INTRODUCTION

The scarcity of money in the colonies of North America, except the Spanish settlements in the Southwest, was a cause of constant distress, for not only was the incipient foreign commerce of the colonies greatly hampered thereby, but, what was even more annoying, the domestic trade was carried on with the greatest difficulty for the want of money, especially coins of small denominations. This made itself felt immediately on the advent of prosperous conditions in the colonies early in the seventeenth century, and at no period for the ensuing two centuries was there any relief from the embarrassing question. In their endeavors to solve the problems of a standard of values and circulating medium the colonists resorted to nearly every means which had been known to primitive man prior to the invention of the coin. Among these make-shifts, barter must have been the most common method of disposing of and procuring goods. The use of staple products as a means of expressing values and also as money in ordinary business transactions soon became of necessity a general practice throughout the colonies.

The product most extensively employed in the place of coined money was the tobacco of the southern colonies, especially of Virginia. For several years nearly all of the business of that colony, both domestic and foreign, was carried on by means of tobacco, until the enormous production of the plant made restriction on its use as money necessary. Powder and bullets were also used as money throughout the colonies, in some of which the legal tender of bullets in payments was limited to a small number. In Massachusetts, and among the New England colonies generally, grain, fish, and furs were in common use as means of exchange; and not only in the settlement of private debts but they were receivable for taxes as well. An order of the General Court of Massachusetts in 1642 (Mass. Records, II, 22) prescribes the valuation per bushel at which wheat, rye, barley, and corn should be received "for the payment of the rate," and then adds, "in these at these prices, or in beaver money, or wampam pay is to be made." The use of furs, especially beaver skins, as money obtained throughout the colonial period. And wampum, which served the Indians in nearly all their business transactions, was early recognized in New England and valuations placed upon it from time to time by the General Court. Thus in 1636 an order of the court fixed the value of wampum, without mention of color, at six to the penny; in 1642 four white pieces, or two blue ones, were fixed as the value of the penny. Evidently this apparently trifling wampum afforded the colonists an excellent substitute for small change, inasmuch as there was always ready acceptance of it among the Indians in exchange for articles of substantial value.
With the view of relieving to some extent the money stringency of the colony, Massachusetts in 1651 projected a mint for the coinage of silver. Preliminary arrangements were speedily made, and in the following year the mint was opened at Boston and began operations by striking the almost plain "New England Shilling," the Sixpence and Threepence. The standard of fineness of the new coin was the same as the corresponding English coin. It is very improbable that there was any intention to continue long such a simple form of coin as this piece is, being in fact but little more than a plain disk. For it must have been apparent at once that the coins could be easily clipped and also fraudulently "washed" until their weight and value were seriously reduced. It is very likely that the exceedingly simple form of the first issue was the result of great haste to get the mint into operation, and that the preparation of other and more suitable dies was begun at once on the opening of the mint, and that they were put into use as soon as completed. At any rate, in the same year of 1652, the series with a tree on the obverse and on the reverse NEW ENGLAND ANO. with the date and value within a beaded circle, was begun.

This first colonial mint was established without authority from the Crown. The General Court of Massachusetts, which authorized it, evidently proceeded with the expectation that the pressure of necessity would outweigh in the minds of the royal ministers considerations of the infringement of the royal prerogative of coining the money. And in fact the operations of the mint went on unnoticed, or at least undisturbed, for several years, an apparent connivance due perhaps to the troubles Cromwell and Charles II were having at home. And while no well-founded and serious objections to the Boston mint were ever brought forth, yet when a grievance against the colony was desired this usurpation of one of the prerogatives of the Crown was ready at hand, and in 1683, after an existence of thirty-one years, the mint was closed, but rather "upon mere prudential considerations" than for political reasons. Efforts were made to have the mint reopened, the ground of the petition being the benefit the coinage had been to the colony, but they were ineffectual. It is doubtful whether the mint could have continued in successful operation much longer than it did, even if it had not been disturbed, for the Spanish silver which before had reached Boston through West Indian commerce and West Indian pirates was rapidly being diverted to the better markets in Europe, thereby cutting off the chief supply of bullion. At any rate all requests to reopen the mint were refused by the Crown, which thus contracted the responsibility that in time would almost certainly have been properly credited to economic causes.

In 1658 Lord Baltimore projected a plan to issue coins for Maryland, and a beginning of a coinage was made in England, specimens of which reached America that year. The series embraced a Shilling, Sixpence, Fourpence, and a small copper coin called Denarium. They have for obverse type a rather refined portrait of Lord Baltimore, the proprietary lord of Maryland (Dominus Terrae-Mariae), and on the reverse his family arms for the silver coins, a ducal coronet on the copper piece.
The low weight of 66 grains for the Shilling, with the Sixpence and Groat in the same proportion, suggests that the project, while perhaps intended to supply the great want of money in Maryland, was planned with a view of benefiting Baltimore himself. But he had hardly got his plans under way when his activities were suppressed by the Government.

Following these unsuccessful efforts to establish special coinages for the American colonies, in order to provide a substitute for barter and the variety of commodity moneys before in use, Spanish-American silver was legalized at prescribed rates in terms of the Shilling, and this, together with copper tokens struck chiefly by speculators, formed the currency of the colonies until after they became independent. In the class of speculators was one William Wood, who received a royal grant to make copper tokens for Ireland and America. Under the terms of this grant, Wood produced the copper pieces known from their reverse type as the "Rosa Americana." But the Irish people objected to the tokens floated among them, and the prospects of enormous profits which Wood was certain to secure at the expense of the Irish and Americans prompted the Government to induce Wood to surrender his grant in lieu of a pension of three thousand pounds a year. This is but one of a large number of speculative ventures in making copper tokens for circulation in America, though the others lacked authority; but to discuss them here would require going far beyond the plan of this brief sketch.

NATIONAL AND STATE COINAGE PRIOR TO THE ADOPTION OF THE CONSTITUTION

After the American colonies had achieved independence the provision of a coinage became their own sovereign right. The problem was promptly attacked by both the National Congress and by some of the States, the latter of which, if not laying claim to the right of coining money during the period of their loose confederation prior to the adoption of the Constitution and the formation of the Union, at least considered it their duty to relieve their citizens of the pressing necessity of an ampler supply of small coin, and likewise to eliminate from circulation the vast amount of light-weight and spurious coppers then commonly current.

On April 21, 1787, a congressional committee made a report in favor of the coinage of copper, and accordingly a contract was entered into with a Mr. James Jarvis to coin for the National Treasury three hundred tons of copper, the contractor agreeing to coin an additional forty-five tons and deliver the coins therefrom to the Treasury for the privilege of coining. Before this contract was carried out there arose a difference of opinion in Congress regarding the wisdom of parts of it; but there is no record of how the difficulty was finally adjusted, and it seems probable that Jarvis insisted on having the terms adhered to and struck the coins.

The devices for this the first coin struck by authority of Congress were prescribed by a committee of that body in the following terms:

"* * * On one side of which piece * * * thirteen circles linked
together, a small circle in the middle, with the words United States around it; and in the center ‘We Are One;’ on the other side of the same piece the following device, viz, a dial with the hours expressed on the face of it; a meridian sun above, on one side of which is to be the word ‘Fugio’ and on the other the year ‘1787;’ below the dial, the words ‘Mind Your Business.’” The types of this piece are very similar to those of the dollar pattern of the proposed continental currency which bears date of 1776, and which were probably designed by an artist who on the earlier piece placed the signature E G FECIT. The types are interesting as a commentary on the state of mind of the times. The political hope, for it could be only a hope still at that time, of an inseparable union expressed in the obverse type was probably not less prevalent than the caution so graphically set forth by the other that “Time is Flying,” so “Mind Your Business” affairs. This terse expression of practical sense, because so much in the spirit of Poor Richard, has won for the coin the name of “Franklin Cent,” but Franklin probably had nothing to do with the designing of it.

The coins of the Federal Congress were struck chiefly in New York, but the simplicity of the mint requirements of the time enabled the contractor to sublet portions of the contract if he so desired, and the fact that some of these coppers were also struck at New Haven, Connecticut, at Rupert, Vermont, and at other places suggests that the contract was actually farmed out.

Besides the Congress, Vermont, Connecticut, New Jersey, and Massachusetts likewise proceeded to coin copper. The first of these to start the movement was Vermont, a Commonwealth that had not formed one of the original thirteen colonies which revolted, nor was Vermont at this time a State, not having been admitted into the Union until 1791.

In 1785, by authority of the assembly, a contract was let to Reuben Harmon to coin copper for a term which was first fixed at two years, but finally extended to eight, during three years of which all profits from the coinage were to go to Harmon to indemnify him for his outlay in providing a mint and as profits on his operations, while for the remaining five years of the life of the contract he was to pay to the Commonwealth two and one-half per cent of the amount coined.

Two types of coins were struck by Harmon under this contract, or rather the two contracts. The first type, with a green mountain and the sun rising behind it, possessed a local character. But when the act was passed to extend the contract from two to eight years other devices were prescribed and the coppers thereafter issued bore no slight likeness to the English Penny and Halfpenny, for the laureated bust in cuirass is plainly an imitation of the bust of one of the Georges and the figure which was to be taken as emblematic of Liberty is only Britannia with a different sentiment expressed by the inscription INDE. ET: LIB:., Independence and Liberty.

In the same year, 1785, in which Vermont started to make arrangements for a coinage of copper Connecticut also passed an act providing for a contract to coin ten thousand pounds of that metal, the contrac-
tors to pay over to the State five per cent of the total amount coined. The coins of Connecticut, like those of Vermont, closely resemble the English Halfpenny; the choice of inscriptions similar to those on the Vermont coins gave marked uniformity to the copper coins of these Commonwealths; but such similarity was hardly the object in view, as in only a very slight measure could the coppers of one of those States be expected to circulate in the other. Both the Commonwealths doubtless found it convenient to employ types already familiar to the people; hence the rude imitation of the English Halfpenny. Both States, however, avoided an open declaration of any intention to imitate the current English copper by a naive wording of the laws. Vermont’s law prescribed “on one side a head,” * * * “on the reverse, a woman,” with the appropriate inscriptions; and the Connecticut law reads “a man’s head on the one side,” * * * “and on the other side the emblem of liberty.”

The act of Assembly that provided for the coinage of copper in New Jersey was passed June 4, 1787, and, in response to their petitions, authorized a contract with a Mr. Walter Mould and his partners, Thomas Goadsby and Albion Cox, for the coinage of ten thousand pounds of copper. But a disagreement arising between Mr. Mould and his partners, at their request the contract was accommodatingly divided up and one-third let to Mould, the remaining two-thirds to Goadsby and Cox. The original law required that these coins should be of the weight of six pennyweight and six grains and of pure copper, and that they should be struck in the State of New Jersey. Accordingly Mr. Mould established his private mint at Morristown, while Goadsby and Cox coined at Elizabethtown.

The devices of the New Jersey copper Cent are for the obverse a horse’s head above a plow, beneath the plow the date of coinage, and the name of the State in its Latin form, NOVA CAESAREA. On the reverse is a heart-shaped shield of the United States, with the well-known tinctures and the national motto E. PLURIBUS UNUM. The obverse type has reference simply to the agricultural character of the State, while the shield and motto on the reverse may very reasonably be interpreted as a direct recognition of the General Government. The Great Seal of the United States, in which this shield occurs, was adopted in 1782, five years before New Jersey struck the coins. On the reverse of the coins struck by Massachusetts, mentioned below, there is a spread-eagle with arrows and an olive branch in the claws, a device probably also taken from the Great Seal. This use by some of the individual States of emblems already recognized as possessing a national character is of importance as indicating to what degree they regarded the coinage of money as a sovereign right and how far they looked upon their actual proceedings as merely measures of necessity, for if the coinage of money had been asserted as a sovereign right, then a national emblem would hardly have been employed for a coin device, for to do so meant to recognize the national authority in matters pertaining to coinage.
The brief history of coinage in Massachusetts in the period now under consideration differs materially in certain important particulars from that of the other States mentioned. Chief among these is the fact that Massachusetts established a mint instead of contracting with a private firm for the manufacture of coins. Furthermore, Massachusetts proposed a much more extensive coinage than any of the other States, aiming to strike the precious metals as well as copper. Of course the advent of the Union and the constitutional provision for an exclusively national coinage speedily ended all the State had begun and planned to do. The reverse type of the copper cent of this State has already been mentioned. The Indian with bow and arrow and the inscription COMMON ★ WEALTH, with the single star form the obverse type. The indication of the value on both the Cent and Half-cent is a further peculiarity not found on the coins of the other States.

During the period between the beginning of the War of Revolution and the establishment of a mint in 1792 there was a great interest taken in the types of the expected coins of the country, and a large number of patterns were privately made. Some of these suggestions date as far back as 1776. But the chief interest, apart from certain very rare pieces, attaches to the large number of patterns and tokens (it is not easy to determine which in many cases) that bear the effigy of Washington. Many of these pieces were doubtless produced by speculators and floated wherever there was a pressing want of small coins, but on the other hand some specimens undoubtedly were meant to embody the idea urgently advanced by many citizens that the portrait of the President should appear on the coins of the country, or at least on some of the denominations. Of course but one response to such a proposal could be expected from Washington and that was a decided negative.

Of coins of this period, two gold pieces deserve mention, and not alone because they are very rare specimens and command enormous prices in the market. One of these is an English Guinea dated 1775 and impressed with the dies with which were struck the copper token known from the inscription on the obverse as the Immune Columbia. It is a unique specimen and is probably also an example of a rare practice that of restriking foreign coins in the precious metals. The other and more interesting example is a large gold piece known as a Doubloon, which was produced by Ephraim Brasher, a New York jeweler and goldsmith. Brasher's activity was not limited to the production of these large gold pieces, but apparently he served his community in a more effectual manner in regard to its currency by countermarking with his initials (E. B.) some of the foreign gold and silver which passed through his hands and the genuineness of which he had the expert knowledge to determine. How extensive this latter practice was can not now be determined, but such a service, if sufficiently extended, must have been of great value to a community that was constantly swindled with bogus coin of every description, for the utterance of bogus money was at that time greatly facilitated by the general use of foreign coins throughout the country.
The foreign coins whose currency was most frequently legalized by act of Congress were British and Portuguese, the latter generally meaning Brazilian, gold, and Spanish, or Mexican, silver. In the early history of the country the Spanish "Pillar Dollar," later and at the time under consideration the Spanish "Milled Dollar," also known as "Piece of Eight," was the very generally recognized monetary unit. The paper currency issued by the Congress of the united colonies during the War of Revolution was made redeemable in "Spanish Milled Dollars or the Value thereof in Gold and Silver;" and in contracts of nearly every description payment is frequently stipulated in the same coin. In the retail trade of the country the Spanish, afterward the Mexican, Real and Half Real were in common use until the middle of the nineteenth century. Shilling or Mexican Shilling was the term generally applied to the Real, which was one-eighth of the Peso and approximately 12½ cents. But in certain of the Middle States, especially Pennsylvania and New Jersey, and in much of the South the Real was known as the Levy and the Half Real as the Fippenny or Fippenny Bit, terms which are corruptions of eleven and five penny and presumably point to a local valuation placed upon the coins. The act of Congress which stopped the circulation of foreign coins in the country stipulated that the Half Real should be received by the Government agencies at a valuation of five cents, the bullion value of it. In the western part of the country the Real was popularly known as a Bit—a term which yet survives as a popular money of account, the terms Two Bits, Four Bits, and Six Bits being employed to express the values, twenty-five, fifty, and seventy-five cents. The influence of the Mexican Real Bit, which had a value of approximately 12½ cents, is probably seen in the application, in parts of the West, of the term Short Bit to the slightly smaller Dime.

By the law of 1857 all previous acts authorizing the currency of foreign coins in the United States were repealed.

THE NATIONAL COINAGE

The Mint of the United States was established at Philadelphia by resolution of Congress dated April 6, 1792, and the first coins were struck at the new mint in March of the following year. Subsequently several mints were established in different parts of the country, as will be seen from the list of them at the close of this sketch.

HISTORY

In a brief sketch it is manifestly impossible to discuss adequately the related subjects which have had a marked influence upon our coinage. The state of the fine arts, the course of its foreign commerce, and chiefly its financial history determine the coinage of any country, especially of a new nation. It will be sufficient here to note how our coinage varied in character and volume under laws which the Congress enacted during over a century of heated discussion.
Preliminary to the first legislation to establish a mint and monetary system two important documents were submitted to Congress, the one by Robert Morris, possibly written by his assistant, Gouverneur Morris, and later a masterly report by Mr. Hamilton, as Secretary of State in Washington's administration, treating of all the subjects connected with the proposed legislation.

The Morris report, made in 1782, proposed to abolish the English system of pounds, shillings, and pence then prevailing in the several States, and instead establish a coinage on the decimal system with a unit that would agree without a fraction with all the numerous valuations of the Spanish milled dollar in the different States. This small unit would be $\frac{1}{48}$ of that dollar. Mr. Jefferson, as a member of the committee to which the report was referred, in a searching review of its proposals, indorsed some of the important features, but rejected the proposed unit as too small and inconvenient. He proposed instead that the unit be a dollar of approximately the value of the Spanish milled dollar then generally used in the country, both because it was well known and of convenient size and value.

The document submitted to Congress by Secretary Hamilton on January 21, 1791, treated the subject in all its phases, accepted Mr. Jefferson's notion of the dollar as a unit, and urged the coinage of both gold and silver with the relative value of 15 pounds of silver to 1 of gold.

The act of April 6, 1792—Mint establishment created.—This law, which established the monetary system of the country and a mint, provided for the free coinage of both gold and silver, fixed the legal ratio of the values of the two metals at 15 to 1, as Mr. Hamilton had urged, and provided for a token coinage in copper. The first coinage of the mint consisted of an issue of copper Cents and Half-cents in 1793, followed in 1794 by the issue of the silver dollar and half-dollars, and in 1795 gold Eagles and Half-eagles. The first issue of the gold Eagle and silver dollar were of the following composition:

<table>
<thead>
<tr>
<th>Item</th>
<th>Pure gold</th>
<th>Alloy</th>
<th>Standard weight</th>
<th>Milesimal fineness</th>
</tr>
</thead>
<tbody>
<tr>
<td>Gold eagle</td>
<td>Grains 247.5</td>
<td>Grains 22.5</td>
<td>Grains 270</td>
<td>Grains 916.7</td>
</tr>
</tbody>
</table>

The other gold coins in proportion.

<table>
<thead>
<tr>
<th>Item</th>
<th>Pure silver</th>
<th>Alloy</th>
<th>Standard weight</th>
<th>Milesimal fineness</th>
</tr>
</thead>
<tbody>
<tr>
<td>Silver dollar</td>
<td>Grains 371.25</td>
<td>Grains 44.75</td>
<td>Grains 416</td>
<td>Grains 893</td>
</tr>
</tbody>
</table>

The other silver coins in proportion.

It soon became evident that the gold coins and the silver dollar were not going into circulation, and investigation proved that they were
being either exported or reduced to bullion; for speculators discovered that the gold coins had been undervalued and the fine gold in an Eagle was worth more than 10 silver dollars; while the new silver dollars could be readily had in exchange for worn Spanish dollars of reduced weight and value, a fact which insured the exports of silver to be made in the new full-weight pieces. Therefore the coinage of the Eagle and Silver Dollar was suspended in 1803 and 1804, respectively. At any rate it appears that President Jefferson must have stopped the coinage of the Gold Eagle in 1804, and his order, still preserved, of May, 1806, gave formal sanction to the suspension of the coinage of the dollar which had really been discontinued in 1803.

_Act of 1834—Weight of gold coins reduced._—This law of 1834 deals directly only with gold coins, its purpose being, of course, to correct their valuation. The fine gold in the Eagle was reduced from 247.5 to 232 grains and the full standard weight (including the alloy) was fixed at 258 grains.

The increased coinage of gold the new law was expected to insure was confined for several years to the Half-eagle and Quarter-eagle, the two coins least liable to exportation. In fact the coinage of the Half-eagle had been interrupted for only the years 1816-17 since its first appearance, though in certain years but few were struck.

The extreme scarcity of the Half-eagle bearing certain early dates can hardly be urged as an argument against the recorded amount of the coinage; for when the weight of the gold coins was reduced the older and heavier pieces were of course melted down. But following the passage of the law of June 28, 1834, the coinage of the Half-eagle rose to over three and a half million dollars, and of the Quarter-eagle from $10,400 in 1833 to over a quarter million the latter half of 1834. Not until 1842 did the annual coinage of the Eagle pass the million-dollar mark.

Preparations to resume the coinage of the Silver Dollar were begun soon after the enactment of the law of 1834. New patterns were struck in 1836, but there was no issue of this denomination until 1839; and the coinage of the Silver Dollar was insignificant until after the enactment of certain laws in the seventies.

_Law of 1837—Change of weights and alloys._—One result of the changes effected by the law of 1834 was to modify the composition of standard gold by increasing the percentage of alloy from 8% to approximately 10%. This was so near a standard of 90 per cent fine gold, 10 per cent alloy, percentages that would be far more convenient for commerce, that a law of this year prescribed that 2 grains of fine gold be added to the Eagle, the standard weight remaining the same, and that the weight of the Silver Dollar be reduced to 412½ grains, while the amount of fine silver remain unchanged. The result of these slight changes in the coins was to introduce a uniform standard of 900 thousandths fine for the coins of both metals. The silver coinage of 1792–1837 was 893 thousandths fine.

_Law of 1853—Fractional silver coins made subsidiary._—The operations of the mint for a few years following the act of 1834 are of special
interest. The coinage of gold rose from an inconsiderable amount prior to 1834 to nearly $60,000,000 in 1852; the coinage of silver increased until 1842 when about $3,600,000 in Half and Quarter Dollars were coined, but dropped below $175,000 in 1852. The law of 1834 had placed too low a valuation on silver, and the result was that the silver coins were bought up and sold as bullion at a profit and gold sent to the mints for coinage. And since the issues of the Silver Dollars were small, speculators dealt in the fractional coins. The Half-dollar, Quarter-dollar, and even smaller silver coins became scarce and domestic trade was hampered. To remedy this evil the law of 1853 reduced the weight of the Half-dollar from $20\frac{1}{4}$ to 192 grains of standard silver and of the other silver coins in proportion; they were thus made subsidiary. The *free coinage* of these fractional silver pieces was by the same law prohibited. The bullion for such coinage was thereafter bought by the Secretary of the Treasury for the account of the Government. The coinage of fractional silver in 1853 totaled nearly $10,000,000.

**Act of 1857—Circulation of foreign coins prohibited.**—In 1793 the circulation of foreign coins, chiefly, in fact, Spanish-American silver, had been legalized as a measure of necessity to supply the country with legal tender money for the domestic retail trade. Various causes had restricted the volume of the national silver coinage and not until 1857 did conditions warrant the repeal of that law so as to eliminate the large volume of foreign coins from the currency of the country. So, after the fractional silver coins had been made subsidiary and their circulation apparently assured, and perhaps to assure that result, the law making all foreign coins a legal tender was repealed. The Secretary of the Treasury prescribed the valuation at which the “Levy” and the “Bit,” for these small Mexican Real and Medio real pieces were the chief foreign coins then in use, should be received in exchange and they soon disappeared.

**Acts of 1864, 1865, and 1866—Additional minor coins.**—On account of the high premium to which silver rose in the early years of the Civil War coins of that metal, including the smallest denominations, went out of circulation and retail trade was greatly embarrassed. The final disappearance of the fractional silver pieces came about in 1862. The coinage of silver in 1862 was less than half what it had been in 1861, and in subsequent years there was further decrease. In the following year of 1863 thousands of merchants throughout the country resorted to the use of private tokens, of the value of 1 cent, to relieve the stringency of small change. Enormous quantities of these “Civil War Tokens” still exist, interesting evidence of the financial distress of the times. But the private issue of these One-cent tokens was immediately checked by the issue of fractional paper currency which first appeared in 1863. In this period of great scarcity of small coins required for change three denominations of minor coins were added to the series; these were the bronze Two cents (1864), nickel Three cents (1865), and the nickel Five cents (1866).
Act of 1873—New coins—Metric weight legalized.—The monetary legislation of this year amounted to a complete revision of the laws governing the coinage, but largely it legalized what had already come into practice of necessity. The act is most noted for its omissions.

Bearing most directly upon the phase of the subject of importance here four denominations were discontinued, the silver Twenty cents, Half-dime and Three cents, and the bronze Two cents, while a Threedollar gold piece and a silver Trade Dollar were added to the series. The last piece was coined in response to a petition addressed to Congress by western trade bodies through the medium of the California Legislature, by whom it was expected that this coin, because struck on the same standard as the Mexican dollar (420 grains 0.900 fine) which circulated freely in China and Japan, would assist their trade with the Orient.

The act specifically provides for the continued coinage of all the gold coins and the fractional silver pieces, but omits any mention of the standard silver dollar. For four years following the enactment of this law, 1874–1877, no standard silver dollars were coined, but about 35,000,000 Trade Dollars were struck. The expected results from the Trade Dollar were not realized, and many of them went into the circulation at home. In 1886 they were withdrawn from circulation and recoined into standard dollars.

The law also contained the important provision that the Half-dollar should weigh 12.5 grams, with the Quarter and Dime in proportion, which required an addition of but .9 grains troy to its standard weight. The purpose of this paragraph of the measure was to bring the silver coins into harmony with the coinage of the Latin Monetary Union of Europe. As in 1853, so again in 1873, the new fractional coins of modified standard were made readily distinguishable by means of arrowheads beside the date.

Act of 1875—Coinage of fractional silver to redeem outstanding fractional paper currency.—The resumption of specie payment provided for in the law of 1875 had a marked influence upon the volume of the coinage; for the amount of such small paper bills outstanding was nearly $50,000,000, and while about $15,000,000 of it was never presented for redemption, being either destroyed or otherwise kept back, yet the coinage of small silver, chiefly for that purpose, amounted to over $45,000,000 from 1875 to 1879.

Act of 1878—Purchase of bullion for coinage of the dollar.—The law of this year affected the silver dollar alone. The coinage of this denomination had from the first been restricted by one cause or another. To make the bimetallic standard effective, a policy to which Congress had formally committed the country, the Secretary of the Treasury was authorized to purchase not less than $2,000,000 nor more than $4,000,000 worth of silver bullion per month, and have this bullion coined into silver dollars as rapidly as purchased or as fast as possible. The coinage of silver dollars in 1879 was 22,495,550, or about three time the aggregate coinage of that denomination in the entire period.
from 1794 to 1878. The whole coinage of standard silver dollars under the act of 1878 was 378,166,793.

*Act of July 14, 1890—Increased purchase of silver; coinage of silver dollar limited.*—This second act, which particularly affected the coinage of the silver dollar, authorized the Secretary of the Treasury to purchase 4,500,000 ounces of silver monthly, or a half million more than the maximum amount authorized to be purchased under the act of 1878; but instead of coining the whole amount as fast as purchased, it directed the Secretary to coin only 2,000,000 ounces monthly into standard silver dollars until July 1, 1891. After the latter date the coinage of the silver dollar was to be limited to enough to redeem the Treasury notes issued for the purchase of silver bullion.

In 1891 the coinage of the standard silver dollar rose to 38,043,004, the greatest in its history; while in 1897 the coinage of the same piece fell below a million.

*Act of November 1, 1893—Purchase of silver discontinued.*—The law requiring the Secretary of the Treasury to purchase 4,500,000 ounces of silver monthly was repealed by this act, but he was still left the discretion to coin the bullion already purchased, and a law of June 13, 1898, required that the bullion then in the Treasury should be coined into silver dollars at the rate of $1,500,000 monthly. This supply was finally exhausted in 1904, at which time the last standard silver dollar was coined.

The coinage of silver dollars under the act of 1890 amounted to $78,751,257, and the total coinage of dollars under the acts of 1878 and 1890 was $570,166,793.

*Act of March 2, 1911—Issue of certificates against refined gold bars authorized; coinage of gold reduced.*—Prior to the enactment of this law the vast issues of gold certificates were made only against deposits of gold coins, and American Eagles formed a large portion of the occasional exports of gold from this country. By authorizing the issue of certificates against the deposit of fine gold bars the heavy expense of coining them is saved. The amount of bullion in the reserves against gold certificates is however limited by the act of June 12, 1916, to two-thirds of the total amount of certificates outstanding.

*Act of April 23, 1918—Use of the silver in standard dollars, incident to the World War of 1914–1918.*—The primary purpose of this act was to provide silver, which was nowhere else obtainable in the necessary quantities, to assist foreign governments at war with the enemies of the United States. Under this act 259,121,554 silver dollars were melted or broken up and the resulting silver bullion sold to Great Britain for shipment to British India, and 11,111,168 silver dollars were converted into subsidiary silver coin; total $270,232,722. In accordance with the provisions of the act the dollar coins were replaced after the close of the war, the coinage having been commenced in 1921 and completed in 1928.

**THE TYPES**

In the act establishing the mint the devices and legends for the new coins were prescribed as follows: "Upon one side of each of the said
coins there shall be an impression emblematic of liberty with an inscription of the word Liberty and the year of the coinage; and upon the reverse of each of the gold and silver coins there shall be the figure or representation of an eagle, with the inscription, ‘United States of America,’ and upon the reverse of the copper coins there shall be an inscription which shall express the denomination of the piece, namely, Cent, or Half-cent, as the case may require.”

The device chosen as suitably emblematic of liberty for the first coins issued was a bust of the Goddess of Liberty, though the law permitted the greatest freedom in the composition of a design to express the idea. The bust of Liberty which appeared on the Cent and Half-cent in 1793, the only denominations struck that first year of the operation of the mint, is almost certainly a conscious imitation, if not indeed an unskilled medallist’s copy, of the bust on the medal made by the celebrated French artist, Dupré, to commemorate the victories of Saratoga and Yorktown. At first the liberty pole of the medal was omitted from the coin, but before the end of the year that detail too was added. Between the busts on the silver coins that first appeared in 1794 and that on the gold that followed in 1795, the former having the hair hanging down upon the neck, and the latter wearing a Phrygian cap, there are marked differences for each of the metals. This original practice, which was evidently based upon a sound principle of affording a sharp distinction between the types of the three metals, was lost sight of in later years, as will be noted below.

On the obverse of the gold and silver of 1795 there are fifteen stars, and later we find as many as sixteen stars, the number in each case corresponding to the number of States to which the Union had grown. The same practice of adding a star for each State was also begun on the reverse, after the Great Seal type was placed thereon, but it was soon found to be inconvenient because of the large number of stars that would soon be required, so they were limited to thirteen, the number of the original States.

The eagle which the law required for the reverse was at first a naturalistic bird with expanded wings, standing upon a palm branch on the gold coins and holding aloft in his bill a laurel wreath. It is noticeable that on none of the earliest coins does one find associated with the national emblem any symbol relating to war or to peace or to dominion, such as are so often found on coins and which soon became important features of the reverse types of all United States gold and silver. In the first year of the coinage of gold, 1795, a second reverse type was prepared, and one which presented, with omission of slight details, the device of the Great Seal of the United States. An interesting variation from the true form of the seal is the disposition of the very emblems just alluded to, the arrows and branch of olive, the former on the coins being in the right claw and the latter in the left, or just contrary to their positions on the seal. Now in the case of the Great Seal the position of the emblem of peace in the dexter claw and that of war in the sinister is understood to express a preference for peace. The interchange of their positions on the coins can hardly be interpreted as
significant; it is more likely a case of confusing the heraldic use of "right" and "left" with the manner of employing those terms in coin descriptions, "left" in the latter case being the spectator's left. If, therefore, the engraver meant to adopt the latter use of the terms, then he placed the arrows in the "left" claw and the olive in the "right," thereby correcting a blunder in the seal, as he may have supposed. The eagle which appeared on the Half-dollar in 1807 holds the olive in the right claw and the arrows in the left, and that was afterward recognized as the correct position, and so they were placed with one exception until 1907, when radical changes respecting these emblems were introduced. That one exception was the Trade-dollar, a coin specially intended to serve an international commerce, and thus the coin which above all should have been free from reference to anything but peace and commerce. The eagle on that piece holds three arrows in the right claw.

With the Half-eagle and Half-dollar of 1807 Mr. Reich began a tendency toward similarity of types for the different metals. The bust of Liberty on his Half-dollar is in general very similar to the one on his Half-eagle. On the reverse of the Half-dollar the eagle's wings are inverted, which makes a marked difference, but otherwise the two representations are very similar. And from that date on, the original principle of differentiation the types of the coins of the various metals was lost sight of and similarity became virtually the rule. For example, there is too strong a likeness between the bust on the Cent of 1808 and the one on the Half-eagle of 1834; and likewise when the coinage of the Eagle was resumed in 1838, after an interruption lasting from 1804, the bust placed upon it was merely a refinement of the one on the Cent and Half-cent. Other close resemblances among the types on coins of different metals, where reason and general practice would suggest that there should be sharp differences, might be pointed out, but examples enough have been given to illustrate the unfortunate tendency.

In 1840 the silver Dollar, which had not been coined since 1803, or perhaps 1804, was restored, and Christian Gobrecht produced for it the figure of Liberty seated to right which was on all the silver coins until 1878. This moderately graceful figure was a refreshing innovation and somewhat of an improvement on what had gone before. But conservativeness prevented the adoption of the powerful flying eagle which Mr. Gobrecht engraved for the reverse of his dollar and which is seen in the pattern that was made in 1836. On the pattern just referred to Mr. Gobrecht represents the bird in flight amid a cluster of twenty-six stars of varying magnitude, the number being equal to the number of States of the Union.

But though it was not accepted as a suitable device for the reverse of the silver Dollar, such a representation of the eagle was regarded favorably by many. Patterns for a new design of the large copper cent were prepared in 1855 with an eagle in flight for the obverse. In 1856 another pattern of a Cent with a flying eagle, the piece being of smaller size, only twelve-sixteenths of an inch in diameter or five-sixteenths
smaller than the old coppers; and in the following year, 1857, this “Flying Eagle” cent was regularly issued. The new piece weighed only 72 grains, while the Cent authorized in 1792 weighed 264 grain, which was reduced to 168 grains in 1795. The law which authorized the Cent of reduced size also prescribed that it should consist of 88 per cent copper and 12 per cent nickel, a composition that was so light in color that the pieces are often called popularly the “White Cent.” This design of the flying eagle, the choice of which was made by the Director of the Mint with the approval of the Secretary of the Treasury, as prescribed by the law, was retained only for the years 1857 and 1858, when it was replaced with the Indian-head Cent, the familiar type in use until 1909.

In 1849 Congress authorized the coinage of a Double-eagle and a gold Dollar. The preparation of dies for the new coins fell to the lot of Mr. James B. Longacre, at the time engraver at the mint. The bust of Liberty which Mr. Longacre modeled for the new coins is one of the best of the entire series. Its largeness of style, strength, and beauty contrast strongly with the weak and insipid work which until recently was found on the gold coins of the country. The same head was employed on both of the coins authorized that year, and with a different headdress, a feather bonnet, on the Three-dollar piece which was added to the gold series in 1854 it was likewise used for the nickel Three-cent piece, and finally with a different arrangement of feathers from that on the Three-dollar gold piece, the same head became the “Indian head” of the One-cent piece of 1859, which is still in common circulation.

The silver Dollar of 1878 by Mr. George T. Morgan, and the Half-dollar, Quarter, and Dime by Mr. C. E. Barber in 1892, were the next revision of the types of the silver coins. The return to a simple bust instead of the full-seated figure by Mr. Gobrecht was a happy improvement, or return to the early practice. For the types of the subsidiary coins Mr. Barber restored the device of the Great Seal, with the omission, however, of certain details, as the clouds above the eagle’s head. The coins of both these engravers were an advance in artistic quality over their predecessors in the series.

The latest creations for the devices of the gold coins are by two eminent American sculptors, the late Mr. Saint-Gaudens and Mr. Bela L. Pratt, also deceased, of Boston. They depart in many ways from the established traditions of the coins, a fact that explains much of the sharp criticism that has been urged against them; for of their power and artistic beauty there can be no question. The majestic standing figure of Liberty on the Double-eagle is a work of greatest beauty, while the Indian head on the Eagle, if found on a Greek coin, would suggest to archaeologists a Scopasian influence.

It is worth noting, perhaps, that this Indian head was originally intended for the One-cent piece. It was of course the intention at that time to continue on the Cent the traditional Indian head. This change of plan, due to I know not what cause has resulted in placing an Indian head on three of the gold coins, a rather far-reaching result,
for of course the Indian chief’s head on the Half-eagle and Quarter-eagle was but a sequence of the change of plan in regard to the design for the One-cent piece.

In one respect the reverse type of the Double-eagle is of special interest. Mention has already been made of the treatment of the symbols of war and peace on the earlier coins. In the case of the new coins, on all but the Double-eagle an olive branch lies upon a bundle of arrows and the eagle is standing upon both. In the case of the Double-eagle, however, these symbols have been removed from the reverse, and on the obverse Liberty holds out in her left hand a branch of olive, and in her right, in place of the customary arrows or any other symbol of war, she holds firmly aloft the Torch of Progress.

The One-cent of 1909, with the splendid bust of Abraham Lincoln, by V. D. Brenner, presents a new feature for the coins of the United States, namely, a portrait coin in the regular series. A pattern of a Two-cent piece with the portrait of Washington was produced in 1863, and a pattern of a Five-cent piece with a bust of Lincoln was submitted in 1866, but neither suggestion was favorably received—in fact, there has always been a prejudice against the use of portraits on the coins of the country, but the sentiment aroused during the hundredth anniversary of Lincoln’s birth proved stronger than the longstanding prejudice and the coin in question was the result.

In 1913 a new type Five-cent nickel coin was issued, bearing a head of an Indian on the obverse and a buffalo on the reverse; it was designed by Mr. J. E. Fraser. The design follows the recent tendency to provide a more artistic medium of exchange.

The 1916 revision of the designs of three denominations of silver coins also added materially to the artistic quality of the coins. The Half-dollar by Mr. A. A. Weinman bears on the obverse a figure of Liberty, draped in the national emblem, walking to the left and bearing branches of oak and olive. The reverse bears a distinctly new and fine treatment of the eagle, portrayed with wings raised, and grasping a pine branch in its talons. The Quarter-dollar, designed by Mr. Hermon MacNeil, bears on the obverse a figure of Liberty with shield and olive branch, advancing through a portal; on the reverse is an eagle flying to the right. The Dime, designed by Mr. Weinman, portrays on the obverse a bust of Liberty with winged cap, and on the reverse a fasces entwined with an olive branch.

A new type standard silver Dollar was issued in 1921; it was designed by Mr. Anthony de Francisci. This coin bears on the obverse a head of Liberty to left with tiara of light rays, and on the reverse an eagle to right standing on a mountain crag, facing a rising sun, with olive branch in talons. This coin is known as the “Peace” dollar; it commemorates the peace treaty ratifications in November 1921, incident to the close of the World War of 1914–1918.

The mottoes.—Two legends have appeared on many of the coins of the United States, the one from almost the beginning of the national coinage, the other since the Civil War. Neither, however, has had an uninterrupted history, nor has either been employed on all the denominations of the series.
The motto *E Pluribus Unum* was first used on the coins in 1795, when the reverse type of the Half-eagle presented the main features of the Great Seal, on the scroll of which the motto belongs. The same device was a few years later extended to the other denominations in gold and silver, so that the motto was soon found on all the coins in the precious metals, and of course in its proper position on the scroll held in the beak of the eagle. But when a new type of eagle was introduced on the Half-dollar and Half-eagle in 1807, a scroll bearing the motto was placed in the field above the eagle as a purely decorative feature, for its presence was not required on the coins by law, nor was it an essential part of the new device as it had been of the preceding one. And in 1834 the scroll and motto were removed from the gold coins then issued, the Half-eagle and Quarter-eagle, and did not reappear on those denominations until 1908, when it was restored on the new issue. But the motto was placed on the Double-eagle when first issued in 1849, on the scroll held by the eagle, and has always been retained thereon. This motto was also omitted from the silver with the obverse type of Liberty seated—that is, from 1840 to 1873, in the case of the Dollar, and from 1836, when it was removed from the older type, until 1892, for the Half-dollar. In 1878 the motto was placed on the Dollar again, but with even less regard for its original relation and significance than shown by Mr. Reich in 1807, for on the Dollar of 1878 it was removed from the reverse and from the eagle, the emblem of the united power and authority of the States, and placed as a principal inscription on the obverse. On the gold coins of recent issue this motto is placed again on the reverse as a secondary legend in the field, except on the Double-eagle, where together with the thirteen stars it adorns and protects the edge.

The religious motto, *In God We Trust*, first appeared on the coins of the country in 1864, and owes its presence there largely to the increased religious sentiment in the dreaded crisis of the Civil War. Hon. S. P. Chase, then Secretary of the Treasury, received a number of appeals from devout persons throughout the country suggesting and urging that the Deity be recognized suitably on our coins in a manner similar to that commonly found on the coins of other nations. Accordingly, on November 30, 1861, Secretary Chase addressed a letter to the Director of the Mint at Philadelphia, and with the statement of his reason that "no nation can be strong except in the strength of God, or safe except in His defense. The trust of our people in God should be declared on our national coins," ordered, "You will cause a device to be prepared without unnecessary delay with a motto expressing in the fewest words possible this national recognition." Several forms of motto expressing the intention were suggested. Patterns for the Half-dollar and Half-eagle prepared in 1862 have "*God our Trust,*" and a pattern for a bronze Two-cent piece made in 1863 has the bust of Washington on the obverse and the legend "*God and Our Country,*" but the familiar form of the motto was finally decided upon, and it first appeared on a new Two-cent piece in 1864. In the following year patterns of the Double-eagle, Eagle, and Half-eagle, and of the
silver Dollar, Half-dollar, and Quarter-dollar, with the motto were prepared, and in 1866 those denominations were issued bearing the motto. Of the smaller coins this motto has been placed on only the bronze Two-cent piece, as already stated, and on the nickel Five-cent piece from 1868 to 1883.

When the Double-eagle and Eagle of new design appeared in 1907, it was soon discovered that the religious motto had been omitted from them; and in response to a general demand Congress ordered it restored, which was done in 1908, and the popular will was also respected in this regard when the new Half-eagle was brought out in the following year.

The form of the star.—The use of stars as symbols of the States began in the first years of the national coinage. Until 1892 the six-pointed form of the star was employed; but on the reverse of the Half-dollar and Quarter of that year the five-pointed character was introduced, while the traditional six-point star was retained on the obverse. This change was probably due to the presence of a five-point star on the Great Seal, an adaptation of which forms the reverse type of these coins. Mr. Pratt went an ill-advised step further and placed five-pointed stars on the obverse of the Half-eagle and Quarter-eagle of 1908, a disregard of a well-established tradition which Mr. Saint-Gaudens respected in his designs for the Double-eagle and Eagle of 1907, on the obverses and edges of which the stars are in all cases of the six-point variety.

Signatures on dies.—The custom of placing the signature of the engraver upon a coin die dates from remote antiquity. Many Greek coins, especially the splendid creations produced by the cities of Sicily and Magna Graecia, are signed with the initials of the artist, and in some cases with his full name. The same practice has prevailed generally in European countries. On the coins of the United States but few signatures occur. There were none until the Double-eagle appeared in 1849, when the signature of Mr. Longacre, J. B. L., was placed on the truncation of the bust. The same signature is of course found on the Three-dollar gold piece of 1854, where the same bust of Liberty is used as on the Double-eagle. Mr. Longacre also signed the die of the Indian-head Cent of 1859, placing an L most unobtrusively on the ribbon that hangs from the back part of the band of the feather bonnet down over the hair.

Before the signed dies of Mr. Longacre appeared Mr. Gobrecht had signed the dies of his silver Dollar in 1836, placing his full name C. GOBRECHT in the exergue at first, then on the base of the figure of Liberty. But only patterns with the signed dies were made, and the name of the artist was unfortunately erased when the design was accepted for the coin.

The silver Dollar of 1878 bears the signature of the designer and engraver, Mr. G. T. Morgan, on both dies, an M on the truncation of the bust and also on the ribbon that unites the branches of the wreath on the reverse. In like manner, the signature of Mr. C. E. Barber occurs as a letter B on the truncation of the bust of Liberty on the
Half-dollar, Quarter, and Dime of 1892. Of the recent gold coins, Mr. Saint-Gaudens (designer) placed his signature, ASG in monogram, beneath the date on the Double-eagle, but left the Eagle dies unsigned; while the Half-eagle bears the initials, B. L. P., of the artist, Bela L. Pratt, prominently beneath the bust of the Indian. The silver Dollar of 1921 bears on the obverse, in the field under the head, the initial F for Anthony de Francisci, the designer. On the reverse of the 1916 Half-dollar, in the lower right field, occurs the initials in monogram of the artist, Mr. A. A. Weinman; the same occurring on the obverse of the dime in the lower right field. The obverse of the Quarter bears the initial M on the base of the right portal, for the designer, Mr. Hermon MacNeil. Under the date on the obverse of the Five-cent piece is an initial F for the designer, Mr. J. E. Fraser.

The One-cent piece of 1909, with the bust of Lincoln, originally bore the signature of the artist, V. D. B., Victor D. Brenner, on the reverse, but after an issue of nearly thirty million pieces the initials were removed.

*Statements of value.*—On the first gold coins of the country there was no statement of the value, the size of the pieces being deemed sufficient to assure a true appreciation of their correct value. The silver Dollar and Half-dollar had their values, ONE DOLLA R OR ONE UNIT and FIFTY CENTS OR HALF DOLLAR, milled on their edges, so inconspicuously, however, and often so illegibly that they were of but little value as ready aids to the eye in perceiving quickly the values of the pieces.

But in 1804 the value of the Quarter-dollar was indicated by 25 C on the reverse beneath the eagle, and the practice then begun has had a steady development, until now the value fully written out is found on all the coins, as it was of course from the first on the Cent and Half-cent. In 1807 the values 50 C and 5 D were placed on the Half-dollar and Half-eagle, respectively; in 1838 the value of the Eagle was given as TEN D.; on the Half-dollar of 1836–7 the unusual form 50 CENT S occurs, which was changed to HALF-DOL. the following year. The practice of gradually expanding the abbreviated form went on until the full expressions TRADE DOLLAR and TWENTY DOLLARS were introduced in 1873, and all new designs prepared thereafter have the statement of value written in full.

SPECIAL COINAGES AND SUPERFLUOUS DENOMINATIONS

*Commemorative coins.*—The commemorative coin, which in many other countries has had an extensive history, has never been much employed in the United States. Of the list of such coins all belong to recent years, and all are related to important anniversaries of the nation's history.

The columbian silver Half-dollar, authorized by act of August 5, 1892, was coined in 1892 and 1893, and the Isabella silver Quarter-dollar, struck in 1893 under act of March 3, 1893, were for the World's Columbian Exposition held in Chicago in 1893.
The Lafayette silver Dollar was struck under act of March 3, 1899, in 1899, the date on the coin (1900) being that of the unveiling of the memorial during the exposition in Paris, France.

The special gold dollars for the Louisiana Purchase Exposition held at St. Louis, Mo., in 1903, were coined under act of June 28, 1902, in 1902 and 1903, but have no coinage date upon them. Two types were struck, one showing the head of Thomas Jefferson and the other that of William McKinley.

The Lewis and Clark Exposition gold Dollar was struck in 1904 and 1905, under act of April 13, 1904, the exposition being held at Portland, Oreg., in 1905, in commemoration of the hundredth anniversary of the exploration of the Northwest.

The act of Congress of January 16, 1915, authorized the striking of Fifty, Two-and-a-half, and One-dollar gold pieces, also silver Half-dollars, for Panama-Pacific Exposition Co., all stamped with the date 1915. There were two types of the Fifty-dollar piece, one being round and the other octagonal in shape. The exposition was held in San Francisco, Calif., in 1915, and the coins were struck at the mint in that city.

The McKinley 'Gold dollar was authorized by act of February 23, 1916; the coins were struck in 1916 and 1917 for the McKinley Memorial Association, in connection with the erection of a memorial building at Niles, Ohio, the birthplace of William McKinley.

The Illinois Centennial silver Half-Dollar was authorized by act of June 1, 1918, and struck the same year, to commemorate the one hundredth anniversary of the admission of that State into the Union.

The Maine Centennial silver Half-dollar was authorized by act of May 10, 1920, and struck the same year, to commemorate the one hundredth anniversary of the admission of Maine into the Union.

The Alabama Centennial silver Half-dollar was authorized May 10, 1920, but not struck until October, 1921. The coins were placed on sale at Birmingham, Ala., during the visit of President Harding, October 29; they commemorate the one hundredth anniversary of the admission of Alabama into the Union.

The Pilgrim Tercentenary silver Half-dollar was authorized May 12, 1920, and struck in 1920 and 1921, to commemorate the three hundredth anniversary of the landing of the Pilgrims at Plymouth, Mass.

The Missouri Centennial silver Half-dollar was authorized March 4, 1921, and struck the same year, for the exposition and State fair held at Sedalia, Mo., in August, 1921, to commemorate the one hundredth anniversary of the admission of the State into the Union.

The Grant Memorial coins, Gold dollar and silver Half-dollar, were authorized February 2, 1922, and were struck in 1922, to commemorate the centenary of the birth of Ulysses S. Grant.

The Monroe Doctrine Centennial silver Half-dollar was authorized January 24, 1923, and coined the same year, in the San Francisco Mint, to commemorate the one hundredth anniversary of the enunciation of the Monroe doctrine.
The Walloon-Huguenot silver Half-dollar, authorized by the act of February 26, 1923, was struck in 1924, to commemorate the three hundredth anniversary of the settlement by the Walloons and the Huguenots of New Netherlands (the Middle States) in 1624.

The Stone Mountain Commemorative silver Half-dollar, authorized by the act of March 17, 1924, in commemoration of the commencement of the work of carving, on Stone Mountain in Georgia, a monument to the valor of the soldiers of the South. Coined in 1925.

The Lexington-Concord silver Half-dollars, authorized by act of January 14, 1925, to commemorate the one hundred and fiftieth anniversary of the battles of Lexington and Concord. Coined in 1925.

The act of February 24, 1925, authorized the coinage of the following silver Half-dollars:
- To commemorate the one hundred and fiftieth anniversary of the battle of Bennington and the independence of Vermont. Coined in 1927.
- To commemorate the seventy-fifth anniversary of the admission of the State of California into the Union. Coined at the Mint in San Francisco in 1925.
- To commemorate the one hundredth anniversary of the founding of Fort Vancouver, in the State of Washington. Coined in 1925.

The Sesquicentennial silver Half-dollar and the gold $2.50 piece, authorized by joint congressional resolution approved March 3, 1925, in commemoration of the one hundred and fiftieth anniversary of the signing of the Declaration of Independence. Coined in 1926.

The Oregon Trail silver Half-dollar authorized by Congress May 17, 1926, in commemoration of the heroism of the fathers and mothers who traversed the Oregon Trail to the Far West. Coined in 1928.

The Hawaiian Half-dollar was authorized by the act of March 7, 1928, to commemorate the one-hundred-fiftieth anniversary of the discovery of the Hawaiian Islands; it was coined in 1928.

Superfluous denominations.—New denominations have from time to time been added to the series of United States coins with the view of rendering them more serviceable for the retail trade of the country. These experiments began in 1849 with the addition of the Double-eagle and Dollar to the gold series, and was followed by the addition of a Three-cent silver piece in 1851, and a Three-dollar gold piece in 1854; in 1864 a bronze Two-cent piece was added and in the following year a nickel Three-cents, then the still-retained nickel Five-cent piece in 1866, and so on until the addition of the Trade-dollar in 1873 brought the number of denominations actually issued in that year up to seventeen. That many of these denominations were soon found to be useless and some of them very inconvenient is only what could be expected. Some of them, as the gold Dollar, the Half-dime, and Three-cent piece, were too small; the three-unit pieces belong to a duodecimal system and did not fit readily into a decimal system, while the large number of the series made it almost impossible to avoid having two denominations of nearly the same size, which was the case with the silver Dime and the nickel Three-cent piece, where the similarity of color of the two
metals aided their frequent confusion. The process of elimination soon began, and in 1889 the series was reduced to the present practical proportions.

**PATTERNS**

Apart from a slight artistic interest to be derived from comparison among themselves of objects that in but few cases rise above mediocrity, the chief interest of the large number of patterns for United States coins lies in numerous proposals of unusual denominations. Some of the patterns of this class embody the results of serious efforts to reach a solution of monetary problems, while others represent purely visionary theories. In the former class belong the goloid Dollar and the goloid metric Dollar, coins which, as their inscriptions reveal, were made of an alloy of silver and gold, in equal value, on the theory that the coin would preserve the same value amid the fluctuations in the value of silver. If the theory were sound, the coin would be unpractical because only an assayer could detect the presence of the gold in the piece, the color remaining that of silver. Another group of patterns is composed of those which were to serve as international coins. The proposition to add a four-dollar gold piece, to be denominated a Stella, was also considered in 1879, and in spite of the patent absurdity of it there seems to have been sufficient discussion to warrant the production of a few patterns in the following year, 1880.

In 1850 a gold pattern Dollar with a large central hole was submitted for consideration to the Treasury authorities, and in 1884 nickel Five-cent and One-cent patterns of similar design were offered. The purpose of the earlier suggestion was evidently to make a piece of larger diameter, and thus overcome the valid objection to the small size of a gold piece of that denomination. The suggestion of a nickel piece with a
central hole probably came from the practice of certain other countries. But there was no such reason for the device as existed where it served as a ready means of distinguishing the coins from those of a contiguous country using the same denomination and module.

Other unusual patterns are those of a Fifty-dollar gold piece produced in 1877. The question of larger gold coins had been mooted in Congress, suggested apparently by the rather extensive use of pieces of that value in the West, over which they had spread in former years from the private coinage establishments in California. Two splendid patterns were produced by Mr. William Barber, then engraver at the mint, but the project never advanced beyond that initial stage.

It would not be desirable here to enter into any discussion of the numerous patterns and varieties of these patterns which have been produced for the regular series of our coins.

**TOKENS AND PRIVATE COINS**

*Merchants' tokens.*—At two periods since the nation began to coin money there has arisen a stringency of small coins, which made it necessary for business firms to supply their wants by the issue of copper tokens redeemable in legal money by the firms which issued them. The first period to witness such an issue came in 1837, when many business houses had prepared for their use copper tokens of the size of the large copper Cent. The types of these tokens then, as usually, were of two principal classes, the one strongly political with devices and inscriptions giving vivid expression to the partisan slogans of the day; while the other bore simply the advertisement of the merchant who issued them. Again, in 1863, the dearth of small coins gave rise to an enormous issue of such tokens, at that time again in the module of the current bronze One-cent piece. These pieces are commonly known as “Civil War Tokens” and “Merchants’ Cards,” the former bearing types of a political character and the latter, as in 1837, having simply the names of business firms and advertisements.

Thousands of business houses throughout the Northern States resorted to the use of copper tokens issued in their own names; on the other hand, many of the so-called “Civil War Tokens” possess a general character and were evidently produced in quantities and sold wherever there was a demand for them.

*Private gold coins.*—Of an entirely different character are the privately issued gold pieces which were struck in Georgia and North Carolina, and also in the West after the discovery of gold in California and Colorado. The first privately issued gold pieces which readily went into circulation as coins were struck by Templeton Reid, an assayer, who in 1830 established himself near the gold mines in Lumpkin County, Ga., and converted the gold from the mines into a coin form. The example of Mr. Reid was soon followed by a Mr. Bechtler, at Rutherfordton, N. C.

There can hardly have been any reason of necessity for either of these enterprises, since neither community was beyond the reach of assay offices where gold could have been disposed of. But in the case of the Far West, the Government connived at the irregularity, regarding it...
as necessary under the circumstances. In fact, the Government opened negotiations with the firm of Moffat and Company with a view of having that company coin gold for the Treasury of the United States, but the decision to establish a mint at San Francisco rendered such an arrangement unnecessary. The production of gold "coins" of a private character in the West was very extensive and carried on by a large number of mining companies and banking establishments. The pieces thus issued ranged in value from 2½ dollars up to 50 dollars. While, as a rule, the form of this gold is the normal one of the usual coin, and in many cases the devices of the national coins were employed with legends suitable to the private character of the issuer, yet a few abnormal shapes are found among them. Thus an octagonal piece of the value of $50 was issued by August Humbert, a United States assayer; and of simpler form, the bar or ingot, with appropriate inscriptions attesting the fineness, weight, and value, and finally the name of the firm or assayer guaranteeing the correctness of the figures was issued by Moffat and Company, and by F. D. Kohler, the State assayer of California.¹

**THE MINTS OF THE UNITED STATES**

The mints of the United States are under control of a Bureau of the Mint at Washington, D. C., which was established in 1873, and is in charge of a Director of the Mint. The minting establishments of the United States, the marks by which their respective coins are distinguished, and also the dates of organization, and in some cases the dates of their suspension, are as follows:

<table>

The Quarter-dollar and Dime, like the Half-dollar, were reduced in weight in 1833, and thereby made subsidiary.

BIBLIOGRAPHY

HICKCOX, JOHN H. A Historical Account of American Coinage. 1858.

The following sales catalogues are of considerable value because of the rare pieces they include:
LORIN G. PARMLEE Collection, by New York Stamp and Coin Co., New York, N. Y., 1890.
MATTHEW A. STICKNEY Collection, by Henry Chapman, Jr., Philadelphia, 1907.

GLOSSARY OF TERMS

In order to render the catalogue more accessible to the layman who may wish to consult it, the following glossary of a few of the more important technical terms and expressions is given:
CATALOGUE OF COINS OF THE UNITED STATES

AV.—Gold.
AR.—Silver.
AE.—Copper, or bronze.
Obv.—Obverse, the side which bears the more important device or inscription, as the head of the monarch, the arms, and name of the State; and
Rev.—Reverse, the other side of the coin.
Edge.—The surface of the thickness of a coin.
Field.—The portion of the surface of a coin not occupied by the main device and principal inscriptions.
Type.—The type includes everything on the side of a coin; but type is also used to designate the device exclusive of the inscriptions.
Symbol.—A secondary device, generally in the field.
Exergue.—The portion of the reverse which is below the device, from which it is distinctly separated.
Head.—The head and any portion of the neck.
Bust.—The head including at least a portion of the collar bone.
Right and left.—The spectator's right and left.
Mint-mark.—A difference by which the coin struck by a particular mint is distinguished.

MEASUREMENTS

The measurements of the coins of the United States are given in sixteenths of the inch, the unit in common use in this country, and generally found in the literature of the subject. The measurements of the medals, where given, are in millimeters.
THE UNITED STATES OF AMERICA

ENGLISH COLONIES

MASSACHUSETTS

COINS

1. AR. Shilling, undated. Obv. N E (New England), in a small incused depression at top of the field, the remainder of the field being plain. Rev. Value, XII, in incused depression at top of the field, the remainder of the field being plain. Size, 18; wt., 72 grs.

2. AR. Shilling, 1652. Obv. MASATHVSETS IN. between two beaded circles; within the inner circle, an oak tree. Rev. NEWENGLAND. AN. DOM., between two beaded circles; within the inner circle, 1652 | XII. Size, 17; wt., 75 grs.

3. AR. Shilling, 1652. Obv. MASATHVSETS IN. between two beaded circles; within the inner circle, a pine tree. Rev. NEWENGLAND. AN. DOM., between beaded circles, and 1652 | XII within. Size, 19; wt., 70.2 grs.

4. AR. Shilling, 1652. Legends and types similar to No. 3, except that the letter N in New England is correctly placed. Size, 17; wt., 60.2 grs.

6. AR. Shilling, 1652. Similar to No. 5. Size, 16; wt., 64 grs.

The date, 1652, on Nos. 2–11, is without significance, as the dies were not altered in respect to the date after the first year of issue, so that some of the pieces bearing date of 1652 may have been struck later.
CATALOGUE OF COINS OF THE UNITED STATES

7. AR. Sixpence, 1652. 
   Obv. MASATHUSETS IN between beaded circles; within, pine tree. 
   Rev. NEWENGLAND. ANO., between beaded circles; within, 1652 | VI. 
   Size, 7; wt., 29.2 grs.

8. AR. Sixpence, 1652. 
   Similar to No. 7, but with a dot at each side of stem of tree. 
   Size, 8; wt., 12 grs.

   Obv. IN. MASATHVSET, between beaded circles, pine tree within circle. 
   Rev. NEWENGLAND, between two beaded circles; within inner circle, 1652 | III. 
   Size, 10½; wt., 27.5 grs.

    Similar to No. 9, but with rosette as stop after ENGLAND. 
    Size, 9; wt., 9.5 grs.

    Similar to No. 9, but with 1652 | II within circle on reverse. 
    Size, 8; wt., 10 grs.

MARYLAND

Coinage of Lord Baltimore for Maryland, about 1659

12. AR. Shilling, undated. 
    Rev. CRESCITE : ET : MULTIPLECAMINI. A crowned shield of arms; at sides, X — II. 
    Size, 15½; wt., 71 grs.

13. AR. Sixpence, undated. 
    Legends and types similar to No. 12, but with mark of value, V — I, on reverse. 
    Size, 14; wt., 38.5 grs.

14. AR. Groat, or Fourpence, undated. 
    Similar to No. 12, but with mark of value, I — V, on reverse. 
    Size, 10.

15. AE. Penny. 
    Obv. Similar to No. 12. 
    Rev. DENARIUM: TERRÆ-MARIAE. A ducal crown surmounted by two pennants. 
    Size, 13.

TOKENS

CAROLINA

16. AE. Penny, 1694. 
    Obv. An elephant standing to left. 
    Size, 28½.
CATALOGUE OF COINS OF THE UNITED STATES

The "Rosa Americana" tokens

21. AE. Penny, 1723. Similar to No. 20, but with period after AMERICANA. Size, 15.

22. AE. Halfpenny, 1723. Legends and types similar to No. 20. Size, 17.

Issued by John Higley, Granby, Connecticut

23. AE. Threepence, undated. *Obv.* VALUE. ME. AS. YOU. PLEASE. A deer standing to left, within a circle; below, | | |. *Rev.* I C T. MY. WAY. THROUGH. A broad-ax. 28 mm.

24. AE. Similar to No. 23; double struck.

VIRGINIA

28. AE. 1773. Electrotype copy of a variety of No. 26, without the period after GEORGIUS. Size, 18.
THE SOVEREIGN STATES FROM THE TREATY OF PEACE WITH ENGLAND TO THE ADOPTION OF THE CONSTITUTION OF THE UNITED STATES, A. D. 1783–1789

CONNECTICUT

COINS

30. AE. Cent, 1786. *Obv.* Similar to No. 29, but letters of inscription are smaller. *Rev.* Similar to No. 29, but the legend begins on right. Size, 18.

MASSACHUSETTS

34–35. AE. Cents, 1787. *Obv.* MASSACHUSETTS. An eagle displayed, bearing on breast a shield inscribed CENT; below, date. *Rev.* COMMON WEALTH. An Indian, standing, to left, with bow in right, and arrow in left, hand. 18 mm.

36. AE. Cent, 1788. Similar to No. 34, but from different die; the letters being smaller.

37. AE. Half-cent, 1787. Legends and types similar to No. 34, but variety with small letters in inscriptions as No. 36. Size, 14.

38. AE. Half-cent, 1788. Legends and types similar to No. 34. Size, 14.
NEW JERSEY

41. AE. Cent, 1787. Similar to No. 39, except the date; but of different die, the horse’s neck being larger. Size, 18.

42. AE. Cent, 1788. Similar to No. 39, except the date.

43. AE. Cent, 1788. Similar to No. 39, but with the horse’s head to left, and dated 1788. Size, 18.

VERMONT

NATIONAL CONGRESS

47. AE. Cent, 1787. “Fugio Cent.” *Obv.* UNITED STATES, on a small raised circle which incloses the words WE | ARE | ONE; around, thirteen rings inter­linked. *Rev.* A sundial with the hours indicated, and meridian sun above; to left, ♠ FUGIO ♠; to right, ♠ 1787 ♠; in exergue, MIND YOUR | BUSINESS. Size, 18.

48. AE. Cent, 1787. Similar to No. 47, but UNITED STATES reading from top right. Size, 18.

49. AE. Cent, 1787. Similar to No. 47, but with rings inscribed with names of States. Size, 19.
CATALOGUE OF COINS OF THE UNITED STATES

PATTERNS AND TOKENS

50. Tin. Pattern dollar, 1776. Obv. Between two circles AMERICAN CONGRESS; within the inner circle, \textit{we | are | one}; around the outer circle, rays which extend to an endless chain of thirteen round links, each inscribed with the name of one of the original States of the Union; on border, Pellets. Rev. Between two circles CONTINENTAL CURRENCY 1776; on the left, and occupying about one-third of the circumference, FUGIO; within the inner circle, sun shining upon a sundial; below, MIND YOUR BUSINESS. Size, 25.

51. Similar, but reading CURRENCY.

52. Tin. Pattern dollar, 1776. Similar to No. 50, with the sun placed higher up; between the two circles, surrounding the central device, on reverse, E. G. FECIT. Size, 25.

53. AE. Cent, 1781. Obv. NORTH AMERICAN TOKEN. A female, seated to left, her left hand resting upon a harp; below, 1781. Rev. A ship, sailing to left; above, COMMERCE. Size, 17.

ANNAPOLIS TOKENS

54–54a. AR. Shillings, 1783. Obv. I. CHALMERS, ANNAPOLIS. Two hands clasped, within a laurel wreath. Rev. 8. ONE SHILLING. 8. 1783. Within a circle of dots, the field divided by a horizontal, zigzag pattern, a serpent in upper part, and in lower, two doves, standing \textit{vis-à-vis} and holding a sprig of olive in their beaks. Edge reeded. Size 4\(\frac{1}{2}\); wt., 56.5 (54), and 57 (54a) grs.

54b. AR. Shilling, 1783. Similar to No. 54; pierced. Size, 14; wt., 53 grs.

The "Nova Constellatio"

57. AE. Cent, 1785. Similar to No. 56, with the letters, U. S., in script and interlaced, and reading LIBERTAS ET JUSTITIA on reverse. Size, 18.

"The Immune Columbia."

59. AV. Guinea, 1785. Obv. NOVA CONSTELLATIO. An eye in a glory, surrounded by thirteen stars. Rev. IMMUNE COLUMBIA. Columbia, seated to right; holds liberty pole in right, and scales in left hand; below, 1785. Size, 16; wt., 128.7 grs.

Struck over Guinea of George III, of 1775.

60. AE. Cent, 1785. Obv. IMMUNE COLUMBIA. Columbia, seated to right, supporting liberty pole and cap with right hand, and holding scales in left; below, 1787. Rev. CEORCIVS ★ III. REX. Laureated bust, cuirassed, to right.

61–62. AE. Cents, 1787. Obv. IMMUNIS COLUMBIA. Columbia seated r. on globe. Rev. E. PLURIBUS. UNUM. An eagle displayed, with olive branch in right claw and arrows in the left.

NEW YORK

63. AV. Doubloon, 1787 (E. BRASHER). Obv. ★ NOVA ★ EBORACA ★ COLUMBIA ★ EXCELSIOR. ★ The sun, rising over a mountain; in front, the sea; below, BRASHER. Rev. ★ UNUM ★ E ★ PLURIBUS. An eagle displayed, with shield (of the U. S.)
on breast, olive branch in right claw, and arrows in left; about head, thirteen stars; on right wing, e. b., incised; the whole within a laurel wreath; below, 1787. Size, 19 1/2; wt., 406.8 grs.

64. AR. Necessity piece. Mexican Peseta of 1785 with E B stamped on obverse.

65. AE. Cent, 1787. Obv. NOVA EBORAC. Laureated bust to right. Rev. VIRT. ET. LIB. Liberty seated to right, holding liberty pole and olive branch; beside her, shield of New York; below, 1787.

66. AE. Cent, 1787. Similar, but Liberty seated left.

67. AE. Cent, 1783. Obv. GEORGIVS. TRIUMPHO. A laureated bust to right. Rev. VOCE POPOLI. Liberty standing to left with olive branch in left hand and liberty pole in right; in front, a screen with thirteen vertical bars and a fleur-de-lis at each corner; below, 1783. Size, 18.

68. AE. Cent, undated (Kentucky Cent). Obv. E PLURIBUS UNUM. A pyramid of fifteen stars, each inscribed with the initial of the name of a State (the top one being marked K (Kentucky), hence the name), surrounded by rays. Rev. UNANIMITY IS THE STRENGTH OF SOCIETY. ★ A hand extending a scroll inscribed, OUR | CAUSE | IS | JUST. Size, 19.

69. Similar, but on edge: PAYABLE IN LANCASTER LONDON OR BRISTOL.
TOKENS AND PATTERNS WHICH PRESENT THE LIKENESS OF WASHINGTON

70. AE. Cent, 1783. *Obv.* WASHINGTON & INDEPENDENCE. Draped bust of Washington, laureate, to left; below, 1783. *Rev.* UNITY STATES OF AMERICA. Within an olive wreath, ONE | CENT.; beneath the wreath, 1/100. Size, 18.

71. AE. Cent, 1783. As No. 70.

72. AE. Cent, 1783. *Obv.* Similar to No. 70, but the bust is narrower. *Rev.* UNITED STATES. Liberty seated to left upon a rock by the sea, holding olive branch in extended right hand and with the left supporting a liberty pole surmounted by the cap. Edge, a central hatching. Size, 18.

73. AE. Cent, 1783. Similar to No. 72.

77–78. AE. Cents, 1791. *Obv.* WASHINGTON PRESIDENT. Bust of Washington in uniform to left; below, 1791. *Rev.* An eagle displayed, with shield on the breast, an olive branch in right claw, thirteen arrows in left; in beak, a scroll with UNION E PLURIBUS; above, on border, ONE CENT. Edge, UNITED STATES OF AMERICA. Size, 19.

79–80. AE. Cents, 1791. *Obv.* Similar to No. 77, without date beneath the bust. *Rev.* An eagle displayed, similar to No. 77, with eight stars about the head, and above, an arch of clouds extending from wing to wing; on border, above, ONE CENT; below, 1791. Edge, UNITED STATES OF AMERICA. Size, 19.

83. AE. Cent, 1792. *Obv.* WASHINGTON PRESIDENT. Bust of Washington to left, in uniform; beneath, 1792. *Rev.* An eagle displayed, having U. S. shield on breast, olive branch in right claw, and arrows in the left; in beak, a scroll inscribed UNUM E PLURIBUS; above, on border, thirteen stars. Size, 19½.

85. AE. Cent, 1792. *Obv.* G. WASHINGTON PRESIDENT. 1. Bust of Washington in uniform to left; beneath 1792. *Rev.* UNITED STATES OF AMERICA. An eagle displayed, with shield on breast, olive branch in the right claw, and arrows in the left; above, about the head, fifteen stars. Size, 21.

86. AE. Cent, 1792. Legends and types similar to No. 85, but with reeded borders. Size, 23.

90. AE. Cent, 1795. *Obv.* GEORGE WASHINGTON. Bust of Washington to right, in uniform. *Rev.* LIBERTY AND SECURITY. A heart-shaped shield, argent, fifteen pales gules, impaling azure, fifteen stars; above, an eagle displayed, with olive branch in right claw and arrows in left; below, divided by the shield, 17–95. Edge, PAYABLE AT LONDON LIVERPOOL OR BRISTOL. Size, 18.

91. AE. Cent, 1795. Similar to No. 90, but on the edge, BIRMINGHAM REDRUTH & SWANSEA.
EARLY AMERICAN TOKENS

AE. Similar to above.

One of the first private tokens struck in the United States
COINS STRUCK BY THE UNITED STATES OF AMERICA AFTER THE ESTABLISHMENT OF THE MINT AT PHILADELPHIA IN 1793

GOLD

Fifty-dollar, 1915. *Obv.* Octagon shape. Bust of Minerva with crested helmet to left; over shoulder a segment of a shield, inscribed M·C·M·X·V; upper left field, *IN GOD WE TRUST*; surrounded by two circles, the inner beaded, between which forming a continuous band, UNITED STATES OF AMERICA | FIFTY DOLLARS; in angles of octagon, eight dolphins. *Rev.* An owl perched on a pine branch, pine cones and needles filling lower field; middle right field, *E PLURIBUS UNUM*; in band similar to obverse, PANAMA-PACIFIC · EXPOSITION · SAN FRANCISCO; field right of cone, mint mark S; in angles of octagon, eight dolphins. Edge reeded. Size, 28. Models by Robert Aitken.

Fifty-dollar, 1915. Similar to above but round, and with dolphins omitted.

92. Double-eagle, 1849. *Obv.* Head of Liberty to left, with diadem inscribed LIBERTY; around, thirteen stars; beneath, 1849. *Rev.* UNITED STATES OF AMERICA. An eagle, displayed, with the shield of the United States on the breast; olive branch in right claw and three arrows in the left; in beak, a scroll extending symmetrically to left and right, and inscribed (left) E PLURIBUS – (right) UNUM; above, thirteen stars in form of an oval, and rays extending from wing to wing of the eagle; below, TWENTY D. Borders dentilated. Reeded edge. Size, 21; wt., 516 grs. By Longacre. Unique.

Coins of same design as No. 92, but bearing the year in which made, issued from 1850 to 1866.
109. **Double-eagle, 1866.** Similar to No. 92, but within the oval of stars, on reverse, *IN GOD WE TRUST,* and dated 1866.

Coins of same design as No. 109, but bearing the year in which made, issued from 1866 to 1877.

120. **Double-eagle, 1877.** Similar to No. 109, but the head of Liberty is larger and more centrally placed than in the original design of 1849, No. 92; and the stars are in different relation to the bust, so that the top of the diadem is between the sixth and seventh stars instead of below the seventh. On reverse, the value reads **TWENTY DOLLARS.**

Coins of same design as No. 120, but bearing the year in which made, issued from 1877 to 1907.

151. **Double-eagle, 1907.** *Obv. LIBERTY.* Liberty with long, loose hair, standing facing, on right foot, the left raised and resting upon a rock, in front of which lies an oak branch; she holds a torch in her right hand and an olive branch in the left; in the distance to left, the Capitol of the United States; to right, the date, M. C. M. V. and beneath the date *ASG* (Augustus Saint-Gaudens) in monogram; in background, rising sun; the whole within a circle of forty six stars. *Rev. UNITED STATES OF AMERICA | TWENTY DOLLARS.* An eagle flying to left athwart the rays of the rising sun. *Edge, E ★ PLURIBUS ★ UNUM ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★.*

The types of No. 151 are in very high relief; about 12,250 specimens of it were issued.

152. **Double-eagle, 1907.** Similar to No. 151, but with types in lower relief, and the date, 1907.

153. **Double-eagle, 1908.** Similar to No. 152, except date.

154. **Double-eagle, 1908.** Similar to No. 152, but on orb of the sun on reverse the motto, *IN GOD WE TRUST,* and dated 1908.

Coins of same design as No. 154, but bearing the year in which made, issued from 1908 to the present time; except in 1917, 1918, and 1919.

158. Eagle, 1796. Similar to No. 157, but with sixteen stars on the obverse, grouped eight to right and eight to left of LIBERTY, and dated 1796.

159. Eagle, 1797. Similar to No. 157, but with sixteen stars on the obverse, grouped twelve to left and four to right of LIBERTY, and dated 1797.

160. Eagle, 1797. *Obv.* Similar to No. 157, but with sixteen stars on the obverse, grouped ten to left and six to right of LIBERTY, and dated 1797. *Rev.* UNITED STATES OF AMERICA. An eagle displayed, bearing shield of the United States on the breast, arrows in the right claw and olive branch in the left; in beak, a scroll inscribed E PLURIBUS-UNUM; above the head, thirteen stars beneath an arch of clouds. Reeded edge. Size, 21.

161. Eagle, 1798. Similar to No. 160, but with thirteen stars on the obverse, grouped nine to left and four to right of LIBERTY, and dated 1798.

162. Eagle, 1798. Similar to No. 160, but with thirteen stars on the obverse, grouped seven to left and six to right of LIBERTY, and dated 1798.

163. Eagle, 1799. Similar to No. 160, but with thirteen stars on the obverse, grouped eight to left and five to right of LIBERTY, and dated 1799.

164. Eagle, 1800. Similar to No. 163, except date.

165. Eagle, 1801. Similar to No. 163, except date.

*Date changed from 1797. Such conversions were of frequent occurrence in the early period of the mint’s operations. Other examples are: Half-eagle, 1795 to 1796; quarter-eagle, 1804 to 1806; dime, 1809 to 1811; cents, 1799 to 1800, 1822 to 1823; half-cent, 1802 to 1803.*
166. Eagle, 1803. Similar to No. 163, but with small stars on reverse.

167. Eagle, 1803. Similar to No. 163, but with large stars on reverse.

167a. Eagle, 1804. Similar to No. 163, except date.

168. Eagle, 1838. *Obv.* Bust of Liberty to left, with hair knotted at back of head and secured by a cord of pearls; in hair a fillet inscribed LIBERTY; around, thirteen stars; below, 1838. *Rev.* An eagle, with wings displayed, the head turned to left, bearing on breast shield of the U. S., an olive branch in right claw and three arrows in the left; below, TEN D. Reeded edge. Size, 17; wt., 129 grs.

169. Eagle, 1839. Similar to No. 168, except date.

170. Eagle, 1840. Similar to No. 168, but the lock of hair has been removed from over the ear and the curls on forehead extend down to the ear, which is visible.

Coins of same design as No. 170, but bearing the year in which made, issued from 1840 to 1866.

196. Eagle, 1866. Similar to No. 170, but on a scroll above the eagle IN GOD – WE – TRUST.

Coins of same design as No. 196, but bearing the year in which made, issued from 1866 to 1907.

238. Eagle, 1907. *Obv.* Head of an Indian girl to left, with feather bonnet, the band of which is inscribed LIBERTY; above, thirteen stars; below, 1907. *Rev.* UNITED STATES OF AMERICA. An eagle, standing to left, upon a bundle of arrows on which lies an olive branch; to right, E | PLURIBUS | UNUM; below, TEN DOLLARS. Edge, 46 stars. By Saint-Gaudens. Compare Pl. VI, 4.

239. Eagle, 1908. Similar to No. 238, except date.

240. Eagle, 1908. *Obv.* Similar to No. 238, but to left of eagle, IN | GOD WE | TRUST.

Coins of same design as No. 240, but bearing the year in which made, issued from 1908 to 1916, in 1920, and in 1926.

**LIBERTY ★★★★★★★★★.** Draped bust of Liberty to right, with long, loose hair, and wearing liberty cap; below, 1795. *Rev.* UNITED STATES OF AMERICA. An eagle, with wings displayed, standing upon a palm branch, and holding aloft a wreath of laurel in bill. Border dentilated. Reeded edge. Size, 16; wt., 135 grs.

244. Half-eagle, 1795. *Obv.* Similar to No. 243. *Rev.* UNITED STATES OF AMERICA. An eagle displayed, bearing shield of the U. S. on breast; arrows in right claw and olive branch in the left; in beak, a scroll inscribed E PLURIBUS UNUM; above the head, sixteen stars beneath an arch of clouds. Reeded edge. Size, 16; wt., 135 grs.

245. Half-eagle, 1796. Similar to No. 243, except date.

246. Half-eagle, 1797. Similar to No. 244, but with fifteen stars on obverse, grouped ten to left and five to right of LIBERTY.

247. Half-eagle, 1797. Similar to No. 243, but with sixteen stars on obverse, grouped eleven to left and five to right of LIBERTY.

248. Half-eagle, 1798. Similar to No. 243, but with thirteen stars on the obverse, grouped eight to left and five to right of LIBERTY.

249. Half-eagle, 1798. Similar to No. 244, but on obverse thirteen stars, grouped eight to left and five to right of LIBERTY; and on reverse, thirteen stars above the head of the eagle.

Coins of same design as No. 249, but bearing the year in which made, issued from 1798 to 1805.

259. Half-eagle, 1806. Similar to No 249, but with thirteen stars on the obverse, grouped seven to left and six to right of LIBERTY and dated 1806.

261. **Half-eagle, 1807.** *Obv.* Draped bust of Liberty to left, the hair falling loosely about neck and shoulders, and wearing a liberty cap, the band of which is inscribed LIBERTY; around, ★★★★★★★★; below, 1807. *Rev.* UNITED STATES OF AMERICA. An eagle, with wings displayed, an olive branch in the right claw, and arrows in the left; above the eagle, a scroll with E PLURIBUS UNUM; below, 5 D. Reeded edge. Size, 16. By Reich.

Coins of same design as No. 261, but bearing the year in which made, issued from 1807 to 1813.

269. **Half-eagle, 1813.** *Obv.* Head of Liberty to left, the hair falling in ringlets on neck and shoulders, with liberty cap the band of which is inscribed LIBERTY; around, ★★★★★★★★★★★★★★; below, 1813. *Rev.* Similar to No. 261. Size, 16.

Coins of same design as No. 269, but bearing the year in which made, issued from 1813 to 1834, except in 1816 and 1817.

289. **Half-eagle, 1834.** *Obv.* Bust of Liberty to left, with fillet inscribed LIBERTY; her hair is wavy, and locks fall on neck; around, thirteen stars; below bust, 1834. *Rev.* UNITED STATES OF AMERICA. An eagle, with wings displayed, the head turned to left, bearing shield of the U. S. on breast; an olive branch in right claw and three arrows in left; below, 5 D. Reeded edge. Size, 14; wt., 129 grs.

Coins of same design as No. 289, but bearing the year in which made, issued from 1834 to 1839.

294. **Half-eagle, 1839.** *Obv.* Bust of Liberty to left, with hair in a knot at back of head and secured by rope of pearls; in hair, a fillet inscribed LIBERTY; around, thirteen stars; below, 1839. *Rev.* Similar to No. 289, except for variations in the olive branch and the position of the arrows in claws of the eagle, and the statement of value, which is FIVE D. Size, 14.

Coins of same design as No. 294, but bearing the year in which made, issued from 1839 to 1866.
321. **Half-eagle, 1866.** Similar to No. 294, but above the eagle on reverse a scroll bearing IN GOD – WE – TRUST.

Coins of same design as No. 321, but bearing the year in which made, issued from 1866 to 1908.

364. **Half-eagle, 1908.** *Obv.* In an incuse depression, bust of an Indian to left, with bonnet of eagle feathers, and a necklace of claws; around, ★★★★★★LIBERTY★★★★★★; below, 1908. Beneath the bust, B. L. P. (Bela Lyon Pratt). *Rev.* UNITED STATES OF AMERICA, incuse; an eagle, standing to left, upon a bundle of arrows on which lies an olive branch; the whole in an incuse depression; to left of the eagle, E | PLURIBUS | UNUM; to right, IN | GOD | WE | TRUST; below, FIVE DOLLARS. Without raised margin. Edge, reeded. Size, 13½.

Coins of same design as No. 364, but bearing the year in which made, issued from 1908 to 1916.

367. **Three-dollars, 1854.** *Obv.* UNITED STATES OF AMERICA. An Indian female head, to left, with feather bonnet, the band of which is inscribed LIBERTY. *Rev.* 3 | DOLLARS | 1854 | within a wreath of cotton and wheat. Edge, reeded. Size, 13; wt., 77.4 grs. By Longacre.

Coins of same design as No. 367, but bearing the year in which made, issued from 1854 to 1889.

404. **Quarter-eagle, 1796.** *Obv.* LIBERTY. Draped bust of Liberty to right, with long hair falling on neck and shoulders, and with liberty cap; beneath, 1796. (No stars on border.) *Rev.* UNITED STATES OF AMERICA. An eagle displayed, with shield of U. S. on breast, grasping arrows in right claw, and olive branch in the left; in beak, a scroll inscribed E PLURIBUS-UNUM; about the head, sixteen stars beneath an arch of clouds. Size, 13; 67.5 gr.

405. **Quarter-eagle, 1796.** Similar to No. 404, but on obverse ★★★★★★★ L I B E R T Y ★★★★★★★★.

406. **Quarter-eagle, 1797.** Similar to No. 404, but with thirteen stars on obverse, seven to left and six to right, of LIBERTY.
407. Quarter-eagle, 1798. Similar to No. 404, but with thirteen stars on obverse, grouped six to left and seven to right of LIBERTY, and thirteen on reverse above the head of the eagle.

408. Quarter-eagle, 1802. *Obv.* Similar to No. 404, but with thirteen stars, grouped eight to left and five to right of LIBERTY. *Rev.* Similar to No. 404, but thirteen stars about the head of the eagle.

409. Quarter-eagle, 1804. Similar to No. 408, but with fourteen stars over the head of eagle on reverse, and dated 1804.

410. Quarter-eagle, 1805. Similar to No. 408, but with thirteen stars on obverse, grouped seven to left and six to right of LIBERTY.

411. Quarter-eagle, 1806. Similar to No. 410, except date.

411a. Quarter-eagle, 1806. Similar to No. 408, but with thirteen stars, grouped eight to left and five to right of LIBERTY.

412. Quarter-eagle, 1807. Similar to No. 410, except date.

413. Quarter-eagle, 1808. Types similar to the Half-eagle, No. 261, but with mark of value, 2-1/2 D., beneath the eagle on reverse, and dated 1808. Edge, reeded. Size, 13.

Coins of same design as No. 414, but bearing the year in which made, issued from 1824 to 1834, except in 1828.

424. Quarter-eagle, 1834. *Obv.* Bust of Liberty to left, with fillet inscribed LIBERTY; her hair is wavy, and locks fall on neck; around, thirteen stars; below, 1834. *Rev.* UNITED STATES OF AMERICA. An eagle, with wings displayed, the head turned to left, bearing shield of the U. S. on breast; olive branch in right claw and three arrows in left; below, 2-1/2 D. Reeded edge. Size, 11 ½. Wt., 64.5 grs.

Coins of same design as No. 424, but bearing the year in which made, issued from 1834 to 1840.
430. **Quarter-eagle, 1840.** *Obv.* Bust of Liberty to left, with hair in a knot at back of head and secured by rope of pearls; in hair a fillet inscribed LIBERTY; around, thirteen stars; below, 1840. *Rev.* Similar to No. 424, but of different die, the olive branch in the eagle’s claw being much larger.

Coins of same design as No. 430, but bearing the year in which made, issued from 1840 to 1908.

498. **Quarter-eagle, 1908.** Similar to the Half-eagle, No. 364, but reading 2–1/2 D. below the eagle on reverse. Size, 11.

Coins of same design as No. 498, but bearing the year in which made, issued from 1908 to 1915, and in 1925, 1926, and 1927.

501. **Dollar, 1849.** *Obv.* Head of Liberty to left, with diadem inscribed LIBERTY; around, thirteen stars. *Rev.* UNITED STATES OF AMERICA. Within an olive wreath, 1 DOLLAR 1849. Reeded edge. Size, 8; wt., 25.8 grs.

1164a. Cent, 1793. Similar to No. 1164, but reading UNITED STATES OF AMERI. on reverse.

1165. Cent, 1793. *Obv.* Similar to No. 1164, but bust is longer, and below, three olive leaves on a stem that is turned to right. *Rev.* UNITED STATES OF AMERICA. Within a wreath, ONE | CENT; beneath the wreath, $\frac{1}{100}$; beaded borders. Size, 17½.

1166. Cent, 1793. Similar to No. 1165, but the stem of the olive twig is turned to left. Size, 17.

1167. Cent, 1793. *Obv.* LIBERTY. Bust of Liberty to right, a liberty pole surmounted by cap over left shoulder; below, 1793. *Rev.* UNITED STATES OF AMERICA. Within an olive wreath, ONE | CENT; below, $\frac{1}{100}$; beaded borders. Edge, ONE HUNDRED FOR A DOLLAR. Size, 18.

1168. Cent, 1794. Similar to No. 1167, except date.

1169. Cent, 1795. Similar to No. 1167, except date.

1170. Cent, 1795. Similar to No. 1167, but with a smaller and more compact wreath, reeded borders, and a plain edge. Size, 19.
1171. Cent, 1796. Similar to No. 1170, except date.

1172. Cent, 1796. *Obv.* LIBERTY (the letter B over an H). Draped bust of Liberty to right, with long hair falling on neck and back and two side locks drawn back and tied with a ribbon; below, 1796. *Rev.* Similar to No. 1167.

1173. Cent, 1797. Similar to No. 1172, but the word LIBERTY written without error.

Coins of same design as No. 1173, but bearing the year in which made, issued from 1797 to 1808.

1177. Cent, 1801. Similar to No. 1173, but reading **UNITED** in the legend on the reverse; and beneath the wreath, \( \frac{1}{2} \).

Coins of same design as No. 1186, but bearing the year in which made, issued from 1808 to 1814.

1196. Cent, 1817. Similar to No. 1194, but with fifteen stars on the obverse.

Coins of same design as No. 1194, but bearing the year in which made, issued from 1816 to 1836, except 1823.

1217. Cent, 1836. Similar to No. 1194, but the head of Liberty has been retouched, and slightly improved; the fillet in hair is broader than on earlier type.

Coins of same design as No. 1217, but bearing the year in which made, issued from 1836 to 1840.

1221. Cent, 1840. Similar to No. 1217, but the head of Liberty is smaller, the neck is longer, and the lock of hair which is turned under the bust is brought further forward. Size, 18.

Coins of same design as No. 1221, but bearing the year in which made, issued from 1840 to 1857.

1240. Cent, 1858. Similar to No. 1239, except date.

1241. Cent, 1859. *Obv.* UNITED STATES OF AMERICA. An Indian head to left, with feather bonnet, on band of which is LIBERTY; below, 1859. *Rev. one | cent |* within an olive wreath. By Longacre. Size, 12.

1242. Cent, 1860. *Obv.* Similar to No. 1241. *Rev. one | cent |* within an oak wreath, with three arrows inserted under the ribbon that binds the two branches of the wreath; above, between the ends of the branches, shield of the United States. Size, 12.

Coins of same design as No. 1242, but bearing the year in which made, issued from 1860 to 1864.

**BRONZE**

1247. Cent, 1864. Types similar to No. 1242, but thinner and lighter, and dated 1864. Wt., 48 grs.

1294. Cent, 1909. *Obv.* Bust of Abraham Lincoln to right; above, IN GOD WE TRUST; to left, LIBERTY; to right, 1909. *Rev. one | cent | United States | of America |* between two wheat heads; above, E PLURIBUS UNUM.; below, on margin, v. d. b. (Victor D. Brenner)

1296. Cent, 1909. Similar to No. 1294, but initial v. d. b. omitted from reverse.

Coins of same design as No. 1296, but bearing the year in which made, issued from 1909 to 1928.
1298. **Half-cent, 1793.** *Obv.* **LIBERTY.** Bust of Liberty to left, with long, loose hair; over right shoulder, pole surmounted by liberty cap; below, 1793. *Rev.* **UNITED STATES OF AMERICA.** Within a wreath of olive, half | cent; below wreath, \(\frac{1}{20}\). Edge, two hundred for a dollar. Size, 14.

1299. **Half-cent, 1793.** Similar to No. 1298, except for minor variations in the wreath.

1300. **Half-cent, 1794.** *Obv.* **LIBERTY.** Bust of Liberty to right, with long, loose hair; over left shoulder, pole surmounted by liberty cap; below, 1794, in large figures placed near bust. *Rev.* Similar to No. 1298, but the wreath is larger, and less compact; the ends of the ribbon uniting the branches are symmetrically arranged about the fraction \(\frac{1}{20}\). Edge as No. 1298.

1301. **Half-cent, 1794.** Similar to No. 1300, but date is smaller and placed lower.

1302. **Half-cent, 1795.** Similar to No. 1300, except date.

1303. **Half-cent, 1796.** Similar to No. 1300, except date.

1304. **Half-cent, 1797.** Similar to No. 1300, except date.

1305. **Half-cent, 1800.** *Obv.* **LIBERTY.** Draped bust of Liberty to right, with long, loose hair, two side locks drawn back and tied with a ribbon; below, 1800. *Rev.* **UNITED STATES OF AMERICA.** Within an olive wreath, half | cent, and \(\frac{1}{20}\) beneath the wreath. Size, 15.

1306. **Half-cent, 1802.** Similar to No. 1305, but with 2 over 0 in date.

1307–8. **Half-cent, 1803.** Similar to No. 1305, except date.

1309. **Half-cent, 1804.** Similar to No. 1305; the crossbar of the numeral 4 has a perpendicular finishing stroke, and the ends of the stems of the branches forming the wreath are omitted.

1310. **Half-cent, 1804.** Similar to No. 1309, except date.

1311. **Half-cent, 1805.** Similar to No. 1309, except date.

1312. **Half-cent, 1806.** Similar to No. 1305, except date.

1315. Half-cent, 1808. Similar to No. 1305, except date.

Coins of the same design as No. 1316, but bearing the year in which made, issued in 1810, 1811, 1825, 1826, 1828, and 1829.

1323. Half-cent, 1831. Similar to No. 1316, but with beaded border, a higher milling, and smaller figures in the date.

Coins of the same design as No. 1323, but bearing the year in which made, issued from 1831 to 1836.

1329. Half-cent, 1840. *Obv.* Around, ★★★★★★★★★★ ★★★★ Bust of Liberty to left, with hair knotted at back of head and with fillet, inscribed LIBERTY; below, 1840. *Rev.* UNITED STATES OF AMERICA. Within a wreath of a single laurel branch, HALF | CENT.

Coins of the same design as No. 1329, but bearing the year in which made, issued from 1840 to 1857.

**PATTERNS**

1348. AV. Five-eagles ($50.00), 1877. *Obv.* Head of Liberty to left, with beaded diadem inscribed LIBERTY; a scroll and trefoil ornament runs along base of diadem; the hair, which is straight, in knot at back of head, with large locks falling down neck; around, thirteen stars; below, 1877. Beneath the head, B (William Barber). *Rev.* Similar to the Double eagle of 1849, No. 92, but reading FIFTY DOLLARS beneath the eagle on reverse. Edge, reeded. Size, 32; wt. 1,287.9 grs. (normal weight 1,290 grs.). Unique.

1349. AV. Five-eagles ($50.00), 1877. Similar to No. 1348, except that the head of Liberty is larger, the hair is wavy, and the diadem is plain. Wt., 1,289.9 grs. Unique.

1350. AE. Five-eagles ($50.00), 1877. Similar to No. 1348.
1351. AV. Double-eagle, 1860. Similar to No. 92, the Double eagle of 1849, but the oval of stars above the eagle on reverse is lower and does not touch the rays.

1352. AV. Double-eagle, 1865. Similar to No. 92, but within the oval of stars on reverse, IN GOD WE TRUST.

1353. AE. Double-eagle, 1872. Obv. Head of Liberty to left, with long loose hair falling below neck, and with liberty cap, on the band of which, LIBERTY; around, ★★★★★★★★★★★★★; below, 1872. Rev. UNITED STATES OF AMERICA. An eagle with wings displayed inverted, the head turned to left, with three arrows in right claw, the left upraised and grasping shield of the United States, across which falls a scroll inscribed IN GOD WE TRUST; below, TWENTY DOL. Edge, reeded. Size, 21½. By W. Barber. Nos. 1353, 1364, 1378, 1390, 1391, and 1396 form a series with identical types.

1354. AE. Double-eagle, 1879. Obv. Head of Liberty similar to No. 92, the Double eagle of 1849; around, ★ 30 ★ G. ★ 1.5 ★ S. ★ 3.5 ★ C ★ 35 ★ G ★ R ★ A ★ M ★ S ★; below, 1879. Rev. Similar to No. 92, but with DEO EST GLORIA in the oval of stars above the eagle, and below the eagle reading, TWENTY DOL­LARS. Edge, reeded. Size, 22. Longacre.

1355. AV. Double-eagle, 1906. Obv. Draped bust of Liberty to left, with liberty cap, on the band of which is LIB­ERTY; over the cap, branch of olive; around, thirteen stars; below, 1906. Rev. UNITED STATES OF AMERICA. Columbia, standing, with head turned to left, holding liberty pole in left hand, the right resting upon a sword; behind, an eagle standing to right, with wings upraised; about head of Columbia, rays through which runs the motto IN GOD WE TRUST. Edge, E★P★L★U★R★I★B★U★S★U★M★. By C. E. Barber.

1356. AV. Double-eagle, 1907. Legends and types similar to No. 151, but the types are in very high relief, the field is concave, and without a raised border.
1357–58. AV. Double-eagle, 1907. As last, but size 17, the module of the Eagle. The only specimens of this pattern.

1359. AE. Eagle, 1862. Types similar to No. 168, the Eagle then coined, but above the eagle on reverse, GOD OUR TRUST.

1360–61. AE. Eagle, 1862. Types as last, but the motto GOD OUR TRUST is on a scroll. Size, 17.

1362. AV. Eagle, 1865. Types similar to last, but the scroll has two folds and the motto reads IN GOD – WE – TRUST.

1363. AL. Eagle, 1868. Obv. Head of Liberty to left, with diadem inscribed LIBERTY; around, thirteen stars; below, 1868. Rev. Similar to last.

1364. AE. Eagle, 1872. Similar to No. 1353, pattern of Double eagle of same year.

1365. AE. Eagle, 1874. Proposed international coin. Obv. UNITED STATES OF AMERICA. Head of Liberty to left, with a coronet adorned with five stars and a jewel in front; on the coronet, LIBERTY; the hair is wavy and in flat knot at back of head; an olive branch across the shoulder; below, 1874. Rev. In six compartments surrounded by rope, the value in six national units:

1366. AE. Eagle, 1877. Obv. Head of Liberty to left, with liberty cap, on the band of which is LIBERTY; around, E PLURIBUS UNUM; beneath, 1877. Rev. UNITED STATES OF AMERICA. An eagle, with wings displayed erect, an olive branch in the right claw and three arrows in left; above, IN God we trust; below, TEN DOL. Beaded borders. Edge, reeded. Size, 17. By Morgan.
1367-8. AE. Eagle, 1878. Similar to last.

1369. AE. Eagle, 1878. Obv. Head of Liberty to left, with liberty cap, on the broad band of which is LIBERTY; wheat heads over top of cap; around, ★★★★★★★ IN GOD WE TRUST ★★★★★★; below, 1878. Rev. UNITED STATES OF AMERICA. An eagle, with wings displayed erect, the left wing thrown out farther than the right; olive branch in right, and arrows in left, claw; above, e pluribus unum; below, ★ TEN DOLLARS. ★ Edge, reeded. W. Barber.

1370-1. AV. Eagle, 1907. Legends and types similar to the Eagle, No. 238, but the border is not raised, and dots between the words of the inscriptions and at the beginning of the same. First impressions of the dies. By Saint-Gaudens.

1372-3. AV. Eagle, 1907. Similar to last, but with a narrow raised border.

1374. AE. Half-eagle, 1860. Obv. Bust of Liberty to right, with liberty cap; on forehead, three stars; across shoulder, a ribbon inscribed LIBERTY; around, thirteen stars; below, 1860. Rev. UNITED STATES OF AMERICA. An eagle with wings displayed erect; on breast, shield of the U. S.; an olive branch in right claw and three arrows in the left; in beak, a scroll inscribed E PLURIBUS UNUM; below, FIVE DOLLARS. Edge, reeded. Size, 17½.

1375. AV. Half-eagle, 1865. Similar to the Eagle, No. 168 but on a scroll above eagle on reverse, IN GOD — WE — TRUST.

1378. AE. Half-eagle, 1872. Legends and types similar to No. 1353, but reading FIVE DOL. beneath the eagle on reverse. Edge, reeded. Size, 14.

1381–2. AE. Half-eagle, 1878. Types similar to No. 1369, but with the motto E PLURIBUS UNUM in two lines above the eagle, and reading FIVE DOLLARS beneath eagle. Edge, reeded. Size, 14.

1383–4. AE. Half-eagle, 1878. Obv. Head of Liberty to left, with fillet inscribed LIBERTY; her hair falls in ringlets on neck; around, E PLURIBUS UNUM; below, 1878. Rev. UNITED STATES OF AMERICA. An eagle, with wings displayed inverted, grasping olive branch in right claw and in left three arrows that extend past the wing; below, FIVE DOLLARS. Edge, reeded. Size, 16. By W. Barber.

1385–6. AE. Half-eagle, 1878. Obv. Head of Liberty to left, with double fillet, the forward one inscribed LIBERTY; around, E PLURIBUS UNUM; below, 1878. Rev. UNITED STATES OF AMERICA. An eagle, with wings displayed inverted, grasping olive branch in right and three short arrows in left claw; below, FIVE DOLLARS. Edge, reeded. Size, 16. By Morgan.

1387–8. AE. Half-eagle, 1878. Similar to the last, but in curved line round over the eagle, IN GOD WE TRUST; and reading FIVE DOL. below eagle. Edge, reeded. Size, 16.

1389. AV. “Stella” ($4.00), 1879. Obv. Head of Liberty to left, with fillet inscribed LIBERTY; the hair falls in ringlets on neck; around, ★ 6 ★ G ★ .3 ★ S ★ .7 ★ C ★ 7 ★ G ★ R ★ A ★ M ★ S ★ ; below, 1879. Rev. UNITED STATES OF AMERICA. A five-pointed star, on which ONE [STELLA | 400 | CENTS; above (curved line), E PLURIBUS UNUM; beneath star (curved line), DEO EST GLORIA; below, FOUR DOL. Edge, reeded. Size, 14. By C. E. Barber.

1390. AE. Three-dollars, 1872. Legends and types similar to No. 1353, but reading THREE DOL. beneath the eagle on reverse. Edge, reeded. Size, 13.
1391. **AE. Quarter-eagle ($2.50), 1872.** Legends and types similar to No. 1353, but reading 2½ DOL. beneath the eagle on reverse. Edge, reeded. Size, 11½.

1392. **AE. Quarter-eagle ($2.50), 1878.** Legends and types similar to No. 1385, but reading 2½ DOLLARS beneath the eagle on reverse. Edge, reeded. Size, 13.

1393. **AV. Dollar, 1836.** *Obv.* A liberty cap in a glory; the band of the cap inscribed LIBERTY. *Rev.* UNITED STATES OF AMERICA. Within a palm wreath, 1 D. Edge, plain. Size, 10.

1396. **AE. Dollar, 1872.** Legends and types similar to No. 1353, but reading ONE DOL. beneath the eagle on reverse. Edge, reeded. Size, 10.

1397. **AV. Half-dollar, 1850.** "Ring" piece. Similar to No. 1394. Size, 9½; wt., 13 grs.

**SILVER**

1398. **AR. Dollar, 1836.** *Obv.* Liberty, wearing a Greek chiton, the neck and arms bare, seated to right upon a rock, her head turned to left; she holds pole surmounted by liberty cap in left hand, her right supporting shield of the U. S., across which falls a scroll inscribed LIBERTY; beneath the seat, GOBRECHT; below, 1836. *Rev.* UNITED STATES OF AMERICA. An eagle flying to left; in field, twenty-six stars of varying sizes; below, ONE DOLLAR. Edge, plain. Size, 24. By Gobrecht.
1399. AR. Dollar, 1838. *Obv.* Similar to No. 1398, but thirteen stars around, and engraver's name omitted. *Rev.* Flying eagle as No. 1395, but no stars in field. Edge, reeded.

1400. AR. Dollar, 1839. Similar to No. 1399, except date.

1401. AR. Dollar, 1865. Types similar to No. 570, the Dollar then coined, but on a scroll above the eagle on reverse, *In God — We — Trust.*

1402. AR. Dollar, 1870. *Obv.* An Indian woman, wearing a feather bonnet, seated to left on a globe; she holds liberty pole surmounted by cap in right hand, the left resting on the globe, which is inscribed *Liberty*; to right, two flags; around, thirteen stars; below, 1870. *Rev.* UNITED STATES OF AMERICA. An eagle with wings displayed, as No. 570; above, on a scroll, *In God — We — Trust.* Design in very high relief. Edge, reeded. By Longacre.

1403. AR. Dollar, 1870. *Obv.* Liberty, wearing Greek chiton, seated to left, her right hand supporting shield of U. S., and holding a ribbon inscribed *Liberty*; in the left, an olive branch; in background stands a liberty pole surmounted by cap; around, thirteen stars; below, 1870. *Rev.* As No. 1402. Edge, reeded. By W. Barber. Nos. 1403, 1462, 1486, 1510, and 1519 form a series with identical types except reverses of Dime and Half-dime.

1405. AE. Dollar, 1872. Commercial dollar. *Obv.* Similar to No. 1402, but the relief of the type is lower. *Rev.* UNITED STATES OF AMERICA. Within an olive wreath, COMMERCIAL | DOLLAR | 420 GRAINS | 900 FINE; on a ribbon uniting the branches, GOD—OUR—TRUST. Edge, reeded.
Nos. 1406 to 1416 are patterns submitted for the Trade dollar, 1873

1406. AR. I. Dollar, 1873. *Obv.* Similar to No. 1402, but with type in lower relief. *Rev.* UNITED STATES OF AMERICA. A small eagle, wings displayed inverted, the head turned to right; in right claw, three arrows, and an olive branch in the left; above, on a scroll, E | PLURIBUS | UNUM; below, 420 GRAINS | 900 FINE, beneath which is a scroll inscribed IN GOD—WE—TRUST; below, ★ TRADE DOLLAR ★. Edge, reeded. By Longacre.

1407. AE. Dollar, 1873. Similar to No. 1406.

1408. AR. II. Dollar, 1873. *Obv.* Liberty, wearing Greek chiton, with beaded diadem, seated to left upon a globe on which is LIBERTY, holding liberty pole in right hand, her left resting upon the globe; at her feet, to left, bale of goods; behind, plow and sheaf of grain; around, above, thirteen stars; beneath, 1873. *Rev.* UNITED STATES OF AMERICA. An eagle, with wings displayed inverted, grasping in right claw three long arrows which project past the wing, the left upraised and holding a shield of the U. S., across which falls a ribbon inscribed IN GOD WE TRUST; in beak of eagle, a scroll inscribed E PLURIBUS UNUM; beneath, 420 GRAINS 900 FINE, and below, on margin, ★ TRADE DOLLAR ★. Edge, reeded. By W. Barber.

1409. AE. Dollar, 1873. Similar to No. 1408.

1410. AR. III. Dollar, 1873. *Obv.* Head of Liberty, to left, with beaded diadem, on which is LIBERTY; the hair in a knot at back of head and secured by a comb; around, above, thirteen stars; below, 1873. *Rev.* UNITED STATES OF AMERICA. Within an olive wreath, TRADE | DOLLAR | —.—— | 420 GRAINS | 900 FINE; over the stems of the branches forming the wreath, a ribbon inscribed IN GOD—WE—TRUST. Edge, reeded. By W. Barber.

1411. AE. Dollar, 1873. Similar to No. 1410.
1412. AR. IV. Dollar, 1873. *Obv.* Liberty, with diadem, wearing Greek chiton, seated to left on a bale of goods by the sea; in right hand she extends an olive branch, her left, which hangs by her side, holds a scroll inscribed LIBERTY; behind, a sheaf of grain; beneath, on a scroll, IN GOD WE TRUST; around, above, thirteen stars; below, 1873. *Rev.* UNITED STATES OF AMERICA. An eagle with wings displayed inverted, the head turned to left, grasping olive branch in right claw, three long arrows in left; in beak, a scroll inscribed E PLURIBUS – UNUM; beneath, 420 GRAINS, 900 FINE; below, on margin, TRADE DOLLAR. Edge, reeded. By W. Barber.

CONFEDERATE STATES OF AMERICA

There are seemingly well-authenticated records that the Confederate States of America, after seizing the mint at New Orleans, made preparations for the coinage of money. Especially, a reverse die was made for a Half-dollar with which it was proposed to use the obverse die of the then current Half-dollar of the United States. The specimen here described is a United States Half-dollar restruck with a restored die, copied from one of the very few alleged genuine specimens of the Confederate States Half-dollar.

1689. AR. Half dollar. Obv. Liberty, seated to right, the head turned to left, holding liberty pole surmounted with the cap in left hand, the right hand resting on shield of the United States, across which falls a ribbon inscribed LIBERTY. Rev. CONFEDERATE STATES OF AMERICA. A shield argent with seven pales gules, a chief azure seven stars, four and three; surmounted with liberty pole and cap; the whole within a wreath of cotton and palm branches; below HALF DOL.

1690. AE. One cent token. This piece was of private origin. Obv. CONFEDERATE STATES OF AMERICA. Head of Liberty to left, with liberty cap having six stars on the band; below, the date, 1861. Rev. 1 | CENT within a wreath of cane and cotton, and wheat, springing from two sugar casks between which is a bale of cotton. Size, 12.
