## BULLETIN

OF THE

## BUREAU OF LABOR.

WASHINGTON.
March, 1909.

## WHOLESALE PRICES, 1890 TO 1908.

## INTRODUCTION.

In 1901 the Bureau of Labor collected data relating to the wholesale prices of the principal staple commodities sold in the United States for the period from 1890 to 1901, inclusive. The actual prices for the 12 years and the relative prices computed therefrom were published in Bulletin No. 39, issued in March, 1902. The purpose of the investigation was to furnish a continuous record of wholesale prices and to show the changes in the general price level from year to year. The investigation thus begun has been continued each year and the results published in the March issue of the Bulletin to show actual prices for the year immediately preceding and relative prices for the period since 1890. The present Bulletin contains actual prices for 1908 and relative prices for the 19 years from 1890 to 1908. In these reports wholesale prices have been presented for a large number of carefully selected representative staple articles secured in representative markets of the United States. That it would be impossible to secure prices for all articles in all markets is so apparent that the fact hardly need be stated. In the present report prices are given for 258 articles.

With few exceptions these articles are of the same description as those which have been covered in the preceding reports on this subject, though several commodities shown in the data for 1908 were not included in previous years.

This investigation shows that wholesale prices, considering the 258 commodities as a whole, receded from the high level of 1907, which was the year of highest prices of the 19 -year period covered. The recession in 1908 carried prices back approximately to the level of 1906, but, with the exception of 1907 only, prices as shown by the 258 articles here considered are higher than in any other year during the 19 -year period. The average for the year 1908 was 5.2 per cent below that for 1907; 0.2 per cent higher than that for 1906; 36.9 per cent higher than for 1897, the year of lowest prices during the 19-year
period, and 22.8 per cent higher than the average for the 10 years from 1890 to 1899. The decline from the prices shown by the October, 1907, data continued without interruption until August of 1908, with the exception of a slight advance in July. Prices were at their lowest point of the year during the month of August, when they were 1.1 per cent below the average for the year 1908 and 7.3 per cent below the average for October, 1907, the highest point of the 19 years covered. The prices in December show an advance of 1.8 per cent over the prices in August, the month of lowest average prices during the year.

## PRICES OF COMMODITIES, 1908 COMPARED WITH 1907.

Comparing 1908 with 1907, the groups showing the greatest decrease in prices were metals and implements, lumber and building materials, and cloths and clothing. Food, etc., was the only important group of commodities which showed an increase in price.

An examination of the prices of the various articles covered by the investigation shows that while there was a large average decrease for the year taken as a whole, the decrease in price did not extend to all groups nor to all commodities. Of the 258 articles for which wholesale prices were obtained 162 showed a decrease in the average price for 1908 as compared with 1907, 33 showed no change in the average price for the year, and 63 showed an increase in price. The following table divides the articles for which prices were secured into nine groups and shows for each group the number of articles covered, the per cent of decrease in the average price for 1908 as compared with that for 1907 for each group as a whole, and the number of articles that increased or decreased in price.

[^0]| Group. | Number of com-modities. | Per cent of decrease in price. | Number of commodities show-ing $-~$ |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Increase. | No change in price. | Decrease. |
| Farm products. | 20 | 2.9 | 8 |  | 12 |
| Food, etc.......... | 57 | a 2.4 | 28 | 3 | 26 |
| Cioths and clothing | 66 | 7.7 | 4 | 8 | 54 |
| Fuel and lighting.. | 13 | 3. 1 | 5 | 2 | 6 |
| Metals and implements. | 38 | 12.6 | 1 | 10 | 27 |
| Lumber and building materia | 28 | 9.4 | 5 | 3 | 20 |
| Drugs and chemicals....... | 9 | a. 7 | 5 | 2 | 2 |
| House furnishing goods. | 14 | 3.8 | 3 | 3 | 8 |
| Miscellaneous. . . . . | 13 | 5.7 | 4 | 2 | 7 |
| All commodities. | 258 | 5.2 | 63 | 33 | 162 |

$a$ Increase.
From the above table it is seen that when the commodities are considered by groups, seven of the nine groups showed a decrease in price in 1908 as compared with 1907. In farm products, taken as
a whole, there was a decrease in price of 2.9 per cent in 1908 below the average price for 1907, this decrease being the least of any of the seven groups showing a decrease. There was a decrease in the price of 12 of the 20 articles for which prices were obtained. Among the articles for which prices decreased were hay, sheep, cotton, hogs, and hides. Some articles that increased in price were corn, tobacco,oats, wheat, and cattle.

Food as a whole increased 2.4 per cent in the average price for 1908 as compared with 1907. In this group, 28 articles increased in price, 3 showed no change, and 26 decreased in price.

Among the articles showing an increase in price were beans, beef, flour, meal, sugar, rice, eggs, and fresh vegetables. No change took place in the price of crackers and in one quotation for loaf bread. The principal articles showing a decrease in price were butter, coffee, cheese, pork, mutton, canned peas, canned corn, and canned tomatoes. One of the varieties of fish showed an increase in the average price for the year, while other varieties showed a decrease in price.

Of the 66 articles included under cloths and clothing, 54 showed a decrease in price, 8 showed no change, and 4 showed an increase in price. In the group as a whole there was an average decrease of 7:7 per cent in price, the principal decrease being in the prices of cotton goods and silk.

In fuel and lighting as a group there was a decrease in price of 3.1 per cent. Petroleum increased in price, as did also some kinds of coal; other kinds of coal, and coke, decreased in price.

In the metals and implements group the decrease in the average price for 1908 below 1907 was 12.6 per cent, being the heaviest decline in price of any of the seven groups showing a decrease. Of a total of 38 articles in this group there was a decrease in the price of 27 articles, including copper, iron, lead, steel billets, nails, tin plate, etc. Ten articles, including steel rails, did not change in price, and in only one article, quicksilver, was there an increase in price.

Twenty of the 28 articles included under lumber and building materials decreased in price in 1908 as compared with 1907. Nearly all kinds of timber products showed a marked decrease in price, as did also brick, window glass, tar, turpentine, and plate glass. In this group as a whole there was a decrease in price of 9.4 per cent; 3 of the articles showed no change, and 5 articles increased in price in 1908 compared with 1907.

The increase in the average price of drugs and chemicals in 1908 over 1907 was 0.7 per cent, the articles showing the greatest increase in price being glycerin and alcohol. Quinineshowed a marked decrease in price.

House furnishing goods as a whole decreased 3.8 per cent in price. The principal decrease in price was in glassware and cutlery. Three articles did not change in price, while 3 increased in price.

In the miscellaneous group there was a marked decrease in the prices of jute, rope, rubber, cotton-seed oil, and malt. There was no change in the price of tobacco, while there was an increase in the
prices of proof spirits and 3 other articles. Taken together, the group of miscellaneous articles decreased in price 5.7 per cent. The per cent of increase or decrease in the average wholesale price for 1908 in each of the 258 articles as compared with the price for 1907 is shown on pages 224 to 227 .

In addition to the classification into the nine groups named above, the 258 articles included in the investigation have been divided into two general groups, designated as raw commodities and manufactured commodities. Of course exact definitions of these classes can not be made, but the commodities here designated as raw may be said to be such as are marketed in their natural state and such as have been subjected to only a preliminary manufacturing process, thus converting them into a marketable condition, but not to a suitable form for final consumption, while the commodities here designated as manufactured are such as have been subjected to more than a preliminary factory manipulation and in which the manufacturing labor cost constitutes an important element in the price. In the group designated as raw are included all farm products, beans, coffee, eggs, milk, rice, pepper, tea, vegetables, raw silk, wool, coal, crude petroleum, copper ingots, pig lead, pig iron, bar silver, spelter, pig tin, brimstone, jute, and rubber-a total of 54 articles. All the other articles are classed as manufactured commodities.

As thus grouped it appears that the average wholesale price of raw commodities for 1908 was 5.9 per cent below that for 1907, and that the average wholesale price of manufactured commodities for 1908 was 5 per cent below that for 1907.

The following table shows the per cent that the average price for each month of the year 1908 was above or below the average price for the year, and in the last column the per cent of increase or decrease of the average December price above or below the average price for each preceding month:
COMPARISON OF AVERAGE PRICE FOR EACH MONTH OF 1908 WITH THE AVERAGE
PRICE FOR THE YEAR, AND OF AVERAGE PRICE FOR DECEMBER, 1908, WITH THE aVERAGE PRICE FOR EACH PRECEDING MONTH OF THE YEAR.

| Month. |  | Per cent of price per month- |  | Per cent of increase $(+)$ or decrease (-) in December over each preceding month. |
| :---: | :---: | :---: | :---: | :---: |
|  |  | Above average price for year. | Below average price for year. |  |
| January. |  | 2.4 |  | $-1.7$ |
| February. |  | 1.3 | . ............ | $-.6$ |
| Maren... |  | 1.1 |  | $-.5$ |
| April... |  | 1.0 |  | $-.3$ |
| May... |  |  | 0.3 | $+1.0$ |
| June. |  |  | 1.1 | $+1.7$ |
| July.... |  |  | .9 | $+1.6$ |
| August |  |  | 1.1 | $+1.8$ |
| September |  |  | . 8 | +1.5 |
| October... |  |  | . 6 | +1.2 |
| November. |  |  | . 6 | +1.2 |
| December. |  | . 7 |  |  |

The average for wholesale prices in January, 1908, was 2.4 per cent above the average price for the year. In this month prices were at the highest point of the year. Prices declined each month from February to June, with a slight advance in July, followed by another decline in August. Prices reached their lowest point of the year in June and August, being 1.1 per cent below the average for 1908. Prices advanced again in September and October, remaining the same during November, and advanced slightly in December to 0.7 per cent above the average price for the year.

From the figures given in the last column of the table it is seen that the average of wholesale prices in December, 1908, was 1.7 per cent below the average in January and 1.8 per cent above the average in August, the month of lowest prices during the year.

The change that took place in wholesale prices month by month during 1908 in each of the 9 groups already referred to will be seen in the following table:

COMPARISON OF AVERAGE PRICE FOR EACH MONTH OF 1908 WITH AVERAGE PRICE FOR THE YEAR, AND OF AVERAGE PRICE FOR DECEMBER, 1908, WITH AVERAGE PRICE FOR EACH PRECEDING MONTH OF THE YEAR, BY GROUPS OF COMMODITIES.

| Month. | Farm products. |  |  | Foods, etc. |  |  | Cloths and clothing. |  |  |

COMPARISON OF AVERAGE PRICE FOR EAOH MONTH OF 1908 WITH AVERAGE PRICE FOR THE YEAR, AND OF AVERAGE PRICE FOR DECEMBER, 1908, WITH AVERAGE PRICE FOR EACH PRECEDING MONTH OF THE YEAR, BY GROUPS OF COMMODI-TIES-Concluded.

a Same as average price for December.
In January, 1908, the wholesale prices of farm products were 2.5 per cent below the average price for the year, and in February they were 3.2 per cent below, this being the lowest point of the year. During the eight months-March, April, May, July, August, October,

November, and December-prices were above the average for the year. Prices for June and September were slightly below the average for the year. The highest point reached during the year was in December, being 5 per cent above the average price for February. The movement in prices during the year for each of the articles that enter into this and the other groups will be found in Table II, pages 300 to 324 , or, if desired, the full details of the prices throughout the year may be found in Table I, pages 249 to 299.

Food commodities as a group reached their lowest price in May and attained their highest point in December, when they were 3.2 per cent above the average price for the year.

The increase in price in December as compared with May was 5.2 per cent. Food commodities increased in price each month from August to October, declined slightly in November, and advanced again in December. The December price was higher than that of any other month of the year.

The price of cloths and clothing was above the average for the year during the first five months and below the average for the other seven months. From January to July there was a decrease in price each month. The only months showing an increase in price over the previous month were November and December, when prices advanced slightly. The January price was 6.1 per cent above the average for the year and the December price was 6.8 per cent lower than the price for January.

The fuel and lighting group declined in price each month, with the exception of March, from January to May. The lowest price of this group was reached in May, when the price was 2.3 per cent below the average for the year. From June to December the price advanced each month, being in December 1.3 per cent above the average price for the year. The price in December was 3.7 per cent above the price in May, the month of lowest prices.

The group of metals and implements reached its lowest point of the year in July, when the price was 1.1 per cent below the average price for the year. From January to July, with the exception of April (which remained the same as March), there was a decline in price each month, while from that time to December the price advanced slightly each month. The December price was 0.2 per cent above the average for the year, but 1.3 per cent lower than the price for January.

The price of lumber and building materials in the month of January was 4.4 per cent above the average price for the year. With the exception of a slight advance in April the price declined each month from January to June, continuing at the same price during July. From August the price advanced each month until December, when the price was 2.4 per cent above the average for the year but was 1.9 per cent lower than the January price.

Drugs and chemicals during the months of February, March, July to September, and December were above the average price for the year, but during January, April, May, June, October, and November the price was below the yearly average. In December the price was 3.5 per cent higher than in May, the month of lowest prices, but 1.6 per cent lower than in July, the month of highest prices for this group during the year.

House furnishing goods were above the average price for the first seven months of the year and below the average for the remaining five months. This group reached the lowest point of the year during the months of November and December. The price in December was 5.6 per cent lower than the highest price of the year, which prevailed from January to May.

Miscellaneous articles in January were 2.3 per cent above the average price for the year and 2.7 per cent below the average price for the year in November. From July to November the average price declined each month, advancing slightly in December. With the exception of November the price in December.was lower than during any other month of the year.

While 1908 was on the whole a year of declining prices, the price of a number of important articles advanced. Of the 258 articles included in this report, the prices of 107 articles were at the highest point during the year in January while only 20 articles attained their highest price in December.

A few of the articles showing a decline in price from that shown in the early part of the year are here noted. Barley declined from an average of $\$ 0.9960$ in January to $\$ 0.6013$ in June, this being a decline of 39.6 per cent. Cotton declined 21.1 per cent from January to October; hops declined 58.1 per cent from January to September; mackerel declined 28.6 per cent from January to October; milk declined 43.8 per cent from January to June; print cloths declined 27.3 per cent from January to September; coke declined 29.4 per cent from January to September; Bessemer pig iron declined 17.1 per cent from January to October; rosin declined 30 per cent from February to September; cedar shingles declined 17.8 per cent from January to October; malt declined 39.3 per cent from January to December; and rope declined 22.8 per cent from January to December. The price of 61 articles remained the same throughout the year 1908, and for only 8 articles was the average price for December lower than for any other month of the year. Attention is directed to a few of the articles which advanced in price during the year. Choice to extra steers advanced 32.1 per cent from February to June; corn advanced 37.7 per cent from February to September; hogs advanced 63 per cent from February to September; wheat advanced 16.7 per cent from July to December; eggs advanced 141.6 per cent from April
to December; lard advanced 37.7 per cent from February to September; meal advanced 20.3 per cent from January to September; fresh beef in New York advanced 29.7 per cent from February to June; smoked hams advanced 35.7 per cent from February to July; ingot copper advanced 14.5 per cent from March to December; pig lead advanced 24.3 per cent from January to August; spelter advanced 17.2 per cent from January to December; tar advanced 46.2 per cent from March to October; jute advanced 30.8 per cent from February to August; rubber advanced 70.5 per cent from March to December. The average monthly prices for the several articles are given in Table II, pages 300 to 324.

The following table shows for both raw and manufactured commodities, according to the classification already explained, the per cent that prices in each month in 1908 were above or below the average prices of the year and the per cent of increase or decrease in December above or below each preceding month of the year:

COMPARISON OF AVERAGE PRICES OF RAW AND MANUFACTURED COMMODITIES FOR EACH MONTH OF 1908, WITH THE AVERAGE PRICES FOR THE YEAR, AND OF AVERAGE PRICES FOR DECEMBER, 1908, WITH THE AVERAGE PRICES FOR EACH PRECEDING MONTH OF THE YEAR.

| Month. | Raw commodities. |  |  | Manufactured commodities. |  |  | All commodities. |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Per cent of price for month- |  | Per centof in-crease (+or de-crease $(-)$in Decem-ber ascomsparedwith eachpreced-ingmonth. | Per cent of price for month- |  | Per centof in-crease $(+)$or de--crease (-in Decem-ber ascomaparedwith eachpreced-ingmonth. | Per cent of price for month- |  | Per centof in-crease $(+)$or de-erease $(-)$in December ascomeparedwith eachpreced-ingmonth. |
|  | Above average price year. | Below average price year. |  | Above average price year. | Below average price year. |  | Above average price year. | Below average price for year. |  |
| January. |  | 1.0 | +6.4 | 3.2 |  | $-3.6$ | 2.4 |  | -1.7 |
| February |  | 1.3 | $+6.7$ | 2.0 |  | -2.6 | 1.3 |  | -. 6 |
| March. |  | .2 | $+5.6$ | 1.5 |  | -2.0 | 1.1 |  | -. 5 |
| May.. |  | $\underline{1.2}$ | +80 | 1.5 |  | $-2.7$ | 1.0 | 0.3 | +1.0 |
| June. |  | 1.4 | +6.8 |  | 0.9 | +.3 |  | 1.1 | +1.7 |
| July.. |  | .6 | +5.9 |  | 1.1 | $+.5$ |  | .9 | +1.6 |
| August |  | .2 | +5.5 |  | 1.4 | +.8 |  | 1.1 | $+1.8$ |
| Septembe | 0.1 |  | +5.3 |  | 1.1 | +. 5 |  | . 8 | +1.5 |
| October.. | 1.3 |  | +4.0 |  | 1.1 | +. 5 |  | . 6 | +1.2 |
| November | 1.8 |  | +3.4 |  | 1.1 | +.6 |  | . 6 | +1.2 |
| December. | 5.3 |  |  |  | . 6 |  | . 7 |  |  |

From this table it is seen that there was a greater fluctuation in the prices of raw commodities during the year than in the prices of manufactured commodities. In May, the price of raw commodities was 2.5 per cent below the average price for the year, while in December the price was 5.3 per cent above the average price for the year. In manufactured commodities, the lowest prices were in August, when the average was 1.4 per cent below the average price for the year, while in January the average was 3.2 per cent higher than the average
price for the year. Thus, May marked the lowest prices in raw commodities and August marked the lowest prices in manufactured commodities, while December marked the highest prices in raw commodities and January the highest prices in manufactured commodities. Prices of raw commodities in December averaged 6.4 per cent higher than in January and 8 per cent higher than in May. The December prices of manufactured commodities averaged 3.6 per cent lower than those prevailing in January and 0.8 per cent higher than those which prevailed in August.

## PRICES OF COMMODITIES, 1908 COMPARED WITH PREVIOUS YEARS BACK TO 1890.

Thus far attention has been directed to the changes that took place in wholesale prices in the year 1908 as compared with 1907 and the movement of wholesale prices month by month during the year 1908. Attention is now directed to the course of wholesale prices from year to year since 1890. The following table shows, by relative prices, the changes in the average wholesale prices of the articles for which prices were secured from 1890 to 1908, inclusive. The relative price used in this table is simply a percentage. The base on which the relative price is computed is not the price in any one year, but the average price for the ten years from 1890 to 1899, inclusive. The reason for adopting this base is fully explained on pages 228 and 229. Relative prices, such as are here shown, are also sometimes spoken of as relative numbers or as index numbers. For explanation of the method used in computing the relative price of all commodities for each year see pages 231 and 239.

To assist in comparing wholesale prices in 1908 with the prices each year back to 1890 , another column is given in the table showing the per cent of the increase in prices for 1908 over the prices for each of the preceding years.

RELATIVE PRICES OF COMMODITIES, 1890 TO 1908, AND PER CENT OF INCREASE IN PRICES FOR 1908 OVER PRICES FOR EACE PRECEDING YEAR.

| Year. | Relative price of all commodities. <br> (a) | Per cent of increase in 1908 over each preceding year. | Year. | Relative price of all commodities. <br> (a) | Per cent of increase in 1908 over each preceding year. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1890. | 112.9 | 8.8 | 1900. | 110.5 | 11.1 |
| 1891 | 111.7 | 9.9 | 1901. | 108.5 | 13.2 |
| 1892. | 106. 1 | 15.7 | 1902. | 112.9 | 8.8 |
| 1893. | 105.6 | 16.3 | 1903. | 113.6 | 8.1 |
| 1894. | 96.1 | 27.8 | 1904. | 113.0 | 8.7 |
| 1895. | 93.6 | 31.2 | 1905.. | 115.9 | 6.0 |
| 1896. | 90.4 | 35.8 | 1906. | 122.5 | . 2 |
| 1897. | 89.7 | 36.9 | 1907. | 129.5 | b 5.2 |
| 1898. | 93.4 | 31.5 | 1908. | 122.8 |  |
| 1899. | 101.7 | 20.7 |  |  |  |

The relative wholesale prices during the years from 1890 to 1908 set forth in tabular form in the preceding table, are shown also in the graphic table which follows:

## RELATIVE PRICES OF ALL COMMODITIES, 1890 TO 1908.

[Average price for 1890 to $1899=100.0$.]

This table shows that the average wholesale prices declined each year from 1890 to 1897 , or 8 years of constantly falling prices. From 1898 to 1908 has been a period of advancing prices with only 3 of the 11 years showing a decrease from the prices of the previous year. These 3 years were 1901, 1904, and 1908, the decline of the 1908 prices from those of 1907 being heavier than the decline in either 1901 or 1904. The lowest year of the 19 -year period was 1897 and the high-
est was 1907. The wholesale prices in 1908 were 36.9 per cent higher than those of 1897 and 5.2 per cent below those of 1907 .

The average of wholesale prices of all commodities for 1890 was 112.9 per cent of the average of wholesale prices for the years from 1890 to 1899; in other words, the average of wholesale prices in 1890 was 12.9 per cent higher than the average for the 10 -year period named.

In 1891 relative wholesale prices declined to 111.7; that is, to a point where the average wholesale price for the year was 11.7 per cent above the average price for the 10 years from 1890 to 1899.

In 1892 relative wholesale prices dropped to 106.1 and in 1893 to 105.6. In the next year, 1894, wholesale prices fell to 96.1 , a point 3.9 below the average price for the 10 -year base period. In each of the three succeeding years wholesale prices declined until in 1897 they reached 89.7; that is, 10.3 per cent below the average price for the 10 -year period. In each of the 3 years next steceeding wholesale prices advanced, in 1900 reaching 110.5. In 1901 wholesale prices dropped back to 108.5. The next year, however, marked an increase, prices in 1902 being on an average a restoration of the prices in 1890, namely, 112.9. In 1903 prices advanced to 113.6. The next year, 1904, showed a slight decline, nearly back to the prices of 1890 and 1902. In 1905 prices advanced to 115.9 ; in 1906 prices advanced to 122.5 ; in 1907 prices advanced again, reaching 129.5, a higher level than in any other year of the 19 years covered by the investigation. In 1908 prices declined to 122.8 or 22.8 per cent above the average price for the 10 years from 1890 to 1899.

The last column of the table (page 204) shows that the price in 1908 was 5.2 per cent below the price in 1907, 8.8 per cent above the price in 1890, and 36.9 per cent above the price in 1897, the year of lowest average prices within the last 19 years.

The relative prices appearing in this table are based on 251 articles in 1890 and 1891, on 253 articles in 1892, on 255 articles in 1893, on 256 articles in 1894, on 258 articles from 1906 to 1908, on 259 articles in 1895, 1904, and 1905, on 260 articles in 1896 and from 1899 to 1903, and on 261 articles in 1897 and 1898.

Having shown the movement in wholesale prices for the period from 1890 to 1908 in all commodities taken as a whole, a table is given showing the movement in each of the 9 groups previously referred to. This table gives for each group the relative prices and the per cent of increase or, in a few instances, decrease of prices for 1908, as compared with the prices for each preceding year.

RELATIVE PRICES OF COMMODITIES, 1890 TO 1908, AND PER CENT OF INCREASE: IN PRICES FOR 1908 OVER PRICES FOR EACH PRECEDING YEAR, BY GROUPS OF. COMMODITIES.

| Year. | Farm products. |  | Food, etc. |  | Cloths and clothing. |  | Fuel and light-ing. |  | Motals and implements. |  |

| 1008. | 133.1 |  | 110.4 |  | 114.0 |  | 119.9 |  | 122.8 |  |

In this table the average relative prices of farm products are based on 16 articles from 1890 to 1907 and on 20 articles in 1908; of food, etc., on 53 articles from 1890 to 1892 and from 1904 to 1907, 54 from 1893 to 1903 and on 57 in 1908; of cloths and clothing, on 66 in 1908, on 70 articles in 1890 and 1891, 72 in 1892, 73 in 1893 and 1894, 75 in 1895, 1896, 1906, and 1907, and 76 from 1897 to 1905; of fuel and lighting, on 13 articles; of metals and implements, on 37 articles from 1890 to 1893, 38 in 1894 and 1895 and from 1899 to 1908 , and 39 from 1896 to 1898; of lumber and building materials, on 26 articles from 1890 to 1894, 27 from 1895 to 1907 and on 28 in 1908; of drugs and chemicals, on 9 articles; of house furnishing goods, on 14 articles, and of miscellaneous, on 13 articles.

A study of the table shows that the group of farm products reached the lowest average in 1896 and the highest in 1907; that of food, etc., the lowest in 1896 and the highest in 1908; that of cloths and clothing, the lowest in 1897 and the highest in 1907; that of fuel and lighting, the lowest in 1894 and the highest in 1903; that of metals and implements, the lowest in 1898 and the highest in 1907; that of lumber and building materials, the lowest in 1897 and the highest in 1907; that of drugs and chemicals, the lowest in 1895 and the highest in 1900; that of house furnishing goods, the lowest in 1897 and the highest in 1907, while in the miscellaneous group the lowest average was reached in 1896 and the highest in 1907. The average for all commodities combined, as before stated, was lowest in 1897 and highest in 1907. Of the nine groups, it is seen that one reached its lowest point in 1894, one in 1895, three in 1896, three in 1897, and one in 1898. The highest point was reached by one group in 1900, by one in 1903, by six in 1907, and by one group in 1908.

In order to follow the movement in the two great classes-raw and manufactured commodities-the following table has been prepared. The articles included under each of the two groups are indicated on page 198.

RELATIVE PRICES OF RAW AND OF MANUFACTURED COMMODITIES, 1890 TO 1908, AND PER CENT OF INCREASE IN PRICES FOR 1908 OVER PRICES FOR EACH PRECEDING YEAR.

| Year. | Raw commodities. |  | Manufactured commodities. |  | All commodities. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Relative price. (a) | Per cent of increase in 1908 over each preceding year. | Relative price. (a) | Per cent of increase in 1908 over each preceding year. | Relative price. (a) | Per cent of increase in 1908 over each preced ing year. |
| 1890. | 115.0 | 9.1 | 112.3 | 8.8 | 112.9 | 8.8 |
| 1891. | 116.3 | 7.9 | 110.6 | 10.5 | 111.7 | 9.9 |

| 1905. | 121.2 | 3.5 | 114. 6 | 6.6 | 115. 9 | 6.0 |
| 1906. | 126.5 | ${ }^{6} .8$ | 121.6 | . 5 | 122.5 | ${ }^{2} 2$ |
| 1907. | 133.4 | 65.9 | 128. 6 | ${ }^{6} 5.0$ | 129.5 | b5.2 |
| 1908. | 125.5 |  | 122.2 |  | 122.8 |  |

a A verage price for $1890-1890=100.0$.
b Decrease.
In 1890, when prices in general were high, the relative prices of raw commodities were higher than those of manufactured commodities and remained so until 1893, when prices of raw commodities declined and those of manufactured commodities were slightly above the prices of 1892. From 1894 to 1896 there was a marked decline in both groups, the raw commodities being lower than the manufactured in each of these years. In 1897 raw commodities advanced and manufactured declined. From 1898 to 1900 there was a decided advance in both groups each year, raw commodities advancing to a higher point than manufactured. In 1901 there was a very slight decline in raw and $\cdot$ a more marked decline in manufactured commodities. In 1902 both raw and manufactured commodities made a decided advance, raw commodities much the greater, and in 1903 both slightly advanced. In 1904 both raw and manufactured commodities declined slightly, but in 1905 both raw and manufactured commodities advanced. In 1906 both raw and manufactused commodities made a sharp advance, and another advance, equally great, was made in both groups in 1907, when both raw and manufactured commodities reached the highest point during the 19 years considered. In 1908 both raw and manufactured commodities declined.
For the 19 years included in this table, with the single exception of 1893 , it will be seen that during the years of high prices raw commodities were higher than manufactured commodities, and during the years of low prices, with the exception of 1898 , raw commodities
were lower than manufactured commodities. This is clearly shown in the graphic table which follows:

RELATIVE PRICES OF RAW AND MANUFACTURED COMMODITIES 1890 TO 1908.
[Average price for 1890 to $1899=100.0$.]

PRICES OF COMMODITIES, BY MONTHS, JANUARY, 1904, TO DECEMBER, 1908.

An opportunity is given below to study the movement in prices in each of the 9 groups before named, month by month for a few years back, in a table showing the relative prices in each group and for all commodities for each month from January, 1904, to December, 1908, inclusive:

RELATIVE PRICES OF COMMODITIES FOR EACH MONTH, 1904 TO 1908, BY GROUPS.
[Average price for $1890-1899=100.0$.]

 Concluded.
[Average price for $1890-1899=100.0$ ]

In this table the average relative prices of farm products are based on 16 articles from 1904 to 1907 and on 20 articles in 1908; of food, etc., on 53 articles from 1904 to 1907 and on 57 articles in 1908; of cloths and clothing, on 76 articles in 1904 and 1905, on 75 articles in 1906 and 1907, and on 66 articles in 1908; of fuel and lighting, on 13 articles; of metals and implements, on 38 articles; of lumber and building materials, on 27 articles from 1904 to 1907, and on 28 articles in 1908; of drugs and chemicals, on 9 articles; of house furnishing goods, on 14 articles, and of miscellaneous, on 13 articles. The average relative prices of all commodities are based on 259 articles in 1904 and 1905, and on 258 articles from 1906 to 1908.

The table shows that in the five-year period the group of farm products reached the lowest average in February, 1906, and the highest in September, 1907; that of food, etc., the lowest in June, 1905, and the highest in December, 1908; that of cloths and clothing, the lowest in November, 1904, and the highest in September, 1907; that of fuel and lighting, the lowest in May, 1905, and the highest in January, 1904; that of metals and implements, the lowest in September, 1904, and the highest in February, 1907; that of lumber and building
materials, the lowest in November, 1904, and the highest in April, 1907; that of drugs and chemicals, the lowest in May, 1906, and the highest in August and September, 1907; that of house furnishing goods, the lowest, January to June, 1906, and the highest in August, September, and October, 1907; while in the miscellaneous group the lowest average was reached in November, 1904, and the highest in July, 1907. It is interesting to see that during the five years the relative price of no single group was as low as the base-that is, the average price for the ten-year period from 1890 to 1899. Farm products were from 18.7 per cent to 45.5 per cent above base (average price for the ten-year period, 1890 to 1899); food, etc., from 2.7 per cent to 24.4 per cent above base; cloths and clothing, from 8.3 per cent to 29.2 per cent above base; fuel and lighting, from 24 per cent to 43.6 per cent above base; metals and implements, from 7.6 per cent to 49.1 per cent above base; lumber and building materials, from 19.4 per cent to 50.5 per cent above base; drugs and chemicals, from 0.2 per cent to 19.1 per cent above base; house furnishing goods, from 8.8 per cent to 20.5 per cent above base; the miscellaneous group, from 9.7 per cent to 30.3 per cent above base; and all commodities combined, from 11.8 per cent to 31.0 per cent above base. All commodities combined reached the lowest average for these years in October, 1904, and the highest in October, 1907.

The course of prices, by months, during the years 1904 to 1908 as represented by all commodities is clearly shown in the graphic table on page 212.

The following table shows the movement in the wholesale prices of raw commodities and of manufactured commodities month by month from January, 1904, to December, 1908. A description of the two classes may be found on page 198.

RELATIVE PRICES OF RAW COMMODITIES, MANUFACTURED COMMODITIES, AND ALI. COMMODITIES, FOR EACH MONTH, 1904 TO 1908.

| Average, 1908. |  | 125.5 | 122.2 | 122.8 |

The price of raw commodities reached the lowest average for these years in October, 1904, and the highest in June, 1907; manufactured commodities reached the lowest point in September, 1904, and the highest in September, 1907. The average price for raw commodities ranged from 17.3 per cent to 36.9 per cent above the base, while the
average for manufactured commodities ranged from 10.3 per cent to 30.3 per cent above the base price.

The course of prices of raw and manufactured commodities from 1904 to 1908 is shown, by months, in the graphic table which follows:
RELATIVE PRICES OF RAW AND MANUFACTURED COMMODITIES, BY MONTHS, 1904 TO 1908.

INFLUENCES AFFECTING PRICES.

No attempt has been made in any way to investigate the causes of the rise and fall of prices. The aim has been to give the prices as they actually prevailed in the market. The causes are too com-
plex, the relative influence of each too uncertain, in some cases involving too many economic questions, to permit their discussion in connection with the present article. It will be sufficient to enumerate some of the influences that cause changes in prices. Such influences include variations in harvest, which not only contract or expand the supply and consequently tend to increase or decrease the price of a commodity, but also decrease or increase, to a greater or less degree, the purchasing power of such communities as are dependent in whole or in part upon such commodity; changes in demand due to changes in fashions, seasons, etc.; legislation altering internal-revenue taxes, import duties, or bounties; inspection as to purity or adulteration; use of other articles as substitutes-as, for instance, an advance in the price of beef will cause an increased consumption of pork and mutton and, it may be added, a probable increase in the price of both pork and mutton; improvements in methods of production which will tend to give either a better article for the same price or an equal article for a lower price; cheapening of transportation or handling; speculative manipulation of the supply or of the raw product; commercial panic or depression; expanding or contracting credit; overproduction; unusual demand owing to steady employment of consumers; short supply owing to disputes between labor and capital in industries of limited producing capacity, as in the anthracite coal industry in 1902; organization or combination of mills or producers, thus enabling, on the one hand, a greater or less control of prices or, on the other hand, economies in production or in transportation charges through the ability to supply the article from the point of production or manufacture nearest the purchaser. So far as individual commodities are concerned, no conclusion can safely be formed as to causes without an examination of the possible influence of several-in some cases, perhaps all-of these causes. For example, the various internal-revenue and tariff acts have, in a marked degree, no doubt affected the prices of proof spirits, of tobacco, and of sugar. But, on the other hand, they have not been alone in their influences, and it probably would not in all cases be accurate to give the change of tax or duty as representing the measure of a certain and definite influence on the prices of those commodities.

## EXPLANATION OF TABLES.

The general statistical tables of this report are five in number, entitled as follows:
I.-Wholesale prices of commodities in 1908.
II.-Monthly actual and relative prices of commodities in 1908 and base prices (average for 1890-1899).
III.-Monthly relative prices of commodities in 1908.
IV.-Average yearly actual and relative prices of commodities, 1890 to 1908, and base prices (average for 1890-1899).

V,-Yearly relative prices of commodities, 1890 to 1908.
Table I.—Wholesale prices of commodities in 1908, pages 249 to 299.This table shows in detail the actual prices in 1908, as obtained for the several commodities embraced by this report. There is not space within a bulletin article to republish in full the actual prices for all commodities from 1890 down to 1907. Such prices may be found, however, in preceding March Bulletins of this Bureau, as follows:

Prices from 1890 to 1901 in Bulletin No. 39.
Prices for 1902 in Bulletin No. 45.
Prices for 1903 in Bulletin No. 51.
Prices for 1904 in Bulletin No. 57.
Prices for 1905 in Bulletin No. 63.
Prices for 1906 in Bulletin No. 69.
Prices for 1907 in Bulletin No. 75.
It is important that the greatest care be exercised in the choice of commodities in order that a simple average of their relative prices shall show a general price level. In the present compilation 258 commodities are shown, and it has been the aim of the Bureau to select only important and representative articles in each group. The use of a large number of articles, carefully selected, minimizes the effect on the general price level of an unusual change in the price of any one article or of a few articles. It will be seen that more than one series of prices have been given in the case of articles of great importance. This has been done for the purpose of giving weight to these important commodities, no other method of accomplishing this having been found satisfactory by the Bureau. The same means have been employed by Mr. Sauerbeck in his English prices, as explained in Bulletin No. 39, and the approximate accuracy of the same, as an indication of the variation of prices, has been proved by various tests based on the amount of production, etc.

Various methods of weighting have been attempted in connection with compilations of relative prices. One method employed by European statisticians is to measure the importance of each commodity by its annual consumption by the entire nation, the annual consumption being found by adding to the home production the amount imported and subtracting the amount exported. The method employed by the Bureau of Labor in its publication of Retail Prices of Food in the Eighteenth Annual Report and in Bulletins 59, 65, 71, and 77, consisted in giving to the various articles of food an importance based upon their average consumption in normal families. While it was possible to determine the relative importance as far as the consumption of food is concerned, there are, of course, many commodities the importance of which can not be measured by this method. The
impossibility of securing even approximately accurate figures for annual consumption in the United States of the commodities included in this compilation renders this method unavailable for the Bureau.

It has been thought best in the present series of index numbers, after a careful consideration of all methods of weighting, to use simply a large number of representative staple articles, selecting them in such a manner as to make them, to a large extent, weight themselves. Upon a casual examination it may seem that by this method a comparatively unimportant commodity-such, for instance, as tea-has been given the same weight or importance as one of the more important commodities, such as wheat. A closer examination, however, discloses the fact that tea enters into no other commodity under consideration, while wheat is not only quoted as the raw material, but enters into the two descriptions of wheat flour, the two descriptions of crackers, and the three descriptions of loaf bread.

In securing these prices an effort has been made to include staple commodities only. In a number of instances it was found possible to continue prices for the same commodities that were included in the Report on Wholesale Prices, Wages, and Transportation, submitted by Mr. Aldrich from the Senate Committee on Finance, March 3, 1893. Many articles which were included in that report are no longer manufactured, or, if still manufactured, have ceased to be important factors in the market. On the other hand, a number of articles not shown in that report have become of such importance as to render necessary their inclusion in any study of the course of prices.

Although in the case of commodities of great importance more than one series of quotations have been used, in no case has an article of a particular description been represented by more than one series of quotations from the same market. For this reason the terms "series of quotations" and "commodities" have been used interchangeably in this report.

In the record of prices for the nineteen years from 1890 to 1908, 237 series of quotations have been secured for the entire period and an additional 24 for some portion of the period. No quotations are shown for imported tin plate since 1898; none are shown for Ashton's salt since 1903; none are shown for beaver overcoatings since 1905; and none are shown for sun-dried apples, nutmegs, cotton and wool blankets, split boots, men's 84 -needle hose, linen thread, all-wool chinchilla overcoatings, shawls, Atlantic brown sheetings, Hope bleached sheetings, and indigo 16 -ounce suitings in 1908. Quotations for horses, mules, live poultry, tobacco, canned corn, canned peas, canned tomatoes, fresh beef (Chicago), dressed poultry, cabbage, and yellow-pine flooring are shown for the first time in 1908. In all there are 258 series of quotations for the year 1908.

Material changes in the description of 3 articles were made in 1902, of 2 articles in 1903, of 1 article in 1904, of 5 articles in 1905, of 7 articles in 1906, of 3 articles in 1907, and of 19 articles in 1908. For 7 of these articles the trade journals no longer supply satisfactory quotations, the manufacture of the particular grades of 10 previously quoted has been discontinued by the establishments heretofore furnishing quotations, and for 23 articles the substituted descriptions more nearly represent the present demands of the trade.

In making these substitutions, with few exceptions articles were supplied corresponding as closely as possible to those which were previously used.

The prices quoted in every instance are wholesale prices. Wholesale prices have invariably been used in compilations which have been made for the purpose of showing changes in the general price level of all commodities. They are more sensitive than retail prices and more quickly reflect changes in conditions, and, too, it is much more difficult to follow the changes in quality of commodities quoted in retail prices than in wholesale prices. Retail prices usually follow the wholesale, but not always in the same proportion. The margin between them in the case of some commodities is so great that slight changes in the wholesale price do not affect the retail price. Changes in the wholesale price, which last for a short time only, do not usually result in corresponding changes in the retail price.

The net cash prices are shown for textiles and all articles whose list prices are subject to large and varying discounts. In the case of a number of articles, such as white pine, nails, etc., however, whose prices are subject to a small discount for cash, no deduction has been made.

The prices have been collected from the best available sources, such as standard trade journals, officials of boards of trade, chambers of commerce, and produce exchanges, and leading manufacturers or their selling agents.

The prices quoted are usually the prices in the New York market, except for such articles as have their primary market in some other locality. For grains, live stock, etc., for example, Chicago prices are quoted; for fish, except salmon, Boston prices; for tar, Wilmington, N. C., prices; for Elgin creamery butter, Elgin, Ill., prices, etc. The prices for textiles are the prices in the general distributing markets, such as New York, Boston, and Philadelphia; and where no market is mentioned in the prefatory note to Table I it should be understood that the prices are for the general market.

The following table shows the different markets and the number of articles quoted for each market:

NUMBER OF COMMODITIES OR SERIES OF QUOTATIONS IN 1908, CLASSIFIED BY MARKETS FOR WHICH SECURED.

As regards the description of the commodity it should be stated that the greatest care has been taken to secure prices throughout the period from 1890 to 1908 for a commodity of precisely the same description. Changes in quality are, of course, reflected in prices, and for this reason note has been made of any important changes which have occurred. In the case of certain commodities, such as butter, eggs, etc., prices for the best quality have been taken in order to avoid frequent changes in grade. It should also be stated in this connection that in the case of commodities for which prices were secured from the Oil, Paint, and Drug Reporter the lowest quotations were taken where a range of prices was found, because of the fact that in that publication these represent the prices of large lots, while the high quotations represent the prices of smaller lots.

Weekly quotations have been secured in the case of all articles which are subject to frequent fluctuations in price, such as butter, cheese, eggs, grain, live stock, meats, etc. In the case of articles whose prices are more stable, monthly or yearly quotations have been taken. The following table shows the number of series of weekly, monthly, and yearly price quotations:
NUMBER OF COMMODITIES OR SERIES OF QUOTATIONS, CLASSIFIED AS TO THEIR FREQUENCY OF QUOTATION IN 1908.

| Frequency of quotation. | Farm products. | Food, etc. | $\left\lvert\, \begin{gathered} \text { Cloths } \\ \text { and } \\ \text { cloth- } \\ \text { ing. } \end{gathered}\right.$ | $\begin{gathered} \text { Fuel } \\ \text { and } \\ \text { light- } \\ \text { ing. } \end{gathered}$ | Metals and im plements. | Lumber and building materials. | $\begin{gathered} \text { Drugs } \\ \text { 8nd } \\ \text { chem- } \\ \text { icals. } \end{gathered}$ | House- fur- nishing goods. | Mis-cellaneous. | Total. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Weekly. <br> Monthly <br> Yearly . | 17 3 | $\begin{aligned} & 25 \\ & 32 \end{aligned}$ | 1 61 4 | 12 | 38 | 28 | 9 | 14 | 12 | 45 209 4 |
| Total. | 20 | 57 | 66 | 13 | 38 | 28 | 9 | 14 | 13 | 258 |

The character of each series of quotations as regards frequency is shown in all cases in Table I in a prefatory note which states fully the date of the quotations and, if weekly, whether the quotations are for some particular day of the week, the average for the week, or the range for the week. The majority of the weekly quotations show the price on Tuesday, and if for any reason Tuesday's price was not obtainable the first price in the week has been taken. The quotations from trade and other journals, when credited to the first of each month, are not in all instances the price for the exact day stated, as it is a common practice of the daily papers which make a specialty of market reports to devote certain days to the review of the market of certain articles. For example, the Boston Herald quotes fish on Saturday only. The prices are, however, the earliest prices quoted in the journal to which the article is credited. It should also be stated that the monthly prices credited to weekly publications are the earliest quotations shown in such publications for each month.

In many localities the price of bread per loaf is not affected by changes in the price of flour, yet the weight of the loaf is changed from time to time. During 1904, with the advance in the price of flour, the weight of the loaf was decreased in some localities. For this reason the relative prices of bread are computed on the price per pound and not per loaf. Table I shows the price per loaf, the price per pound, and the weight each month during 1908.

The average price for the year was obtained by dividing the sum of the quotations for a given commodity by the number of quotations shown. For example, the sum of the Tuesday's prices of cotton for 1908 (shown on page 250 ) was $\$ 5.4405$, and the number of quotations 52. The former figure divided by the latter gives $\$ 0.10463$ as the average price for the year. When a range was shown the mean price for each date was found, and this was used in computing the yearly average as above described. The reader will understand that, in order to secure for any commodity a strictly scientific average price for the year, one must know the quantity marketed and the price for which each unit of quantity was sold. It is manifestly impossible to secure such detail, and even if it were possible the labor and cost involved in such a compilation would be almost prohibitive. It is believed that the method adopted here, which is also that used in the construction of other index numbers, secures results which are quite as valuable for all practical purposes.

Owing to the unusual method of fixing the scale of prices of cut and wire nails and the difficulties encountered in securing satisfactory quotations of prices, it was thought best to enter into a somewhat lengthy explanation in Bulletin No. 39, and the reader is referred to pages 226 to 231 of that number.

The base prices of nails are the prices quoted by the trade, and while, for reasons explained in Bulletin No. 39, they could not be used in computing relative prices, they form the basis from which are calculated the actual prices for 8-penny nails, as given in Table I, and. therefore the base prices of both cut and wire nails during 1908 are given in the following tables:

NAILS: CUT, BASE SIZES, 1908.
[Price per 100-pound keg, f. o. b. Pittsburg, on the first of each month; quotations from the Iron Age.]

| Month. | Price. | Month. | Price. | Month. | Price. | Month. | Price. |

|  |  |  | 1.90-1.95 | Aug. | \$1.75-1.80 | Nov.......... | 1.75- |
|  |  |  | 1.85 | Sept. | 1.75 | Dec | 1.75- |
|  |  |  |  |  |  | A verage... | \$1.85. |

NAILS: WIRE, BASE SIZES, 1908.
[Price per 100-pound keg, f. o. b. Pittsburg, on the first of each month; quotations from the Iron Age.]

In previous Bulletins quotations were published for two descriptions. of scoured wool, but in view of the fact that a large proportion of: wool is marketed unwashed, monthly price quotations for a standard grade of unwashed wool have also been secured. For purposes of: comparison the quotations on the scoured basis are continued in Table I. No relative prices were computed from the quotations of unwashed wool. It may be necessary at some future time to usethese quotations in the index number, and it was considered advisable to secure them from year to year.

The quotations of actual prices of unwashed wool on the first of each month for 1890 to 1903 were shown in Bulletin No. 51 (page237); for 1904, in Bulletin No. 57 (page 405); for 1905, in Bulletin No63 (page 352); for 1906, in Bulletin No. 69 (page 264); and for 1907, in Bulletin No. 75 (page 311).

The prices for 1908 follow:
WHOLESALE PRICE OF UNWASHED OHIO MEDIUM FLEECE WOOL (ONE-FOURTH AND THREE-EIGHTHS GRADE), 1908.
[Price per pound in the eastern markets (Baltimore, Boston, New York, and Philadelphia) on the first. of each month.]

79828-Bull. 81-09-3

On preceding pages of this report an opportunity has been afforded to note the extent of the change in wholesale prices between 1907 and 1908, by groups of commodities. The following table shows the per cent of increase or decrease in the average wholesale price in 1908 for each individual article as compared with the price in 1907:

## PER CENT OF INCREASE OR DECREASE IN THE AVERAGE WHOLESALE PRICES OF COMMODITIES IN 1908, COMPARED WITH 1907.

[For a more detailed description of the articles see page 249 et seq.$]$
Farm products, 20 articles.

The most striking decreases in the average prices for 1908 as compared with 1907 in the group of farm products were for hops, hay, sheep, and cotton. The most important articles showing increased prices were corn, cattle, tobacco, oats, and wheat.
The articles showing the greatest increase in price in food were potatoes, fresh beef, beans, cabbage, flour, meal, rice, and sugar, while the articles showing the greatest decrease were pepper, mackerel, pork, canned peas, canned tomatoes, and molasses. In the group of cloths and clothing there was a decrease of from 10.8 to 29.5 per cent in 22 articles, including most of the cotton products, while only 4 articles showed an increase.

The principal decrease in the price of fuel and lighting was in coke. In metals and implements, there was a marked decrease in the prices of copper, pig iron, lead, bar iron, spelter, pig tin, and silver, with an increase in price of only one article, quicksilver.

In the lumber and building materials group there was a marked decline in the price of tar, turpentine, rosin, glass, shingles, and brick, but an increase in the price of lime and 4 other articles.

In the group of drugs and chemicals there was a decrease in the price of quinine and an increase in the price of glycerin and alcohol.

In the group of house furnishing goods there was a decrease in the price of table cutlery and glassware.

In the miscellaneous group the principal decrease in price was in jute, rope, rubber, and cotton-seed oil, and a slight advance in the price of starch, soap, and proof spirits.

Table 11.- Monthly actual and relative prices of commodities in 1908 and base prices (average for 1890-1899), pages 300 to 324.-This table shows for each article the monthly price, which is either the average price for the month or the price on some day of the month. On the line below the December price is given the average price for the year, and on the line above the January price is given the average price during the 10 years from 1890 to 1899 , which average price is designated the base price.

The monthly prices for such articles as are quoted weekly in Table I were found by dividing the sum of the quotations in each month as shown in Table I by the number of quotations in each month, except for articles in which a range is quoted, for which articles the average is computed from the mean of the weekly prices. In Table I single quotations for 1908 are shown for 4 articles. The price of two of these is maintained throughout the year, and the prices of two are averages for the year. For each of these four articles the annual price has been shown in Table II as the price during each month.

It was impossible to secure quotations during all of the months of the year for 9 of the 258 articles, viz, horses, wheat, dairy butter, buckwheat flour, raisins, cabbage, onions, Atlantic bleached sheetings, and tar.

The average price for 1908 was obtained, as has already been explained, by dividing the sum of the quotations for the year as shown in Table I by the number of quotations for the year. The average price for the 10 -year period, 1890 to 1899 , was obtained by dividing the sum of the average prices of the 10 years by 10 . This average price for 10 years has been adopted as the base for all relative prices. For the 10 articles which do not show prices for the entire period of 10 years, 1890 to 1899 , the base in each case is the average of the years prior to and including 1899.

For the 11 articles quoted in 1908 for the first time, no monthly or yearly relative price could be computed for each individual article because the average for the base period of 10 years was not secured. These articles have been given due weight in the subgroups and general groups to which they belong. See discussion of Table III, p. 231.

In explanation of the term base or standard, as used in connection with relative prices or index numbers, it may be stated that in reducing a series of actual prices to relative prices a base must first be chosen, and this may be either a single quotation, the average price for 1 year, or the average for 2 or more years. If the price for a single year is chosen, it is essential that that year be a normal one, for if prices are high in the year chosen for the base any subsequent fall will be
unduly emphasized, while, on the other hand, if prices are low any subsequent rise will be emphasized. For the reason that all the commodities probably never present a normal condition as regards prices in any one year, it was decided that an average price for a number of years would better reflect average or approximately normal conditions and form a more satisfactory base than would the price for any single year. A base made up of an average of a number of years will include or neutralize the effects alike of speculation and of depression. The period chosen as this base was that from 1890 to 1899-a period of 10 years. The average price of each article for the base period was found, as previously stated, by adding together the average yearly prices of that article for all of the 10 years and dividing by 10 .

The relative prices as shown in this and other tables have been calculated in the usual manner and represent simply the percentage which each monthly or yearly price is of the base price. The average price for the first 10 years of the period, that is, the base, always represents 100 , and the percentages for each month or year enable the reader to measure readily the rise and fall, from month to month or from year to year, of the prices of each single commodity, of any group of commodities, or of all the 258 commodities involved. These commodities are arranged in alphabetical order under each of the nine general groups, as in Table I.

In order that the method pursued may be more readily understood, the reader is referred to the tableitself, as given on pages 300 to 324 . Taking up the first commodity shown, barley, we find that the average price per bushel for the base period, 1890 to 1899 , inclusive, was 45.34 cents; the average price for January, 1908, was 99.60 cents; that for February was 89.38 cents; that for March 89.13 cents, etc. The relative price for the base period, as heretofore explained, is always placed at 100 , and is so given in the table. The relative price for January, 1908, is shown to be 219.7, or 119.7 per cent higher than the base or average for the 10 years. In February the relative price was 197.1, or 97.1 per cent above the base, etc.

The relative price for the year 1908 was 161.8 , or 61.8 per cent above the base. The figures in each case were secured according to the method already explained, that for January, 1908, being expressed as follows:

The remainder of the table may be analyzed in a similar manner.
The value of prices given in this relative form, it will readily be seen, consists in the means afforded for tracing and measuring the
changes from month to month, from year to year, or from period to period, and in the combination of prices of a sufficient number of commodities to show the general price level. It must not be assumed that a system of relative prices of representative commodities will enable one to trace the causes of changes in the general price level or to determine the effect of such changes on any class of consumers or on all consumers. The use of such a system is to show the general course of prices from time to time of one commodity, of a group of commodities, or of all commodities.
It is stated on page 220 that certain articles are no longer quoted and other articles of the same class are substituted.
An explanation of the method of computing the relative price of these articles is necessary, and harness leather will be used as an illustration. It must be understood that during the years when "country middles" were quoted, they were assumed to represent the several grades of oak harness leather-that is, that the course of prices of a standard grade of oak harness leather in an index number of prices fairly represents the course of prices of the various grades of oak harness leather. Therefore, when it became necessary to substitute, in 1902, "packers' hides" for the "country middles," prices were secured for packers' hides for both 1901 and 1902, and it was found that the average price for the year 1902 was the same, or 100 per cent of the average price for the year 1901. The relative price of country middles in 1901, as shown in Table IV, was 114.7 (average price for the ten years, 1890 to 1899 , equals 100 ), and if country middles represented oak harness leather at that time, and packers' hides represented the class in 1902, harness leather (shown by the price of packers' hides) remained the same price in 1902 as in 1901, and the relative price in 1902 was therefore 100 per cent of 114.7, the relative price in 1901, which gives 114.7 as the relative price in 1902. The same method was followed in computing relative prices for each month. The average price of harness leather in 1908 was 93.85 per cent of the average price in 1907; therefore the relative price in 1908 was 93.85 per cent of 129.0 , the relative price of 1907 , which gives 121.1 as the relative price in 1908. The same method of computing the relative prices was followed for sheep, crackers, herring, blankets, boots and shoes, calico, hosiery, leather, sheetings, women's dress goods, worsted yarns, augers, bar iron, butts, coppar, vises, doors, plate glass, white pine, shingles, bedroom sets, and jute. For trouserings and underwear the exact grade quoted for 1903 was not manufactured in 1902. The manufacturer of trouserings, however, estimated that one-half of the advance in price over the price for the grade quoted for previous years was due to the fact that it was a better article and the other half to the advance in price of material and cost of manufacture. The advance was $\$ 0.1125$ per yard over the price in 1902; one-half of this,
$\$ 0.05625$, was added to the 1902 price of the 22 to 23 ounce trouserings to secure a theoretical 1902 price for the 21 to 22 ounce trouserings, and the 1903 relative price was then computed as above. Underwear was arbitrarily given the same relative price in 1903 as in 1902, as the all-wool underwear manufactured by the same firm showed no change in price. The 1908 relative prices of trouserings and underwear were found in the same way as explained above for harness leather.

Table 1II.- Monthly relative prices of commodities in 1908, pages 325 to 337. -This table repeats the relative monthly price for each article as given in Table II. In addition, similar commodities have been grouped for convenience in comparison, and averages computed for each subgroup and for each of the nine general groups.

Owing to the fact that in 190811 articles are quoted for the first time, that quotations of 11 are discontinued, and that 19 articles are substituted for similar articles formerly quoted, it has not been deemed advisable to compute the averages for groups and subgroups for 1908 upon the simple average basis as heretofore.

The method used in this report is as follows: The actual price for each month in 1908 was divided by the average price for the year 1907, giving a percentage based on 1907. These percentages for the several commodities of a group were added for each month and the sum divided by the number of commodities, giving an average percentage for the group for each month based on 1907. The relative price for the group for the year 1907, as determined in the report for that year, was then multiplied by the average percentage for the group for each month, producing as the product the relative price for the group for each month. The same process was used in computing the relative price for the year 1908. In applying this method to a group to which new articles were added in 1908, it was necessary to secure prices for both 1907 and 1908 for the additional articles.

For example, during the years when 16 articles were quoted in farm products, they were assumed to represent farm products; that is, the course of prices of these 16 articles in an index number of prices was assumed to fairly represent the course of prices for all farm products. Since it was considered advisable to secure prices for 4 additional articles belonging in this group, it became necessary to include these additional prices in computing the average for the group. This table shows under farm products average relative prices for grain, for cattle, for hogs, for sheep, and for all live stock quoted. An average is then given for farm products as a general group. The prices for horses and mules were included in the average relative price of live stock in 1908 by using the method explained above; also the four commodities, horses, mules, poultry, and tobacco, were included in the general group average for farm products by this method. Relative prices can not be shown separately for horses, mules, poultry,
and tobacco, because the prices from 1890 to 1899 , the common base for all articles, were not secured.

As explained in the discussion of Table II it was impossible to secure quotations during all of the months of the year for 9 of the 258 articles. In order of arrangement these are: Horses, wheat, dairy butter, buckwheat flour, raisins, cabbage, onions, sheetings, bleached, $9-4$, Atlantic, and tar. In presenting monthly relative prices for these articles a nominal relative price (which is the same as the relative price for the month in which the article was last quoted) has been entered in this table for the months for which no price quotation is shown in Table I. This nominal price enters into the average for the subgroup, the general group, and "all commodities" for that month.

In the following table the December, 1908, relative price is compared with the average for 1890 to 1899. The average price for 1890 to 1899 is in every case the base, or 100 per cent. Only the commodities are included below for which the quotations throughout the 19year period have been for practically the same description of article. In using this table it must be borne in mind that the comparison is between the prices for December, 1908, and the average prices for the base period.

RELATIVE PRICES, DECEMBER, 1908, COMPARED WITH AVERAGE PRICE FOR 1890-1899.

Of the farm products group, 13 of the 14 articles were higher in December, 1908, than the average price for 1890 to 1899 , and the price of only 1 article was lower in December, 1908, than the average for 1890 to 1899. The December, 1908, price, compared with the average price for 1890 to 1899 , shows oats 84.3 per cent above; hides, 70.8 per cent above; corn, 55.4 per cent above, etc. Of the food group in December, 1908, eggs were 123.1 per cent above; mess beef 65.3 per cent above; yellow meal, 64.7 per cent above; lard, 46.9 per cent above; dairy butter, 43.8 per cent above, etc. With these illustrations the reader is referred to the table.

The facts presented in the foregoing table are summarized in the following table, which shows the changes in prices of articles in each group, classified by per cent of change:

CHANGES IN PRICES OF ARTICLES IN EACH GROUP, CLASSIFIED BY PER CENT OF CHANGE, DECEMBER, 1908, COMPARED WITH AVERAGE PRICE FOR 1890-1899.

It is seen in the above comparison of the prices of December, 1908, with the average for 1890 to 1899, that of the 14 articles in the farm products group, 13 show an increase and 1 a decrease; of the 47 in the foods, etc., group, 35 show an increase and 12 a decrease; of the 44 in the cloths and clothing group, 40 show an increase and 4 a decrease; of the 13 in the fuel and lighting group, 11 show an increase and 2 a decrease; of the 31 in the metals and implements group, 24 show an increase, 2 show the same price as the average for the base period, and 5 show a decrease; of the 20 in the lumber and building materials group, 19 show an increase and 1 a decrease; of the 9 in the drugs and chemicals group, 7 show an increase and 2 a decrease; of the 13 in the house furnishing goods group, 7 show an increase and 6 a decrease; of the 12 in the miscellaneous group, 9 show an increase and 3 a decrease. Of the 203 commodities included in the above table, 165 show an increase, 2 show the same price as the average for the base period, and 36 show a decrease. Of the 165 commodities that showed an increase in December, 1908, over the average for 1890 to 1899, 29 advanced less than 10 per cent, 57 advanced 10 and under 25 per cent, 51 advanced 25 and under 50 per cent, 24 advanced 50 and under 100 per cent, and 4 advanced 100 per cent and more. Of the 36 commodities which showed a decrease, 16 decreased less than 10 per cent, 8 decreased 10 and under 25 per cent, 9 decreased 25 and under 50 per cent, and 3 decreased 50 par cent and more.

The number and per cent of articles which showed each specified increase or decrease are given in the following table:

NUMBER AND PER CENT OF ARTICLES, BY CLASSIFIED PER CENT OF INCREASE OR DECREASE, DECEMBER, 1908, COMPARED WITH AVERAGE PRICE FOR 1890-1899.

|  | Number of articles. | Per cent of articles. |  | Number of articles. | Per cent of articles. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Price increased: |  |  | Price decreased: |  |  |
| 100 per cent and more. | 4 | 2.0 | Less than 10 per cent..... | 16 | 7.9 |
| 50 and under 100 per cent. | 24 | 11.8 | 10 and under 25 per cent.. | 8 | 3.9 |
| 25 and under 50 per cent... | 51 | 25.1 | 25 and under 50 per cent.. | 9 | 4.4 |
| 10 and under 25 per cent.. | 57 | 28.1 | 50 per cent and more.... | 3 | 1.5 |
| Less than 10 per cent...... | 29 | 14.3 | tal | 36 | 17.7 |
| Total. | 165 | 81.3 |  |  |  |
| Price same as base. | 2 | 1.0 | Grand total............. | 203 | 100.0 |

Of the 203 articles included in this table, it is seen that 165 , or 81.3 per cent, show an increase in price; 2 articles, or 1 per cent, show the same price as the average for the base period; and 36 articles, or 17.7 per cent, show a decrease in price in December, 1908, as compared with the average price for the base period.

Of the 258 commodities considered in the Bureau's compilation of prices, the average price of 142 commodities was lower in December, 1908, than in December, 1907, the average price of 50 was the same in December, 1908, as in December, 1907, and the average price of 63
was higher in December, 1908, than in December, 1907. For two articles there were no quotations in December, 1907, and no quotation for one article in December, 1908.

The following table shows the relative prices of certain related articles, so grouped as to render easy a comparison of the course of their prices during the year 1908:

| 1908. | 122.6 | 127.6 | 115.8 | 127.0 | 117.6 | 142.6 | 119.4 | 121.3 | 195.6 | 143.1 |

The lowest monthly relative price during 1908 for cattle was 110.3 in February, the highest 142.0 in June; the lowest for fresh beef was 117.0 in January and February, the highest 142.3 in June; the low-
est for beef hams was 141.0 in January and February, the highest 165.8 in September and October; the lowest for mess beef was 130.2 in February, the highest 184.0 in August and September; the lowest for tallow was 119.1 in March, the highest 137.9 in October; the lowest for hides was 100.7 in March, the highest 170.8 in December. The facts for the other groups may be seen by reference to the table.

Table IV.-Average yearly actual and relative prices of commodities, 1890 to 1908, and base prices (average for 1890-1899), pages 338 to $364 .-$ This table shows for each commodity the average price for each of the 19 years from 1890 to 1908. In the parallel column following is given the relative price for each year-that is, the per cent that the price in each year is of the average price for the 10 years from 1890 to 1899 . In the line above the prices for 1890 are given the average prices for the 10 -year period taken as the basis of comparison.

The average price for each year was obtained, as has been explained on page 222, by dividing the sum of the quotations for each year as shown in Table I by the number of quotations for each year. The average price for the 10 -year period ( 1890 to 1899) was obtained by dividing the sum of the average prices of the 10 years by 10 . The relative prices for each year were computed in the same way as for each month, as explained in the discussion of Table II. The 11 articles quoted in 1908 for the first time do not appear in Table IV.

Table V.-Yearly relative prices of commodities, 1890 to 1908, pages 965 to 382 .-In this table similar commodities have beengrouped and the average relative prices have been computed for the various subgroups and each of the 9 general groups. The relative prices of articles in Table IV are included in this table. Relative prices can not be given for the articles quoted for the first time in 1908, since prices for the base period, 1890-1899, were not secured, but these articles enter into the averages for the groups within which they fall. The relative prices from 1890 to 1907 for the groups are simple averages, found by dividing the sum of the relative prices of the several commodities in the group by the number of commodities.

For 1908 the averages for all the groups were computed by the method explained on page 231 in the description of Table III.

The average relative price of each of the 9 general groups for each year of the period and the average relative price of all commodities for each year are shown on page 207.

The average relative prices of the 237 commodities for which quotations were secured for the entire period involved do not differ materially from the average relative price of all commodities shown in a preceding table based on the varying number of commodities in the different years. Eliminating the commodities for which quotations were secured for only a portion of the period, we find that the aver-
age relative price of the 237 commodities remaining was 122.3 in 1908, as against 122.8, the relative price for the 258 articles for which wholesale prices were secured in this investigation.

The following table shows for each of the 9 general groups the relative prices of 1908 compared with the average for 1890 to 1899.

There are included in this table only those commodities which have retained practically the same description throughout the 19-year period. The average price for 1890 to 1899 is in every case the base, or 100 per cent. It should be kept in mind in using the table that the comparison is between the average prices for 1908 and the average prices for the base period.

The 1908 prices of all of the 14 articles included in the farm products group, except hops, were higher than the average price for 1890 to 1899 . The 1908 price, compared with the average price for 1890 to 1899 , shows oats 89.5 per cent above; corn, 79.9 per cent above; barley, 61.8 per cent above; rye, 48 per cent above; hides, 42.6 per
cent above; cotton, 34.8 per cent above, etc. The price of hops was 32.9 per cent below the average price for 1890 to 1899.

Forty-one of the 48 articles of food shown in this table were higher and 7 lower in price than the average for 1890 to 1899. In 1908 the price of mess beef was 64.5 per cent above the average price for 1890 to 1899 ; currants, 62.4 per cent above; yellow meal, 58.8 per cent above; beef hams, 53.2 per cent above; potatoes, 42.6 per cent above; eggs, 42 per cent above; beans, 38.9 per cent above, etc. The price of coffee was 52.2 per cent below the average price for 1890 to 1899; tea, 24.9 per cent below; prunes, 22.7 per cent below; soda crackers, 9.5 per cent below, etc.

Of the 44 articles considered in the cloths and clothing group. in 1908, the prices of 38 were above and 5 below, while 1 article was the same as the average price for 1890 to 1899. In 1908 the price of Atlantic Mills cotton warp cashmere was 38.6 per cent above the average price for 1890 to 1899; Stark drillings, 37.8 per cent above; bags, 34.3 per cent above; cotton thread, 31.7 per cent above; Ohio fine fleece wool, 29.6 per cent above, etc.

Of the 13 articles included in the fuel and lighting group in 1908, the prices of the less important articles of matches and candles only were below the average price for 1890 to 1899. The price of crude petroleum was 95.6 per cent above the average price for 1890 to 1899; Georges Creek coal at the mine, 62.2 per cent above; refined petroleum, 51.7 per cent above, etc.

Thirty-one articles are considered in the metals and implements group. The prices of two articles in 1908 were the same as the average prics for 1890 to 1899 , while the prices of 24 articles were above and of 5 below the average price for 1890 to 1899. Doorknobs were 135.7 per cent above; locks, 103.2 per cent above; chisels, 98 per cent above; pig tin, 60.2 per cent above; pig iron, gray forge, 29.6 per cent above, etc. The price of wood screws was 33.8 percent below the average for 1890 to 1899 ; bar silver, 28.6 per cent below; wire nails, 2.9 per cent below, etc.

Of the 20 articles included in the lumber and building materials group, all but 3 showed prices above the average for 1890 to 1899. The price of rosin was 127.9 per cent above the average price for 1890 to 1899; poplar, 85.8 per cent above; hemlock, 74.5 per cent above; yellow pine siding, 65.2 per cent above, etc. The price of putty was 24.1 per cent below the average for 1890 to 1899 , and of brick 8.2 per cent below.

Of the 9 articles included in the group of drugs and chemicals, 7 were above and 2 below the average price for 1890 to 1899.

Of the 13 articles considered in the group of house furnishing goods, the 1908 prices of 8 were above and of 5 below the average price for 1890 to 1899.

Of the 12 articles included in the miscellaneous group, the 1908 prices of 10 were above and of 2 below the average price for 1890 to 1899.

The facts presented in the foregoing table are summarized in the following table, which shows the changes in prices of articles in each group, classified by per cent of change:
CHANGES IN PRICES OF ARTICLES IN EACH GROUP, CLASSIFIED BY PER CENT OF CHANGE, 1908 COMPARED WITH AVERAGE PRICE FOR 1890-1899.

| Total. | 204 | 3 | 21 | 52 | 57 | 36 | 3 | 15 | 9 | 6 | 2 |

It is seen in the above comparison of the prices of 1908 with the average for 1890 to 1899 that of the 14 articles in the farm products group, 13 show an increase and 1 a decrease; of the 48 in the food, etc., group, 41 show an increase and 7 a decrease; of the 44 in the cloths and clothing group, 38 show an increase, 1 shows the same price as the average for the base period, and 5 show a decrease; of the 13 in the fuel and lighting group, 11 show an increase and 2 show a decrease; of the 31 in the metal and implements group, 24 show an increase, 2 show the same price as the average for the base period, and 5 show a decrease; of the 20 in the lumber and building materials group, 17 show an increase and 3 a decrease; of the 9 in the drugs and chemicals group, 7 show an increase and 2 a decrease; of the 13 in the house furnishing goods group, 8 show an increase and 5 a decrease; of the 12 in the miscellaneous group, 10 show an increase and 2 a decrease. Of the 204 commodities included in this table, 169 show an increase, 3 show the same price as the average for the base period, and 32 show a decrease.
The number of articles according to classified per cents of increase and decrease is also shown in the following table. Of the 169 commodities that showed an increase in 1908 over the average for 1890 to 1899,36 advanced less than 10 per cent, 57 advanced 10 and under 25 per cent, 52 advanced 25 and under 50 per cent, 21 advanced 50 and under 100 per cent, and 3 advanced 100 per cent and more. Of the 32
commodities which showed a decrease, 15 decreased less than 10 per cent, 9 decreased 10 and under 25 per cent, 6 decreased 25 and under 50 per cent, and 2 decreased 50 per cent and more.

The number and per cent of articles which showed each specified increase or decrease are given in the following table:

NUMBER AND PER CENT OF ARTICLES, BY CLASSIFIED PER CENT OF INCREASE OR DECREASE, 1908 COMPARED WITH AVERAGE PRICE FOR 1890-1899.

|  | $\begin{aligned} & \text { Number } \\ & \text { articles. } \end{aligned}$ | Per cënt articles. |  | $\begin{aligned} & \text { Number } \\ & \text { of } \\ & \text { articles. } \end{aligned}$ | Per cent of articles. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Price increased- |  |  | Price decreased- |  |  |
| 100 per cent and more.... | 3 | 1.5 | Less than 10 per cent..... | 15 | 7.4 |
| 50 and under 100 per cent.. | 21 | 10.3 | 10 and under 25 per cent. . | 9 | 4.4 |
| 25 and under 50 per cent... | 52 | 25.5 | 25 and under 50 per cent.. | 6 | 2.9 |
| 10 and under 25 per cent... | 57 | 27.9 | 50 per cent and more.... | 2 | 1.0 |
| Less than 10 per cent...... | 36 | 17.6 |  |  |  |
| Total. | 169 | 82.8 | Total. | 32 | 15.7 |
| Price same as base. | 3 | 1.5 | Grand total. | 204 | 100.0 |

Of the 204 articles included in this table, it is seen that 169, or 82.8 per cent, show an increase in price; 3 articles, or 1.5 per cent, show the same price as the average for the base period, and 32 articles, or 15.7 per cent, show a decrease in price in 1908 as compared with the average price for the base period.

Of the 258 commodities considered in the compilation of prices for 1908, the average price for 162 commodities was lower in 1908 than in 1907, the average price of 33 was the same in 1908 as in 1907, and the average price of 63 was higher in 1908 than in 1907.
The following table shows the relative prices of certain related articles, so grouped as to render easy a comparison of the course of these prices during the years from 1890 to 1908:

RELATIVE PRICES OF CERTAIN GROUPS OF RELATED ARTICLES, 1890 TO 1908.
[ Average price for $1890-1899=100.0$.

RELATIVE PRICES OF CERTAIN GROUPS OF RELATED ARTICLES, 1890 TO 1908-Cont'd.
[Average price for 1890-1899=100.0.]

RELATIVE PRICES OF CERTAIN GROUPS OF RELATED ARTICLES, 1890 TO 1908-Concluded.
[Average price for $1890-1899=100.0$.]

a Quotations discontinued.
This table shows for all of the 6 articles grouped under cattle and cattle products (cattle, fresh beef, beef hams, mess beef, tallow, and hides) an advance in price in 1891, but not in the same degree; in 1892, a decline in all of the articles in this group; in 1893, an increase, except for hides, for which there was a further decline; in 1894, a decline, except for beef hams, which increased; in 1895, an increase, except for beef hams and tallow; in 1896, a decline in all of the articles; in 1897, an increase, except for tallow; in 1898, an increase for all of the articles, except beef hams; in 1899, an increase for all; in 1900, a decline, except for mess beef and tallow; in 1901, an
increase for cattle, tallow, and hides, and a decline for fresh beef, beef hams, and mess beef; in 1902, an increase for all; in 1903, a decrease for all; in 1904, an increase for cattle, fresh beef, and hams, and a decrease for mess beef, tallow, and hides; in 1905, an increase for cattle, mess beef, and hides, and a decrease for fresh beef, beef hams, and tallow; in 1906, an increase for cattle, hides, and tallow, and a decrease for fresh beef, beef hams, and mess beef; in 1907, an increase for all except hides, which decreased; in 1908 an increase for cattle, fresh beef, beef hams, and mess beef, and a decrease for tallow and hides.

For the 19 years from 1890 to 1908 the lowest relative price for cattle was 88.3 in 1896, the highest 139.5 in 1902; the lowest for fresh beef 89.2 in 1890, the highest 129.5 in 1908; the lowest for beef hams 80.4 in 1890, the highest 153.2 in 1908; the lowest for mess beef 84.8 in 1892, the highest 164.5 in 1908; the lowest for tallow 76.3 in 1897, the highest 144.6 in 1902; the lowest for hides 68.4 in 1894, the highest 164.7 in 1906. The facts for the other groups may be seen by reference to the table.

General Tables I, II, III, IV, and V follow.

Table 1.-WhoLesale Prices of Commodities in 1908.
[For explanation and discussion of this table, see pages 218 to 228.]

## RECENT REPORTS OF STATE BUREAUS OF LABOR STATISTICS.

## KANSAS.

Twenty-second Annual Report of the Bureau of Labor and Industry for 1906. W. L. A. Johnson, Commissioner. viii, 256 pp .

The subjects presented in this report are considered under seven titles, as follows: Wage-earner statistics, 88 pages; labor organization statistics, 20 pages; strikes and labor difficulties, enforcement of labor laws, and legal decisions affecting labor, 29 pages; child labor and factory inspection, 13 pages; industrial opportunities, 18 pages; directory of manufacturers, 22 pages; manufacturing statistics, 13 pages; proceedings of the ninth annual convention of the State Society of Labor, 49 pages.

Wage-earners.-This section presents a summary of returns from employees in four general groups of employment, but the figures shown are of little representative value, because the bureau was forced to rely on what is termed the "mailing system," and only a few wage-earners were willing to take the trouble to fill out and return the schedule sent them. Those employed in railway train service reported average earnings for the year of $\$ 1,123.11$, cost of living, $\$ 614.17$, and value of homes owned, $\$ 1,830.95$. Those employed in railway shops reported average earnings for the year of $\$ 771.38$, cost of living, $\$ 577.22$, and average value of homes owned, $\$ 1,532.59$. Those employed in building trades reported average earnings for the year of $\$ 674.79$, cost of living, $\$ 438.52$, and average value of homes owned, $\$ 1,518.45$. Those employed in miscellaneous trades reported average earnings for the year of $\$ 649.11$, cost of living, $\$ 417.49$, and average value of homes owned, $\$ 1,403.75$.

Labor Organizations.-Under this title the returns from 156 labor organizations are presented in tabular form. The information furnished shows the name, location, and date of organization, membership and affiliation of the various organizations, average months of employment, daily hours of labor, percentage of members unemployed, average wages, and changes in rates of wages; strikes, with duration, members involved, days lost, wage loss, and result; and number of fatal and nonfatal accidents. On June 30, 1906, the
membership of the 156 organizations making returns was 12,454 . Increase in wages was reported by 56, and decrease in wages by 6 organizations. There were 50 fatal and 339 nonfatal accidents during the year.

Strikes and Labor Difficulties.-The data reported relative to strikes show that 45 strikes were engaged in during the year, 40 organizations reporting that 5,806 members were involved. Thirtynine organizations reported the number of days lost as 370,477 and the wage loss as $\$ 932,890$. The total amount of strike benefits paid out by 30 organizations reporting was $\$ 30,838$. Of the strikes, 26 were successful, 11 were partly successful, and 8 were still pending at the time of making the report.

Manufatures.-Returns received from 2,008 manufacturing establishments indicate an invested capital of $\$ 86,054,465$; the employment of 32,483 wage-earners, who received in wages during 1906, $\$ 20,248,302$; and a product valued at $\$ 207,789,483$, from the use of raw material costing $\$ 156,564,241$.

## Twenty-third Annual Report of the Bureau of Labor and Industry for 1907. W. L. A. Johnson, Commissioner. viii, 351 pp.

The subjects presented in this report are considered under eight titles, as follows: Wage-earner statistics, 100 pages; labor organization statistics, 24 pages; child labor and factory inspection, 93 pages; strikes, labor difficulties, law enforcement, and legal decisions affecting labor, 25 pages; directory of manufacturers, 25 pages; manufacturing statistics, 33 pages; lead and zinc statistics, 10 pages; and proceedings of the tenth annual convention of the State Society of Labor, 33 pages.

Wage-earners.-This section presents a summary of returns from employees in four general groups, but the figures are not representative, because of the small number of wage-earners who reported. Those employed in railway train service reported average earnings for the year of $\$ 1,183.74$, cost of living, $\$ 773.77$, and average value of homes owned, $\$ 2,382.81$. Those employed in railway shops reported average earnings for the year of $\$ 795.25$, cost of living, $\$ 642.03$, and average value of homes owned, $\$ 1,463.63$. Those employed in building trades reported average earnings for the year of $\$ 725.63$, cost of living, $\$ 540.49$, and average value of homes owned, $\$ 1,561.25$. Those employed in miscellaneous trades reported average earnings for the year of $\$ 669.99$, cost of living, $\$ 449.55$, and average value of homes owned, $\$ 1,122.16$.

Labor Organizations.-Under this title the returns from 206 labor organizations are presented in tabular form. The information
furnished shows the name, location, and date of organization, membership and affiliation of the various organizations, average months of employment, daily hours of labor, percentage of members unemployed, average wages, and changes in rates of wages; strikes, with duration, members involved, days lost, wage loss, and result; and number of fatal and nonfatal accidents. On June 30, 1907, the membership of the 206 organizations making returns was 13,058 . Increase in wages was reported by 103 and decrease in wages by 1 organization. There were 67 fatal and 437 nonfatal accidents during the year.
Strikes and Labor Diffioulties.-The data reported relative to strikes show that 18 strikes were engaged in, involving 875 members of 15 labor organizations. The number of days lost as reported by 12 organizations was 57,199 , and the wage loss reported by 10 organizations $\$ 113,017$. The total amount of strike benefits paid out by 9 organizations reporting was $\$ 21,571$. Of the strikes, 7 were successful, 2 were partly successful, 4 were lost, and 5 were still pending at the time of making the report.

Manufactures.-Returns received from 1,769 manufacturing establishments indicate an invested capital of $\$ 119,983,322$; the employment of 53,543 wage-earners, who received in wages during 1907, $\$ 33,135,052$; using raw materials costing $\$ 181,726,766$, and producing goods valued at \$241,943,553.

## Twenty-fourth Annual Report of the Bureau of Labor and Industry for 1908. W. L. A. Johnson, Commissioner. 260 pp.

The subjects presented in this report are considered under seven titles, as follows: Wage-earners statistics, 20 pages; labor organization statistics, 61 pages; child labor and factory inspection, 67 pages; strikes and labor difficulties, enforcement of labor laws, and decisions affecting labor, 46 pages; industrial conditions, 14 pages; manufacturing statistics, 28 pages; review of work of Association of Officials of Bureaus of Labor Statistics of America, 14 pages.

Wage-earners.-This section presents the results of an investigation of the earnings in one week of 1908 by 56,378 working people, as reported by 1,146 establishments. Of this number, 29.5 per cent received less than $\$ 10$ for their week's work, 69.3 per cent received less than $\$ 1.5,87.6$ per cent received less than $\$ 20$, and 97.6 per cent received less than $\$ 25$.
Labor Organizations.-Under this title is presented a synopsis of the proceedings of the state Federation of Labor, and in tabular form the returns from 502 labor organizations. The information furnished gives the name, location, date of organization, and mem-
bership of the various organizations, average months of employment, daily hours of labor, average wages, and changes in rates of wages; strikes, with duration, members involved, days lost, wage loss, and result; number of fatal and nonfatal accidents. Increase in wages was reported by 26 and decrease in wages by 1 organization. There were 24 fatal and 254 nonfatal accidents during the year.

Strikes and Labor Difficulties.-The data reported relative to strikes show that 31 strikes were engaged in, 28 labor organizations reporting that 4,101 members were involved. The number of days lost, as reported by 27 organizations, was 222,085 , and the wage loss $\$ 559,556$. The total amount of strike benefits paid out by 29 organizations reporting was $\$ 20,482$. Of the strikes, 25 were successful, 3 were lost, and 3 were still pending at the time of making the report.
Manufactures.-Returns received from 1,653 manufacturing establishments indicate an invested capital of $\$ 125,875,848$, the employment of 52,309 wage-earners, who received in wages during the year $\$ 30,497,667$; using raw materials costing $\$ 178,959,544$, with a product valued at $\$ 233,984,332$.

## MASSACHUSETTS.

Thirty-eighth Annual Report on the Statistics of Labor for the year $190 \%$. Charles F. Gettemy, Chief of Bureau. xxv, 663 pp.

This report (following a general review of the work of the bureau, etc.) is made up of seven parts, as follows: Part I, Strikes and lockouts for the year ending September 30, 1906, 48 pages; Part II, Recent British legislation affecting workingmen, 202 pages; Part III, Industrial opportunities, 64 pages; Part IV, Statistics of manufactures, 98 pages; Part V, Free employment offices, 56 pages; Part VI, Strikes and lockouts for the year ending September 30, 1907, 86 pages; Part VII, Changes in rates of wages and hours of labor for the year ending September 30, 1907, 98 pages.

Strikes and Lockouts for the year ending September 30, 1906.-Of the 222 labor disputes during the year ending September 30, 1906, 212 were strikes, 9 were lockouts, and 1 partook of the nature of both a strike and a lockout. The number of disputes shows an increase of 64 over that of the previous year. The industries in which labor disputes occurred, with the number of disputes in each, are as follows: Boots and shoes, 35; building trades, 44; city and town employees, 4 ; clothing, 3 ; conveyances, 4 ; food, tobacco, and liquors, 4 ; leather and rubber goods, 3 ; machinery and metals, 28; paper and paper goods, 4; printing and publishing, 11; stone and clay products, 12; textiles, 50; transportation, 10; water, light,
and power, 1 ; and wooden goods, 9 . The following table shows the number of disputes, by causes and results:

GTRIKES AND LOCKOUTS, BY CAUSES AND RESULTS, YEAR ENDING SEPTEMBER 30, 1906.

| Cause. | Result. |  |  |  |  | Total. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Succeeded. | Compromised. | Frailed. |  | $\begin{gathered} \text { Result } \\ \text { unknown. } \end{gathered}$ |  |
|  |  |  | Strikers reinstated. | Places filled. |  |  |
| Against change in working conditions..... | 2 | ....... | 2 |  |  | 4 |
| Against employment of apprentices....... | 1 |  | 1 |  |  | 2 |
| Against employment of certain persons.... | 2 | 2 | 3 | 3 | . ......... | 10 |
| Against reduction in wages, ............... |  |  | 2 | 1 | - | 3 |
| For change in working conditions. . . . . . . . | 4 | 1 | 6 | 2 | ........... | 13 |
| For closed shop. . . . . . . . . . . . . . . . . . . . . . . . | 7 |  | 3 | 11 |  | 21 |
| For increase of wages. . . . . . . . . . . . . . . . . . - | 33 | 19 | 14 | 23 | 4 | 93 |
| For recognition of union..................... | 1 |  | $\cdots$ | 2 | .......... | 3 |
| For reinstatement of discharged employees. | 1 |  | 6 | 6 |  | 13 |
| For shorter workday.......................... | 14 | 1 | 3 | 10 | 4 | 32 |
| In sympathy....................................... |  |  |  | 3 |  | 3 |
| Miscellaneous. ................................... | 4 | 4 | 8 | 9 |  | 25 |
| Total. | 69 | 27 | 48 | 70 | 8 | 222 |

There were 113 disputes- 93 for increase, 3 against reduction, and 17 for other causes-in connection with wages. Of this number, 36 succeeded, 23 were compromised, 50 failed, and for 4 the results are not stated. Of the 222 strikes and lockouts, 69 succeeded, 27 were compromised, 118 failed, and for 8 the results are not stated. The following table shows the number of persons directly involved and working days lost in the 222 disputes:

NUMBER AND DURATION OF STRIKES AND LOCKOUTS, PERSONS DIRECTLY INVOLVED, AND WORKING DAY'S LOST, YEAR ENDING SEPTEMBER 30, 1906.

| Duration of disputes. | Number of disputes. | Persons directly involved. | Working days lost. | Duration of disputes. | Number of disputes. | Persons directly involved. | Working days lost. |

| 24 days..... | 2 | 432 | 11,568 |  |  |  |  |

Strikes and Lockouts for the fear ending September 30, 1907.-Of the 209 labor disputes during the year ending September 30, 1907, 205 were strikes and 4 were lockouts. The number of disputes shows a decrease of 13 over that of the previous year. The industries in which labor disputes occurred, with the number of disputes in each, follow: Building and stone working, 49; clothing, 41; food, liquors, and tobacco, 4; leather and rubber goods, 2 ; metals, machinery, and shipbuilding, 28; paper and paper goods, 5 ; printing and allied trades, 1 ; public employment, 2; textiles, 50 ; transportation, 19; wood working and furniture, 5 ; and miscellaneous, 3. The following table shows the number of disputes, by causes and results:

STRIKES AND LOCKOUTS, BY CAUSES AND RESULTS, YEAR ENDING SEPTEMBER 30, 1907.

| Cause. | Result. |  |  |  | Total. |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | Suoceeded. | Compromised. | Failed. |  |  |
|  |  |  | Strikers reinstated. | Places filled. |  |
| Against change in working conditions. | 1 | 1 | 6 |  | 8 |
| Against employment of certain persons | 1 |  | 2 | 2 | 5 |
| Against reduction in wages ............. |  |  |  | 3 | 3 |
| For change in working conditions. |  | . | 3 | 2 | 5 |
| For closed shop................... | 3 |  | 4 | 6 | 13 |
| For increase of wages.. | 28 | 11 | 34 | 34 | 107 |
| For recognition of union. | 2 | . | 1 | 3 | 6 |
| For reinstatement of discharged employ |  |  | 4 | 5 | 9 |
| For shorter workday . . . . . . . . . . . . . . . | 5 | 1 | 4 | 4 | 14 |
| In sympathy ......... | 3 |  | 2 | 5 | 10 |
| Miscellaneous... | 4 | 3 | 10 | 12 | 29 |
| Total. | 47 | 16 | 70 | 76 | 209 |

There were 121 wage disputes- 107 for increase, 3 against reduction, and 11 for other causes in connection with wages. Of this number, 30 succeeded, 13 were compromised, and 78 failed. Of the 209 strikes and lockouts, 47 succeeded, 16 were compromised, and 146 failed. The following table shows the number of persons directly involved and working days lost in the 209 disputes:

NUMBER AND DURATION OF STRIKES AND LOCKOUTS, PERSONS DIRECTLY INVOLVED, AND WORKING DAYS LOST, YEAR ENDING SEPTEMBER 30, 1907.

| Duration of disputes. | Number of disputes. | Persons directly involved. | Working days lost. | Duration of disputes. | Number of disputes. | Persons directly involved. | Working days lost. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

Recent British Labor Legislation.-In Part II is given the results of an exhaustive inquiry made by the British royal commission on trade disputes and combinations, the text of the principal acts affecting the legal status of trade unions, and the most recent legislation on the subject of workmen's compensation for injuries sustained in the course of employment.

Industrial Opportunities not yet Utilized.-This chapter consists of returns from the boards of selectmen of 297 towns, or 92.5 per cent of all the towns of the State. The purpose of the investigation was to ascertain the advantages offered by these towns for the establishment of some industry. From these returns a series of eight tables is presented showing as follows: Land available for manufacturing purposes, railroad facilities, and water power available; local facilities, such as gas and electric-light plants, electric railways, etc.; raw materials and natural products; idle workshops and factories; industries wanted, by towns; industries wanted, by industries; summer resorts; and tax rebates.

Statistics of Manufactures, 1905 and 1906.-This is the twenty-first of a series of annual reports on manufacturing statistics. The statistics presented are compiled from the returns of 5,055 establishments, each of which made a report for the two years under consideration. Comparative tables are given, which show, for the years 1905 and 1906, the number of establishments controlled by private firms, by corporations, and by industrial combinations, together with the number of partners and stockholders interested therein; the capital devoted to production; the cost value of stock and materials used, and the selling value of the goods made; the smallest, greatest, and average number of persons employed, and aggregate employees, by months; the total wages paid during each year, average yearly earnings per employee, and classified weekly wages in selected industries, by sex and age; average days in operation during each year,
and average proportion of business done. Seventy-nine classified industries are represented.
The principal facts as to ownership are shown in the following table:

FIRMS, CORPORATIONS, AND INDUSTRIAL COMBINATIONS, AND PARTNERS AND STOCKHOLDERS IN 5,055 IDENTICAL ESTABLISHMENTS, 1905 AND 1906.

| Year. | Firms. | Corporations. | $\begin{aligned} & \text { Indus- } \\ & \text { trial } \\ & \text { combi- } \\ & \text { nations. } \end{aligned}$ | Partners. | Stockholders. | Average partners to a firm. | Average stockholders to a corporation. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1905. | 3,094 | 1,866 | 95 | 4,751 | 60,650 | 1. 54 | 33.93 |
| 1906. | 2,979 | 1,981 | 95 | 4,527 | 61,961 | 1.53 | 32.68 |

From the above table it will be seen that the tendency continues to be toward an increase of number of establishments controlled by corporations and a decrease of establishments under private control.

The following table presents statistics separately for 9 principal industries, in aggregate for 70 other industries, and totals for the 79 industries reported on for the years 1905 and 1906:

STATISTICS OF MANUFACTURES, 1905 AND 1906.

In the above table the 9 specified industries, the aggregate for 70 other industries, and the total for the 79 industries all show an increase in value of materials and products and in wages paid in 1906 over 1905. The greatest increases in wages paid in the 9 specified industries appear in worsted goods and in machines and machinery. The greatest increase in value of stock used and in goods made was in metals and metallic goods.

The capital devoted to production in the 79 industries in 1905 amounted to $\$ 616,355,050$ and in 1906 to $\$ 651,221,011$.

Data relative to employees, earnings, and days in operation are presented in the table following, the establishments considered being the same as in the table preceding:

AVERAGE NUMBER OF EMPLOYEES, AVERAGE YEARLY EARNINGS, AND AVERAGE DAYS IN OPERATION IN 9 PRINCIPAL INDUSTRIES, IN 70 OTHER INDUSTRIES, AND IN ALL INDUSTRIES, 1905 AND 1906.

| Industry. | A verage number of employees. |  |  | A verage yearly earnings. |  |  | Average days in operation. |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1905. | 1906. | Per cent of increase (+) or decrease (-). | 1905. | 1906. | Per cent of increase (+) or decrease (-). | 1905. | 1906. | Per cent of increase (+) or decrease (-). |

| Worsted goods. . | 21,238 | 22,544 | +6.15 | 409. 69 | 440. 10 | +7.42 | 303.45 | 302.81 | -. 21 |
| Other industries (70) | 173,798 | 188,964 | +8.73 | 493.91 | 507.17 | +2.68 | 293.45 | 294.45 | +. 34 |
| Total. | 476,105 | 509,288 | $+6.97$ | 477.07 | 494.96 | +3.75 | 295.16 | 297.46 | $+.78$ |

Only one of the principal industries shows a decrease in the average number of employees, all but one show an increase in average yearly earnings, and but three show a decrease in average days in operation in 1906 as compared with 1905. In all industries considered together an increase is shown in the three items of average employees, average yearly earnings, and average days in operation.

For the total 79 industries the proportion of business done of full or maximum production was 71.49 per cent in 1905 and 73.80 per cent in 1906; the proportion of actual running time of possible working time was 96.78 per cent in 1905 and 97.21 per cent in 1906.

The table following shows the number of employees (wageearners) earning the indicated weekly wages. The number of employees given is the number reported in each industry for the week
in which the largest number was employed, and does not, therefore, agree with the number shown in the table preceding.

NUMBER OF MALE AND FEMALE ADULTS AND OF YOUNG PERSONS IN 79 INDUSTRIES, BY CLASSIFIED WEEKLY WAGES, 1005 AND 1906.

| Classified weekly wages. | 1905. |  |  |  | 1906. |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

|  | Males. | Females. |  |  | Males. | Females. |  |  |
| Under \$5. | 8,585 | 16,073 | 26,230 | 50,888 | 7,089 | 12,755 | 22,965 | 42,809 |
| \$5 and under $\$ 6$. | 9,036 | 17,445 | 16,824 | 43,305 | 7,370 | 16,211 | 18,249 | 41, 830 |
| \$6 and under \$7. | 18,034 | 24,889 | 13, 493 | 56,416 | 16, 305 | 24,562 | 15,499 | 56, 368 |
| \$7 and under ${ }^{\text {\% }} 8$. | 28,163 | 22.316 | 7,209 | 57, 688 | 26,183 | 22,679 | 9,923 | 58,785 |
| 88 and under ${ }^{9} 9$. | 29,097 | 18,268 | 3,645 | 51,010 | 31,175 | 20,229 | 5,607 | 57,011 |
| 89 and under $\$ 10$ | 42,062 | 14,228 | 2,503 | 58, 793 | 44,908 | 16,369 | 3,517 | 64,794 |
| $\$ 10$ and under \$12.. | 53, 226 | 12,061 | 1,301 | 66, 588 | 58,621 | 14,893 | 2,073 | 75,587 |
| $\$ 12$ and under \$15.. | 63,183 | 5,729 | 491 | 69, 403 | 69, 202 | 7,067 | 835 | 77, 104 |
| \$15 and under \$ $20 .$. | 57,854 | 2,244 | 122 | 60, 220 | 63, 735 | 2,672 | 220 | 66, 467 |
| \$20 and over. | 20,446 | 261 | -8 | 20,715 | 23,315 | 430 | 26 | 23,771 |
| Total. | 329,686 | 133,514 | 71,826 | 535,026 | 347,743 | 137,867 | 78,914 | 564,524 |

Comparing the totals for each class, it is seen that there was a falling off in 1906 in the numbers earning under $\$ 7$ per week as compared with 1905, while the number in each of the other wage classes showed an increase in 1906 as compared with 1905.
In order to show the actual result of the productive forces of industry, the element of cost of material must be deducted from the total value of product, and the remainder will show only the industry product, or the new values created. This has been done in the case of the nine leading industries, also the division of industry product between the wage fund and the fund devoted to profit and minor expenses, as insurance, interest, rent, freight, commissions, salaries, etc. The results for the years 1905 and 1906 appear in the following table:

INDUSTRY PRODUCT, WAGES, AND PROFIT AND MINOR EXPENSES IN 9 gELECTED INDUSTRIES, 1905 AND 1906.
1905.

| Industry. | Industry product. | Wages. | Profit and minor expenses. | Per cent of industry product. |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | $\begin{gathered} \text { Paid } \\ \text { in } \\ \text { wages. } \end{gathered}$ | Devoted to profit and minor expenses. |
| Boots and shoes. | \$63,895,004 | \$38,034,515 | \$25,860, 489 | 59.53 | 40.47 |
| Carpetings. | 4,150,415 | 2,368,190 | 1,782,225 | 57.06 | 42.94 |
| Cotton goods. | 60,597,748 | 35,097,153 | 25,500,595 | 57.92 | 42.08 |
| Leather.............. | 11,224,818 | 4,228,230 | 6,996,588 | 37.67 | 62.33 |

INDUSTRY PRODUCT, WAGES, AND PROFIT AND MINOR EXPENSES IN 9 SELECTED INDUSTRIES, 1905 AND 1906-Concluded.
1906.

| Industry. | Industry product. | Wages. | $\begin{aligned} & \text { Profit and } \\ & \text { minor } \\ & \text { expenses. } \end{aligned}$ | Per cent of industry product. |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | $\begin{gathered} \text { Paid } \\ \text { in } \\ \text { wages. } \end{gathered}$ | Devoted to profit and minor expenses |
| Boots and shoes. | \$72,829,316 | \$41,815,689 | \$31, 013,627 | 57.42 | 42.58 |
| Carpetings. | 4,542,484 | 2,515,589 | 2,026,895 | 55.38 | 44.62 |
| Cotton goods | 71, 820,979 | 39,492,044 | 32,328,935 | 54.99 | 45.01 |
| Mrathines and machiner | 10,380,986 | 4,631,635 | 5,749,351 | 44.62 | 55. 38 |
| Metals and metallic good | -31,969,221 | -16,246,101 | 15,723; 120 | 54.88 50.82 | 45.12 49.18 |
| Paper............... | 16,043,400 | 6,392,865 | 9,650,535 | 39.85 | 60.15 |
| Woolen goods. | 24,816,776 | 11,275,391 | 13,541,385 | 45.43 | 54.57 |
| Worsted goods. | 22,005,958 | 9,921,716 | 12,084,242 | 45.09 | 54.91 |

In 5 of the 9 industries, in 1905, more than one-half of the industry product was paid out in wages, the largest showing being in boots and shoes, with 59.53 per cent, followed by cotton goods, with 57.92 per cent, and carpetings, with 57.06 per cent. The industry devoting the lowest proportion of the industry product to labor was worsted goods, with 40.35 per cent. In 1906, also, 5 industries paid out more than one-half of the industry product in wages. The boot and shoe industry paid the highest proportion, 57.42 per cent, and the paper industry the lowest, 39.85 per cent.

Free Employment Offices.-During the first year of its existence, which ended November 30, 1907, the free employment office located in Boston received applications for positions from 25,350 males and 9,600 females. Applications were received from employers for the help of 19,965 males and 13,731 females. Positions were offered 15,296 males and 8,372 females. Reports were received that positions had been filled by 8,671 males and 5,809 females at an average cost of $\$ 1.35$ per position.
Rates of Wages and Hours of Labor.-During the year ending September 30, 1907, increase in wages was given to 173,621 employees, averaging $\$ 1.10$ per week, without being the result of strikes. In the case of 3,209 other employees increases were granted, averaging $\$ 0.88$ per week, as the result of strikes. Decrease in wages was reported for 319 employees at an average of $\$ 0.69$ per week. During the same period hours of labor were shortened for 26,244 employees and lengthened for 298, resulting in an average reduction of 3.9 hours a week for each employee affected.

## Twenty-second Annual Report on the Statistics of Manufactures for the year 1907. xxxvi, 82 pp .

In former years the statistics of manufactures were arranged in the form of comparative tables, the comparisons being limited in
each report to returns of such identical establishments as had made report to the Bureau for two years in succession. In the present year a new plan has been adopted, the reports of all establishments reporting being published as an annual census of manufactures, regardless of whether or not returns were received from all covering the previous year. Thus for the year 1907 returns are given for 5,671 establishments, only 5,109 of which made report for the preceding year. Tables are presented showing for these 5,671 establishments the amount of capital devoted to production; the cost value of stock and materials used and the selling value of goods made; the smallest, greatest, and average number of persons employed; the total wages paid, average yearly earnings per employee, and classified weekly wages; the days in operation and the proportion of business done. For the nine leading industries comparative tables are also given showing the per cent of employees earning each classified wage rate in 1897 and in 1907.

The following table presents statistics separately for 9 principal industries, in aggregate for all other industries, and totals for the State for the year 1907.

STATISTICS OF MANUFACTURES, 1907.

| Industry. | Number of establishments. | Capital devoted to production. | Value of stock used. | Value of goods made. | Total wages paid. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Boots and shoes | 729 | \$39,296,256 | \$153,763,472 | \$233,025,182 | \$46,079,854 |
| Carpetings. | 14 | 7,739,091 | 10,094,317 | 15,162,507 | 2,855,968 |
| Cotton goods | 178 | 149,053,322 | 108,137,762 | 193,276,574 | 45,304,115 |
| Leather. | 122 | 27,178,660 | 34,364,843 | 46,903,784 | 5,284,362 |
| Machines and machinery | 407 | 67,515,260 | 31,051,035 | 79,342,230 | 26,230,640 |
| Metals and metallic good | 477 | 33,693,146 | 38,872,929 | 73,124,952 | 17,982,602 |
| Paper.. | 89 | 27,987,312 | 23,927,908 | 42,707,680 | 6,735,401 |
| Woolen goods. | 146 | 36,285,276 | 35,221,467 | 58,262,898 | 11,170,079 |
| Worsted goods | 49 | 47,544,641 | 46,906,549 | 74,667,461 | 12,062,680 |
| Other industries. | 3,460 | 263,264,792 | 297,500,676 | 547,957,987 | 104,485,412 |
| Total. | 5,671 | 699,557,756 | 779,840,958 | 1,364,431,255 | 278,191,113 |

Data relative to employees, earnings, days in operation, and proportion of business done are presented in the table following:

AVERAGE NUMBER OF EMPLOYEES, AVERAGE YEARLY EARNINGS, AVERAGE DAYB IN OPERATION, AND PROPORTION OF BUSINESS DONE IN 9 PRINCIPAL INDUSTRTES AND IN ALL INDUSTRIES, 1907.

| Industry. | Average number of employees. |  |  | Average yearly earnings. | A verage days in operation. | Proportion of business done. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Males. | Females. | Total. |  |  |  |
| Boots and shoes. | 55,036 | 26,622 | 81,658 | \$564.30 | 290.64 | 69.51 |
| Carpetings. | 3,386 | 2,854 | 6,240 | 457.69 | 297.38 | 85.93 |
| Cotton goods. | 54,102 | 48,323 | 102,425 | 442.32 | 300.62 | 89.87 |
| Leather... | 9,993 | 163 | 10,156 | 520.32 | 298.08 | 69.71 |
| Machines and machinery | 42,083 | 699 | 42,782 | 613.12 | 296.41 | 74.43 |
| Metals and metallic goods | 27,592 | 3,445 | 31,037 | 579.39 | 296.68 | 71.50 |
| Paper................. | 8,582 | 4,964 | 13,546 | 497.22 | 289.46 | 89.06 |
| Woolen goods. | 15,776 | 8,300 | 24,076 | 463.95 | 286.18 | 72.56 |
| Worsted goods. | 14,179 | 12,497 | 26,676 | 452.19 | 295.04 | 85.16 |
| Other industries. | 136,742 | 64,644 | 201,386 | 518.83 |  |  |
| Total. | 367,471 | 172,511 | 539,982 | 515.18 | 293.54 | 70.96 |

The table following shows the number of employees (wage-earners) of each sex earning the indicated weekly wages. The number of employees given is the number reported in each industry for the week in which the largest number was employed, and does not, therefore, agree with the number shown in the table preceding.

NUMBER OF MALE AND FEMALE ADULTS AND OF YOUNG PERSONS EMPLOYED IN MANUFACTURING INDUSTRIES, BY CLASSIFIED WEEKLY WAGES, 1907.

| Classified weekly wages. | Persons 21 years of age and over. |  | Young (under 21). | Total. |

## NEBRASKA.

Tenth Biennial Report of the Bureau of Labor and Industrial Statistics for the years 1905 and 1906. Burrett Bush, Deputy Commissioner. 221 pp .

The subjects' presented in this report are: Summary of the work of the bureau, 5 pages; child labor, 24 pages; directory of manufacturers, 147 pages; crop statistics, 41 pages.

Child Labor.-In this section of the report are given arguments for the restriction of child labor and the text of recent legislation upon the subject in the State.

## NORTH DAKOTA.

Eighth and Ninth Biennial Reports of the Commissioner of Agriculture and Labor for the term ending June 30, 1906. W. C. Gilbreath, Commissioner. 117 pp .

The subjects presented in this report are: Statistics of agriculture, 60 pages; orchards and fruit, 4 pages; live stock, 8 pages; vital statistics, 4 pages; farm labor, 4 pages; coal mines, 2 pages; dairy industry, 13 pages.

Farm Labor.-Tables show for each county the number of male and female employees reported in 1902, 1903, 1904, and 1905, their average monthly wages, and the total amount paid in wages. The
lowest average monthly wages reported in any county in 1905 was $\$ 20.46$ for males and $\$ 8$ for females; the highest average was $\$ 40$ for males and $\$ 21.84$ for females.

Coal Mines.-Returns are given from the coal mines of the State for each year of the period covered. In 1905, 41 mines reported the employment of 209 persons and the production of 237,474 tons of coal.

## PENNSYLVANIA.

Annual Report of the Secretary of Internal Affairs of the Commonwealth of Pennsyluania. Vol. XXXV, 1907. Part III, Industrial Statistics. John L. Rockey, Chief of Bureau. 278 pp.

In the first of the two parts composing this report brief special articles are presented upon the subjects of the unemployed, prices and cost of living, farm products and wages, the liquor business, the cigar industry, the Portland cement industry, the clays of the State, and industrial accidents.

Industrial Aocidents.-There occurred, during 1907, in anthracite mining 607 fatal and 1,746 nonfatal accidents, in bituminous mining 437 fatal and 1,678 nonfatal accidents, in the iron and steel industry 176 fatal and 1,179 nonfatal accidents, in the pig iron industry 72 fatal and 623 nonfatal accidents, in other industries 130 fatal and 914 nonfatal accidents, making a total loss of 1,422 lives and the injury of $\mathbf{6 , 1 4 0}$ persons.

General Statistics of Manufactures and Mining.-The second section of the report embraces data gathered from 3,133 establishments of the State engaged in the manufacturing and the mining industries, giving a record of the capital invested, value of products, average value of product per employee, days in operation, number of working people (men, women, and minors), aggregate wages paid, average yearly earnings, average daily wages, etc. Data relative to strikes and lockouts are reported for coal mining and for the iron and steel, tin plate, and a few minor industries. The information gives for the various disputes cause of dispute, number of persons involved, days lost, and result. Data are further presented for the different industries showing the number of establishments making returns and giving statistics pertaining to number of employees owning their homes, average rent paid by those renting, working hours per week, nationality of employees, accidents, causes of time lost, and trade conditions.

The 3,133 establishments considered in this investigation had invested in plants and working capital a total of $\$ 992,560,486$, and the market value of production for the year aggregated $\$ 1,807,276,403$. The various industries were in operation during the year an average of 278 days and employed a total of 790,809 wage-earners ( 689,868
men, 74,691 women, and 26,250 minors), to whom were paid in wages the sum of $\$ 422,984,854$ to the men, $\$ 23,258,944$ to the women, and $\$ 5,907,367$ to the minors. The average yearly earnings of all wageearners was $\$ 571.76$ (of the men $\$ 642.13$, of the women $\$ 311.40$, and of the minors $\$ 225.04$ ). The average daily wage of all employees was $\$ 2.05$. For each employee the average value of product for the year amounted to $\$ 2,279.73$.

Iron, Steel, and Tin-Plate Production.-The following summary statements show the more important items for the year 1907 relating to the production of pig iron, steel, rolled iron and steel, and tin plate:

## PIG IRON.

Capital invested. ..... \$143, 859, 428
Gross tons of production ..... 11,311, 985
Realized value. ..... \$206, 443, 155
Value of basic material ..... $\$ 100,308,832$
A verage days in operation ..... 326
A verage number of adult male employees ..... 18, 949
Aggregate wages paid adult male employees. ..... $\$ 12,671,854$
A verage yearly earnings of adult male employees. ..... $\$ 668.73$
A verage daily wages of adult male employees ..... $\$ 2.05$
Cost of labor per ton ..... $\$ 1.10$
Tonnage per man per day ..... 1. 8
STEEL.
Gross tons of production:
Bessemer ..... 4, 349, 431
Open-hearth, acid process. ..... 1,046,584
Open-hearth, basic process. ..... 6,823,415
Crucible and other processes ..... 90, 606
Total. 12,310, 036
rolled iron and steel.
Capital invested ..... \$346, 361, 420
Gross tons of production:
Muck and scrap bar. ..... 140,399
Slabs, blooms, billets, tin-plate and sheet bars, etc ..... 2, 807,100
Rails ..... 1, 323, 739
Iron and steel structural shapes. ..... 1, 259, 500
Cut nails and spikes ..... 29, 279
Plates and sheets (a) ..... 2,464,554
Other rolled products. ..... 4, 928, 476
Total ..... 12, 953, 047
Value of product (not including the black-plate works) ..... \$504, 167, 225
A verage number of employees (not including those in black-plate works) ..... 137, 712
A verage number of adult male employees (not including those in black- plate works) ..... 135, 998

[^32]Aggregate wages paid all employees ..... \$91, 413, 384
Aggregate wages paid adult male employees ..... \$90, 926, 567
Average days in operation ..... 298
Average yearly earnings of all employees ..... $\$ 663.80$
A verage yearly earnings of adult male employees ..... $\$ 668.59$
Average daily wages of all employees. ..... $\$ 2.23$
A verage daily wages of adult male employees. ..... $\$ 2.25$
Average value per ton ..... $\$ 43.20$
Cost of labor per ton ..... $\$ 7.83$
tin plate (black-plate works).
Capital invested ( 16 plants) ..... $\$ 8,198,605$
Pounds of production of black plate (tinned, not tinned, and terne). ..... 633, 902,496
Value of production of black plate ..... \$22, 980, 589
Pounds of production of sheets and plates other than black ..... 1, 842, 270
Value of production of sheets and plates other than black. ..... \$55, 147
Average number of employees. ..... 7, 365
Average number of adult male employees. ..... 7,087
Aggregate wages paid all employees ..... $\$ 5,319,694$
Aggregate wages paid adult male employees. ..... $\$ 5,233,223$
Average days in operation ..... 197
A verage yearly earnings of all employees ..... \$722. 29
Average yearly earnings of adult male employees. ..... $\$ 752.54$
Average daily wages of all employees ..... $\$ 3.67$
Average daily wages of adult male employees ..... $\$ 3.82$
tin plate (dipping works).
Capital invested (4 plante) ..... \$1, 387, 080
Pounds of production of tin and terne plate ..... 29, 082, 916
Value of product ..... \$1, 520, 409
A verage number of employees ..... 238

Returns from 56 pig-iron companies showed that 629 wage-earners owned their homes, that the average annual rental for those paying rent was $\$ 79$, that the average working hours were 96 per week, and that of the 10,844 persons for whom nationality was reported 2,690 were Americans. Returns from 170 iron and steel companies showed that 4,912 wage-earners owned their homes, that the average annual rental for those paying rent was $\$ 134$, and that of the 72,975 employees for whom nationality was reported 34,898 were Americans. Returns from 11 companies in the tin-plate industry showed that 65 wageearners owned their homes, that the average annual rental for those paying rent was $\$ 200$, that the average hours of work per week were 55 , and that of the 2,802 employees for whom nationality was reported 2,165 were Americans

Coal Mining.-The following statement presents a summary of the operations of the anthracite and of the bituminous coal mines in the State during 1907, the coke workers not being included:

ANTHRACITE AND BITUMINOUS COAL-MINE OPERATIONS, 1907.

| Items. |  |
| :--- | :--- | ---: | ---: |

a Miners, pick, $\$ 601.91$; miners, machine, $\mathbf{\$ 5 4 0 . 2 7}$.
${ }^{\circ}$ Miners, pick, $\$ 2.24$; miners, machine, $\$ 2.01$.
In addition to the above coal-mining operations there were 53 plants, employing 1,852 persons, engaged in washing anthracite coal from culm banks at the mines. The plants washed $3,485,541$ tons of coal, which had a market value of $\$ 3,201,495$. Wages were paid aggregating $\$ 825,319$, or an average yearly earning per employee of $\$ 445.63$. Also there were 34 plants engaged in dredging coal from the Susquehanna and Schuylkill rivers, giving an average employment of 113 days to 141 men , to whom wages amounting to $\$ 31,375$ were paid. There were 65,538 tons of coal raised, having a market value of $\$ 56,929$.
Of the 1,311 bituminous coal mines there were 342 from which coal was coked. During the year there were 45,127 coke ovens in service, producing $34,625,377$ tons of coke, of a value at plant of $\$ 50,040,427$. There were 12,578 coke workers, to whom were paid wages amounting to $\$ 7,251,731$, or an average yearly wage of $\$ 586.85$.

Of 85,312 employees of the anthracite mines for whom nationality was reported 28,009 were Americans. Returns from 475 bituminous coal companies (that do not coke coal) showed that 7,320 wageearners owned their homes, that the average annual rental for those paying rent was $\$ 67$, and that of the 79,660 employees for whom nationality was reported 21,987 were Americans and 12,884 were Slavonians. Returns from 98 bituminous coal companies (that coke coal) showed that 2,419 wage-earners owned their homes, that the average annual rental for those paying rent was $\$ 52$, that the average hours of work per week were 54, and that of the employees for whom nationality was reported 8,185 were Slavonians and 7,097 were Americans.

Textile Industries.-Returns made in 1907 by 639 establishments engaged in the textile industries in Philadelphia showed an invested capital of $\$ 75,517,539$, and for the year a product of the market value of $\$ 130,503,116$. The establishments were in operation during the year an average of 289 days, employing 62,293 wageearners ( 25,976 males, 31,246 females, and 5,071 minors), to whom were paid wages amounting to $\$ 26,778,586$ ( $\$ 14,638,340$ to the men, $\$ 11,102,377$ to the women, and $\$ 1,037,869$ to the children). The average yearly earnings per employee in the industry were $\$ 429.88$ the average for the men being $\$ 563.53$; for the women, $\$ 355.32$, and for the children, $\$ 204.66$. The average daily wages per employee were $\$ 1.49$-the average for the men being $\$ 1.95$; for the women, $\$ 1.23$, and for the children, $\$ 0.71$. The average value of product per employee was $\$ 2,094.99$.

## BELGIUM.

Monographies Industrielles (Apercu Econom.que Technologique et Commercial). Industries cèramiques, 1907. xvi, 242. pp. Fabrication et Travail du Verre, 1907. xxiv, 263 pp . Industries du Caoutchouc et de l'Amiante, 1907. 237 pp . Construction des Machines et Appareils Electriques, 1908. 344 pp . Ministère de l'Industrie et du Travail. Office du Travail et Inspection de l'Industrie.

These volumes are a part of a series of monographs being prepared by the Belgian labor office on conditions existing in selected industries or groups of industries, considered from the economic, technical, and commercial standpoints. Monographs of this series on cotton, flax, hemp, jute, and linen spinning and on the manufacture of paper and pasteboard have been mentioned in previous issues of the bulletin. ${ }^{(a)}$

Ceramic Industries.-An introductory chapter is devoted to a statistical account of the industry, derived partly from the industrial census of 1896 and partly from subsequent investigation. It shows the number of establishments classified by date of foundation; geographical location, and motive force employed; and the number of employees, their sex, ages, hours of labor, and mode of remuneration. The first chapter deals with ceramic products in general, their classification, and the materials employed in their composition. The second chapter describes the raw materials of Belgian origin and their extraction and exploitation. Subsequent chapters are devoted to the manufacture of bricks and tiles, fire-clay products, matt-surfaced and enameled stoneware, common vases, pots, pipes, and articles of fancy terra-cotta, faïence or crockery, porcelain, and bricks made of schist. Included in each chapter is a description of the materials used and of the hand and mechanical processes employed in the manufacture of the finished product, the quantity, value, and destination of output, and statistics of imports.
Manufacture of Glass.-An introductory chapter is devoted to a statistical account of the industry similar to that given in the volume on ceramic industries. The first chapter in the main body of the work describes in a general way the composition and properties of glass, and classifies the industry according to the nature of the products. The second chapter is devoted to the raw materials employed

[^33]in the industry, and the third chapter describes the processes and appliances used in the fusion or melting of the raw materials. Succeeding chapters contain a description of the methods used in the working of the molten material into the various shapes, and also a description of the various products, their application, and their commercial classification. The sixth chapter is devoted to the economic condition of the industry, presenting, in tabular form, statistics of the various establishments; their personnel, power, and machinery employed, consumption of raw materials, quantity and value of products, and imports and exports.

India-Rubber and Asbestos Industries.-The first part is devoted to the india-rubber industry. Chapter one classifies the plants from which crude rubber is obtained, and describes the extraction of the latex, its coagulation, and its preparation for market, as well as the appliances used in such work. Information is also given concerning the production, commerce, commercial grades, and prices of the crude product. Chapter two describes the various materials employed in the manufacture of india rubber and of articles in which india rubber is combined with other materials. Chapter three is devoted to the technical processes used in manufacturing the finished product, and chapter four classifies and describes the various articles wholly or partially composed of india rubber. Chapter five contains a report on the economic position of the industry, a history of the industry, and statistical facts concerning the number of establishments engaged, the total production, and imports and exports of the manufactured product.

The second part relates to the asbestos industry. It gives information on the composition, properties, and commercial value of crude asbestos, the manufacturing processes employed, the varieties, prices, and uses of the manufactured product, and the economic situation of the industry.

Construction of Machinery and Electrical Apparatus.-This monograph consists of five chapters: The first chapter classifies and defines the various forms of electrical appliances, while the second chapter describes the materials entering into the composition of these appliances. Chapter three gives a descriptive summary of the electrical industries; and chapter four describes the manufactured products, including dynamos, motors, locomotives, rheostats, transformers, accumulators, commutators, cables, telephone and telegraph apparatus, lamps, and electrical measuring instruments, as well as articles of a miscellaneous nature. The fifth chapter presents statistics relating to the economic situation of the industry, giving the number of establishments, employees, and motive power employed in each branch of the industry; figures are also given which show imports and exports of the manufactured products.

Each of the monographs is profusely illustrated and contains a directory of the establishments engaged in the production of the articles considered.

## FRANCE.

Enquête sur le Travail à Domicile dans l'Industrie de la Lingerie. Tome I. Paris. Ministère du Travail et de la Prévoyance Sociale, Office du Travail. 1907. xiv, 768 pp .

This volume gives in detailed form the results of an inquiry into the material and social conditions surrounding home work in the making of undergarments and household linen in the city of Paris.

The work is divided into five parts. An introductory chapter is devoted to an outline of the scope and plan of the inquiry, including, as well, specimens of the schedules of questions used in the conduct of the investigation.

The first part presents the individual reports of manufacturers and merchants engaged in the industry. They include, in a general way, statements of the conditions under which work is given out by each establishment, including the method and the rate of payment for the work.

The second part presents the individual reports of the working people, principally women, who contract to accept work from the larger establishments and who execute it themselves, aided, in some cases, by their families or by a few employees, the work being done in the home of the contractor. Figures showing the number of employees, hours of labor, and rate of compensation are presented where such facts could be obtained.
The detailed results of the inquiry, in tabular form, are presented in the third part, which forms the main body of the work. The product is divided into four groups, as follows: (1) Women's and children's undergarments, shirtwaists, blouses, and infants' apparel; (2) men's undergarments; (3) household linen; and (4) undergarments and linen of a miscellaneous nature made for charitable societies and institutions, for railroads, and for the army and the navy. The tables show, for each household, the number, ages, conjugal condition, and length of service of the persons employed; variety of goods made, price paid, source from which work is obtained, time of delivery of work, and time of payment; hours of labor, daily earnings, and annual income, and location, rent, and sanitary conditions. Statistics are given for a total of 510 households.

In the fourth part of the volume are presented individual monographs of the working people, with some family budgets which show the receipts and expenditures of each household.

The fifth part consists of an analysis and resume of the results of the investigation. The report shows that 52 per cent of the working people embraced in the investigation entered the trade before the age of 26 years, and that 17 per cent were at the time of the inquiry 60 years of age or over. Half of the total number were married, a third were widowed or divorced, and the remainder were single. Two-fifths of the married women had, at the time of the inquiry, no children in their charge, and the proportion of childless widows and divorcees is a little less, about 37 per cent. Only 44 out of the total of 510 households worked for more than one establishment, and in most cases work was delivered every day of the week except Sunday. Payment was usually made once a week, at the time of the delivery of the work. In the busy season, the hours of labor for 43 per cent of the workers were fewer than 10 per day; for 43 per cent the hours of labor were from 10 to 12 per day, and for 13 per cent they were more than 12 per day. Out of a total of 217 working people whose earnings could be established half earned less than 16 centimes ( $\$ 0.03$ ) per hour and 85 per cent less than 26 centimes ( $\$ 0.05$ ) per hour. Of 366 working people reporting annual earnings, 60 per cent earned less than 400 francs ( $\$ 77.20$ ) per year, nearly 25 per cent earned from 400 to 600 francs ( $\$ 77.20$ to $\$ 115.80$ ) per year, and the remainder more than 600 francs ( $\$ 115.80$ ). The annual income (including wages earned from other sources and relief given by charity) was, for 57 per cent of the unmarried working people, from 301 to 600 francs ( $\$ 58.09$ to $\$ 115.80$ ); the annual income (including the earnings of the husband) of the same proportion of the married people was from 1,500 to 2,500 francs ( $\$ 289.50$ to $\$ 482.50$ ) per annum. Of a little less than 500 habitations visited, 135 were of one room only. Of this number, 61 were less than 30 cubic meters ( 1,059 cubic feet) in size, and 24 were occupied by three or more persons. Rents usually varied from 151 to 300 francs ( $\$ 29.14$ to $\$ 57.90$ ) per year. In 68 per cent of the habitations the sanitary conditions were found satisfactory; the remainder were characterized as bad.

## DECISIONS OF COURTS AFFECTING LABOR.

[Except in cases of special interest, the decisions here presented are restricted to those rendered by the federal courts and the higher courts of the States and Territories. Only material portions of such decisions are reproduced, introductory and explanatory matter being given in the words of the editor. Decisions under statute law are indexed under the proper headings in the cumulative index, page 471 et seq .]

## DECISIONS UNDER STATUTE LAW.

Assignment of Wages-Future Earnings-Constitutionality of Statute-Mutual Loan Co. v. Martell, Supreme Judicial Court of Massachusetts, 86 Northeastern Reporter, page 916.-The company named sued to recover on two promissory notes given by two different persons (one of whom was married), secured by an assignment of future earnings in the employment of the defendant, Martell. Martell relied on sections 7 and 8 of chapter 605, Acts of 1908 (given in full on page 466), as his defense, since he had not accepted either assignment, as provided for by section 7 , nor had the wife of the married employee concerned consented in writing to the assignment of her husband's earnings, as provided by section 8 . The loan company contended that these sections are unconstitutional, and on judgment being given against it in the superior court of Suffolk County it appealed to the supreme court. The law was upheld by this court, as appears from the following quotations from its opinion, which was delivered by Judge Knowlton:

These sections interfere with the rights of the assignor and assignee to contract with each other, which right of contract, in general, is secured to all our citizens under the fourteenth amendment to the Constitution of the United States, as well as under the constitution of Massachusetts. Such an interference by law with one's right to manage his property and to make contracts in relation to it and to pursue any proper vocation is in violation of the constitution, unless it can be justified upon an independent ground. The defendant contends that there is such justification, in the present case, in the enactment of this statute by the legislature in the exercise of the police power.

The State may legislate for the public health, the public safety, the public morals and the public welfare, in the exercise of this power. But, in balancing this right of the State against the constitutional right of the individual to personal liberty, it is often difficult to draw the line between permissible and impermissible legislation.

In the present case we have to inquire how far the welfare of the community requires an interference by way of regulation with the right of workmen to dispose of their wages to be earned in the future.

The requirement that they [the assignments] be recorded is certainly reasonable. It tends to lessen the opportunity of wage-earners to be dishonest in procuring credit on the faith of their expected possession of earnings, as they might be if unrecorded assignments were outstanding. The requirement that the order or assignment be accepted in writing by the employer tends to diminish the risk of his refusal to pay, involving litigation the result of which might be loss of employment by the wage-earner and injury to the business of the employer. Then, too, this requirement might operate as a check upon the rapacity of unscrupulous money lenders who are inclined to take advantage of the needs of employees. If the legislature saw an advantage to the community from this provision, we can not say that they were acting beyond their constitutional authority in enacting the law.

Nor can we say that they might not find grounds for a distinction between assignments to secure loans of money and assignments as security for necessaries or other property furnished or to be furnished. The occasions for making assignments as security for necessaries may be far more pressing than for making them to obtann money, and the risk of wasting that which is obtained may be much less in one case than in the other. The statute is not unconstitutional because it deals only with security for loans and does not include security for other debts.
Section 8 presents a similar but more difficult question. A married man is bound by law to support his wife. If he is a wage-earner, although she has no legal title to his wages, she has an interest in the right use of them. If there are such risks of his making an improper disposition of them by assigning them to secure the payment of money that he borrows for unnecessary purposes as to justify the legislature n limiting and regulating his exercise of this right, might they not regulate it by requiring the consent of his wife as a prerequisite to the validity of his assignment? A strong argument can be made in favor of the plaintiff's contention on this point. But on the whole we are of opinion that the legislature might look chiefly to the ordinary relations between husband and wife under the law, and adopt this form of regulation as salutary in its application to most members of the class with which they were dealing. The principles that are applicable to section 7 require us to hold section 8 to be constitutional.

Conspiracy-Common Law-Effect of Statutes-Elements of Offense-Interference with Employment-Fines of Employ-ers-Extortion-Recovery-State v. Dalton, St. Louis (Missouri) Court of Appeals, 114 Southwestern Reporter, page 1132.-Charles J. Dalton and Franklin C. Fay were indicted for conspiring to unlawfully extort from William Burke, a contracting plumber, the sum of $\$ 200$ by inducing the employees of said Burke to cease work and to refrain from working for him until such sum should be paid.

The indictment was quashed in the St. Louis court of criminal correction and the defendants dismissed, whereupon the State appealed and secured a reversal of the judgment of the court below, on grounds that appear in the portion of the opinion quoted below.

The State has a statute on the subject of conspiracy, and the trial court had proceeded on the ground that it entirely superseded the common law on the subject, so that no case could be brought except as it fell within its provisions. Since this statute did not cover the offenses named in the indictment, it was held that no crime had been committed. This view the appellate court rejected, holding that the statute did not repeal the common law, and that action would still lie under the latter. Having disposed of this point, the court took up the definition of the term "conspiracy," as construed by the courts and by the grand jury in the indictment under consideration.

Judge Nortoni, who delivered the opinion, said:
It is indeed difficult to formulate an accurate definition of conspiracy at common law which will incorporate all of the acts punishable under this description, without including as well acts which may not be punishable. Therefore, in Com. v. Hunt, 4 Metc. (Mass.) 111, 123, 38 Am. Dec. 346, Chief Justice Shaw said: "Without attempting to review and reconcile all the cases, we are of opinion that as a general description, though perhaps not a precise and accurate definition, a conspiracy must be a combination of two or more persons, by some concerted action, to accomplish some criminal or unlawful purpose, or to accomplish some purpose, not in itself criminal or unlawful, by criminal or unlawful means." The gist of the offense at common law is a corrupt combination which involved an infringment of the law either in accomplishing the end contemplated or the means to be employed in attaining the end to which the confederation is directed. Therefore the offense was complete and punishable even though no aict was done in furtherance of the conspiracy. From these considerations it appears, of course, that a conspiracy was a substantive offense at common law, though nothing be done in execution of it.

Aside from the present statutory provisions requiring the commission of an overt act in certain cases, acts in execution of a conspiracy are alleged in the indictment and received in evidence as tending to elucidate the intention of the parties or in aggravation of the unlawful combination only. (Com. $v$. Hunt, 4 Mete. (Mass.) 111, 125, 38 Am. Dec. 346; Com. v. Judd, 2 Mass. 337, 3 Am. Dec. 54; State v. Buchanan, 5 Har. \& J. (Md.) 317, 9 Am. Dec. 534; 2 Bishop, New Crim. Law (8th ed.) sec. 203.)

From what has been said, it will appear the offense of conspiracy may arise from a corrupt confederation with an unlawful purpose in either one of two ways: The offense may be complete under the old law, first, if the confederation be to do by concert of action, either direct or remote, a criminal or unlawful act by any means, whether unlawful or not; or, second, to do an act, not in itself criminal or unlawful, by criminal or unlawful means. It will be observed that the statement of the doctrine includes either a criminal or unlawful end or the employment of criminal or unlawful means. On this statement there arises for consideration, in a more or less remote degree, the question as to what character of unlawful purpose or what character of unlawful means contemplated by the conspirators will be sufficient to infuse into the confederation the elements of criminal conspiracy.

There can be no doubt whatever on the question of conspiracy when the parties combine to violate the criminal law. Of course, in every case where the confederation is for the purpose of doing, by direct or remote concert, an act which would amount to a criminal offense if done by one of the parties, notwithstanding the confederation, the offense is complete. (State $v$. Buchanan, 5 Har. \& J. (Md.) 317, 9 Am. Dec. 534; 6 Amer. \& Eng. Ency. Law (2d ed.) 848, 853.) And it is said by Mr. Bishop (2 Bishop, New Crim. Law [8th ed.] sec. 178) that the term "unlawful," in this connection, "signifies neither 'indictable' nor 'criminal,' though it includes both, but it means 'contrary, to law,' which may be the law of the criminal courts or of the civil."

While from an examination of the authorities it may be asserted as true that the precise limits of the rule with respect to the terms "unlawful purpose" or "unlawful means," in cases where neither the purpose to be achieved nor the means to be employed, are actually criminal, has never been clearly defined, the authorities assert and sustain a doctrine commensurate at least with the exigencies of the case now under consideration. The doctrine referred to arises from the additional power or enhanced ability to accomplish a result which is in many cases present in the combination of several to the same end. In some degree, the principle pervades the entire law of conspiracy. It may be stated as a general proposition that, where an additional power or enhanced ability to accomplish an injurious purpose arises by virtue of the confederation and concert of action, an element of criminal conspiracy is thereby introduced which will render sufficiently criminal either the means or the purpose, otherwise merely unlawful, to sustain a conviction, although the means or the end were not such as are indictable if performed by a single individual. (Com. v. Waterman, 122 Mass. 57; Com. v. Judd, 2 Mass. 329, 337, 3 Am. Dec. 54; State $v$. Burnham, 15 N. H. 396; 2 Bishop, New Crim. Law (8th ed.) secs. 180, 195; 3 Chitty, Crim. Law, 1139; 6 Amer. \& Eng. Ency. Law (2d ed.) 851; Twitchell v. Commonwealth, 9 Pa .211 , and remarks, 212.)

There can be no doubt that the facts alleged in either count of the indictment present a case falling within the influence of the principle last stated. The indictment in the first count charges in substance that the defendant conspired to, and, in execution of the conspiracy, induced, certain mechanics to quit the employ of William Burke, and would not permit them to enter again in his employ, although he was in sore need of their services, until Burke had first paid to the defendants $\$ 200$ to withdraw their influence in that behalf, and that their purpose was to thus unlawfully exact $\$ 200$ from Burke, which he paid. The second count charges in substance that the mechanics mentioned voluntarily quit the employ of Burke, and that defendants corruptly conspired to and did so influence them as to prevent their return to his employ, although he was in great need of their services, unless Burke paid the defendants $\$ 200$ to withdraw their influence, and that their purpose was to thus unlawfully exact $\$ 200$ from Burke; which payment he made, etc. From all that appears in the indictment; the means employed by the defendants were entirely lawful. It is certainly true that if the parties are not under contract (nothing appearing to the contrary, the presumption is they were not) their associates and friends may counsel and advise
them either to quit or continue a particular service, or having quit the service, as in the second count mentioned, not to return thereto except upon reasonable and proper conditions. (Thomas v.C.N. O. \& T. Ry. Co. (In re Phelan [C. C.]) 62 Fed. 803, 817, 818; Wabash Ry. Co.v. Hannahan (C. C.) 121 Fed. 563 [Bulletin No. 49, p. 1374].) It is otherwise, however, with respect to the alleged purpose sought to be effectuated in either count of the indictment. It is the policy of our enlightened system of jurisprudence to insure and protect the freedom of contract in its largest measure, subject only to certain restraints imposed by a wise public policy of a still higher and more holy nature. To leave men free to choose their own occupation and contract with whomsoever they will in their particular field of industry, without restraint or interference from others, tends not only to elevate their condition by fostering a spirit of independence and ambition, but secures as well to skill and industry a proper recompense in recurring advantages, too numerous to mention. The common faw has never tolerated a species of interference by third persons for a purpose such as that disclosed in the allegations of the indictment. Although one may lawfully induce another to quit a particular service, or not return to the employ of a particular person, there can be no doubt, even when no contract of employment is breached thereby, that it is unlawful for third parties, as charged in the first count, to interfere and induce employees to quit their employer, and not to return to his services, for the purpose of exacting and extorting from him a sum of money against his consent. And it is equally clear where men are unemployed, as were the mechanics mentioned in the second count to have quit the service, that it is unlawful for a third person to interfere with the freedom of contract and, by persuasion or other means, for the sole purpose of exacting or extorting a sum of money from the employer against his consent, prevent the consummation of a new contract of employment. When one, upon whom there rests no legal obligation to do so, is thus coerced, by threat, reasonable apprehension, or fear of suffering injury to his business, to contribute his means to another who has no moral or legal right to insist upon such payment, the most elementary principles of natural justice, inherent in the common law, denounce the act as unlawful and afford a remedy certain and sure. (Carew $v$. Rutherford, 106 Mass. 1, 13, 14, 8 Am. Rep. 287; March v. Bricklayers', etc., Union, 79 Conn. 7, 63 Atl. 291 [Bulletin No. 67, p. 887].) Although the act of procuring money from another under the circumstances stated may not be a criminal offense either at common law or under the statute, it is palpably unlawful, and an action in tort will lie in favor of the injured party for its recovery, as is affirmed in the authorities supra. This being true, the purpose of the conspiracy is obviously unlawful in the sense essential to infuse an element of criminal liability therein, as contemplated by the entire doctrine of our law in respect of conspiracy and conspirators. A single individual, acting alone to the same end, would indeed be less bold and more likely to recede from a sense of insecurity in his venture. And then, too, the ability of one person to coerce the subject of his design would be less potent. The additional power and enhanced ability arising from a confederation of two persons to overawe and coerce an ordinary man to part with his means against his will, under the circumstances alleged in the indictment, is obvious. Therefore we
conclude that, although the purpose sought to be effectuated and to which the conspiracy was directed may not, in and of itself, amount to an offense against the criminal laws if committed by a single individual, it is an unlawful purpose possessed of an element essential to a criminal conspiracy in such cases-this for the reason of the additional power and enhanced ability to accomplish the contemplated mischief, which accrued in virtue of the federation.

The indictment alleges in each count that the purpose of the conspiracy was actually accomplished, and sets out sufficient facts from which an overt act, essential in the law as modified by our statute, appears. This being true, it charges an offense at common law as modified by our statute touching the commission of some overt act in case of conspiracies other than those to commit a felony upon the person of another, or to commit arson or burglary.

Employers' Liability-Railroad Companies-Acceptance of Relief Benefits-Waiver-Effect of Statute-Goldenstein $v$. Baltimore and Ohio Railroad Company, Supreme Court of the District of Columbia, 87 Washington Law Reporter, page 2.-F. E. Goldenstein sued the railroad company to recover damages for injuries received by him while in its employment within the District of Columbia. The company offered as defense that Goldenstein was a member of its relief department and had received benefits therefrom on account of his injuries and was therefore precluded from claiming other damages. The plaintiff relied on section 3 of the federal employers' liability act of 1906, which provides that "no contract of employment, insurance, relief benefit, or indemnity for injury or death entered into by or on behalf of any employee, nor the acceptance of any such insurance, relief benefit, or indemnity by the person entitled thereto, shall constitute any bar or defense to any action brought to recover damages for personal injuries to or death of such employee: Provided, however, That upon the trial of such action against any common carrier the defendant may set off therein any sum it has contributed toward any such insurance, relief benefit, or indemnity that may have been paid to the injured employee, or, in case of his death, to his personal representative."

This law was declared unconstitutional by the Supreme Court in certain interstate cases (207 U. S. 463; Bulletin No. 74, p. 216), but was held by the court of appeals of the District of Columbia to be valid law in said District. (Hyde v. R. Co., 36 Wash. Law Rep. 374, Bulletin No. 78, p. 582.) The particular point in question had not been previously discussed, but its constitutionality was upheld in the present case, as appears from the following portions of the opinion of the court, which was delivered by Judge Stafford:

The demurrer to this plea raises the question whether Congress could, constitutionally and without interfering with due freedom of
contract, enact that men should not be bound by their contracts of this character. To answer yes is to say that an employee who, as such, has suffered an injury through the fault of his employer, and who thereafter accepts a consideration in settlement and discharge of his damage, is not bound by said acceptance nor by his deed expressly releasing and discharging his claim, provided such acceptance and release were under ind in pursuance of a contract entered into by him before the injuries were suffered which entitled him to receive that consideration. The act does not attempt to touch contracts of settlement made for the first time after the injuries were received and not under any prior arrangement of this character, but only those contracts under which the employee was acting during the course of his employment. His prior agreement to accept such benefits, if he accepts them at all, in full of his claim for damages, is impliedly declared to be unjust, oppressive, and against public policy, and the benefits actually received by him in pursuance of this agreement are referred back to such unlawful contract and are declared to be payment pro tanto only. The theory of the statute seems to be that during the period when the relation of employer and employee exists or is in contemplation, the parties do not stand on a level, but that the employee or person applying for employment is subject to the undue influence of the employer, as the borrower is supposed to be under the like power of the lender in the matter of interest. To continue the analogy, the employee, on entering into the contract to accept benefits in full if he accepts them at all, is in the position of the borrower when agreeing to pay usury, while the employee when accepting the benefits after injury is in the position of the borrower when actually paying the usury. As the borrower may still recover back the usurious payment, so may the employee repudiate his release of his real damages. If it be said that the injured employee is at liberty to accept or reject the benefits as he may choose, so, it may be replied, is the borrower at liberty to pay or refuse to pay the usurious rate. In the case of interest on money the legislature has said that the liberty is only theoretical, not real; in the case of the employees of common carriers Congress has said the same.

Was Congress justified in treating this class of men-employees of common carriers-as a class needing peculiar protection? That isis it not?-a question for legislative judgment, rather than forensic. As the courts have sustained the usury laws and others of like character, why should they not sustain this? They should, certainly, unless it is too plain for argument or doubt that there is no rational ground for classifying such employees in this way, no reasonable basis in point of fact for saying that they are subject to be taken advantage of unconscionably by the other party to the contract. How can the courts possibly take such a position as that? How can we shut our eyes to the facts that the men who make up the largest part of the railroad's working force are poor men, taking their lives in their hands every day, and supporting their wives and children by the day's earnings and that in many instances the loss of the job is the loss of comfort, of health, perhaps of life itself to the laborer or those who depend upon him? Had not Congress a right to sayto let railroads exact from their employees a binding agreement that they shall be required to pay for the loss of an arm only so much, for the loss of an eye so much and no more, for the loss of a life not
exceeding so much-in each instance a less sum perhaps than would be recoverable in any impartial court-is against public policy and a rule which will tend to make railroads careless of life and limb? Might they not fairly say that public policy requires that the burden of this great annual sacrifice of health and strength and happiness and life should fall where it ought to fall as between the laborer and the employer-i. e. where it turns out on full and fair inquiry that it ought to fall-rather than that a poor and overworked class should be permitted to barter away its rights in advance as the mere price of an opportunity to work? These are considerations that address themselves to legislatures and when they are found weighty and controlling by that branch of the government it is of doubtful propriety for the judicial branch to seek to overturn its work.

The supreme court of Indiana, in the case of International Text Book Co. v. Weissinger, 160 Ind. 349, 65 N. E. 521, 98 Am. St. Rep. 334, had occasion to pass upon the constitutionality of a state statute prohibiting assignments of future wages to become due to employees, and sustained the constitutionality of the act. After referring to many acts of legislation in that State showing a tender regard for the rights of wage-earners the court turns to the reasons underlying such legislation, calling attention to the large number of wage-earners employed in manufacturing and mining industries and the heavy sum paid annually to this class. They then take notice of the fact that a large proportion of the persons affected by such statutes are dependent upon their daily or weekly wages for the maintenance of themselves and families; that delay of payment may result in the deprivation of the necessaries of life, suffering, inability to meet obligations and in many cases may make wage-earners a charge upon the public. They go on to say: "The situation of these persons renders them peculiarly liable to imposition and injustice. * * * Where future wages may be assigned, the temptation to anticipate their payment and to sacrifice them for an inadequate consideration is often very great. * * * It is clear that the object of the act was the protection of wage-earners from oppression, extortion or fraud on the part of others and from the consequences of their own weakness, folly or improvidence. We can not say that no just ground existed for such legislative interference for so commendable a purpose." The analogy is then pointed out between the disability imposed by that act and the disability which renders married women incompetent to bind themselves or their property by contracts of suretyship; the disability of the debtor before judgment to waive the benefit of exemption laws and laws providing for a stay of execution or regulating the rights of parties under mortgages on household goods.

Contracts of indemnity, insurance and of relief benefits such as those legislated against in the act now under consideration are an attempt on the part of employers to restrict their common law liability by requiring their employees to accept and receive for injuries a sum less than that to which they would otherwise be entitled. It is as if an employer should say to an employee, "I will not accept you in my service unless you will agree beforehand that if you are injured, instead of being compensated in full you shall receive therefor only some small amount now inserted in the contract." The supposition is that the employee assents to the contract under the stress of his
situation by reason of his necessity to secure employment. Is it not legitimate for the legislature to say that such contracts are against public policy? When the State of Missouri enacted a statute providing that in all suits brought upon policies of fire insurance the company should not be permitted to deny that the property insured was worth the full amount of the insurance at the time of issuing the policy, although the policy itself provided that the company should not be liable beyond the actual value of the property at the time of its loss, the Supreme Court of the United States held the statute to be constitutional, notwithstanding the limitation placed thereby upon the right of contract. (Orient Insurance Co.v. Baggs, 172 U.S. 557.) In another case the same court declared that the right to contract is not absolute in respect to every matter, but may be subjected to the restraints demanded by the safety and welfare of the State and its inhabitants, and that the right to impose these restraints was not confined to the right of the legislature to amend the charters of corporations. (Knoxville Iron Co. v. Harbison, 183 U. S. at page 224.) In the case last cited the court had before it an act of the Tennessee legislature requiring that store orders and all like evidences of indebtedness issued by employers in payment of wages should be redeemed in cash by such employers at the option of the holders and held that the statute was not an unconstitutional impairment of the freedom of contract. In Holden $v$. Hardy, 169 U. S. 166 , the same court upheld an act of the State of Utah limiting to eight hours per day the employment of workingmen in mines underground.

The defense attempted to be pleaded in the second plea in this case would be a good defense except for the statute, according to the decisions in various States. (People v. Powers (Ohio), 35 L. R. A. 507; Donald v. Railroad Co. (Iowa), 33 L. R. A. 492; Railroad Co. v. Curtis, 51 Neb. 442, 66 Am. St. Rep. 456; Ringle v. Railroad Co., 164 Pa. St. 529, 44 Am . St. Rep. 628; Owens v. Railroad Co. (U. S. Cir. Ct., Sou. Dist., Ohio), 1 L. R. A. 75.). That is the exact point decided for this jurisdiction in Brown against this same defendant. (6 App. D. C., 237, 23 Wash. Law Rep. 337.) In that case the court took note of the distinction between those cases in which there was only a precontract to accept benefits and release the railroad company and those in which there was an actual acceptance of the benefits and a release in consideration thereof subsequent to the injury. In the former cases it was said that there might not be a discharge of the defendants, although that question was not decided, but in the latter cases it was held that the discharge was effective. While no doubt is intended to be cast upon this decision it is pertinent to observe that there are other cases in other jurisdictions which hold that even without the statute the defense here set up in the second plea is insufficient as based upon a contract against public policy; for the reasons which have induced some courts to so hold without a statute may well be considered as affording a sufficient basis for a statute when the legislature has chosen to enact one.

In the case of Chicago, etc., Railroad Co. v. Miller, 76 Fed. Rep. 439 , the defendant put its reliance upon just such a contract with its employees as that which has been pleaded in this case, and itwas there decided that the plaintiff's right of action against thecompany was not barred by the acceptance of such benefits. The same question was afterwards argued before the court of appeals in the same
case and the decision affirmed, Caldwell, Judge, saying: "Such contracts so far as they attempt to release the railroad company from liability for injuries inflicted on its employees through its negligence are without sufficient consideration against public policy and void, and must ultimately be so declared by all courts." (22 C. C. A. 264; see also 9 Cyc. 544.)

On the other hand two cases reported in 71 Fed. Rep., one at page 139 and the other at page 931, hold such agreements to be valid, and the latter treats the statute of Ohio, which expressly declared such agreements illegal, to be unconstitutional. Such decisions are apparently open to the pointed criticism of legal writers, such as that to be found in 31 Am . Law Rev. 460. To quote therefrom: "Where a man ships goods over a railroad and accepts from the railroad company a bill of lading in which the company endeavors to exonerate itself from the consequences of its own negligence, the clause by which the company attempts to exonerate itself is void; but where a railroad company assumes the bailment of human lives and is negligent in taking proper care of them-and no matter how gross its negligence may be-it may contract that if it provides a hospital, kept up chiefly by the very men whose lives are in its charge, it may kill and maim them with impunity." The statement may sound sardonic, but it is feared there is too much justice in it. One is reminded of an occasion when by a still higher authority than any of those here cited the question was asked, "What man shall there be among you, that shall have one sheep, and if it fall into a pit on the Sabbath day, will he not lay hold of it and lift it out? How much then is a man better than a sheep?" (The Gospel according to St. Matthew, chapter 12, verses 11 and 12.) A court which pays greater heed to the safety of the live freight of the cattle train than to the human beings who managed the train would seem to deserve a similar rebuke. In Kilpatrick v. Grand Trunk R. R. Co., 74 Vt .288 , 63 L. R. A. $551,93 \mathrm{Am}$. St. Rep. 887, the supreme court of Vermont had under consideration a statute prohibiting the use of side ladders on freight cars, and making a company using such ladders subject to a penalty and also liable for injuries occasioned thereby. After the fullest consideration it was there held that the doctrine of assumption of risk, viewed as a contract, could not be invoked by a railroad company against its employee who sued it for injuries resulting from the use of such ladder, because such a contract would be against public policy, and that the enactment of such a statute was a valid exercise of the police power for the protection of the poor and helpless, although it prevented the employee from assuming the risk by contract. It would not be becoming for the writer of the present opinion to quote from the language of the opinion in that case, but he wishes to reiterate his belief in the soundness of the views there expressed. See also the note to Houston, \&c., R. R. Co. v. De Walt, 97 Am . St. Rep. at pages $890-893$, where this case and others are discussed. The Vermont case just referred to is in line with the decision in the well-known case of Narramore $v$. Cleveland, \&c., $R$. R. Co., 96 Fed. Rep. 298, 37 C. C. A. 499, where the opinion was delivered by Circuit Judge Taft.

If it is objected that the present act is unconstitutional as being limited to a particular class of employees instead of applying to all classes, it would seem to be a sufficient answer that so far as the courts
are aware, it is only employees of common carriers who are liable to be made the victims of unjust contracts of this peculiar character The court has no reason to suppose that Congress would not just as readily extend the act to other employees if there were any such abuse to be corrected in respect to them. It is peculiarly the province of the legislature to ascertain the bases of facts upon which legislation is required.
For the foregoing reasons it is considered that the second plea is bad, as it relies upon matters which the act of Congress expressly and constitutionally declares shall not constitute a bar.

Employers' Liability-"Railroad Hazards"-Construction of Statute-American Car and Foundry Co. v. Inzer, Appellate Court of Indiana, 86 Northeastern Reporter, page 444.-This was an action by Mary Inzer as administratrix to recover damages for the death of John A. Inzer, alleged to have been caused by the company's negligence. The company builds cars, and Inzer was a tinner employed in roofing a car when the car on which he was working was moved in a train of six cars drawn by a locomotive of a railway connected with the company's plant. Being knocked from the car he was pinioned under a wheel and afterwards run over and killed by the negligence of those in charge. This was the finding of the circuit court of Clark County, and it was affirmed by the appellate court. The matter of interest in the case was the application to the accident of the employers' liability act of the State (Burns's Ann. Stat. 1901, sec. 7083), which had been restricted in its application by the decision in case of Bedford Quarries Co. v. Bough, 168 Ind. 671, 80 N. E. 529; see Bulletin No. 71, page 377. A part of the reasoning of the court on this point is given, in the language of Judge Roby, who spoke for the court:

That case decides the act is violative of the fourteenth amendment of the federal Constitution, in so far as it imposes upon corporate employers burdens which are not imposed upon individual employers. The act as applied to railroads is upheld, but the case does not decide that only railroads as such are within the purview of the act, but that the legislature intended it to apply to "railroad hazards." The character of the employment must be the test by which to determine its applicability, and not the character of the employer. (Kline $v$. Minn. Iron Co., 93 Minn. 63, 100 N. W. 681 ; Bedford Quarries Co. v. Bough, supra.) Analogous statutes of other States applying to "railroads," have been upheld because their manifest purpose was to give their benefits to employes engaged in the hazardous business of operating railroads. (Akeson v.Ch. etc., R. Co., 106 Iowa 54,75 N. W. 676; Mo. Pac. R. Co. v. Haley, Adm'r, 25 Kan. 53.) A consideration of the reasoning of the foregoing cases shows that the appellee was within the statute. Clearly it was a railroad hazard which caused the death. The complaint was therefore sufficient, and the demurrer to it was correctly overruled.

[^34]Employment of Children-Newspapers as Merchandise-Constitutionality of Statute-District of Columbia v. Reider, Juvenile Court of the District of Columbia (Opinion copied from court files).Lynn L. Reider, a route agent for a morning newspaper in the District of Columbia, was charged with a violation of the child-labor law of the District in employing a minor under 14 years of age to deliver newspapers. The first section of the law reads in part as follows:

No child under fourteen years of age shall be employed or permitted to work in the District of Columbia . * * * in the distribution or transmission of merchandise or messages. No such child shall be employed in any work performed for wages or other compensation, to whomsoever payable, during the hours when the public schools of the District of Columbia are in session, nor before the hour of six o'clock in the morning or after the hour of seven o'clock in the evening: Provided, That the provisions of this section shall not apply to children employed in the service of the 'Senate.

There was no question as to the facts, the defendant claiming, first, that the act is void on the ground that it is in conflict with the fourteenth amendment of the Constitution, requiring all legislation to be uniform in its application, and, in any case, that the delivery of newspapers is not prohibited by the act. The first contention was denied, but the second was allowed and Reider was discharged on the single ground that newspapers are not merchandise. The District sought to procure a writ of error to bring the case before the court of appeals of the District of Columbia, but this court refused to grant the writ, sustaining the decision of the juvenile court.
The opinion of the juvenile court was delivered by Judge De Lacey, and is as follows:

Counsel for the defendant contend that the act is unconstitutional because it excludes children in the employ of the U. S. Senate. But everybody knows that children in the employ of the Senate are not properly a "class," for the constituent units of such alleged class are subject to constant change owing to the political favor upon which such service depends, so that, theoretically at least, it is possible for every child in the District to enjoy such excepted employment. Without such exception, it is doubtful that service in the Senate would have come within the employments prohibited, any more than the making of beds or the nursing of children, and, while it may be well to have such exception expressed, its exemption is no more fatal to the act than the nonenumeration of the many other activities open to children which the law making power has not seen fit to prohibit. The Supreme Court of the U.S. has said that "legislation which, in carrying out a public purpose, is limited in its application, if within the sphere of its operation it affects alike all persons similarly situated, is not within the [fourteenth] amendment." (Barbier $v$. Connolly, 113 U. S., 27.) Counsel also objects, on constitutional grounds to section 16, giving the commissioners authority to issue permits for the employment of children in theatrical exhibitions, citing the case of Yick Wo
v. Hopkins, 118 U. S., 356. But this legislation has reference to infants whose status under the law is abnormal, and is intended for their protection, and plainly confers upon the commissioners a discretion to be exercised according to the circumstances of each case, and, therefore, is excepted from the operation of this ruling of the Supreme Court by the very language of the decision, for "the character of the exhibition" is specified.

This act is undoubtedly a valid exercise of the police powers of the State, for the protection of child life.

This brings us to the question as to whether the delivery of newspapers as set forth be prohibited.

Counsel on both sides have industriously and skillfully labored to enlighten the court as to the meaning of the word "merchandise," the prosecution insisting that even old newspapers have value for junk dealers and for this reason and because of the decision in the case of Smith $v$. Wilcox, 24 N. Y. Reports, 353, that newspapers are merchandise, their delivery is forbidden by section 1 of this act. But it must be remembered that old newspapers cease to be sought for as newspapers, disseminators of the news from the four quarters of the globe, and are valuable for the paper stock in them.

In Smith $v$. Wilcox decided in 1862, a liberal construction was given to an act for the regulation of the observance of the Sabbath. In view of the language of the decision that "acts not interfering with the benevolent design of the Sabbath * * * and not prohibited, do not take their character from the day on which they are done, but are lawful or unlawful in reference to the general laws of the land," and the wonderful development of the Sunday newspaper, this decision can hardly be given much weight in the interpretation of an act of the character of the one now under consideration. I do not think that newspapers are merchandise in the proper sense of that term for the reason

First, everything of value is not merchandise, for instance, land;
Second, everything trafficked in is not merchandise, e. g., stocks and bonds;

Third, newspapers are sought for the intelligence they transmit, and not for the intrinsic value of the material upon which that intelligence is conveyed.
But whether newspapers be merchandise or not, it is a familiar rule of interpretation that an act to be within a penal prohibition must be within its spirit as well as within its letter. Whatever is not within the motives and purposes of an act, although within the letter of the act, is without its operation. Now the purpose of this legislation is the protection of the physical and mental welfare of children in their growing years from whatever may lead to arrested development. No one will seriously contend that the nature of the employment in the case at bar is at all harmful to the child, nor can it be urged that Congress had in mind newspapers in the enumeration of "merchandise" in section 1, since in section 11 et seq. it promulgated its wishes in regard to the handling of newspapers by minors. In no place in the act is the prohibition of the delivery of newspapers to be found, and it follows that the defendant is discharged.

Employment of Labor-Breach of Contract by EmployeeRecovery of Wages Earned-Latham v. Barwick, Supreme Court of Arkansas, 113 Southwestern Reporter, page 646.—J. F. Barwick had recovered wages in a suit against one Latham, executor of an estate, in the circuit court of Clay County, whereupon the latter appealed, securing a reversal of the judgment of the lower court. The facts appear in the opinion, which was delivered by Judge McCulloch, and is in part as follows:

This is an action instituted by appellee against appellant's testatrix to recover upon an account for wages alleged to be due him as a farm hand. He entered into a verbal contract with appellant's testatrix to work on the latter's farm from February 26 until July 1, 1906, for $\$ 25$ per month, and quit work on May 14, 1906. He sues for the amount of his earned wages. There was testimony tending to show that according to the terms of the contract the wages of appellee were to be paid one-half as he earned or needed them and the other half on July 1st, that he quit the service of his employer without cause, and that at the time he quit work more than one-half of his earned wages had been paid to him.

There seems to be some conflict in the authorities whether or not one employed for a specified time, who, without adequate cause, quits service before expiration of the time, can recover upon a quantum meruit; but the great weight of authority is to the effect that he can not recover. ( 26 Cyc . p. 1042, and cases cited.) This court adopted the rule sustained by the weight of authority. English, C. J., speaking for the court in Hibbard $v$. Kirby, 38 Ark. 105, said: "The rule seems to be that if the contract of the servant to labor be for a specified period of time, and payment is to be made, either expressly or by implication of law, at the end of the period, and the servant leaves the service of his master improperly, without a sufficient cause, and without his consent, before the expiration of that time, he can recover no compensation for his services, either on the contract or on a quantum meruit." A statute of this State enacted in 1883 puts the question entirely at rest. It is as follows: "If any laborer shall without good cause abandon his employer before the expiration of his contract he shall be liable to such employer for the full amount of any account he may owe him and shall forfeit to his employer all wages or share of crop due him or which may become due him from his employer." (Kirby's Digest, sec. 5028.) This statute is conclusive of the questions involved in this appeal. It applies, in express terms, to all verbal contracts for services for a period not longer than one year.

It follows that the court erred in giving a peremptory instruction and in refusing to give the instructions requested by appellant.

Reversed and remanded for a new trial.

Mine Regulations-Sale of Powder-Commerce-Ex parte Williams, Supreme Court of Kansas, 98 Pacific Reporter, page 777.J. H. Williams was convicted of selling powder to a coal miner in violation of the provisions of chapter 250, acts of 1907, which permit such
sales only in an original package containing $12 \frac{1}{2}$ pounds of powder, securely sealed. In default of the fine imposed, Williams was committed to jail. He applied for a writ of habeas corpus, contending that the law was unconstitutional as restricting the liberty of contract by taking property without due process of law, by denying the equal protection of the laws, and by unlawful discrimination. It was also claimed that the law was void, because it conflicts with the commerce clause of the Constitution of the United States.

It was stipulated that the powder sold was in an unbroken original package containing 25 pounds and was imported into Kansas from the State of Missouri by the company for which Williams was agent; that black powder is an article of commerce among the States; and that black powder in 121-pound packages can not be bought or sold in the market except at a considerably higher price. The constitutionality of the law was upheld in all its points and the prisoner was remanded. Judge Benson announced the opinion of the court, reviewing each of the claims of the defendant. He held that, owing to the hazardous nature of coal mining and the equal application of the law to all employment in such mines, the charge of discrimination was not well founded; that the regulation of the sale of dangerous explosives was a customary and valid exercise of the police power of the State, which controls even the right of contract; and, further, that the control over commerce conferred on Congress "does not prevent the State from making reasonable regulations designed primarily to promote the health and safety of its people, although they indirectly affect the subjects of interstate commerce." Cases were cited in support of each point taken, and the following syllabus was prepared by the court as presenting its rulings on the points of law involved:

Chapter 250, page 400, of Laws 1907, entitled "An act to protect mines, miners, and mine laborers, and defining the manner of sale and delivery of black powder for use in coal mines of the State of Kansas," is not in conflict with the state constitution or the fourteenth amendment to the Constitution of the United States and is not invalid as a regulation of interstate commerce.

Payment of Wages-Weighing Coal Before ScreeningFreedom of Contract-Equal Protection of Laws-Constitutionality of Statute-McLean v. State, Supreme Court of the United States, 29 Supreme Court Reporter, page 206.-This was a case in which was brought in question the constitutionality of section 1 of the statute of Arkansas (ch. 219, acts of 1905), which requires operators of mines employing ten or more men underground at bushel or ton rates to weigh all coal mined before screening the same. Waiver of the statute by the employee is prohibited, and punishment for violations is fixed at a fine of not less than $\$ 200$ nor more than $\$ 500$, or imprison-
ment for not less than 60 days nor more than 6 months, or both fine and imprisonment. McLean was managing agent of a mining company and contracted with his employees to pay them at a fixed rate per ton, the coal to be screened before weighing. For this admitted violation of the law he was convicted in the circuit court of Sebastian County and, on appeal, in the supreme court of the State, over his contention that the law was unconstitutional. Further appeal was taken to the Supreme Court of the United States, in which the constitutionality of the law was upheld, Justices Brewer and Peckham dissenting. Owing to the importance of the principle involved, the opinion of the court, which was delivered by Justice Day, is reproduced in full:

The objections to the judgment of the state supreme court of a constitutional nature are twofold: First, that the statute is an unwarranted invasion of the liberty of contract secured by the 14th amendment of the Constitution of the United States; second, that the law, being applicable only to mines where more than ten men are employed, is discriminatory, and deprives the plaintiff in error of the equal protection of the laws, within the inhibition of the same amendment.

That the Constitution of the United States, in the 14th amendment thereof, protects the right to make contracts for the sale of labor, and the right to carry on trade or business, against hostile statelegislation, has been affirmed in decisions of this court, and we haveno disposition to question those cases in which the right has been upheld and maintained against such legislation. (Allgeyer $v$. Louisiana, 165 U. S.578, 17 Sup. Ct. Rep. 427; Adair v. United States, 208 U. S. 161, 28 Sup. Ct. Rep. 277.) But, in many cases in this court, the right of freedom of contract has been held not to be unlimited in its nature, and when the right to contract or carry on business conflicts with laws declaring the public policy of the State, enacted for the protection of the public health, safety, or welfare, the same may be valid, notwithstanding they have the effect to curtail or limit the freedom of contract. It would extend this opinion beyond reasonable limits to make reference to all the cases in this court in which qualifications of the right of freedom of contract have been applied and enforced. Some of them are collected in Holden v. Hardy, 169 U. S. 366, 18 Sup. Ct. Rep. 383, in which it was held that the hours of work in mines might be limited.

In Knoxville Iron Co. v. Harbison, 183 U. S. 13, 22 Sup. Ct. Rep. 1, it was held that an act of the legislature of Tennessee, requiring the redemption in cash of store orders or other evidences of indebtedness issued by employers in payment of wages due to employees, did not conflict with any provisions of the Constitution of the United States, protecting the right of contract.

In Frisbie $v$. United States, 157 U. S. 160, 15 Sup. Ct. Rep. 586, the act of Congress prohibiting attorneys from contracting for a larger fee than $\$ 10$ for prosecuting pension claims was held to be a valid exercise of police power.

In Soon Hing $v$. Crowley, 113 U. S. 703, 5 Sup. Ct. Rep. 730, a statute of California, making it unlawful for employees to work in laundries between the hours of $10 \mathrm{p} . \mathrm{m}$. and $6 \mathrm{a} . \mathrm{m}$. was sustained.

The statute fixing maximum charges for the storage of grain, and prohibiting contracts for larger amounts, was held valid. (Munn $v$. Illinois, 94 U. S. 113.)

In Patterson v. The Eudora, 190 U. S. 169, 23 Sup. Ct. Rep. 821, this court held that an act of Congress making it a misdemeanor for a shipmaster to pay a sailor any part of his wages in advance was held to be valid.

In Gundling $v$. Chicago, 177 U. S. 183, 20 Sup. Ct. Rep. 633, this court summarized the doctrine as follows:
"Regulations respecting the pursuit of a lawful trade or business are of very frequent occurrence in the various cities of the country, and what such regulations shall be and to what particular trade, business, or occupation they shall apply, are questions for the State to determine, and their determination comes within the proper exercise of the police power by the State; and, unless the regulations are so utterly unreasonable and extravagant in their nature and purpose that the property and personal rights of the citizen are unnecessarily, and in a manner wholly arbitrary, interfered with or destroyed without due process of law, they do not extend beyond the power of the State to pass, and they form no subject for federal interference."
In Jacobson $v$. Massachusetts, 197 U. S. 11, 25 Sup. Ct. Rep. 358, this court said:
"The liberty secured by the Constitution of the United States to every person within its jurisdiction does not import an absolute right in each person to be, at all times, and in all circumstances, wholly freed from restraint. There are manifold restraints to which every person is necessarily subject for the common good."

It is, then, the established doctrine of this court that the liberty of contract is not universal, and is subject to restrictions passed by the legislative branch of the government in the exercise of its power to protect the safety, health, and welfare of the people.

It is also true that the police power of the State is not unlimited, and is subject to judicial review; and, when exerted in an arbitrary or oppressive manner, such laws may be annulled as violative of rights protected by the Constitution. While the courts can set aside legislative enactments upon this ground, the principles upon which such interference is warranted are as well settled as is the right of judicial interference itself.

The legislature, being familiar with local conditions, is, primarily, the judge of the necessity of such enactments. The mere fact that a court may differ with the legislature in its views of public policy, or that judges may hold views inconsistent with the propriety of the legislation in question, affords no ground for judicial interference, unless the act in question is unmistakably and palpably in excess of legislative power. (Jacobson v. Massachusetts, supra; Mugler v. Kansas, 123 U. S. 623, 8 Sup. Ct. Rep. 273; Minnesota v. Barber, 136 U. S. 313, 320, 10 Sup. Ct. Rep. 862; Atkin. v. Kansas, 191 U. S. 207, 223, 24 Sup. Ct. Rep. 124.)

If the law in controversy has a reasonable relation to the protection of the public health, safety, or welfare, it is not to be set aside because the judiciary may be of opinion that the act will fail of its purpose, or because it is thought to be an unwise exertion of the authority vested in the legislative branch of the government.

We take it that there is no dispute about the fundamental propositions of law which we have thus far stated; the difficulties and differences of opinion arise in their application to the facts of a given case.

Is the act in question an arbitrary interference with the right of contract, and is there no reasonable ground upon which the legislature, acting within its conceded powers, could pass such a law? Looking to the law itself, we find its curtailment of the right of free contract to consist in the requirement that the coal mined shall not be passed over any screen where the miner is employed at quantity rates, whereby any part of the value thereof is taken from it before the same shall have been weighed and credited to the employee sending the same to the surface; and the coal is required to be accounted for according to the legal rate of weights, as fixed by the law of Arkansas, and contracts contrary to this provision are invalid. This law does not prevent the operator from screening the coal before it is sent to market; it does not prevent a contract for mining coal by the day, week, or month; it does not prevent the operator from rejecting coal improperly or negligently mined, and shown to be unduly mingled with dirt or refuse. The objection upon the ground of interference with the right of contract rests upon the inhibition of contracts which prevent the miner employed at quantity rates from contracting for wages upon the basis of screened coal instead of the weight of the coal as originally produced in the mine.

If there existed a condition of affairs concerning which the legislature of the State, exercising its conceded right to enact laws for the protection of the health, safety, or welfare of the people, might pass the law, it must be sustained; if such action was arbitrary interference with the right to contract or carry on business, and having no just relation to the protection of the public within the scope of legislative power, the act must fail.

While such laws have not been uniformly sustained when brought before the state courts, the legisiatures of a number of the States have deemed them necessary in the public interests. Such laws have been passed in Illinois, West Virginia, Colorado, and perhaps in other States. In Illinois they have been condemned as unconstitutional. (Ramsey $v$. People, 142 III. 380, 32 N. E. 364.) The same conclusion has been reached in Colorado, citing and following the Illinois case. (Re House Bill No. 203, 21 Colo. 27, 39 N. E. 431.)

In West Virginia, while at first sustained by a unanimous court, such an act was afterwards, upon rehearing, maintained by a divided court. (State v. Peel Splint Coal Co. 36 W. Va. 802, 15 S. E. 1000.)

We are not disposed to discuss these state cases. It is enough for our present purpose to say that the legislative bodies of the States referred to, in the exercise of the right of judgment conferred upon them, have deemed such laws to be necessary.

Conditions which may have led to such legislation were the subject of very full investigation by the Industrial Commission authorized by Congress by the act of June 18, 1898. (30 Stat. at L. 476, Chap. 466.) Volume 12 of the report of that commission is devoted to the subject of "Capital and Labor Employed in the Mining Industry." In that investigation, as the report shows, many witnesses were called and testified concerning the conditions of the mining industry in this country, and a number of them gave their views as to the use of screens as a means of determining the compensation to be paid operatives in coal mines. Differences of opinion were developed in the testimony. Some witnesses favored the "run of the mine" system, by which the coal is weighed and paid for in the form in which it is originally mined;
others thought the screens useful in the business, promotive of skilled mining, and that they worked no practical discrimination against the miner. A number of the witnesses expressed opinions, based upon their experience in the mining industry, that disputes concerning the introduction and use of screens had led to frequent and sometimes heated controversies between the operators and the miners. This condition was testified to have been the result, not only of the introduction of screens as a basis of paying the miners for screened coal only, but, after the screens had been introduced, differences had arisen because of the disarrangement of the parts of the screen, resulting in weakening it, or in increasing the size of the meshes through which the coal passed, thereby preventing a correct measurement of the coal as the basis of paying the miner's wages.

We are unable to say, in the light of the conditions shown in the public inquiry referred to, and in the necessity for such laws, evinced in the enactments of the legislatures of various States, that this law had no reasonable relation to the protection of a large class of laborers in the receipt of their just dues and in the promotion of the harmonious relations of capital and labor engaged in a great industry in the State.

Laws tending to prevent fraud and to require honest weights and measures in the transaction of business have frequently been sustained in the courts, although, in compelling certain modes of dealing, they interfere with the freedom of contract. Many cases are collected in Mr. Freund's book on "Police Power," wherein that author refers to laws which have been sustained, regulating the size of loaves of bread when sold in the market; requiring the sale of coal in quantities of 500 pounds or more, by weight; that milk shall be sold in wine measure, and kindred enactments. (Sec. 274.)

Upon this branch of the case it is argued for the validity of this law that its tendency is to require the miner to be honestly paid for the coal actually mined and sold. It is insisted that the miner is deprived of a portion of his just due when paid upon the basis of screened coal, because, while the price may be higher, and theoretically he may be compensated for all the coal mined in the price paid him for screened coal, that practically, owing to the manner of the operation of the screen itself, and its different operation when differently adjusted, or when out of order, the miner is deprived of payment for the coal which he has actually mined. It is not denied that the coal which passes. through the screen is sold in the market. It is not for us to say whether these are actual conditions. It is sufficient to say that it was a situation brought to the attention of the legislature, concerning which it was entitled to judge and act for itself in the exercise of its lawful power to pass remedial legislation.

The law is attacked upon the further ground that it denies the equal protection of the law, in that it is applicable only to mines employing ten or more men. This question is closely analogous to one that was before this court in the case of Consolidated Coal Co. v. Illinois, 185 U. S. 203, 22 Sup. Ct. Rep. 616, wherein an inspection law of the State was argued to be clearly unconstitutional by reason of its limitation to mines where more than five men are employed at any one time, and in that case, as in this, it was contended that the classification was arbitrary and unreasonable,- that there was no just reason for the discrimination. Of that contention this court said (p. 207):
"This is a species of classification which the legislature is at liberty to adopt, provided it be not wholly arbitrary or unreasonable, as it was in Cotting $v$. Kansas City Stock Yards Co. (Cotting $v$. Godard) 183 U S. 79, 22 Sup. Ct. Rep. 30, in which an act defining what should constitute public stock yards, and regulating all charges connected therewith, was held to be unconstitutional, because it applied only to one particular company, and not to other companies or corporations engaged in a like business in Kansas, and thereby denied to that company the equal protection of the laws. In the case under consideration there is no attempt arbitrarily to select one mine for inspection, but only to assume that mines which are worked upon so small a scale as to require only five operatives would not be likely to need the careful inspection provided for the larger mines, where the workings were carried on upon a larger scale or at a greater depth from the surface, and where a much larger force would be necessary for their successful operation. It is quite evident that a mine which is operated by only fiv่e men could scarcely have passed the experimental stage, or that precautions necessary in the operation of coal mines of ordinary magnitude would be required in such cases. There was clearly reasonable foundation for a discrimination here."

This language is equally apposite in the present case. There is no attempt at unjust or unreasonable discrimination. The law is alike applicable to all mines in the State employing more than ten men underground. It may be presumed to practically regulate the industry when conducted on any considerable scale. We can not say that there was no reason for exempting from its provisions mines so small as to be in the experimental or formative state, and affecting but few men, and not requiring regulation in the interest of the public health, safety, or welfare. We can not hold, therefore, that this law is so palpably in violation of the constitutional rights involved as to require us, in the exercise of the right of judicial review, to reverse the judgment of the supreme court of Arkansas, which has affirmed its validity. The judgment of that court is affirmed.

## DECISIONS UNDER COMMON LAW.

Contracts for Exclusive Redemption of Wage ChecksRestraint of Trade-Monopoly-Enforcement of ContractStewart et al. v. Stearns \& Culver Lumber Company, Supreme Court of Florida, 48 Southern Reporter, page 19.-Stewart and another, partners, sued the company named to recover damages for the violation of a contract. Judgment being against them in the circuit court of Santa Rosa County, the partners appealed, the appeal resulting in the affirmance of the judgment of the lower court. The facts appear sufficiently in the opinion, which was delivered by Judge Whitfield, and is in part as follows:

The contract upon which the action is brought contains a lease to a partnership of a storehouse formerly used as a commissary in a village where a corporation, the owner of the storehouse, it is alleged, owned and operated a large sawmill, employing a great number of
persons. The contract also contains an agreement by the corporation to relinquish its right to establish and maintain a commissary for its employees, to use its influence to induce the employees, loggers, and others to purchase their supplies from the partnership, and to issue to its employees merchandise checks against their wages directed exclusively to the partnership, to be redeemed by the corporation through the partnership for cash at par every 30 days, if such issue is not illegal. The partnership agreed in the contract to establish a general store carrying $\$ 10,000$ or more of feed, grain, dry goods, boots, and shoes, furniture, drugs, stationery, notions, hardware, etc., to accept as cash the merchandise coupons issued by the corporation, and to pay the corporation every 30 days a commission of 5 per cent. upon the gross sales of the business. The partnership alleges that its covenants have been performed, and that the covenants of the corporation have been violated, for which damages are claimed.

The demurrer to the declaration presents the question whether the contract is one that the courts will enforce; i. e., whether it tends to create a monopoly, to restrain trade, or to stifle competition, so as to make it violative of the laws or of public policy of this State.

At common law any contract or agreement that in its operation has or may have a tendency to restrain trade, to stifle competition in trade, to create or maintain a monopoly, or to unnaturally control the supply of or to increase the price of or to curtail the opportunity of obtaining useful commodities, to the injury of the public or any considerable portion of the population of any locality, is regarded as contrary to just governmental principles and inimical to the public welfare, and therefore against public policy.

The courts will not in general aid either party to enforce an illegal agreement, but will leave the parties where they place themselves with reference to such illegal agreement, except where the law or public policy requires action by the courts, or where the parties are not in pari delicto, and perhaps in other cases not pertinent here.

Public policy favors competition in trade, to the end that commodities may be obtained with the greatest convenience and at the lowest possible prices, and opposes monopolies and restraints upon trade in useful commodities that tend to inconvenience or to control the supply or to higher prices, to the injury of the public or any considerable portion thereof in any locality. Agreements that in their operation and effect tend to facilitate, stimulate, or promote trade are regarded with favor where they do not directly or indirectly injure the public.

Whether a contract in its terms or operation is or may be unreasonable because it extends to or may be extended to a longer time or to a greater territory or to other subjects than is reasonably necessary for the protection of the rights of the parties inter sese, and whether the public is or may be appreciably injured thereby, can not be ascertained by any accurately defined rules, but must be determined from a practical consideration of the circumstances of every case as it arises in connection with such general principles of law and of construction as are applicable thereto. The validity of the contract should be determined not by what has been done under it, but by what may be done under it, by what will be its real tendency with reference to trade and monopoly when in full operation.

Where a contract in its terms and its operation transfers from one party to another a lawful business, trade, or occupation actually engaged in, or a lawful exclusive right, and, as an incident thereto, it is agreed that the vendor will not for a reasonable time engage in the same or a similar business within a reasonable territory covered by the business, and such agreement does not unreasonably restrict the available supply of, or access to, or raise the price of any useful commodity, or tend to create a monopoly, it may not be against public policy or unlawful, and consequently may be enforced by the courts if otherwise legal and binding.

The illegality in the agreement or in its operation need not amount to a criminal offense. The test is whether the agreement in full operation will be injurious to the public welfare. If so, it will not be enforced.

The inhabitants of a village have a right to protection from injurious restraint of trade and monopoly in useful commodities in the village without reference to the opportunities afforded for obtaining the commodities in a neighboring town.

Where an agreement in operation has a necessary tendency to restrain trade or to monopoly to the appreciable injury of the public, limitations as to time, place, or subjects contained in the agreement are immaterial.

The validity or invalidity of an agreement that in operation tends to restrain trade or to monopoly is in general determined by the element of whether it is or is not injurious to the public. If injurious in any perceptible degree to any considerable portion of the public, the agreement is contrary to public policy, and will not be enforced. If not so injurious, it may be enforced if otherwise legal and binding.

In this case no established business, trade, profession, or occupation, or lawful exclusive right, was transferred with accompanying good will, but the contract contains a lease of a storehouse and an agreement to relinquish a right common to all to establish a general store in a village, coupled with other agreements that in practical operation necessarily tend to substantially restrain freedom of trade and to monopoly, whether so intended by the parties or not.

Assuming that the corporation had the right to establish and maintain a general store, it obviously had no lawful exclusive right to do so in the village named by the contract, and the agreement to relinquish a right common to all to establish and maintain a general store in the village, if of any benefit to the other contracting party, was not necessary to the protection of the rights in the lease of the storehouse. When this agreement to relinquish a right common to all is taken in connection with the agreement as to the exclusive issuing and redeeming by the contracting parties of merchandise checks to a great number of persons in a village, employees of one of the parties, and with the character of goods the checks would purchase, the relation of the contracting corporation to its employees, the great number of the employees operating in a village, the agreement to induce the employees, loggers, and others to purchase their supplies at the one place, and the agreement to pay 5 per cent. commission on gross sales, it is manifest that the inevitable tendency of the agreement, though ancillary to a lease of a storehouse, is to restrain trade, to stifle competition, to increase prices of uséful if not necessary commodities, and to create and maintain a monopoly, so as to injure
in some appreciable degree at least a considerable portion of the local public whether such result was intended or not. If the restraint of trade or the monopoly the contract tends to effectuate, in its operation, is injurious to the public to any appreciable degree, the limitations, expressed or implied, as to time, place, or objects are immaterial.

A mere influencing of trade in a lawful manner is not necessarily illegal. The issuing by an employer to employees of "merchandise checks against their wages" to be redeemed exclusively through a merchandise house of another party as alleged in this case may not ipso facto and necessarily be illegal under all circumstances; but under the circumstances of this case such a course of dealing, whether so intended or not, tends to aid in restraining trade and in maintaining a monopoly to the injury of a large number of persons. It does not appear from the record whether the merchandise checks were to be issued before or after wages were due and payable, nor does it seem to be material in this case. Even if it should appear that the village where this contract operated is near a larger town, it would not redeem the contract, since the freedom of trade may be restrained, and a monopoly assisted to the injury of a local public by curtailing the convenience of the public in procuring supplies of useful commodities. Whether the corporation was or was not able to pay its employees in cash does not appear to be material in this case. No element of partnership express or implied appears from the contract or the declaration if that would relieve the agreement of invalidity.

While the rent for a storehouse may properly be a percentage of the business done in the storehouse, yet in this case the agreement to pay 5 per cent. of gross sales, taken in connection with the other parts of the contract and conditions under which it was to operate and with the claim for commissions paid, indicate that such a percentage covers, not only the store rent, but also profits from a business capable of being so conducted as to in some substantial degree restrain trade and maintain a monopoly to the injury of at least an appreciable part of the public in the locality where the business was conducted, and the intention of the parties is of no controlling force.
The inevitable tendency of the contract operating under the circumstances alleged in the declaration is to restrain trade, to stifle competition, and to a monopoly, to the injury of at least a considerable portion of the public affected by the contract, and the contract is consequently violative of the public policy of the State, or the implied principles of law recognized as existing in this State on this subject for the general welfare. This being so, courts of justice will not aid the parties in enforcing the invalid agreements, and the demurrer to the declaration was properly sustained.

Employers' Liability-Excessive Damages-Incompetence of Employees-Smith v. Chicago, Peoria and St. Louis Railway Co., Supreme Court of Illinois, 86 Northeastern Reporter, 150.-Gertrude Smith had recovered damages in the amount of $\$ 10,000$ for the death of her husband, an engineer on one of the trains of the company. An appeal from the circuit court of Sangamon County resulted in the judgment being affirmed in the appellate court, and again in the supreme
court of the State. The action was based on the alleged failure of the employer to exercise due care in the employment of the engineer and conductor in charge of the work train with which Smith's engine collided, as it was claimed that these men were incompetent for the discharge of the duties for which they were employed.

Appellants presented as grounds of appeal that there was no sufficient ground on which to base the charge of incompetency, and that the amount of damages awarded was excessive. Chief Justice Cartwright, who announced the opinion of the court, took up these points in their reverse order, using in part the following language:

We feel certain that the learned counsel who present and argue the second proposition that the damages awarded by the jury are excessive would be quite unwilling to have us attribute their course to ignorance of the law, and it is fair to assume that they do not expect any attention to be given to the point further than to be again admonished that it can not be raised. The proposition that the amount of damages caused by negligent act or omission is purely one of fact, finally settled by the judgment of the appellate court, is one about which there never could have been any doubt, and yet this court has been required to make that statement in a multitude of cases, running through more than 100 volumes of the reports. In 1883, in the case of Wabash, St. Louis \& Pacific Railway Co. v. Peyton, 106 Ill. 534, 46 Am. Rep. 705, the court said (page 539 of 106 Ill .): "It is likewise insisted that the damages are excessive. Appellant refers to no textbook or reported case which holds that the assessment of damages is a question of law. On the other hand, by every rule of law it must be considered a question of fact. It is averred as a fact in the declaration. It is averred as a fact, and never questioned by demurrer. On the trial damages are proved by evidence, and they are found by the jury, and not by the court. The proposition seems so obvious that it should not require the decision of a court to establish the proposition." If attorneys have not yet learned of this obvious proposition by its wearisome repetition in so many cases, it would seem to be of no use to state any principle of law in the decisions of the court.

The other alleged error questions the ruling of the trial court in refusing to direct a verdict of not guilty on motion of the defendant; and it is insisted that the evidence tending to support the cause of action alleged in the declaration, together with all reasonable inferences which the jury might draw therefrom, was insufficient, as a matter of law, to sustain the verdict.

That the death of Smith was caused by the negligence of the engineer and conductor was proved, but the defendant would not be liable, under the declaration, for an injury caused by their negligence unless it resulted from their incompetency, combined with the failure of the defendant to use reasonable care in their selection. It was necessary for the plaintiff, not only to prove incompetency of the engineer or conductor, or both, but also negligence of the defendant in employing them or one of them. The mere happening of an accident would not ordinarily raise a presumption of incompetency (Mobile \& Ohio Railroad Co. v. Godfrey, 155 II. 78, 39 N. E. 590), but the conduct of a person on a single occasion may be entirely sufficient to
demonstrate his unfitness, and, after such an occurrence, to charge the employer with a failure of duty in keeping him in the service. If the employer used reasonable care in the selection of the servant, and had no knowledge of his incompetency, the employer would not be responsible for the consequences resulting on the single occasion when incompetency was manifested. The conduct of the engineer and conductor on this occasion fairly tended to show the unfitness and incompetency of both for the positions in which they had been placed, but the evidence did not show that the engineer had previously manifested any want of competency or that the defendant did not use reasonable care in his selection.

In September, 1904, and January, 1905, the superintendent of defendant did not regard Cuthbertson as competent to take charge of a work train; and, unless the superintendent afterward satisfied himself of his competency, he was guilty of negligence in employing him. Cuthbertson had no experience, between the time that he was rejected as incompetent and June, 1905, which could qualify him to fill the position as conductor. The evidence favorable to the plaintiff fairly tended to prove that Cuthbertson was incompetent to fill the position of conductor, that the superintendent knew him to be incompetent, and that reasonable care was not used in employing him. The trial court therefore did not err in refusing to direct a verdict of not guilty.

Employers Liability-Release-Reliance on Advice of Company Surgeon-Fraud-Evidence-St. Louis, Iron Mountain and Southern Railway Company v. Hambright, Supreme Court of Arkansas, 113 Southwestern Reporter, page 803.-W. O. Hambright was a brakeman employed by the company named, and was injured while in such service. He placed himself first under the care of his own physician, but afterwards went to a hospital maintained by the company, where he remained for about two weeks. When he went away he promised Dr. Outten, the chief surgeon, that he would return. Several weeks later Dr. Outten wrote to him, upbraiding him for his failure to return and for his prolonged absence without having obtained a "clearance," or statement of his physical condition, before leaving the hospital. Hambright thereupon returned to the hospital and Dr. Outten gave him a letter to be taken to the claim agent as a basis of settlement. This letter was sealed, and contained a statement of serious injuries with a bare possibility of recovery. Dr. Outten testified that he informed Hambright of the contents of the letter, but this statement the latter denied. The letter was left at the claim agent's office in his absence. Hambright testified that the doctor had told him that his injuries were not serious, and that he would be all right in a few months, this testimony being supported by that of a friend, Phelps, who had accompanied Hambright on his visit to the doctor. There was also a conflict between the testimony of Hambright and that of the claim
agent and his employee. Hambright accepted $\$ 1,250$ from the company and signed a release of all claims of every class arising out of the injuries received. He afterwards sued on the ground of the employers' liability for the injury and alleged fraud in the procurement of the settlement. The circuit court of Miller County gave damages in the amount of $\$ 5,000$, and the railroad company appealed. The judgment of the court below was affirmed, on grounds that appear in the following extracts from the opinion of the court, which was delivered by Judge Hill:

Appellant says that the evidence is not sufficient to show that the plaintiff was either deceived or misled, or that any fraud was practiced on him in obtaining the settlement. In discussing this it must be taken that the jury has accepted the testimony of Hambright and Phelps and rejected that of Outten and Jones; and the sufficiency of the evidence must be tested solely upon the accredited testimony. In H. \& T. C. Ry. Co. v. Brown (Tex. Civ. App.) 69 S. W. 651, an employee of the railroad company was injured and was taken to a hospital, where he was treated by Dr. Stewart, the surgeon of the railroad company. The doctor represented to him that the bones of his arm had knitted and united together, that his arm was well, and that as soon as the swelling had passed away his arm would be as good as ever. Brown, the employee, had stated that he was ready to settle with the railroad company whenever the bones of his arm had knit together and his arm was cured. The court said: "The facts in evidence warrant the conclusion that Stewart made the representations and statements to the appellee for the purpose of inducing him to execute the release to appellant, and that the appellee believed the statements were true, and relied upon the same, and was thereby induced to make the settlement and sign the release; that the representations and statements so made by Stewart were false, in that the bones at the time of the trial were not united, and that his arm was practically destroyed in its usefulness. The court correctly submitted this issue to the jury. We can not agree with the contention of appellant that it may escape liability on the ground that the representations and statements made by Stewart was a mere expression of opinion. It was more than an opinion. It was the statement of a fact. The effect of his statement was that the appellee was a sound man, and that the bones of his arm had knitted together, and that it would be all right. It is true this statement may have been predicated upon his opinion as a medical expert, but the opinion is based upon facts of which he possessed knowledge. The fact that the statement made by Stewart was not intentionally false does not affect the right of the appellee to have the release set aside if he was misled by the statement, and executed the release believing the statement was true. In such a case innocent misrepresentations may as well be the basis of relief as where such statements are intentionally false." This case was quoted from and approved by the federal court of appeals of the ninth circuit in Great Northern Ry. Co. v. Fowler, 136 Fed. 118, 69 C. C. A. 106. In that case a brakeman on a railroad was injured and was examined by the company's physician, who advised him,
after a cursory examination, that his injuries were slight, and that he would be ready for work in two weeks. He consulted no other physician as to the extent of his probable injuries. The decisions touching this exact point are carefully considered and discriminated, and these conclusions reached: "He accepted the statement and opinion of the appellant's surgeon, and on the basis of it received $\$ 195$ and signed the discharge. We entertain no doubt that such a release executed under a mutual mistake of fact so induced by the appellant should be set aside. It is true that, where there is no misrepresentation or fraud on the part of the releasee, a releasor can not subsequently avoid his release on the ground that his injuries were more serious than he thought them to be, even though his opinion at the time of making the settlement may have been based upon that of a physician employed by the releasee to examine and report on the extent of his injuries; * * * but it is equally true that a mutual mistake of fact or an innocent misrepresentation of the facts of the releasor's injury, made by the releasee's physician, may be effective to avoid a release induced thereby."
The case of T. \& P. Ry. Co. v. Jowers, (Tex. Civ. App.) 110 S. W. 946, is essentially similar to the case at bar. An employee of the railroad company was injured and sent to the same hospital to which Hambright went, and was under the care of Dr. Vasterling, who was also one of the physicians who attended Hambright while he was at the hospital. The course of dealing between the hospital and the patient was shown to be the same in that case as it was in this. The plaintiff's evidence was that he had settled upon the statement of Dr. Vasterling that his injuries were slight, and it was proved that such was not the case. The court said: "The fifth and sixth assignments are submitted together in the appellant's brief, and assail the court's charge in submitting the issue of bad faith or fraud upon the part of Dr. Vasterling, appellant's physician in charge of the hospital, and Hoeppner, appellant's claim agent stationed at that place, in advising the appellee concerning the extent of his injuries at the time the release was executed. The propositions (two in number) submitted under those assignments indicate that the particular objection was to the action of the court in submitting any such issue at all under the circumstances. The first proposition asserts that fraud can not be predicated upon a representation which is a mere statement of opinion, and not the statement of the fact. The appellants lose sight evidently of the fact that fraud may be based upon the giving of an opinion as well as the statement of any other fact. In this particular suit the contention is relied upon that the physician fraudulently gave an incorrect opinion, and thereby misled the appellee into agreeing to a settlement [citing authorities]. The second proposition assumes as a matter of fact that the physician acted in good faith. That, we think, was an issue for the jury." See, also, on the general principle involved, Railway Co. v. Kosischke, 104 Fed. 440,43 C. C. A. 626, the circuit court of appeals of the eighth circuit. The appellee's evidence fully meets the requirements of the authorities to avoid a release induced by fraud.

It is said that Hambright came direct from his own physicians and ought to have known, and must have known, something of his condition outside of anything Dr. Outten said to him, and that he could not
have been misled in this regard. Hambright testified that he had been under Dr. Outten's care from September, and that he did not know his own condition, but relied upon Dr. Outten, and asked him to tell him his true condition. In the third instruction the court predicated plaintiff's case on a reliance upon Dr. Outten's statements, and the verdict means that the jury believed he did rely upon them. Dr. Outten says that his examinations were made in behalf of the employees as well as the railroad; that his employment came from the railroad company and his compensation came from a hospital fund derived from assessments of the employees. Certainly Hambright had a right to rely upon his good faith, and it does not lie in the mouth of the railway company to say that an employee can not safely rely upon statements of its chief surgeon who occupies this delicate position between it and its employees.

It is next argued that the court erred in entertaining this suit without requiring a tender of the amount received in the settlement of December 28th. This point was reserved by exception to the fourth instruction. This contention, however, was settled against the appellant in St. L., I. M. \& S. Ry. Co. v. Smith, 82 Ark. 105, 100 S. W. 884. In that case, as in this, there was a controversy over a release; one side claiming that it was for a single purpose and the other side claiming that it was a full release. The court said: "So, if the jury found that she was paid the sum of money as compensation only for the inconvenience and delay caused by the collision, or that she was induced to sign the receipt by false representations, which she relied on, as to its contents, she would not be bound to return the sum paid before suing to recover the damages sustained." If plaintiff's evidence was true then the tender was not necessary; and the defendant did not ask for the converse of the proposition to be submitted.

Employers' Liability-Safe Place to Work-Sufficient Discharge of Employer's Duty-Acts of Service-Brown $v$. People's Gaslight Co., Supreme Court of Vermont, 71 Atlantic Reporter, page 204.-Charles A. Brown was a laborer employed in laying gas pipes under the immediate direction of a foreman, one Miles, and was injured by the caving in of earth. Action was brought and a verdict for damages secured in the Rutland County court, from which the company appealed. The appeal resulted in a reversal of the judgment of the lower court, on grounds that appear in the following quotations from the opinion of the court, which was delivered by Judge Powers:

Among the nondelegable duties which a master owes his servant is that of providing and maintaining a reasonably safe place in which to work. But this rule does not require the master to supervise the merely executive details of the work as it goes along. These are acts of service, and are within the proper range of the servant's duties. They may be delegated to a competent coservant, and, when so delegated, negligence therein, though resulting in injury, will not support
an action against the master. And it matters not whether the offending servant be a foreman, overseer, superintendent, or a mere fellowworkman; the result is precisely the same-the master is not legally responsible-for it is the character of the act in question which determines. So it is that when a master provides his servant with suitable materials and instrumentalities to make safe the place, and a competent foreman to use and apply them, he fully discharges his legal duty, and the negligence of the foreman in the manner in which the appliances are used, or in failing to make use of them at all, will not establish liability on the part of the master.

Cases much like the one in hand are not wanting. In Zeigler v. Day, 123 Mass. 152, the defendant was a contractor engaged in the construction of a sewer through the streets of Cambridge. The plaintiff was at work for him excavating a trench through soil more or less sandy, under the direction of one Winning, who had charge of the work as superintendent, and whose skill and competency were admitted. For the safety of the men in the trench it was necessary in some places to shore up the sides. The necessity for this, as well as the proper mode of applying the safeguards was from the nature of the case left to be determined by the superintendent as the work progressed. There was no evidence that the defendant failed to furnish sufficient and suitable material for the construction of the required safeguards, or that he was chargeable with any specific personal neglect or knew of the cause of this injury, though he was occasionally present as the work went on. In granting a nonsuit, the court said: "In the case at bar the work was committed to the supervision of a skillful and competent superintendent. It required for the protection of the men the frequent use of temporary structures, the location and erection of which, as the digging progressed, was a part of the work in which the superintendent and the men under him were alike employed, and for the preparation of which, as in case of the scaffold of the mason or the carpenter, the master is not liable, unless there is something to show that he assumed it as a duty independent of the servant's employment."

At the time of his injury the plaintiff [Brown] was directed by Miles to go into the ditch and dig out a bell hole, [i. e., an enlargement of the trench for the accommodation of the calker], and to hurry about it so that the joint could be calked before night. The walls of the ditch were not shored up, though the defendant's superintendent testified (and this was not in any way contradicted) that the defendant supplied planking and bracing timbers to protect dangerous places, if any occurred. The plaintiff entered the ditch pursuant to Miles' order, and began the work assigned him. While so engaged, he encountered a stone in the bank, and, while digging around it to remove it, the east bank caved onto him, and caused the injuries herein sued for. After the plaintiff went into the ditch, and before the bank caved, a crack appeared in the dirt thrown up from the ditch running along parallel with the ditch, to which the calker called Miles' attention, suggesting that the bank ought to be braced to prevent caving. Miles replied, in substance, that it would stand long enough to get the joint calked, and gave the plaintiff no warning. The bank caved along this crack. It is urged that the foreman's knowledge of this crack and the plaintiff's ignorance of it save the case for the
plaintiff, on the ground that it became the duty of the master to warn the servant of a danger known to him, but unknown to the servant. Such is not the case. The danger was not in a legal sense latent. The crack was not so much the source of danger as it was the manifestation of it. But, in any view, it was in character obvious, though unseen by the plaintiff. The duty to warn is coextensive with the duty to exercise care. If it was the duty of the master to protect the plaintiff from the danger which threatened, it was his duty to warn him of the imminence of the danger indicated by the crack, otherwise, not. So it comes back to the question hereinbefore discussed. However great the moral obligation resting on the foreman to warn the plaintiff, his fellow-laborer, he did not, in his neglect to do so, represent the defendant, for the master's duty had been fully performed. The omission of the foreman in this behalf, like his omission to make use of the shoring, was his own, and not that of his master-an omission which comes within the fellow-servant rule.

Labor Organizations-Legality-Monopolies-Boycotts-Conspiracy-Injunotion-Lohse Patent Door Company v. Fuelle et al., Supreme Court of Missouri, 114 Southwestern Reporter, page 997.-The company named was a manufacturer of sashes, doors, and woodwork generally, for use in the construction of buildings, and had sued in the St. Louis circuit court to secure an injunction against a boycott. The defendants were officers and representatives of the "Carpenters' District Council," organized in accordance with the terms and rules of the "United Brotherhood of Carpenters and Joiners of America." It was charged in the petition that it was the purpose of these organizations, in cooperation with others of like nature, to so control the building business of St. Louis as to compel the petitioners to employ only union men, under conditions fixed by the unions, and thus to secure and maintain a monopoly, in that particular line of business, in behalf of the members of such associations. In furtherance of this object a boycott had been established against the plaintiff and against all builders purchasing or using the products of the company.

The petition described the methods of the boycott, the interference with the company's employees, who, it is alleged, were satisfied with their employment and were not seeking aid from the organizations named, and also set forth the fact of the insolvency of defendants. Besides asking for an injunction, the dissolution of the organizations was asked for, as being monopolistic and against public policy.

The petition was demurred to, thus admitting the facts, but holding that they did not constitute a cause of action against the defendants. This demurrer was sustained by the St. Louis circuit court, and the petition was dismissed. The company appealed, securing a
reversal of the lower court, and the case was remanded for a new trial.

The opinion was delivered by Judge Woodson, who first took up the question of monopoly as charged by the plaintiff. On this point he said:

According to the allegations of the petition and admissions of the demurrer, the United Brotherhood of Carpenters and Joiners of the City of St. Louis, and the various other associations with which it affiliates, are composed of carpenters, joiners, and other persons who do carpenter work and other labor in the construction of houses and other buildings in the city of St. Louis, and throughout the country. It is alleged and admitted that the object and purpose of these associations is to shorten the hours of work and to increase the pay they are to receive for their labor. While it might be conceded that labor organizations might be proper subjects for legislative control and regulation, yet the legislature has not in its wisdom seen proper to do so; and at common law personal service-an occupation-could not be the subject of a monopoly. In discussing that question, in the case of State ex rel. $v$. Associated Press, 159 Mo., loc. cit. 456, 60 S. W. 91, 104, 51 L. R. A. 151, 81 Am. St. Rep. 368, this court used this language: "But there is nothing here on which a monopoly can attach. The business is one of mere personal service-an occupation. Unless there is ' property' to be 'affected with a public interest there is no basis laid for the fact or the charge of a monopoly.' " The authorities seem to be uniform in holding that individuals have a perfect legal right to form labor organizations for the protection and promotion of the interest of the laboring classes, and deny the power to enjoin the members of such organizations from peaceably withdrawing from the service of the employer. [Cases cited.] These decisions are based upon the law which permits everyone to enter into any kind of a contract which has for its object and purpose the protection and promotion of the interest of the parties thereto, as well as the betterment of their condition in life; and that right to so contract is not curtailed or abridged if, perchance, the contract indirectly or incidentally operates in restraint of trade. We must therefore hold that the United Brotherhood of Carpenters and Joiners and their allied associations, whom the defendants represent, are not unlawful combinations made and entered into in restraint of trade, but are legal and highly laudable when confined within proper bounds.
On the point of the boycott the court said:
The second proposition presented for consideration seems to be equally well settled by the authorities, and nothing we might say upon the question could throw any light upon it or strengthen the principle of law upon which it is founded. We will therefore content ourselves by simply restating the rule as we find it in the numerous adjudications of this country, and quote from a few leading cases showing its application.

In brief, the petition charges defendants and those with whom they are affiliated with having entered into a conspiracy or an
unlawful combination to injure and damage plaintiff's business by having coerced and intimidated certain contractors and builders from purchasing and using all building materials manufactured by it in any building to be constructed by them by prohibiting their members from working upon all buildings in which plaintiff's said materials were being used. The demurrer admits the allegations of the petition to be true, except the allegation that the conduct of defendants is unlawful. In other words, counsel for plaintiff contends that the petition, in short, charges defendants with boycotting plaintiff's business, and that the demurrer admits the charge to be true; while counsel for defendants contends that the petition only charges them with having entered into an agreement to protect their own interest, and that the conduct complained of is not for that reason unlawful.

The word "boycott" has been defined by many courts, in different language, but all agree substantially as to the meaning of the word. After an extensive review of the authorities, the supreme court of Minnesota, in the recent case of Gray $v$. Building Trades Council, 91 Minn., loc. cit. 179, 97 N. W. 666, 63 L. R. A. 753, 103 Am. St. Rep. 477 [Bulletin No. 53, p. 955], defines the word in the following language: "A boycott may be defined to be a combination of several persons to cause a loss to a third person by causing others against their will to withdraw from him their beneficial business intercourse through threats that, unless a compliance with their demands be made, the persons forming the combination will cause loss or injury to him; or an organization formed to exclude a person from business relations with others by persuasion, intimidation, and other acts which tend to violence, and thereby cause him through fear of resulting injury to submit to dictation in the management of his affairs. Such acts constitute a conspiracy, and may be restrained by injunction." If that is the proper definition of the word "boycott," then the petition clearly charges the defendant with being guilty of boycotting plaintiff's business, for the reason, as before stated, the petition charges the defendants with having formed a combination to injure plaintiff's business, by having caused the builders of the city of St. Louis, against their will, to withdraw from plaintiff their beneficial business intercourse through threats that, unless a compliance with their demands be made, the defendants will cause a strike to be called against the said business. All the authorities hold that a combination to injure or destroy the trade, business, or occupation of another by threatening or producing injury to the trade, business, or occupation of those who have business relations with him is an unlawful conspiracy, regardless of the name by which it is known, and may be restrained by injunction.
Many cases were then cited, with extended quotations, after which it was said:

We might prolong this opinion by citing and quoting from many more of the hundreds of reported cases, where this subject has been discussed by the state and federal courts of the country, but no wise purpose would be served by doing so, for the reason that they are all in harmony with the views expressed by the various courts above mentioned.

During the oral argument it was suggested by counsel that the case of Clothing Co. v. Watson, $168 \mathrm{Mo} .146,67 \mathrm{~S} . \mathrm{W} .391$ [Bulletin No. 44, page 157], announced views not in harmony with those expressed by the courts in the case before cited. We do not so understand that case. By a careful reading of that case it will be seen that the question there discussed was whether or not, under the constitution, defendants in that case could be enjoined from publishing a boycott, and it was there held that he could not be so enjoined; but that is not the purpose of this suit. The clear object of this case is to prohibit the defendants from continuing the boycott in force heretofore declared, or to enjoin the defendants from declaring a threatened boycott against plaintiff's business, and not to enjoin its publication. If the boycott itself is enjoined, there would be no occasion for complaint against its publication.
Learned counsel for defendants, several times, during the course of the oral argument of this case, asked the question: If a single individual may lawfully do all of the things which are charged against the defendants, then why may not two or more persons agree to do the same things without violating the law? The answer is plain and simple. Neither the individual nor two or more persons can lawfully conspire to do the things charged. In the first place, the individual can not do the things charged in the petition at all, either legally or illegally, for the reason he can not conspire with himself to injure plaintiff's business, however well his intention may be to do so; nor can he intimidate the builders from using materials manufactured by plaintiff, for the reason he has no associates bound to him by contract or otherwise with which to intimidate them. It is true, the individual might make up his mind to injure plaintiff's - business, and determine in his own mind that he would work such injuries by threatening to no longer work for the builders and contractors if they continued to use materials manufactured by the plaintiff; but the practical working of such an undertaking by an individual would result in most, if not in all, instances in such a small loss to the builders and contractors, over and above the profit they would probably make by continuing to deal with plaintiff, that the threat would have but little or no intimidating effect upon them, and in no manner force them from doing business with plaintiff. Certainly the law would take no notice of such infinitesimal loss nor such slight intimidation. Lex non curat de minimis.

But so much can not be said regarding combinations or conspiracies formed between two or more persons to injure and destroy the business of a person by means of a boycott. The books are full of cases where such combinations or conspiracies have wrought great injury and loss, and even wrecked and destroyed great and powerful business institutions, and, if left untrammeled, would cause the strongest of them to fall, and the very foundation of our Government to crumble. Such combinations are differentiated from the labor organizations mentioned in paragraph 1 of this opinion by the fact that they are formed for the direct purpose of protecting and promoting the interests of the laboring classes, which only indirectly and incidentally operate in restraint of trade; while these have for their direct object the immediate effect to injure and damage the business of the persons at whom they are directed, and thereby
compel them to discharge the nonunion laborers, and thereby indirectly and incidentally protect and benefit the parties to the combination or conspiracy. All of the authorities permit and encourage the former organizations in carrying out their laudable purposes, but the law with an equally firm hand prohibits all combinations and conspiracies which are formed for the purpose of working injury and damage to the business of another. We are, therefore, of the opinion that the trial court erred in sustaining the demurrer to the petition.

Labor Organizations-Membership-Employers of Labor-Boycott-Secondary Boycott-Conspiracy-Injunction-Com-pletedActs-Interference with Employment-J. F. Parkinson Co. v. Building Trades Council of Santa Clara County et al., Supreme Court of California, 98 Pacific Reporter, page 1027.-The company named was owner and proprietor of a lumber yard, a plumbing and tinning shop, mill, etc., while the Building Trades Council was an organization made up of delegates from various labor unions of the county. This organization had for its aim the enforcement of union rules and conditions of employment throughout Santa Clara County, in the industries represented. In 1904 the plaintiff company had employed some nonunion men in the erection of lumber sheds, which gave rise to a controversy between it and the council, and before this was settled a workman was found to be employed in its tin shop who was not a member of the tinner's union. His discharge was demanded, unless he would join the union. He agreed to join, but found that the fee was $\$ 50$ instead of $\$ 25$ as he at first supposed. He then took some stock in the company, and asked for a master tinner's card at a much lower fee, on the ground that he was an employer. That the purchase of the shares constituted him an employer was denied by the council, and in this the court agreed, saying:

A stookholder of a corporation-even a large and preponderant stockholder-is not in legal contemplation the employer of those who are working for the corporation, which is a person distinct from its members, and as such the only employer in the case. Aside from this technical view, it is equally clear that the holder of a minute fraction of the stock of a corporation from which he is receiving wages is not his own employer in any substantial sense. As to this branch of the dispute, therefore, the position of the union and of the council in denying Waterman's claim to be a master tinner within the meaning of the union rules was clearly correct.

The dispute continued until Parkinson's men were called out, his shop declared unfair, and a notice sent to his customers that union men would not work on materials purchased from the boycotted company. These customers, or many of them, ceased dealings with the company, some of them canceling unfulfilled orders. The company then asked for an injunction, which was granted by the superior
court of Santa Clara County, together with a judgment of $\$ 1$ damages and costs in an amount of $\$ 304.25$. This judgment was, on appeal, dissolved by the supreme court, Judge Shaw dissenting and Judge Sloss dissenting in part. Three other judges held somewhat different opinions on certain matters of argument, but concurred in the results. The opinion of the court was delivered by Chief Justice Beatty.

It appeared from the record that Parkinson's business was not actually made to stop except for a short time, but that there was a substantial loss of profits for a time by reason of the loss of old customers. Business had been resumed with the employment of nonunion workmen, and no force, threat, violence, or intimidation were shown, nor was there any picketing of the company's premises or interference with its customers. The most serious charge proved against the council was that its business agent had told Mr. Parkinson that the council would drive him out of business if he refused to observe their rules. As to this the court said:

This, however, was merely an expression of the business agent's opinion of the effect of declaring the plaintiff unfair. It was a warning, or caution, intended no doubt to force compliance with the council's demands, but evidently it did not have that effect, for Mr. Parkinson, being of a different opinion, stood his ground, and accepted the consequences.

## Continuing the court said:

There was also some evidence that in three instances individual members of some of the unions had warned some of the strikers that they would incur some danger of personal violence if they returned to work while the plaintiff remained unfair, but these threats were not authorized or countenanced by the council or any of the unions, and not a single act of violence was proved against anyone who did return to work. It was found by the court upon evidence which fully sustains the finding that the plaintiff had been injured by the acts of the defendants in an amount not susceptible of computation, and it was found that a continuance of such acts would cause a damage irreparable, for the reason, I suppose, that its amount could not be computed, and for the same reason that the plaintiff had no plain, speedy, and adequate remedy at law. It was not found that the defendants were insolvent or unable to respond in damages.

In reference to the word "unfair," it clearly appears that, as employed by the defendants and labor organizations generally, it has a technical meaning well understood by the plaintiff and by all the persons to whom the council sent notices that plaintiff had been declared unfair. Such declaration means, and in this instance was understood by all parties concerned to mean, not that the plaintiff had been guilty of any fraud, breach of faith, or dishonorable conduct, but only that it had refused to comply with the conditions upon which union men would consent to remain in its employ or handle material supplied by it. The sole effect of the notice to the contractors was that a majority of them ceased to deal with the plaintiff, at least for a time, and some of them countermanded orders for lumber and other material previously sent it.

Can it be said, in view of this more specific and detailed statement of the probative facts involved in the general finding of the trial judge, that the defendants entered into a conspiracy for the purpose of compelling the plaintiff, by coercion and intimidation, to subject its business to their control? Can it be said that they entered into a conspiracy at all?. A combination there certainly was, but it had no reference to the plaintiff except as the business of the plaintiff put it into the general class (employers of labor) who would necessarily be affected by the enforcement of the regulations of the unions. Their object was to secure higher wages, shorter hours, and more favorable conditions generally than employers of labor might be willing to concede, and just so far as they might be successful in accomplishing this object it may be assumed that employers, as a class, the plaintiff included, would incur a corresponding loss. But assuming all this, would that constitute the combination a conspiracy? A conspiracy is a combination of two or more persons to accomplish by concerted action a criminal or unlawful purpose, or a lawful purpose by criminal or unlawful means, and, to support the conclusion that these defendants were guilty of a conspiracy, it must be held that their purpose was at least unlawful if not criminal, or their purpose being lawful that they proposed to attain it by the employment of some unlawful means.

Limiting our consideration for the present to this question of conspiracy, it is clear that the avowed object of these organizationsthe several unions of workingmen and the council in which they were combined-was in no sense unlawful, and the discussion may be confined to the question whether the means proposed for its attainment were unlawful, a question as to which there is a wide divergence of view disclosed by the decisions of the courts of different jurisdictions, and often by the differing opinions of judges of the same court. There is, however, at the present day a tolerably uniform consensus of judicial opinion as to some fundamental principles which form the basis of discussion in all that class of cases, which, for convenience, may be designated as boycotting cases. In one of the more recent of these (National Protective Association v. Cumming, $170 \mathrm{~N} . \mathrm{Y} .315$, 63 N. E. 369, 58 L. R. A. 135, 88 Am. St. Rep. 648 [Bulletin No. 42 , p. 1118]) the seven justices of the court of appeals were divided, four to three, as to the lawfulness of the avowed object of the defendants, and as to the means employed by them against the plaintiff. Chief Justice Parker-three of his associates concurring-held both object and means to have been lawful, while Justice Vann, with the concurrence of the other two justices, condemned the means employed by the defendants to accomplish their purpose, not because the acts of defendants were otherwise unlawful, but because they were rendered unlawful by the selfish and censurable motive which inspired them. "The object of the defendants," he concluded, "was not to get higher wages, shorter hours, or better terms for themselves, but to prevent others from following their lawful calling." This conclusion was based upon evidence which showed clearly enough what appears as clearly in this case-that the immediate object of the defendants was to exclude the competition of men outside of their unions. This purpose Judge Vann considered so selfish, and its accomplishment so opposed to public policy and common right as to infect acts otherwise entirely lawful with the taint of illegality. The opposing opinion of
the Chief Justice-the majority opinion-seems to be rested partly upon the ground that, in order to secure employment on more favorable terms for themselves, individuals have an absolute right to combine for the purpose of preventing the employment and competition of others, and partly upon the further and independent ground that, whether such right is absolute or not, every man is clearly privileged to stop work with or without reason whenever he can do so without violating his contract, and that no one can question his motive, since a bad motive does not convert an act otherwise lawful into a ground of action. This last proposition embodies the rule of decision which was approved by this court in the case of Boyson $v$. Thorn, 98 Cal. 578,33 Pac. 492, 21 L. R.A. 233, and which has recently been reaffirmed in the much discussed case of the People $v$. Schmitz, 94 Pac. 419, 15 L. R. A. (N. S.) 717.

As to what are lawful acts in furtherance of such objects as were proposed by the defendants in this case, the consensus of recent judicial opinion above referred to can not be better illustrated than by quoting the propositions upon which the majority and the minority of the New York court of appeals, despite their opposite conclusions in National Protective Association v. Cumming, were entirely agreed. Chief Justice Parker at the outset of his opinion ( 170 N. Y. 320, 63 N. E. 369,58 L. R. A. 135,88 Am. St. Rep. 648) says: "I shall assume that certain principles of law laid down by Judge Vann are correct, namely: 'It is not the duty of one man to work for another unless he has agreed to, and if he has so agreed, but for no fixed period, either may end the contract whenever he chooses. The one may work or refuse to work at will, and the other may hire or discharge at will. The terms of employment are subject to mutual agreement, without let or hindrance from anyone. If the terms do not suit, or the employer does not please, the right to quit is absolute, and no one may demand a reason therefor. Whatever one man may do alone, he may do in combination with others, provided they have no unlawful object in view. Mere numbers do not ordinarily affect the quality of the act. Workingmen have the right to organize for the purpose of securing higher wages, shorter hours of labor, or improving their relations with their employers. They have the right to strike; that is, to cease working in a body by prearrangement until a grievance is redressed, provided the object is not to gratify malice or inflict injury upon others, but to secure better terms of employment for themselves. A peaceable and ordinary strike, not to harm others, but to improve their own condition, is not in violation of law.'" This is a most conservative statement of the law. It embraces nothing that is not conceded at this day by even the most determined opponents of the principle of the strike, and contains in the concluding sentence a qualification which the rule of Boyson $v$. Thorn would compel us to disregard. In case of a peaceable and ordinary strike without breach of contract, and conducted without violence, threats, or intimidation, this court would not inquire into the motives of the strikers. Their acts being entirely lawful, their motives would be held immaterial. But, taking the doctrine as stated by Justice Vann with all its qualifications, it suffices for the decision of everything of real importance in the present controversy, so far as the council and its constituent unions are concerned. The rule that their members could not work with nonunion men, or handle material supplied by
an employer of nonunion men, was adopted before any difference had arisen between them and the plaintiff or its manager. It was a rule which they supposed would benefit them, and that was its sole purpose. Whatever others may think of the policy or justice of such a rule that is a matter outside the province of the courts, and as with regard to other questions of economic or political aspect, the remedy, if a remedy is needed, must be found by the legislature. In the meantime, and for present purposes, we must recognize the fact that this rule, as established by the council and the affiliated unions, was devised for the promotion of an object certainly not unlawful, that the occasion that called for its application was the voluntary act of plaintiff's agent, and that with two or three possible exceptions to be hereafter noticed the defendants did nothing unlawful in their attempt to make it effective.

Certainly it was not unlawful to call out the union men, and it was not unlawful for the men to cease work which they were bound by no contract to continue. It was no doubt a technical trespass for the business agent of the council to enter the premises of plaintiff for the purpose of calling the men out for which the plaintiff might have recovered nominal damages in an action at law, but, it was no ground for an injunction in the absence of any evidence of a threatened repetition of the act. Was it unlawful to send the written notice to the contractors employing union labor that the plaintiff had been declared unfair, and that union men could not work for it or handle material supplied by it till further notice? There are authorities on both sides of this question, but I think those which would answer it in the negative have the better reason. The contractors were working in harmony with the unions (as indeed the plaintiff had previously done), and fair dealing required that the council, representing and acting for the unions, should protect such contractors from any loss they might incur if left in ignorance of the action it had taken. If they had not sent the notices some of those contractors who felt constrained to stop dealing with plaintiff when informed that it had been declared unfair might have purchased material which they could not have used, and it is only upon the assumption that such purchases would have been made that the plaintiff can base a claim that it was damaged by the notices. But can plaintiff make such a claim as a ground for equitable relief? It seems very clear that it can not; for, with full knowledge that it had been declared unfair and of all the consequences flowing from that declaration, it would not have been justified in selling material to a contractor employing union men without disclosing a fact so material to his freedom of contract. And, if good faith and fair dealing imposed an equal obligation upon the plaintiff and the council to inform the contractors of what the plaintiff knew, it is difficult to see what right of plaintiff was infringed by the sending of the notices. Their only effect was to enable the contractors and plaintiff to conduct their future dealings on equal terms. Nor was there anything unlawful in the presentation to the plaintiff of an agreement embodying the conditions upon which union men would consent to reenter its service and handle the output of its mill and shops. Conceding that the conditions of the proposed contract were intolerable, the right to propose them stood upon the same plane as the right to reject them, and no right of the plaintiff was infringed unless it can be held
that men who are free to work or not to work, with or without reason, are breaking the law in proposing unreasonable terms as a condition of entering the employment of another. If this were so, why would it not equally follow that an employer would be breaking the law by proposing to men seeking employment conditions of service which they might consider intolerable, or a court deem unreasonable? Neither proposition can be admitted. The fact that the business agent of the council in the course of the dispute over the Waterman affair told Mr. Parkinson that they would drive him out of business if he refused to observe their rules is material only in so far as it is an item of evidence tending to show that the course pursued by the council was dictated by a malicious purpose to injure the plaintiff, and not by a desire to benefit its members. I think myself, as I have in substance said, that it has very slight probative force for that purpose, and that it is completely refuted by all the facts of the case. But, conceding that it might have warranted the superior court in concluding that the motives of defendants were tinctured with malice, it can not be denied that all the acts of the council and its affiliated unions were lawful, and that they were adapted to the promotion of the plans devised by them for bettering the condition of the members. Being so adapted, and being lawful in themselves, they could not be rendered actionable by the mere fact that some feeling of animosity had been engendered in the course of the controversy between the parties.

One other consequence of the strike and the notice to the contractors remains to be considered. Some of the contractors to whom the notices were sent countermanded orders for building material which they had already placed with the plaintiff. This it may be conceded was a breach of their contracts, and the law is pretty thoroughly settled both in England and in this country that causing another to violate his contract with a third party, without a legal justification, is an actionable injury, from which it follows that if the defendants by sending the notices to the contractors caused some of them to break their contracts, and did so maliciously and without justification, they made themselves liable at least to an action for damages. But I do not think it can be said that the sending of the notices was without justification. The plaintiff had been declared unfair, and it was certain that, until that action of the council should be reversed, no member of any of the unions-so long as he remained a member-would handle material supplied by the plaintiff. The contractors to whom the notices were sent were all employing union men, and it was no less the duty of the plaintiff than of the council to inform them, with a view to future transactions, that they could not use material supplied by the Parkinson Company without engaging nonunion men in place of the men they had. If this is so-if the notice to the contractors was proper and essential to fair dealing, as between them and the plaintif-the fact that some of them violated their existing contracts can not be deemed a wrong caused by the defendants. It was a wrong for which the contractors alone were responsible. But, even if it could be held that the action of the council in sending the notices was without justification and malicious, something would still be wanting to sustain the injunction. The notices had all been sent before this action was commenced, and there was no evidence of any threat to send notice to any other per-
son. An injunction lies only to prevent threatened injury, and has no application to wrongs which have been completed, and for which the injured party may obtain redress by an action at law. This proposition involves a consideration of the sufficiency of the evidence to support the fifth finding of the trial court: "That said defendants threatened to continue to coerce and intimidate plaintiff and its patrons and customers to the irreparable damage and injury of plaintiff." Being challenged to point out the evidence to support this finding, counsel for respondent cites us to the testimony of only one witness (Harrison, an officer of the council), the entire substance of which is a mere restatement of the rule forbidding union men to work for a person declared unfair, or to handle his material. The finding, therefore, so far as it is sustained by the evidence, means no more than this: There is a standing warning that union men will not work for plaintiff while it remains on the unfair list, or handle its material. This is the whole extent of the coercion and intimidation threatened, and against such a threat an injunction would be utterly impotent. To enjoin men from not working would be wholly ineffective unless there resides in the courts a power to compel them to go to work. But there is no such power. A court of equity can not even enforce specifically a contract for personal services, and much less can it enforce the performance of such services in the absence of any contract.

I have not overlooked the fact that there was evidence that two or three individual members of the unions used threatening language in one or two instances towards other members who spoke of returning to work, and there may have been reason to conclude that they would continue to employ threats of the same character to deter others from seeking employment with the plaintiff. If so, the court would have been justified in enjoining those individuals, but there was nothing to justify an injunction against the council or the unions, or their officers, or the large number of individual members who made no threats.

Any injury to a lawful business, whether the result of a conspiracy or not, is prima facie actionable, but may be defended upon the ground that it was merely the result of a lawful effort of the defendants to promote their own welfare. To defeat this plea of justification the plaintiff may offer evidence that the acts of the defendants were inspired by express malice, and were done for the purpose of injuring plaintiff, and not to benefit themselves. The principle is the same which permits proof of express malice to defeat the plea of privilege in libel, or the defense of probable cause in actions for malicious prosecution or false imprisonment. In this case there was overwhelming proof that the council, when the occasion arose, simply put in force a rule long before adopted for their own benefit, and not directed against the plaintiff or any particular person. Nor did the council, the unions, or their members generally use any unlawful means to injure the plaintiff, unless it was unlawful to send the notices. I have expressed the opinion that so far from being unlawful the sending of the notices was only the fulfillment of a duty under the circumstances, but whether so or not, since the contractors doing business in Palo Alto and employing union men had all received the notices before the action was commenced, and there was no threat to send notices to any other persons, there was nothing to enjoin.

As to the sending of notices that a firm or corporation has been declared "unfair," the authorities are by no means uniform that such notices are unlawful. In the case of Gray $v$. Building Trades Council, 91 Minn. 171, 97 N. W. 663, 63 L. R. A. 753 [Bulletin No. 53, p. 955] (a Minnesota case cited by respondent), the supreme court modified an injunction by striking out that part which restrained the giving of unfair notices, and this for reasons equally applicable to the present case.

There is nothing in our decision in Goldberg $v$. Stablemen's Union, 149 Cal. 429, 86 Pac. 806, 8 L. R. A. (N. S.) 460 [Bulletin No. 68, p. 181], at all inconsistent with the views herein expressed. By their demurrer to the complaint the defendants in that case admitted the truth of all that was charged, and the injunction as modified restrained only acts of violence and intimidation.

For the reasons above stated, the judgment of the superior court is reversed.

One judge concurred in full. As already stated other opinions were written, concurring in the judgment but not approving the argument in its entirety. Thus Judge Sloss said in part:

The real question in the case turns upon the activities of the defendants exerted in two ways: First, in ceasing to work for the plaintiff (striking); second, in notifying (or threatening, if that term be preferred) the customers of plaintiff that workmen affiliated with the Building Trades Council would not work for contractors using materials purchased of plaintiff. That workmen employed by the Parkinson Company had a right to leave its employ whenever they desired, and for any reason that might seem to them sufficient, is universally conceded. Was it unlawful to notify contractors dealing with the Parkinson Company that union men would not continue to work for them if they purchased material of said Parkinson Company? In this inquiry I think it is unimportant that the defendants were merely acting in accordance with a rule adopted before any difference with the plaintiff had arisen. The opinion of the Chief Justice appears to proceed upon the theory that, since the defendants had bound themselves to act in a certain way in the event of a controversy of this kind, it was not only proper, but laudable, for them to notify contractors of their intended action and of the consequences which would follow to contractors who should continue to deal with the plaintiff. More than this, that it was in some way incumbent upon plaintiff to notify contractors dealing with him that a continuance of their patronage would be likely to result in loss to them. I can not agree to the proposition that the rights of the parties are in any way affected by such considerations. If the defendants' course of conduct amounted to an unlawful interference with plaintiff's rights, it was not made lawful by the fact that the defendants had decided, in advance, to act in this way whenever an occasion should present itself.

But was their action unlawful? They had a right, as has been said, to cease working for Parkinson. They had an equal right to cease working for any other employer. Upon what ground, then, is it claimed that, while their refusal to work for plaintiff gave plaintiff no cause of complaint, the refusal to work for others did give plaintiff a ground of action? Because, it is said, they are bringing to bear
upon the Parkinson Company, with which they have a controversy, the pressure of loss inflicted by third persons, not connected with the main dispute, and are, by holding over these third persons the risk of financial loss, compelling them against their will to inflict upon Parkinson the damage resulting from a cessation of their patronage. This is the argument commonly advanced to establish the illegality of what has been called, in much of the recent discussion of the subject, a "secondary" rather than a "primary" boycott. I do not see that we are helped to a solution of the question of the illegality, of the defendants' acts by looking into the "motive" or "intent" with which they acted. Even if we assume, contrary to the decisions of this court, that an improper motive may, as a general proposition, render actionable an act otherwise lawful, or, to use another form of statement, that damage intentionally inflicted will be actionable unless its infliction can be justified by showing that it was inspired by a proper motive, the motive with which these defendants acted was not, in my opinion, one which the law regards as improper. The defendants were seeking in all they are shown to have done to secure employment by the plaintiff for themselves, to the exclusion of those not associated with them, and to secure that employment upon terms deemed satisfactory or advantageous to them. That is the effort of every dealer in goods. It is the struggle of competition, and is no more to be frowned upon where the subject of trade is labor than where it is a specific commodity. The uniting or combining of a number of persons to accomplish a lawful object by lawful means will not per se render the conduct of the many any more unlawful than would be the same conduct on the part of any one of them. "It is plain," as is said by Mr. Justice Holmes in his dissenting opinion in Vegelahn $v$. Guntner, 167 Mass. 92, 108, 44 N. E. 1077, 1081 , 35 L. R. A. 722 , "from the slightest consideration of practical affairs, or the most superficial reading of industrial history, that free competition means combination, and that the organization of the world, now going on so fast, means an ever increasing might and scope of combination. * * * One of the eternal conflicts out of which life is made up is that between the effort of every man to get the most he can for his services, and that of society, disguised under the name of capital, to get his services for the least possible return. Combination upon the one side is patent and powerful. Combination on the other is the necessary and desirable counterpart, if the battle is to be carried on in a fair and equal way."

The injunction then, must rest upon the principle that it is unlawful, in an effort to compel A. to yield a legitimate benefit to B., for B. to demand that C. withdraw his patronage from A. under the penalty of losing B.'s services or patronage to which he has no contract right. That there are many cases sustaining the affirmative of this proposition is true. [Cases cited.] So are there many to the contrary. [Cases cited.]

Upon a consideration of the authorities, I think the sounder rule is that one who is under no contract relation to another may freely and without question withdraw from business relations with that other. This includes the right to cease to deal, not only with one person but with others; not only with the individual who may be pursuing a course deemed detrimental to another who opposes it, but with all who by their patronage aid in the maintenance of the objectionable
policies. In other words, if the defendants violated no right of the Parkinson Company by refusing to work for it, they violated none by refusing to work for contractors who used material bought of Parkinson. Such refusal, as is shown in the opinion of the Chief Justice, and as is stated in the testimony of plaintiff's manager and principal witness, was the "sum total of the interference", which was practiced or threatened. An agreement by shipowners, in order to secure a carrying trade exclusively for themselves, that agents of members. should be prohibited upon pain of dismissal from acting in the interest of competing shipowners; a combination of retailers binding the members to refuse to purchase of wholesalers who should sell to nonmembers of the combination; an agreement of contractors to withdraw their patronage from wholesalers selling to a contractor who had conceded the demands of his employees for an eight-hour day; a threat by a railroad company to discharge any employee who should deal with the plaintiff; a threat by an employer that he would discharge any laborer who rented plaintiff's house-have been held to give no right of action to the individuals affected. The defendants in each case were held to be acting within their absolute legal right in entering or refusing to enter into business relations with persons to whom they were not bound by contract. I see no reason why workmen have not the same absolute right to dispose of their labor as they see fit. So long as they abstain from breach of contract, violence, duress, menace, fraud, misrepresentation, or other unlawful means, they may lawfully inflict such damage as results from the withholding of their labor or patronage. To quote again from Judge Holmes' opinion in Vegelahn $v$. Guntner: "If it be true that workingmen may combine with a view, among other things, to getting as much as they can for their labor, just as capital may combine with a view to getting the greatest possible return, it must be true that, when combined, they have the same liberty that combined capital has to support their interests by argument, persuasion, and the bestowal or refusal of those advantages which they otherwise lawfully control." The terms "intimidation" and "coercion," so frequently used in the discussion of this question, seem to me to have no application to such acts as were here committed. One can not be said to be "intimidated" or "coerced" 'in the sense of unlawful compulsion by being induced to forego business relations with A., rather than lose the benefit of more profitable relations with B. It is equally beside the question to speak of "threats" where that which is threatened is only what the party has a legal right to do. It may be that the combination of great numbers of men, as of great amounts of capital, has placed in the hands of a few persons an immense power, and one which, in the interest of the general welfare, ought to belimited and controlled. But if there be, in such combinations, evils which should be redressed, the remedy is to be sought, as to some extent it has been sought, by legislation. If the conditions require new laws, those laws should be made by the lawmaking power, not by the courts.

The dissenting opinion of Judge Shaw accepted the position that motive can not be questioned and that the means by which interference is accomplished is the test of lawfulness or unlawfulness. Assuming that the use of duress, menace, fraud, or undue influence in
79828-Bull. 81—09-17
bringing about an injurious act was unlawful, Judge Shaw based his dissent on the ground that the influence of associated persons was so increased by the fact of association as to make acts which would n$\varnothing t$ be annoyance or coercion if committed by one, objectionable where committed or supported by numbers. He said in part:

The evidence showed that at least seven of the plaintiff's important customers quit dealing with the plaintiff; that substantial damage had already been caused to the plaintiff by this loss of custom during the time it had continued, and that its further continuance would cause plaintiff further substantial loss; that these customers were, by the aforesaid threats of defendants, coerced and compelled, against their wish and will, to cease dealing with plaintiff or using goods obtained from plaintiff; and that the defendants intended and threatened to continue this boycott indefinitely. The claim of the defendants appears to be that these notices were intended for the benefit of the several persons to whom they were sent to warn them of the consequences that might attend their patronizing the plaintiff, so that they could avoid doing so, and thereby escape the evil results that would otherwise come to them, and that the sending of notices for such a purpose is not only lawful and innocent, but praiseworthy as well; that these consequences would not come as the result of any act done with reference to the parties warned, but as the result of conditions that existed under the union rules established long before any difficulty with plaintiff arose. These rules seem to be regarded as of similar force to the law of the land and a notice not to disregard them as a friendly act similar to a notice to a friend not to violate the law. I concede, of course, that, where a strike has been determined upon, the mere sending of a notice of the fact is not unlawful, or blameworthy, and can not be made the foundation of an action. Perhaps the sending of these notices under some circumstances might have been considered as an act of this character. But under the circumstances disclosed in this case, and in view of the findings of the court which show that the acts of the defendants were intended to coerce plaintiff's patrons to cease dealing with plaintiff in order to injure plaintiff in its property rights, the conduct of the defendants must be considered as malicious and unlawful. The defendants had the right, by lawful means to persuade or induce others to cease dealing with plaintiff, although their purpose in so doing was to injure the plaintiff in its business and constrain plaintiff to yield to their demands in regard to the conduct of plaintiff's business. It is only when they seek to accomplish such injury by the use of means which the law deems unlawful that their action to that end becomes unlawful and the resulting injury an actionable wrong. The entire case depends on the question whether or not the means by which the defendants induced the plaintiff's customers to cease dealing with it were unlawful.

It is of no importance that the rules were adopted without special reference to the plaintiff. They were adopted for the express purpose of being put in force against any person when the occasion should arise which made it desirable that the conduct of such person should be influenced or controlled. The effect in contemplation of law is the same as if they had been made expressly for the occasion for which
they were used. Nor is the case of plaintiff defeated by the fact that the only act done by the defendants at the time of the boycott was the sending of notices that the plaintiff had been declared unfair without threat of any sort accompanying it. It is in evidence that all the persons thus notified knew of the purport and effect of the union rules which would be applied in such a case. The defendants had created this engine of oppression for use at any time they desired, and had prepared the signal upon which it was to become active. The parties notified were aware of all this, and the defendants also knew that these parties had this knowledge. Further words were unnecessary. The threat would not have been more complete if the notice had expressly stated that all business with Parkinson Company must stop under penalty of a strike of their union workmen. The defendants had arranged this condition of affairs. They can not escape its effects on the ground that they were simply giving information of action which would inevitably take place and were doing it for the benefit of the contractors so that they might act as requested, and thus avoid the damages otherwise ensuing. If the action of which this notice was given had been that of third persons for whom defendants were in nowise responsible, or with whom they were not in collusion, such a claim might stand. But the action of which they were so kindly notifying the contractors was their own action long before resolved upon. If they had no right to act in this manner for this purpose, the fact that it was previously arranged or decided upon for this or any similar occasion, was immaterial.

It is further argued that the only thing with which the customers were threatened was a strike of these customers' employees; that this threat was made by the men themselves, through their agents authorized to act for them; and that they had a lawful right to strike at any time and for any cause or no cause, and hence that their conduct was not unlawful. The principle settled by the cases cited, however, is that, while men have a right to strike, they have no right by that means to coerce their employers so as to compel them to act to the injury of a third person. The fact that they were to strike in such numbers gave them a power over the threatened customers of plaintiff, which constituted undue influence over them, or coercion or intimidation, as most of the authorities usually express it, and this coercion, exercised for the purpose of injuring a third person, is an unlawful act, and makes the resulting injury an unlawful injury, which may be enjoined if only threatened, and which, if committed, may be redressed by an action for damages. It is the control of another's conduct against his will that is the unlawful element in the proposition. This being unlawful, the resulting injury to a third person is unlawful, although every other act in the transaction is lawful in itself. So far as this unlawful element is concerned, it is immaterial whether that control is obtained by fear produced by the immediate prospect of serious pecuniary loss, as the result of a threatened strike, or by fear produced by a threat of bodily injury.

# LAWS OF VARIOUS STATES RELATING TO LABOR, ENACTED SINCE JANUARY 1, 1908. 

#### Abstract

[The Twenty-second Annual Report of this Bureau.contains all laws of the various States and Territories and of the United States relating to labor, in force January 1, 1908. Later enactments are reproduced in successive issues of the Bulletin beginning with Bulletin No. 80, the issue of January, 1909. A cumulative index of these later enactments is to be found on page 471 et seq. of this issue.]

## LOUISIANA.

## ACTS OF 1908.

## Act No. 31.-Interest to be paid on employees' deposits.

Section 1. All corporations, firms and individuals doing business in this State requiring of its or their employees a cash deposit as a guarantee for the faithful performance of the duties imposed upon such employees, shall pay to such employee in cash interest at the rate of not less than four per cent per annum on the cash sum so deposited.
Approved June 20, 1908.

> Act No. 73.-Inspection of factories, etc.-Doors to open outwardly.

Section 1. All the doors for ingress and egress to * * * factories with more than twenty employees * * ${ }^{*}$ shall be so swung as to open outwardly from the **** workshops; but such doors may be hung on double-jointed hinges, so as to open with equal ease outwardly or inwardly.
Sec. 2. The provisions of this act shall apply to all buildings and houses within its terms, erected after its passage, from the date it becomes in force. As to all such buildings and houses heretofore erected, said provisions shall be applied from and after the expiration of six months from the date when this act became operative.
Sec. 3. ${ }^{*}{ }^{*}{ }^{*}$ The owner of any ${ }^{*}{ }^{*} *$ factory, failing to comply with the provisions of this act or to have same complied with as relates **** to such building or buildings owned by them, shall be guilty of a misdemeanor and upon conviction shall be fined not less than ten dollars nor more than one hundred dollars, and upon failure to pay such fine and costs shall be imprisoned in the parish jail for a period not exceeding (90) ninety days.
Sec. 4. Provided, That this act shall not apply to factories, cotton seed oil mills and other like establishments where the doors for the purpose of protection against fire, are so arranged as to slide back and forth on rollers.

Approved June 30, 1908.

## Act 155.-Bureau of labor and industrial statistics.

Section 1. The governor, shall, by and with the advice and consent of the senate, appoint some suitable person who shall be designated "Commissioner of Labor and Industrial Statistics'" with headquarters in such place as the governor shall designate, and who shall hold his office for a term of four (4) years.

SEc. 2. The duties of such commissioner shall be to collect, assort, systematize and present in annual reports to the governor, and to be by him biennially transmitted to the legislature within ten days after the convening thereof every two years, statistical details, relating to all departments of labor in the State, especially in its relations to the commercial, industrial, social, educational and sanitary condition of the laboring people; and to the permanent prosperity of the productive industries of the State, and also inquire into the immediate causes of strikes, lockouts or other disturbances of the relations between employers and employees.

SEC. 3. The commissioner shall have power to take and preserve evidence, examine witnesses under oath, and administer the same, and in the discharge of his duties, may enter any public institution of the State, and at reasonable hours when open
for business, any factory, mill, workshop, store or other places where labor may be employed. He shall have power to appoint such deputies as he may deem necessary and all inspectors [inspections], authorized by law, of factories, mills, workshop, store or other places where labor is employed shall be made by said commissioner or his deputies. It shall be the duty of the commissioner and his deputies to enforce all laws regulating or dealing with the employment of labor of any kind, and to prosecute all persons, firms or corporations violating the same. In the city of New Orleans, the mayor, with consent of the council shall appoint a factory inspector who may be either male or female.

SEC. 4. All State, parochial, municipal and town officers, are hereby directed to furnish to said commissioner, upon his request, all statistical information in reference to labor and industries, which may be in their possession as such officers.
SEc. 5. Any person who shall willfully impede or prevent the commissioner or his deputies in the full or free performance of his or their duties, shall be deemed guilty bf a misdemeanor and upon conviction of the same shall be fined not less than five (5) dollars nor more than twenty-five(25) dollars or be imprisoned not less than five(5) days nor more than twenty-five (25) days in the parish jail, or both at the discretion of the court.

Sec. 6. The commissioner shall receive a salary of fifteen hundred ( $\$ 1500.00$ ) dollars per annum, he shall employ a secretary at a salary of one thousand ( $\$ 1000$ ) dollars per annum and shall be allowed the sum of one thousand (\$1000) dollars per annum for all necessary expenses attendant upon the duties of his office, all of which amounts shall be payable monthly out of the general fund, upon the warrant of the said commissioner.

Sec. 9. Nothing in this act shall be construed as relating to sugar industries or sugar mills outside of any city or town in this State.

Approved July 2, 1908.
Аст No. 178.-Examination, etc., of electricians.
Section 1. The governor shall within, thirty (30) days after the passage of this act, appoint in each city therein of more than fifty thousand ( 50,000 ) inhabitants, a board which shall be known as the Board of Electrical Examiners and Supervisors, consisting of five qualified electors for the purpose of examining into the qualifications and capabilities of master electricians, as defined by section 5 of this act.

The members of the boards so appointed shall be competent practical electricians, and shall be selected as follows: One (1) from nomination made by the oldest established electrical contractors' association of each city, one (1) from nomination made by the commissioner of police and public buildings, one (1) from nomination made by the fire marshal, and one (1) from nomination made by local "International Brotherhood Electrical Workers," inside wiremen, and these four shall select a fifth member from among the local established electrical engineers. A majority of said board shall constitute a quorum to transact the business thereof. Unless removed for cause, the term of office of the members of the first number so appointed shall be as follows: The nominee from the fire marshal one (1) year; nominee from the electrical contractors' association, two (2) years; the nominee of the commissioner of police and public buildings, one (1) year; nominee from the local I. B. E. W., inside wiremen, two (2) years, the fifth member selected shall serve one year. Should any vacancy occur from any cause, during the term of any board as herein provided, the governor shall appoint some one from nominations made as above provided to fill such vacancy, and this in such manner that the various boards shall continue to be constituted as herein provided. The governor shall have full power to remove any member of the board for incompetency or improper conduct upon satisfactory evidence being presented to him of such condition.

Sec. 2. The members of said board shall respectively take and subscribe the oath required of state officers. They shall have the power to elect out of their number, a president, a secretary and a treasurer; to adopt such rules and by-laws for the transaction of the business of the board as they may deem expedient.

Sec. 3. Each member of said board shall receive a compensation of five dollars ( $\$ 5.00$ ) per day for actual service in attending meetings of the board, which compensation shall be paid out of any moneys in the hands of the treasurer of said board: Provided, That the secretary of said board may receive such additional compensation as the board may deem just and reasonable and for which the by-laws of the said board may provide. In no event however shall the compensation of the members of the said boards or of their secretaries be paid out of the funds in the state treasury or become a charge against the State.

Sec. 4. Said boards shall meet at least once each month in their respective domiciles, and shall hold special meetings as frequently as the proper and efficient discharge of their business shall require, and each board shall adopt rules and regulations for the examination of master electricians as herein defined and when so adopted, such rules and regulations shall have the same force and effect as if herein contained; and the rules of said board shall also provide for the giving of timely notice of such meetings to all those who shall have made application for a license as herein provided and said board shall give in writing to the commissioner of police and public buildings a detailed statement of all licenses issued, renewed, or revoked at any meeting of said board. A majority of its members shall organize each of such boards and constitute a quorum for the transaction of its business.
SEC. 5. The term "master electrician" as used in this act shall be so defined as to include any and all persons, firms and corporations engaged in the business of or holding themselves out to the public as engaged in the business of installing, erecting or repairing, or contracting to install, erect or repair electric wires or conductors to be used for the transmission of electric current for electric light, heat or power purposes, or mouldings, ducts, raceways or conduits, together with fittings for same for the reception or protection of such wires and conductors, or to electrically connect electric wires or conductors together, or to any electrical machinery apparatus device fittings or fixtures to be used for electric light, heat or power purposes.
A license of "master electrician" issued or granted under and in accordance with the provisions of this act, shall entitle any such person, firm or corporation so licensed to engage in the business of installing, erecting and repairing, and of contracting to install, erect and repair any electric wires or conductors to be used for the transmission of electric current for electric light, heat or power purposes and any mouldings, ducts, raceways and conduits, together with fittings for same to be used for the reception and protection of such wires and conductors together and to any apparatus, devices, fittings or fixtures to be used for electric light, heat or power purposes.
Sec. 6 . Before any person[,] firm or corporation shall hereafter engage in the business of a master electrician as defined in section five (5) of this act, and before any person, firm or corporation now so engaged in said business or any branch or class thereof, shall continue in said business of "master electrician," such person firm or corporation shall apply to said board for a license to practice as "master electrician," and the applicant, if a person, or if a corporation, one of the officers or a representative and agent thereof, to be designated by said corporations; or if a firm, one of the members thereof thall present himself before the said board at a time and place fixed by the said board. If the board shall find upon due examination, that the applicant presenting himself is of good moral character has a satisfactory knowledge of electricity and the natural laws appertaining to and governing the same and of the use and functions of electric wires, appliances and devices for electric light, heat and power purposes and is possessed of skill and knowledge in all matters pertaining to the business of a "master electrician" as defined in section five (5) of this act the said board, upon payment of the fee and upon giving the bond hereinafter provided for, shall issue to the said person, firm or corporation a license as "master electrician" to practice said business for a term of one (1) year, and shall register such person, firm or corporation as duly licensed "master electrician."
Provided, That no license shall be granted to any person under the age of twenty-one (21) years, nor shall any license be granted to any person who has not taken and subscribed an oath that he, or in case of a corporation, one of the principal officens or the representative and agent thereof and, in the case of a firm, one of the members thereof, has had at least three (3) years actual experience as a "master electrician" within the terms of this act or as an electrical workman, in such class or classes of electrical business or work as, in the opinion of the board shall have properly fitted the applicant for a license as "master electrician."
Provided further, That each applicant at the time of filing his, their or its application, shall pay to the secretary of said state board of electrical examiners, the sum of twentyfive dollars ( $\$ 25.00$ ): And provided moreover, That every person, firm or corporation before receiving a license shall make, execute and deliver a bond to the State of Louisiana in the full sum of twenty-five hundred dollars ( $\$ 2,500.00$ ) with sufficient surety or sureties to be approved and filed with the state board of electrical examiners the bond to save harmless the owner or real party in interest in the property for which any such material is furnished, or service performed, against loss or damage which shall arise by reason of the work done or material furnished being in violation of and below the standard of the current edition of the national electric code; but action can be maintained thereon in the name of such owner or real party in interest only, if commenced within one (1) year from and after the date of the installation of the materials furnished or performance of such work or service.

When, however, the material furnished, or work done, or service performed, shall have been inspected, and a written or printed certificate of approval issued by a legally authorized underwriters' inspector, then the said master electrician shall be considered as having fulfiled the requirements of this act, and his responsibility shall cease under the above bond for materials furnished and work or service performed.

Sec. 7. All persons, firms or corporations, that at the time of the enactment of this act, are engaged in the business which shall be hereafter known as the business of a "master electrician," as described in section five (5) of this act, shall within sixty days after the passage of this act comply with all the provisions of section six (6) of this act, or such persons, firms or corporations shall within sixty (60) days cease to do the work which shall be hereafter known as that of a "master electrician" as described in section five (5) otherwise he, they or it shall be guilty of a misdemeanor and on conviction suffer the fines and penalties as set forth in section fourteen (14) of this act.

Sec. 8. Each and every license issued under the provisions of this act shall be signed by the president and secretary of the board and attested with its seal, and aaid license so signed and attested, for the period of one year, shall be evidence in any court in the State of the business for which the license is issued. All licenses and renewals of same shall expire on the first day of January of each year.

SEc. 9. No person, firm or corporation granted a license under the provisions of this act, shall continue in the business of installing or repairing electrical wires, conductors or apparatus for electric light, heat or power purposes, after the expiration of the said license, unless the said license or extension of same shall have been renewed as hereinafter provided.

Upon the payment of a fee of ten (\$10) dollars any person, firm or corporation granted a license under the provisions of this act (unless the said license shall have been revoked as hereinafter enacted), shall be granted a renewal of said license without examination of the applicant, if application therefor is made either in person or in writing to the said board by the holder of such license within the three months preceding the expiration of such license upon payment of a fee of ten dollars ( $\$ 10.00$ ) and the said renewal of said license shall be made for a period of one (1) year, and shall be signed and attested as required for such original license and any such renewal of such license so signed and attested shall have the same weight as evidence in any court of this State as is hereinbefore accorded said original license.

Provided, also, That further, one year renewals shall be granted in like manner upon expiration of any renewal of. license upon making application and paying a like fee within three months preceding the expiration of such renewal, in the same manner as provided for the first renewal.

Sec. 10. After a full hearing of all parties in interest said board shall have power to revoke for proper cause any license or renewal of same, granted by the said board.

Sxc. 11. Each and every license and renewal of same shall be in force and effect only so long, as an approved bond, filed with the said board in accordance with the provisions of section six (6) of this act shall remain in force and every such license or renewal of same shall become void by the termination of said bond regardless of the regular date of expiration of the said certificate, license or renewal.

Sec. 12. Any and all persons, firms or corporations granted a license or renewal thereof, in accordance with the provisions of this act shall display the same in a conspicuous place in the office or place of business of the person, firm or corporation to which it was issued.
SEc. 13. Nothing in this act shall be so construed as to prevent any person from doing or performing any of the kinds of work enumerated in section five (5) of this act when such work is performed under the direction and supervision of a duly licensed master electrician, but no work, other than minor electric repairs for the maintenance of established plants, bhall be performed excepting under such direction and supervision of a duly licensed master electrician, and the said licensed master electrician shall be responsible for any and all work so done under his direction and supervision. This shall be construed as exempting lighting companies and electric railway companies and the department of police and public buildings of the city of New Orleans from the provisions of this act in so far as the maintenance and installation of their equipment pole-line services and meters are concerned.

Sec. 14. Any person, firm or corporation or any member of such firm or corporation, who shall practice or engage, or continue in the work of a master electrician as defined in section five (5) of this act without having complied with all the provisions of this act, and any person not licensed as a master electrician who shall do or perform any such work except under the direction of a master electrician, or who shall violate any of the provisions of this act, shall be guilty of a misdemeanor and upon
conviction thereof, shall be sentenced to pay a fine of not less than twenty-five dollars ( $\$ 25.00$ ), nor more than five hundred dollars ( $\$ 500.00$ ), or to an imprisonment not exceeding ninety ( 90 ) days, or both, in the discretion of the court.

Stc. 15. No license, or renewal of same, granted or issued under the provisions of this act, shall be assignable, or transferrable, and every such license and renewal of same shall specify the name of the person, firm or corporation to whom it is issued, and in the case of a firm, the member of said firm, and in the case of a corporation, the principal officer or the designated representative of the said corporation through whom the application for the said license was made.

SEC. 16. All fees collected under the provisions of this act, shall be for the use of said board to defray its necessary expenses.

SEc. 17. It shall be the duty of the said board before the first Monday of January of each and every year, to make a report in writing to the governor of the State, containing a detailed statement of the nature of receipts and the manner of expenditure, and any balance of money remaining at the end of the year, after payment of expenses, including per diem of members of board and other necessary expenses, incurred by them in the discharge of their duties, shall be deposited in the state treasury.

Approved July 3, 1908.
Act No. 184.-Public printing to be done by a citizen of the State.
Section 1. * * * Such contract or contracts [for public printing] shall not be awarded to any but a citizen of this State; * * *

Approved July 6, 1908.
Aot No. 228.-Company stores-Redemption of orders.
Section 1. Any person, firm or corporation issuing checks, punchouts, tickets, tokens, or other device, redeemable either wholly or partially in goods or merchandise at their, or any other place of business, shall, on demand of any legal holder thereof, on the next pay day of such person, firm or corporation issuing same succeeding the date of issuance of same be liable for the full face value thereof, in current money of the United States.

Sec. 2. Any such checks punchouts, tickets, tokens, or other device, issued by any person, firm or corporation, shall be considered and treated as payable to bearer, on demand, in current money of the United States, notwithstanding any contrary stipulation or provision which may be therein contained.

Sec. 3. In case of failure of any person, firm or corporation to pay any legal holder of any such checks, punchouts, tickets, or other device, issued by them, the full face value thereof, in current money of the United States, when so demanded, such holder may immediately bring suit thereon in any court of competent jurisdiction, and, in addition to recovering the full face value thereof, with legal interest from demand, may recover ten per cent of said amount as attorney's fees recoverable in the same suit.

Approved July 8, 1908.

> Act No. 264.-Protection of employees on buildings.

SEction 1. For the safety of persons in and about the construction, repairing, alteration or removal of buildings, bridges, viaducts and other structures, all scaffolds, hoists, cranes, stays, ladders, supports or other mechanical contrivances erected or constructed by any person firm or corporation in this State for use in the erection, repairing, alteration, removing or painting of any house, building, bridge, viaduct, or other structure in cities of more than thirty thousand inhabitants, shall be erected and constructed, placed and operated so as to give proper and adequate protection to the life and limb of any person or persons employed or engaged thereon, or passing under or by the same, and in such manner as to prevent the falling of any material that may be used or deposited thereon.

SEc. 2. In the construction or repairing, alteration or removal of any structures, that scaffolding or staging, swung or suspended from any overhead support, more than twenty feet from the ground or floor shall have, where practicable, a safety rail properly bolted, secured and braced and rising at least thirty-four (34) inches above the floor or main portion of such scaffolding or staging and extending along the entire length outside and ends thereof, and properly attached thereto and such scaffolding or staging shall be so fastened as to prevent the same from swaying from the building or structure.

Sec. 3. In any house, building or structure in process of erection or construction, where the distance between the inclosing walls is more than twenty-four feet in the
clear, there shall be built, kept and maintained proper intermediate supports for the joists, which supports shall be either brick walls or iron or steel columns, beams, trusses or girders of wood, or other material of sufficient strength, and the floor in all such houses, buildings or structures in process of erection or construction shall be designed, and constructed in such a manner as to be capable of bearing in all their parts in addition to the weight of the floor construction, partitions and permanent fixtures and mechanisms that may be set upon the same, a live load of twenty-five (25) pounds for every square foot of surface in such floor, and it is hereby made the duty of every owner, builder, lessee, contractor or sub-contractor of such house, building or construction or the superintendent or agent of either to see that all the provisions of this section are complied with.

Sec. 4. It shall be the duty of every owner of every house, building or structure (except buildingsexclusively for residential purpose), now under construction orhereafter to be constructed, to affix and display conspicuously on each floor of such building during construction, a placard stating the load per square foot of the floor surface, which may with safety be applied to that particular floor during such construction, or if the strength of different parts of the floor varies, then there shall be such placards for each varying part of such floor.

It shall be unlawful to load any such floors or any part thereof to a greater extent than the load indicated on such placard and all such placards shall be verified and approved by the city engineer or inspector of buildings or other proper authority of the city charged with the enforcement of building laws.

SEc. 5. Whenever it shall come to the notice of the building inspector in any city in this State of more than thirty thousand inhabitants charged with the duty of enforcing the building laws, that the scaffolding, stays, hangers, blocks, pulleys, sling braces, ladders, irons, or ropes of any swinging or stationary scaffolding, platform or other similar device, used in the construction repairing alteration removing, cleaning or painting of buildings, bridges or viaducts within said cities are unsafe or liable to prove dangerous to the life or limb of any person, such local authorities shall immediately cause an inspection to be made of such scaffolding, platform or device or the slings, hangers, blocks, pulleys, stays, braces, ladders, iron or other parts connected therewith, and if after an examination, such scaffolding, platform or other device or any parts thereof is found to be dangerous to the life and limb of any person, the said local authorities shall at once notify the person, responsible for the maintenance of such fact and warn him against the use, maintenance of [or] operation thereof and prohibit the use thereof and require the same to be altered and reconstructed, so as to avoid such danger.

Such notice may be served personally upon the one responsible for its erection or by conspicuously affixing it to the scaffolding, platform or other device, or the part thereof declared to be unsafe, after such notice has been served or affixed the person responsible therefor shall cease using and immediately remove such scaffolding, platform or other device or part thereof or alter or strengthen it in such manner as to render it safe. The officer or such local authority whose duty it is to examine or test any scaffolding, platform or similar device or part thereof required to be erected and maintained, by this section, shall have free access at all times during, reasonable hours to any buildings or structures or premises containing such scaffolding, platform or other similar device or parts thereof or where they may be in use. All swinging or stationary scaffolding, platform or other similar devices shall be so constructed as to bear four times the maximum weight required to be dependent thereon or placed thereon when in use and such swinging scaffolding, platform or other similar devices shall not be so loaded or crowded as to render them unsafe or dangerous.

Sec. 6. Any person, firm, or corporation in this State, hiring, employing or directing another to perform labor of any kind in erecting, repairing, altering or painting any water pipe, stand pipe, smoke stack, chimney, tower, steeple, pole, staff, dome, or cupalo [cupola], with the use of any scaffold, staging, swing hammock, support, temporary platform, or other similar contrivance, for such labor, shall keep and maintain at all times while such labor is being performed and such mechanical device in use or operation a safe and proper scaffold, stay, support, or other suitable device, not less than sixteen feet below such working scaffold, staging, swaying hammock, support or temporary platform when such work is being performed at a height of thirty-two (32) feet or more, for the purpose of protecting the person or persons performing such labor from falling in case of any accident to such working scaffold, staging, swaying hammock support or temporary platform.

SEC. 7. All contractors and owners when constructing buildings where the plans and specifications require the floors to be arched between the beams thereof or where the floors or filling in between the floors are fireproof material or brick work shall complete the flooring or filling in as the building progresses to not less than within three tiers
or beams below and on which the iron work is being erected. If the plans and specifications of such building do not require the filling in between the beams of the floors with brick or fireproof material, said contractor or owner shall lay in the underflooring thereof or a safe temporary floor on each story as the building progresses to not less than within two stories of the floor below the one to which said building has been erected and where double floors are not to be used, such owners or contractors shall keep planks over the floor to two stories of the floor below the story where the work is being performed, and if the floor beams are not of iron or steel, the contractor for the iron or steel work in the course of construction or the owner of such building shall thoroughly plank over the entire tier of iron or steel beams on which the structural iron or steel work is being erected, except such spaces as may be reasonably required for the proper construction of such iron or steel work, and for the raising and lowering of material to be used in the construction of such building.

Sec. 8. If elevating machines or hoisting apparatus are used within a building in the course of construction for the purpose of lifting material, the contractor or owner shall cause the shafts or openings in each floor to be inclosed or fenced in on all sides by substantial barrier or railing at least four feet in height: Provided, Any hoisting machine or engine used in such building construction shall, where practicable, be set up or placed on the ground and where it is necessary to place such hoisting machines or engines on the same floor above the ground floor, such machines or engines must be properly and securely supported with a foundation capable of sustaining twice the weight of such machine or engine, and if the building in course of construction is five stories or more in height, no material needed for such construction, shall be hoisted or lifted over any public street or alley, unless, such street or alley shall be barricaded from use by the public or so covered as to prevent injury to pedestrians.

SEc. 9. If elevating machines or hoisting apparatus operated or controlled by other than hand power, be used in the construction, alteration or removal of any building or other structures, a complete adequate system of communication by means of signals shall be provided and maintained by the owner, contractor or subcontractor during the use and operation of such elevating machines or hoisting apparatus in order that prompt and perfect communication may be had at all times between the operator of the engine or motive power of such elevating machine and hoisting apparatus and the employees or persons engaged thereon or in using or operating the same, and the officers of any city charged with the enforcement of the building law are hereby charged with the enforcement of this provision of this act and in case of their failure so to do, the police authorities shall pursuant to the terms of this act enforce the provisions thereof.
SEc. 10. Any contractor, subcontractor, foreman or other person having charge of the erection, construction, repairing, alteration, removal or painting of any building, viaduct, bridge, or other construction within the provisions of this act violating any of the provisions hereof, upon conviction thereof shall be subject to a fine of not less than twenty-five dollars ( $\$ 25.00$ ) or more than five hundred dollars or imprisonment for not less than three months or more than two years or both fine and imprisonment in discretion of the court.
Approved July 9, 1908.
Act No. 271.-Public works-Citizens to be preferred in employment.
SEction 1. Every contractor, superintendent or duly authorized agent engaged in the construction of any state or public building or public works for the State of Louisiana, in cities whose population exceeds ten thousand ( 10,000 ) shall employ only mechanics who are citizens of the State and who have paid their poll tax for the current or next preceding year prior to engaging in the work.
SEc. 2. In the event mechanics, where such works or buildings are being constructed, are not available, then such contractor, superintendent or duly authorized agent, shall notify the mayor of the city wherein the work is being done, of such fact, and unless the mayor of said city shall forthwith supply such contractor, superintendent or duly authorized agent with the mechanics needed, said contractor, superintendent or duly authorized agent, shall be authorized to employ mechanics who are not citizens of the State of Louisiana, to make up the deficiency: Provided, That nothing herein shall be construed to prevent the State of Louisiana or any parochial or municipal corporation from placing or letting any contract for the erection or construction of any public building or public work, in the open market, and soliciting bids from persons or corporations without the State of Louisiana.
Sec. 3. Any contractor, superintendent or duly authorized agent violating any of the provisions of this act, shall be liable, after conviction before a court of competent jurisdiction, to a fine of not more than one hundred dollars (\$100.00) or imprisonment of not more than sixty (60) days, or both at the discretion of the court.
Approved July 9, 1908.

Act No. 297.-Railway companies-Cars, etc., to be repaired within the State.
Section 1. All railway or.railroad corporations operating in the State of Louisiana, and having their repair shops within the State, as a condition precedent to exercising the right of eminent domain under the laws of the State of Louisiana, the railway or railroad corporations so operating within the State of Louisiana, shall and are hereby required to repair, renovate or rebuild in the State of Louisiana any and all defective or broken cars, coaches, locomotives or other equipment, owned or leased by said corporations in the State of Louisiana, when such rolling stock is within the State of Louisiana: Provided, Such railway shall have or be under obligations to have proper facilities in the State to do such work: And provided, This act shall not be so construed as to require any railway company to violate the safety appliance law of Congress: And provided further, That no railway company shall be required to haul such disabled equipment a greater distance for repairs at a point in Louisiana than would be necessary to reach repair shops in another State.
SEc. 2. All railroad corporations operating in the State of Louisiana, and having their repair shops within the State, shall be prohibited from sending or removing any of their cars, coaches, locomotives or other equipment out of the State of Louisiana to be repaired, renovated or rebuilt, when the same is in a defective or broken condition and within the State.
Sec. 3. Any corporation, lessee, receiver, superintendent or agent; who shall violate any of the provisions of this act, shall after conviction by a court of competent jurisdiction, be liable to a fine of not less than fifty dollars, or more than two hundred dollars, or be imprisoned for not more than three monthe or both at the discretion of the court.

Approved July 9, 1908.

## Acr No. 301.-Inspection of factories, etc.-Employment of women and children.

Section 1. From and after the passage of this act it shall be unlawful for any person, agent, firm, company, copartnership, or corporation to require or permit or suffer or employ any child under the age of 14 years to labor or work in any mill, factory, mine, packing house, manufacturing establishment, workshop, laundry, millinery or dressmaking store or mercantile establishment in which more than five persons are employed, or in any theater, concert hall, or in or about any place of amusement where intoxicating liquors are made or sold, or in any bowling-alley, boot-blacking establishment, freight or passenger elevator, or in the transmission or distribution of messages, either telegraph or telephone, or any other messages, or merchandise, or in any other occupation not herein enumerated which may be deemed unhealthful or dangerous. The provisions of this section shall in no way be construed as applying to agricultural or domestic industries. Any violation of this provision shall be punishable by a fine of not less than $\$ 25$ or more than $\$ 50$ or by imprisonment in the parish jail (parish prison in New Orleans) for not less than ten days or more than six months, or both, in the discretion of the court.

Sec. 2. The state factory inspector or any factory inspector appointed by the mayor of the city of New Orleans with the consent of the council acting in conjunction with the board of health and school board in the parish shall have full power to issue an age certificate to minors over 14 years and under 16 years of age seeking employment in any part of this State: Provided, however, That no person authorized to issue an age certificate as hereafter provided shall have authority to approve such certificate for any child then in or about to enter his own establiahment, or the employment of a firm or corporation of which he is a member, officer or employee.

The person approving these age certificates shall have authority to administer the oath provided therein, but no fee shall be charged therefor. Every person issuing or approving these age certificates shall keep a record of the same, and shall forward to the office of the state factory inspector a duplicate of each certificate issued or approved. All such age certificates shall be subject to review by the state or other factory inspector, and may by him or her be canceled if he or she finds that such certificates have been obtained through fraud, misrepresentation or falsification of facts, and whoever shall obtain or assist in obtaining such age certificates by fraud, misrepresentation or falsification of facts, is hereby declared to be guilty of a misdemeanor, and on conviction before a court of competent jurisdiction shall be fined not less than $\$ 10$ or more than $\$ 50$. In such cases the factory inspector shall give written notice to the employer, who shall at once cause the minor affected to be dismissed from employment. Printed forms of the age certificates hereinafter provided shall be furnished by the state factory inspector upon request made by persons authorized to issue them. An age certificate shall not be approved unless satisfactory evidence is furnished by a certificate of birth or baptism of such child, the register of birth of such child with an
officer of a city or town designated to keep a register of births, or by the records of the public or parochial school attended by such child, that such child is of the age stated in the certificate, or by a certified copy of their passport from the commissioner of immigration: Provided, That in cases where the above proof is not obtainable, the parent, guardian or custodian of the child shall make an oath before the state factory inspector, or any factory inspector, or before a juvenile or district court as to the age of such child, and the state factory inspector, or any factory inspector, or the court, may issue to such child an age certificate as sworn to. A duplicate of such age certificate shall be filled out and shall be forwarded to the office of the state factory inspector. The age certificate shall be printed and shall be filled out, signed and held or surrendered in the following forms:

## age certificates.

This certifies that I am (father, mother, guardian or custodian) of (name of minor) and that (he or she) was born at (name of town or city) in the (name of county if known) and (State or county of ———) on the (date of birth and year of birth) and is now (number of years and months) old.
(Signature of parent, guardian or custodian.)
(City or town and date.)
There personally appeared before me the above-named (name of person signing) and made oath that the foregoing certificate by (him or her) signed, is true to the best of (his or her) knowledge. I hereby approve the foregoing certificate of (name of child), height, (feet and inches,) weight ——, complexion (fair or dark), hair (color), having no sufficjent reason to doubt that (he or she) is of the age therein certified.

Owner of certificate. This certificate belongs to (name of child and in whose behalf it is drawn), and is to be surrendered to (him or her) whenever (he or she) leaves the service of the corporation or employer holding the same, but if not claimed by said child within thirty days from such time, it shall be returned to the office of the state factory inspector for cancelation.
(Signature of person authorized to approve and sign with official character of authority.)
(Town or city and date.)
Such certificate shall be issued without charge. The provisions of this section shall not become operative until 60 days after the promulgation of this act.

SEc. 3. It shall be the duty of the commissioner of labor and industrial statistics and his deputies, and such factory inspectors as will be appointed in incorporated cities and towns by the mayor, with the consent of the council, and in parishes, by the police jury, and they are hereby authorized and empowered to visit and inspect, at all reasonable times and as often as possible all places enumerated in section 1 of this act, and to file complaint in any court of competent jurisdiction to enforce the provisions of this act, and it shall be the duty of the parish or district attorney to appear and prosecute all complaints so filed.

SEc. 4. No child or person under the age of 18 years, and no woman shall be employed in any of the places and industries enumerated in section 1 of this act for a longer period than ten hours per day of [or] 60 hours per week. There shall be one hourallowed each day for dinner, but such dinner time shall not be included as part of the working hours of the day. In case two-thirds of the employees so desire, time for dinner may be reduced at their request to not less than 30 minutes: Provided, That this shall not apply to persons working in stores and mercantile establishments on Saturday nights or 20 days before Christmas. Any violation of this provision shall be punishable by a fine of not less than $\$ 25$ or more than $\$ 50$, or by imprisonment in the parish jail (parish prison in New Orleans) for not less than ten days or more than six months, or both, in the discretion of the court.

No boy under the age of 16 years and no girl under the age of 18 shall be employed at any work before the hour of 6 in the morning or after the hour of 7 at night: Provided, That this shall not apply to persons working in stores and mercantile establishments on Saturday nights or during 20 days before Christmas. Any violation of this provision shall be punishable by a fine of not less than $\$ 25$ nor more than $\$ 100$, or by imprisonment in the parish jail (parish prison in New Orleans) for not less than ten days nor more than six months, or both, in the discretion of the court.

SEc.6. Every person, firm or corporation, agent or manager of a corporation employing or permitting or suffering to work five or more children under the age of 18 years and over the age of 14 in all places of business or establishments or occupations enumerated in section 1 shall post and keep posted in a conspicuous place in every room in which such help is employed or permitted or suffered to work a list containing the names, age and place of residence of every person under the age of 18 years employed,
permitted or suffered to work in such room, and it shall be unlawful for any person, agent, firm, company, copartnership, corporation or manager of a corporation to require or permit or suffer or employ in any mill, factory, mine or packing house, manufacturing establishment, workshop, store, laundry, millinery, dressmaking or mercantile establishment in which more than five persons are employed, or any theater, concert hall or in or about any place of amusement where intoxicating liquors are made or sold, or in any bowling-alley or boot-blacking establishment, or in any place where messages are transmitted or distributed, or in any other occupation not herein enumerated which may be deemed unhealthful or dangerous, any child over the age of 14 until an age certificate, approved as hereinabove provided, has been produced and placed on file in any such establishment or place of employment as heretofore mentioned in this section: Provided, further, however, That immediately upon the employment of any child in any of the places enumerated in this act the manager, superintendent, owner or agent shall notify in writing, the factory inspector of the employment of said child in the event proper age certificate is not filed, but such establishment or place of employment must procure from said child within five days from employment the age certificate provided for in this act. Any violation of this section shall be punishable by a fine of not less than $\$ 25$ nor more than $\$ 50$ or by imprisonment in the parish jail (parish prison in New Orleans) for not less than ten days nor more than six months, or both in the discretion of the court.
Sec. 7. Any parent or guardian or person or persons having control of or being responsible for the care of any child or person under the age of 16 who shall sign or swear or in any manner make false statement as to the age of said child or person under the age of 16 for the purpose of obtaining employment for said child or young person shall be deemed guilty of an offense for each violation thereof and upon conviction for the same shall be punished by a fine of not less than $\$ 10$ nor more than $\$ 25$ or by imprisonment in the parish jail (parish prison in New Orleans) for not less than ten days nor more than thirty days, or both, in the discretion of the court.

SEc. 8. Any child working in or in connection with any of the aforesaid establishments or in the distribution or transmission of merchandise or messages who appears to the inspector to be under the legal age is required to procure from the city or parish physician a certificate as to the physical fitness of said child to perform the work or service he or she is required to do.

Sec. 9. The presence of any child under 14 years of age in any of the establishments enumerated in section 1, except during the dinner hour, shall constitute prima facie evidence of his or her employment therein.
SEc. 10. Any owner, manager, supervisor or employee in any of the aforesaid occupations who shall hide or assist to escape or give warning of the approach of the inspector to any child or young person or woman in said eatablishments shall be deemed guilty of a misdemeanor and shall be punished by a fine of not less than $\$ 5$ nor more than \$15 or by imprisonment in the parish jail (parish prison in New Orleans) for not less than ten days nor more than thirty days, or both, in the discretion of the court.
SEC. 11. Any person, owner, agent, firm, manager, copartnership or company in charge of any establishment at the time of inspection shall be required to furnish the inspector a true statement of the number of persons employed in such establishment and any person, owner, agent, superintendent, firm, manager, company or copartnership who shall fail or refuse to furnish such statement or willfully understate the number of persons employed shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined not less than $\$ 25$ nor more than $\$ 100$ for each offense or imprisonment for not less than teu nor more than thirty days in the parish jail (parish prison in New Orleans), or both in the discretion of the court.

Sec. 12. Within one month after the occupancy of any factory, workshop or mill or store or other aforesaid occupation or establishment where children, young persons or women are employed the occupant shall notify the inspector in writing of such occupancy. Failure to do this shall constitute a misdemeanor and shall be punishable by a fine of not less than $\$ 10$ nor more than $\$ 25$ or by imprisonment in the parish jail (parish prison in New Orleans) for not less than ten days nor more than thirty days, or both, in the discretion of the court.

Sec. 13. Every person who shall employ any female in any factory, mill, warehouse, manufacturing establishment, workshop or store or any other occupation or establishment hereinabove mentioned shall provide suitable seats, chairs or benches for the use of the females so employed, which shall be so placed as to be accessible to said employees and shall permit the use of such seats, chairs or benches by them when they are not necessarily engaged in the active duties for which they are employed, and there shall be provided at least one chair to every three females. Failure to comply with this section shall be punishable by a fine of not less than $\$ 25$ nor more than
$\$ 50$ or imprisonment in the parish jail (parish prison in New Orleans) for not less than ten days nor more than thirty days, or both, in the discretion of the court.

Sec. 14. Every factory, mill, manufacturing establishment, workshop, warehouse, mercantile establishment or store and all other occupations and establishments hereinabove mentioned in which five or more young persons or women are employed and every such institution in which two or more children young persons or women are employed shall be supplied with proper wash and dressing rooms and kept in a cleanly state and free from effluvia arising from any drain, privy or other nuisance and shall be provided, within reasonable access, with a sufficient number of proper water closets or privies for the reasonable use of the persons employed and at least one of such closets shall be provided for each twenty-five persons employed and wherever two or more persons and one or more female person[s] are employed as aforesaid a sufficient number of separate and distinct water closets, earth closets or privies shall be provided for the use of each sex and plainly so designated, and no person shall be allowed to use any such closet or privy assigned to persons of the other sex, and said closets or privies shall not be locked during working hours. Failure to comply with this section shall be punishable by a fine of not less than $\$ 25$ nor more than $\$ 50$ or imprisonment in the parish jail (parish prison in New Orleans) for not less than ten days nor more than thirty days, or both, in the discretion of the court.

SEc. 15. Stairways with substantial hand rails shall be provided in factories, mills and manufacturing establishments for the better safety of persons employed in said establishments. The doors of such establishments shall swing outwardly or slide, as ordered by the factory inspector and it shall be neither locked, bolted or fastened during working hours. Failure to comply with this section shall be punishable by a fine of not less than $\$ 25$ nor more than $\$ 50$ or imprisonment in the parish jail (parish prison in New Orleans) for not less than ten days nor more than thirty days, or both, in the discretion of the court.

SEc. 16. Every factory, mill or workshop in this State where women and children are employed shall be lime-washed or painted when deemed necessary and ordered by the health authorities. Failure to comply with this section shall be punishable by a fine of not less than $\$ 25$ nor more than $\$ 50$ or imprisonment in the parish jail (parish prison in New. Orleans) for not less than ten days nor more than thirty days or both, in the discretion of the court.
Sec. 17. No minor or woman shall be required to clean any part of the mill, gearing or machinery in any such establishment in this State while the same is in motion. Failure to comply with this section shall be punishable by a fine of not less than $\$ 25$ nor more than $\$ 50$ or imprisonment in the parish jail (parish prison in New Orleans), for not less than ten days nor more than thirty days, or both, in the discretion of the court.
SEc. 18. The opening of all hatchways, elevators and well-holes upon every floor of every manufacturing, mechanical or mercantile or public buildings where women or children are employed in this State shall be protected by good and sufficient trap doors of self-closing hatches or safety catches or good strong guard rails at least three feet high. Failure to comply with this section shall be punishable by a fine of not less than $\$ 25$ nor more than $\$ 50$ or imprisonment in the parish jail (parish prison in New Orleans), for not less than ten days nor more than thirty days or both, in the discretion of the court.

Sec. 19. In all establishments in this State wherein children, young persons or women are employed where any process is carried on by which dust, or smoke or lint is generated the inspector shall have the power and authority to order that a fan, or fans, or some other dust, or smoke or lint removing or consuming contrivance or contrivances be so placed as to prevent the inhalation of such dust or smoke or lint by the employees: Provided, That two mechanical engineers, one chosen by the inspector and the other by the owner or owners of the establishment, shall agree as to the necessity of such fan or fans or other dust or smoke or lint removing or consuming contrivance or contrivances. Upon the failure of said two mechanical engineers to agree, a third mechanical engineer shall be chosen to arbitrate. Failure to comply with this section shall be punishable by a fine of not less than $\$ 25$ nor more than $\$ 50$ or imprisonment in the parish jail (parish prison in New Orleans) for not less than ten days nor more than six months or both, in the discretion of the court.

Sec. 20. All accidents in manufacturing, mechanical or other establishments or places within this State where children, young persons or women are employed which prevent the injured person or persons from returning to work within two weeks after the injury or which result in death shall be reported semi-annually by the person in charge of such establishment or place to the inspector. Failure to do this shall be deemed a violation of this section and punishable by a fine of not less than $\$ 5$ nor
more than $\$ 10$ or imprisonment in the parish jail (parish prison in New Orleans) for not less than twenty-four hours nor more than ten days, or both, in the discretion of the court.
Sec. 21. It shall be the duty of the city or town or parish employing an inspector or inspectors to provide a suitable office for same and pay for all necessary expenses incurred in the discharge of the duties of said office.

Sec. 22. There shall be an annual report of inspections made and all work and expenses in connection with said office forwarded to the commissioner of labor and incorporated towns and cities to the mayor and council of the cities and towns employing said inspector or inspectors.
SEc. 23. In the city of New Orleans, with the consent of the council, [the mayor] 'shall appoint a factory inspector, who may be either male or female, to see that the regulations of this act are observed and also to prosecute all persons who shall violate the same. Such inspector shall be paid a salary of not more than $\$ 750$ per annum.
SEc. 24. All fines collected through this act shall be paid over to the school fund in the parish where the fines are collected.

Approved July 9, 1908.

## MASSACHUSETTS.

## ACTS OF 1908.

> Chapter 217.-Employment of labor-False advertisements.

Section 1. It shall be unlawful knowingly to cause to be printed or published a false or fraudulent notice or advertisement for help or for obtaining work or employment.
Sec. 2. Whoever violates the provisions of this act shall be punished by a fine of not more than five hundred dollars or by imprisonment for not more than three months, or by both such fine and imprisonment.
Approved March 14, 1908.

## Chapter 273.-Sunday labor.

Section 1. Section three of chapter ninety-eight of the Revised Laws, as amended by chapter four hundred and fourteen of the acts of the year nineteen hundred and two, and by chapter one hundred and twenty-six of the acts of the year nineteen hundred and eight, is hereby further amended * * *
Approved March 25, 1908.
[Chapter 126 permits the digging of clams and the icing and dressing of fish on Sunday, and chapter 273 permits the performance on Sunday of unpaid work on yachts and pleasure boats.]

## Chapter 306.-Free public employment offices-Weekly bulletins.

Section 1. The chief of the bureau of statistics of labor is hereby authorized to furnish weekly to the clerks of all cities and towns in the Commonwealth printed bulletins showing the demand for employment, classified by occupations to such extent as may be feasible, and indicating the city or town in which the employees are wanted, such information to be based upon the applications for employees made at the free employment offices under the jurisdiction of said bureau.
Sec. 2. It shall be the duty of every city and town clerk to post the lists received as aforesaid, in one or more conspicuous places in the city or town.
SEC. 3. A city or town clerk who fails to comply with the provisions of this act shall be punished by a fine not exceeding ten dollars.

Approved March 27, 1908.
Chapter 325.-Inspection of factories, etc.-Pure water for humidifying.
Section 1. The water used for humidifying purposes by any person, firm or corporation operating a factory or workshop, shall be of such a degree of purity as not to give rise to any impure or foul odors, and shall be so used as not to be injurious to the health of persons employed in such factories or workshops.

SEc. 2. Any person, firm or corporation violating any provision of this act shall, upon conviction thereof, be punished by a fine of not less than ten nor more than one thousand dollars.

Sec. 3. The state inspectors of health shall, under the direction of the state board of health, enforce the provisions of this act.

Approved March 31, 1908.

## Chapter 343.-Sunday labor.

Section 1. The provisions of section two of chapter ninety-eight of the Revised Laws, as amended by section two of chapter four hundred and sixty of the acts of the year nineteen hundred and four [prohibiting Sunday labor] shall not apply to the delivery of ice cream on the Lord's day.

Approved April 3, 1908.

> Chapter 375.-Factory inspectors-Age of eligibility.

Section 1. A person who is not above the age of fifty years, if otherwise qualified, shall be eligible for appointment as an inspector of factories and public buildings, as a member of the inspection department of the district police.

Approved April 8, 1908.

> Ceapter 380.-Actions for injuries-Special inspection of plant.

Section 1. Any justice of the superior court may, upon petition setting forth in ordinary language that the servant or employee of a certain firm, person, corporation or association has been injured in the course of his employment, through some defect in the ways, works or machinery owned or used by the employer, and that it is necessary in order to protect the interests of the injured person that an examination of the ways, works or machinery through whose defect the injury occurred should be made, grant an order directing the employer or person in control of such ways, works or machinery to permit the person named in said order to make such examination, under such conditions as shall be set forth in the order; but the order shall not be granted until after such notice to the employer as any justice of said court may direct or approve, and a hearing.

Approved April 10, 1908.
Chapter 389.-Inspectors of factories, etc.-Powers and duties.
Section 1. The chief of the district police, the deputy chief of the inspection department of the district police, and the inspectors of factories and public buildings may, in the performance of their duty in enforcing the laws of the Commonwealth, enter any building, structure or inclosure, or any part thereof, and examine the methods of prevention of fire, means of exit, and means of protection against accident and may make investigations as to the employment of children, young persons and women, except concerning health and the influence of occupation upon health. They may, except in the city of Boston, enter any public building, public or private institution, schoolhouse, church, theatre, public hall, place of assemblage, or place of public resort, and make such investigations and order such structural or other changes, in said buildings, as are necessary relative to the construction, occupation and heating appliances and conditions, except for ventilating and sanitary purposes: Provided, however, That they may order structural changes for any purpose whenever the necessity therefor has been reported in accordance with the provisions of section five of chapter five hundred and thirty-seven of the acts of the year nineteen hundred and seven.

SEC. 2. Any person who hinders or prevents or attempts to prevent any member of the inspection department of the district police from entering any building, structure or inclosure or part thereof specified in the preceding section shall be liable to a penalty of not less than fifty nor more than one hundred dollars.

Sec. 3. Trial justices, police, municipal and district courts shall have concurrent jurisdiction with the superior court to enforce the provisions of this act.

Approved April 11, 1908.

Ceapter 420.-Liability of railway companies for injuries to employees.
Section 1. Section seventy-one of chapter one hundred and six of the Revised Laws is hereby amended * * *

Approved April 21, 1908.
[The section named is amended by extending its application to elevated trains, elevated railways, and elevated railway corporations.]

Chapter 457.-Liability of employers for injuries to employees-Actions.
Section 1. Section seventy-three of chapter one hundred and six of the Revised Laws is hereby amended * ** ${ }^{*}$ so as to read as follows:

Section 73. If, as the result of the negligence of an employer himself, or of a person for whose negligence an employer is liable under the provisions of section seventy-one, an employee is instantly killed, or dies without conscious suffering, his widow or, if he leaves no widow, his next of kin, who, at the time of his death, were dependent upon his wages for support, shall have a right of action for damages against the employer. If an action is brought under the provisions of this section by the widow of the employee, or by the next of kin, who may have such right of action, or if the action is brought under the provisions of section seventy-one by the legal representatives, such action shall not fail by reason of the fact that it should have been brought under the other section, but may be amended so as to provide against such failure at any time prior to final judgment.

Approved April 28, 1908.

## Chapter 462.-Bureau of labor.

Section 1. Chapter one hundred and seven of the Revised Laws is hereby amended by striking out section two and inserting in place thereof the following:
Section 2. It shall be the duty of the bureau to collect, assort, arrange, and issue from time to time reports embodying statistical information relative to the commercial, industrial, social, educational, and sanitary condition of the people, and to the permanent prosperity of the productive industries of the Commonwealth. It may also distribute at such regular intervals as it deems advisable a bulletin in relation to industrial or social matters. It may send for persons and papers, and examine witnesses under oath; and such witnesses shall be summoned in the same manner and be paid the same fees as witnesses before the superior court.

SEc. 2. The chief of the bureau of statistics of labor shall annually, on or before the third Wednesday in January, make a report to the general court summarizing the work of the bureau during the preceding year, and shall make therein such recommendations as he may deem proper. To this report there shall be appended a report or reports embodying such statistical and other information regarding labor as may be gathered by the bureau for annual presentation. These reports may be issued separately in parts in the discretion of the chief of the bureau and shall, when bound together, constitute the annual report of the chief of the bureau of statistics of labor.
Sec. 5. The chief of the said bureau shall annually, on or before the third Wednesday in January, make a report to the general court covering the work of the free employment offices, established in accordance with chapter four hundred and thirty-five of the acts of the year nineteen hundred and six. The secretary of the Commonwealth shall cause to be printed of said report, three thousand two hundred and fifty copies, of which two thousand two hundred and fifty shall be for the use of the bureau.

Approved April 28, 1908.
Ceapter 485.-Firee public employment offices.
Section 1. Chapter four hundred and thirty-five of the acts of the year nineteen hundred and six is hereby amended by striking out section two and inserting in place thereof the following: Section 2. The chief of said bureau shall appoint for each of the offices provided for in section one of this act a superintendent to discharge under his direction the duties hereinafter set forth or such as may be required by him. The said chief may also appoint an assistant superintendent and such clerks as he may deem necessary for the proper conduct of the business of said employment offices. The furniture and fixtures of said employment offices shall be provided by the sergeant-at-arms in the manner and under the restrictions specified in section
79828-Bull. 81—09-18
four of chapter ten of the Revised Laws for buildings or parts of buildings leased to the Commonwealth. The situation of each office established under the provisions of this act shall be plainly indicated by a proper sign or signs.
Sec. 2. Said chapter is hereby further amended by striking out section three and inserting in place thereof the following: Section 3. It shall be the duty of the superintendents of the employment offices established in accordance with this act, to receive applications from those seeking employment and from those desiring to employ, and to register the same in such manner as may be devised by the chief of said bureau, and to take such other action as may be deemed best by the chief of said bureau to promote the purposes of said offices.
SEc. 3. Section four of said chapter is hereby amended by adding at the end thereof the following: Any clerk or superintendent who directly or indirectly charges or receives any fee in the performance of his duties shall be deemed guilty of a misdemeanor and shall be subject to a fine of not more than one hundred dollars or to imprisi onment in the county jail for a term not exceeding thirty days. Such fine or imprisonment shall disqualify him from holding further connection with said office.
Sec. 4. Said chapter is hereby further amended by striking out section five and inserting in place thereof the following: Section 5. In registering applications for employment and for employees wanted preference shall be given to residents of the Commonwealth.
SEC. 5. Said chapter is hereby further amended by striking out section six and inserting in place thereof the following: Section 6. Each superintendent shall make to the chief of said bureau such reports of applications for labor or employment and of other details of the work of his office as may be required by said chief. The said chief shall cause reports showing the business of the several offices to be prepared at regular intervals and to be exchanged between the said offices, and shall supply them to the newspapers and to citizens upon request; and the several superintendents shall cause such reports to be posted in a conspicuous place in their offices so that they may be open to public inspection.
SEC. 6. Chapter one hundred and thirty-five of the acts of the year nineteen hundred and seven is hereby amended by striking out section one and inserting in place thereof the following: Section 1. There shall be allowed and paid out of the treasury of the Commonwealth, upon the approval of the chief of the bureau of statistics of labor, for salaries and for contingent expenses in connection with the establishment and maintenance of free employment offices as herein provided for, such sum as the general court may annually appropriate therefor. The annual salary of the superintendents, and of such clerk as may be appointed in each office to act as chief clerk or assistant superintendent shall be fixed by the chief of said bureau, subject to the approval of the governor and council.
SEc. 7. The chief of the bureau of statistics of labor shall annually on or before the third Wednesday in January make a report to the general court covering the work of the free employment offices established in accordance with chapter four hundred and thirty-five of the acts of the year nineteen hundred and six.

Approved May 1, 1908.

> Chapter 487.-Inspection of factories-A ppeals from orders of inspectors.

Section 1. Whoever is aggrieved by the order, requirement, or direction of an inspector of factories and public buildings may, within ten days after the service thereof, appeal to a judge of the superior court for the county in which the building to which such order, requirement or direction relates is situated, for an order forbidding its enforcement; and after such notice as said court shall order to all parties interested, a hearing may be had before said court at such early and convenient time and place as shall be fixed by said order; or the court may appoint three disinterested persons, skilled in the subject-matter of the controversy, to examine the matter and hear the parties; and the decision of said court, or the decision, in writing and under oath, of the majority of said experts, filed in the office of the clerk of courts in said county within ten days after such hearing, may alter, annul or affirm such order, requirement or direction. Such decision or a certified copy thereof shall have the same authority, force and effect as the original order, requirement or direction of the inspector. If such decision annuls or alters such order, requirement or direction of the inspector, the court shall also order the said inspector not to enforce his order, requirement or direction, and in every case the certificate required by law shall thereupon be issued by said court or by said experts.

Sec. 2. The court may award reasonable compensation to experts appointed under the provisions of the preceding section which, if the order, requirement or direction of the inspector is altered or annulled, shall be paid by the county in which the
application for an order of the court was made; otherwise by the applicant. If the order, requirement or direction of the inspector is affirmed by the court or the experts, costs shall be taxed against the applicant for the order of the court, as in civil cases, and shall be paid into the treasury of the county in which the application for such order of the court was made.
Approved May 5, 1908.
Chapter 489.-Compensation for injuries to employees-Plans-Contracts waiving employer's liability.

Section 1. Any employer of labor may submit to the state board of conciliation and arbitration a plan of compensation for employees in his employ, providing for payments to said employees in the event of injury in the course of their employment, based upon a certain percentage of the average earnings of such employees, and without reference to legal liability under the common law or the employer's liability act. After examination of such plan of compensation, and a public hearing thereon after public notice thereof, the board of conciliation and arbitration may, if it considers the same fair and just to the employees, give its approval thereof by certificate to be attached to such plan.
SEc. 2. After obtaining the approval of a plan of compensation as set forth in the foregoing section, it shall be lawful for the employer to enter into a contract with his employees by which such employees shall release the employer from liability in case of injury in the course of said employment and accept in lieu thereof the compensation provided in said plan of compensation.

SEC. 3. Either parent of any minor employee or the guardian of such minor may agree to said plan of compensation in behalf of the minor. Such agreement shall be in writing signed by the employee, or, in the case of a minor employee, by either parent or guardian, in the presence of two witnesses, of whom one shall be an employee at the time of such signature.
SEC. 4. No employer shall require as a condition of employment that any employee shall assent to any plan of compensation or in any way waive his legal right to recover damages for an injury outside the provisions of such plan.

Sec. 5. No contract under such plan of compensation shall be binding for more than one year from the date thereof.

Sec. 6. So much of section sixteen of chapter one hundred and six of the Revised Laws as is inconsistent herewith is hereby repealed.

Approved May 5, 1908.
Chapter 547.-Hours of labor of employees in penal institutions.

#### Abstract

Section 1. The hours of labor for officers, instructors and employees of the State penal institutions shall not exceed sixty in each week; and every officer, instructor or employee whose duties require his presence at the institution seven days a week shall be given at least two days vacation in each month, which shall be in addition to the regular annual vacation and without loss of pay. Nothing in this section shall prevent the warden or superintendent, respectively, from requiring the services of all his officers, instructors and employees to assist in recapturing an escaped prisoner, or in any case of extraordinary emergency involving danger to property, to life, to public safety or to public health. Approved May 27, 1908. Chapter 553.-Liability of railroad companies for injuries to employees-Assumption of risk.

Section 1. Section one hundred and sixty-seven of Part II of chapter four hundred and sixty-three of the acts of the year nineteen hundred and six is hereby amended * * * so as to read as follows: Section 167. An employee of a railroad corporation who is injured by any locomotive, car or train which is used contrary to the provisions of sections one hundred and fifty-nine, one hundred and sixty-one, one hundred and sixty-two and one hundred and sixty-three, shall not be deemed to have assumed the risk of such injury, although he continues in the employment of such corporation after the unlawful use of such locomotive, car or train has been brought to his knowledge. An employee of a railroad corporation who is injured by any locomotive, car or train by reason of the negligence of any other employee of the corporation shall not be deemed to have assumed the risk of such injury.
Approved May 28, 1908.

Chapter 605.-Assignments of wages.
Section 7. No assignment of, or order for, wages to be earned in the future to secure a loan of less than two hundred dollars, shall be valid against an employer of the person making said assignment or order until said assignment or order is accepted in writing by the employer, and said assignment or order, and the acceptance of the same have been filed and recorded with the clerk of the city or town where the party making said assignment or order resides, if a resident of the Commonwealth, or in which he is employed, if not a resident of the Commonwealth.

Sec. 8. No such assignment of, or order for, wages to be earned in the future shall be valid, when made by a married man, unless the written consent of his wife to the making of such assignment or order is attached thereto.

Approved June 11, 1908.

## Chapter 645.-Hours of labor of women and children.

Section 1. Section twenty-four of chapter one hundred and six of the Revised Laws * * * is hereby amended * ${ }^{*} *$ so as to read as follows: Section 24. No child under eighteen years of age and no woman shall be employed in laboring in a manufacturing or mechanical establishment more than ten hours in any one day, except as hereinafter provided in this section, unless a different apportionment of the hours of labor is made for the sole purpose of making a shorter day's work for one day of the week; and in no case shall the hours of labor exceed fifty-six in a week, except that in any such establishment where the employment is by seasons, the number of such hours in any week may exceed fifty-six, but not fifty-eight: Provided, That the total number of such hours in any year shall not exceed an average of fifty-six hours a week for the whole year, excluding Sundays and holidays. Every employer shall post in a conspicuous place in every room in which such persons are employed a printed notice stating the number of hours' work required of them on each day of the week, the hours of commencing and stopping work, and the hours when the time allowed for meals begins and ends or, in the case of establishments exempted from the provisions of sections thirty-six and thirty-seven, the time, if any allowed for meals. The printed forms of such notices shall be provided by the chicf of the district police, after approval by the attorney-general. The employment of such person at any time other than as stated in said printed notice shall be deemed a violation of the provisions of this section unless it appears that such employment was to make up time lost on a previous day of the same week in consequence of the stopping of machinery upon which he was employed or dependent for employment; but no stopping of machinery for less than thirty consecutive minutes shall justify such overtime employment, nor shall such overtime employment be authorized until a written report of the day and hour of its occurrence and its duration is sent to the chief of the district police or to an inspector of factories and public buildings.

SEC. 2. This act shall take effect on the first day of January in the year nineteen hundred and ten.

Approved June 13, 1908.

## MISSISSIPPI.

## ACTS OF 1908.

## Chapter 93.-Blacklisting telegraph operators-Membership in labor unions.

Section 1. It shall be unlawful for any telegraph company, telephone company, telegraph press association, railroad company, or any leased wire firm or private individual doing business in this State, and employing telegraphers for the purpose of transmitting telegraph dispatches for the general public, or any press association, or private business, or in the operation of any railroad, to discriminate against any such telegrapher in its service or out of its service, or to blacklist or refuse employment to any telegrapher only because of such telegrapher's affiliation with or membership in any lawful organization or trade or labor union of telegraphers.

SEc. 2. Any such telegraph or telephone company, telegraph press association, railroad company or leased wire firm or private individual violating section 1 of this act shall be liable in actual and exemplary damages to the person so discriminated against.

SEc. 3. It shall be unlawful for any two or more such telegraph or telephone companies, telegraph press associations, railroad companies or leased wire firms or private individuals doing business in this State and employing telegraphers, to conspire,
contract, mutually agree or cooperate to discriminate against, blacklist or refuse employment to any telegrapher merely on account of such telegrapher's affiliation with or membership in any lawful organization or trade or labor union of telegraphers.
SEc. 4. Any telegraph or telephone company, telegraph press association, railroad company, or leased wire firm or private individual violating section 3 of this act shall be jointly and severally liable in actual and exemplary damages to the party so aggrieved.
Approved March 7, 1908.
Chapter 95.—Railroads—Backing locomotives at night.
Section 1. It shall be unlawful for any person or corporation owning or operating a railroad as a common carrier of passengers and freight for hire in the State, to require or permit a locomotive engine to be backed on his or its line of railroad, in the nighttime, unless it is provided and equipped with a pilot and headlight on the rear of its tender:
Provided, however, That the provisions of this act shall not apply to raiiroads whose principal business is hauling logs, nor to locomotive engines running for coal or water, doubling hills, returning from trains when broken in two, going to or returning from trains in the yard limits of terminal stations, nor to engines engaged in regular switching service in yards, or road engines switching at intermediate stations; nor to any locomotive engines in cases of washouts, wrecks, or when going to the assistance of engines so disabled as to block the main track of a railroad.
Sec. 2. Any person or corporation violating the provisions of this act shall be guilty of a misdemeanor, and on conviction thereof shall be punished by a fine of not less than $\$ 100$ nor more than $\$ 1,000$, and in addition thereto any person giving an order, permitting or requiring an employee of any railroad to violate the provisions of this act shall be guilty of a misdemeanor, and on conviction thereof shall be punished by imprisonment in the county jail not less than ten nor more than thirty days.

SEc. 3. Any person or corporation operating a railroad in violation of the provisions of this act shall be liable for injury or damage caused to any person by reason thereof, notwithstanding the negligence of the party injured or damaged.

Approved March 16, 1908.

> Chapter 99.-Employment of children-General provisions.

Section 1. No children under the age of twelve years shall be employed in or permitted to work in any mill, factory or manufacturing establishment in this State.
SEC. 2. No child under the age of sixteen years shall be employed or detained in any mill, factory or manufacturing establishment within this State for more than ten hours in any one day, or for more than fifty-eight hours in any one week, or be employed in or detained in any such manufacturing establishment between the hours of $7 \mathrm{p} . \mathrm{m}$. and 6 a . m .

SEc. 3. It shall be unlawful for any person, firm or corporation to employ or detain or permit to work in any mill, factory or manufacturing establishment in this State any child under the age of sixteen years without first requiring said child to present the affidavit of the parent or guardian or person standing in parental relation to such child, stating the place and date of birth of such child, and also stating the last school attendance of such child and grade of studies pursued, and the name of school and name of teacher in charge. The employer shall preserve such affidavit and keep a complete register of all such affidavits showing all the facts contained therein.

SEc. 4 . It is the special duty of the sheriff of the county in which manufacturing establishments employing child labor are located to visit, at least once each month, each such manufacturing establishment, and see to the enforcement of this act.
Sec. 5. It is the duty of each county health officer to visit, without notice of his intention to do so, all manufacturing establishments employing child labor within his county, at least twice each year, and oftener if requested by the sheriff, and to promptly report to the sheriff any unsanitary condition of the premises, any child or children afflicted with an infectious, contagious or communicable disease, or whose physical condition renders such child or children incapacitated to perform the work required of them; and the sheriff shall promptly remove such child or children from such manufacturing establishment, and order the premises put in sanitary condition; and the judgment of the county health officer as to the physical condition of the children and sanitary condition of the premises shall be final and conclusive.

Sec. 6. It shall be the duty of the circuit judge to specially charge the grand jury to investigate violations of this act.

SEc. 7. Any officer, manager or superintendent of any manufacturing establishment in which child labor is employed who shall fail or refuse to give true and correct information demanded of him by any of the officers hereinbefore directed to inspect such establishments, or who shall fail or refuse to obey any lawful order of the sheriff or health officer of the county in which such establishment is located, for carrying out the purposes of this act, shall be guilty of a misdemeanor, and upon conviction shall be fined not less than ten dollars nor more than one hundred dollars.

SEC. 8. Any person, firm or corporation, or the superintendent, manager, or any officer of a manufacturing establishment employing any child or permitting any child to be employed by or to work in or to be detained in any mill, factory or manufacturing establishment in this State contrary to law, shall be guilty of a misdemeanor, and upon conviction shall be fined not less than fifty dollars nor more than one hundred dollars, or may be sentenced to the county jail for not less than ten days nor more than sixty days, or both such fine and imprisonment.

Sec. 9. The provisions of this act shall apply only to manufacturing establishments engaged in manufacturing or working in cotton, wool or other fabrics, and to manufacturing establishments where children are employed indoors at work injurious to health, or in operating dangerous machinery.

Approved March 21, 1908.
Ceapter 194.-Liability of railroad companies for injuries to employees-Fellowservants.

Section 4056 of the code of 1906 is hereby amended so as to read as follows:
Section 1. Every employee of a railroad corporation, and all other corporations and individuals, using engines, locomotives or cars of any kind or description whatsoever, propelled by the dangerous agencies of steam, electricity, gas, gasoline or lever power, and running on tracks, shall have the same rights and remedies for an injury suffered by him from the act or omission of such railroad corporation or others, or their employees, as are allowed by law to other persons not employed.

Knowledge by an employee injured of the defective or unsafe character or condition of any machinery, ways or appliances, or of the improper loading of cars, shall not be a defense to an action for injury caused thereby, except as to conductors or engineers in charge of dangerous or unsafe cars or engines voluntarily operated by them. When death ensues from an injury to an employee, an action may be brought in the name of the widow of such employee for the death of the husband, or by the husband for the death of bis wife, or by a parent for the death of a child, or in the name of a child for the death of an only parent, for such damages as may be suffered by them respectively by reason of such death, the damages to be for the use of such widow, husband, parent or child, except that in case the widow should have children, the damages shall be distributed as personal property of the husband. The legal or personal representatives of the person injured shall have the same rights and remedies as are allowed by law to such representatives of other persons. In every such action the jury may give such damages as shall be fair and just, with reference to the injury resulting from such death to the person suing. Any contract or agreement expressed or implied, made by an employee to waive the benefit of this section shall be null and void; and this section shall not deprive an employee of a person, natural or artificial, or the legal or personal representatives of such person, of any right or remedy they now have by law.

Approved March 20, 1908.

## NEW JERSEY.

## ACTS OF 1908.

## Chapter 25.-Arbitration of labor disputes.

Section 1. The act entitled "An act to provide for the amicable adjustment of grievances and disputes that may arise between employers and employees, and to authorize the creation of a state board of arbitration," approved March twenty-fourth, one thousand eight hundred and ninety-two, and all acts amendatory thereof and supplementary thereto, be and the same are hereby repealed.

Approved March 25, 1908.

> Chapter 156.-Civil service-Labor class.

Section 16. The labor class shall include ordinary unskilled laborers. Yacancies in the labor class shall be filled by appointment from lists of applicants registered in their respective localities by the civil service commission. Preference in employ-
ment from such lists shall be given according to the date of application. There shall be separate lists of applicants for different kinds of labor or employments, and the said commission may establish separate labor lists for various localities, institutions and departments. The said commission shall require an applicant for registration for the labor service before he can be registered to furnish evidence or to pass such examinations as they may deem proper with respect to his age, residence, physical condition, ability to labor, sobriety, industry, capacity and experience in the trade or employment for which he applies.
Approved April 10, 1908.

## Chapter 231.-Employment of children-School attendance required.

Section 1. Section one hundred and fifty-three of an act entitled "An act to establish a thorough and efficient system of free public schools, and to provide for the maintenance, support and management thereof," approved October nineteenth, one thousand nine hundred and three, is amended to read as follows:

Section 153. Every parent, guardian or other person having control of a child between the ages of seven and seventeen years inclusive, shall cause such child to regularly attend a day school in which, at least, the common school branches of reading, writing, arithmetic, spelling, English grammar and geography are taught by a competent teacher, or receive equivalent instruction elsewhere than at school, unless such child is above the age of fifteen years and has completed the grammar school course prescribed by the state board of education, and in addition thereto is regularly and lawfully employed in any useful occupation or service. Such regular attendance shall be during all the days and hours that the public schools are in session in the city, town or district in which the child resides, unless it be shown to the satisfaction of the board of education of the school district in which such parent, guardian or other person resides, that the bodily or mental condition of such child is such [as] to prevent his or her attendance at school. If such child be within the age of seventeen years and has completed the grammar school course and is not regularly and lawfully employed in any useful occupation or service, such child shall attend the high school or manual training school in said city, town or district in which such child resides, if there is a high school or manual training school in said city, town or district; if there is no high school or manual training school in said city, town or district, said child shall be transported to a high school or manual training school as provided in section one hundred and nineteen of this act.

Approved April 13, 1908.
Chapter 273.-Factory inspectors-Female inspector.
SEction 1. In addition to the inspectors provided by the act to which this is a supplement, and the amendments and supplements thereto, the governor shall, immediately after the passage of this act, appoint two suitable persons as inspectors, one of whom shall be a woman; whose salary, powers and duties and term of office, shall be the same as the inspectors.already provided for.

Approved April 14, 1908.

## Chapter 284.-Bribery of employets.

Section 1. Whoever gives, offers or promises to an agent, employee or servant, any gift or gratuity whatever, without the knowledge and consent of the principal, employer or master of such agent, employee or servant, with intent to influence his action in relation to his principal's, employer's or master's business; or an agent, employee or servant who, without the knowledge and consent of his principal, employer or master, requests or accepts a gift or gratuity or a promise to make a gift, or to do an act beneficial to himself, under an agreement, or with an understanding that he shall act in any particular manner to his principal's, employer's or master's business; or an agent, employee or servant who, being authorized to procure materials, supplies or other articles, either by purchase or contract for his principal, employer or master, or to employ service or labor for his principal, employer or master, receives directly or indirectly, for himself or for another, a commission, discount or bonus from the person who makes such sale or contract, or furnishes such materials, supplies or other articles, or from a person who renders such service or labor, and any person who gives or offers such an agent, employee or servant such commission, discount or bonus shall be guilty of a misdemeanor.

Approved April 15, 1908.
