II

LETTER OF TRANSMITTAL

DEPARTMENT OF COMMERCE,
BUREAU OF THE CENSUS,
Washington, D. C., May 2, 1924.

SIR:

I transmit herewith a decennial report on public debt in all States and the District of Columbia, which was prepared in connection with the decennial investigation on wealth, public debt, and taxation authorized by the permanent census act. The reports for 1922 are issued under five titles, as follows: (1) Estimated national wealth, (2) Public debt, (3) Assessed valuation and tax levies, (4) Taxes collected, and (5) Digest of State laws relating to taxation and revenue.

The report was prepared under the direction of Starke M. Grogan, chief statistician in charge of wealth, public debt, and taxation, assisted by Lemuel A. Carruthers, expert chief of division. The text discussion was prepared by Morris J. Hole, expert special agent.

Respectfully,

W. M. STEUART,
Director of the Census.

Hon. HERBERT HOOVER,
Secretary of Commerce.

PUBLIC DEBT

INTRODUCTION

Scope of this report.—The statistics in this report relate to the gross and net debt of the National Government, the 48 States and the District of Columbia, counties, cities, towns, villages, school districts, townships, drainage districts, and all other civil divisions having power to incur debt.

Fiscal year.—The statistics for the National Government are for the year which ended June 30, 1923, and those for the governments of the States, counties, cities, and all other civil divisions having power to incur debt, are for the fiscal year which ended in the calendar year 1922.

Terms employed.—In order that the statistics contained in the tables of this report may be properly interpreted, the classification employed in their compilation and the significance of the terms used in the tabulation of the data are pointed out in the paragraphs which follow.

Gross debt.—The gross debt is the total debt of every character which a civil division is under obligation to pay, and includes, (1) funded or fixed debt, (2) special assessment loans, and (3) revenue loans, outstanding warrants, and other current debt.

Net debt.—The net debt is the gross debt described above, less the assets held in sinking funds for the retirement of such debt.

Funded or fixed debt.—Among the most important classes of debt to be reported as funded or fixed are those locally known as general bonds, serial bonds, corporation stock, certificates, serial notes, and mortgages. Under this head are included, also, indebtedness to public trust funds not evidenced by formal bonds or certificates of indebtedness and certain other forms of debt not considered current debt.

Special assessment loans.—Under this head are included bonds, certificates, and other long-term or short-term obligations outstanding which have been issued or incurred with the distinct understanding that they are to be paid wholly or in part from the proceeds of special assessments apportioned according to the assumed benefits to the property affected by the improvements thereby secured.

All other debt.—Included under the term "All other debt" are (1) all interest-bearing short-term obligations other than the so-called serial bonds, among which are those popularly known as revenue bonds, revenue loans, anticipation tax loans and tax warrants, temporary loans, and similar obligations; (2) outstanding warrants, orders, and audits; and (3) all other current debt outstanding at the close of the year.

Total and per capita public indebtedness.—Table I, which follows, presents a summary of the total and per capita debt of the National Government less cash in the Treasury; and the total and per capita debt less sinking fund assets of the governments of the 48 States, and of counties, incorporated places, and all other civil divisions for 1922, 1912, 1902, and 1890. The debt of the District of Columbia, which is coterminous with the city of Washington, is included in that of "Incorporated places."

The totals of this table show the aggregate of all indebtedness resting upon the people of continental United States on account of all the governments exercising jurisdiction within that area.

The per capita amounts shown in the tables of this report are based on exact totals. In some cases, therefore, they will differ slightly from calculations that may be made by using as bases the amounts shown in the table, which are only approximately exact because of adjustment to the nearest thousand.

The population figures used in calculating per capita amounts for States represent, for each State, the estimated population at the middle of the fiscal year which ended in the calendar year 1922, except in cases of 3 of the States—Vermont, Mississippi, and Nevada. They represent the estimated population of 21 States on January 1, 1922, 1 on March 1, 8 on April 1, 8 on June 1, and 7 on July 1. The Bureau of the Census has made no estimates of population for Vermont, Mississippi, and Nevada, the population of which decreased from 1910 to 1920; for each of these States the population used in computing per capita amounts was that shown by the census of January 1, 1920.

In computing the per capita amounts for incorporated places and for counties, the dates as of which the estimates were made were as follows: (1) For incorporated places having a population of over 30,000, the estimated population at the middle of the fiscal year, except in case of decrease of population from 1910 to 1920 in which case the population on January 1, 1920, was used; (2) for incorporated places having a population from 8,000 to 30,000 and for counties the estimated population on July 1, 1922, except in case of decrease of population from 1910 to 1920 in which case the population on January 1, 1920, was used; and (3) for incorporated places having a population of less than 8,000 the population as enumerated on January 1, 1920, was used.

The data relative to the indebtedness of the States and other civil divisions are presented in considerable detail in the general tables of this report, and are briefly discussed in the text for those tables. The national debt is shown only in Table I.

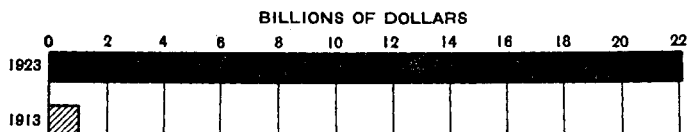

DIVISION OF GOVERNMENT	TOTAL AND PER CAPITA GROSS DEBT LESS SINKING FUND ASSETS: 1922-1890							
	Totals (expressed in thousands)				Per capita			
	1922	1912	1902	1890	1922	1912	1902	1890

¹ The total national debt for the years shown in this table, 1922, 1912, 1902, and 1890, is the gross debt less cash in the Treasury at the end of the fiscal year, June 30, 1923, 1913, 1903, and 1891.

² Indebtedness of 1891; that of 1890 not available.

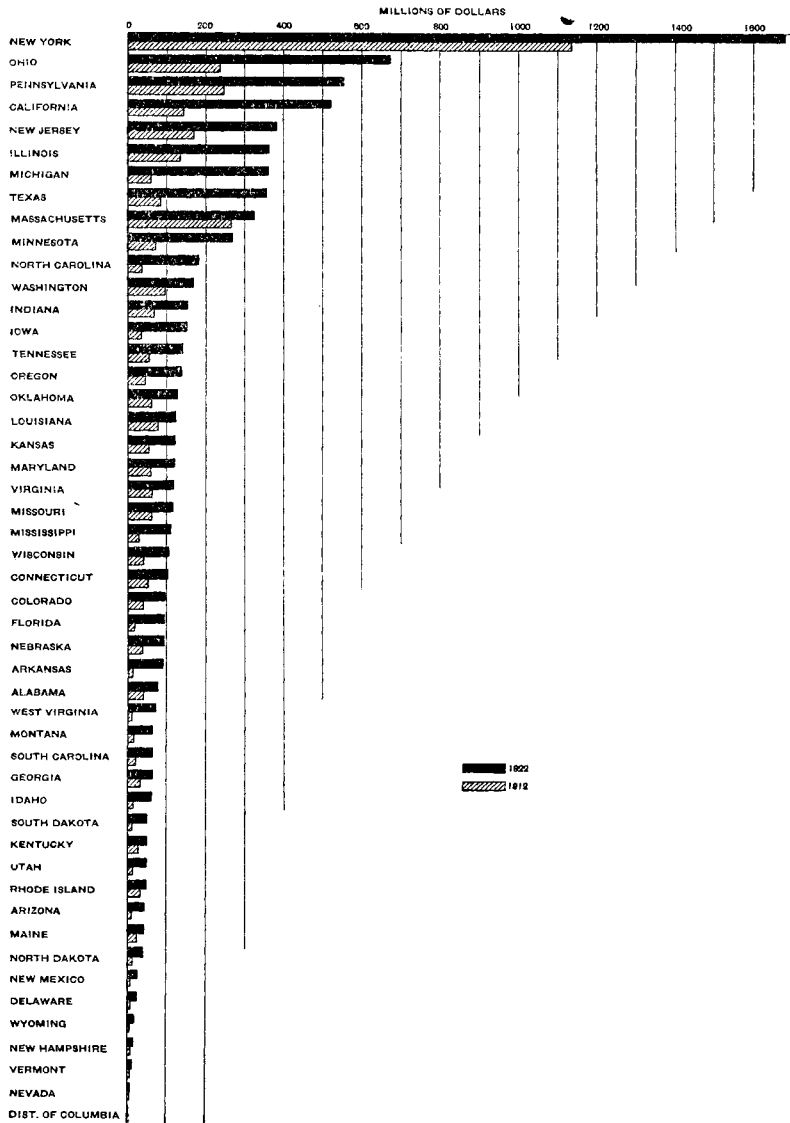

The relative amounts of indebtedness of the National Government in 1923 and 1913 are shown graphically in Diagram 1.

Diagram 1.—TOTAL DEBT OF THE NATIONAL GOVERNMENT LESS CASH IN TREASURY: 1923 AND 1913

The relative amounts of indebtedness of States, counties, cities, and all other civil divisions in 1922 and 1912 are shown graphically in Diagram 2.

Diagram 2.—TOTAL DEBT LESS SINKING FUND ASSETS OF STATES, COUNTIES, CITIES, AND ALL OTHER CIVIL DIVISIONS HAVING POWER TO INCUR DEBT: 1922 AND 1912

101063-24†—2

Net debt of the National Government.—The very great increase in the net indebtedness of the National Government from 1913 to 1923 is only in part comparable to the increases shown for the States and for other civil divisions, the major portion having been incurred on account of war purposes. In one particular, however, the National Government and the State and local governments were under a common necessity, in that war prices affected all of them. Many of the local governments, even when curtailing their regular services and improvements, as measured in units of service and of improvement, were nevertheless compelled to increase abnormally their indebtedness as measured in dollars having a diminished purchasing power as compared with those of 1912 and the former years during which the debts reported for 1912 were contracted.

The obligations of foreign countries to the United States constitute a very important offset to the national debt, as the acts authorizing them provide that receipts on their account shall be used in payment of bonds of the United States. The amount of the claims of the United States against foreign countries on account of loans to them during the World War was placed at \$11,800,010,245 on November 15, 1923; and of this total Great Britain owed \$4,600,000,000, as agreed upon by the two Governments. At such time as all the foreign loans of this character shall be reduced to exact amounts and payments shall begin under agreements negotiated relative thereto which provide for the ultimate extinction of the debts, it may be proper to construe these offsets as in the nature of sinking fund assets in the computation of the net debt of the National Government.

Per capita net debt of the National Government.—The per capita indebtedness of the Nation as shown in the table is based upon the population of the 48 States and the District of Columbia, as is usual in expressing an average participation of individuals in features of the Federal finances. It should be remembered, however, that the outlying possessions of the United States contribute, though in widely varying ways and degrees, to the revenues of the Federal Government, and thus contribute to the funds provided for the payment of debt. If the populations of those possessions could be properly weighted as to their degree of contribution as compared with that of the population of continental United States, it would be possible to compute per capitas for the Nation slightly less than those shown in the table.

Increase in net indebtedness.—The total debt less the sinking fund assets of the National Government, State governments, and all other civil divisions in continental United States in 1922 amounted to \$30,845,626,000. This is an increase of \$25,995,166,000, or 535.9 per cent, over the amount reported for 1912. During the period from 1902 to 1912 the net debt increased \$2,015,968,000, or 71.1 per cent; from 1890 to 1902 it increased \$845,379,000, or 42.5 per cent.

The net debt of the National Government increased \$21,127,322,000, or 2,054.1 per cent, from June 30, 1913 to June 30, 1923; \$59,107,000, or 6.1 per cent, from June 30, 1902 to June 30, 1913; and \$117,544,000, or 13.8 per cent, from June 30, 1891 to June 30, 1902.

The net debt of States, counties, incorporated places, and all other civil divisions is presented in Table II, by States, together with the increase for 1912 to 1922, 1902 to 1912, and 1890 to 1902, the per capita net debt for 1922, 1912, 1902, and 1890, and the per cents of the total net debt represented by the net debts of the States, counties, and all other civil divisions, 1922.

Some of the very considerable increases in the debts of States during the 10-year period were because of bonds issued to finance the States' payments on account of the soldiers' bonus, as an extraordinary payment in large amount could not be immediately financed through the usual processes of taxation.

DESCRIPTION OF GENERAL TABLES

Number and character of general tables.—Tables 1 to 8, inclusive, present statistics of the indebtedness of the governments of the States, counties, cities, towns, villages, school districts, townships, drainage districts, and all other civil divisions having power to incur debt.

Civil divisions for which debt was reported.—The authority to incur debt is conferred on counties, cities, and other civil divisions by legislative acts, and those acts vary widely in the several States. The following statement presents a list of the civil divisions which reported indebtedness.

Alabama.—Counties, incorporated places, and towns.

Arizona.—Counties, incorporated places, towns, school districts, drainage districts, irrigation districts, fire districts, and power districts.

Arkansas.—Counties, incorporated places, towns, school districts, drainage districts, levee districts, and road districts.

California.—Counties, incorporated places, towns, school districts, drainage districts, irrigation districts, levee districts, sanitary districts, reclamation districts, water districts, lighting districts, cemetery districts, road districts, junior college district, light district, and other debt-incurring districts.

Colorado.—Counties, incorporated places, towns, school districts, drainage districts, and irrigation districts.

Connecticut.—Counties, incorporated places, towns, school districts, fire and sewer districts, and sewer districts.

Delaware.—Counties and incorporated places.

District of Columbia.—Incorporated place.

Florida.—Counties, incorporated places, school districts, drainage districts, and road districts.

Georgia.—Counties, incorporated places, school districts, and drainage districts.

Idaho.—Counties, incorporated places, school districts, drainage districts, irrigation districts, road districts, and highway districts.

Illinois.—Counties, incorporated places, townships, school districts, drainage districts, park districts, road districts, sanitary districts, and other districts.

Indiana.—Counties, incorporated places, townships, and school districts.

Iowa.—Counties, townships, school districts, and drainage districts.

Kansas.—Counties, incorporated places, townships, school districts, and drainage districts.

Kentucky.—Counties, incorporated places, and school districts.

Louisiana.—Counties, incorporated places, school districts, drainage districts, road districts, and navigation districts.

Maine.—Counties, incorporated places, water districts, bridge districts, and pier-site district.

Maryland.—Counties, incorporated places, and sanitary districts.

Massachusetts.—Counties, incorporated places, fire and water districts, and other districts.

Michigan.—Counties, incorporated places, townships, and school districts.

Minnesota.—Counties, incorporated places, townships, and school districts.

Mississippi.—Counties, incorporated places, school districts, drainage districts, road districts, and levee districts.

Missouri.—Counties, incorporated places, townships, school districts, drainage districts, road districts, and levee districts.

Montana.—Counties, incorporated places, school districts, drainage districts, irrigation districts, road districts, and special fire districts.

Nebraska.—Counties, incorporated places, townships, school districts, drainage districts, irrigation districts, road districts, sanitary districts, and miscellaneous districts.

Nevada.—Counties, drainage districts, and irrigation districts.

New Hampshire.—Counties, incorporated places, towns, school districts, and precincts.

New Jersey.—Counties, townships, and school districts.

New Mexico.—Counties, incorporated places, school districts, drainage districts, and irrigation districts.

New York.—Counties, towns, school districts, and water districts.

North Carolina.—Counties, incorporated places, school districts, road districts, drainage districts, bridge districts, and hospital districts.

North Dakota.—Counties, incorporated places, townships, school districts, and park districts.

Ohio.—Counties, incorporated places, townships, school districts, and conservancy districts.

Oklahoma.—Counties, incorporated places, townships, school districts, and drainage districts.

Oregon.—Counties, incorporated places, school districts, drainage districts, port districts, and fire-patrol districts.

Pennsylvania.—Counties, incorporated places, townships, school districts, and poor districts.

Rhode Island.—Incorporated places.

South Carolina.—Counties, incorporated places, school districts, and drainage districts.

South Dakota.—Counties, incorporated places, townships, school districts, and drainage districts.

Tennessee.—Counties, incorporated places, school districts, and drainage districts.

Texas.—Counties, school districts, drainage districts, levee districts, road districts, irrigation districts, navigation districts, and water-improvement districts.

Utah.—Counties, incorporated places, school districts, drainage districts, irrigation districts, and conservation districts.

Vermont.—Counties, incorporated places, towns, school districts, and fire districts.

Virginia.—Counties and drainage districts.

Washington.—Counties, incorporated places, townships, school districts, drainage districts, diking and drainage districts, diking, drainage, and irrigation districts, ditch districts, ditch and drainage districts, levee districts, waterway districts, drainage and irrigation districts, independent highway districts, irrigation districts, park districts, port districts, and water districts.

West Virginia.—Counties, incorporated places, school districts, road districts, and railroad districts.

Wisconsin.—Counties, incorporated places, towns, school districts, and drainage districts.

Wyoming.—Counties, incorporated places, and school districts.

TABLE 1

Public indebtedness other than Federal.—Table 1 shows the net indebtedness of the States, counties, and all other civil divisions and the aggregate of such debts. The data here presented include the total burden of public indebtedness other than that on account of the obligations of the Federal Government. They show that the larger amounts of indebtedness have been assumed by the smaller geographical units, such as cities and school districts; the units of government which supply to the local communities the larger share of the services requisite to the protection of person and property, guarding against conditions deleterious to health, and furnishing educational and recreational facilities. Of the aggregate of the indebtedness in 1922, as shown in the table, 10.8 per cent rested upon the States, 14.6 per cent upon the counties, and 74.6 per cent upon the other civil divisions, which are listed on pages 5 and 6 of this report, the cities, towns, villages, and school districts being the principal units.

Per capita public indebtedness other than Federal.—The last two columns of Table 1 show for 1922 and 1912, by States, the per capita of the aggregate net indebtedness on account of States, counties, and all other civil divisions. The total of such indebtedness increased 127.4 per cent during the period from 1912 to 1922. Oregon had the largest per capita, \$170.69, and Kentucky the smallest, \$20.68. Each of the 48 States is shown to have increased the per capita of the aggregate net indebtedness resting upon its population; the only decrease being shown for the District of Columbia, the territory of which coincides with the city of Washington, and which is here classed as a municipality. The data, both total and per capita, for counties and all other civil divisions, shown in Table 1 by States, are shown in Table 3 by counties.

TABLE 2

State indebtedness.—The data shown in Table 2 represent the net debt, or gross debt less sinking fund assets, of the State governments. All States reported such debt in 1922; while in 1912 two States—Pennsylvania and West Virginia—had no such debt, the former at that time having sinking fund assets in excess of its gross debt, and the latter having no debt contracted by it, though subject to an adjustment of its share of the debt of Virginia outstanding at the time of the organization of the State of West Virginia from territory formerly constituting a part of Virginia, which adjustment was made in 1919.

States which reduced their net debt.—It is worthy of note that from 1912 to 1922 eight States reduced their net debt—Massachusetts, Connecticut, Wisconsin, Kansas, Virginia, Georgia, Oklahoma, and Arizona—although the net debt of the 48 States, as a whole, increased 170.4 per cent during that period. The largest decrease, \$2,555,000, was made by the State of Massachusetts, which had in 1912 the second largest debt of any State and in 1922 the third largest, New York having a larger debt in both years, and California in 1922.

TABLE 3

Gross debt less sinking fund assets of counties.—Table 3 presents, by States, for each of the counties of the 47 States in which the counties are empowered to incur debt, the amounts due at the close of their fiscal years in 1922 and 1912, with the per capita amounts in those years. The totals for the States are the same as shown in Table 1. The total for the several counties vary widely because of difference in population, but the per capita amounts serve as fair indexes of the relative debt burdens resting upon the individual. The per capita indebtedness of counties measures only in a very general way the methods followed in financing the counties' affairs, a small amount indicating that the county is living within its income to a greater extent than the county with a large per capita debt. This may be due to generous tax levies and economy in administration, or to the habit of careful determination of what the county can and can not afford in the way of construction costs for such improvements as are usually financed by bond issues.

TABLE 4

Gross debt, and funded or fixed debt less sinking fund assets.—Table 4 presents the gross debt of States, counties, incorporated places, and specified civil divisions under three heads—"Funded or fixed," "Special assessment loans," and "All other." The significance of these terms as here used is stated on page 1 of this report. The debt, total and per capita, as shown in the last two columns of the table is a more accurate measure of indebtedness than is shown in Table 1 under the heading "Gross debt less sinking fund assets," for the reason that special assessment loans are provided for by levies of special assessments to be collected from property owners in advance of the maturity of the loans, and the amounts tabulated as "All other" are to a large extent, if not entirely, offset by taxes levied but not collected and by cash in the general fund of the treasury. The assets of sinking funds accumulated to meet obligations known as special assessment loans, where they could be identified as such, were excluded from the calculation.

The funded or fixed debt of States, counties, incorporated places, and specified civil divisions constituted 86 per cent of their total indebtedness; the special assessment loans, 7.4 per cent, and all other debts 6.6 per cent. Distributed according to classes of government, 11.3 per cent of the gross debt was that of the States, 13.5 per cent that of counties, 56.9 per cent that of incorporated

places, and 18.3 per cent that of specified civil divisions. The corresponding per cents for funded and fixed debt less sinking fund assets were, for States, 12.1, counties, 14.8, incorporated places, 54.4, and specified civil divisions, 18.7, showing that the incorporated places held sinking funds in larger amounts in proportion to their funded or fixed debt than were held by States, counties, or the specified civil divisions.

No indebtedness was reported for the counties of Rhode Island, nor for specified civil divisions in Alabama, Delaware, and Rhode Island, as these are merely geographic divisions without taxing powers. The small amounts of indebtedness reported by the counties of Connecticut, New Hampshire, and Vermont are in a general way proportionate to the functions of counties in those States as compared with the more extensive functions of counties in most of the States. In 4 of the States—Indiana, Montana, Nevada, and West Virginia—the per capita debt of the counties was greater than that of the State or its incorporated places; while in the remaining 44 States the per capita debt of incorporated places exceeded that of the State and of the counties.

Two States—Kansas and Nebraska—reported no funded or fixed debt; and 1 State—Arizona—while reporting indebtedness of this character, at the same time reported sinking fund assets in excess of such debt. No special assessment loans were reported for any of the States, but the table shows that the counties of 12 States had outstanding obligations of that character to the amount of \$97,121,000. Such obligations were reported by the incorporated places of all States except Arkansas, Delaware, Maine, New Hampshire, Rhode Island, and Vermont; and by the specified civil divisions in 23 of the 48 States. Delaware, Maine, New Hampshire, Rhode Island, and Vermont reported no special assessment loans outstanding against any of the divisions of government.

The highest and lowest per capita indebtedness as reported were as follows: For States, Oregon \$48.12 and Iowa \$0.08; for counties, Arizona \$53.46 and Vermont \$0.38; and for incorporated places, New York \$137.23 and Arkansas \$4.35.

TABLE 5

Gross debt, and funded or fixed debt less sinking fund assets of States.—

The amounts of indebtedness shown in Table 5 are the same as are shown for States in Table 4. As none of the States reported special assessment loans, no column is provided in Table 5 for obligations of that character. Funded or fixed debt constituted 95.1 per cent of the total debt of States. A part of the funded or fixed debt is made up of the State's indebtedness to its permanent funds, such as the State school fund derived from the sale of school lands set apart for the support of public education. In a number of States these funds have been used by the State for purposes other than schools, the State paying interest to the fund at an established rate in lieu of income that would have been derived from the assets of the fund if kept intact and invested in income-producing properties or securities. In many instances the funds hold no formal bond or note of the State, but the obligations are none the less binding and are, therefore, included as a part of the State's indebtedness.

TABLE 6

Gross debt, and funded or fixed debt less sinking fund assets of counties.—

The amounts of indebtedness shown on the lines for States in Table 6 are the same as those shown on the lines for the counties of each State in Table 4, except that special assessment loans, which were reported by only 12 States, have been combined with the indebtedness classed as "All other." Because of the ranging functions of counties in the different States, comparison of their

per capita indebtedness does not lead to accurate information as to their relative methods of employing county credit in financing public undertakings for which the county is responsible. Comparisons of such per capita amounts of counties within a given State yield such information in a general way, but in the absence of data as to purposes for which the debts were incurred, the years in which the borrowings were made, the interest rates, and the year of maturity of the bonds and other obligations, no clear conclusions can be drawn as to the relative efficiency of the counties of a State in the supervision of such public functions as are required of them under the State's constitution and laws. One really vital matter to be considered in this connection, the effect of the indebtedness upon tax levies, can be studied by calculating the annual charge on account of interest at an assumed average rate, and on account of sinking fund accumulations or payments of serial bonds on an assumed average life of the obligations. The assessed valuations of counties, necessary for this study, are shown in the bureau's report entitled "Assessed valuations and tax levies" issued as a component part of the reports on wealth, public debt, and taxation.

TABLE 7

Gross debt, and funded or fixed debt less sinking fund assets of incorporated places.—The amounts shown in Table 7 as aggregates of the indebtedness of the incorporated places in each State are the same as are shown in Table 4. The presentation of the data by population groups within each State, as here shown, is desirable because of the fact that the larger cities as a rule report indebtedness in larger per capita amounts than do the smaller cities. The arrangement of Table 7 is designed to measure this tendency in the aggregate. As compared with the average per capita indebtedness of all incorporated places \$59.65, as shown in the last column of the table, the indebtedness of places of over 30,000 inhabitants was 36.2 per cent greater, that of places of from 8,000 to 30,000 inhabitants was 43.3 per cent less, that of places of from 2,500 to 8,000 inhabitants was 48.6 per cent less, and that of places less than 2,500 inhabitants was 61.3 per cent less. Similar computations for the several States would yield widely varying results.

TABLE 8

Gross debt, and funded or fixed debt less sinking fund assets of specified civil divisions.—Table 8 presents, by States, the indebtedness of the divisions of government other than States, counties, and incorporated places. The divisions reporting indebtedness in each of the States are listed on pages 5 and 6. In Table 8 the indebtedness is shown separately for six classes of local governments, school districts, townships, drainage districts, irrigation districts, levee districts, and road districts, and the total indebtedness of districts of other classes is shown in a single item after the title "All other districts."

It is possible that in some instances the special districts here set up as having power to incur debt should have been reported as geographic divisions in the administration of functions of the county or some other civil division, in which case the indebtedness would have been reported as that of the county or other civil division. It is believed, however, that such instances are rare, if indeed there are any, and in any event the error of classification would not affect the figures which represent the total debt resting upon the people of the county.

TABLE II.—TOTAL AND PER CAPITA NET DEBT OF STATES, COUNTIES, INCORPORATED PLACES, AND OTHER CIVIL DIVISIONS, AND INCREASE AND PER CENT OF INCREASE IN 1912-1922, 1902-1912, AND 1890-1902; AND PER CENT OF TOTAL OF CIVIL DIVISIONS, BY STATES, IN 1922

[Totals expressed in thousands]
