Bulletin 2087

For sale by the Superintendent of Documents, U.S. Government Printing Office
Washington, D.C. 20402—Price \$4.00

Preface

This bulletin summarizes the results of an occupational wage survey in wood household furniture manufacturing plants conducted in June 1979. A similar survey, covering nonupholstered furniture only, was conducted in November 1974.

Releases were issued earlier for the following localities:

Nonupholstered furniture:

Arkansas
Gardner, Mass.
Grand Rapids, Mich.
Hickory-Statesville, N.C.
Indiana
Jamestown, N.Y.
Los Angeles-Long Beach, Calif.
Louisville, Ky.-Ind.
Miami and Fort Lauderdale-Hollywood, Fla.
Tennessee
Virginia

Upholstered furniture:

Arkansas
Greensboro-Winston-Salem-High Point, N.C.
Hickory-Statesville, N.C.
Indiana
Los Angeles-Long Beach, Calif.
Tennessee
Texas

The study was conducted in the Bureau's Office of Wages and Industrial Relations. Carl Barsky in the Division of Occupational Wage Structures prepared this bulletin. Fieldwork for the survey was directed by the Assistant Regional Commissioners for Operations.

Other reports available from the Bureau's program of industry wage studies, as well as the addresses of the Bureau's regional offices, are listed at the end of this bulletin.

Wood Household Furniture, June 1979

Earnings and benefits

Straight-time earnings of production and related workers in nonupholstered wood household furniture plants averaged \$4.22 an hour in June 1979. This compared with \$4.78 for production workers in upholstered furniture plants.¹ (See tables 1 and 2.) A substantial part of this pay spread was attributable to differing staff requirements. To illustrate, in nonupholstered furniture, the largest job group by far was assembler—13 percent of the industry's production work force. In upholstered furniture, the most populous group (about 15 percent) was upholsterer—a skilled, relatively highly paid job.

The \$4.22 average for nonupholstered furniture represents an increase of 38 percent from a similar survey conducted in November 1974.² Over this period, hourly earnings of production workers in all durable goods manufacturing rose 45 percent, according to the Bureau's Hourly Earnings Index.

Individual earnings were widely dispersed—between \$2.90 and \$8 for about 95 percent of the workers in both industries (tables 3 and 4).³ The middle 50 percent of workers fell between \$3.45 and \$4.62 in nonupholstered furniture and between \$3.53 and \$5.56 in upholstered furniture. Contributing to the wide range of earnings were substantial regional pay differences, disparate pay levels among establishments, the low incidence of single-rate pay systems (about 10 percent) that impart uniformity to wages, and, especially for upholstered furniture, the relatively broad range of skill requirements in the industry. Tables 17-31 show that even within occupations, individual earnings were widely dispersed.

Regionally, average hourly earnings were highest in the Pacific States (\$5.61 in nonupholstered and \$5.82 in upholstered furniture) and lowest in the Border States (\$3.60 and \$4.19, respectively). Hourly pay levels in the Southeast, the region with the highest employment in each industry, were \$3.89 and \$4.49, respectively.

Average earnings for production workers were higher in metropolitan areas than in nonmetropolitan areas and higher in union than in nonunion establishments. These and other nationwide pay differences (e.g., by size of plant and by primary product) are partially attributable to the differences in regional distribution of workers in firms with these characteristics. For example, in nonupholstered furniture, the low-paying

Southeast region accounted for one-half of all nonmetropolitan area workers, but only one-third of metropolitan area workers. In this region, the metropolitan area wage advantage was only 4 percent, compared with 13 percent nationwide. Similarly, the Border States and Southeast regions combined employed three-tenths of the industry's union workers but two-thirds of the nonunion workers. There was a 22-percent union advantage nationwide compared with a 10-percent advantage in the Border States and a 4-percent advantage for nonunion workers in the Southeast.

Men, constituting two-thirds of the work force in nonupholstered furniture and three-fifths in upholstered furniture, averaged about 15 percent more than women in each industry. The differential reflects, in part, variations in the distribution of the sexes among jobs with disparate pay levels. Women were chiefly employed as assemblers, sewing-machine operators, off-bearers, and packers, and in finishing occupations. A large majority of upholsterers, springers (hand), and electric knife cutters—the highest paying job categories—were men.

Fifty-two occupations were selected to represent the wage structure and activities of the furniture industries. They accounted for just over one-half of the production workers in nonupholstered furniture plants, and slightly more than three-fifths in upholstered furniture. Average hourly earnings were highest for inside upholsterers in both industries—\$6.23 in nonupholstered and \$6.88 in upholstered. (Because of secondary product lines, jobs relating to upholstering were frequently found in establishments whose major product was nonupholstered furniture.) The lowest pay levels recorded were \$3.59 for springers (sinuous-wire springs) in nonupholstered firms, and \$3.57 for router operators (feed only) in upholstered. Assemblers of complete case goods

¹ See appendix A for scope and method of survey and definitions of terms used in this report. Job descriptions are found in appendix B.

² *Industry Wage Survey: Wood Household Furniture, November 1974*, Bulletin 1930 (Bureau of Labor Statistics, 1976). Only the nonupholstered furniture industry was covered by the 1974 survey.

³ The Federal minimum wage in effect at the time of the June 1979 survey was \$2.90 an hour. Variations in minimum entrance (hiring) rates in furniture plants are illustrated in table 33.

pieces, numerically the largest nonupholstered job, averaged \$4.49. The largest category in upholstered furniture—all-round sewing-machine operators—averaged \$4.88. (See tables 5 and 6.)

Workers in upholstered furniture plants usually averaged more than those in the same occupation in non-upholstered furniture, even when comparisons were limited to the same region, State, or area. (See tables 15-16 for locality data.)

In both industries, higher occupational averages usually were associated with metropolitan areas (tables 7 and 8), plants employing 100 workers or more (tables 9 and 10), and plants covered by labor-management contracts (tables 11 and 12). When such comparisons were made within a region, however, these pay relationships could not be clearly established. For example, nonupholstered furniture workers in nonunion plants usually averaged more than their union counterparts in the Southeast region.

Incentive workers in upholstered furniture plants usually averaged 20 to 40 percent more than time workers in the same job. In nonupholstered furniture, however, the advantage typically fell in a somewhat lower range—from 5 to 25 percent (tables 13 and 14).

Virtually all production workers were employed in plants providing paid holidays, paid vacations, and at least part of the cost of hospitalization, surgical, and basic medical insurance coverage (tables 36-38). Major medical insurance and other health plans also were common in the industries, as were retirement plans (covering slightly less than three-fifths of the workers in non-upholstered furniture and about one-half of those in upholstered furniture). The employer usually paid the entire cost of these benefits.

Paid holiday provisions varied widely. A large majority of workers in both industries received between 5 and 9 days annually. Most workers were eligible for between 1 and 3 weeks of vacation pay, depending on their length of service. Other paid leave provisions studied included funeral leave, which applied to about half the workers in each industry. Jury-duty leave was provided to one-half of the upholstered and two-thirds of the nonupholstered furniture workers. Technological severance pay, however, was rare in both industries. (See table 40.)

The survey also found 40-hour per week schedules predominant (table 34). Establishments employing three-fifths of the nonupholstered and three-tenths of the upholstered furniture workers had provisions for second shifts; the corresponding proportions for third shift were one-fourth and one-eighth (table 35). Less than 5 percent of either industry's workers actually were employed on late shifts at the time of the survey.

Industry characteristics

Nonupholstered furniture plants within the scope of

the June 1979 survey (those with 20 workers or more) employed 137,150 production and related workers; upholstered furniture plants employed 61,914. For both industries, the Southeast employed by far the largest number, two-fifths of the nonupholstered and slightly over one-half of the upholstered furniture workers. Other regions employing at least one-tenth of the work force were the Border States, Great Lakes, and Pacific States for nonupholstered furniture and the Pacific States for upholstered furniture.

Nationwide, just under one-half of the workers in each industry were in metropolitan areas. The proportions ranged from one-tenth of the nonupholstered and one-fifth of the upholstered furniture workers in the Border States to all workers in the Pacific. Metropolitan areas studied separately included Los Angeles-Long Beach and Greensboro-Winston-Salem-High Point, each of which accounted for a substantial proportion of the employment in their regions. In addition, Hickory-Statesville, a nonmetropolitan center, accounted for about one-fourth of the Southeast's employment in each industry.

The furniture industries, as defined for this study, manufacture a wide variety of products, including those that can be sold directly to the consumer, such as beds, cabinets, chairs, sofas, and tables; and items that must be further processed before being marketed, such as radio, television, or kitchen cabinets. In the nonupholstered segment, slightly more than one-third of the production workers were in plants whose major product was bedroom furniture; about one-fifth each in those chiefly making dining room furniture or kitchen cabinets; and about one-sixth, in living room furniture plants. Many plants had secondary product lines; for example, bedroom and dining room furniture frequently were made in the same establishment and upholstered furniture was commonly a secondary product in plants whose major furniture line was radio-TV or kitchen cabinets, living room, or dining room furniture. Upholstered furniture plants, however, typically did not have secondary product lines.

Large establishments—those with at least 100 employees—accounted for just under three-fifths of the production workers in nonupholstered plants, compared with two-fifths in upholstered plants. Establishments with fewer than 20 workers were excluded from the survey.

Three-tenths of the nonupholstered and one-fourth of the upholstered furniture workers were in plants operating under union contracts covering a majority of their production work force. The United Brotherhood of Carpenters and Joiners and the United Furniture Workers of America were the largest unions in the non-upholstered segment. The Upholsterers International Union of America was the largest union among upholstery workers. All three of these unions are affiliates of

the AFL-CIO. The degree of unionization varied widely by region. For example, for nonupholstered furniture, union agreements covered less than one-fifth of the production workers in the Border States, Southeast, and Southwest regions, but three-fifths of such workers in the Great Lakes, Middle West, and Pacific States.

Nearly nine-tenths of the nonupholstered and three-fifths of the upholstered furniture workers were paid time rates in June 1979, typically under formal plans

providing a range of rates for specific occupations. Incentive workers in upholstered furniture plants were typically paid under individual piece rates. In nonupholstered plants, group bonus was the most common plan (table 32). Occupations in which incentive pay was common included assembler, cushion-stuffing-machine operator, electric knife cutter, sander, sewing-machine operator, sprayer, and upholsterer.

¹ Excludes premium pay for overtime and for work on weekends, holidays and late shifts.

² Includes data for workers in classification in addition to those shown separately.

NOTE: Dashes indicate that no data were reported or that data did not meet publication criteria.
Overall occupation may include data for workers not classified by sex.

¹ Excludes premium pay for overtime and for work on weekends, holidays and late shifts.

² Includes data for regions in addition to those shown separately.

³ Includes data for workers in classification in addition to those shown separately.

NOTE: Dashes indicate that no data were reported or that data did not meet publication criteria.

¹ For definition of selected areas see appendix table A-1, footnote 2.

² Excludes premium pay for overtime and for work on weekends, holidays and late shifts.

³ Includes data for workers in classification in addition to those shown separately.

NOTE: Dashes indicate that no data were reported or that data did not meet publication criteria.

Overall occupation may include data for workers not classified by sex.

¹ Includes data for upholstered workers in the Mountain region in addition to those shown separately.

² Less than 0.5 percent.

³ Vacation payments, such as percent of annual earnings, were converted to an equivalent time basis. Periods of service were chosen arbitrarily and do not necessarily reflect individual

establishment provisions for progression. For example, changes indicated at 10 years may include changes that occurred between 5 and 10 years.

⁴ Vacation provisions were virtually the same after longer periods of service.

NOTE: Because of rounding, sums of individual items may not equal totals.

¹ For definition of items, see appendix A.

² Includes data for upholstered workers in the Mountain region in addition to those shown separately.

Appendix A. Scope and Method of Survey

Scope of survey

The survey included establishments engaged primarily in manufacturing (1) Nonupholstered wood household furniture; television, radio, phonograph, and sewing-machine cabinets; or wood kitchen cabinets (industries 2511, 2512, and 2434 as defined in the 1972 edition of the *Standard Industrial Classification Manual* prepared by the U.S. Office of Management and Budget), and (2) Upholstered household furniture on wood frames (industry 2512). Separate auxiliary units such as central offices were excluded.

Establishments studied were selected from those employing 20 workers or more at the time of reference of the data used in compiling the universe lists. Table A-1 shows the number of establishments and workers estimated to be within the scope of the survey, as well as the number actually studied by the Bureau.

Products

Classification of establishments by product was based on the principal type of furniture manufactured. For example, if 60 percent of the total value of an establishment's production was nonupholstered furniture, and 40 percent was upholstered furniture, all workers in that establishment were considered as producing nonupholstered furniture.

Method of study

Data were obtained by personal visits of the Bureau's field staff to a representative sample of establishments within the scope of the survey. To obtain appropriate accuracy at minimum cost, a greater proportion of large than of small establishments was studied. All estimates (except for minimum entrance rates) are presented, therefore, as relating to all establishments in the industry, excluding only those below the minimum size at the time of reference of the universe data.

Establishment definition

An establishment is defined for this study as a single physical location where manufacturing operations are performed. An establishment is not necessarily identical with a company, which may consist of one establishment or more.

Employment

Estimates of the number of workers within the scope

of the study are intended as a general guide to the size and composition of the industry's labor force, rather than as precise measures of employment.

Production workers

The terms "production workers" and "production and related workers," used interchangeably in this bulletin, include working supervisors and all nonsupervisory workers engaged in nonoffice activities. Administrative, executive, professional, and technical personnel, and force-account construction employees, who are used as a separate work force on the firm's own properties, are excluded.

Occupational classification

Occupational classification was based on a uniform set of job descriptions designed to take account of interestablishment and interarea variations in duties within the same job. (See appendix B for these descriptions.) The criteria for selection of the occupations were: The number of workers in the occupation; the usefulness of the data in collective bargaining; and appropriate representation of the entire job scale in the industry. Working supervisors, apprentices, learners, beginners, trainees, and handicapped, part-time, temporary, and probationary workers were not reported in the data for selected occupations but were included in the data for all production workers.

Wage data

Information on wages relates to straight-time hourly earnings, excluding premium pay for overtime and for work on weekends, holidays, and late shifts. Incentive payments, such as those resulting from piecework or production bonus systems, and cost-of-living bonuses were included as part of the workers' regular pay. Non-production bonus payments, such as Christmas or year-end bonuses, were excluded.

Average (mean) hourly rates or earnings for each occupation or category of workers, such as production workers, were calculated by weighting each rate (or hourly earnings) by the number of workers receiving the rate, totaling, and dividing by the number of individuals. The hourly earnings of salaried workers were obtained by dividing straight-time salary by normal (or standard) hours to which the salary corresponds.

The *median* designates position; that is, one-half of the employees surveyed received more than this rate and one-half received less. The *middle range* is defined by two rates of pay such that one-fourth of the employees earned less than the lower of these rates and one-fourth earned more than the higher rate.

Size of community

Tabulations by size of community pertain to metropolitan and nonmetropolitan areas. The term "metropolitan areas," as used in this bulletin, refers to the Standard Metropolitan Statistical Areas as defined by the U.S. Office of Management and Budget through February 1974. Except in New England, a Standard Metropolitan Statistical Area is defined as a county or group of contiguous counties which contains at least one city of 50,000 inhabitants or more. Counties contiguous to the one containing such a city are included in a Standard Metropolitan Statistical Area if, according to certain criteria, they are essentially metropolitan in character and are socially and economically integrated with the central city. In New England, where the city and town are administratively more important than the county, they are the units used in defining Standard Metropolitan Statistical Areas.

Labor-management agreements

Separate wage data are presented, where possible, for establishments that had (1) a majority of the production workers covered by labor-management contracts, and (2) none or a minority of the production workers covered by labor-management contracts.

Method of wage payment

Tabulations by method of wage payment relate to the number of workers paid under the various time and incentive wage systems. Formal rate structures for time-rated workers provide single rates or a range of rates for individual job categories. In the absence of a formal rate structure, pay rates are determined primarily by the qualifications of the individual worker. A single rate structure is one in which the same rate is paid to all experienced workers in the same job classification. Learners, apprentices, or probationary workers may be paid according to rate schedules which start below the single rate and permit the workers to achieve the full job rate over a period of time. An experienced worker occasionally may be paid above or below the single rate for special reasons, but such payments are exceptions. Range-of-rate plans are those in which the minimum, maximum, or both of these rates paid experienced workers for the same job are specified. Specific rates of individual workers within the range may be determined by merit, length of service, or a combination of these. Incentive workers are classified under piecework or bonus plans. Piecework is work for which a predetermined rate is paid for each unit of output.

Production bonuses are for production in excess of a quota or for completion of a task in less than standard time.

Minimum entrance rates

Data relate to the lowest formally established entrance (hiring) rates established for hand sanders and machine off-bearers in the establishments visited. Excluded were policies regarding incentive workers or time-rated learners who will eventually be paid on an incentive basis.

Scheduled weekly hours

Data on weekly hours refer to the predominant work schedule for full-time production workers employed on the day shift.

Shift provisions and practices

Shift provisions relate to the policies of establishments either currently operating late shifts or having formal provisions covering late-shift work. Practices relate to workers employed on late shifts at the time of the survey.

Establishment practices and supplementary wage provisions

Supplementary benefits in an establishment were considered applicable to all production workers if they applied to half or more of such workers in the establishment. Similarly, if fewer than half of the workers were covered, the benefit was considered nonexistent in the establishment. Because of length-of-service and other eligibility requirements, the proportion of workers receiving the benefits may be smaller than estimated.

Paid holidays. Paid holiday provisions relate to full-day and half-day holidays provided annually.

Paid vacations. The summaries of vacation plans are limited to formal arrangements and exclude informal plans whereby time off with pay is granted at the discretion of the employer or supervisor. Payments not on a time basis were converted; for example, a payment of 2 percent of annual earnings was considered the equivalent of 1 week's pay. The periods of service for which data are presented represent the most common practices, but they do not necessarily reflect individual establishment provisions for progression. For example, changes in proportions indicated at 10 years of service may include changes which occurred between 5 and 10 years.

Health, insurance, and retirement plans

Data are presented for health, insurance, pension, and retirement severance plans for which the employer pays all or a part of the cost, excluding programs required by law such as workers' compensation and social secu-

riety. Among plans included are those underwritten by a commercial insurance company and those paid directly by the employer from his current operating funds or from a fund set aside for this purpose.

Death benefits are included as a form of life insurance. Sickness and accident insurance is limited to that type of insurance under which predetermined cash payments are made directly to the insured on a weekly or monthly basis during illness or accident disability. Information is presented for all such plans to which the employer contributes at least a part of the cost. However, in New York and New Jersey, where temporary disability insurance laws require employer contributions¹ plans are included only if the employer (1) contributes more than is legally required, or (2) provides the employees with benefits which exceed the requirements of the law.

Tabulations of paid sick leave plans are limited to formal plans which provide full pay or a proportion of the worker's pay during absence from work because of illness; informal arrangements have been omitted. Separate tabulations are provided for (1) plans which provide full pay and no waiting period, and (2) plans providing either partial pay or a waiting period.

Long-term disability insurance plans provide payments to totally disabled employees upon the expiration of sick leave, sickness and accident insurance, or both, or after a specified period of disability (typically 6 months). Payments are made until the end of disability, a maximum age, or eligibility for retirement benefits. Payments may be full or partial, but are almost always reduced by social security, workers' compensation, and private pension benefits payable to the disabled employee.

¹The temporary disability laws in California and Rhode Island do not require employer contributions.

Medical insurance refers to plans providing for complete or partial payment of doctors' fees. Such plans may be underwritten by a commercial insurance company or a nonprofit organization, or they may be a form of self-insurance.

Major medical insurance, sometimes referred to as extended medical or catastrophe insurance, includes plans designed to cover employees for sickness or injury involving an expense which exceeds the normal coverage of hospitalization, medical, and surgical plans.

Dental insurance, for purposes of this survey, usually covers fillings, extractions, and X-rays. Excluded are plans which cover only oral surgery or accident damage.

Tabulations of retirement pensions are limited to plans which provide regular payments for the remainder of the retiree's life. Data are presented separately for retirement severance pay (one payment or several over a specified period of time) made to employees on retirement. Establishments providing both retirement severance payments and retirement pensions to employees were considered as having both retirement pensions and retirement severance plans; however, establishments having optional plans providing employees a choice of either retirement severance payments or pensions were considered as having only retirement pension benefits.

Paid funeral and jury-duty leave. Data for paid funeral and jury-duty leave relate to formal plans which provide at least partial payment for time lost as a result of attending funerals of specified family members or serving as a juror.

Technological severance pay. Data relate to formal plans providing for payments to employees permanently separated from the company because of a technological change or plant closing.

Table A-1. Estimated number of establishments and employees within scope of survey and number studied, wood household furniture industries, June 1979

Region ¹ and area ²	Number of establishments ³		Workers in establishments

¹ The regions used in this study include *New England*—Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont; *Middle Atlantic*—New Jersey, New York, and Pennsylvania; *Border States*—Delaware, District of Columbia, Kentucky, Maryland, Virginia, and West Virginia; *Southeast*—Alabama, Florida, Georgia, Mississippi, North Carolina, South Carolina, and Tennessee; *Southwest*—Arkansas, Louisiana, Oklahoma, and Texas; *Great Lakes*—Illinois, Indiana, Michigan, Minnesota, Ohio and Wisconsin; *Middle West*—Iowa, Kansas, Missouri, Nebraska, North Dakota, and South Dakota; *Mountain*—Arizona, Colorado, Idaho, Montana, New Mexico, Utah, and Wyoming; and *Pacific*—California, Nevada, Oregon, and Washington. Alaska and Hawaii were not included in the study.

² The areas used in this study include: *Gardner, Mass.*—Ashburnam, Athol, Baldwinville, Gardner, and Winchedon townships; *Jamesstown, N.Y.*—Chautauqua County; *Louisville, Ky.-Ind.*—Bullitt, Jefferson, and Oldham Counties, Ky., and Clark and Floyd Counties, Ind.; *Greensboro-*

Winston-Salem-High Point, N.C.—Davidson, Forsyth, Guilford, Randolph, Stokes, and Yadkin Counties; *Hickory-Statesville, N.C.*—Burke, Caldwell, Catawba, and Iredell Counties; *Miami and Fort Lauderdale-Hollywood, Fla.*—Dade and Broward Counties; *Grand Rapids, Mich.*—Kent and Ottawa Counties; and *Los Angeles-Long Beach, Calif.*—Los Angeles County.

³ Includes only those establishments with 20 workers or more at the time of reference of the universe data.

⁴ Includes executive, professional, office, and other workers in addition to the production worker category shown separately.

⁵ Includes data for States and areas in addition to those shown separately.

⁶ Includes data for some establishments in the Great Lakes region.

⁷ Includes data for the Mountain region in addition to those shown separately.

Appendix B. Occupational Descriptions

The primary purpose of preparing job descriptions for the Bureau's wage surveys is to assist its field representatives in classifying into appropriate occupations workers who are employed under a variety of payroll titles and different work arrangements from establishment to establishment and area to area. This classification permits the grouping of occupational wage rates representing comparable job content. Because of this emphasis on comparability of occupational content, the Bureau's job descriptions may differ significantly from those in use in individual establishments or those prepared for other purposes. Unless otherwise indicated, these job descriptions exclude working supervisors, apprentices, learners, beginners, trainees, and handicapped, part-time, temporary, and probationary workers.

ASSEMBLING

ASSEMBLER (EXCEPT CHAIRS)

(Bed assembler; table assembler; cabinet assembler; back maker; frame maker)

Assembles and fastens together wooden parts or assemblies to form sections, frames, or complete articles of furniture (except chairs). Work involves *most of the following*: Trimming joints to fit, using handtools; applying glue to joints or edges of stock and putting parts or sections together; placing assembled parts in clamp until glue has dried or reinforcing joints with dowels, screws, staples, or nails; and attaching glue blocks, corner blocks, drawer guides, tops, molding, shelves, dust bottoms, or skids with nails, screws, glue or staples. May also drill holes and attach parts of drawer locks. This classification excludes: (1) Cabinet makers who, in addition to assembling furniture, are responsible for shaping wood parts from rough stock; (2) workers assembling relatively inexpensive furniture that is nailed or glued together and sold unfinished; and (3) workers who specialize in attaching parts such as doors, hinges, knobs, skids, and baffle screens, in fitting drawers, doors, and trays into furniture, or in assembling small parts such as desk trays, card file boxes, and display pedestals.

For wage study purposes, furniture assemblers are to be classified according to type of assembly work, as follows:

Complete furniture pieces (case goods)—Workers en-

gaged in final assembly of bodies (cases) for such articles of furniture as book cases; chests; radio, television, and phonograph cabinets; and vanities, from wood parts and/or subassemblies.

Complete furniture pieces (other than case goods)—Workers engaged in assembling complete articles of furniture (other than case goods), such as tables, beds, and occasional pieces, from wood parts and/or subassemblies.

Subassemblies—Workers engaged in assembling subassemblies, which will later be used in complete articles of furniture, from wood parts and/or other subassemblies.

ASSEMBLER, CHAIRS

(Chair maker)

Assembles shaped and fitted wooden parts to form plain or semiupholstered chairs. Work involves gluing, nailing, screwing, or clamping the parts together.

ASSEMBLER, UPHOLSTERY FRAMES

Assembles and fastens together wood and metal parts or assemblies to form semicomplete or complete frames for upholstered furniture pieces. Work includes *most of the following*: Setting up frame press; fastening parts to frame; inspecting glue joints; and cleaning glue off press. For wage study purposes workers are to be classified as follows:

Final frame assemblies

Subassemblies

CUSHION-STUFFING-MACHINE OPERATOR

Fills cushions with moss, kapok, down, foam, or other materials, using a stuffing machine. Work involves: Placing stuffing materials on platform or into machine, operating controls to compress material or remove air (vacuum machines), and fitting cover over cushion. May also close by sewing or zipping.

CUTTER, ELECTRIC KNIFE

Cuts cover for upholstered furniture according to pattern using an electric knife. May work from patterns previously drawn by others or mark over perforated patterns; however, workers whose *primary* duty is to mark patterns are *excluded*. Worker must have suffi-

cient skill to cut relatively intricate patterns, i.e., along stripes or decorations.

PLASTIC-TOP INSTALLER

Installs *laminated* plastic tops on furniture, such as cabinets, counters, tables, and desks. Work involves *most of the following*: Applying adhesive to surface of furniture; positioning plastic top on adhesive-coated section of furniture; smoothing and pressing top onto surface; and trimming and smoothing edges of top. May also clean laminated plastic, attach edge molding and trim to edge, cut plastic parts to size and shape, or attach clamp to hold laminated plastic until adhesive sets.

SEWING-MACHINE OPERATOR

Operates sewing machine to sew cushions, skirts, or other sections of upholstered furniture. For wage study purposes, workers are to be classified as follows:

All-round—Performs all tasks in the sewing department as directed by supervisor, including cushion sewing (single or double needle), skirt sewing, button sewing, and cushion closing.

Cushions—Sews covers of box cushions, welt cushions, pillows, and similar items which have relatively intricate patterns. Cushion sewers are classified as follows:

Single needle

Double needle

Skirts—Makes skirts to fit specified styles of furniture.

Not elsewhere classified

SPRINGER, HAND

(Springup)

Assembles and/or attaches springs or coils in upholstery frames. For wage study purposes, hand springers are classified as follows:

Sinuous-wire springs. Places and secures ends of sinuous-wire springs in holes. Clips springs using air gun. May also clip springs together with wire. May also bore holes in frames.

Hand-tied coil springs. Selects, assembles, and secures spring coils in frame. Ties springs in one or more directions with twine or similar material. May also attach burlap or other covering to coils or frames.

UPHOLSTERER, INSIDE

(Upoisterer)

Upholsters inside sections of chairs and sofas. Work includes *most of the following*: Tacking or stapling material along front rail, outside and inside arms, and onto top outside back; placing padding and material over seat springs; and placing and shaping layers of padding over inside of backs. May use foam rubber padding to produce grooved effects.

UPHOLSTERER, OUTSIDE

(Outsider)

Completes upholstering procedure by upholstering outside sections of chairs and sofas. Work includes *most of the following*: Tacking or stapling cardboard, padding, and upholstery material to outside top, side, and bottom rails; tacking covering material to top, bottom, and side rails of bed frames; and attaching trimming material such as gimp, braid, binding, and skirt to frames. May also attach wood parts such as legs to frame.

UPHOLSTERER, SECTIONS

Upholsters one section of a furniture piece, such as arms, backs, or seats. Work includes *one of the following*: Pads and covers seat area of tight seat pieces; covers deck and platform of loose cushion pieces; pads and covers back area of sofas and chairs; or pads and covers arms of sofas and chairs.

ROUGH MILL

BAND-SAW OPERATOR

(Band-scroll saw operator)

Sets up and operates a band saw to cut curved or irregular designs in rough stock. Work includes *most of the following*: Clamping jig into position on machine bed; placing stock into jig; feeding stock against band blade; and adjusting blade to achieve correct cut. May mark stock for cuts, or work from stock marked by others.

CUT-OFF-SAW OPERATOR

(Cut-off-saw operator, treadle operated; swinging-cut-off-saw operator)

Operates a swinging or treadle-operated cut-off saw to cut wooden stock to desired lengths; grades and cuts stock to best advantage, eliminating knots and other defects.

DOUBLE-END-TRIMMER-AND-BORING-MACHINE OPERATOR

Sets up and operates machine to trim or miter ends of wooden furniture parts and bore holes for dowels. Work involves *most of the following*: Inserting bits in chucks and tightening chuck jaws; setting angle and spacing of circular saws, according to specifications; attaching holders, jigs, or stops to table and adjusting clamps; starting automatic trimming and boring cycle and positioning stock under clamps where it is held during trimming and boring operations.

GLUER, ROUGH STOCK

(Clamp-carrier operator; glue-clamp-machine operator; glue-press operator; glue-rack operator; glue-wheel operator; revolving-press operator; rotary-clamp operator; squeezer operator)

Applies glue to edges of surfaces of wooden pieces to be joined, assembles and clamps the glued boards into a press until the glue has set or hardened. May also prepare glue.

LATHE OPERATOR, AUTOMATIC

(Swing-type-lathe operator; wood turning-lathe operator)

Operates swing-type (rotary cutting) lathe to cut round wooden articles such as table legs or dowels. For wage study purposes, workers are to be classified as follows:

Set up and operate Selects and installs proper cutting heads; inserts and clamps stock between turning centers; and moves lever to swing rotating stock against cutters until shaping is complete.

Feed only - Feeds stock into machine.

MARKER, BAND-SAW

Marks pattern on rough stock preparatory to cutting by a bandsaw operator.

MOLDING-MACHINE OPERATOR

(Molder operator; molding maker, machine; wood-molding-machine operator)

Operates a machine that planes wooden boards or strips on all sides and shapes item to required cross section. For wage survey purposes, workers are to be classified as follows:

Setup and operate

Feed only

OFF-BEARER, MACHINE

(Catcher; machine tailer; tailer)

Catches or receives wooden parts as they come off the discharge end of a machine; piles products or loads materials on conveyor or truck for transfer elsewhere.

PLANER OPERATOR

(Facer operator; planer; surface operator; wood-planer operator)

Operates a single- or double-surface planer to level off irregularities and cut a smooth surface on rough stock, reducing it to specified thickness. For wage survey purposes, workers are to be classified as follows:

Setup and operate

Feed only

RIP-SAW OPERATOR

(Band-rip-saw operator; circular-rip-saw operator)

Operates a rip-sawing machine to cut lumber with the grain to specified widths, feeding each piece into roller, adjusting roller speed according to hardness of wood.

ROUTER OPERATOR

(Router; router-machine operator)

Cuts and shapes various designs in wooden stock by machine. Work involves *most of the following*: Clamps and tightens bit in chuck of machine; inserts guide pin in hole of machine table; places groove of jig over pin and adjusts table for depth of cut and sets table stops; starts machine and feeds stock. For wage survey purposes workers are to be classified as follows:

Setup and operate

Feed only

SHAPER OPERATOR, AUTOMATIC

(Sizer operator, automatic)

Operates a machine to form quantities of like, irregularly shaped wooden furniture parts from roughly shaped blanks. For wage survey purposes, workers are to be classified as follows:

Set-up and operate—Selects and installs proper cutters on spindles; sets and locks pattern in place; sets stops and clamps to hold blank properly in bed of machine; lays blank over pattern and starts machine.

Feed only—Feeds stock into machine.

SHAPER OPERATOR, HAND

(Detail-shaper operator; frazer-machine operator; shaping-machine operator; variety-molder operator; wood-shaping operator)

Operates a hand shaping machine to cut designs of irregular shape in the surface of straight, curved, or irregular shaped pieces of wood by feeding stock against rotating blocks, using template or free hand manipulation to produce shape desired. For wage survey purposes, workers are to be classified as follows:

Setup and operate

Feed only

TENONER OPERATOR

(Saw-and-chuck-machine operator; double-tenoner-machine operator; single-end-tenoner operator; tenon-machine operator)

Operates a machine that cuts tenons on wooden parts for assembling into complete units. For wage survey purposes, workers are to be classified as follows:

Setup and operate

Feed only

VARIETY-SAW OPERATOR

(Combination saw operator; universal saw operator)

Operates adjustable circular saw to perform such operations as ripsawing, cross cutting, beveling, grooving, and mitering. Selects sawing blade, adjusts table for angle or depth of cut, and feeds stock into saw.

FINISHING

RUBBER, FURNITURE

(Burnisher; polisher)

Rubs surface of furniture after each coat of dry finish such as stain, priming coat, varnish, or lacquer has been applied, to smooth surfaces for successive coats. For wage survey purposes, workers are to be classified as follows:

Rubber, furniture, hand

Rubber, furniture, machine

SANDER, FURNITURE, HAND

Smooths, by hand, the surfaces of wooden furniture parts before application of finishing materials. Work involves using sand or emery paper, steel wool, etc. May also use portable sanding machine to complete certain phases of work. Workers who primarily use a portable sanding machine to accomplish their duties, however, are excluded.

SANDER, FURNITURE, MACHINE

Smooths and finishes the edges and surfaces of wood furniture parts and sections on stationary sanding machines. For wage survey purposes, workers are to be classified by type of machine, as follows:

Belt

Other than belt

SPRAYER

(Spray painter)

Applies paint, varnish, lacquer, enamel or other finishes to surfaces of manufactured products for protective or decorative purposes, with a spray gun.

INSPECTION AND REPAIR

INSPECTOR, FINAL

Inspects finished furniture pieces for defects. Work involves *most of the following*: Visually examining furniture for proper finish, construction, and operation of moving parts; determining if product is acceptable for shipping or must be repaired; marking defective parts or pieces; and routing damaged pieces to appropriate department for repair. May keep records of defects or notify supervisor of problem areas. Workers who examine unfinished furniture (intermediate inspectors) are excluded.

REPAIRER, WOOD FURNITURE

Repairs or refinishes surface defects of wood furniture and/or parts. Work includes *most of the following*: Inspecting furniture for rough edges, nicks, dents, etc.; trimming and smoothing rough edges using sandpaper or portable electric sander; applying moisture and heat

to remove dents; filling cracks with putty; and gluing loose pieces.

MISCELLANEOUS

MAINTENANCE ELECTRICIAN

Performs a variety of electrical trade functions such as the installation, maintenance, or repair of equipment for the generating, distribution, or utilization of electric energy in an establishment. Work involves *most of the following*: Installing or repairing any of a variety of electrical equipment such as generators, transformers, switchboards, controllers, circuit breakers, motors, heating units, conduit systems, or other transmission equipment; working from blueprints, drawings, layout, or other specifications; locating and diagnosing trouble in the electrical system or equipment; working standard computations relating to load requirements of wiring or electrical equipment; using a variety of electrician's handtools and measuring and testing instruments. In general, the work of the maintenance electrician requires rounded training and experience usually acquired through a formal apprenticeship or equivalent training and experience.

MAINTENANCE WORKER, GENERAL UTILITY

Keeps in repair the machines, mechanical equipment and/or structure of an establishment (usually a small plant where specialization in maintenance work is impractical). Duties involve the performance of operations and the use of tools and equipment of several trades, rather than specialization in one trade or one type of maintenance work only. Work involves a *combination of the following*: Planning and laying out of work relating to repair of buildings, machines, mechanical and/or electrical equipment; repairing electrical and/or mechanical equipment; installing, aligning and balancing new equipment; repairing buildings, floors, or stairs as well as making and repairing bins, cribs, and partitions.

PACKER, FURNITURE

(Crater)

Prepares furniture or furniture parts for shipment. Performs *most of the following*: Placing units in wooden crates or corrugated cardboard cartons; arranging packing material around articles; sealing shipping containers with nails or tape; placing identifying marks or labels on containers; nailing blocks or wooden strips in crates to prevent shifting of articles; and building crates around very large pieces.

This classification does not include workers who make crates or crate parts but do not prepare furniture for shipment, or who specialize in wrapping furniture parts for shipment.

Industry Wage Studies

The most recent reports providing occupational wage data for industries included in the Bureau's program of industry wage surveys are listed below. Copies are for sale from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, or from any of its regional sales offices, and from the regional offices of the Bureau of Labor Statistics shown on the inside back cover. Bulletins that are out of stock are available for reference at leading public, college, or university libraries, or at the Bureau's Washington or regional offices.
