortgage principal on dwellings occupied by the consumer unit, and on vacation homes, recreational property, unimproved land, and other property owned by the consumer unit; payments of mortgage interest due before either survey year but paid in the survey year; mortgage interest and rent due but not paid in either year of the survey period; money owed on purchases of cars, trucks, and other vehicles; and money owed to other creditors such as department stores, banks, credit unions, finance companies, insurance companies, doctors, dentists, and other medical practitioners. This is a signed value to indicate increases or decreases in liabilities.

Goods and services received without direct expense includes quarters occupied without payment of cash rent; the portion of life, health, and hospitalization insurance premiums wholly or partly paid by employers, labor unions, or other; medical care and educational expenses paid by others with no cost to the consumer unit; gifts of furniture and other equipment received from persons outside the consumer unit; and the value of home-produced food and food received without charge from public and private welfare agencies.

Market value of financial assets includes the estimated market value of savings, checking, and brokerage accounts; and holdings of stocks, bonds, and mutual funds. The data reflect averages of end-of-year values for both survey years.

Mortgage principal paid on owned property includes mortgage principal paid on dwellings occupied during the survey period, and on vacation homes, recreational property, unimproved land, and other properties. This is a negatively-signed value, indicating the average amount of the reduction in mortgage principal in each survey year.

Copies of this report, previous releases of survey data, and reprints of the December 1974 *Monthly Labor Review* article may be obtained from the Bureau of Labor Statistics, Washington, D.C. 20212. A complete list of previous releases and reports appears on page 102.
