PRODUCER PRICE INDEXES – AUGUST 2025

The Producer Price Index for final demand edged down 0.1 percent in August, seasonally adjusted, the U.S. Bureau of Labor Statistics reported today. Final demand prices advanced 0.7 percent in July and 0.1 percent in June. (See table A.) On an unadjusted basis, the index for final demand rose 2.6 percent for the 12 months ended in August.

The August decrease in the final demand index is attributable to a 0.2-percent decline in prices for final demand services. In contrast, the index for final demand goods inched up 0.1 percent.

Prices for final demand less foods, energy, and trade services rose 0.3 percent in August, the fourth consecutive increase. For the 12 months ended in August, the index for final demand less foods, energy, and trade services moved up 2.8 percent, the largest 12-month advance since climbing 3.5 percent in March 2025.

Chart 1. One-month percent changes in selected PPI final demand price indexes, seasonally adjusted

Chart 2. Twelve-month percent changes in selected PPI final demand price indexes, not seasonally adjusted

Final Demand

Final demand services: The index for final demand services fell 0.2 percent in August, the largest decline since moving down 0.3 percent in April. The August decrease can be traced to a 1.7-percent drop in margins for final demand trade services. (Trade indexes measure changes in margins received by wholesalers and retailers.) Conversely, the indexes for final demand services less trade, transportation, and warehousing and for final demand transportation and warehousing services increased, 0.3 percent and 0.9 percent, respectively.

Product detail: Three quarters of the August decrease in prices for final demand services can be attributed to a 3.9-percent decline in margins for machinery and vehicle wholesaling. The indexes for professional and commercial equipment wholesaling, chemicals and allied products wholesaling, furniture retailing, food and alcohol retailing, and data processing and related services also moved lower. In contrast, prices for portfolio management advanced 2.0 percent. The indexes for truck transportation of freight and for apparel wholesaling also increased. (See table 2.)

Final demand goods: Prices for final demand goods inched up 0.1 percent in August, the fourth consecutive advance. Leading the August increase in the index for final demand goods, prices for final demand goods less foods and energy rose 0.3 percent. The index for final demand foods moved up 0.1 percent. Conversely, prices for final demand energy declined 0.4 percent.

Product detail: A major factor in the August increase in the index for final demand goods was a 2.3-percent advance in prices for tobacco products. The indexes for beef and veal; processed poultry; printed circuit assemblies, boards, modules and modems; and electric power also rose. In contrast, prices for utility natural gas decreased 1.8 percent. The indexes for fresh and dry vegetables, chicken eggs, and copper base scrap also fell.

Intermediate Demand by Commodity Type

Within intermediate demand in August, the index for processed goods rose 0.4 percent, prices for unprocessed goods fell 1.1 percent, and the index for services increased 0.3 percent. (See tables B and C.)

Processed goods for intermediate demand: Prices for processed goods for intermediate demand moved up 0.4 percent in August, the fifth consecutive increase. Over 80 percent of the August advance can be attributed to the index for processed materials less foods and energy, which rose 0.4 percent. Prices for processed foods and feeds moved up 1.0 percent. Conversely, the index for processed energy goods declined 0.1 percent. For the 12 months ended in August, prices for processed goods for intermediate demand moved up 2.6 percent, the largest 12-month rise since increasing 3.9 percent in January 2023.

Product detail: A major factor in the August increase in the index for processed goods for intermediate demand was a 5.5-percent jump in prices for aluminum mill shapes. The indexes for printed circuit assemblies, boards, modules, and modems; diesel fuel; electric power; beef and veal; and fabricated structural metal products also rose. In contrast, prices for utility natural gas decreased 1.8 percent. The indexes for primary basic organic chemicals and for residual fuels also fell.

Unprocessed goods for intermediate demand: Prices for unprocessed goods for intermediate demand declined 1.1 percent in August following a 2.3-percent rise in July. Over three quarters of the broad-based decrease is attributable to the index for unprocessed energy materials, which dropped 2.5 percent. Prices for unprocessed nonfood materials less energy and for unprocessed foodstuffs and feedstuffs also moved lower, 0.5 percent and 0.3 percent, respectively. For the 12 months ended in August, the index for unprocessed goods for intermediate demand rose 3.0 percent, the largest 12-month increase since advancing 6.5 percent in March.

Product detail: Sixty percent of the August decline in prices for unprocessed goods for intermediate demand can be traced to the index for crude petroleum, which fell 2.8 percent. Prices for grains, ungraded chicken eggs, natural gas, raw milk, and copper base scrap also decreased. Conversely, the index for hay, hayseeds, and oilseeds jumped 6.1 percent. Prices for slaughter cattle and for iron and steel also increased.

¹ Some of the figures shown above and elsewhere in this release may differ from those previously reported because data for April through July have been revised to reflect the availability of late reports and corrections by respondents.

Services for intermediate demand: The index for services for intermediate demand advanced 0.3 percent in August following a 0.7-percent rise in July. The August increase was led by prices for services less trade, transportation, and warehousing for intermediate demand, which moved up 0.6 percent. The index for transportation and warehousing services for intermediate demand advanced 0.4 percent. In contrast, margins for trade services for intermediate demand declined 0.5 percent. For the 12 months ended in August, prices for services for intermediate demand increased 2.1 percent, the largest 12-month advance since moving up 2.1 percent in April.

Product detail: Over two-thirds of the August increase in the index for services for intermediate demand is attributable to prices for nonresidential real estate services, which rose 2.1 percent. The indexes for co-employment staffing services, machinery and equipment parts and supplies wholesaling, loan services (partial), portfolio management, and truck transportation of freight also moved higher. Conversely, margins for chemicals and allied products wholesaling fell 3.8 percent. Prices for television advertising times sales and for data processing and related services also decreased.

Table C. Monthly and 12-month percent changes in selected intermediate demand price indexes for services by commodity type, seasonally adjusted

Intermediate Demand by Production Flow

Stage 4 intermediate demand: Prices for stage 4 intermediate demand advanced 0.5 percent in August, the eleventh consecutive increase. In August, the index for total services inputs to stage 4 intermediate demand rose 0.6 percent, and prices for total goods inputs moved up 0.4 percent. (See table D.) Advances in the indexes for nonresidential real estate services; machinery and equipment parts and supplies wholesaling; portfolio management; co-employment staffing services; fabricated structural metal products; and printed circuit assemblies, boards, modules, and modems outweighed declines in the indexes for chemicals and allied products wholesaling, grains, and particleboard and fiberboard. For the 12 months ended in August, prices for stage 4 intermediate demand moved up 3.1 percent, the largest 12-month increase since rising 3.4 percent in March 2023.

Stage 3 intermediate demand: The index for stage 3 intermediate demand increased 0.2 percent in August after advancing 1.1 percent in July. In August, prices for total services inputs to stage 3 intermediate demand rose 0.3 percent, and the index for total goods inputs edged up 0.1 percent. Increasing prices for co-employment staffing services; nonresidential real estate services; slaughter hogs; slaughter cattle; printed circuit assemblies, boards, modules, and modems; and diesel fuel outweighed decreases in the indexes for ungraded chicken eggs, grains, and chemicals and allied products wholesaling. For the 12 months ended in August, prices for stage 3 intermediate demand moved up 2.5 percent, the largest 12-month advance since rising 3.9 percent in January 2023.

Stage 2 intermediate demand: Prices for stage 2 intermediate demand declined 0.2 percent in August, the first decrease since falling 0.7 percent in May. In August, the index for total goods inputs to stage 2 intermediate demand moved down 0.7 percent. In contrast, prices for total services inputs rose 0.1 percent. Declines in the indexes for crude petroleum, gas fuels, broadcast and network advertising time sales, chemicals and allied products wholesaling, primary basic organic chemicals, and copper base scrap outweighed increasing prices for co-employment staffing services, oilseeds, and loan services (partial). For the 12 months ended in August, the index for stage 2 intermediate demand moved up 0.6 percent.

Stage 1 intermediate demand: Prices for stage 1 intermediate demand moved up 0.2 percent in August following a 1.0-percent increase in July. In August, the indexes for total services inputs and for total goods inputs to stage 1 intermediate demand both advanced 0.2 percent. Rising prices for nonresidential real estate services; diesel fuel; portfolio management; agricultural chemicals and chemical products; inedible fats and oils; and printed circuit assemblies, boards, modules, and modems outweighed decreases in the indexes for data processing and related services, chemicals and allied products wholesaling, and grains. For the 12 months ended in August, prices for stage 1 intermediate demand moved up 2.4 percent, the largest 12-month advance since increasing 3.8 percent in February 2023.

The Producer Price Index for September 2025 is scheduled to be released on Thursday, October 16, 2025, at 8:30 a.m. (ET).

Technical Note

Brief Explanation of Producer Price Indexes

The Producer Price Index (PPI) of the Bureau of Labor Statistics (BLS) is a family of indexes that measures the average change over time in prices received (price changes) by producers for domestically produced goods, services, and construction. PPIs measure price change from the perspective of the seller. This contrasts with other measures, such as the Consumer Price Index (CPI). CPIs measure price change from the purchaser's perspective.

More than 10,000 PPIs for individual products and groups of products are released each month. PPIs are available for the products of virtually every industry in the mining and manufacturing sectors. Over time, new PPIs have been introduced for products of industries in the services and construction sectors of the U.S. economy. As of January 2023, the PPI covered 69 percent of services as measured by 2017 Census revenue, and 17 percent of construction.

More than 64,000 price quotations per month are organized into three sets of PPIs: (1) Final demand-Intermediate demand (FD-ID) indexes, (2) commodity indexes, and (3) indexes for the net output of industries and their products. The FD-ID structure organizes products by class of buyer and degree of fabrication as well as by stage of production. The commodity structure organizes products by similarity of end use or product type. The entire output of various industries is sampled to derive price indexes for the net output of industries and their products.

Final Demand–Intermediate Demand Indexes

The PPI FD-ID structure measures price change for goods, services, and construction sold to final demand and to intermediate demand. The FD-ID system replaced the PPI stage-of-processing (SOP) system as PPI's primary aggregation model with the release of data for January 2014. The FD-ID model expands coverage beyond that of the SOP system through the addition of services, construction, exports, and government purchases.

Compared with finished goods under the SOP system, the PPI for final demand goods includes nearly a 50 percent expansion of coverage. This increase can be traced to the addition of government purchases and exports. For overall final demand, expansion to include final demand services represents an even larger increase in coverage. In December 2022, final demand goods were about 30.7 percent of overall final demand, final demand services were roughly 66.6 percent, and final demand construction was about 2.7 percent of final demand. Within intermediate demand, coverage of services for intermediate demand resulted in about a 45 percent increase in coverage of the intermediate demand portion of the economy.

FD-ID indexes are constructed from commodity-based producer output price indexes. Commodities are allocated to aggregate indexes primarily based on the type of buyer. The main source of data used to determine the type of buyer is the "Use of commodities by industries, before redefinition," table

from the Benchmark Input-Output Accounts of the U.S. In many cases, the same commodity is purchased by different types of buyers. As a result, commodities are often included in several FD-ID indexes. For example, regular gasoline is purchased for personal consumption, export, government use, and business use. The PPI program publishes only one commodity index for regular gasoline (wpu057104), reflecting sales to all types of buyers, and this index is used in all aggregations regardless of whether the gasoline is sold for personal consumption, as an export, to government, or to businesses. Proportions based on BEA "Use of Commodities" data are used to allocate the correct portion of the total weight of gasoline to each use category. In cases when buyer type is an important price determining characteristic, indexes are created based on specific buyer type. For example, within the PPI category for loan services, separate indexes for consumer loans and business loans were constructed. For more information relating to the FD-ID structure, see "A new, experimental system of indexes from the PPI program" in the February 2011 *Monthly Labor Review*.

Final Demand: The final demand portion of the FD-ID structure measures price change for commodities sold for personal consumption, capital investment, government, and export. The system is composed of six main price indexes: final demand goods; final demand trade services; final demand transportation and warehousing services; final demand services less trade, transportation, and warehousing; final demand construction; and overall final demand.

The final demand goods index measures price change for both unprocessed and processed goods sold to final demand. Fresh fruits sold to consumers and computers sold for capital investment are examples of transactions included in the final demand goods price index. The final demand trade services index measures price change for the retailing and wholesaling of merchandise sold to final demand, generally without transformation. (Trade indexes measure changes in margins received by wholesalers and retailers.) The final demand transportation and warehousing services index tracks price change for transportation of passengers, as well as, transportation of cargo sold to final demand, and also includes prices for warehousing and storage of goods sold to final demand. The final demand services less trade, transportation, and warehousing index measures price change for all services other than trade and transportation sold to final demand. Publishing, banking, lodging, and health care are examples of these services. The final demand construction index tracks price change for new construction, as well as maintenance and repair construction sold to final demand. Construction of office buildings is an example of a commodity that would be included in the final demand construction index. Lastly, the overall final demand index tracks price change for all types of commodities sold to final demand by combining the five final demand component indexes described above.

Intermediate Demand: The intermediate demand portion of the FD-ID system tracks price change for goods, services, and construction products sold to businesses as inputs to

production, excluding capital investment. The system includes two parallel treatments of intermediate demand. The first treatment organizes intermediate demand commodities by type. The second organizes intermediate demand commodities into production stages, with the explicit goal of developing a forward-flow model of production and price change.

The intermediate demand by commodity type portion of the system organizes commodities by similarity of product. The system is composed of six main price indexes: unprocessed goods for intermediate demand; processed goods for intermediate demand; intermediate demand trade services; intermediate demand transportation and warehousing services; intermediate demand services less trade, transportation, and warehousing; and intermediate demand construction.

The unprocessed goods for intermediate demand price index measures price change for goods sold to businesses as inputs to production that have undergone no fabrication. Crude petroleum sold to refineries is an example of an unprocessed good sold to intermediate demand. The processed goods for intermediate demand index tracks price change for fabricated goods sold as business inputs. Examples include car parts sold to car manufacturers and gasoline sold to trucking companies. The index for trade services for intermediate demand measures price change for the services of retailing and wholesaling goods purchased by businesses as inputs to production. The intermediate demand transportation and warehousing services index measures price change for business travel, as well as, transportation and warehousing of cargo sold to intermediate demand. The intermediate demand services less trade, transportation, and warehousing index measures price change for services other than trade, transportation, and warehousing sold as inputs to production. Legal and accounting services purchased by businesses are examples of intermediate demand services excluding trade, transportation, and warehousing. Finally, the construction for intermediate demand index measures price change for construction purchased by firms as inputs to production. The index for construction for intermediate demand tracks price change for maintenance and repair construction purchased by firms.

The production flow treatment of intermediate demand is a stage-based system of price indexes. These indexes can be used to study price transmission across stages of production and final demand. This system is constructed in a manner that maximizes forward flow of production between stages, while minimizing back-flow of production. The production flow treatment contains four main indexes: intermediate demand stage 1, intermediate demand stage 2, intermediate demand stage 3, and intermediate demand stage 4.

Indexes for the four stages were developed by first assigning each industry in the economy to one of four stages of production, where industries assigned to the fourth stage primarily produce output consumed as final demand, industries in the third stage primarily produce output consumed by stage 4 industries, industries assigned to the second stage primarily produce output consumed by stage 3 industries, and industries assigned to the first stage produce output primarily consumed by stage 2 industries. The four indexes then track prices for the net inputs consumed by industries in each of the four stages of production. The stage 4

intermediate demand index, for example, tracks price change for inputs consumed, but not produced, by industries included in the fourth stage of production. Hence, the index tracks price change in inputs to industries that primarily produce final demand commodities (stage 4 producers primarily produce commodities sold to final demand).

Examples of heavily weighted goods-producing industries in stage 4 include the manufacture of light trucks and utility vehicles, automobiles, and pharmaceuticals. Retail trade, food service and drinking places, and hospitals are examples of heavily weighted service industries included in stage 4. Stage 4 also includes all new construction industries. Examples of goods consumed by stage 4 industries include motor vehicle parts, commercial electric power, plastic construction products, biological products, and beef and veal. Engineering services, machinery and equipment wholesaling, long distance motor carrying, and legal services constitute examples of services consumed by stage 4 industries.

Examples of highly weighted goods-producing industries included in stage 3 are motor vehicle parts manufacturing, animal (except poultry) slaughtering and processing, and semiconductor manufacturing. Services industries classified in stage 3 include wholesale trade; insurance carriers; architecture, engineering, and related services; and hotels and motels. Examples of goods consumed by stage 3 industries include slaughter steers and heifers, industrial electric power, and hot rolled steel bars, plates, and structural shapes. Services commonly consumed by stage 3 industries include commissions from sales of property and casualty insurance, business loans, temporary help services, and administrative and general management consulting services.

Petroleum refineries; electricity generation, transmission, and distribution; natural gas distribution; cattle ranching and farming; and plastic materials and resin manufacturing are among the goods-based industries assigned to stage 2. Services industries that are heavily weighted in stage 2 include management of companies and enterprises; non-depository credit intermediation; insurance agencies and brokerages; and services to buildings and dwellings. Goods commonly purchased by stage 2 industries include crude oil, natural gas, formula feeds, and primary basic organic chemicals. Services that are heavily weighted in the intermediate demand stage 2 index are legal services, business loans, and cellular phone and other wireless telecommunication.

Goods producing industries in stage 1 include oil and gas extraction, paper mills, and grain farming. Real estate, legal services, and advertising services are examples of highly weighted services industries included in stage 1. Examples of goods consumed by stage 1 industries are commercial and industrial electric power and gasoline. Services commonly consumed by stage 1 industries include solid waste collection, chemicals and allied products wholesaling, and guestroom or unit rental. It should be noted that all inputs purchased by stage 1 industries are by definition produced either within stage 1 or by latter stages of processing, leaving stage 1 less useful for price transmission analysis. For additional information on industry stage assignments, see www.bls.gov/ppi/fd-id/ppi-intermediate-demand-by-production-flow-industry-stage-assignments.htm.

Comparing the PPI with CPI

Although some data users utilize the PPI as a potential indicator of the Consumer Price Index (CPI), there are many reasons why the PPI and the CPI may diverge. The scope of the personal consumption portion of the PPI includes all marketable output sold by domestic producers for households. The scope of the CPI includes goods and services provided by business or government, where explicit user charges are paid by consumers. For example, the most heavily weighted item in the CPI, owners' equivalent rent, is excluded from the PPI. The scope of the CPI includes imports. The PPI excludes imports. The CPI only includes components of personal consumption directly paid for by the consumers, while the PPI includes components of personal consumption that may not be paid for by consumers. For example, the PPI includes medical services paid for by third parties. In contrast to CPI, PPI does not completely cover services. PPIs exclude taxes, since they do not represent producer revenue. Conversely, sales and other taxes paid by consumers are part of household expenditure and are included in the CPI. Additional technical differences between PPI and CPI also exist. For more information see "Comparing new final demand producer price indexes with other Government price indexes," *Monthly Labor Review*, January 2014, at www.bls.gov/opub/mlr/.

Commodity Indexes

The commodity classification of the PPI organizes goods, services, and construction by similarity of product or end use, disregarding industry of origin. With the release of data for July 2009, PPI expanded its commodity structure to include indexes for services and construction products. Prior to this date, the PPI commodity structure only included products from goods producing sectors. Table 9 of the *PPI Detailed Report* includes data for commodity indexes, organized in a hierarchal structure, including major groupings, subgroups, product classes, sub-product classes, and individual items.

Industry Net-Output Price Indexes

PPIs for the net output of industries and their products are grouped according to the North American Industry Classification System (NAICS). Prior to the release of January 2004, industry-based PPIs were published according to the Standard Industrial Classification (SIC) system. Industry price indexes are compatible with other economic time series organized by industry, such as data on employment, wages, and productivity. Table 11 of the *PPI Detailed Report* includes data for NAICS industries and industry groups (3-, 4-, 5-, and 6-digit codes), Census product classes (7- and 8-digit codes), products (9-digit codes), more detailed sub-products (11-digit codes), and, for some industries, indexes for other sources of revenue.

Indexes may represent one of three kinds of product categories. Every industry has primary product indexes that show changes in prices received by establishments classified in the industry for products made primarily, but not necessarily exclusively, by that industry. The industry classification of an establishment is determined by which products make up a plurality of its total shipment value. In

addition, most industries have secondary product indexes that show changes in prices received by establishments for products chiefly made in some other industry. Some industries have miscellaneous receipts indexes that track price changes for other sources of revenue received by establishments within the industry that are not derived from sales of their products; for example, resales of purchased materials, or revenues from parking lots owned by a manufacturing plant.

Data Collection

PPIs are constructed using selling prices reported by establishments of all sizes, selected by probability sampling, with the probability of selection proportionate to size. Individual items and transaction terms also are chosen by probability proportionate to size. BLS strongly encourages cooperating companies to supply actual transaction prices at the time of shipment to minimize the use of list prices. Prices submitted by survey respondents are effective on the Tuesday of the week containing the 13th day of the month. The survey is conducted online via the BLS Internet Data Collection Facility (IDCF). Data provided by survey respondents are supplemented with data from other sources for some areas.

Price data are provided by survey respondents on a voluntary and confidential basis; only sworn BLS employees are allowed access to individual company price reports. BLS publishes price indexes, not actual prices. All PPIs are subject to monthly revisions up to 4 months after original publication to reflect the availability of late reports and corrections by respondents.

BLS periodically updates the PPI sample of survey respondents to better reflect current conditions when the structure, membership, technology, or product mix of an industry shifts significantly and to spread reporting burden among smaller firms. Information on these resampling efforts are noted in the *PPI News Release* and *PPI Detailed Report* in the months they occur.

As part of an ongoing effort to expand coverage to sectors of the economy other than mining and manufacturing, an increasing number of service and construction sector industries have been introduced into the PPI. The following list of industries introduced since the mid-1990s includes the month and year in which an article describing the industry's content appeared in the *PPI Detailed Report*.

Service and construction sector industries introduced into the Producer Price Index, by SIC or NAICS code at their date of introduction and the *PPI Detailed Report* issue that announces their introduction

Weights

Weights for most commodity groupings of the PPI, as well as, weights for commodity-based aggregate indexes calculated from commodity groupings, such as FD-ID indexes, currently reflect 2017 values of shipments as reported in the *Census of Manufactures* and other sources. From January 2018 to December 2022, PPI weights were derived from 2012 shipment values. Industry indexes now are calculated under the 2022 NAICS structure utilizing 2017 value of shipment weights and 2012 net output ratios. The periodic update of the value weights used to calculate the PPI is done to more accurately reflect changes in production and marketing patterns in the economy.

Net output values of shipments are used as weights for industry indexes. Net output values refer to the value of shipments from establishments within the industry to buyers outside the industry. However, weights for commodity indexes are based on gross shipment values, including values of shipments between establishments within the same industry. As a result, broad commodity grouping indexes, such as the PPI for All Commodities (which is composed of major commodity groupings 01 through 15), are affected by the multiple counting of price change at successive stages of processing, which can lead to exaggerated or misleading signals about inflation. The intermediate demand by commodity type FD-ID indexes partially correct for this defect, but industry indexes, final demand FD-ID indexes, and intermediate demand by production flow FD-ID indexes consistently correct for this at all levels of aggregation. Therefore, industry and FD-ID indexes are more appropriate than broad commodity groupings for analysis of general price trends.

Price Index Reference Base

Effective with publication of January 1988 data, many important PPI series (including most commodity groups and individual items) were placed on a new reference base, 1982 = 100. From 1971 through 1987, the standard reference base for most PPI series was 1967 = 100. Except for rounding differences, the shift to the new reference base did not alter any previously published percent changes for affected PPI series. (See “Calculating Index Changes,” below.) The 1982

reference base is not used for commodity indexes with a base later than December 1981 or for industry net output indexes and their products. The FD-ID indexes typically have a reference base of November 2009 = 100.

For further information on the underlying concepts and methodology of the Producer Price Index, see chapter 14, “Producer Prices,” in the *BLS Handbook of Methods*. This chapter can be downloaded from the BLS Web site at www.bls.gov/opub/hom/homch14.htm.

Calculating Index Changes

Each PPI measures price changes from a reference period that equals 100.0. An increase of 5.5 percent from the reference period in the Final Demand Goods Price Index, for example, is shown as 105.5. This change also can be expressed in dollars, as follows: prices received by domestic producers of a sample of final demand goods have risen from \$100 in November 2009 to \$105.50. Likewise, a current index of 90.0 would indicate that prices received by producers of final demand goods are 10 percent lower than they were in November 2009.

Movements of price indexes from one month to another are usually expressed as percent changes, rather than as changes in index points. Index point changes are affected by the level of the index in relation to its base period, whereas percent changes are not. The following example shows the computation of index point and percent changes.

Index point change

Final Demand Goods Price Index	107.5
Less previous index	104.0
Equals index point change	3.5

Index percent change

Index point change	3.5
Divided by the previous index	104.0
Equals	0.034
Result multiplied by 100	0.034×100
Equals percent change	3.4

Seasonally Adjusted and Unadjusted Data

Because price data are used for different purposes by different groups, BLS publishes seasonally adjusted and unadjusted changes each month. Seasonally adjusted data are preferred for analyzing general price trends in the economy because these data eliminate the effect of changes that normally occur at about the same time, and in about the same magnitude, every year—such as price movements resulting from normal weather patterns, regular production and marketing cycles, model changeovers, seasonal discounts, and holidays. For these reasons, seasonally adjusted data more clearly reveal underlying trends. Unadjusted data are of primary interest to users who need information that can be related to actual dollar values of transactions. Individuals requiring this information include marketing specialists, purchasing agents, budget and cost analysts, contract specialists, and commodity traders. It is the unadjusted data

that are generally cited when escalating long-term contracts such as purchasing agreements or real estate leases. For more information, see *Price Adjustment Guide for Contracting Parties*, on the Web at: www.bls.gov/ppi/publications/price-adjustment-guide-for-contracting-parties.htm.

Seasonal adjustment is accomplished using X-13 ARIMA, a software package published by the U.S. Census Bureau. Each year, the seasonal status of most commodity indexes is reevaluated to reflect more recent price behavior. Industry net output indexes are not seasonally adjusted. For time series that exhibit seasonal pricing patterns, new seasonal factors are estimated and applied to the unadjusted data from the prior 5 years. Updated seasonally adjusted indexes replace the most recent 5 years of seasonal data.

Seasonal factors may be applied to series using either a direct or an aggregative method. Generally, commodity indexes are seasonally adjusted using direct seasonal adjustment, which produces a more complete elimination of seasonal movements than does the aggregative method. However, the direct seasonal adjustment process may not yield figures that possess additive consistency. Thus, a seasonally adjusted index for a broad category that is directly adjusted may not be logically consistent with all seasonally adjusted indexes for its components. Seasonal movements for FD-ID indexes are derived indirectly through an aggregative method that combines movements of a wide variety of subproduct class (six-digit) series.

Seasonally adjusted indexes can become problematic when previously stable and predictable price patterns abruptly change. If the new pattern persists, the seasonal adjustment method will eventually reflect it; if the pattern keeps shifting, however, seasonally adjusted data will become chronically troublesome. This problem occurs relatively infrequently for farm and food-related products, but has more often affected manufactured products such as automobiles and steel.

Since January 1988, the PPI has used Intervention Analysis Seasonal Adjustment methods to enhance the calculation of seasonal factors. With this technique, outlier values that may distort the seasonal pattern are removed from the data prior to applying the standard seasonal factor estimation procedure. For example, a possible economic cause for large price movements for petroleum-based products might have been the COVID-19 pandemic. In this case, intervention techniques allowed for better estimates of seasonally adjusted data. On the whole, very few series have required intervention. Out of over 400 seasonally adjusted commodity series, 69 were subject to intervention in 2023.

For more information relating to seasonal adjustment methods, see “PPI and CPI Seasonal Adjustment: an Update” in the July 2010 *Monthly Labor Review*, and “PPI and CPI Seasonal Adjustment During the COVID-19 Pandemic” in the May 2022 *Monthly Labor Review*.

Producer Price Index Data on the Internet

In 1995, the BLS began posting PPI series, news releases, and technical information to the internet. There were more than 13 million instances of PPI data being downloaded from the BLS website during 2022.

Retrieving PPI data from the PPI Web site

PPI data can be obtained online (www.bls.gov/ppi). On this page, under the tab labeled “Featured PPI databases” links provide the following methods of data retrieval:

- **Top Picks** is a form-based application for both Industry Data and Commodity Data that allows the user to quickly obtain PPI time series data by selecting the high-level aggregate and other commonly requested time series, including the All Commodities Index and the FD-ID indexes (for example, Final Demand). Within each list, any one—or all—of the time series shown can be selected. A user can modify the date range and output options after executing the query, using the reformat button above the data output table.
- **One-Screen Data Search and Multi-Screen Data Search** are form-based query applications for both Industry Data and Commodity Data designed for users unfamiliar with the PPI coding structure. These applications guide a user through the PPI classification by listing index titles and do not require knowledge of commodity or industry codes. Data retrieved are based on a query formulated by selecting data characteristics from lists provided. Two options are available to create customized tables, depending on a user’s browser capability. The one-screen option is a JavaScript application that uses a single screen to guide a user through the available time series data. The second option is a multiple-screen, non-Java-based application. Both methods allow a user to browse the PPI coding structure and select multiple series. Users can modify the date range and output options after executing the query using the reformat button above the data output table.
- **Series Report** is a form-based application that allows users to input multiple, formatted PPI time series identifiers (commodity or industry codes) as inputs in extracting data according to a specified set of date ranges and output options. This application provides the most efficient path for users who are familiar with the format of PPI time series identifiers. There are five alphabetic prefixes used to create unique PPI time series identifiers: WP, WD, PC, PD, and ND. Each provides the user access to a different PPI database. Adding either a “u” (not seasonally adjusted) or an “s” (seasonally adjusted) to the end of these prefixes further specifies the type of data needed.

EXAMPLES

For commodity and FD-ID indexes, series identifiers combine a “wpu” prefix (not seasonally adjusted) or a “wps” prefix (seasonally adjusted) with a commodity code.

<u>Commodity code</u>	<u>Provides data for:</u>
wps141101	Passenger cars, seasonally adjusted
wpu141101	Passenger cars, not seasonally adjusted
wpufd4	Final demand, not seasonally adjusted
wpsid63	Services for intermediate demand, seasonally adjusted

For discontinued commodity indexes, series identifiers combine a “wdu” prefix (not seasonally adjusted) or a “wds” prefix (seasonally adjusted) with a commodity code.

<u>Commodity code</u>	<u>Provides data for:</u>
wds019	Other farm products, seasonally adjusted
wdu0635	Preparations, ethical (prescription), not seasonally adjusted
wdusi138011	Stainless steel mill products, not seasonally adjusted

Current price indexes grouped by industry according to NAICS have series identifiers that begin with the prefix “pcu.” After the prefix, there are 12 digits (the 6-digit industry code is listed twice) followed by up to 7 alphanumeric characters identifying product detail. Dashes are used as placeholders for higher-level industry group codes.

<u>Industry-product code, current NAICS series</u>	<u>Provides data for:</u>
pcu325---325---	Chemical manufacturing
pcu336110336110	Automobile and light duty motor vehicle manufacturing
pcu621111621111411	Offices of physicians, one- and two-physician practices and single-specialty group practices, general/family practice

Discontinued industry-product codes based on SIC combine a “pdu” prefix and “#” between the fourth and fifth characters of the product code. Series identifiers for the discontinued dataset use underscores as placeholders to complete a reference to an SIC industry group code of fewer than four digits. (All PPI industry-based indexes organized by SIC were discontinued with the introduction of NAICS in 2004.)

<u>Industry-product code, discontinued SIC series</u>	<u>Provides data for:</u>
pdu28_#	Chemicals and allied products
pdu331_#	Blast furnaces, steel works, and rolling and finishing mills
pdu3711#111	Passenger cars

Price indexes for discontinued series grouped by industry according to NAICS have identifiers that begin with the prefix “ndu”. After the prefix, there are 12 numeric digits (the 6-digit industry code is listed twice), and up to 7 additional alphanumeric characters that identify product detail. Dashes are used as placeholders for higher-level group codes.

*Industry-product code,
discontinued NAICS series*

ndu212231212231
ndu2122312122312
ndu212231212231214

Provides data for

Lead and zinc ore mining
Lead, zinc concentrates
Lead concentrates

- **Text Files** are best suited for users requiring access to either a large volume of time series data or other PPI-related documentation, such as seasonal factor tables and relative importance tables. The text files can be accessed at **download.bls.gov/** or directly from links on the “PPI Databases” page or the PPI homepage. Data and documentation available for download include the following:

Industry Data	<u>Directory:</u> /pub/time.series/pc
Industry Data - Discontinued (NAICS basis)	/pub/time.series/nd
(SIC basis)	/pub/time.series/pd
Commodity Data (incl. FD-ID)	/pub/time.series/wp
Commodity Data – Discontinued	/pub/time.series/wd
Special requests	/pub/special.requests/ppi

Additional information

The PPI homepage (www.bls.gov/ppi) contains additional information regarding PPI data and methodology. The “PPI Publications” section of the homepage provides PPI news releases, both current and archived, as well as general PPI information. The “PPI Tables” section provides relative importance and seasonal factor tables. The remaining sections offer special notices and publications pertaining to PPI methodology and applications.

For questions or comments regarding PPI data classification, methodology, or data availability on the Internet, call or e-mail the Section of Index Analysis and Public Information at (202) 691-7705 or ppi-info@bls.gov. If you are deaf, hard of hearing, or have a speech disability, please dial 7-1-1 to access telecommunications relay services.

¹ Comprehensive relative importance figures are initially computed after the publication of December indexes and are recalculated after final December indexes are available. Individual items and subtotals may not add exactly to totals because of rounding differences.

² All indexes are subject to revision for 4 months after their originally scheduled publication to incorporate late reports and corrections by survey respondents. In addition, seasonally adjusted indexes are subject to change for up to 5 years due to the recalculation of seasonal factors published each January.

³ PPI defines Total finished as including only the personal consumption and private capital investment portions of final demand.

⁴ Trade indexes measure changes in margins received by wholesalers and retailers.

⁵ The PPI definition of foods does not include food and beverages for immediate consumption. PPI defines food and beverages for immediate consumption as the service of preparing meals, snacks, and beverages to customer order for immediate on-premises and off-premises consumption.

⁶ Distributive services include transportation, warehousing, and trade of goods.

⁷ Includes intermediate trade, transportation, and warehousing services.

⁸ Includes crude petroleum.

⁹ Excludes crude petroleum.

p Preliminary

"-" Data not available.

¹ All indexes are subject to revision for 4 months after their originally scheduled publication to incorporate late reports and corrections by survey respondents. In addition, seasonally adjusted indexes are subject to change for up to 5 years due to the recalculation of seasonal factors published each January.

² Seasonal tests did not indicate the presence of seasonality. Data shown is not seasonally adjusted.

³ Trade indexes measure changes in margins received by wholesalers and retailers.

p Preliminary

"-" Data not available.

NOTE: The term "(partial)" denotes incomplete coverage of the index category.

Transportation of passengers for export.....		FD	42213	137.178	136.296	132.910	134.372	135.678
Transportation and warehousing of goods for final demand.....		FD	4222	156.774	157.137	156.825	158.041	159.532
Transportation and warehousing of finished goods ²		FD	42221	154.128	154.499	154.036	155.316	156.861
Transportation and warehousing of personal consumption goods.....		FD	422211	154.939	155.320	154.886	156.263	157.788
Transportation and warehousing of private capital equipment.....		FD	422212	150.838	151.167	150.581	151.467	153.092
Transportation and warehousing of government purchased goods.....		FD	42222	156.648	156.719	156.171	157.521	158.746
Transportation and warehousing of exports.....		FD	42223	164.082	164.493	164.581	165.627	167.060
Final demand services less trade, transportation, and warehousing.....		FD	421	142.702	142.826	142.923	143.785	144.201
Finished services less trade, transportation, and warehousing ²		FD	4211	142.951	143.054	143.154	143.914	144.292
Finished consumer services less trade, transportation, and warehousing.....		FD	42111	142.619	142.713	142.834	143.600	143.951
Private capital investment services less trade, transportation, and warehousing.....		FD	42112	146.734	146.905	146.839	147.564	148.145
Government purchased services less trade, transportation, and warehousing.....		FD	4212	132.903	133.677	133.837	135.241	135.622
Gov. purchased services less trade, transportation, and warehousing, excl. capital investment.....		FD	42121	133.734	134.560	134.766	136.172	136.521
Government purchased capital investment services less trade, transportation, and warehousing.....		FD	42122	114.621	114.621	114.131	115.437	116.245
Services for export less trade, transportation, and warehousing.....		FD	4213	151.202	150.864	150.853	152.566	153.594
Final demand construction.....		FD	43	177.337	177.646	177.849	178.864	178.691
Construction for private capital investment.....		FD	431	180.781	181.131	181.384	182.430	182.211
Construction for government.....		FD	432	171.123	171.345	171.443	172.401	172.322
Final Demand Special Groupings								
Final demand less exports.....	04/10	FD	49101	145.454	146.047	146.129	147.073	146.827
Final demand less government.....	04/10	FD	49102	145.727	146.285	146.355	147.307	147.114
Final demand less foods and energy ⁴	04/10	FD	49104	146.426	147.062	147.042	148.005	147.829
Final demand less foods ⁴	04/10	FD	49106	145.026	145.587	145.655	146.614	146.417
Final demand less energy.....	04/10	FD	49107	146.711	147.312	147.303	148.335	148.176
Final demand less trade services.....	01/10	FD	49108	143.658	143.783	143.959	144.865	145.248

See footnotes at end of table.

Table 3. Producer price indexes for Final Demand-Intermediate Demand groupings, seasonally adjusted — Continued

[August 2025, Index base Nov. 2009=100, unless otherwise indicated]

Grouping	Other index base	Commodity code		Seasonally adjusted index ¹				
		Group code	Item code	Apr. 2025	May 2025 ^p	June 2025 ^p	July 2025 ^p	Aug. 2025 ^p
Final demand less distributive services ⁵	01/10	FD	49109	143.267	143.382	143.579	144.472	144.809
Final demand goods less energy.....	01/10	FD	49111	146.862	147.157	147.435	148.352	148.747
Final demand goods less foods.....	04/10	FD	49112	139.671	139.822	140.383	141.025	141.258
Final demand services less trade services.....	04/10	FD	49113	142.311	142.423	142.401	143.295	143.804
Final demand distributive services ⁵	04/10	FD	49114	154.351	156.400	156.027	157.529	155.458
Final demand goods plus final demand distributive services ⁵	04/10	FD	49115	146.839	147.766	147.899	149.050	148.327
Final demand less foods, energy, and trade services ⁴	08/13	FD	49116	135.251	135.425	135.494	136.254	136.702
Private and government purchased capital equipment.....	08/13	FD	49117	134.708	135.130	135.578	135.927	136.193
Private and government purchased capital investment services.....	08/13	FD	49118	139.745	141.444	141.150	142.916	141.399
Total private and government purchased capital investment.....	08/13	FD	49119	140.080	141.117	141.160	142.284	141.614
Total finished ²	01/10	FD	49201	146.603	147.235	147.313	148.171	147.900
Total finished less foods and energy ^{2, 4}	01/10	FD	49203	147.127	147.805	147.774	148.616	148.361
Total finished less foods ^{2, 4}	01/10	FD	49205	146.005	146.671	146.746	147.512	147.248
Total finished less energy ²	01/10	FD	49206	147.712	148.351	148.330	149.266	149.002
Finished goods ²	00/82	FD	49207	259.518	260.199	261.384	262.512	262.650
Finished goods less energy ²	00/82	FD	49208	263.296	263.895	264.512	266.169	266.563
Finished goods, excluding foods ^{2, 4}	00/82	FD	49209	253.246	254.111	255.534	255.767	256.130
Finished services ²	01/10	FD	49210	145.957	146.679	146.553	147.483	147.085
Private capital investment services.....	04/10	FD	49211	150.221	151.946	151.626	153.429	151.913
Finished distributive services ^{2, 5}	04/10	FD	49212	151.974	154.085	153.638	154.896	152.771
Finished services less trade services ²	04/10	FD	49213	142.260	142.356	142.353	143.149	143.603
Finished services less distributive services ^{2, 5}	04/10	FD	49214	141.889	141.970	141.993	142.763	143.158
Total private capital investment (goods, services, and construction).....	04/10	FD	49215	148.354	149.471	149.506	150.692	149.986
Finished goods plus finished distributive services ²	04/10	FD	49216	148.183	149.397	149.525	150.455	149.482
Total exports.....	04/10	FD	49301	144.360	144.504	144.527	146.053	146.307
Goods for export.....	00/82	FD	49302	235.066	234.859	235.117	237.043	237.993
Services for export.....	04/10	FD	49303	159.171	159.686	159.533	161.672	161.513
Total government purchases.....	04/10	FD	49401	141.421	141.670	141.788	143.616	143.599
Government purchased goods.....	00/82	FD	49402	233.498	232.261	232.747	236.237	236.651
Government purchased services.....	04/10	FD	49403	141.178	142.242	142.224	144.033	143.806
Total government purchased capital investment (goods, services, construction).....	08/13	FD	49404	138.289	139.191	139.298	140.442	139.759
Government purchases, defense.....	05/15	FD	49405	127.295	127.349	127.437	129.468	129.292
Government purchases, non-defense.....	05/15	FD	49406	135.916	136.230	136.350	137.953	138.014
Personal consumption.....	01/10	FD	49501	146.119	146.638	146.726	147.508	147.333
Personal consumption goods (finished consumer goods).....	00/82	FD	49502	274.896	275.550	276.914	278.279	278.273
Personal consumption goods less energy.....	00/82	FD	49503	283.885	284.381	284.883	287.190	287.531
Personal consumption goods less foods.....	00/82	FD	49504	270.449	271.385	273.209	273.224	273.520
Personal consumption nondurable goods less foods.....	00/82	FD	49508	302.824	303.775	306.129	305.904	306.101
Personal consumption services.....	04/10	FD	49505	144.753	145.317	145.222	146.013	145.790
Personal consumption less trade services.....	04/10	FD	49506	143.429	143.586	143.797	144.581	144.889
Personal consumption less distributive services ⁵	04/10	FD	49507	143.254	143.404	143.637	144.402	144.668
Personal consumption less foods and energy.....	04/14	FD	49510	135.413	135.930	135.884	136.576	136.446
Personal consumption less foods, energy, and trade services ³	04/14	FD	49511	133.266	133.991	133.444	134.134	134.554
Personal consumption less foods, energy, and distributive services ⁵	04/14	FD	49512	133.437	133.553	133.626	134.294	134.673
Personal consumption goods plus personal consumption distributive services ⁵	08/13	FD	49509	135.511	136.473	136.612	137.314	136.550
Intermediate Demand by Commodity Type								
Processed goods								
Processed goods for intermediate demand.....	00/82	ID6	1	258.794	259.016	259.170	260.972	261.972
Materials and components for manufacturing.....	00/82	ID6	11	239.437	241.064	240.184	241.442	242.693
Materials for manufacturing.....		ID6	111	148.071	149.418	148.388	149.314	150.164
Materials for food manufacturing.....	00/82	ID6	1111	269.786	271.987	270.309	269.054	271.086
Materials for nondurable manufacturing.....	00/82	ID6	1112	264.303	263.450	263.964	265.383	266.148
Materials for durable manufacturing.....	00/82	ID6	1113	287.278	293.940	289.004	292.462	294.791
Components for manufacturing.....	00/82	ID6	112	194.135	194.736	195.047	195.753	196.608
Components for nondurable manufacturing.....		ID6	1121	149.299	149.360	149.494	149.929	150.453
Components for durable manufacturing.....		ID6	1122	137.090	137.533	137.757	138.261	138.871
Materials and components for construction.....	00/82	ID6	12	360.433	362.080	363.149	363.481	364.451
Materials for construction.....		ID6	121	171.231	171.453	171.299	171.303	171.399
Components for construction.....		ID6	122	183.384	184.697	185.804	186.104	186.907
Processed fuels and lubricants for intermediate demand.....	00/82	ID6	13	231.714	227.117	228.935	233.763	233.565
Processed fuels and lubricants to manufacturing industries.....	00/82	ID6	131	246.024	241.785	241.803	250.271	250.361
Processed fuels and lubricants to nonmanufacturing industries.....	00/82	ID6	132	227.457	222.741	225.127	228.799	228.509
Containers for intermediate demand.....	00/82	ID6	14	318.396	321.345	321.864	323.411	324.792
Supplies for intermediate demand.....	00/82	ID6	15	256.942	257.681	258.090	258.742	260.139
Supplies to manufacturing industries.....	00/82	ID6	151	256.780	256.353	256.542	258.289	261.452
Supplies to nonmanufacturing industries.....	00/82	ID6	152	254.927	255.841	256.282	256.757	257.869
Supplies to nonmanufacturing industries, feeds.....	00/82	ID6	1521	214.132	214.519	214.081	212.968	215.327

Table 3. Producer price indexes for Final Demand-Intermediate Demand groupings, seasonally adjusted — Continued

[August 2025, Index base Nov. 2009=100, unless otherwise indicated]

Grouping	Other index base	Commodity code		Seasonally adjusted index ¹				
		Group code	Item code	Apr. 2025	May 2025 ^p	June 2025 ^p	July 2025 ^p	Aug. 2025 ^p
Supplies to nonmanufacturing industries, other than feeds.	00/82	ID6	1522	262.279	263.269	263.827	264.513	265.471
Unprocessed goods								
Unprocessed goods for intermediate demand.	00/82	ID6	2	246.839	242.549	248.145	253.749	250.836
Unprocessed foodstuffs and feedstuffs.	00/82	ID6	21	223.952	226.727	228.367	234.973	234.275
Unprocessed nonfood materials.	00/82	ID6	22	252.724	243.464	251.529	256.189	251.839
Unprocessed nonfood materials except fuel.	00/82	ID6	221	305.961	300.612	311.169	319.194	314.007
Unprocessed nonfood materials except fuel to manufacturing industries.	00/82	ID6	2211	279.917	274.667	284.842	292.585	287.531
Unprocessed nonfood materials except fuel to nonmanufacturing industries.	00/82	ID6	2212	397.406	398.735	400.654	401.932	402.230
Unprocessed fuel.	00/82	ID6	222	139.999	123.786	126.749	124.721	122.153
Unprocessed fuel to manufacturing industries.	00/82	ID6	2221	228.804	224.649	222.758	223.027	221.128
Unprocessed fuel to nonmanufacturing industries.	00/82	ID6	2222	138.988	121.632	124.964	122.743	120.061
Services								
Services for intermediate demand.		ID6	3	153.218	153.439	153.491	154.523	155.054
Trade services for intermediate demand ⁵		ID6	33	183.047	183.239	183.641	186.090	185.111
Trade services for manufacturing industries.	12/12	ID6	331	168.019	167.543	167.673	169.887	169.447
Trade services for nonmanufacturing industries.	12/12	ID6	332	162.143	162.936	163.519	165.720	164.412
Transportation and warehousing services for intermediate demand.		ID6	32	164.074	163.733	164.356	165.542	166.205
Transportation of passengers for intermediate demand.		ID6	321	136.988	136.123	132.805	134.237	135.518
Transportation of passengers for manufacturing industries.		ID6	3211	137.154	136.272	132.889	134.350	135.655
Transportation of passengers for nonmanufacturing industries.		ID6	3212	137.029	136.166	132.856	134.285	135.562
Transportation and warehousing of goods for intermediate demand.		ID6	322	166.946	166.654	167.646	168.811	169.418
Transportation and warehousing of goods for manufacturing industries.	12/12	ID6	3221	133.102	133.622	133.394	133.134	133.936
Transportation and warehousing of goods for nonmanufacturing industries.	12/12	ID6	3222	150.768	150.285	151.478	152.876	153.332
Services less trade, transportation, and warehousing for intermediate demand.		ID6	31	143.369	143.698	143.569	144.259	145.085
Services less trade, transportation, and warehousing for manufacturing industries.		ID6	311	138.021	138.275	139.743	139.623	140.061
Services less trade, transportation, and warehousing for nonmanufacturing industries.		ID6	312	143.530	143.861	143.677	144.394	145.234
Construction								
Construction for intermediate demand.		ID6	4	158.584	158.648	158.862	158.973	158.992
Intermediate Demand by Commodity Type Special Groupings								
Processed materials less foods and feeds.	00/82	ID6	9111	259.418	259.493	259.743	261.804	262.652
Processed foods and feeds.	00/82	ID6	9112	252.962	254.619	253.828	253.081	255.568
Processed energy goods.	00/82	ID6	9113	232.790	228.171	229.995	234.838	234.638
Processed materials less energy.	00/82	ID6	9118	262.161	263.585	263.315	264.327	265.617
Processed materials less foods and energy.	00/82	ID6	9115	262.838	264.228	264.026	265.263	266.394
Intermediate distributive services ⁶	04/10	ID6	9116	173.448	173.427	174.080	175.936	175.660
Processed goods plus intermediate distributive services.	04/10	ID6	9117	149.521	149.604	149.841	151.058	151.380
Unprocessed materials less agricultural products.	00/82	ID6	9211	259.862	251.041	260.017	264.967	260.846
Unprocessed energy materials ⁷	00/82	ID6	9212	183.142	173.428	182.470	184.914	180.224
Unprocessed materials less energy.	00/82	ID6	9213	282.627	283.328	285.327	293.228	292.117
Unprocessed nonfood materials less energy ⁸	00/82	ID6	9216	458.046	452.246	455.247	466.986	464.626
Intermediate Demand by Production Flow								
Stage 4 Intermediate Demand								
Stage 4 intermediate demand.		ID5	4	154.585	154.666	154.767	155.933	156.758
Inputs to stage 4 goods producers.		ID5	41	150.900	151.093	151.195	152.201	152.771
Goods.		ID5	411	141.921	142.346	142.284	142.936	143.503
Foods.		ID5	4111	144.166	142.609	143.246	142.756	142.081

Total goods less foods and energy inputs to stage 1 intermediate demand.....	04/10	ID5	9116	129.769	130.692	130.585	131.379	131.956

¹ All indexes are subject to revision for 4 months after their originally scheduled publication to incorporate late reports and corrections by survey respondents. In addition, seasonally

adjusted indexes are subject to change for up to 5 years due to the recalculation of seasonal factors published each January.

² PPI defines Total finished as including only the personal consumption and private capital investment portions of final demand.

³ Trade indexes measure changes in margins received by wholesalers and retailers.

⁴ The PPI definition of foods does not include food and beverages for immediate consumption. PPI defines food and beverages for immediate consumption as the service of preparing meals, snacks, and beverages to customer order for immediate on-premises and off-premises consumption.

⁵ Distributive services include transportation, warehousing, and trade of goods.

⁶ Includes intermediate trade, transportation, and warehousing services.

⁷ Includes crude petroleum.

⁸ Excludes crude petroleum.
