¹ White includes workers of all races other than Black.² Small differences may exist between employment totals of individual two-digit industries and the sum of their three-digit components because data are not sufficient to permit assigning some workers to a three-digit industry.

NOTE: A dash (-) indicates either that the sample did not include any workers with these characteristics, or that the data did not meet the Bureau publication criteria.

¹ White includes workers of all races other than Black.

NOTE: A dash (-) indicates either that the sample did not include

any workers with these characteristics, or that the data did not meet the Bureau publication criteria.

¹ Because the data file for this study does not indicate the place of employment for workers covered by the Railroad Retirement Act, employees of railroads and railroad-related organizations were considered to be employed in the North Central Region where many railroads and related organizations have headquarters.

NOTE: A dash (-) indicates either that the sample did not include any workers with these characteristics, or that the data did not meet the Bureau publication criteria.

¹ Workers who had some earnings in more than one industry group and in more than one industry division are included in the count of those with some earnings in each such industry group and division. Thus, some workers are counted more than once, and, therefore, detail does not add to total. Small differences may exist between employment totals of individual two-digit industries and the sum of their three-digit components

because data are not sufficient to permit assigning some workers to a three-digit industry.

NOTE: A dash (-) indicates either that the sample did not include any workers with these characteristics, or that the data did not meet the Bureau publication criteria.

¹ Workers who had some earnings in more than one industry group and in more than one industry division are included in the count of those with some earnings in each such industry group and division. Thus, some workers are counted more than once, and, therefore, detail does not add to total. Small differences may exist between employment totals of individual two-digit industries and the sum of their three-digit com-

ponents because data are not sufficient to permit assigning some workers to a three-digit industry.

NOTE: A dash (-) indicates either that the sample did not include any workers with these characteristics, or that the data did not meet the Bureau publication criteria.

¹ Small differences may exist between employment totals of individual two-digit industries and the sum of their three-digit components because data are not sufficient to permit assigning some workers to a three-digit industry.

NOTE: A dash (-) indicates either that the sample did not include any workers with these characteristics, or that the data did not meet the Bureau publication criteria.

¹ Workers who had some earnings in more than one industry group and in more than one industry division are included in the count of those with some earnings in each such industry group and division. Thus, some workers are counted more than once, and, therefore, detail does not add to total. Small differences may exist between employment totals of individual two-digit industries and the sum of their three-digit components because data are not sufficient to permit assigning some workers to a three-digit industry.

NOTE: A dash (-) indicates either that the sample did not include any workers with these characteristics, or that the data did not meet the Bureau publication criteria.

¹ Small differences may exist between employment totals of individual two-digit industries and the sum of their three-digit components because data are not sufficient to permit assigning some workers to a three digit industry.

NOTE: A dash (-) indicates either that the sample did not include any workers with these characteristics, or that the data did not meet the Bureau publication criteria.

¹ Because the data file for this study does not indicate the place of employment of workers covered by the Railroad Retirement Act, employees of railroads and railroad-related organizations were considered to be employed in the North Central Region where many railroads and related organizations have headquarters.

NOTE: A dash (-) indicates either that the sample did not include any workers with these characteristics, or that the data did not meet Bureau publication criteria.

¹ White includes workers of all races other than Black.² Small differences may exist between employment totals of individual two-digit industries and the sum of their three-digit components because data are not sufficient to permit assigning some workers to a three-digit industry.

NOTE: A dash (-) indicates either that the sample did not include any workers with these characteristics, or that the data did not meet the Bureau publication criteria.

Table B-18. Single- and multi-industry employment of all workers in industry of major earnings, by number of employers in the industry

INDUSTRY ¹	PERCENT OF WORKERS EMPLOYED DURING																	
	ANY QUARTER									FOUR QUARTERS								
	ALL WORK- ERS	SINGLE-INDUSTRY WORKERS				MULTI-INDUSTRY WORKERS				ALL WORK- ERS	SINGLE-INDUSTRY WORKERS				MULTI-INDUSTRY WORKERS
