PRODUCER PRICE INDEXES – OCTOBER 2022

The Producer Price Index for final demand increased 0.2 percent in October, seasonally adjusted, the U.S. Bureau of Labor Statistics reported today. Final demand prices rose 0.2 percent in September and were unchanged in August. (See table A.) On an unadjusted basis, the index for final demand advanced 8.0 percent for the 12 months ended in October.

In October, the rise in the index for final demand can be attributed to a 0.6-percent advance in prices for final demand goods. In contrast, the index for final demand services decreased 0.1 percent.

Prices for final demand less foods, energy, and trade services advanced 0.2 percent in October following a 0.3-percent rise in September. For the 12 months ended in October, the index for final demand less foods, energy, and trade services increased 5.4 percent.

Chart 1. One-month percent changes in selected PPI final demand price indexes, seasonally adjusted

Chart 2. Twelve-month percent changes in selected PPI final demand price indexes, not seasonally adjusted

Final Demand

Final demand goods: The index for final demand goods moved up 0.6 percent in October, the largest advance since a 2.2-percent rise in June. Most of the October increase can be traced to a 2.7-percent jump in prices for final demand energy. The index for final demand foods advanced 0.5 percent. Conversely, prices for final demand goods less foods and energy decreased 0.1 percent.

Product detail: In October, 60 percent of the increase in prices for final demand goods is attributable to the index for gasoline, which rose 5.7 percent. Prices for diesel fuel, fresh and dry vegetables, residential electric power, chicken eggs, and oil field and gas field machinery also advanced. In contrast, the index for passenger cars declined 1.5 percent. (In accordance with usual practice, most new-model-year passenger cars and light motor trucks were introduced into the PPI in October. See *Report on Quality Changes for 2023 Model Vehicles* at www.bls.gov/web/ppi/ppimotveh.htm.) Prices for gas fuels and for processed young chickens also fell. (See table 2.)

Final demand services: The index for final demand services fell 0.1 percent in October, the first decline since moving down 0.2 percent in November 2020. Leading the October decrease, margins for final demand trade services fell 0.5 percent. (Trade indexes measure changes in margins received by wholesalers and retailers.) Prices for final demand transportation and warehousing services moved down 0.2 percent. Conversely, the index for final demand services less trade, transportation, and warehousing increased 0.2 percent.

Product detail: A major factor in the October decrease in prices for final demand services was the index for fuels and lubricants retailing, which fell 7.7 percent. The indexes for portfolio management, long-distance motor carrying, automobile retailing (partial), and professional and commercial equipment wholesaling also moved lower. In contrast, prices for hospital inpatient care increased 0.8 percent. The indexes for services related to securities brokerage and dealing (partial), apparel wholesaling, and airline passenger services also rose.

Table A. Monthly and 12-month percent changes in selected final demand price indexes, seasonally adjusted

Month	Total final demand	Final demand less foods, energy, and trade	Final demand goods				Final demand services				Change in final demand from 12 months ago (unadj.)	Change in final demand less foods, energy, and trade from 12 mo. ago (unadj.)

¹ Some of the figures shown above and elsewhere in this release may differ from those previously reported because data for June 2022 through September 2022 have been revised to reflect the availability of late reports and corrections by respondents.

Intermediate Demand by Commodity Type

Within intermediate demand in October, prices for processed goods fell 0.2 percent, the index for unprocessed goods declined 11.7 percent, and prices for services rose 0.3 percent. (See tables B and C.)

Processed goods for intermediate demand: Prices for processed goods for intermediate demand moved down 0.2 percent in October after no change in September. Leading the decrease, the index for processed materials less foods and energy fell 0.8 percent. Prices for processed foods and feeds declined 0.5 percent. Conversely, the index for processed energy goods advanced 1.7 percent. For the 12 months ended in October, prices for processed goods for intermediate demand rose 10.1 percent.

Product detail: A major factor in the October decrease in prices for processed goods for intermediate demand was the index for cold rolled steel sheet and strip, which dropped 16.5 percent. Prices for utility natural gas, primary basic organic chemicals, plastic resins and materials, liquefied petroleum gas, and processed young chickens also fell. In contrast, the index for diesel fuel advanced 9.5 percent. Prices for agricultural chemicals and chemical products and for flour and flour-base mixes and doughs also moved higher.

Unprocessed goods for intermediate demand: The index for unprocessed goods for intermediate demand fell 11.7 percent in October, the largest decrease since moving down 14.4 percent in April 2020. The broad-based October decline was led by prices for unprocessed energy materials, which dropped 19.8 percent. The indexes for unprocessed nonfood materials less energy and for unprocessed foodstuffs and feedstuffs also moved lower, 5.3 percent and 3.1 percent, respectively. For the 12 months ended in October, prices for unprocessed goods for intermediate demand rose 9.7 percent.

Product detail: A major factor in the October decrease in prices for unprocessed goods for intermediate demand was the index for natural gas, which dropped 37.8 percent. Prices for corn, raw milk, slaughter barrows and gilts, oilseeds, and recyclable paper also moved lower. Conversely, the index for crude petroleum increased 2.0 percent. Prices for ungraded chicken eggs and for coal also rose.

¹ Some of the figures shown above and elsewhere in this release may differ from those previously reported because data for June 2022 through September 2022 have been revised to reflect the availability of late reports and corrections by respondents.

Services for intermediate demand: The index for services for intermediate demand increased 0.3 percent in October, the fourth consecutive rise. Leading the October advance, prices for services less trade, transportation, and warehousing for intermediate demand climbed 0.5 percent. The index for transportation and warehousing services for intermediate demand moved up 0.6 percent. In contrast, margins for trade services for intermediate demand fell 0.3 percent. For the 12 months ended in October, the index for services for intermediate demand increased 6.5 percent, the largest advance since rising 7.9 percent in May.

Product detail: Over half of the October rise in the index for services for intermediate demand can be attributed to a 6.0-percent increase in prices for business loans (partial). The indexes for services related to securities brokerage and dealing (partial); arrangement of freight and cargo transportation; television advertising time sales; building materials, paint, and hardware wholesaling; and metals, minerals, and ores wholesaling also advanced. Conversely, margins for machinery and equipment parts and supplies wholesaling fell 0.9 percent. Prices for gross rents for retail properties and for long-distance motor carrying also decreased.

Intermediate Demand by Production Flow

Stage 4 intermediate demand: The index for stage 4 intermediate demand was unchanged in October following a 0.3-percent increase in September. In October, prices for total services inputs to stage 4 intermediate demand rose 0.1 percent. In contrast, prices for total goods inputs moved down 0.2 percent. (See table D.) Increases in the indexes for services related to securities brokerage and dealing (partial); diesel fuel; business loans (partial); gasoline; and building materials, paint, and hardware wholesaling offset declines in the indexes for corn, machinery and equipment parts and supplies wholesaling, portfolio management, gross rents for retail properties, and cold rolled steel sheet and strip. For the 12 months ended in October, prices for stage 4 intermediate demand advanced 7.7 percent.

Stage 3 intermediate demand: The index for stage 3 intermediate demand declined 0.5 percent in October following no change in the previous month. In October, prices for total goods inputs to stage 3 intermediate demand moved down 1.5 percent. Conversely, the index for total services inputs increased 0.5 percent. Decreases in prices for raw milk, corn, slaughter barrows and gilts, cold rolled steel sheet and strip, primary basic organic chemicals, and slaughter chickens outweighed advances in the indexes for arrangement of freight and cargo transportation, diesel fuel, and ungraded chicken eggs. For the 12 months ended in October, prices for stage 3 intermediate demand rose 9.1 percent.

Stage 2 intermediate demand: The index for stage 2 intermediate demand declined 5.3 percent in October after falling 0.6 percent in September. In October, prices for total goods inputs to stage 2 intermediate demand dropped 10.9 percent. In contrast, the index for total services inputs advanced 0.8 percent. Decreases in the indexes for gas fuels, oilseeds, primary basic organic chemicals, fuels and lubricants retailing, recyclable paper, and prepared animal feeds outweighed increases in prices for business loans (partial), crude petroleum, and coal. For the 12 months ended in October, prices for stage 2 intermediate demand rose 7.3 percent.

Stage 1 intermediate demand: The index for stage 1 intermediate demand was unchanged in October following a 0.3-percent increase in September. In October, prices for total services inputs to stage 1 intermediate demand advanced 0.3 percent. Conversely, the index for total goods inputs declined 0.3 percent. Increases in the indexes for services related to securities brokerage and dealing (partial); diesel fuel; gasoline; building materials, paint, and hardware wholesaling; and traveler accommodation services offset decreases in prices for corn, primary basic organic chemicals, cold rolled steel sheet and strip, utility natural gas, and gross rents for retail properties. For the 12 months ended in October, the index for stage 1 intermediate demand rose 9.2 percent.

¹ Some of the figures shown above and elsewhere in this release may differ from those previously reported because data for June 2022 through September 2022 have been revised to reflect the availability of late reports and corrections by respondents.

The Producer Price Index for November 2022 is scheduled to be released on Friday, December 9, 2022, at 8:30 a.m. (ET).

Recalculated Seasonal Adjustment Factors and Relative Importance Figures to be Available on February 14, 2023

Each year with the release of PPI data for January, seasonal adjustment factors and relative importance figures are recalculated to reflect price movements from the just-completed calendar year. The following information relating to the seasonal-factor update will be available on February 14, 2023 (2 workdays prior to the release of PPI data for January 2023 on February 16, 2023):

- Direct seasonal factors for PPI commodity indexes for the year 2023,
- Recalculated seasonal factors for the last 5 years (2018-2022) for PPI commodity indexes,
- Recalculated seasonal factors for the last 5 years (2018-2022) for PPI Final Demand-Intermediate Demand indexes,
- Recalculated seasonal index data for the last 5 years (2018-2022) for Final Demand-Intermediate Demand and commodity indexes. This revision to seasonally adjusted indexes for the previous 5 years will be posted to the PPI database on the BLS website.

In addition, the following relative importance tables, which include values for December 2022, will be available on February 14, 2023:

- Final demand by individual commodities
- Final demand by component series
- Individual commodities of intermediate demand by commodity type
- Component series of intermediate demand by commodity type
- Individual commodities of intermediate demand by production flow
- Component series of intermediate demand by production flow
- Commodities, all levels
- Wherever-provided services and construction

This information will be available on the PPI website at www.bls.gov/ppi or by contacting the PPI Section of Index Analysis and Public Information at ppi-info@bls.gov or (202) 691-7705.

PPI Weights to be Updated to Reflect 2017 Census Shipment Values

With the release of January 2023 Producer Price Index (PPI) data on February 16, 2023, the Bureau of Labor Statistics will update PPI value weights to more accurately reflect recent production and marketing patterns. The updated weights will be constructed using 2017 value of shipments data from the Census of Manufactures, the Census of Mining, the Census of Services, and the Census of Agriculture. These data were collected in accordance with the North American Product Classification System (NAPCS). From January 2018 through December 2022, PPI weights have been based on 2012 North American Industry Classification System (NAICS) shipment values.

All PPIs will be affected by this weight update, including all industry net output indexes, as well as indexes for traditional commodity groupings. In addition, weights will be updated from the 2012 to the 2017 Economic Census for all Final Demand-Intermediate Demand (FD-ID) indexes, special commodity-grouping indexes, and inputs to industry indexes. This weight revision will not result in changes to the reference base for indexes, the dates when PPIs are set to 100.

It is important to note that the basic structures of the PPI commodity and FD-ID classification systems will not change as a result of the weight revision. However, PPIs classified according to the NAICS will be updated to reflect 2022 NAICS definitions established by the U.S. Census Bureau. The weight update also will result in shifting relative importance values. These shifts will impact aggregate indexes in a manner commensurate with the relative gains and losses in value weights from 2012 to 2017.

In addition, PPI sample updates normally occurring with the release of October 2022 and February 2023 data will be combined and released in conjunction with the release of January 2023 PPI data in February 2023.

Commodity and FD-ID relative importance figures for December 2022 will be released on February 14, 2023, two business days prior to the release of January 2023 PPI data. This information will be available on the PPI website at www.bls.gov/ppi/tables/. Following the January 2023 PPI data release, a concordance between Census product codes and PPI commodity codes will be available upon request by contacting the PPI Section of Index Analysis and Public Information at ppi-info@bls.gov or (202) 691-7705.

Technical Note

Brief Explanation of Producer Price Indexes

The Producer Price Index (PPI) of the Bureau of Labor Statistics (BLS) is a family of indexes that measures the average change over time in prices received (price changes) by producers for domestically produced goods, services, and construction. PPIs measure price change from the perspective of the seller. This contrasts with other measures, such as the Consumer Price Index (CPI). CPIs measure price change from the purchaser's perspective.

More than 10,000 PPIs for individual products and groups of products are released each month. PPIs are available for the products of virtually every industry in the mining and manufacturing sectors. Over time, new PPIs have been introduced for products of industries in the services and construction sectors of the U.S. economy. As of January 2022, the PPI covered 71 percent of services as measured by 2012 Census revenue, and 31 percent of construction.

More than 64,000 price quotations per month are organized into three sets of PPIs: (1) Final demand-Intermediate demand (FD-ID) indexes, (2) commodity indexes, and (3) indexes for the net output of industries and their products. The FD-ID structure organizes products by class of buyer and degree of fabrication as well as by stage of production. The commodity structure organizes products by similarity of end use or product type. The entire output of various industries is sampled to derive price indexes for the net output of industries and their products.

Final Demand–Intermediate Demand Indexes

The PPI FD-ID structure measures price change for goods, services, and construction sold to final demand and to intermediate demand. The FD-ID system replaced the PPI stage-of-processing (SOP) system as PPI's primary aggregation model with the release of data for January 2014. The FD-ID model expands coverage beyond that of the SOP system through the addition of services, construction, exports, and government purchases.

Compared with finished goods under the SOP system, the PPI for final demand goods includes nearly a 50 percent expansion of coverage. This increase can be traced to the addition of government purchases and exports. For overall final demand, expansion to include final demand services represents an even larger increase in coverage. In December 2021, final demand goods were about 33 percent of overall final demand, final demand services were roughly 65.1 percent, and final demand construction was about 1.7 percent of final demand. Within intermediate demand, coverage of services for intermediate demand resulted in about a 45 percent increase in coverage of the intermediate demand portion of the economy.

FD-ID indexes are constructed from commodity-based producer output price indexes. Commodities are allocated to aggregate indexes primarily based on the type of buyer. The main source of data used to determine the type of buyer is the "Use of commodities by industries, before redefinition," table

from the Benchmark Input-Output Accounts of the U.S. In many cases, the same commodity is purchased by different types of buyers. As a result, commodities are often included in several FD-ID indexes. For example, regular gasoline is purchased for personal consumption, export, government use, and business use. The PPI program publishes only one commodity index for regular gasoline (wpu057104), reflecting sales to all types of buyers, and this index is used in all aggregations regardless of whether the gasoline is sold for personal consumption, as an export, to government, or to businesses. Proportions based on BEA "Use of Commodities" data are used to allocate the correct portion of the total weight of gasoline to each use category. In cases when buyer type is an important price determining characteristic, indexes are created based on specific buyer type. For example, within the PPI category for loan services, separate indexes for consumer loans and business loans were constructed. For more information relating to the FD-ID structure, see "A new, experimental system of indexes from the PPI program" in the February 2011 *Monthly Labor Review*.

Final Demand: The final demand portion of the FD-ID structure measures price change for commodities sold for personal consumption, capital investment, government, and export. The system is composed of six main price indexes: final demand goods; final demand trade services; final demand transportation and warehousing services; final demand services less trade, transportation, and warehousing; final demand construction; and overall final demand.

The final demand goods index measures price change for both unprocessed and processed goods sold to final demand. Fresh fruits sold to consumers and computers sold for capital investment are examples of transactions included in the final demand goods price index. The final demand trade services index measures price change for the retailing and wholesaling of merchandise sold to final demand, generally without transformation. (Trade indexes measure changes in margins received by wholesalers and retailers.) The final demand transportation and warehousing services index tracks price change for transportation of passengers, as well as, transportation of cargo sold to final demand, and also includes prices for warehousing and storage of goods sold to final demand. The final demand services less trade, transportation, and warehousing index measures price change for all services other than trade and transportation sold to final demand. Publishing, banking, lodging, and health care are examples of these services. The final demand construction index tracks price change for new construction, as well as maintenance and repair construction sold to final demand. Construction of office buildings is an example of a commodity that would be included in the final demand construction index. Lastly, the overall final demand index tracks price change for all types of commodities sold to final demand by combining the five final demand component indexes described above.

Intermediate Demand: The intermediate demand portion of the FD-ID system tracks price change for goods, services, and construction products sold to businesses as inputs to

production, excluding capital investment. The system includes two parallel treatments of intermediate demand. The first treatment organizes intermediate demand commodities by type. The second organizes intermediate demand commodities into production stages, with the explicit goal of developing a forward-flow model of production and price change.

The intermediate demand by commodity type portion of the system organizes commodities by similarity of product. The system is composed of six main price indexes: unprocessed goods for intermediate demand; processed goods for intermediate demand; intermediate demand trade services; intermediate demand transportation and warehousing services; intermediate demand services less trade, transportation, and warehousing; and intermediate demand construction.

The unprocessed goods for intermediate demand price index measures price change for goods sold to businesses as inputs to production that have undergone no fabrication. Crude petroleum sold to refineries is an example of an unprocessed good sold to intermediate demand. The processed goods for intermediate demand index tracks price change for fabricated goods sold as business inputs. Examples include car parts sold to car manufacturers and gasoline sold to trucking companies. The index for trade services for intermediate demand measures price change for the services of retailing and wholesaling goods purchased by businesses as inputs to production. The intermediate demand transportation and warehousing services index measures price change for business travel, as well as, transportation and warehousing of cargo sold to intermediate demand. The intermediate demand services less trade, transportation, and warehousing index measures price change for services other than trade, transportation, and warehousing sold as inputs to production. Legal and accounting services purchased by businesses are examples of intermediate demand services excluding trade, transportation, and warehousing. Finally, the construction for intermediate demand index measures price change for construction purchased by firms as inputs to production. The index for construction for intermediate demand tracks price change for maintenance and repair construction purchased by firms.

The production flow treatment of intermediate demand is a stage-based system of price indexes. These indexes can be used to study price transmission across stages of production and final demand. This system is constructed in a manner that maximizes forward flow of production between stages, while minimizing back-flow of production. The production flow treatment contains four main indexes: intermediate demand stage 1, intermediate demand stage 2, intermediate demand stage 3, and intermediate demand stage 4.

Indexes for the four stages were developed by first assigning each industry in the economy to one of four stages of production, where industries assigned to the fourth stage primarily produce output consumed as final demand, industries in the third stage primarily produce output consumed by stage 4 industries, industries assigned to the second stage primarily produce output consumed by stage 3 industries, and industries assigned to the first stage produce output primarily consumed by stage 2 industries. The four indexes then track prices for the net inputs consumed by industries in each of the four stages of production. The stage 4

intermediate demand index, for example, tracks price change for inputs consumed, but not produced, by industries included in the fourth stage of production. Hence, the index tracks price change in inputs to industries that primarily produce final demand commodities (stage 4 producers primarily produce commodities sold to final demand).

Examples of heavily weighted goods-producing industries in stage 4 include the manufacture of light trucks and utility vehicles, automobiles, and pharmaceuticals. Retail trade, food service and drinking places, and hospitals are examples of heavily weighted service industries included in stage 4. Stage 4 also includes all new construction industries. Examples of goods consumed by stage 4 industries include motor vehicle parts, commercial electric power, plastic construction products, biological products, and beef and veal. Engineering services, machinery and equipment wholesaling, long distance motor carrying, and legal services constitute examples of services consumed by stage 4 industries.

Examples of highly weighted goods-producing industries included in stage 3 are motor vehicle parts manufacturing, animal (except poultry) slaughtering and processing, and semiconductor manufacturing. Services industries classified in stage 3 include wholesale trade; insurance carriers; architecture, engineering, and related services; and hotels and motels. Examples of goods consumed by stage 3 industries include slaughter steers and heifers, industrial electric power, and hot rolled steel bars, plates, and structural shapes. Services commonly consumed by stage 3 industries include commissions from sales of property and casualty insurance, business loans, temporary help services, and administrative and general management consulting services.

Petroleum refineries; electricity generation, transmission, and distribution; natural gas distribution; cattle ranching and farming; and plastic materials and resin manufacturing are among the goods-based industries assigned to stage 2. Services industries that are heavily weighted in stage 2 include management of companies and enterprises; non-depository credit intermediation; insurance agencies and brokerages; and services to buildings and dwellings. Goods commonly purchased by stage 2 industries include crude oil, natural gas, formula feeds, and primary basic organic chemicals. Services that are heavily weighted in the intermediate demand stage 2 index are legal services, business loans, and cellular phone and other wireless telecommunication.

Goods producing industries in stage 1 include oil and gas extraction, paper mills, and grain farming. Real estate, legal services, and advertising services are examples of highly weighted services industries included in stage 1. Examples of goods consumed by stage 1 industries are commercial and industrial electric power and gasoline. Services commonly consumed by stage 1 industries include solid waste collection, chemicals and allied products wholesaling, and guestroom or unit rental. It should be noted that all inputs purchased by stage 1 industries are by definition produced either within stage 1 or by latter stages of processing, leaving stage 1 less useful for price transmission analysis. For additional information on industry stage assignments, see www.bls.gov/ppi/fd-id/ppi-intermediate-demand-by-production-flow-industry-stage-assignments.htm.

Comparing the PPI with CPI

Although some data users utilize the PPI as a potential indicator of the Consumer Price Index (CPI), there are many reasons why the PPI and the CPI may diverge. The scope of the personal consumption portion of the PPI includes all marketable output sold by domestic producers for households. The scope of the CPI includes goods and services provided by business or government, where explicit user charges are paid by consumers. For example, the most heavily weighted item in the CPI, owners' equivalent rent, is excluded from the PPI. The scope of the CPI includes imports. The PPI excludes imports. The CPI only includes components of personal consumption directly paid for by the consumers, while the PPI includes components of personal consumption that may not be paid for by consumers. For example, the PPI includes medical services paid for by third parties. In contrast to CPI, PPI does not completely cover services. PPIs exclude taxes, since they do not represent producer revenue. Conversely, sales and other taxes paid by consumers are part of household expenditure and are included in the CPI. Additional technical differences between PPI and CPI also exist. For more information see "Comparing new final demand producer price indexes with other Government price indexes," *Monthly Labor Review*, January 2014, at www.bls.gov/opub/mlr/.

Commodity Indexes

The commodity classification of the PPI organizes goods, services, and construction by similarity of product or end use, disregarding industry of origin. With the release of data for July 2009, PPI expanded its commodity structure to include indexes for services and construction products. Prior to this date, the PPI commodity structure only included products from goods producing sectors. Table 9 of the *PPI Detailed Report* includes data for commodity indexes, organized in a hierarchal structure, including major groupings, subgroups, product classes, sub-product classes, and individual items.

Industry Net-Output Price Indexes

PPIs for the net output of industries and their products are grouped according to the North American Industry Classification System (NAICS). Prior to the release of January 2004, industry-based PPIs were published according to the Standard Industrial Classification (SIC) system. Industry price indexes are compatible with other economic time series organized by industry, such as data on employment, wages, and productivity. Table 11 of the *PPI Detailed Report* includes data for NAICS industries and industry groups (3-, 4-, 5-, and 6-digit codes), Census product classes (7- and 8-digit codes), products (9-digit codes), more detailed sub-products (11-digit codes), and, for some industries, indexes for other sources of revenue.

Indexes may represent one of three kinds of product categories. Every industry has primary product indexes that show changes in prices received by establishments classified in the industry for products made primarily, but not necessarily exclusively, by that industry. The industry classification of an establishment is determined by which products make up a plurality of its total shipment value. In

addition, most industries have secondary product indexes that show changes in prices received by establishments for products chiefly made in some other industry. Some industries have miscellaneous receipts indexes that track price changes for other sources of revenue received by establishments within the industry that are not derived from sales of their products; for example, resales of purchased materials, or revenues from parking lots owned by a manufacturing plant.

Data Collection

PPIs are constructed using selling prices reported by establishments of all sizes, selected by probability sampling, with the probability of selection proportionate to size. Individual items and transaction terms also are chosen by probability proportionate to size. BLS strongly encourages cooperating companies to supply actual transaction prices at the time of shipment to minimize the use of list prices. Prices submitted by survey respondents are effective on the Tuesday of the week containing the 13th day of the month. The survey is conducted online via the BLS Internet Data Collection Facility (IDCF). Data provided by survey respondents are supplemented with data from other sources for some areas.

Price data are provided by survey respondents on a voluntary and confidential basis; only sworn BLS employees are allowed access to individual company price reports. BLS publishes price indexes, not actual prices. All PPIs are subject to monthly revisions up to 4 months after original publication to reflect the availability of late reports and corrections by respondents.

BLS periodically updates the PPI sample of survey respondents to better reflect current conditions when the structure, membership, technology, or product mix of an industry shifts significantly and to spread reporting burden among smaller firms. Information on these resampling efforts are noted in the *PPI News Release* and *PPI Detailed Report* in the months they occur.

As part of an ongoing effort to expand coverage to sectors of the economy other than mining and manufacturing, an increasing number of service and construction sector industries have been introduced into the PPI. The following list of industries introduced since the mid-1990s includes the month and year in which an article describing the industry's content appeared in the *PPI Detailed Report*.

Service and construction sector industries introduced into the Producer Price Index, by SIC or NAICS code and the *PPI Detailed Report* that announces their introduction

Weights

Weights for most commodity groupings of the PPI, as well as, weights for commodity-based aggregate indexes calculated from commodity groupings, such as FD-ID indexes, currently reflect 2012 values of shipments as reported in the *Census of Manufactures* and other sources. From January 2012 to December 2017, PPI weights were derived from 2007 shipment values. Industry indexes now are calculated under the 2017 NAICS structure utilizing 2012 value of shipment weights and 2007 net output ratios. The periodic update of the value weights used to calculate the PPI is done to more accurately reflect changes in production and marketing patterns in the economy.

Net output values of shipments are used as weights for industry indexes. Net output values refer to the value of shipments from establishments within the industry to buyers outside the industry. However, weights for commodity indexes are based on gross shipment values, including values of shipments between establishments within the same industry. As a result, broad commodity grouping indexes, such as the PPI for All Commodities (which is composed of major commodity groupings 01 through 15), are affected by the multiple counting of price change at successive stages of processing, which can lead to exaggerated or misleading signals about inflation. The intermediate demand by commodity type FD-ID indexes partially correct for this defect, but industry indexes, final demand FD-ID indexes, and intermediate demand by production flow FD-ID indexes consistently correct for this at all levels of aggregation. Therefore, industry and FD-ID indexes are more appropriate than broad commodity groupings for analysis of general price trends.

Price Index Reference Base

Effective with publication of January 1988 data, many important PPI series (including most commodity groups and individual items) were placed on a new reference base, 1982 = 100. From 1971 through 1987, the standard reference base for most PPI series was 1967 = 100. Except for rounding differences, the shift to the new reference base did not alter any previously published percent changes for affected PPI

series. (See “Calculating Index Changes,” below.) The 1982 reference base is not used for commodity indexes with a base later than December 1981 or for industry net output indexes and their products. The FD-ID indexes typically have a reference base of November 2009 = 100.

For further information on the underlying concepts and methodology of the Producer Price Index, see chapter 14, “Producer Prices,” in the *BLS Handbook of Methods*. This chapter can be downloaded from the BLS Web site at www.bls.gov/opub/hom/homch14.htm.

Calculating Index Changes

Each PPI measures price changes from a reference period that equals 100.0. An increase of 5.5 percent from the reference period in the Final Demand Goods Price Index, for example, is shown as 105.5. This change also can be expressed in dollars, as follows: prices received by domestic producers of a sample of final demand goods have risen from \$100 in November 2009 to \$105.50. Likewise, a current index of 90.0 would indicate that prices received by producers of final demand goods are 10 percent lower than they were in November 2009.

Movements of price indexes from one month to another are usually expressed as percent changes, rather than as changes in index points. Index point changes are affected by the level of the index in relation to its base period, whereas percent changes are not. The following example shows the computation of index point and percent changes.

Index point change

Final Demand Goods Price Index	107.5
Less previous index	104.0
Equals index point change	3.5

Index percent change

Index point change	3.5
Divided by the previous index	104.0
Equals	0.034
Result multiplied by 100	0.034 x 100
Equals percent change	3.4

Seasonally Adjusted and Unadjusted Data

Because price data are used for different purposes by different groups, BLS publishes seasonally adjusted and unadjusted changes each month. Seasonally adjusted data are preferred for analyzing general price trends in the economy because these data eliminate the effect of changes that normally occur at about the same time, and in about the same magnitude, every year—such as price movements resulting from normal weather patterns, regular production and marketing cycles, model changeovers, seasonal discounts, and holidays. For these reasons, seasonally adjusted data more clearly reveal underlying trends. Unadjusted data are of primary interest to users who need information that can be related to actual dollar values of transactions. Individuals requiring this information include marketing specialists, purchasing agents, budget and cost analysts, contract

specialists, and commodity traders. It is the unadjusted data that are generally cited when escalating long-term contracts such as purchasing agreements or real estate leases. For more information, see *Price Adjustment Guide for Contracting Parties*, on the Web at: www.bls.gov/ppi/publications/price-adjustment-guide-for-contracting-parties.htm.

Seasonal adjustment is accomplished using X-13 ARIMA, a software package published by the U.S. Census Bureau. Each year, the seasonal status of most commodity indexes is reevaluated to reflect more recent price behavior. Industry net output indexes are not seasonally adjusted. For time series that exhibit seasonal pricing patterns, new seasonal factors are estimated and applied to the unadjusted data from the prior 5 years. Updated seasonally adjusted indexes replace the most recent 5 years of seasonal data.

Seasonal factors may be applied to series using either a direct or an aggregative method. Generally, commodity indexes are seasonally adjusted using direct seasonal adjustment, which produces a more complete elimination of seasonal movements than does the aggregative method. However, the direct seasonal adjustment process may not yield figures that possess additive consistency. Thus, a seasonally adjusted index for a broad category that is directly adjusted may not be logically consistent with all seasonally adjusted indexes for its components. Seasonal movements for FD-ID indexes are derived indirectly through an aggregative method that combines movements of a wide variety of subproduct class (six-digit) series.

Seasonally adjusted indexes can become problematic when previously stable and predictable price patterns abruptly change. If the new pattern persists, the seasonal adjustment method will eventually reflect it; if the pattern keeps shifting, however, seasonally adjusted data will become chronically troublesome. This problem occurs relatively infrequently for farm and food-related products, but has more often affected manufactured products such as automobiles and steel.

Since January 1988, the PPI has used Intervention Analysis Seasonal Adjustment methods to enhance the calculation of seasonal factors. With this technique, outlier values that may distort the seasonal pattern are removed from the data prior to applying the standard seasonal factor estimation procedure. For example, a possible economic cause for large price movements for petroleum-based products might have been the COVID-19 pandemic. In this case, intervention techniques allowed for better estimates of seasonally adjusted data. On the whole, very few series have required intervention. Out of over 400 seasonally adjusted commodity series, 76 were subject to intervention in 2022.

For more information relating to seasonal adjustment methods, see “PPI and CPI Seasonal Adjustment: an Update” in the July 2010 *Monthly Labor Review*, and “PPI and CPI Seasonal Adjustment During the COVID-19 Pandemic” in the May 2022 *Monthly Labor Review*.

Producer Price Index Data on the Internet

In 1995, the BLS began posting PPI series, news releases, and technical information to the internet. There were more than 9 million instances of PPI data being downloaded from the BLS website during 2021.

Retrieving PPI data from the PPI Web site

PPI data can be obtained online (www.bls.gov/ppi). On this page, under the tab labeled “Featured PPI databases” links provide the following methods of data retrieval:

- **Top Picks** is a form-based application for both Industry Data and Commodity Data that allows the user to quickly obtain PPI time series data by selecting the high-level aggregate and other commonly requested time series, including the All Commodities Index and the FD-ID indexes (for example, Final Demand). Within each list, any one—or all—of the time series shown can be selected. A user can modify the date range and output options after executing the query, using the reformat button above the data output table.
- **One-Screen Data Search and Multi-Screen Data Search** are form-based query applications for both Industry Data and Commodity Data designed for users unfamiliar with the PPI coding structure. These applications guide a user through the PPI classification by listing index titles and do not require knowledge of commodity or industry codes. Data retrieved are based on a query formulated by selecting data characteristics from lists provided. Two options are available to create customized tables, depending on a user’s browser capability. The one-screen option is a JavaScript application that uses a single screen to guide a user through the available time series data. The second option is a multiple-screen, non-Java-based application. Both methods allow a user to browse the PPI coding structure and select multiple series. Users can modify the date range and output options after executing the query using the reformat button above the data output table.
- **Series Report** is a form-based application that allows users to input multiple, formatted PPI time series identifiers (commodity or industry codes) as inputs in extracting data according to a specified set of date ranges and output options. This application provides the most efficient path for users who are familiar with the format of PPI time series identifiers. There are five alphabetic prefixes used to create unique PPI time series identifiers: WP, WD, PC, PD, and ND. Each provides the user access to a different PPI database. Adding either a “u” (not seasonally adjusted) or an “s” (seasonally adjusted) to the end of these prefixes further specifies the type of data needed.

EXAMPLES

For commodity and FD-ID indexes, series identifiers combine a “wpu” prefix (not seasonally adjusted) or a “wps” prefix (seasonally adjusted) with a commodity code.

<u>Commodity code</u>	<u>Provides data for:</u>
wps141101	Passenger cars, seasonally adjusted
wpu141101	Passenger cars, not seasonally adjusted
wpu4	Final demand, not seasonally adjusted
wpsid63	Services for intermediate demand, seasonally adjusted

For discontinued commodity indexes, series identifiers combine a “wdu” prefix (not seasonally adjusted) or a “wds” prefix (seasonally adjusted) with a commodity code.

<u>Commodity code</u>	<u>Provides data for:</u>
wds019	Other farm products, seasonally adjusted
wdu0635	Preparations, ethical (prescription), not seasonally adjusted
wdusi138011	Stainless steel mill products, not seasonally adjusted

Current price indexes grouped by industry according to NAICS have series identifiers that begin with the prefix “pcu.” After the prefix, there are 12 digits (the 6-digit industry code is listed twice) followed by up to 7 alphanumeric characters identifying product detail. Dashes are used as placeholders for higher-level industry group codes.

<u>Industry-product code, current NAICS series</u>	<u>Provides data for:</u>
pcu325---325---	Chemical manufacturing
pcu336110336110	Automobile and light duty motor vehicle manufacturing
pcu621111621111411	Offices of physicians, one- and two-physician practices and single-specialty group practices, general/family practice

Discontinued industry-product codes based on SIC combine a “pdu” prefix and “#” between the fourth and fifth characters of the product code. Series identifiers for the discontinued dataset use underscores as placeholders to complete a reference to an SIC industry group code of fewer than four digits. (All PPI industry-based indexes organized by SIC were discontinued with the introduction of NAICS in 2004.)

<u>Industry-product code, discontinued SIC series</u>	<u>Provides data for:</u>
pdu28_#	Chemicals and allied products
pdu331_#	Blast furnaces, steel works, and rolling and finishing mills
pdu3711#111	Passenger cars

Price indexes for discontinued series grouped by industry according to NAICS have identifiers that begin with the prefix “ndu”. After the prefix, there are 12 numeric digits (the 6-digit industry code is listed twice), and up to 7 additional alphanumeric characters that identify product detail. Dashes are used as placeholders for higher-level group codes.

*Industry-product code,
discontinued NAICS series*

ndu212231212231

Provides data for

Lead and zinc ore mining
Lead, zinc concentrates
Lead concentrates

- **Text Files** are best suited for users requiring access to either a large volume of time series data or other PPI-related documentation, such as seasonal factor tables and relative importance tables. The text files can be accessed at download.bls.gov/ or directly from links on the “PPI Databases” page or the PPI homepage. Data and documentation available for download include the following:

Industry Data	<u>Directory:</u> /pub/time.series/pc
Industry Data - Discontinued (NAICS basis)	/pub/time.series/nd
(SIC basis)	/pub/time.series/pd
Commodity Data (incl. FD-ID)	/pub/time.series/wp
Commodity Data – Discontinued	/pub/time.series/wd
Special requests	/pub/special.requests/ppi

Additional information

The PPI homepage (www.bls.gov/ppi) contains additional information regarding PPI data and methodology. The “PPI Publications” section of the homepage provides PPI news releases, both current and archived, as well as general PPI information. The “PPI Tables” section provides relative importance and seasonal factor tables. The remaining sections offer special notices and publications pertaining to PPI methodology and applications.

For questions or comments regarding PPI data classification, methodology, or data availability on the Internet, call or e-mail the Section of Index Analysis and Public Information at (202) 691-7705 or ppi-info@bls.gov. If you are deaf, hard of hearing, or have a speech disability, please dial 7-1-1 to access telecommunications relay services.

Table 1. Producer price index percentage changes and weights for Final Demand-Intermediate Demand groupings, seasonally adjusted
[October 2022]

Grouping	Commodity code		Relative Importance Dec. 2021 ¹	Unadjusted 12-month percent change ² Oct. 2021 to Oct. 2022 ^P	Seasonally adjusted 1-month percent change ²

¹ Comprehensive relative importance figures are initially computed after the publication of December indexes and are recalculated after final December indexes are available. Individual items and subtotals may not add exactly to totals because of rounding differences.

² All indexes are subject to revision for 4 months after their originally scheduled publication to incorporate late reports and corrections by survey respondents. In addition, seasonally adjusted indexes are subject to change for up to 5 years due to the recalculation of seasonal factors published each January.

³ PPI defines Total finished as including only the personal consumption and private capital investment portions of final demand.

⁴ Trade indexes measure changes in margins received by wholesalers and retailers.

⁵ The PPI definition of foods does not include food and beverages for immediate consumption. PPI defines food and beverages for immediate consumption as the service of preparing meals, snacks, and beverages to customer order for immediate on-premises and off-premises consumption.

⁶ Distributive services include transportation, warehousing, and trade of goods.

⁷ Includes intermediate trade, transportation, and warehousing services.

⁸ Includes crude petroleum.

⁹ Excludes crude petroleum.

p Preliminary

"-" Data not available.

¹ All indexes are subject to revision for 4 months after their originally scheduled publication to incorporate late reports and corrections by survey respondents. In addition, seasonally adjusted indexes are subject to change for up to 5 years due to the recalculation of seasonal factors published each January.

² Seasonal tests did not indicate the presence of seasonality. Data shown is not seasonally adjusted.

³ Trade indexes measure changes in margins received by wholesalers and retailers.

p Preliminary

"-" Data not available.

NOTE: The term "(partial)" denotes incomplete coverage of the index category.

Supplies to nonmanufacturing industries, feeds.....	00/82	ID6	1521	250.071	253.036	257.495	260.776	255.868
Supplies to nonmanufacturing industries, other than feeds.....	00/82	ID6	1522	252.108	252.986	253.430	253.051	252.893
Unprocessed goods								
Unprocessed goods for intermediate demand.....	00/82	ID6	2	361.003	327.692	342.590	339.546	299.986
Unprocessed foodstuffs and feedstuffs.....	00/82	ID6	21	264.029	259.466	254.977	257.837	249.878
Unprocessed nonfood materials.....	00/82	ID6	22	412.115	361.341	388.253	381.502	322.840
Unprocessed nonfood materials except fuel.....	00/82	ID6	221	435.575	385.367	374.484	364.090	358.034
Unprocessed nonfood materials except fuel to manufacturing industries.....	00/82	ID6	2211	409.749	360.580	349.822	339.605	333.642
Unprocessed nonfood materials except fuel to nonmanufacturing industries.....	00/82	ID6	2212	319.111	322.359	325.133	326.601	327.654
Unprocessed fuel.....	00/82	ID6	222	349.342	301.870	375.109	373.567	252.103
Unprocessed fuel to manufacturing industries.....	00/82	ID6	2221	318.336	309.844	329.721	334.211	299.647
Unprocessed fuel to nonmanufacturing industries.....	00/82	ID6	2222	361.201	310.032	388.568	386.620	256.467
Services								
Services for intermediate demand.....		ID6	3	139.362	139.738	140.620	141.162	141.649
Trade services for intermediate demand ⁵		ID6	33	170.657	170.677	169.234	168.859	168.403
Trade services for manufacturing industries.....	12/12	ID6	331	155.414	155.643	154.025	154.218	154.134
Trade services for nonmanufacturing industries.....	12/12	ID6	332	152.335	152.142	151.158	150.290	149.551
Transportation and warehousing services for intermediate demand.....		ID6	32	157.791	159.417	158.969	157.588	158.597
Transportation of passengers for intermediate demand.....		ID6	321	137.908	133.967	134.891	134.438	137.209
Transportation of passengers for manufacturing industries.....		ID6	3211	138.101	134.058	134.998	134.543	137.387
Transportation of passengers for nonmanufacturing industries.....		ID6	3212	137.946	134.018	134.940	134.486	137.249
Transportation and warehousing of goods for intermediate demand.....		ID6	322	159.954	162.182	161.585	160.105	160.922
Transportation and warehousing of goods for manufacturing industries.....	12/12	ID6	3221	136.844	137.778	136.317	136.410	135.171
Transportation and warehousing of goods for nonmanufacturing industries.....	12/12	ID6	3222	141.749	143.992	143.724	142.038	143.296
Services less trade, transportation, and warehousing for intermediate demand.....		ID6	31	127.608	127.870	129.625	130.749	131.409
Services less trade, transportation, and warehousing for manufacturing industries.....		ID6	311	122.736	123.379	123.883	124.062	124.429
Services less trade, transportation, and warehousing for nonmanufacturing industries.....		ID6	312	127.753	128.002	129.800	130.958	131.628
Construction								
Construction for intermediate demand.....		ID6	4	142.077	143.754	143.918	144.417	146.624
Intermediate Demand by Commodity Type Special Groupings								
Processed materials less foods and feeds.....	00/82	ID6	9111	283.543	276.333	271.944	271.957	271.368
Processed foods and feeds.....	00/82	ID6	9112	254.732	255.224	255.075	254.079	252.869
Processed energy goods.....	00/82	ID6	9113	327.897	299.166	285.762	292.126	297.219
Processed materials less energy.....	00/82	ID6	9118	265.833	264.935	263.314	261.623	259.547
Processed materials less foods and energy.....	00/82	ID6	9115	266.678	265.617	263.826	262.057	259.885
Intermediate distributive services ⁶	04/10	ID6	9116	163.667	164.458	163.339	162.585	162.582
Processed goods plus intermediate distributive services.....	04/10	ID6	9117	155.775	153.354	151.443	151.215	150.957
Unprocessed materials less agricultural products.....	00/82	ID6	9211	419.850	367.771	397.520	387.824	324.190
Unprocessed energy materials ⁷	00/82	ID6	9212	362.114	310.496	344.329	336.517	269.743
Unprocessed materials less energy.....	00/82	ID6	9213	326.668	313.734	310.793	312.964	301.002
Unprocessed nonfood materials less energy ⁸	00/82	ID6	9216	513.334	476.160	478.160	477.439	452.176
Intermediate Demand by Production Flow								
Stage 4 Intermediate Demand								
Stage 4 intermediate demand.....		ID5	4	145.809	145.173	145.647	146.116	146.048
Inputs to stage 4 goods producers.....		ID5	41	147.055	146.577	146.157	146.467	145.877
Goods.....		ID5	411	142.164	141.238	141.375	141.456	140.792
Foods.....		ID5	4111	161.159	156.631	157.542	160.559	159.758
Energy.....		ID5	4112	188.688	173.644	167.858	168.285	171.103
Goods excluding foods and energy.....		ID5	4113	138.948	138.686	138.758	138.395	137.721
Services.....		ID5	412	163.533	164.291	162.316	163.268	162.872
Trade services.....		ID5	4123	174.788	175.649	172.956	174.208	173.693
Transportation and warehousing services.....		ID5	4122	141.875	141.847	140.666	140.177	139.581
Transportation of passengers.....		ID5	41221	138.126	134.079	135.019	134.564	137.411
Transportation and warehousing of goods.....		ID5	41222	152.004	152.762	151.087	150.559	149.250
Services less trade, transportation, and warehousing.....		ID5	4121	124.247	124.834	125.397	125.620	125.745
Inputs to stage 4 services producers.....		ID5	42	139.121	138.834	140.334	141.179	141.344

See footnotes at end of table.

Table 3. Producer price indexes for Final Demand-Intermediate Demand groupings, seasonally adjusted — Continued

[October 2022, Index base Nov. 2009=100, unless otherwise indicated]

Grouping	Other index base	Commodity code		Seasonally adjusted index ¹				
		Group code	Item code	June 2022	July 2022 ^p	Aug. 2022 ^p	Sept. 2022 ^p	Oct. 2022 ^p
Goods.....		ID5	421	148.089	147.078	147.226	147.644	147.453
Foods.....		ID5	4211	153.260	155.057	154.354	152.280	149.746
Energy.....		ID5	4212	151.019	146.110	145.623	147.926	148.385
Goods excluding foods and energy.....		ID5	4213	144.477	144.713	145.444	145.586	145.733
Services.....		ID5	422	135.738	135.708	137.697	138.696	138.983
Trade services.....		ID5	4223	156.588	157.669	157.615	158.534	158.188
Transportation and warehousing services.....		ID5	4222	146.790	149.234	148.031	147.509	148.397
Transportation of passengers.....		ID5	42221	137.578	133.579	134.511	134.058	136.871
Transportation and warehousing of goods.....		ID5	42222	148.906	152.543	150.944	150.407	150.943
Services less trade, transportation, and warehousing.....		ID5	4221	131.302	130.876	133.449	134.607	134.917
Construction.....		ID5	423	142.077	143.754	143.918	144.417	146.624
Inputs to stage 4 construction producers.....		ID5	43	167.680	165.264	163.799	163.140	163.415
Goods.....		ID5	431	172.552	169.586	168.457	167.889	168.193
Energy.....		ID5	4312	236.960	202.183	181.776	182.195	190.746
Goods excluding foods and energy.....		ID5	4313	170.284	170.352	171.078	170.399	169.907
Services.....		ID5	432	155.286	154.192	151.931	151.060	151.265
Trade services.....		ID5	4323	177.929	175.193	170.159	168.375	169.440
Transportation and warehousing services.....		ID5	4322	161.811	161.855	158.954	158.022	156.221
Transportation of passengers.....		ID5	43221	143.976	139.768	140.746	140.272	143.232
Transportation and warehousing of goods.....		ID5	43222	163.104	163.262	160.242	159.293	157.356
Services less trade, transportation, and warehousing.....		ID5	4321	126.748	126.985	127.867	127.983	127.985
Stage 3 Intermediate Demand								
Stage 3 intermediate demand.....		ID5	3	157.357	155.177	152.663	152.639	151.854
Inputs to stage 3 goods producers.....		ID5	31	175.173	172.868	169.157	167.987	164.292
Goods.....		ID5	311	174.175	171.463	167.333	166.043	161.481
Foods.....		ID5	3111	199.063	196.806	191.647	192.543	184.474

Total energy goods inputs to stage 4 intermediate demand.....	04/10	ID5	9415	152.342	143.137	139.601	141.377	143.060
Total goods less foods and energy inputs to stage 4 intermediate demand.....	04/10	ID5	9416	146.113	146.033	146.391	146.067	145.612
Total goods inputs to stage 3 intermediate demand.....	04/10	ID5	9311	163.298	158.419	153.397	153.400	151.143
Total services inputs to stage 3 intermediate demand.....	04/10	ID5	9312	140.002	140.654	140.828	140.784	141.543
Total construction inputs to stage 3 intermediate demand.....	04/10	ID5	9313	140.900	142.563	142.726	143.220	145.410
Total foods inputs to stage 3 intermediate demand.....	04/10	ID5	9314	176.834	174.857	170.339	171.147	164.013
Total energy goods inputs to stage 3 intermediate demand.....	04/10	ID5	9315	190.859	171.408	158.189	162.953	167.401
Total goods less foods and energy inputs to stage 3 intermediate demand.....	04/10	ID5	9316	154.542	153.003	150.229	148.434	145.825
Total goods inputs to stage 2 intermediate demand.....	04/10	ID5	9211	160.294	146.758	153.714	151.267	134.790
Total services inputs to stage 2 intermediate demand.....	04/10	ID5	9212	135.986	137.384	139.260	139.881	140.945
Total construction inputs to stage 2 intermediate demand.....	04/10	ID5	9213	140.900	142.563	142.726	143.220	145.410
Total foods inputs to stage 2 intermediate demand.....	04/10	ID5	9214	180.374	171.746	176.870	181.953	173.945
Total energy goods inputs to stage 2 intermediate demand.....	04/10	ID5	9215	158.994	136.266	149.956	146.337	117.862
Total goods less foods and energy inputs to stage 2 intermediate demand.....	04/10	ID5	9216	145.772	143.723	142.333	140.614	138.807
Total goods inputs to stage 1 intermediate demand.....	04/10	ID5	9111	145.628	141.022	138.949	139.572	139.184

See footnotes at end of table.

Table 3. Producer price indexes for Final Demand-Intermediate Demand groupings, seasonally adjusted — Continued

[October 2022, Index base Nov. 2009=100, unless otherwise indicated]

Grouping	Other index base	Commodity code		Seasonally adjusted index ¹				
		Group code	Item code	June 2022	July 2022 ^p	Aug. 2022 ^p	Sept. 2022 ^p	Oct. 2022 ^p
Total services inputs to stage 1 intermediate demand.....	04/10	ID5	9112	141.001	140.315	141.012	141.138	141.577
Total construction inputs to stage 1 intermediate demand.....	04/10	ID5	9117	140.900	142.563	142.726	143.220	145.410
Total foods inputs to stage 1 intermediate demand.....	04/10	ID5	9114	170.960	161.819	164.819	173.036	167.156
Total energy goods inputs to stage 1 intermediate demand.....	04/10	ID5	9115	186.440	168.519	160.751	165.933	170.266
Total goods less foods and energy inputs to stage 1 intermediate demand.....	04/10	ID5	9116	131.692	130.906	129.944	128.883	127.778

¹ All indexes are subject to revision for 4 months after their originally scheduled publication to incorporate late reports and corrections by survey respondents. In addition, seasonally adjusted indexes are subject to change for up to 5 years due to the recalculation of seasonal factors published each January.

² PPI defines Total finished as including only the personal consumption and private capital investment portions of final demand.

³ Trade indexes measure changes in margins received by wholesalers and retailers.

⁴ The PPI definition of foods does not include food and beverages for immediate consumption. PPI defines food and beverages for immediate consumption as the service of preparing meals, snacks, and beverages to customer order for immediate on-premises and off-premises consumption.

⁵ Distributive services include transportation, warehousing, and trade of goods.

⁶ Includes intermediate trade, transportation, and warehousing services.

⁷ Includes crude petroleum.

⁸ Excludes crude petroleum.
