**DEPARTMENT OF COMMERCE,**  
**BUREAU OF THE CENSUS,**  
*Washington, D. C., April 19, 1934.*

SIR: I transmit herewith a decennial report on assessed valuations and tax levies in all States and the District of Columbia, which was prepared in connection with the decennial investigation on wealth, public debt, and taxation authorized by the permanent census act. The reports for 1922 are issued under five titles as follows: (1) Estimated national wealth, (2) Public debt, (3) Assessed valuation and tax levies, (4) Taxes collected, and (5) Digest of State laws relating to taxation and revenue.

The report was prepared under the direction of Starke M. Grogan, chief statistician in charge of wealth, public debt, and taxation, assisted by Lemuel A. Carruthers, expert chief of division. The text discussion was prepared by Morris J. Hole, expert special agent.

Respectfully,

**W. M. STEUART,**  
*Director of the Census.*

Hon. HERBERT HOOVER,  
*Secretary of Commerce.*

## ASSESSED VALUATION AND TAX LEVIES

---

### INTRODUCTION

**Scope of this report.**—This report presents, by geographic divisions and States, the total and per capita assessed valuations of all property and of real property and improvements, subject to general property taxes, the total and per capita levies, and the average tax rate per \$100 of assessed valuation, for the years 1922, 1912, 1902, 1880, and 1860; the total and per capita assessed valuation of all property subject to such taxes, by counties, for 1922 and 1912; the assessed valuations of such property, by principal classes, and the taxes levied thereon, by States, counties, and other civil divisions, in 1922; and the levies of taxes on such property for incorporated places, school districts, townships, drainage districts, irrigation districts, levee and flood control, and road districts, and all other districts, in 1922.

**Per capita valuations and tax levies.**—The per capita amounts shown in the tables of this report are based on exact totals. In some cases, therefore, they will differ slightly from calculations that may be made by using as bases the amounts shown in the table, which are only approximately exact because of adjustment to the nearest thousand.

The population figures used in calculating per capita amounts for States represent, for each State, the estimated population at the middle of the fiscal year which ended in the calendar year 1922, except in cases of 3 of the States—Vermont, Mississippi, and Nevada. They represent the estimated population of 21 States on January 1, 1 on March 1, 8 on April 1, 8 on June 1, and 7 on July 1, 1922. The Bureau of the Census has made no estimates of population for Vermont, Mississippi, and Nevada, the population of which decreased from 1910 to 1920; for each of these States the population used in computing per capita amounts was that shown by the census of January 1, 1920.

In computing the per capita amounts for counties, the bureau used the estimated population on July 1, 1922, except in case of decrease of population from 1910 to 1920 in which case the population on January 1, 1920, was used.

**Property subject to the general property tax.**—The general property tax, or general property taxes, as the term is used in this report, is the common designation of the direct taxes levied upon real property, and upon other property when they are apportioned and levied by substantially the same methods that are employed in apportioning and levying taxes upon privately owned real property.

**Assessed valuations.**—The valuations shown in this report are those placed upon property subject to general property taxes by the assessors, boards, and commissions charged with such duty. The valuations placed upon property by the local assessors are subject to review and revision by county and State boards of equalization, the purpose of such revision being to equalize, as far as possible the burdens of county and State taxes that are to be placed upon the local taxing districts.

**Tax levies.**—The tax levies shown in this report are the amounts proposed to be raised by taxation of property subject to general property taxes.

**Tax rates.**—The rates of levy are such amounts as express the ratio between the amounts to be raised by taxation and the assessed valuations upon which the levies are based. Of themselves, they supply no exact data as to the burden of taxation. This relative burden can be shown only by introducing such corrections as are necessary to allow for the great variations in the bases of assessment that prevail in the several States. These bases for real property as determined for each State in connection with estimating the national wealth, and a statement of the method by which they were determined will be found in the report of the Bureau of the Census entitled "Estimated National Wealth: 1922."

**Classification of property for assessment.**—There is a general agreement in regard to the classification of the greater part of the property assessed for taxation. Certain classes of property are, however, treated differently in the different States. The operative property of railway, telegraph, telephone, express, and private car companies, and of a few other corporations of kindred character are in some States classed as real property, in some as personal property, while in other States they are given a separate classification and are taxed either on an assessed valuation or on their gross receipts. The constitutional and statutory provisions governing the classification of property for purposes of assessment are set forth in detail for the several States in the report of the Bureau of the Census entitled "Digest of State Laws Relating to Taxation and Revenue: 1922."

*Real property and improvements.*—Under the heading "Real property and improvements" are tabulated the valuations of all lands and lots and the improvements thereon, except such as belong to public service corporations and are given a separate classification in accordance with constitutional or statutory provisions; and except buildings and other improvements belonging to others than the owners of the lands or lots on which they are located and where such improvements are taxed by methods different from those employed in taxing the lands on which they stand, which in some States are classed as personal property.

*Personal property.*—Under the heading "Personal property" are tabulated the valuations of such tangible property as is not attached to real property and is not given a separate classification by the laws of the State, together with such intangible property as is classed as personal and made subject to the general property tax by the laws of the different States.

*Other property.*—Under the heading "Other property" are tabulated the valuations of properties that, by constitutional or statutory provisions, are given a status different from that accorded to the greater part of the real and personal property, but are subject to the general property tax. These properties, where given a separate classification, are those employed in the operation of public service corporations, such as are conducted by railway, telegraph, telephone, express, and private car companies, and kindred corporations.

## DESCRIPTION OF GENERAL TABLES

**Number and character of general tables.**—Tables 1 to 9, inclusive, present statistics of the assessed valuations of property subject to general property taxes, and the levies of taxes thereon for the benefit of the States, counties, cities, towns, villages, school districts, townships, drainage districts, and all other civil divisions having power to levy general property taxes.

**Civil divisions for which levies of the general property tax were reported.**—The authority to levy taxes is conferred on counties, cities, and other civil divisions by legislative acts, and those acts vary widely in the several States. The following statement presents a list of the civil divisions which reported levies in 1922:

*Alabama*.—Counties and incorporated places.

*Arizona*.—Counties, incorporated places, school districts, drainage districts, irrigation districts, fire districts, electrical districts, and power district.

*Arkansas*.—Counties, incorporated places, and school districts.

*California*.—Counties, incorporated places, school districts, drainage districts, irrigation districts, levee districts, road districts, library districts, lighting districts, fire districts, forest fire districts, fire protection districts, fire and fire protection districts, mosquito abatement districts, sanitary districts, water districts, cemetery districts, junior college districts, sewer districts, and promotion districts.

*Colorado*.—Counties, incorporated places, school districts, drainage districts, and irrigation districts.

*Connecticut*.—Counties, incorporated places, school districts, towns, fire districts, sewer districts, lighting districts, fire and sewer districts, and association districts.

*Delaware*.—Counties and incorporated places.

*District of Columbia*.—Incorporated place.

*Florida*.—Counties, incorporated places, school districts, drainage districts, road districts, haulover district, canal district, bridge districts, boat-course district, and all other special districts.

*Georgia*.—Counties, incorporated places, school districts, and drainage districts.

*Idaho*.—Counties, incorporated places, school districts, road districts, and lighting districts.

*Illinois*.—Counties, incorporated places, school districts, townships, drainage districts, road districts, park districts, sanitary districts, sanitary and levee districts.

*Indiana*.—Counties, incorporated places, school districts, and townships.

*Iowa*.—Counties, incorporated places, school districts, and townships.

*Kansas*.—Counties, incorporated places, school districts, townships, and drainage districts.

*Kentucky*.—Counties, incorporated places, and school districts.

*Louisiana*.—Parishes, incorporated places, school districts, drainage districts, levee districts, road districts, navigation districts, criminal districts, and farm demonstration districts.

*Maine*.—Counties, incorporated places, towns, bridge districts, and pier-site district.

*Maryland*.—Counties, incorporate places, and sanitary districts.

*Massachusetts*.—Counties, incorporated places, fire and water districts, and village district.

*Michigan*.—Counties, incorporated places, school districts, and townships.

*Minnesota*.—Counties, incorporated places, school districts, and townships.

*Mississippi*.—Counties, incorporated places, school districts, levee districts, and road districts.

*Missouri*.—Counties, incorporated places, school districts, townships, drainage districts, and road districts.

*Montana*.—Counties, incorporated places, school districts, drainage districts, irrigation districts, road districts, and fire districts.

*Nebraska*.—Counties, incorporated places, school districts, townships, drainage districts, irrigation districts, road districts, metropolitan utility districts, sanitary districts, and miscellaneous districts.

*Nevada*.—Counties, incorporated places, school districts, drainage districts, and irrigation districts.

- New Hampshire.*—Counties, incorporated places, school districts, towns, and precincts.
- New Jersey.*—Counties, incorporated places, school districts, and townships.
- New Mexico.*—Counties, incorporated places, and school districts.
- New York.*—Counties, incorporated places, school districts, towns, and fire districts.
- North Carolina.*—Counties, incorporated places, school districts, drainage districts, road districts, hospital districts, and bridge districts.
- North Dakota.*—Counties, incorporated places, school districts, townships, park districts, and library districts.
- Ohio.*—Counties, incorporated places, school districts, and townships.
- Oklahoma.*—Counties, incorporated places, school districts, and townships.
- Oregon.*—Counties, incorporated places, school districts, road districts, port districts, and water districts.
- Pennsylvania.*—Counties, incorporated places, school districts, townships, and poor districts.
- Rhode Island.*—Incorporated places.
- South Carolina.*—Counties, incorporated places, school districts, and drainage districts.
- South Dakota.*—Counties, incorporated places, school districts, and townships.
- Tennessee.*—Counties, incorporated places, school districts, and drainage districts.
- Texas.*—Counties, incorporated places, school districts, drainage districts, irrigation districts, levee districts, road districts, navigation districts, and water improvement districts.
- Utah.*—Counties, incorporated places, school districts, drainage districts, irrigation districts, and conservation districts.
- Vermont.*—Counties, incorporated places, school districts, town, and fire districts.
- Virginia.*—Counties and incorporated places.
- Washington.*—Counties, incorporated places, school districts, townships, drainage districts, levee districts, road districts, port districts, park districts, water districts, waterway districts, and commercial waterways districts.
- West Virginia.*—Counties, incorporated places, and school districts.
- Wisconsin.*—Counties, incorporated places, school districts, and towns.
- Wyoming.*—Counties, incorporated places, and school districts.

TABLE 1

**Assessed valuation of all property.**—Table 1 shows, by geographic divisions and States, the total amounts on which general property taxes were levied in 1922, 1912, 1902, 1880, and 1860. These amounts include the values placed upon all real and personal property, except that exempt from taxation, and in some States upon the property of public service corporations which is given a separate classification, the amounts of which are shown for the year 1922 in the column headed "Other property" in Table 7. The figures of Table 1, although they represent the values listed as subject to the general property tax, do not show the relative wealth of the different States, because of the difference in the laws governing assessment and the practice under those laws, as briefly discussed in the text for Table 7.

The progress of the groups of States comprising the different geographic divisions, as represented by the amounts listed for general property taxes, is shown in the statement on page 5 of the per cent of increase in the total assessed valuations for the periods between the years for which data are given.

The figures of the following statement do not exactly represent the changes that occurred during the period covered, because of changes in legal bases of assessment, in thoroughness of compliance with legal requirements in assessing property, and in some cases because of a change of classification in accordance with statutes authorizing the collection of taxes on gross receipts from corporations

the operative property of which had formerly been classed as real or personal property, or part as real and part as personal.

GEOGRAPHIC DIVISION	PER CENT OF INCREASE IN TOTAL ASSESSED VALUATION			
	1912 to 1922	1902 to 1912	1880 to 1902	1860 to 1880

<sup>1</sup> Decrease.

TABLE 2

**Assessed valuation of real property and improvements.**—Table 2 presents, by geographic divisions and States, the valuation of real property and improvements as assessed for taxation. The amounts shown in this table are such parts of the total amounts shown in Table 1 as represent the assessed valuations of land and the improvements thereon for the census years 1922, 1912, 1902, 1880, and 1860. A comparison of the data contained in Tables 1 and 2 discloses the fact that the assessed valuations of real property, including improvements, form widely varying percentages of the total assessed valuations in the different States. These variations are due more largely to the different methods of assessing personal property and of classifying the operative property of public service corporations than to differences in practice in assessing real property. The percentages that assessed valuations of real property and improvements constituted of the total assessed valuations for the purposes of the general property tax in the census years shown in the table were as follows: 1922, 74.1; 1912, 74.4; 1902, 74.7; 1880, 76.0; and 1860, 57.7. The corresponding percentages for the individual States present many striking contrasts.

The assessed valuation of real property and improvements in the United States in 1922 was \$92,369,378,000, an increase of \$40,515,369,000, or 78.1 per cent, over that of 1912. The increase was 96.3 per cent during the period 1902 to 1912, 102.7 per cent from 1880 to 1902, and 87.1 per cent from 1860 to 1880. During the decade 1860 to 1870, as shown in the report issued by the Bureau of the Census for 1912, the increase was only 14.3 per cent, due largely to the devastation resulting from the Civil War and the depression that followed; but by 1880 values had so far recovered that the 20-year period 1860 to 1880 showed an average annual rate of increase in the assessed valuation of real property and improvements almost as great as that shown for the 22-year period 1880 to 1902. From 1880 to 1902 the increase may be regarded as a normal one, there having been no great disturbance in the economic balance during that time, and military operations having been confined principally to the suppression of Indian disturbances and prosecution of the Spanish-American War, the former occurring at intervals throughout the period and the latter being of short duration. The most notable feature of the period was the development of the Western and Northwestern States, although every section of the country showed a very material increase in wealth invested in its lands and buildings as measured by valuations placed upon them for purposes of taxation. The period 1902 to 1912 was one of unusual development in all parts of the country and in all

branches of industry, and, aside from the slight depression in 1907, was one of continued and uninterrupted growth. This growth, or increase in values, was more quickly reflected in the case of personal property; for the entire period the increase in the assessed valuation of personality was 97.2 per cent, or only slightly in excess of that of realty.

The period 1912 to 1922 was one of unusual economic disturbances due to the World War in which the United States was a combatant nation from April 6, 1917, to November 11, 1918. From August, 1914, to April, 1917, the production of the United States was greatly accelerated, but largely for export. From the armistice in November, 1918, until the close of 1922 production, though continuing heavy until demobilization was well under way, slackened because of the necessity of readjustment from war conditions to those of peace, and again revived. Altogether, the period was one of marvelous accomplishment in industry, but of efforts largely directed to production of goods which were perishable, short lived, or subject to sudden obsolescence. The usual conversion of raw materials into objects of wealth more or less permanent, such as homes, office buildings, and railroad construction, with their equipment, was necessarily made subordinate to the manufacture of materials for the support of the armed forces of the United States and to a considerable extent of those nations with which we were associated in the war, to the support of our home population, and to the relief of distress abroad without regard to the military alliances of the nations to whom relief was extended. The per cent of increase in assessed valuations of real property and improvements, as shown above, was less for the period 1912 to 1922 than for any of the other periods for which the table shows the data required for computing such increase. In addition to this, the valuations of 1922 reflect to a greater or less extent the reduction in the purchasing power of the dollar in 1922 as compared with 1912. Although assessed valuations probably did not advance at the same rate as commodity prices, they doubtless were considerably affected thereby. Without this influence the properties assessed in 1922 would have been valued at a lower figure than they were and the rate of increase from 1912 to 1922 would have been considerably less than the 78.1 per cent stated above for that period. The elimination of the effect of high prices, if that were possible, would reveal more clearly than do the valuations as assessed the fact that to a greater extent than in former periods the production of the country for domestic uses from 1912 to 1922 was consumed in maintenance to the neglect of the construction of permanent properties.

TABLE 3

**Per capita assessed valuations.**—Table 3 presents, by geographic divisions and States, per capita averages of the assessed valuations shown in Tables 1 and 2. The significance of these averages is as limited as are that of the data shown in the two preceding tables, the limitations of which are pointed out in the text for Tables 1, 2, and 7. They furnish no adequate measure of the relative average wealth of individuals in the different States; but, when studied in connection with the data of Tables 1 and 2, they explain to a certain extent the great variation in the nominal tax rates shown in Table 5. The dates as of which were estimated or enumerated the population on which the per capita valuations were computed are stated on page 1.

TABLE 4

**Levies of general property taxes.**—Table 4 presents a summary, by geographic divisions and States, of the total amounts levied as general property taxes in each State for the use of States, counties, and other civil divisions, for the years 1922, 1912, 1902, 1880, and 1860. The tax levies of Table 4 furnish information much more definite than that supplied by the tables relating to assessed valuations.

These levies measure definitely the amounts which the people are called upon to contribute to the support of the State and local governments in the form of general property taxes. They do not, however, measure the relative contributions demanded of the people for the support of these governments at the different census years. Many changes have been made in classification of properties for taxation whereby certain corporations are taxed on their earnings instead of on the valuation of their tangible property. Such taxes, as a rule, rest finally upon those to whom the corporation supplies commodities or services, and constitute a tax burden as real as that imposed by the general property tax, although the amount resting upon an individual is not susceptible of exact calculation, and is usually paid without being recognized as a tax. Furthermore, there are special property taxes, business taxes, licenses, fees, and other classes of revenue, which have been substituted in varying degrees for the general property taxes, and which to a greater or less extent are finally borne by others than those from whom their payment is exacted.

The total amount of general property taxes levied in the United States in 1922 was \$3,503,725,000, an increase of \$2,153,884,000, or 159.6 per cent, over that of 1912. This is the largest per cent of increase in one decade that has been found at any census. The per cent of increase from 1902 to 1912 was 86.3, that from 1880 to 1902 was 130.9, and that from 1860 to 1880 was 233.3. The per cent of increase from 1860 to 1880 was larger than that from 1912 to 1922, but it covered a period of two decades during the first of which, 1860 to 1870, the increase was 140.1 per cent, considerably less than during the decade 1912 to 1922; from 1870 to 1880 the increase was only 38.8 per cent.

An inspection of Table 4 reveals the fact that in all of the geographic divisions in all of the States, except Massachusetts, Georgia, and Arkansas, and in the District of Columbia, the levies of general property taxes for State and local purposes were more than 100 per cent greater in 1922 than in 1912; and that in 10 States—Michigan, South Dakota, West Virginia, North Carolina, South Carolina, Florida, Mississippi, Texas, Wyoming, and Arizona—the increase was over 200 per cent, and in a number of other States it closely approached that figure.

An increase in the tax levies is at all times deemed to be essential where there has been a considerable increase in population. In 1922 as compared with 1912 an increase was inevitable because of the very considerable cessation of construction during the period of the World War and for some time after its close and because of the diminished purchasing power of the dollar in the later year. The higher prices of materials and supplies and the higher salaries and wages paid in 1922 as compared with 1912 were doubtless the principal factors calling for greater levies, though it is probable that a number of new undertakings were responsible for them to a very considerable extent.

TABLE 5

**Per capita levies of general property taxes.**—In Table 5 are shown, by geographic divisions and States, the per capita amounts of taxes levied on all general property for the years 1922, 1912, 1902, 1880, and 1860. The per capitias are based on the total amounts levied as shown in Table 4. The dates on which the populations were determined are stated on page 1.

The average per capita levy in the United States in 1922 was \$32.23, as compared with \$13.91 in 1912, an increase of 131.7 per cent; from 1902 to 1912 the increase was 50.9 per cent, from 1880 to 1902, 47.9 per cent, and from 1860 to 1880, 108.7 per cent.

The per capita levies increased more than 100 per cent in all geographic divisions except the New England, and in all the States except Massachusetts, New

York, Georgia, Arkansas, and Montana; and in five States—South Dakota, West Virginia, North Carolina, Florida, and Mississippi—they increased more than 200 per cent. The variations in the relative amounts shown in Tables 4 and 5 for the different States are due to variations in the relative increase in the number of inhabitants from 1912 to 1922.

The highest per capita levies for the years shown in the table were as follows: 1922, \$65.47 in Nevada; 1912, \$26.83 in Montana; 1902, \$19.34 in Colorado; 1880, \$14.60 in California, and 1860, \$7.85 in California; while the lowest were: 1922, \$9.46 in Alabama; 1912, \$4.33 in North Carolina; 1902, \$2.04 in North Carolina; 1880, \$1.37 in both North Carolina and New Mexico; and 1860, \$0.32 in New Mexico. In 1922 the per capita levy exceeded \$20 in 39 States and the District of Columbia, while in 1912 that amount was exceeded in only 7 States, and in 1922 the highest per capita of any State in 1912—\$26.83 in Montana—was exceeded in 31 States and the District of Columbia.

**Average tax rate.**—The average tax rates given in Table 5 are the nominal rates, which represent the relation between the tax levies shown in Table 4 and the assessed valuations shown in Table 1. Their variations result largely from the differences in the classification of properties for purposes of taxation and the wide variations in the intensity of assessment or the degree of the approach to the legal basis of assessment, which in most States is 100 per cent of the true value, and in a few States to the fact that the legal basis is a fraction of the true value and even the legal requirement is not attained in practice.

Reductions in tax rates in 1922 as compared with 1912 are shown for the Mountain division, as a whole, and for 5 States of that division—Idaho, Colorado, New Mexico, Arizona, and Utah—also for 6 other States—Indiana, North Dakota, South Dakota, Nebraska, Kentucky, and Tennessee—and for the District of Columbia. In 2 States—South Carolina and Oregon—the average tax rate in 1922 was slightly more than 100 per cent greater than in 1912, and in a number of the other States the increase was close to 100 per cent. The average rates for 1912, as compared with those for 1902, show that in 17 States the rate was lowered during that period; from 1880 to 1902 it was lowered in 17 States, and from 1860 to 1880 it was lowered in Minnesota only. In 6 States—Ohio, Nebraska, Louisiana, Texas, Arizona, and Oregon—reductions were made in two of the periods covered by the table, and in the case of each of these States the second reduction was in the period immediately following the first one.

TABLE 6

**Assessed valuation of property.**—Table 6 presents, for the years 1922 and 1912, the total and per capita valuations of all property assessed for general property taxes in each of the counties of the several States. The State totals and per capita averages are the same as those presented in Tables 1 and 3, respectively, for those years. The county totals, just as the State totals, can be intelligently studied only in connection with the population, because of the difference in the relative importance of the States as measured by the number of inhabitants in each. The per capita averages, therefore, are the only comparable measures of the wealth represented by property subject to the general property tax; and the comparability of the per capita valuations, as assessed, is greatly diminished because of the difference in practice in assessment, the counties of a State varying in their approach to the legal requirements to almost as great an extent as do the weighted averages of the different States.

**Levies of general property taxes.**—This table, presents, also, for the years 1922 and 1912, the total and per capita levies of general property taxes in each of the counties of the several States. The State totals and per capita averages

are the same as those shown in Tables 4 and 5. As was stated in the preceding paragraph in regard to assessed valuations, the per capita amounts furnish the only comparable data. The relative burden resting upon the individual in the different counties of a State because of general property taxes is approximately measured by the per capita levies.

TABLE 7

**Assessed valuation of property, by classes.**—Table 7 shows, by geographic divisions and States, the amounts representing the assessed valuation of all property subject to the general property tax in 1922, and the parts of the total classified as (1) real property and improvements, (2) personal property, and (3) other property. The significance of these terms is set forth on page 2.

*Real property and improvements.*—The amounts shown as assessed valuations of real property and improvements do not indicate the relative wealth of the State in property of this class. Although most of the States provide by law for the assessment of real property at its full value, it has been found in connection with the investigation relative to the national wealth that in no State is this provision fully complied with, nor is there uniformity in the degree of compliance. In a few States the legal basis is less than 100 per cent of full value, but in none of these does the practice in assessment come up to the legal requirement. These observations relate to the assessed valuation of real property as a whole for each State, even though it may be shown that for certain individual properties, or possibly for an individual county, the assessed valuations in 1922 equaled or exceeded the full value, or estimated sale value.

The per cent of increase in assessed valuation of all property and of real property and improvements from 1912 to 1922 is shown for each State and geographic division in the table on page 10. The significance of these figures as indexes of increased values is limited because of changes in legal bases of assessment and practice thereunder.

*Personal property*.—The assessed valuation of personal property as shown in Table 7 for each of the States and geographic divisions represents the amount placed upon the tax rolls. The provisions of law and the practices thereunder differ widely both as to objects taxed under that head and the per cent of such objects actually taxed. Exemptions are allowed on certain classes of property up to specified amounts. In one State, for example, the exemptions allowed are as follows: Sheep to the value of \$100, swine to the value of \$50, poultry to the value of \$25, jewelry to the value of \$25, household furniture to the value of \$500, private libraries to the value of \$200, musical instruments to the value of \$25, farming tools to the value of \$200, tools of mechanics to the value of \$200, fishing apparatus to the value of \$200, and cash on deposit in a commercial bank

the amount of \$500. It appears, therefore, that a taxpayer, if his personal property holdings included the classes of property specified and in amounts equal to or greater than those enumerated, would be exempt from taxation on a total value of \$2,025. Similar exemptions are allowed in all States, the classes of property and amounts exempted varying widely. In some States the tax blanks are prepared to show only the values in excess of exemptions; in others the blanks provide for showing the total, the exempt, and the net or taxable value. The tax commissioner of one of the States makes the following observation in his report to the general assembly: "The small statutory exemptions allowed on personal property lends encouragement to the taxpayer to list nothing for taxation purposes under the items in the property tax lists which have reference to such property. In practice, therefore, nearly all of the personal property to which such exemptions attach is untaxed." In the case of intangible personal property there is great diversity in both the laws providing for assessment and

the thoroughness of their application in the different States and at different periods in the same State. Because of these conditions, the increase shown for a State may not register the progress of the State as measured in property of the classes assessed for taxation, but may merely reflect the fact that property formerly escaping taxation has been placed on the tax rolls, because of new legislation or more thorough methods on the part of assessors.

<sup>1</sup> Not computed; real and personal property not reported separately in 1912.

*Other property.*—The column headed "Other property" includes the value of all property assessed for taxation under the general property tax, other than that which is classed as real and personal. The operative property of railway, telegraph, telephone, express, private car, and other transportation and transmission companies, which is not subject to other classification, constitutes the principal class of properties the valuations of which make up the amounts shown in this column. In the States for which no data appear in this column, the valuations such as are shown for certain of the States are included with real or personal property or are classified as part real and part personal. The legal provisions for taxing properties of these classes are set forth in the publication of the Bureau of the Census entitled: "Digest of State Laws relating to Taxation and Revenue, 1922."

**Levies of general property taxes.**—The taxes levied are shown in Table 7 under three heads: "State," "County," and "Other civil divisions," in accordance with division of government to be supported by the levy.

The total of all levies of general property taxes for 1922 for the use of States, counties, and other civil divisions was \$3,503,725,000, of which 10.1 per cent was for States, 20.8 per cent for counties, and 69.1 per cent for other civil divisions. For 1912 the total was \$1,349,841,000, of which 11.5 per cent was for States, 21.4 per cent for counties, and 66.3 per cent for other civil divisions, with an item of \$9,944,000 in the State of Massachusetts representing the tax on corporate excess not distributable among the States, counties, and other civil divisions amounting to 0.7 per cent for all States for all purposes in 1912.

Three of the States—Pennsylvania, California, and North Carolina—made no levies of the general property tax for the year 1922 for State purposes, the State revenues being derived from other forms of taxation, though each of them had levies for State purposes in 1912. In 1912 Connecticut and Delaware made no levies of the general property tax for State purposes.

The relation of levies for States, counties, and other civil divisions is shown graphically in the diagram on page 12.

The diagram brings out prominently the difference in functions of counties in the different States as reflected by the relation of the tax levies for the county, for the State, and for other civil divisions. Ohio and California are representative of a large number of States in which the counties exercise functions of large financial importance, while Massachusetts and Connecticut are examples of States in which the county activities are limited principally to judicial functions. Rhode Island levies no general property tax for county purposes, the counties being merely judicial districts of the State.

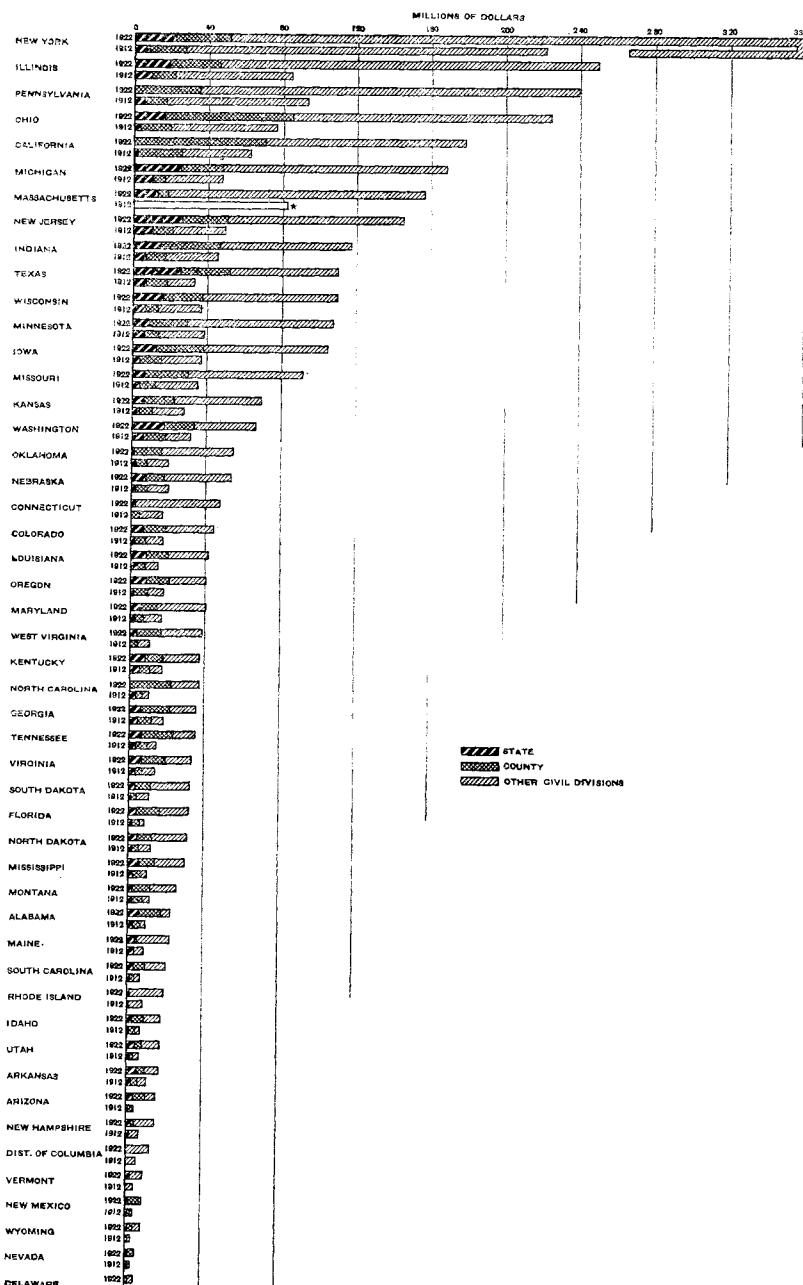

The levies for the District of Columbia for both 1922 and 1912 are shown as levies for other civil divisions, the government of the District of Columbia having all the functions of State, county, and other civil divisions, the larger part of which are municipal; all the usual powers of government, with the exception of legislation, being merged into one corporation for governmental purposes, and the legislative functions being performed by the Congress of the United States.

TABLE 8

**Assessed valuation of property by classes.**—The assessed valuations shown in Table 8 for States are the same as are presented in Table 7 for the year 1922. In Table 8 the data are shown for the counties of each State, under the same heads as in the preceding table. While the valuations purport to measure the relative wealth of the counties of each State as represented by properties which under the statutes are made subject to general property taxes, the wide divergence in practice in assessing such property in the different counties, as is pointed out in the text for Table 6, greatly limits the comparability of the figures. The assessed valuations for each county are shown under three heads: (1) "Real property and improvements," (2) "Personal property," and (3) "Other property." The significance of these terms is stated on page 2.

**Levies of general property taxes.**—The levies of Table 8 for States are those shown in Table 7 for the year 1922. In addition to the State totals, Table 8 shows the levies in 1922 for each of the counties under three heads: (1) "State," (2) "County," and (3) "Other civil divisions." Under the heading "Other civil divisions" are included all levies of the general property tax made by civil divisions listed on pages 3 and 4.

## TAX LEVIES: 1922 AND 1912

\* Not distributed between State, county, and other civil divisions.

The levies for counties in certain States include levies for public schools which in other States are wholly or in part administered by school districts empowered to levy taxes; in still other States certain incorporated places administer the educational activities although they are administered in other parts of the State by independent school districts. Likewise functions in some States are performed by counties, which in other States are performed by municipal, township, or town governments. An understanding of the laws as set forth in the Digest of State Laws Relating to Taxation and Revenue: 1922, published by the Bureau of the Census, is essential to a thorough study of the economic features of the different classes of governments. The data of Table 9 show some of the characteristic features of local governments.

TABLE 9

**Levies of general property taxes for all local governments other than States and counties.**—The levies shown in Table 9 include all levies of the general property tax other than those for the States and counties. The districts for which levies were secured are listed on pages 3 and 4. It may be possible that in a few instances levies have been reported as for independent districts administering certain governmental functions, when, as a matter of fact, they should have been shown as special levies of the county or some other division of government, the revenues therefrom to be applied to securing services or improvements of certain kinds for all or a part of the major division. Such instances, however, are rare, if indeed there are any, and do not affect the accuracy of the figures which show the total burden on account of taxes levied.

The differences in organization and functions of the governments for which data are shown in Table 9, are only in part revealed by the figures. For 8 States no levies of general property taxes are reported for school districts, and for 28 States none are reported for townships; in those States, the public schools and usual township functions are administered either by counties or incorporated places, or by both. For the administration of certain functions, such as the construction and maintenance of public works for drainage, irrigation, levees, and highways, special districts have been created in a number of States. In other States such projects are in charge of the State, or of counties, incorporated places, or townships, being financed by the civil division in charge either entirely or with the aid of the National or State Government. Because of these facts the items of the table are of interest only in showing to some extent the variety of organization for the performance of ordinary local governmental functions, and the totals for the States, while of considerable importance, must be studied in connection with the levies for counties shown in Table 9 and the statements in the text relative thereto.
