# Industry Wage Survey: Hotels and Motels, June-July 1988 

U.S. Department of Labor

Elizabeth Dole, Secretary
Bureau of Labor Statistics
Janet L. Norwood, Commissioner
August 1989
Bulletin 2335

## Preface

This bulletin summarizes the results of a Bureau of Labor Statistics survey of wages and related benefits of hotel and motel employees in June-July 1988. A similar study was conducted in July-September 1983.
Separate reports for each of the 18 metropolitan areas studied were issued earlier. Copies of these releases are available from the Bureau of Labor Statistics or any of its regional offices. (See table A-1 for a list of the areas surveyed.)
The study was conducted in the Bureau's Office of Compensation and Working Conditions. Norma W. Carlson in the Division of Occupational Pay and Employee Benefit

Levels reviewed and analyzed the survey data and prepared this bulletin. The Bureau's field representatives obtained the data through personal visits to a probability-based sample of establishments within the scope of the survey. Fieldwork for the survey was directed by the Bureau's Assistant Regional Commissioners for Operations.

Other industry wage survey studies are listed at the end of this bulletin along with information on how to obtain them. Material in this publication is in the public domain and, with appropriate credit, may be reproduced without permission.

## Hotels and Motels, June-July 1988

## Earnings and benefits

Average employer-paid wages of waiters and waitresses in hotels and motels ranged from $\$ 2.46$ to $\$ 5.86$ an hour among 18 metropolitan areas surveyed in June-July 1988 (table 1). ${ }^{1}$ Wages, however, usually accounted for less than one-half of the total earnings of these workers. Customer tips, which also varied widely by area, made up the remainder. Customer tips also contributed significantly to the earnings of three other occupations in the industry-waiters' and waitresses' assistants (busboys and busgirls), bellpersons, and public bartenders. ${ }^{2}$
In each area, waiter or waitress was the most populous of the tipped occupations. Though employer-paid wages of waiters and waitresses generally were lower than those paid the other three tipped occupations, customer tips contributed more to the total earnings of waiters and waitresses than to the earnings in the other jobs (see table 38). ${ }^{3}$

Separate earnings data were developed for waiters and waitresses by predominant place or type of service: Cocktail lounges, full-course restaurants, or other (including counter, tray, and room service and other than full-course restaurants). Employer-paid wages typically were highest for waiters and waitresses classified as "other." However, these servers usually averaged less in tip earnings when compared with those in cocktail lounges and full-course restaurants. Among the six areas for which all three classifications could be compared, total earnings (employer-paid wages plus tips) were highest for waiters and waitresses in full-course restaurants in Kansas City, Miami-Hialeah, and Philadelphia; highest for those in cocktail lounges in Dallas and New Orleans; and highest for "other" servers in Houston.

[^0]Employer-paid wages of waiters' and waitresses' assistants averaged between $\$ 3.63$ and $\$ 6.17$ an hour. Although these average wages were higher than those received by waiters and waitresses, customer tips were lower, accounting for onefourth or less of total hourly earnings in most areas. As a result, total earnings of waiters and waitresses exceeded those of their assistants in each of the seven areas for which comparisons could be made.
Public bartenders averaged between $\$ 3.98$ and $\$ 11.39$ an hour in employer-paid wages. In the 12 areas where information on both wages and tips was available, total earnings averaged between $\$ 6.72$ and $\$ 15.55$ an hour. Tips usually accounted for about one-third of these totals.
Customer tips also contributed substantially to the earnings of bellpersons, whose employer-paid wages averaged from $\$ 2.95$ to $\$ 7.27$ an hour. In the seven areas providing data, tips contributed between one-third and one-half of bellpersons' cash earnings.
Nine occupations not customarily tipped also were studied (text table 1). The highest paid workers were stationary engineers, with area averages ranging from $\$ 8.43$ to nearly $\$ 20$ an hour. At the other end of the pay scale in most areas were lodging quarters cleaners; their averages ranged from $\$ 3.94$ to $\$ 9.91$ an hour.
The 13 surveyed occupations, accounting for one-half to seven-tenths of total nonsupervisory, nonoffice employment in each area except Atlantic City, ${ }^{4}$ revealed differences in occupational pay patterns among the areas studied. Workers in San Francisco or New York received the highest average employer-paid wages for each of the occupations, more than twice the average in the lowest paying area. Although no single area consistently reported the lowest average wage, Houston had five jobs with the lowest average; Kansas City, three jobs; and Miami-Hialeah, three jobs.

Wage spreads for individual jobs also varied among the areas. In Detroit, for example, employer-paid wages for short-order cooks ranged from $\$ 5$ to $\$ 6.75$ an hour. The range in San Francisco was considerably wider-from $\$ 6$ to $\$ 13.50$. Similar differences in occupational wage spreads were found even within the individual areas (tables 2-37).

Among areas and occupations where comparisons could be made, employer-paid wages generally were higher in June-July 1988 than in July-September 1983. (The few

[^1]Text table 1. Ranges of employer-pald wages for selected occupations, hotels and motels, 18 metropolitan areas, June-July 1988

${ }^{1}$ Among the areas compared, one-fourth reported occupational averages the same as or more than the higher rate shown, and one-fourth reported averages the same as or less than the lower rate. Occupational data were reported by all areas except for other waiters' and waitresses' assistants and service bar-
tenders, each with 16 areas reporting; and short-order cooks and stationary engineers, each with 15 areas reporting. Checkout cashiers are not shown because only 6 areas reported publishable data.
declines were concentrated in tipped occupations.) Increases in average wage levels varied widely by area and occupation. Within individual occupations, median increases in area wage levels, however, typically ranged between 12 and 20 percent (text table 2). ${ }^{5}$ The wage and salary component of the Bureau's Employment Cost Index for service workers rose 21 percent over approximately the same 5 -year period.
Paid holidays, commonly 6 to 9 days annually, were provided to at least nine-tenths of the full-time nonsupervisory, nonoffice workers in all areas except Detroit, where four-fifths received paid holidays (table 41). Provisions were somewhat better in New York, where three-fourths of the workers received 10 or 11 days, and in Washington, where slightly over one-third received 10 days. ${ }^{6}$ In Denver and Oakland, on the other hand, two-fifths of the workers received fewer than six full days annually.

Virtually all full-time workers were in hotels and motels providing paid vacations after qualifying periods of service (table 42). Typical vacation provisions were 1 week of pay after 1 year of service, 2 weeks after 2 years, and 3 weeks

[^2]after 8 or 10 years. A majority of the workers in 12 areas could receive at least 4 weeks of vacation pay after 20 years of service.

Workers usually were offered a variety of insurance and health plans in most areas studied (table 43). The typical benefits included life insurance; hospitalization, surgical, and medical insurance; sickness and accident insurance and/or sick leave; dental insurance; and drug abuse treatment plans. With a few exceptions-New York, Oakland, and San Francisco-vision and hearing care plans generally were not available to a majority of the workers. Long-term disability insurance, the least common of the benefits studied, applied to one-fourth or less in all areas.

As part of these benefit offerings, membership in health maintenance organizations (HMO's) was available to at least one-half of the workers in eight areas. In 3 of the 8-Los Angeles, Oakland, and San Francisco-the proportions were four-fifths or more. Table 44 presents the proportions of workers participating in HMO's, as well as the other health care plans.

The extent of employee participation in funding the various health plans and life, accidental death and dismemberment, and sickness and accident insurance varied by area. In Atlantic City, New York, Oakland, and San Francisco, the employer typically paid the full cost of the plans. Jointly funded plans were more common in the remaining areas. The

[^3]cost of long-term disability insurance, a benefit with a relatively low incidence, often was paid wholly by the employer.
Retirement plans (pensions other than Social Security) covered at least nine-tenths of the workers in Atlantic City, New York, and San Francisco; between three-fifths and onehalf of those in eight other areas; and one-third to two-fifths in the remaining seven areas (table 43). Pension plans providing lifetime annuities were available to a majority of the workers in nine areas; in two areas, Detroit and Oakland, all of the plans were paid for entirely by the employers. Lump-sum retirement plans, reported in 15 areas, covered two-fifths of the workers in Dallas; about one-fifth in Denver, Houston, Kansas City, and Philadelphia; and less than onetenth in 8 of the remaining 10 areas. None of these lumpsum plans required employee contributions.
Information on meal provisions was obtained separately for seven occupations: Public bartenders, waiters and waitresses in cocktail lounges and in full-course restaurants, waiters' and waitresses' assistants in full-course restaurants, kitchen helpers, restaurant cooks, and room clerks. For each of these jobs, employers generally provided at least one free meal daily to a majority of the workers (table 45). In San Francisco, three-fifths or more of the workers in each job except room clerk received at least two meals a day.

About four-fifths of the full-time workers in the survey were
covered by formal provisions for jury-duty and funeral-leave pay (table 46). Severance pay in the event of job loss was reported in 14 of the 18 areas. In New York, nearly two-fifths of the employees were covered by severance pay plans; in Dallas, Houston, and Philadelphia, the proportion slightly exceeded one-fifth; and it dropped to under one-tenth in most of the remaining areas that reported severance pay plans.
When employees were required to wear uniforms, employers most often furnished and cleaned the uniforms (table 46). In Atlanta and Houston, however, approximately half of the workers were in establishments that only furnished uniforms.

## Industry characteristics

This 18-area study covered hotels, motor hotels, motels, and tourist courts primarily engaged in providing lodging, or lodging and meals, to the general public. This survey included establishments which were in operation for 9 months or more a year and employed at least 20 workers. In Atlantic City, hotel-motel establishments deriving most of their revenue from gambling operations were also included.
The 2,000 hotels and motels within the scope of the survey had a total work force of 316,112 workers (table A-1). Full-time nonsupervisory, nonoffice employees accounted for seven-tenths of these workers. In June-July 1988, nearly onehalf of the total work force was concentrated in 5 of the 18 areas-Atlantic City, with approximately 48,000 workers, New York $(34,000)$, Washington $(25,000)$, Chicago $(24,000)$, and Los Angeles-Long Beach $(25,000)$. Total employment in the remaining areas ranged from about 19,000 in Atlanta to 4,000 in Oakland.

Since a similar study in 1983, hotel and motel employment increased in 12 of the 14 areas for which comparisons could be made. The largest gains were in Atlantic City and Boston; in both these areas, total employment in 1988 was more than 50 percent higher than that reported 5 years earlier. Small decreases were recorded in Chicago and Houston.

Full- and part-time food service employees (including bar, kitchen, restaurant, and room service workers) accounted for one-third of the nonsupervisory, nonoffice work force in the survey. Other full- and part-time workers accounted for the remaining two-thirds.

Part-time employees made up 14 percent of all nonsupervisory, nonoffice employees. As shown in table 47, the proportion of part-time workers varied from less than 10 percent in Atlantic City, Dallas, Miami-Hialeah, and San Francisco to between 25 and 30 percent in Boston, Philadelphia, Detroit, and Oakland.
Weekly work schedules of 40 hours were in effect for almost one-half or more of the full-time workers in 14 of the 18 areas (table 39). In Atlantic City and New York, a 35 -hour week prevailed; a 37.5 -hour week was the most common schedule in Oakland and San Francisco. In Los AngelesLong Beach, most of the workers were covered by 37.5 -or 40-hour schedules.
Information on scheduled weekly hours was collected
separately for four occupations: Bellpersons, kitchen helpers, room cleaners, and waiters and waitresses (table 40). In all but four areas, the proportion of waiters and waitresses working fewer than 35 hours a week was greater than that for each of the other three jobs. In Atlanta, Kansas City, and San Diego, about one-half of the waiters and waitresses were scheduled to work less than 35 hours weekly; at the other extreme-in Atlantic City, Miami-Hialeah, Oakland, and San Francisco-the proportion dropped to less than one-tenth.
The hotels and motels included in the study varied widely in size. While the larger establishments (those with at least 500 workers) accounted for 36 percent of total nonsupervisory, nonoffice employees covered by the survey, they constituted only 5 percent of the total facilities. Smaller hotels and motels (those with fewer than 100 workers) accounted for 60 percent of the facilities but only 16 percent of the work force.
In all but one area (Atlanta), nine-tenths or more of the
workers surveyed were in hotels and motels with eating facilities. These facilities were usually operated by the hotels and motels, but in each area, a small proportion of the workers were in establishments that contracted out the restaurant or other eating facility.

Slightly fewer than half of all the nonsupervisory, nonoffice employees were in hotels and motels with collective bargaining agreements covering a majority of such workers (table 47 ). The proportions varied from at least four-fifths in Atlantic City and New York to less than one-tenth in Atlanta, Dallas, and Kansas City. No hotel or motel studied in the Houston area operated under a labor-management agreement. The Service Employees' International Union and the Hotel and Restaurant Employees Union, both AFL-CIO affiliates, were the major unions in all areas except New York, where the New York Hotel and Motel Trades Council (afl-cio) was predominant.

${ }^{1}$ Excludes tips and the value of meals, rooms, and uniforms, if provided, and premium pay for overtime and for work on weekends, holidays, and late shifts. Service charges added to cus
omers bilis and distributed by the employer to the employees are included.
${ }_{3}^{2}$ For definitions of areas, see appendix A, table A-1, footnote 2.
${ }^{3}$ The payroll month of reference was June 1988 for all areas except Boston, Los AngelesLong Beach, Oakland, San Diego, and San Francisco. For these five areas, July 1988 was the payroll reference month so that data reflect changes in State minimum wage laws which were ef-
fective July $1,1988$.
4 Includes counter, tray, and room service and other than full-course restaurants.
5 Includes cocktail lounges, counters, and other than full-course restaurants.
NOTE: Dashes indicate that no data were reported or that data did not meet publication criteria. Overall data may include information for subclassifications not shown separately.

${ }^{1}$ Employer-paid wages plus estimated hourly tips. Excludes premium pay for overtime and
for work on weekends, holidays, and late shifts; also excludes the value of meals, rooms, and for work on weekends, holidays, and late shift
uniforms provided in addition to cash wages.
2 ins in in in procedures used in estimating tips, see workers for
procedures used in estimating tips, see appendix $A$.
${ }_{4}$ For definitions of areas, see appendix A, table A-1, footnote 2.
4he payroll month of reference was June 1988 for all areas except Boston. For this area, July 1988 was the payroll reference month so that data reflect changes in the State
minimum wage law which were effective July 1, 1988.
${ }^{5}$ Includes counter, tray, and room service and other than full-course restaurants.

- Includes cocktail lounges, counters, and other than full-course restaurants.

NOTE: Dashes indicate that no data were reported or that data did not meet publication criteria. Data for Los Angeles-Long Beach, Oakland, San Diego, and San Francisco did not meet publication criteria.

[^7]Table 42. Paid vacations-Continued
(Percent of full-time nonsupervisory, nonoffice workers in hotels and motels with formal provisions for paid vacations after selected periods of service, 18 metropolitan areas, ${ }^{1}$ June-July $1988^{2}$ )

${ }^{1}$ For definitions of areas, see appendix A, table A-1, footnote 2.
${ }^{2}$ The payroll month of reference was June 1988 for all areas except Boston, Los Angeles-Long Beach, Oakland, San Diego, and San Francisco. For these five areas, July 1988 was the payroll reference month so that data reflect changes in State minimum wage laws which were effective July 1 , erence
1988.
${ }_{3}$ Vacation payments, such as percent of annual earnings, were converted to an equivalent time basis. Periods of service were chosen arbitrarily and do not necessarily reflect individual establish-
ment provisions for progression. For example, changes indicated at 20 years may include changes that occurred between 15 and 20 years.
${ }_{4}^{4}$ Less than 0.5 percent.
${ }^{5}$ Vacation provisions were virtually the same after longer periods of service.
NOTE: Because of rounding, sums of individual items may not equal totals. Dashes indicate that no data were reported.

[^8]${ }^{3}$ Data relate to the percent of food service and other nonsupervisory, nonoffice employees in each area in establishments where labor-management contracts covered a majority of such workers. NOTE: Because of rounding, sums of individual items may not equal totals. Dashes indicate no data.

# Appendix A. Scope and Method of Survey 

## Scope of survey

The survey included hotels, motels, motor hotels, and tourist courts engaged in providing lodging, or lodging and meals, to the general public and which are in operation 9 months or more a year (part of industry 7011, and in Atlantic City, part of industry 7999, as defined in the 1972 edition of the Standard Industrial Classification Manual prepared by the U.S. Office of Management and Budget). Seasonal hotels and motels, and separate auxiliary units, such as central offices and warehouses, were excluded.

Establishments studied were selected from those employing 20 workers or more at the time of reference of the data used in compiling the universe lists. Table A-1 shows the number of establishments and workers estimated to be within the scope of the survey, as well as the number actually studied by the Bureau.

## Method of study

Data were obtained by personal visits of the Bureau's field representatives to a probability-based sample of establishments within the scope of the survey. To obtain appropriate accuracy at minimum cost, a greater proportion of large than of small establishments was studied. In combining the data, each establishment was given an appropriate weight. All estimates are presented, therefore, as relating to all establishments in the industry, excluding only those below the minimum size at the time of reference of the universe data.

## Establishment definition

An establishment is defined for this study as a single physical location where business is transacted. An establishment is not necessarily identical with a company, which may consist of one establishment or more.

## Employment

Estimates of the number of workers within the scope of the study are intended as a general guide to the size and composition of the labor force, rather than as precise measures of employment.

## Tipped employees

For the purposes of this survey, certain workers who customarily and regularly receive tips were designated as "tipped employees." Under the Fair Labor Standards Act (FLSA), "tipped employee" refers to any employee engaged in an occupation in which he or she customarily and regularly receives more than $\$ 30$ a month in tips. Tips received by such an employee may be counted as part of wages in an amount up to 40 percent ( $\$ 1.34$ ) of the current $\$ 3.35$-perhour Federal minimum wage. The employer must inform tipped employees about this tip credit allowance before using the credit, and the employee must be allowed to retain all tips (individually or through a pooling arrangement ${ }^{1}$ ). Also, the employer must be able to show that the employee receives at least the minimum wage in the combination of both wages and tips. The cost or fair value of providing meals and lodging may also be considered in meeting minimum wage requirements.

## Occupational classification

Occupational classification was based on a uniform set of job descriptions designed to take account of interestablishment and interarea variations in duties within the same job. (See appendix B for these descriptions.) The criteria for selection of the occupations were the numerical importance of the occupation and appropriate representation of the entire job scale in the industry. Working supervisors, apprentices, learners, beginners, trainees, and handicapped, temporary, and probationary workers were not reported in the data for selected occupations. However, part-time workers employed on a regular basis were classified if they matched one of the job descriptions.

## Part-time employees

Regular part-time employees are hired to work fewer weekly hours than the establishment's full-time employees in the same general type of work. The determination was based on the employer's distinction between the two groups.

1 The payroll month of reference was June 1988 for all areas except Boston, Los Angeles-Long Beach, Oakland, San Diego, and San Francisco. For these five areas, July 1988 was the payroll reference month so that data reflect changes in State minimum wage laws which were effective July 1, 1988.
${ }^{2}$ The areas are defined as follows: NORTHEAST: Atlantic CityAtlantic and Cape May Counties; Boston-Suffolk County, 3 communities in Bristol County, 4 in Essex County, 44 in Middlesex County, 26 in Norfolk County, 16 in Plymouth County, and 9 in Worcester County; New York-New York City (Bronx, Kings, New York, Queens, and Richmond Counties) and Putnam, Rockland, and Westchester Counties; Philadelphia-Bucks, Chester, Delaware, Montgomery, Philadelphia, Counties, PA; and Burlington, Camden, and Gloucester Counties, NJ; SOUTH: Atlanta-Barrow, Butts, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Fulton, Gwinnett, Henry, Newton, Paulding, Rockdale, Spalding and Walton Counties;Dallas-Collin, Dallas, Denton, Ellis, Kaufman, and Rockwell Counties, TX; HoustonFort Bend, Harris, Liberty, Montgomery, and Waller Counties, TX;

Miami-Hialeah-Dade County;Washington-District of Columbia; Calvert, Charles, Frederick, and Prince George's Counties, MD; and Alexandria, Fairfax, Falls Church, Manassas, and Manassas Park Cities, and Arlington, Fairfax, Loudoun. Prince William, and Stafford Counties, VA; MIDWEST: Chicago-Cook, Du Page, and McHenry Counties; De-troit-Lapeer, Livingston, Macomb, Monroe, Oakland, St. Clair, and Wayne Counties;Kansas City-Cass, Clay, Jackson, Lafayette, Platte, and Ray Counties, MO; and Johnson, Leavenworth, Miami, and Wyandotte Counties, KS; and WEST: Denver-Adams, Arapahoe, Denver, Douglas, and Jefferson Counties; Los Angeles-Long Beach-Los Angeles County; Oakland-Alameda and Contra Costa Counties; San Diego-San Diego County; and San Francisco-Marin, San Francisco, and San Mateo Counties.
${ }^{3}$ Includes only establishments with 20 workers or more at the time of reference of the universe data.
${ }^{4}$ Data relate to total employment in establishments actually visited.
${ }^{5}$ Includes executive, professional, office, and other workers in addition to the nonsupervisory, nonoffice category shown separately.

## Wage data

Information on wages relates to employer-paid straighttime hourly wages, excluding premium pay for overtime and for work on weekends, holidays, and late shifts. Also excluded are tips and the value of free rooms, meals, and uniforms for employees receiving such perquisites, as well as performance bonuses and lump-sum payments of the type negotiated in the auto and aerospace industries, profit-sharing payments, attendance bonuses, Christmas or year-end bonuses, and other nonproduction bonuses. Cost-of-living increases and service charges added to customers' bills and distributed by employers to their employees were included as part of the employee's regular pay. For selected "tipped" occupations, average hourly earnings, including employer-
paid wages and tip earnings, are presented. Also shown are the estimated percentages of all cash earnings received as tips.

Average (mean) hourly rates or earnings for each occupation were calculated by weighting each rate (or hourly earnings) by the number of workers receiving the rate, totaling, and dividing by the number of individuals. The hourly earnings of salaried workers, if any, were obtained by dividing straight-time salary by normal (or standard) hours to which the salary corresponds.
The median designates position; that is, one-half of the employees surveyed received more than this rate and one-half received less. The middle range is defined by two rates of pay such that one-fourth of the employees earned less than the lower of these rates and one-fourth earned more than the higher rate.

## Customer tips

Estimates of customer tips refer to establishment averages for tipped workers in specified job categories. These estimates were obtained from information provided by establishment officials, usually after determining the tipping pattern for the occupational groups and facilities involved. In the process, account was taken of tipping and nontipping customers, variations in tipping patterns among the different serving locations (e.g., lunch counters, dining rooms, or bars), as well as such informal practices as the sharing of tips with other employees, including waiters' and waitresses' assistants.
One of the common procedures used to obtain estimates of average hourly tips for the various waiter and waitress categories and public bartenders was to (1) multiply the appropriate weekly receipts from the sale of food and drinks by the employer's estimate of the average percent tip per customer bill, (2) sum these products, and (3) divide by the total weekly hours worked by all employees in the specific job category. The tips for waiters' and waitresses' assistants were frequently determined in relation to those of the waiters and waitresses with whom they worked. Similar procedures were used to derive average hourly tip estimates for bellpersons by obtaining the number of guests accompanied to and from their rooms and the number of room service requests during a week.
Payments which were not considered tips included compulsory service charges which are distributed to employees, and amounts distributed by employers providing banquet facilities where the amount paid is set in negotiations between the customer and the employer.
The published estimates were based on only those workers for whom tip information was obtained.

## Metropolitan areas

The term "metropolitan areas," as used in this bulletin, refers to Metropolitan Statistical Areas (MSA's) or Primary Metropolitan Statistical Areas (PMSA's), as defined by the U.S. Office of Management and Budget through October 1984. In general, an MSA or PMSA is defined as a county or group of contiguous counties which contains at least one central city of at least 50,000 inhabitants or a central urbanized area of at least 100,000 . Counties contiguous to the one containing such a city or area are included in an MSA if, according to certain criteria, they are essentially metropolitan in character and are socially and economically integrated with the central city. In New England, where the city and town are administratively more important than the county, they are the units used in defining MSA's.

## Scheduled weekly hours

Data on weekly hours refer to the predominant work schedule for full-time nonsupervisory, nonoffice employees.

## Employee benefits

Employee benefits in an establishment were considered applicable to all nonsupervisory, nonoffice workers if they applied to half or more of such workers in the establishment. Similarly, if fewer than half of the workers were covered, the benefit was considered nonexistent in the establishment. Because of length-of-service and other eligibility requirements, the proportion of workers receiving the benefits may be smaller than estimated.

Paid holidays. Paid holiday provisions relate to full-day and half-day holidays provided annually.

Paid vacations. The summary of vacation plans is limited to formal arrangements and excludes informal plans whereby time off with pay is granted at the discretion of the employer or supervisor. Payments not on a time basis were converted; for example, a payment of 2 percent of annual earnings was considered the equivalent of 1 week's pay. The periods of service for which data are presented represent the most common practices, but they do not necessarily reflect individual establishment provisions for progression. For example, changes in proportions indicated at 20 years of service may include changes which occurred between 15 and 20 years.

Insurance, health, and retirement plans. Data are presented for insurance, health, and retirement plans for which the employer pays all or a part of the cost. The benefits may be underwritten by a commercial insurance company, paid directly by an employer or union from current operating funds or from a fund set aside for this purpose, or provided by a health maintenance organization (HMO). Workers provided the option of an insurance plan or an HMO are reported under both types of plans. Legally required plans such as Social Security, workers' disability compensation, and temporary disability insurance are excluded. ${ }^{2}$.
Life insurance includes formal plans providing indemnity (usually through an insurance policy) in case of death of the covered worker. Accidental death and dismemberment insurance is limited to plans which provide benefit payments in case of death or loss of limb or sight as a direct result of an accident.

[^10]Tabulations of paid sick leave plans are limited to formal plans ${ }^{3}$ which provide full pay or a proportion of the worker's pay during absence from work because of illness; informal arrangements have been omitted. Separate tabulations are provided for (1) plans which provide full pay and no waiting period, and (2) plans providing either partial pay or a waiting period.
Long-term disability insurance plans provide payments to totally disabled employees upon the expiration of sick leave, sickness and accident insurance, or both, or after a specified period of disability (typically 6 months). Payments are made until the end of disability, a maximum age, or eligibility for retirement benefits. Payments may be full or partial, but are almost always reduced by Social Security, workers' disability compensation, and private pension benefits payable to the disabled employee.
Hospitalization, surgical, and medical insurance plans provide at least partial payment for: 1) hospital room charges; 2) inpatient surgery; and 3) doctors' fees for hospital, office, or home visits. These plans also typically cover other expenses such as outpatient surgery and prescription drugs.

An нмо provides comprehensive medical care in return for preestablished fees. Unlike insurance, HMO's cover routine preventive care as well as care required because of an illness and do not have deductibles or coinsurance (although there may be small fixed copayments for selected services). hmo's may provide services through their own facilities; through contracts with hospitals, physicians, and other providers, such as individual practice associations (IPA's); or through a combination of methods.

Dental care plans provide at least partial payment for routine dental care, such as checkups and cleanings, fillings, and X-rays. Excluded are plans which cover only oral surgery or care required as the result of an accident.
Vision care plans provide at least partial payment for routine eye examinations and/or eyeglasses. Plans which restrict benefits to certain kinds of surgery or care required as a result of an accident are not reported.
Hearing care plans provide at least partial payment for hearing examinations, hearing aids, or both.
Alcohol and drug abuse treatment plans provide at least partial payment or institutional treatment (in a hospital or

[^11]specialized facility) for addiction to alcohol or drugs.
Tabulations of retirement pensions are limited to plans which provide regular payments for the remainder of the retiree's life. Data are presented separately for lump-sum retirement plans (one payment or several over a specified period of time) made to employees on retirement. Establishments providing both lump-sum payments and pensions were included in data for each, but establishments having optional plans providing employees a choice of either lump-sum payments or pensions were considered as having only pension benefits.

Health plan participation. Data relate to the proportion of nonsupervisory, nonoffice workers participating in selected health care plans. A plan is included even though it is only offered to a minority of employees, or a majority of the employees in an establishment do not choose to participate in it.

Paid funeral and jury-duty leave. ${ }^{4}$ Formal plans which provide at least partial payment for time lost as a result of attending funerals of specified family members or serving as a juror.

Military leave. Formal plans which provide excused absence from work with full or partial pay while on annual training duty. Plans that provide paid leave only for temporary emergency duty are excluded.

Severance pay. Formal plans providing for payments to employees permanently separated through no fault of their own for such reasons as technological change or closing or scaling down all or part of the establishment.

Uniform allowances. Data relate to establishment provisions for uniforms, or laundering of uniforms, or both, or monetary allowances in lieu of such provisions, covering a majority of employees who are required to wear uniforms in the occupations surveyed.

Meal provisions. Information relates to the number of daily meals provided to employees in the selected occupations without charge or at reduced price to the employees.

[^12]
## Appendix B. Occupational Descriptions

The primary purpose of preparing job descriptions for the Bureau's wage surveys is to assist its field representatives in classifying into appropriate occupations workers who are employed under a variety of payroll titles and different work arrangements from establishment to establishment and from area to area. This permits the grouping of occupational wage rates representing comparable job content. Because of this emphasis on interestablishment and interarea comparability of occupational content, the Bureau's job descriptions differ significantly from those used in individual establishments or those prepared for other purposes. In applying these job descriptions, the Bureau's field representatives were instructed to exclude working supervisors, apprentices, learners, beginners, trainees, and handicapped, temporary, and probationary workers. However, part-iime workers employed on a regular basis were included if they matched one of the job descriptions.
The titles and 4-digit codes below the job titles in this appendix are taken from the 1980 edition of the Standard Occupational Classification Manual (SOC), issued by the U.S. Department of Commerce, Office of Federal Statistical Policy and Standards.
In general, the Bureau of Labor Statistics occupational descriptions are much more specific than those found in the soc manual. Therefore, in comparing the results of this survey with other sources, differences in occupational definitions should be taken into consideration.

## Food Services

## Bartender

## (5212: Bartender)

Mixes and serves alcoholic and nonalcoholic drinks, following standard recipes. Serves wines and draught or bottled beer. May collect money for the drinks served; order or requisition ingredients and supplies; arrange bottled goods and glasses about the bar to create an attractive display; or wash glasses, bar, and equipment.
For purposes of this study, bartenders were classified according to whether they primarily worked at a service bar, preparing drinks to be served in guestrooms or dining rooms; or at a public bar, serving drinks directly to customers, as follows:

Public bar<br>Service bar

## Kitchen helper

(5217: Kitchen worker, food preparation)
(5219: Miscellaneous food and beverage preparation occupation)

Performs any combination of the following duties to maintain kitchen work areas and restaurant equipment and utensils in a clean and orderly condition: Sweeps and mops floors; washes worktables, walls, refrigerators, and meat blocks; segregates and removes trash and garbage; washes pots, pans, and trays by hand; scrapes food from dirty dishes and washes them by hand or places them in racks or on conveyor to dishwashing machine; places silver in revolving burnishing-machine tumbler, dips it in chemical solutions, holds it against buffing wheel, and rubs it with cloth to remove tarnish and restore luster; and transfers supplies and equipment between storage and work areas by hand or handtruck.

## Restaurant cook

(5214: Cook, except short order)
Performs any combination of the following duties to prepare and cook soups, meats, vegetables, desserts, and other foodstuffs for consumption in hotels, motels, and restaurants: Washes, peels, cuts, and shreds vegetables and fruits to prepare them for use; cuts, trims, and bones meat prior to cooking; bakes breads, rolls, cakes, and pies; and carves meats, portions food on serving plates, adds gravies and sauces, and garnishes servings to fill orders.

May be designated according to meal cooked or shift worked, such as dinner cook; or according to food item prepared, such as roast cook; or according to method of cooking, such as broiler cook. May substitute for and relieve or assist other cooks during emergencies or rush periods; or supervise other kitchen workers.

Second cooks were excluded when the term referred to a sous chef who acts as assistant to the chef, executive chef, or supervising chef.

## Short order cook

(5215: Short order cook)
Prepares and cooks to order all kinds of foods which require only a short time to prepare. May carve meats and fill orders from a steamtable; prepare sandwiches; prepare salads
and beverages; and serve meals to patrons over the counter. May be designated according to type of food prepared, such as griddle or fry cook.

## Waiter or waitress

(5213: Waiter and waitress)
Serves food and/or beverages to patrons: Presents menu, answers questions, and makes suggestions regarding food and service; writes order on check or memorizes it; relays order to kitchen; serves courses from kitchen or service bars; and fulfills any additional requests. When meal has been completed, totals bill and accepts payment or refers patron to cashier. May ladle soup, toss salads, portion pies and desserts, brew coffee, and perform other services as determined by establishment's size and practices. May clear and reset counters or tables at conclusion of each course.

Excluded were extra meal waiters, banquet waiters, captains, and headwaiters. Also excluded were those whose primary duties are heating or cooking prepared foods, such as sandwiches, steaks, chops, cutlets, and eggs, even though they also serve the food (see Short order cook).

For the purposes of this study, waiters and waitresses were classified according to their predominant place of service, as follows:

## Cocktail lounges <br> Full-course restaurants <br> Other (including counter, tray, and room service, and other than full course)

## Waiters' and waitresses' assistant

(Busperson)
(5218: Waiters'/waitresses' assistant)
Performs such tasks as clearing tables, replacing soiled table linens with clean linens, replenishing butter and bread servings for guests, filling water glasses, and bringing clean silverware to dining room. May sweep and clean the dining room, dust furniture and fixtures or perform other tasks such as washing dishes, setting tables, and cleaning and polishing silverware.
For purposes of this study, waiters' and waitresses' assistants were classified according to their predominant place of service, as follows:

## Full-course restaurants <br> Other (including cocktail lounges, counters, and other than full course)

NOTE: A full-course restaurant is defined as a dining facility where full-course meals are available for at least the midday or evening meal and the major portion of sales from food and drink is derived from table service, as opposed to counter service. Thus, coffee shops serving only short orders are not considered full-course restaurants, even though the
majority of sales is derived from table service. Similarly, cocktail lounges, night clubs, or supper clubs serving only drinks, or short orders or both, are not considered full-course restaurants. A full-course meal typically consists of a salad or appetizer, an entree, dessert, and beverage.

## Other Services

## Bellperson

(5262: Baggage porter and bellhop)
Escorts guests to rooms, carrying hand luggage; switches on lights and inspects room to insure that everything is in order. Performs personal services for guests, such as running errands, delivering packages, and supplying information about hotel services. May assist departing guests with luggage. Notifies bell captain of unusual occurrences about hotel or motel. May perform other duties, such as paging guests, and keeping lobby tidy.
Excluded were head bellpersons and bell captains. Also excluded were persons who drive vans that transport guests to and from airports or other facilities and the hotel or motel.

## Checkout cashier

(4643: Hotel clerk)
Receives payment from guests as they check out of the hotel or motel. Retrieves statement of charges from file or on a computer console, presents statement to guest, and receives payment. May verify credit card or check transactions or answer simple questions about charges. Workers who register, assign, and reassign rooms for guests were classified as Room clerk even though they also serve as checkout cashier.

## House porter

(5244: Janitor and cleaner)
Maintains premises in clean and orderly manner. Duties include one or more of the following: Cleaning hallways, lobbies, and public lavatories; washing walls and ceilings; cleaning carpets and furniture; and moving and arranging furniture. Excluded were workers who specialize in floor waxing or window cleaning.

## Lodging quarters cleaner

(Room maid; room attendant)
(5242: Maid and houseman)
Performs routine duties, such as cleaning, dusting, and servicing of guests' rooms, under close supervision of housekeeper. May also clean baths.

## Room clerk

(4643: Hotel clerk)
Registers and assigns incoming guests to rooms and checks
out departing guests. Arranges transfer of registered guests to other rooms. Among smaller hotels and motels, workers are frequently assigned such additional duties as maintaining room records, including reservations; furnishing information to guests; distributing mail and telegrams; and receiving payment for rooms.

## Malntenance

## General maintenance worker

(6179: Mechanic and repairer, not elsewhere classified)
Performs general maintenance and repair of building structures and their mechanical, electrical, or sanitary systems. May also perform general maintenance and repair of machinery. Work requires a basic practical knowledge of several maintenance trades in order to perform most of the following: Keeping in good repair building woodwork; replacing electrical switches, fixtures, and motors; occasional painting or touching up of structure or equipment; repairing or replacing plumbing fixtures; and replacing broken window panes.
Excluded were positions that require a formal apprenticeship or equivalent training in one or more crafts. Also
excluded were workers participating in such a program.

## Stationary engincer

(6931: Stationary engineer)
Operates and maintains one or more systems which provide heat, air-conditioning (cool, humidify, dehumidify, filter, and circulate air), refrigeration, steam or hightemperature water, or electricity. Duties ihvolve: Observing and interpreting readings on gauges, meters, and charts which register various aspects of the system's operation; adjusting controls to insure safe and efficient operation of the system and to meet demands for the service provided; recording in logs various aspects of the system's operation; and keeping the engines, machinery, and equipment of the system in good working order. May direct and coordinate the activities of other workers (not stationary engineers) in performing tasks directly related to operating and maintaining the system or systems.

Excluded were head or chief engineers in hotels or motels employing more than one engineer; workers required to be skilled in the repair of electronic control equipment; and workers in establishments producing electricity, steam, or heated or cooled air primarily for sale; and boiler tenders.

## Industry Wage Survey Bulletins

The most recent reports providing occupational wage data for industries currently included in the Bureau's program of industry wage surveys are listed below. Bulletins still in print are for sale from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, or from the Bureau of Labor Statistics, Publications Sales Center, P.O. Box 2145, Chicago, Ill. 60690. Order by title and GPO Stock Number. Bulletins that are out of print, marked with an asterisk (*), are available for reference at leading public, college, or university libraries or at the Bureau's Washington or regional offices.

Lab-441

[^0]:    ${ }^{1}$ See appendix A for scope and method of survey and for definitions of terms used in this report. Except where specifically noted, wage data in this bulletin exclude tips and the value of free meals, rooms, and uniforms, if any were provided, and premium pay for overtime and for work on weekends, holidays, and late shifts. Service charges added to customers' bills and distributed by employers to employees were considered as wages, rather than tips, and were included.
    The term "metropolitan areas," as used in this bulletin, refers to Metropolitan Statistical Areas or Primary Metropolitan Statistical Areas as defined by the U.S. Office of Management and Budget through October 1984.
    ${ }^{2}$ For purposes of this survey, "tipped employees" include waiters and waitresses and their assistants, bellpersons, and public bartenders. The Fair Labor Standards Act (FLSA) defines "tipped employees" as those who customarily and regularly receive more than $\$ 30$ a month in tips. Under the provisions of FLSA, an employer may credit tips actually received by employees up to 40 percent of the applicable minimum wage. Employers may also credit the cost, or fair value, of providing meals and lodging in meeting minimum wage requirements.
    ${ }_{3}{ }_{3}$ or occupational descriptions, see appendix B.
    ${ }^{3}$ See the section in appendix A, "Customer tips," for the method used to estimate average tips for selected jobs.

[^1]:    ${ }^{4}$ In Atlantic City, the proportion was about one-third, reflecting the large number of workers involved in gaming operations not represented by the survey jobs.

[^2]:    ${ }^{5}$ For an account of the earlier study, see Industry Wage Survey: Hotels and Motels, July-September 1983, BLS Bulletin 2227 (1985). Comparisons of 1983 and 1988 survey findings are affected by new definitions of metropolitan areas introduced by the U.S. Office of Management and Budget. In some instances, the changes precluded comparisons over time (see text table 2, note 2).
    ${ }^{6}$ Hereafter, the terms "workers" or "work force" refer to full-time nonsupervisory, nonoffice workers.

[^3]:    Among the areas compared, one-half reported changes in em-ployer-paid wages at the same or higher than the percent shown and one-half reported changes at the same orlower than the percent shown.
    ${ }_{2}$ Changes in employer-paid wages were compared for 14 of the 18 areas. Two areas in the 1983 study (Dallas-Fort Worth and San Francisco-Oakland) were redefined as four separate areas by the Office of Management and Budget. Of these, Dallas, Oakland, and San Francisco were studied in 1988. Also, in 1988, San Diego was added to the survey areas.

[^4]:    See footnotes at end of table.

[^5]:    ${ }^{1}$ The Philadelphia metropolitan area consists of Bucks, Chester, Delaware, Montgomery, and Philadelphia Counties, PA; and Burlington, Camden, and Gloucester Counties, NJ .
    ${ }^{2}$ Excludes tips and the value of meals, rooms, or uniforms, if provided, and premium pay for overtime and for work on weekends, holidays, and late shifts. Service charges added to customers' bills and distributed by the employer to the employees are included.

    3 Virtually all men.
    4 Workers were distributed as follows: 2 percent were at $\$ 3.50$ and under $\$ 3.75$; 2 percent at $\$ 3.75$ and under $\$ 4$; 5 percent at $\$ 4$ and under $\$ 4.25$; and 1 percent at $\$ 4.25$ and under $\$ 4.50$.

[^6]:    ${ }^{1}$ The Dallas metropolitan area consists of Collin, Dallas, Denton, Ellis, Kaufman, and Rockwall Counties.
    ${ }^{2}$ Excludes tips and the value of meals, rooms, or uniforms, if provided, and premium pay for overtime and for work on weekends, holidays, and late shifts. Service charges added to customers' bills and distributed by the employer to
    the employees are included.
    ${ }^{3}$ Less than 0.5 percent.

    - Virtually all women.

[^7]:    See footnotes at end of table.

[^8]:    For definition of areas, see appendix A, table A-1, footnote 2
    ${ }^{2}$ The payroll month of reference was June 1988 for all areas except Boston, Los Angeles-Long Beach, Oakland, San Diego, and San Francisco. For these five areas, July 1988 was the payroll reference month so that data reflect changes in State minimum wage laws which were effective July 1 , 1988.

[^9]:    ${ }^{1}$ Tip pools are formal arrangements usually defined by management, where tipped employees contribute a specified amount of their tips to a fund for distribution among themselves, to others (noncontributors), or both.

[^10]:    ${ }^{2}$ Temporary disability insurance which provides benefits to covered workers disabled by injury or illness which is not work-connected is mandatory under State laws in California, New Jersey, New York, and Rhode Island. Establishment plans which meet only the legal requirements are excluded from these data, but those under which (1) employers contribute more than is legally required or (2) benefits exceed those specified in the State law are included. In Rhode Island, benefits are paid out of a State fund to which only employees contribute. In each of the other three States, benefits are paid either from a State fund or through a private plan.

    State fund financing: In California, only employees contribute to the State fund; in New Jersey, employees and employers contribute; in New York, employees contribute up to a specified maximum and employers pay the difference between the employees' share and the total contribution required.
    Private plan financing: In California and New Jersey, employees cannot be required to contribute more than they would if they were covered by the State fund; in New Yörk, employees can agree to contribute more if the State rules that the additional contribution is commensurate with the benefit provided.

[^11]:    ${ }^{3}$ An establishment is considered as having a formal plan if it specifies at least the minimum number of days of sick leave available to each employee. Such a plan need not be written, but informal sick leave allowances determined on an individual basis are excluded.

[^12]:    4. When paid jury-duty leave is required by law, as it is in Alabama, Nebraska, Tennessee, parts of Florida, and Massachusetts, plans are included only if the employer provides the employees with benefits exceeding the legal requirement.
