REVIEW OF MARCH—COMMERCIAL AND FINANCIAL EVENTS.

The foremost event of the month was of course the inauguration of a new administration at Washington on the 4th of March. At the same time, however, the credit situation continued a factor of hardly less moment, in its financial aspects at least, and it was attended by developments of far reaching importance. For one thing these developments resulted in an upheaval in the stock market of gigantic proportions, as narrated in our review of that market further along in this article.

President Hoover's inauguration contained no surprises and was marked by nothing out of the ordinary in the advent of a new administration to control of the Federal Government. The composition of Mr. Hoover's Cabinet had been pretty well foreshadowed, and his selections for the different Cabinet positions were well received. He retained two members of President Coolidge's Cabinet—both of them in fact had also served during the short term of President Harding's incumbency and owe their original appointment to Mr. Harding. One is Secretary of the Treasury, Andrew W. Mellon; and the other James J. Davis, the Secretary of Labor. The new appointees consisted of Henry L. Stimson, as Secretary of State; James W. Good of Iowa, as Secretary of War; William D. Mitchell of Minnesota, as Attorney General; Walter F. Brown of Ohio, as Post Master General; Charles Francis Adams of Massachusetts, as Secretary of the Navy; Ray Lyman Wilbur of California, as Secretary of the Interior; Arthur M. Hyde of Missouri, as Secretary of Agriculture and Robert Patterson Lamont of Illinois, as Secretary of Commerce. In his inaugural address President Hoover indicated it as his purpose to appoint "a National Commission for a searching investigation of the whole structure of our Federal system of jurisprudence, to include the method of enforcement of the Eighteenth Amendment and the causes of abuse under it." He asserted that "its purpose will be to make such recommendations for reorganization of the administration of Federal laws and court procedure as may be found desirable." The newly inducted President led up to the foregoing announcement by stating that "Crime is increasing. Confidence is rigid and speedy justice is decreasing." Of the abuses which have grown up under the Eighteenth Amendment, he said, "part are due to the failure of some States to accept their share of responsibility for concurrent enforcement and to the failure of many State and local officials to accept the obligation under their oath of office zealously to enforce the laws. With the failure from these many causes has come a dangerous expansion in the criminal elements who have found enlarged opportunities in dealing in illegal liquor." Declaring that he intended to enforce the laws of the country to the extent of his own

abilities, he alluded to the "large responsibility" resting directly upon the citizens of the country and noted that "the measure of success that the Government shall attain will depend upon the moral support which you, as citizens extend."

In his address President Hoover made the statement that "the election has again confirmed the determination of the American people that regulation of private enterprise, and not Government ownership or operation, is the course rightly to be pursued in our relation to business." "In recent years," he said, "we have established a differentiation in the whole method of business regulation between the industries which produce and distribute commodities on the one hand, and public utilities on the other." He went on to say that "the rigid enforcement of the laws applicable to both groups is the very base of equal opportunity and freedom from domination for all our people," adding that "such regulation should be extended by the Federal Government within the limitations of the Constitution and only when the individual States are without power to protect their citizens through their own authority." He also noted that "the larger purpose of our economic thought should be to establish more firmly stability and security of business and employment and thereby remove poverty still further from our borders."

Mention of the Kellogg-Briand anti-war treaty was made in President Hoover's address, as to which he said:

The recent treaty for the renunciation of war as an instrument of national policy sets an advanced standard in our conception of the relations of nations. Its acceptance should pave the way to greater limitation of armament, the offer of which we sincerely extend to the world.

In his reference to the Republican pledges respecting tariff changes and agricultural relief the President outlined as follows the further policies to which his administration is pledged:

It appears to me that the more important further mandates from the recent election were the maintenance of the integrity of the Constitution; the vigorous enforcement of the laws; the continuance of economy in public expenditure; the continued regulation of business to prevent domination in the community; the denial of ownership or operation of business by the Government in competition; limitation of arms and by the creation of instrumentalities for peaceful settlement of controversies. But it will become a reality only through self-restraint and active effort in friendliness and helpfulness. I covet for this administration a record of having further contributed to advance the cause of peace.

On March 7, President Hoover, in accordance with his previous promise made during the Presidential campaign in 1928, issued a proclamation convening the new Congress in extraordinary session on April 15. In his proclamation he indicated that his purpose in calling the extra session was to secure the enactment of "legislation to effect further agricultural relief and legislation for limited changes of the tariff" which he said "cannot in justice to our farmers, our labor and our manufacturers be postponed." It quickly became apparent, however, from the discussions in the public prints, that the activities of Congress, when it met, would not be confined alone to the consideration of the two propositions outlined by the President.

As to the credit situation this continued, as already stated, a matter of great and growing importance, and, as the month progressed, of deep concern. The anxiety grew out of the renewed expansion in speculation on Stock Exchange account and the concurrent further rise in rates of interest, not alone for collateral loans secured by stocks and bonds, but also in all other branches of the money market, including those which serve the mercantile and manufacturing communities and general business. The developments in these particulars became disturbing in the extreme, and they reached a dramatic climax in the last

week of the month. All through the month the doings of the Federal Reserve Board were watched with the keenest interest, not untinged with anxiety. The question on every man's tongue, at least in the financial world, was whether or not there would be a further advance in the rediscount rates by the Federal Reserve Banks (a question which was being invested with a significance quite out of proportion to its real importance since market rates for money ruled much higher than the rediscount rates of the Federal Reserve Bank and kept rising still higher irrespective of what the Reserve Banks might do); also how far the Reserve Board would go in its determination to curb speculative excesses, what steps or plans would be taken to that end and what the general effect of the Reserve Board's policy, be it what it may, would be.

Public discussions of all these things did much to heighten interest and anxiety. The Reserve Board would give no intimation as to what plans it had under consideration or what steps it contemplated taking, and this had anything but a reassuring effect, coming at a time when interest rates kept steadily rising. In speeches and addresses by several of the Reserve authorities, the seriousness of the situation, as viewed by them, was portrayed, and stress laid upon the importance of cooperation on the part of the member banks with the Federal Reserve Banks in the endeavor to check any further absorption of bank credit in speculative loans. Governor Roy A. Young made another one of his addresses in speaking before the Commercial Club of Cincinnati on March 16 in which he indicated the reluctance felt by the Reserve Banks to a further advance in their rediscount rates. One development of the month which attracted no little attention was a discussion of the credit situation contained in the annual report, made public on March 8, of the International Acceptance Bank by Paul M. Warburg, the Chairman of the Board of Directors of the Bank. The prominent part played by Mr. Warburg in the early history of the Federal Reserve system gave additional importance to his criticism of the recent policy of the Federal Reserve. Mr. Warburg did not mince words in indicating that he was not in harmony with such policy. After saying that "no central banking system may safely permit its facilities to expand unless it is certain of its determination and ability to bring about contraction when circumstances require." He made the declaration that "the Federal Reserve system, pursuing a well-conceived and far-sighted policy, rose to a position of world leadership. Yet within the short span of a year it lost that leadership owing to its failure, promptly and effectively, to reverse the engines at the critical moment." He then added the following:

"The rudder then passed into the hands of Stock Exchange operators, who have now for many months governed the flow of money, not only in the United States, but in the principal marts of the world. History, which has a painful way of repeating itself, has taught mankind that speculative over-expansion invariably ends in over-contraction and distress. If a Stock Exchange debauch is quickly arrested by prompt and determined action, it is not too much to hope that a shrinkage of inflated stock prices may be brought about without seriously affecting the wider circle of general business. If orgies of unrestrained speculation are permitted to spread too far, however, the ultimate collapse is certain not only to affect the speculators themselves, but also to bring about a general depression involving the entire country.

"From the economic lesson taught by the aftermath of the Great War, we learned that the excessive creation of money or bank credit without an equivalent production of assets spells inflation. Yet the public mind does not appear to realize that the creation of an inflated purchasing power is not a monopoly enjoyed by governments. When we consider that the market value of the fifty industrial stocks, the twenty public utility stocks, and the twenty railway shares, which are used in computing Standard Statistics Company's index of the prices of stocks, has grown within two years from approximately \$17,500,000,000 to \$33,000,000,000, we find an accretion of approximately \$15,500,000,000, an accretion in the majority of cases quite unrelated to respective increases in plant, property, or earning power. Yet this stupendous bulge in "value" covers only a limited number of corporations, and it does not include bank stocks, or some of the subtlest elements of inflation—incorporated stock pools, called "investment trusts." Nor does it comprise the gigantic enhancement of real estate values. One can only leave it to the imagination to guess the amount by which the inflation of values such as these exceeds the entire war debt of the United States. In order to grasp the vastness of the sums involved, it may be well to remember that the total value of our cotton, wheat, and corn crops combined would amount to approximately \$4,000,000,000.

"There are those who claim that the increase in the market value of our securities is warranted by their intrinsic value. One might be more inclined to agree with that view if the present level of our stocks were not sustained by a colossal volume of loans carrying unabsorbed securities, of which \$6,000,000,000 of brokers' loans form only a part, and if the banking structure carrying this inflated inverted pyramid did not rest on a basis of Federal Reserve credit, which in these last two years has been stretched by an increase in the earning assets of about half a billion dollars over what used to be their approximately normal size. Conditions such as these recall to our minds the painful events of the years of 1919-21. Yet the parallelism between that period and the present does not seem to be properly appreciated by the general public on account of the fact that billions of dollars poured into the Stock Exchange by domestic corporations and from across the seas are not revealed by the barometer indicating the

Federal Reserve System's condition and because the index does not register the same striking rise of commodity prices shown in the inflation period of 1919 to 1920. It should be remembered, however, that in those years there prevailed a shortage of commodities and a passionate demand for them, while at present the world is craving for the ownership of shares and for the satisfaction of new wants. Nobody would object to a fulfillment of these desires so long as the necessary funds were provided from savings. But when the savings of the masses are deposited as margins for Stock Exchange speculations, and when the extravagant use of funds for speculative purposes absorbs so much of the nation's credit supply that it threatens to cripple the country's regular business, then there does not seem to be any doubt as to the direction in which the Federal Reserve System ought to exert its influence quickly and forcefully.

"People who express the fear that increase in the Federal Reserve Bank's rediscount rates might hurt business overlook the far greater hurt the country will have to suffer if their advice to permit the situation to work itself out were followed. Moreover, for approximately the last six months we have had, in effect, a bank rate of 7 or 8%; for it is that rate which during that period has directed the flow of gold to our shores and which has exercised a decisive influence in the fashioning of our domestic rate structure. When commercial paper commands 5½%, and when bankers' acceptances sell at 5½%, rediscount rates of 4½% and 5% seem grotesquely impotent and out of line. Procrastination in bringing such rediscount rates into a proper relation to actualities, hesitation in taking effectual means to reassert the Federal Reserve System's leadership, place a grave responsibility on those in charge of its administration. It is true that our inability to develop a country-wide bill market and our failure to establish on our Stock Exchange a system of term-settlement dealings aggravate the difficulties of our problem. But these defects of our system render the need for determined leadership all the more imperative. That the country's banking system is tossing about to-day without its helm being under the control of its pilots gives cause for deep concern. Yet the fault does not seem to lie so much with the men in charge of it as with the structural defect of its administrative organization. The banking fraternity would be well advised to anticipate radical Congressional proposals by taking the lead in seeking the lines along which reform may be brought about."

Governor Young's address at Cincinnati on March 16 appeared to be in the nature of a reply to the suggestion that the rediscount rates of the Federal Reserve Banks should now be raised or should have been previously raised. Discussing the demand for credit for speculative purposes, Governor Young declared that "the unusual demand for this particular form of credit has had an effect upon the cost of all other forms of credit, so that practically all lines of commerce and industry have been affected to a certain degree." He stated that one of the remedies suggested was that "the system should resort to the orthodox and traditional method of correction by a rediscount rate, which they think will accomplish the results desired. In making such a suggestion, however," he said, "they overlook the fact that high money rates may not deter the speculator when he is optimistic, but if they continue long may seriously depress trade and industry. It is for this reason that the system believes it should first use every effort to accomplish the desired results by other means, though it may be compelled at the end to resort to higher discount rates." Governor Young also made the statement that "this is not a problem alone for the Federal Reserve System, or the banks, but for all of us, and I feel justified in making a strong appeal to you to give it serious consideration." He pointed out that "financing business through shares or bonds can be on a sound basis and when it is sound is entitled to credit, but it is not entitled to all the credit or to an unreasonable proportion of the total." "It seems to me," he added, "that it would be the part of prudence for all who are lenders to see first that business gets credit at reasonable rates and let the others get what is left."

On the other hand, W. P. G. Harding, Governor of the Federal Reserve Bank of Boston and former Governor of the Federal Reserve Board in speaking before the Economic Club of New York at its dinner at the Hotel Astor in this city on March 18, strongly expressed his belief in the efficacy of an advance in the rediscount rates of the Federal Reserve Banks. He pointed out that dangerous tendencies were developing. "These tendencies," he declared "ought to be corrected and the sooner the better." He went on to say "a review lately issued by one of the large banks points out that during the past twelve months there has been an expansion of credit of about 8%, while at the same time there has been an expansion of production and distribution of only 3 or 4%. This difference represents inflation. The best time to check inflation is during the period of its incipency. The longer the postponement the more serious the inevitable result will be when inflation is checked, as was clearly demonstrated in 1920." Governor Harding noted that "the periodic purchase and sale of Government securities by Federal Reserve Banks had been going on for several years and was for a time thought to be an effective means of stabilizing credit without resorting to substantial changes in the discount rate. The experience of the early months of the year 1928, however, proved that this method of stabilizing credit cannot always be depended upon to be effective. . . . "It appears also, that it was a mistake

to advance the discount rate by only $\frac{1}{2}$ of 1%, and that it would have been better to have adopted the time-honored policy of the Bank of England and advance the rate a full 1%. Whenever it becomes necessary to administer a speculative market the medicine of a rate advance, homeopathic doses should be avoided." Governor Harding referred to the Federal Reserve Bank rate as being "no longer the dominant rate." It is generally recognized, both at home and abroad, he said, "that the master rate in this country is the call money rate in New York which fluctuates at frequent intervals from 6% to 12%."

There were other speakers before the Economic Club and they also expressed widely differing views. Congressman McFadden, the Chairman of the House Banking and Currency Committee, spoke along the same lines as in his previous addresses, saying that "it is not the function of the Federal Reserve system to become involved in the control of speculation, but that its principal function is to maintain a proper gold reserve, and to adjust the volume of currency and credit to meet the actual needs of business, industry, trade and commerce." E. C. Stokes, Chairman of the Board of the First Mechanics National Bank of Trenton and formerly Governor of New Jersey declared very emphatically that the Federal Reserve system should "keep its hands off the speculative field" and reduce its rediscount rate instead of moving it up further. Benjamin M. Anderson, Jr., the economist of the Chase National Bank who also made an address before the Economic Club of New York, expressed the view that while admonition to member banks regarding their discounting activities might well have its place in the policy of control, the real effective control of the volume of rediscounting is through the rediscount rate, which, he held, should always be kept above the market rate charged by great city banks to prime borrowing commercial customers.

In the meantime trouble was brewing in the money market. Brokers' Loans were evidently entering upon a new era of expansion, and interest rates were rising all around. The statement issued by the Federal Reserve Bank of New York on Thursday, March 21, showed a further increase in brokers' loans for the week covered of no less than \$166,000,000 and this, though it came after a decrease of \$20,000,000 the previous week, followed \$140,000,000 increase the preceding week and \$30,000,000 increase the week before, making \$316,000,000 expansion for the four weeks combined. The directors of the Federal Reserve Bank of New York at their meeting on Thursday, March 21, with these figures before them, kept the rediscount rate unchanged, nevertheless, but it was evident that increasing concern was being felt over the developments. Rates for bankers' acceptances were marked up another $\frac{1}{4}$ of 1% for all maturities on the same day (Thursday, March 21). On March 22, came advices from Washington saying, that Governor George L. Harrison of the New York Federal Reserve Bank was then in conference with the Federal Reserve Board at Washington. It became known, too, that the Federal Reserve had been in communication by telephone and telegraph the day before with the New York Reserve Bank at the meeting of the directors on that day. It appeared that the Reserve Board had held two meetings on March 22, one at 11 a. m. and another at 3 p. m. One newspaper account said that the Federal Reserve Board had gone into "a somewhat mysterious meeting at 11 a. m." and added: "Although the Board has held meetings frequently of late, today's gathering was considered of especial significance because of Governor Harrison's presence and because the Board called on its statistical department for information before going into session. All members of the Board, including Secretary Mellon, attended the meeting. Neither Secretary Mellon nor Governor Roy A. Young would comment on the subject discussed." The Reserve Board was again in session the next day, Saturday, March 23, a quite unusual thing for a Saturday. It happened, too, that the Federal Reserve Bank at Chicago was holding lengthy meetings, Chicago having troubles of its own. The following week the situation entered upon its acute phase. On Monday, March 25, another advance of $\frac{1}{2}$ of 1% was made in the rates for bankers' acceptances, making the sixth advance since the first of the year in acceptance rates. The new advance brought the bid rate for 90 day bills up to $5\frac{3}{4}$ %. Making allowance for the commission charge for accepting bills this brought the total cost of this form of borrowing close to 7% per annum. The rate for commercial paper on names of choice character maturing in 4 to 6 months was quoted at stiff 6%, which however was merely

a nominal figure as there was virtually no market for paper even of the gilt-edged kind. Time loans on Stock Exchange collateral advanced to above 8%, and, to cap the climax, call loans on the Stock Exchange advanced to 14%, or the highest figure since July 1 1920.

The situation was becoming critical. The next day, Tuesday, March 26, after the charge for renewals of outstanding loans had been fixed at 12% there was an advance by rapid strides, first to 15%, then to 17% and finally to 20%, the highest figure since Feb. 5 1920. The stock market, which had broken badly the day before now went all to pieces and the day proved among the most eventful in Stock Exchange history, with aggregate sales for the day of 8,246,740 shares, a new high record in all time. The commodity markets—grain and cotton in particular—also violently declined. Matters had now reached an acute stage and as the member banks were reluctant to extend their borrowing at the Federal Reserve Banks, in view of the attitude of the Federal Reserve Board, so repeatedly expressed, it began to look as if money would become unobtainable at any figure. It was then that the National City Bank of New York appeared on the scene and made liberal offerings and broke what threatened to become a money famine, out of which unquestionably a panic would have resulted. Quick revival of the Stock Exchange ensued with recovery of the bulk of the early losses.

The next morning (Wednesday, March 27) the New York "Herald-Tribune" contained a statement in which President Charles E. Mitchell explained the attitude and purpose of the action of the bank, in coming to the relief of the market at the time of dire need. Mr. Mitchell was quoted as having said: "So far as this institution is concerned we feel that we have an obligation, which is paramount to any Federal Reserve warning, or anything else, to avert, so far as lies within our power, any dangerous crisis in the money market. While we are averse to resorting to rediscounting, for the purpose of making a profit in the call market, we certainly would not stand by and see a situation arise where money became impossible to secure at any price." The "Herald-Tribune" said that disclaiming any attempt to speak for New York bankers as a whole, Mr. Mitchell made it plain nevertheless that he doubted whether any of the great banks of the city would deliberately stand aside and see a crisis precipitated, rather than extend credit to the stock market. As far as the National City was concerned, Mr. Mitchell averred, no sooner did word come of the straightened credit conditions which had caused the rates on demand loans to leap successively from the renewal rate of 12% to 15% and finally to 20% than the City Bank supplied a substantial sum of money to the market.

The action of Mr. Mitchell provoked the ire of Senator Carter Glass of Virginia and he issued a statement on March 28 declaring that Mr. Mitchell "vigorously slaps the Reserve Board squarely in the face and treats its policy with contempt and contumely." Mr. Glass referred to the fact that Mr. Mitchell was a Class A director of the Federal Reserve Bank of New York and declared that the Board should ask for the immediate resignation by Mr. Mitchell of his position as Director of the institution.

Meetings of the Federal Reserve Board continued daily until Thursday, March 28, when the Federal Reserve statement of brokers' loans appeared for the week ending March 27 and showed a reduction of \$144,000,000 as a result of the great liquidation which occurred during the violent collapse on the Stock Exchange. Newspaper accounts stated that the Board expressed great satisfaction over this and professed to see in it indication of "the co-operation of the member banks in diverting loans from the speculative market." Of greatest satisfaction to the Board, the New York "Journal of Commerce" on March 29 stated, was the drop of \$88,000,000 in the New York Bank loans "for the account of out of town banks." This was held to show that the banks outside of New York City were in close co-operation with the Board and that money was moving back to the other Reserve districts to take care of the spring demands of industry, commerce and agriculture. The Journal of Commerce went on to say that unusual importance attached to the semi-annual meeting of the Federal Reserve Board Governors scheduled for April 1, April 2 and April 3. The credit situation in Chicago, as already indicated, was also deeply disturbed. At the Reserve Board's meeting on March 27 J. B. McDougal, Governor of the Federal Reserve Bank of Chicago, was present. The daily papers stated that the withdrawal of huge funds from the New York call

money market was generally ascribed to the Chicago Reserve district. Reports had it that a money pool of \$40,000,000 had been or was being formed, but R. Arthur Wood, President of the Chicago Stock Exchange, stated that the move to relieve the situation in no wise constituted a "money pool." It appears, however, that considerable amounts of Chicago money, which had been loaned out in New York were withdrawn to help the local situation in Chicago and to enable the Chicago banks to curtail borrowing at the Chicago Reserve Bank. At Philadelphia, also, credit was scarce—at least for Stock Exchange purposes.

Through it all the country's trade and industry remained undisturbed the same as in previous months and a high degree of activity was maintained in nearly all lines of business. The steel trade continued to give the strongest evidence of this activity and in fact the steel mills were employed to nearly maximum capacity. All previous monthly production records of steel were broken. According to the "Iron Age" production in the Chicago district remained at practical capacity; at 95% in the Greater Pittsburgh area and at high rates elsewhere, while the average operations of the United States Steel Corp. subsidiaries were estimated at 97%. In its issue of March 28 the "Iron Age" said that a 25c. a ton advance in iron ore, a further stiffening of Northern pig iron prices and new forward commitments in finished steel were fresh evidences of the buoyant situation in the iron and steel industry. The advance in Lake Superior ore, established on sales estimated at 1,000,000 tons, was the first change in price since 1925 and the first increase since 1923. The "Age" observed that inasmuch as a rise of 25c. a ton in ore adds about 50c. a ton to the cost of making pig iron, Northern blast furnaces already fortified with heavy bookings, had taken a still stronger market position. Closely following the advance of 50c. a ton in the valleys, Eastern Pennsylvania furnaces had raised prices an equal amount, and Buffalo producers had increased quotations \$1 a ton for local delivery and 50c. a ton for Eastern shipment. A Detroit furnace, it was stated, had announced an advance of 50c. a ton on foundry grade and \$1 a ton on malleable, and higher prices at Chicago were regarded as an early possibility, though a contrary situation was noted in the South, where a Virginia producer, influenced by a recent drop of \$1 a ton in Alabama iron, had reduced quotations 50c. a ton. The "Iron Trade Review" in its issue of March 29 remarked that never had so much pig iron and finished steel been made as in the quarter year period then ending, yet far from exhausting the country's requirements, back logs generally were longer and deliveries more deferred than when the quarter opened. The "Age" made the composite price of pig iron Mar. 26 \$18.38 a gross ton or the same as a month before, and the composite price of finished steel 2.391c. a lb. also unchanged.

In the case of the non ferrous metals a runaway market developed in copper out of a fear that there might not be enough copper to go around, though there appeared no substantial reason for any such fear. According to figures compiled by the American Bureau of Metal Statistics copper production by the principal countries of the world during the two months ended Feb. 28 amounted to 343,037 tons, as compared with 285,092 tons in the corresponding two months of the previous year. After the big rise in the price in the metal in previous months, there was a further advance during March of almost 5c. a lb. Lake copper in New York rose from 19.62½c. March 1 to 24.12½c. March 30 and electrolytic copper from 19¼c. to 23¾c.

Sharp advances occurred also in lead, the New York price being marked up first from 7.10c. to 7.25c., then to 7.50c. and finally to 7.75c. The price of tin, however, remains irregular. It did rise at one time, but reacted again. The quotation here in New York March 30 was 48.87½c. per lb. against 48.75c. Feb. 28. In petroleum plans developed for sharply curtailing the production of crude oil. Plans to hold down the output of crude oil during 1929 to the level of output for 1928 were approved at a meeting in New York on March 27 of directors of the American Petroleum Institute representing, it was stated, practically the entire petroleum producing and refining industry in the western hemisphere. The plan was to become effective on April 1. It affected crude oil production on the Pacific Coast, Gulf and Atlantic Coasts and the interior sections of the United States as well as in Colombia, Venezuela and Mexico.

In the textile trades the feature was the revival of the cotton goods industry. Reports from New Bedford stated

that the industry was in fact outdoing itself, that at no time in official record had the nation's mills been so active as they had been so far in 1929, operations ranging around 110% of single shift capacity, or more, the first three months of 1929. Most of this activity was due to operations in the fine goods branch of the industry, the highest comparative gains being made there and of course also New Bedford suffered from a long strike in 1928. The South, however, was enjoying the greatest activity, the cotton growing States continuing their overtime operations while in the North no State was able to boast that its mills as a whole were running more than on a single shift, if fully that. The Census Bureau statement for the month of February, issued March 15, showed that the quantity of cotton consumed by the mills of the country was 598,098 bales of lint and 68,060 bales of linters, compared with 572,875 bales of lint and 57,798 bales of linters in February 1928 when the month contained one more day, it having then been leap year. The price of raw cotton was maintained at a relatively high level during March, the price of middling upland spot cotton in New York having been 20.70c. March 1 and 20.95c. March 28, the last trading day, the Cotton Exchange having been closed both on Good Friday, March 29, and on Saturday, March 30. At one time in the early part of the month, that is on March 8 and March 9, the price was as high as 21.65c. Print cloths at Fall River for 28 in. 64 x 60 were marked up March 6 from 5¼c. to 5½c. In the woolen goods division the feature was the Golden Fleece Pageant at the Hotel Roosevelt in this city, which was fully attended and had the effect of greatly stimulating interest in woolen fabrics. The American Woolen Co. opened its women's wear lines for the fall trade on March 19 and this also offered some attractive displays. In the case of repeat numbers prices were from 5c. to 22½c. lower than at the opening of the fall lines for 1928. Most of the lines, however, were wholly different from any shown in past seasons and embraced many new styles in keeping with fall fashion trends. Prices of raw wool at the auction sales abroad tended lower. Raw silks again moved lower after some improvement in prices the earlier part of the month. Japanese double extra 13-15 deniers were down to \$5 @ \$5.05 March 31 against \$5.10 @ \$5.15. Feb. 28. In the 20.22 deniers Japanese crack double extra were also down to \$5 @ \$5.05 against \$5.15 @ \$5.20 on Feb. 28. Crude rubber again fluctuated quite widely, now up and now down, but with a sharp net decline for the month, ribbed smoked sheets for spot delivery in the New York market being down to 22½¢ bid and 23½¢ asked March 30 against 26¼¢ bid and 26½¢ asked Feb. 28; 22½¢ bid and 23½¢ asked on Jan. 31 and 18c. bid and 19¼c. asked on Dec. 31 1928.

Grain prices suffered further sharp declines during March. Prospects for growing winter wheat crop in the United States greatly improved, besides which the visible supply in both Canada and the United States remains very heavy. The grain markets were also badly hit the latter part of the month by the tension in money and the crash in the stock market. The May option for wheat in Chicago declined from \$1.25¼ March 2 to \$1.15½ March 26 the day of the great crash in the stock market and was \$1.17½ @ \$1.18½ March 30. The May wheat option in Chicago fell from \$1.30½ March 2 to \$1.18 March 26 and closed March 30 at \$1.21¼c. The March corn option at Chicago declined from 96¾c. March 1 to 89c. March 26 and closed March 30 at 92c. The May option for corn at Chicago tumbled from \$1.01 March 1 to 90¾c. March 26 and closed March 30 at 94½c. The March option for oats fell from 49c. March 4 to 44¾c. March 30, while May oats at Chicago fell from 52c. March 1 to 44¼c. March 27 and closed March 30 at 46¾c. Cuban raw sugar reached still lower figures; one time, that is on March 14, it was back to 2c. a lb. as against 1 61-64 Feb. 28, but the latter part of the month there was a drop to 1½c. In the case of the wholesale price of refined sugar at New York the leading refineries reduced to 4.75c. on March 5 with the Federal Sugar Co., quoting a range of 4.75 @ 4.80, but the very next day the price was marked up again to 4.90c. with the Federal quoting 4.90 @ 4.95 the same as at the close of February. Coffee prices weakened somewhat and No. 7 Rio was quoted at 17¼c. bid March 30 in the New York market against 18¼ @ 18½c. on Feb. 28 and at the end of January and at the end of December.

NEW SECURITY ISSUES AND DIVIDENDS IN MARCH.

March issues of foreign Government securities offered in the domestic market were on a smaller scale than in the previous month. The offering of \$50,000,000 Kreuger & Toll Co. (Aktiebolaget Kreuger & Toll), Stockholm, Sweden, 5% sec. s. f. gold debts. at 98 and int., was the most prominent issue of the month. The next largest offering was \$15,000,000 Bell Telephone Co. of Canada, 1st mtge. 5% gold bonds, series "B," at 100 and int. The following table includes all of the foreign security issues offered in this country during March:

\$10,000,000 Republic of Chile.—External loan s. f. 6% gold bonds at 93½ and int., to yield 6.48%, due March 1 1962, by the National City Co. (\$2,000,000 offered simultaneously in the London market by N. M. Rothschild & Sons).

- 50,000,000 **Kreuger & Toll Co. (Aktiebolaget Kreuger & Toll), Stockholm, Sweden.**—5% secured s. f. gold debts. (bearing warrants for purchase of American citfs. representing participating debts.) at 98 and int., to yield over 5½%, due Mar. 1 1959, by Lee, Higginson & Co., Guaranty Co. of New York, the National City Co., Brown Brothers & Co., Dillon, Read & Co., Clark, Dodge & Co. and the Union Trust Co. of Pittsburgh. Substantial blocks of this issue were offered in other countries.
- 15,000,000 **Bell Telephone Co. of Canada.**—1st mtge. 5% gold bonds, series "B," at 100 and int., due June 1 1957, by Lee, Higginson & Co., Bank of Montreal and Harris, Forbes & Co.
- 10,000,000 **Power Corp. of Canada, Ltd.**—4½% 30-year conv. debts., series "B," at 100 and int., both in Canada and the United States, due Mar. 1 1959, by A. Iselin & Co., New York, and Nesbitt, Thompson & Co., Ltd., Montreal.
- 6,000,000 **Shawinigan Water & Power Co.**—1st mtge. & coll. trust s. f. 4½% gold bonds, series "B," at 93 and int., due May 1 1968, yielding over 4.90% by a banking group comprising Brown Bros. & Co., Lee, Higginson & Co., Alex. Brown & Sons, Jackson & Curtis and Minsch, Monell & Co., Inc. A substantial amount of this issue will be sold simultaneously by a banking group in Canada.
- 6,000,000 **Great Britain & Canada Investment Corp.**—4½% 30-year conv. debts. at \$100 and inc. (with warrants), due April 1 1959, by A. Iselin & Co., New York, and Nesbitt, Thomson & Co., Ltd., Montreal. These debentures are offered for sale simultaneously in the United States, Canada and Europe.

Domestic offerings in March show a decided falling off in the number of issues placed as compared with February. The largest piece of financing for the month was the offering of \$50,000,000 Cities Service Co. 5% gold debts. at 97½ and int. Two other offerings of size were 2,000,000 shares of The Aviation Corp. (Del.) common stock at \$20 per share, and \$35,000,000 Eastern Utilities Investing Corp. 5% gold debts. at 98 and int. The financing classified as to the nature of business and size of issues is shown below, the table including only issues of \$5,000,000 and above:

RAILROAD FINANCING.

- \$20,000,000 **Texas & Pacific Ry.**—Gen. & ref. mtge. 5% gold bonds, series "C," at 99½ and int., due April 1 1979, by Kuhn, Loeb & Co.

PUBLIC UTILITY FINANCING.

- \$50,000,000 **Cities Service Co.**—5% gold debts., at 97½ and int., due Mar. 1 1969 (with common stock purchase warrants), by Harris, Forbes & Co., Halsey, Stuart & Co., Inc., The National City Co., Bonbright & Co., Inc., E. H. Rollins & Sons, A. B. Leach & Co., Inc., Federal Securities Corp., Pearson-Taft Co. and Henry L. Doherty & Co.
- 35,000,000 **Eastern Utilities Investing Corp.**—5% gold debts. (with class "A" common stock purchase warrants), at 98 and int., due Mar. 15 1954, by Harris, Forbes & Co. and Halsey, Stuart & Co., Inc.
- 30,000,000 **International Hydro Electric System.**—6% conv. gold debts., at 100 and int., due April 1 1944, by Chase Securities Corp., Bankers Co. of New York, Harris, Forbes & Co., Lee, Higginson & Co., Blair & Co., Inc., Halsey, Stuart & Co., Inc., E. H. Rollins & Sons and Redmond & Co.
- 250,000 shs. **Electric Bond & Share Co.**—\$6 cum. pref. stock (no par), to yield 5.66%, at \$106 per share and divs., by Bonbright & Co., Inc.

INDUSTRIAL AND MISCELLANEOUS.

- 2,000,000 shs. **(The) Aviation Corp. (Del.)**—Common stock (no par value), at \$20 per share, by Lehman Brothers, W. A. Harriman & Co., Inc., Hallgarten & Co., Chas. D. Barney & Co., Edward B. Smith & Co., Guardian Detroit Co., Inc., Pyncheon & Co., Hitt, Farwell & Co., E. F. Hutton & Co., Lane, Piper & Jaffray, Inc., Air Investors, Inc., Jessup & Lamont, Rogers, Caldwell & Co., Inc., Fash Walbridge and Halle & Stieglitz. (The issue was oversubscribed.)
- \$30,800,000 **Philadelphia & Reading Coal & Iron Co.**—20-year conv. 6% debts., at 100 and int., due Mar. 1 1949. Stockholders of the Philadelphia & Reading Coal & Iron Corp. are given the right to subscribe to \$2,200 of bonds for each 100 shares of stock. The issue has been underwritten by Drexel & Co.
- 250,000 shs. **Electric Shareholdings Corp.**—\$6 cum. conv. pref. stock (optional stock div. series), at \$100 per share and div., by a syndicate composed of the J. Henry Schroder Banking Corp., Chase Securities Corp., Blyth & Co., E. H. Rollins & Sons, Blair & Co., Inc., and Cassatt & Co.
- \$18,000,000 **(Marshall) Field & Co., Chicago.**—1st mtge. 5% bonds, due serially from June 1 1932 to June 1 1949, by First Trust & Savings Bank, Chicago. Entire issue sold to the Metropolitan Life Insurance Co.
- 750,000 shs. **Insuranshares Corp. of Delaware.**—Class "A" stock, at \$21¼ per share (the Goldman Sachs Trading Corp. has agreed to purchase 250,000 shares of the stock), by Insuranshares Corp. of New York.
- \$15,000,000 **(John) Wanamaker Philadelphia.**—Real estate 1st mtge. 5½% s. f. gold bonds of James P. Rothwell, at 101¼ and int., to yield about 5.40%, maturing April 1 1949, by Brown Bros. & Co., Edward B. Smith & Co., Elkins, Morris & Co. and Thos. A. Biddle & Co.
- 10,000,000 **National Bond & Share Corp.**—Capital stock (no par value), at \$53 a share, by Dominick & Dominick. Approximately 10% was subscribed for by the partners and employees of the firm, the remainder by customers and private wire correspondents of the firm.
- 150,000 shs. **(Fred T.) Ley & Co., Inc.**—Capital stock (no par value), at \$57 per share, by S. W. Straus & Co., Inc., and Foster, McConnell & Co., New York.
- \$7,000,000 **Warner-Quinlan Co.**—6% conv. gold debts. at 98½ and int., to yield over 6.20%, and due Mar. 1 1939, by Hayden, Stone & Co.
- 10,000 units **Cooper Bessemer Corp.**—100,000 shares of \$3 cum. pref. stock, series A, with warrants, and 40,000 shares common stock in units of 10 shares of pref. and 4 shares of common at \$660 per unit, by the National City Co. and August Belmont & Co.
- \$6,500,000 **Schulte United Properties, Inc.**—5½% gold debts. (with common stock allotment citfs.), at 100 and int., due Mar. 1 1959, by Otis & Co. and Harris, Forbes & Co.
- 200,000 shs. **Starrett Corp.**—Common stock (no par value), at market (about \$31-\$32 per share), by G. L. Ohrstrom & Co., Inc., Edward B. Smith & Co., Janney & Co. and Graham, Parsons & Co.
- 300,000 shs. **Roosevelt Field, Inc.**—Capital stock (no par value), at \$18 per share, by Edward B. Smith & Co., Chas. D. Barney & Co., Hitt, Farwell & Co., Pyncheon & Co., Janney & Co. and the Aviation Corp.
- 200,000 shs. **Public Investing Co.**—Capital stock (with option warrants), at \$25 per share, by Frederick Peirce & Co.

MUNICIPAL FINANCING

- \$28,000,000 **State of Arkansas 5% highway and toll bridge bonds**, due serially from 1930 to 1962, purchased by a syndicate headed by Halsey, Stuart & Co. of New York. The bankers paid 100.002 for a \$14,000,000 block of the bonds sold and secured a 90-day option at 100.50 on the remaining \$14,000,000. Obligations were offered for public investment priced to yield 4.75%.

- 9,250,000 **Newark (N. J.) 4½% bonds**, due serially from 1929 to 1968 inclusive, awarded to a syndicate headed by the Guaranty Co. of New York. Successful group purchased the bonds consisting of five issues at prices representing an interest cost basis to the city of about 4.49%. Issues were re-offered for investment, priced, according to maturity, to yield 4.40%.
- 5,000,000 **State of West Virginia road bonds**, due from 1945 to 1954 inclusive, awarded as 4½s to a group headed by the Bankers Co. of New York at 100.7199, a basis of about 4.44%. Successful bidders re-offered the bonds for investment at prices to yield 4.44%.

Changes in dividend declarations during March were many. The following table, divided into two sections, namely, "Favorable Changes" and "Unfavorable Changes," gives the more important of the changes:

FAVORABLE DIVIDEND CHANGES.

- Abbott Laboratories, North Chicago, Ill.**—Initial quar. div. of 50c. per sh. on the common stock.
- Allegheny Steel Co.**—Extra div. of 25c. per sh. in addition to regular monthly div. of 15c. per sh. on the common stock.
- American Cities Power & Light Corp.**—Initial reg. quar. div. of 75c. per sh. or 1-32nd of a sh. of class B stock, on the class A stock and of 1% in class A stock on the class B stock.
- American Pneumatic Service Co.**—Div. of 75c. per sh. on the 2d pref. stock and the reg. quar. div. of 1¼% on the 1st pref. stock. In Dec. 1928 50c. per sh. was paid on the 2d pref. stock.
- American Screw Co.**—Quar. div. on capital stock increased from 1% to 1¼%.
- American Surety Co.**—Quar. div. of \$150 per sh. on new \$25 par capital stock. Prior to split up on a 2-for-1 basis a quar. div. of \$2.50 and an extra of \$2 was paid on the old capital stock of \$50 par.
- Anchor Post Fence Co.**—Quar. div. of 2¼% in stock, or 85c. a sh. in cash on common stock compared with an initial div. of 75c. a sh. in cash and 5% in stock.

National Tea Co., Chicago.—Quar. div. of 37½c. per sh. on new common stock compared with \$1 paid quar. on old common prior to the split-up on a basis of four new shs. for each sh. held.

Nevada Consolidated Copper Co.—Quar. div. increased from 50c. per sh. to 75c. per sh. on the capital stock.

Newton Steel Co.—Initial quar. div. of 75c. per sh. on new common stock, recently split 2-for-1 as against \$1 per sh. paid quarterly on the old common stock.

New York Title & Mortgage Co.—Extra div. of 2% in addition to reg. quar. div. of 5%.

Nickel Holdings Corp.—Initial div. of \$1.20 per sh. on the common stock.

Ohio Wax Paper Co.—Initial quar. div. of 40c. per sh. on the com. stock.

Packard Electric Co., Warren, Ohio.—Extra div. of 12½c. per sh. and a reg. quar. div. of 50c. per sh. on the common stock. Prior to the 3-for-1 split-up in January last a reg. div. of \$1 per sh. and an extra of 50c. per sh. were paid.

Penn-Ohio Edison Co.—Stock div. of 1-50th of a sh. in addition to reg. quar. cash div. of 25c. per sh. on the common stock.

Pittsburgh Screw & Bolt Co.—Initial quar. div. of 35c. per sh. on common stock.

(R. J.) Reynolds Tobacco Co.—Quar. divs. of 60c. per sh. on the new common and common "B" stocks; this is equivalent to \$1.50 per sh. paid on old shs. which were recently exchanged for new shs. on a 2½-for-1 basis.

Rio Grande Oil Co. of Del.—Resumes divs. by payment of 1½% in stock and \$1 in cash on each share of capital stock.

Rochester (N. Y.) Gas & Electric Corp.—Quar. div. increased from 50c. per share on the common stock to 75c. per share.

Rossville Commercial Alcohol Corp.—Initial quar. div. of \$1.75 per sh. on the \$7 div. conv. pref. stock.

Scott Paper Co.—Quar. div. increased from 25c. per sh. on common to 35c. per sh.

Schulte-United 5c. to \$1 Stores, Inc.—Initial quar. div. of \$1.75 per sh. on the pref. stock.

Seaboard Dairy Credit Corp.—Initial quar. divs. of 1¼% on the 7% cum. pref., series A and 50c. per sh. on common stock.

Sieloff Packing Co., St. Louis.—Extra div. of 60c. per share on common stock in addition to quar. div. of 30c. per sh.

Spicer Manufacturing Corp.—Initial quar. div. of 75c. per sh. on the cum. pref. stock.

(A.) Stein & Co.—Initial quar. div. of \$1.62½ per sh. on the 6¼% cum. pref. stock.

Steinberg's Drug Stores, Inc.—Initial quar. div. of 87½c. per sh. on the cum. conv. pref. stock.

Telaugraph Corp., N. Y.—Quar. div. increased from 25c. per sh. to 50c. per sh. on the common stock.

Thompson's Spa, Inc.—Initial quar. div. of \$1.50 per sh. on the \$6 cum. pref. stock.

Time-O-Stat Controls Co.—Initial quar. div. of 50c. per sh. on the \$2 cum. div. conv. class A stock.

United Linen Supply Co.—Initial quar. divs. of 87½c. per sh. on the class A cum. \$3.50 conv. stock and \$1.50 per sh. on the class B non-cum. \$6 conv. stock.

United Paper Box Co., San Francisco.—Initial quar. div. of 40c. per sh. on the class A stock.

United States Bobbin & Shuttle Co.—Div. on common stock increased from 50c. a sh. to 75c. a sh.

United Verde Extension Mining Co.—Quar. div. increased from 75c. per sh. to \$1 per share.

Universal Theatres Concession Co.—Div. of 20% on the class A stock, covering arrearages up to and including July 1 1929.

Utah Copper Co.—Quar. div. on the capital stock increased from \$3 per sh. to \$4 per sh.

Vadeco Sales Corp.—Initial quar. div. of \$1.75 per sh. on the preferred stock.

Van Sicken Corp.—Initial quar. div. of 50c. per sh. and an extra div. of 15c. per sh. on the partic. class A stock.

(S. D.) Warren Co. (Pulp & Paper).—Initial quar. div. of \$1.50 per sh. on common stock.

Weinberger Drug Stores, Inc.—Quar. div. increased from 40c. per sh. to 15c. per sh. on the capital stock.

West Coast Bancorporation, Portland, Ore.—Initial divs. of 25c. a sh. on both the class A and B stocks.

Western Electric Co., Inc.—Quar. div. increased from 75c. per sh. on common stock to \$1 per share.

Westark Radio Stores, Inc.—Initial quar. div. of 50c. per sh. on the capital stock.

Wheeling & Lake Erie Ry.—A div. of 3¼% on the prior lien 7% stock for the period (Nov. 1 1917 to May 1 1918), compared with 7% paid in November 1918 for the period from Nov. 1 1916 to Oct. 31 1917.

Woodruff & Edwards, Inc.—Initial quar. div. of 50c. per sh. on the partic. class A stock.

UNFAVORABLE DIVIDEND CHANGES.

Aetna Rubber Co.—Quar. div. decreased from 50c. a sh. to 25c. a sh. on common stock.

Albany Perforated Wrapping Paper Co.—Div. on com. stock omitted.

Artloom Corp.—Quar. div. decreased from 75c. per sh. on common stock to 50c. per share.

Asbestos Corp., Ltd.—Quar. div. of 1¼% on the 7% non-cum. pref. stock omitted.

Clark Lighter Co., Inc.—Quar. div. of 65c. per sh. on the \$2.60 cum. div. conv. "A" stock omitted.

Conley Tank Car Co.—Quar. div. on common stock omitted.

Davis Industries, Inc.—Quar. divs. of 31¼c. per sh. omitted on the class A and class B stock.

Empire 38th Street Corp., N. Y.—Quar. div. of 25c. per sh. on common stock omitted.

Leonard, Fitzpatrick Mueller Stores Co.—Quar. div. of 37½c. per sh. on common stock omitted.

Marion (Ohio) Steam Shovel Co.—Div. on common stock omitted.

Morgan's, Inc.—Quar. div. on the class B stock omitted.

Morgan Lithograph Co.—Quar. div. of \$1.25 per sh. on the common stock omitted.

National Cottonseed Products Corp.—Quar. div. of 1¼% on the 7% cum. pref. stock omitted.

Rubber Service Laboratories Co., Akron, Ohio.—Quar. div. of 60c. per sh. on common stock omitted.

St. Joseph South Bend & Southern RR.—Semi-annual div. on common stock decreased from ¼ of 1% to ½ of 1%.

Salt Creek Consolidated Oil Co.—Quar. div. decreased from 20c. a share to 10c. a share.

Ward Baking Corp.—Quar. div. of \$2 per sh. on the class A non-cum. common stock was omitted.

THE STOCK MARKET DURING MARCH 1929.

The stock market during March suffered a violent upheaval, resulting in a crash which will probably rank as one of the most noteworthy in Stock Exchange history. The collapse grew directly out of the tension in the money market, which kept steadily getting worse as the month progressed and finally reached an acute stage, where it actually seemed that loans on collateral security, the life blood of Stock Exchange speculation, might not be procurable at any interest rates, no matter how high. It developed that only scant supplies of funds to loan out on the Stock Exchange were available, while the demand was more than ordinarily urgent, this being due to the strenuous efforts made by the Federal Reserve Board to reduce member bank borrowing in aid of stock speculation, making these banks reluctant to seek additional accommodation at the Federal Reserve institutions, when the stage of extreme pressure was reached, but it followed also from a variety of other causes as narrated elsewhere in this article, chief among which may be mentioned the fact that the peak of the spring demand on behalf of trade and agriculture was reached the latter part of the month, that preparations had to be made for the heavy interest and dividend payments due April 1, estimated roughly at \$500,000,000, and that out of town points, notoriously Chicago, found it necessary to withdraw large sums which had been loaned out on the New York Stock Exchange in order to take care of local speculative troubles, there being naturally hesitation to apply to the local Reserve Bank for this purpose in view of the declared attitude of the Reserve Board. The crash did not come until the closing week of the month, but the market proved more or less disappointing from the start, though in the second week of the month the market was irregular, pool operations in certain groups of stocks like the copper shares and the oil stocks, as well as in some of the speculative specialties moved the whole market higher. The copper stocks were bid up on the strength of repeated further advances in the price of the metal and the oil stocks were vigorously advanced on the action of the American Petroleum Institute and large oil producers in arranging to restrict the output of oil and place the oil industry on a better basis. The specialties were boosted for reasons peculiar to themselves. During February it will be remembered the market, after a severe break the early part of the month, staged a complete recovery the latter part of the month with a revival of confidence so complete that on Feb. 28 the tone became positively buoyant. The improvement extended into March and on Friday, March 1, prices continued their upward course with the day's business exceeding six million shares (6,021,300 shares), notwithstanding renewed expansion in the total of brokers' loans. On Saturday, March 2, however,

the market was subjected to profit-taking as a result of which a number of important recessions in prices occurred. Monday, March 4, was the day of the inauguration of President Hoover and many traders had been looking forward to Mr. Hoover's inaugural address, in the hope that it might contain some reference to the credit situation of an encouraging nature, in which hope however they were disappointed. The market, while irregular, declined, yielding to bear pressure. On Tuesday, March 5, there was again general selling on the rise in call loan rates to 10%, and on Wednesday, March 6, the weakness was further intensified by another advance in the call loan charge, this time to 12%. On March 7, the selling pressure appeared to be greatly relieved and a much better tone developed, notwithstanding that the call loan figure again touched 12% and even the renewal charge was as high as 10%. On that day portions of the losses sustained earlier in that week were recovered, though this was by no means so of the entire market. In the general upward movement not a few stocks established new high figures for the year. On Friday, March 8, the market had two adverse features to contend against; first an increase for the week of \$140,000,000 in the total of brokers' loans and, secondly, a severe criticism of the excesses of stock speculation by Paul M. Warburg in the latter's report to the stock holders of the American Acceptance Bank, Mr. Warburg saying that the Federal Reserve had lost control of the credit situation and that stock operators were now in control. But after early weakness, the market again moved upward, with a spectacular rise of 38 points in Radio Corporation to 445, a new high, the noteworthy feature; later in the month the stock advanced to 549.

The following week, easing of the money situation—which unfortunately proved temporary—had a stimulating influence and the market completely reversed its course, prices again moving upward and the upward movement gaining momentum, as the week advanced. On Saturday, March 9, and Monday, March 11, the tone was still hesitant, with not a few stocks moving toward lower levels. On Tuesday, March 12, there was considerable selling in the early part of the day, when numerous low records for the year were established, but a sharp rally occurred before the close. On that day and the next day, (March 13), the renewal charge for call loans each day was 7%, but with the rate down to 6% before the end of the day. This proved a decided stimulus and on the day referred to (March 13) the market moved forward with growing force, though declines were not lacking in the less active list. On Thursday, March 14, there was positive buoyancy and on Friday, March 15 (all loans on the Stock Exchange having been put through at 7% on these two days), something very much akin to an old fashioned bull market developed, with spectacular advances in many stocks. That the underlying character, however, of the money situation had not changed, appeared from the fact that 90-day time money moved still higher, rising from 7¼% to 8%, but this was ignored or remained unnoticed. On the other hand, not a little comfort appears to have been derived from the circumstance that the Federal Reserve Bank of New York had not raised its rate of discount, as had been feared, and from the further fact that a decrease in the total of brokers' loans was shown in the Federal Reserve statement which appeared on Thursday evening, even though the decrease was relatively slight. The trading on March 15 actually became wild in character, upward movements being engineered in a large number of old time speculative favorites, like Radio Corporation of America, General Motors shares, General Electric, several of the copper stocks and a host of others, some of which were the subject of sky-rocket performances, the sales for the day again approaching close to six million shares—actually 5,885,170 shares.

The last half of the month the market was completely under the influence of high money rates and a fear as to what the activities of the Federal Reserve Board might portend. This latter was perhaps the most potent influence until call money rates took their final leap upward on March 25 and March 26 and caused complete demoralization of both the money market and the stock market. The daily papers featured the recurring sessions of the Federal Reserve Board very prominently (the meetings being presumably concerned in devising of means for grappling with the credit situation, though nothing was allowed to become known as to what was going on) and as a consequence a state of nervousness developed bordering closely on hysteria. Fears that the New York Federal Reserve Bank might raise its rate of discount were not realized, but happenings came in rapid succession showing the tension prevailing in the money market. On Thursday, March 21, rates for bankers' acceptances were marked up another ¼ of 1%, and on the same day there came the statement of the New York Federal Reserve Bank showing a further expansion of \$166,000,000 during the week ending March 20 in the ever-growing total of brokers' loans. On Friday, there came the further news that the Federal Reserve Board at Washington was again in session, apparently discussing phases of the credit situation, and that Gov. Harrison of the Federal Reserve Bank of New York was in attendance. It happened that the directors of the Chicago Reserve Bank were also in session, discussing their own local troubles. All this came on badly frayed nerves, causing a general

tumble in stock prices, though the copper stocks were strong, the price of the metal having now advanced to above 24c., and the oil stocks also, for reasons already mentioned, resisted the downward movement to some extent. On Saturday, March 23, the news was that the Reserve Board was again in session. Very naturally prices dipped still lower.

All this paved the way for the complete breakdown which occurred the following week. On Monday, March 25, the Federal Reserve Board was in another session, apparently still grappling with the credit problem, though silence was still the word as to what was going on. On top of this came another advance of ½ of 1% in the rates for bankers' acceptances and call loans on the Stock Exchange, after renewing at 9%, rose by rapid steps to 14%, the highest figure reached since July 1 1920. The deepest apprehension now prevailed concerning the money situation, and stock prices took a further plunge downward, the declines in a large number of the speculative favorites reaching 10 points or more. The climax came the next day. The Federal Reserve Board was again holding protracted sessions. The Governor of the Federal Reserve Bank of Chicago, was now also in Washington so newspaper dispatches stated. The money situation now reached an acute stage. The renewal rate for call loans was fixed at 12%. But from this there was an advance to 15%, then to 17% and finally to 20%, the highest figure since Feb. 5 1920. Outside of the Stock Exchange, according to some reports, as high as 22%, and even 25% was paid for small amounts of money on call. Stocks were now thrown over by the ream, both because of the loss of confidence and by reason of exhausted margins. It looked as if the bottom were going to fall completely out of the market. It appeared, too, in the absence of any considerable supplies of money for loaning, as if before long money would not be obtainable at any price. It was then that the National City Bank came on the scene, as related in the earlier part of this article, and offered funds in quite liberal amounts, to stem the upward flight of interest rates. The effect on the stock market was magical. The market now reversed its course and with a rapidity that it seems safe to say has never been surpassed in Stock Exchange history. Bargain hunters bought; shorts scrambled to cover their outstanding commitments and considerable buying occurred for account of different investment trusts and holding companies. In the last hour of the day's session, between two o'clock and three o'clock, prices rallied as never before. The losses early in the day had been of sensational dimensions; in the rally at the close these losses were in not a few instances completely recovered, leaving closing prices actually better in some cases than the closing prices of the day before. The day's transaction reached no less than 8,246,740 shares establishing a new high record, far surpassing the previous high record which was established on Nov. 23 1928, when the sales aggregated 6,954,020 shares. By actual count no less than 517 stocks established new low prices for the year. On the New York Curb market, which passed through the same experience as the Stock Exchange, the sales footed up 2,210,400 shares, making the volume of business for this day on the two exchanges combined nearly 10½ million shares. It should be stated that on the commercial exchanges prices also were badly demoralized on the day under discussion, severe declines in wheat, corn, cotton, &c., taking place.

On Wednesday March 27 the recovery on the Stock Exchange made further progress, as abundant supplies of funds were on offer from the National City Bank and other large money lenders. All call loans on that day were at 15%. On Thursday March 28, which proved to be the last business day of the month, (the next day being Good Friday and the Exchange also remaining closed on March 30 Saturday) the upward movement of prices made further headway, and when it appeared that call loans on the Stock Exchange, after having been renewed at 15%, dropped to 8% the tone became positively buoyant. Trading continued in large volume, the sales on March 27 reaching 5,618,990 shares and on March 28, 5,096,320 shares.

Aggregate sales for the month on the New York Stock Exchange were 105,661,570 shares, not a high record, this distinction being still retained by November 1928, when the sales aggregated 115,360,075 shares. On the New York Curb market the sales aggregated 32,058,800 shares which compares with 43,546,800 shares in January of the present year in which month the total was the highest for any month in that market. Notwithstanding the disastrous nature of the conditions that the market had to contend against, quite a considerable number of stocks—a decided minority of course—established new high records for the year. Pretty generally these new highs were made before the great crash in the final week of the month, but in a few cases they were made after that event. These latter consisted chiefly of some high-priced specialties, which were uniformly strong throughout the month, even in the periods of great depressions. Among these may be mentioned such stocks as International Tel. & Tel. which arranged to take over the wireless business of the Radio Corporation of America and which sold up to 279 March 28, and closed at 274½ on that day, against 205½ March 12, and 219½ at the opening on March 1. Adams Express sold up to 595 March 27 and closed March 28, at 594, as against 515 March 6, and 580 at the opening on March 1. Even after the recovery which occurred following the crash on March 25 and March 26, the great

majority of stocks show severe declines compared with the closing prices at the end of February. The exceptions are the copper stocks and the oil stocks. These stocks in the general break on March 26, suffered as severely, and some of them more severely than the rest of the list, but they were foremost in the rally and having moved upward in such vigorous fashion before the break, they show the most of them very striking gains for the month. To furnish a general indication of the course of prices for some of the representative stocks with the extent of the declines and the subsequent recovery we introduce here the following table:

	Opening Price March 1.	Range for Month of March.		Closing Price March 28.
		High.	Low.

The foregoing contains none of the stocks on the railroad share list. These enjoyed sharp advances the early part of the month, but did not escape in the general break, many of them indeed establishing new low records for the year. But they also participated in the rally, and a few show only slight net changes for the month. A few illustrations will suffice to indicate this. New York Central after rising on March 1, from 194 1/4 to 200, sold down to 178 1/2 March 26, and closed March 28 at 185. Balt. & Ohio after rising from 125 1/2 March 1 to 133 March 5, sold down to 118 1/2 March 26, and closed March 28, at 124. Atchison as against 204 1/2 March 5 touched 195 1/2 March 26; it closed March 31, at 199 1/2 against the opening March 1 of 202 1/2. Southern Railway after jumping up March 1 from 148 1/4 to 152 1/4 sold down to 142 March 26, and closed at 147 March 28, Del. & Hudson after rising from 195 March 1 to 200 1/4 March 2, dropped to 182 March 26, and closed March 28 at 188. Bond prices moved lower all around as a result of the high money rates. Bonds with convertible features tumbled as badly as the stocks into which they are convertible.

VOLUME OF BUSINESS ON THE STOCK EXCHANGE.

THE MARCH FINANCING OF THE UNITED STATES TREASURY.
 The March financing of the United States Treasury which had been looked forward to with no little interest, not unmixed with a certain amount of anxiety, served to supply indication anew of the tension in the money market. Secretary Mellon's announcement of the details of this financing came on March 6, two days after the inauguration of the new Administration under President Herbert Hoover on March 4. The distinctive feature of Mr. Mellon's announcement was the high interest rate contained in a new offering of Treasury certificates of indebtedness for an aggregate of \$475,000,000 "or thereabouts" with a maturity of nine months from March 15. The Secretary deemed it incumbent to raise the rate again to 4 1/4 %, the same as in the offering of certificates made the previous October. In his December offer-

ing of \$500,000,000 certificates the rate had been only 4 1/4 %. While the higher rate was not a surprise, considering the conditions of the money market, it was impossible to overlook the fact that prior to October, 1928, no certificates bearing so high a rate had been put out by the Government since 1921. In June of last year (1928) two short term offerings of Treasury certificates had been made, one of the series, running for 6 months, bear interest at 4 % per annum, and the other, with a maturity of 9 months, carrying 3 3/8 % in March, 1928, the rate of interest was only 3 1/4 % on a 9 months issue of certificates for \$200,000,000 and 3 3/8 % on an issue running for a year for \$360,000,000. In December, 1927, the Treasury offered \$250,000,000 certificates running for a year at 3 1/4 % interest and in November, 1927, it offered \$400,000,000 of 7 months certificates at 3 1/8 %.

The New York "Times" of March 7, in a dispatch from its Washington correspondent dated the previous evening, after noting the 4 1/4 % rate, went on to say that the terms fixed for the offering were interpreted in Washington as evidence that the Treasury had little hope that there would be any material easing in money rates for some time to come, and then added:

A break had been hoped for by the department, and in December it had backed up this hope by offering a \$500,000,000 issue at 4 1/4 %, shaving off 1/2 % from the October rate.

There was a sharp break in the stock market almost coincident with the announcement of the December offering, and, added to some extent by this happening, the issue "went over," a total of \$629,000,000 in subscriptions being received.

It has been more usual for offerings of Treasury certificates of indebtedness to be twice oversubscribed, and this comparative lack of enthusiasm for the 4 1/4 % certificates gave Treasury experts food for thought, it is said.

With the action of the Federal Reserve Board in issuing a warning on Feb. 6 against the use of Reserve System funds in stock market credit operations, Treasury officials hoped that developments to follow would aid the Government in financing its needs at a lower rate, but after a brief liquidation period on the Stock Exchange money rates again stiffened.

The New York "Journal of Commerce" of March 7 commented on the change in rate as follows:

Local bankers find the rate on the Treasury certificates of indebtedness announced yesterday, much more satisfactory than the issue of December 15 1928, when \$500,000,000 was offered at 4 1/4 %. In its December financing the Government had offered \$200,000,000 to mature in September and the remainder to mature in December. It is recalled that two days after issuing date the September maturities had fallen to a 4.52 % yield and the December maturities to a 4.44 % yield. The same certificates are at present being quoted respectively to yield 4.78 % and 4.69 %.

Secretary Mellon in announcing the new issue said that about \$560,000,000 of Treasury certificates of indebtedness and about \$60,000,000 in interest payments on the public debt would become due and payable on March 15 1929. The present offering, with tax and other receipts was expected to cover the Treasury's cash requirements until June. On March 11, Mr. Mellon gave notice that subscription books for the new offering would be closed at the close of business the next day, March 12 1929. When the subscriptions were tabulated it was found that the offering had not been so heavily oversubscribed by far as on most previous occasions, though it is ordinarily a distinct advantage to a bank to subscribe for these Government obligations both on its own account and for its customers inasmuch as the proceeds of subscriptions are ordinarily left as Government deposits with the member banks and that against such deposits no reserves are required; furthermore the certificates themselves are available for borrowing at the Federal Reserve Banks. On the present occasion, however, the value of this last mentioned advantage was at least problematical in view of the Federal Reserve Board's warning of the previous month against undue borrowing on the part of the member banks at the Federal Reserve Banks and the efforts the Board was making to restrict the use of Bank credit in Stock Exchange speculation. At all events, aggregate subscriptions for the \$475,000,000 new certificates reached no more than \$524,109,000 notwithstanding the natural reluctance of the banks to imperil a United States issue through letting the offering go by default. The allotments out of the \$524,109,000 of subscriptions aggregated \$475,999,500, of which \$32,796,500 represented allotments on subscriptions for which old Treasury certificates of indebtedness maturing March 15 1929, were tendered in payment. In accordance with the terms of the offering all of such exchange subscriptions were allotted in full; allotments on other subscriptions were scaled down slightly.

The previous December when the rate of interest was only 4 1/4 % on an offering of \$200,000,000 of 9 months certificates and of \$300,000,000 certificates running for a year, or \$500,000,000 altogether, the subscriptions amounted to \$631,182,000 and the allotments aggregated \$520,164,000. In October, 1928, when the rate of interest also was 4 1/4 % on an offering of certificates running for 11 months for \$300,000,000, total subscriptions reached \$838,700,000 and the allotments amounted to \$308,807,500. In September, 1928, when the Secretary invited subscriptions to a 9 months issue of certificates for \$525,000,000 at 4 1/2 % (this having been the highest rate contained up to that date in any offering of Treasury certificates since March, 1923) the subscriptions aggregated no less than \$1,020,034,400 that is, the offering was covered nearly twice; the allotments were \$549,615,900. In June, when two short term offerings of Treasury certificates were made, one of the series running for 6 months bearing interest at 4 % and the other with a maturity of nine months carrying 3 3/8 %, the amount offered of each series being \$200,000,000, or \$400,000,000 altogether, the subscriptions reached \$992,363,500 and the amount allotted was \$428,148,000. In March, 1928, with the rate of interest only 3 1/4 % on a 9 months issue of certificates for \$200,000,000 and 3 3/8 % on an issue running for a year for

\$360,000,000, making \$560,000,000 for the two combined the subscriptions aggregated \$1,000,773,000, with allotments of \$562,491,500. In December, 1927, when the Treasury offered \$250,000,000 of certificates running for a year at $3\frac{1}{4}$ % interest, the subscriptions were covered more than 5 times, reaching \$1,290,117,500, while the allotments were \$261,761,000. In November, 1927, when the Treasury offered \$400,000,000 of 7 months certificates at $3\frac{1}{8}$ % the subscriptions amounted to \$1,105,597,900. Thus the subscriptions have been diminishing, while the rate of interest—the cost to the Government of borrowing—has been steadily rising, and in a very pronounced fashion, too.

THE MONEY MARKET DURING MARCH 1929.

The money market during March reached an acute stage and the latter part of the month an actual crisis was escaped only through the intervention of the National City Bank in the way narrated in the early part of this article. Money rates in all branches of the market, already high at the beginning of the month, kept rising higher and still higher owing to the further absorption of bank credit in speculative channels as evidenced by the very notable new expansion in brokers loans and owing also to the efforts of the Federal Reserve Board to curtail speculative loans, which efforts became manifest in various ways and had the effect of making the Stock Exchange fraternity nervous and anxious without curtailing in the least its desire to obtain further loans. The situation thus created, as is always the case, found strongest expression in the call loan division and especially in the call loan rates on the Stock Exchange, but its influences also extended to all other divisions of the money market—in mercantile lines as well as in borrowing in the shape of collateral security loans.

That the stringency was becoming more and more pronounced became evident from the course of call loan rates very early in the month. As early as March 6 the charge for call loans on the Stock Exchange rose to 12%, and this rate was touched again the next day March 7. March, or at least the first half of the month, is usually a month of relatively easy conditions, and accordingly these high rates were decidedly significant, especially as the March program of financing by the U. S. Government was coming along and preparations had to be made for the large Federal income taxes due on March 15. The income tax receipts proved larger than expected, reaching about \$600,000,000. Treasury financing, as already noted, involved the offering of a new issue of Treasury certificates for \$475,000,000 and about \$560,000,000 of old issues of Treasury certificates became payable on March 15, along with \$60,000,000 of interest on the public debt. The last two items constituted merely the offsetting to that extent of a corresponding amount of the payments into the Treasury, but nevertheless involved some temporary dislocation of funds. On Friday March 1, and again on Monday March 4, all call loans on the Stock Exchange were put through at 8% which did not prove much of a deterrent on Stock Exchange borrowing, since traders on the Exchange had become pretty well accustomed to such rates, but on March 5 there was an advance to 10% and on March 6 and 7, as already stated, to 12%.

Thereafter there was for a few days a slight relaxation in the tension. On Friday March 8 the range was 9 @ 10% and on Monday March 11, 7 @ 9%; on March 12 and March 13, the renewal rate on the Stock Exchange, which had been at 10% on March 7 and March 8 and 9% on March 11, was down to 7% (and this was the lowest figure of the month for loan renewals, which always constitute the bulk of the loaning on the Exchange) and on both of these days some new loans were negotiated at 6%. The large Government deposits resulting from the income tax collections and from the offering of a new issue of Treasury certificates, served somewhat to relieve the tension about this time. That this was a matter of no small moment appears from the fact that Government deposits with the reporting member banks in 101 leading cities increased from the insignificant figure of \$6,000,000 on March 13 to \$305,000,000 on March 20, and still amounted to \$305,000,000 on March 27. However as borrowing on Stock Exchange account was still expanding in a very disturbing way and the time was immediately ahead when arrangements would have to be made for the large interest and dividend disbursements payable April 1, estimated roughly at about \$500,000,000 this relief from the tension through Treasury operations soon spent its force. Moreover the time of greatest spring demand from the mercantile community for accommodation was rapidly approaching. In these circumstances, and with renewed anxiety concerning the attitude of the Federal Reserve Board and with the Reserve Banks completely demoralizing the market for bankers' acceptances through their policy of reducing their holdings of acceptances, renewed stringency—in a more aggravated form than before as it happened—was inevitable. The renewal rate on the Stock Exchange continued unchanged from 7% from March 12 to March 18 inclusive, but on the last mentioned day 8% had to be paid for new loans; on March 19, the renewal rate was fixed at 8%, but 10% had to be paid for new loans, and on March 20, with the renewal rate up to 9%, new loans again were placed at 10%. On March 21 and March 22 all loans on the Stock Exchange were at 9%, including renewals.

It remained for the last week of the month to reveal how acute the monetary tension was becoming. The Federal Reserve statement, issued the previous Thursday evening,

March 21, had shown a further increase in the total of brokers loans in the huge sum of \$166,000,000 to a new high record in all time by a wide margin, thereby stirring the Federal Reserve Board to new activity, so that the members of the Board had a very protracted session even on Saturday March 23 earnestly cogitating what to do (Saturday sessions of this kind being quite unusual) and great pressure was evidently now being brought to prevail upon the member banks not to engage in any further borrowing at the Federal Reserve Banks in aid of speculation in the stock market. A further fraying of nerves was occasioned by the fact that all the meetings of the Reserve Board were surrounded with the greatest mystery, no information being given out as to what had transpired at the meetings or what was under discussion or intended. This was the situation on Monday morning March 25, and trouble loomed ahead in a very ominous way. Not merely stock speculators were deeply concerned but banking circles as well. Long experience showed that the Spring demand for trade and agriculture reaches its height in the week preceding the 1st of April. For this of course provision had to be made, as likewise for the prodigious April 1 payments for interest and dividends by corporations to which reference has already been made.

It was therefore not surprising that extreme tightness in the money market should have rapidly developed. The renewal rate on Monday March 25 was continued at 9%, the same as in the previous week, but for new loans the rate rose rapidly first to 10% and then to 12% and finally to 14% the highest figure reached since July 1 1920. The acceptance market became utterly demoralized and another advance of $\frac{1}{8}$ of 1% in the rates for all maturities was made, this having been the sixth advance since the beginning of the year. This very naturally proved most disturbing of all. Even greater stringency developed on Tuesday March 26, when, after the renewal rate had been fixed at 12%, the urgent demand, with the exceedingly scant supply, caused an advance to 15%, and then to 17% and finally to 20%, the highest figure since February 5 1920. These were the rates on the Stock Exchange. Outside of the Exchange even higher figures were reached, some reports indicating 22% as the high point and others 25% though presumably only on loans for small amounts. At this critical moment, in the last hour of the Stock Exchange session—that is between 2 o'clock and 3 o'clock—when it seemed as if money for new loans might become entirely unobtainable the National City Bank of New York averted a crisis by offering quite liberal supplies of funds, thereby averting what might have eventuated in a catastrophe of huge proportions. On Wednesday, March 27, there appeared the statement of President Mitchell of the National City Bank, to which reference has been made in the early portion of this article, and the Bank further announced that it was ready to place \$25,000,000 more in the call loan market, \$5,000,000 at 16%, and a like amount for each succeeding rise of 1% up to 20%. Other banks now followed in the footsteps of the National City and the crisis was quickly broken. Evidently none of the \$25,000,000 offered by the National City Bank had to be used, inasmuch as after the renewal rate had been fixed at 15% all other borrowing on the Stock Exchange was at the same figure. What a complete transformation had been effected appeared the next day (Thursday, March 28) when after the renewal charge on the Stock Exchange had again been fixed at 15%, there was a drop to 8%. Friday, March 29 was Good Friday, when the Stock Exchange was closed.

The time loan market on collateral security grew steadily stiffer and higher all through the month. Even in the middle of the month when, for the reasons outlined above, temporary relaxation in the call loan branch developed, the time loan market stiffened, thereby revealing unmistakably the underlying trend. At the close of February $7\frac{3}{4}$ % was the rate for loans of all dates from 30 days to 6 months. This continued the undeviating figure until Thursday, March 14, when the rate for 30 and 60 days was raised to 8%. On Friday, March 15, the rate for 90 days also was raised to 8%, leaving the $7\frac{3}{4}$ % rate applicable only for loans running 4, 5 and 6 months. These rates remained unaltered thereafter, day after day, until Friday, March 22, when the rate for the longer dates was also advanced to 8%. During all this time little or no business in time money was done. This 8% for all dates from 30 days to 6 months prevailed until March 27, on which day the rate for 30, 60 and 90 days was raised to $8\frac{1}{2}$ % and on Thursday, March 28, the rate for 30 and 60 days was raised still further to $8\frac{3}{4}$ %, the rate for 90 days being kept at $8\frac{1}{2}$ %, and the rate for 4, 5 and 6 months at 8%. Virtually no trades in time money occurred. Rates for commercial paper also moved higher. As against $5\frac{1}{2}$ @ $5\frac{3}{4}$ % for choice names on bills running 4 to 6 months at the end of February, the single figure of $5\frac{3}{4}$ % was quoted the latter part of March, though this quotation was hardly more than nominal there being little or no market for paper. For names less well-known 6% became the ruling quotation, with New England mill paper selling at $5\frac{3}{4}$ @6%.

As already indicated, it was the acceptance market that suffered most in the prevailing stringency and gave the strongest evidence of it. The latter part of the month, indeed, the acceptance market became utterly demoralized. The reasons were perfectly plain. The Federal Reserve Banks kept steadily diminishing their holdings and virtually

stopped the buying of new acceptances. They let their old holdings run off as they fell due, without replacing them with new bills. As a result, the market for acceptances virtually disappeared. What a serious matter the new policy of the Federal Reserve Banks was, appears from the fact that between December 26 1928, and March 27 1929, the 12 Reserve institutions allowed their bill holdings to drop from \$489,270,000 to \$208,427,000. On March 21, the American Acceptance Council advanced its rates for banks and bankers acceptances $\frac{1}{4}$ of 1% for all maturities and on Mar. 25 the rates were marked up another $\frac{1}{8}$ of 1% for all maturities in both the bid and the ask columns, raising them to the highest level ever reached for this class of accommodation. This was the sixth advance in acceptance rates made since the beginning of the year. It brought the rate for 90 day bills up to $5\frac{3}{4}$ % bid. Making allowance for the commission charged for accepting bills this brought the total cost of this form of borrowing close to 7%. On Wednesday, March 27, after the call money situation had been eased, the advance of $\frac{1}{8}$ of 1% made on March 25 was rescinded. On Thursday, March 28, the rates were again marked up $\frac{1}{8}$ but only for 120, 150 and 180 days and only in the asked column. At the end of the month the posted rates of the American Acceptance Council were $5\frac{1}{2}$ % bid and $5\frac{3}{8}$ % asked for bills running 30 days; $5\frac{5}{8}$ % bid and $5\frac{1}{2}$ % asked for bills running 60 and 90 days; $5\frac{3}{4}$ % bid and $5\frac{5}{8}$ % asked for 120 days; and $5\frac{7}{8}$ % bid and $5\frac{3}{4}$ % asked for 150 and 180 days. As previously stated, the Acceptance Council no longer gives the rates for call loans secured by Acceptances, the rates varying widely. It remains to be said that following the advance of $\frac{1}{4}$ of 1% made in the acceptance rates on March 21, the buying rate of the Federal Reserve Banks of New York was also raised $\frac{1}{4}$ of 1% and on March 25 was raised another $\frac{1}{8}$ %. This brought the rate up to $5\frac{3}{8}$ % for bills running from 1 to 45 days, to $5\frac{1}{2}$ % for bills running from 46 to 90 days, and to $5\frac{5}{8}$ % for bills running from 91 to 180 days. The survey of the American Acceptance Council showed that the outstanding volume of acceptances in the United States on Feb. 28 was \$1,228,027,796, against 1,279,271,163, but comparing with \$1,056,389,782 on Feb. 29 1928.

RATES FOR MONEY AT NEW YORK.

Week Ended—	Mar. 9.	Mar. 16.	Mar. 23.	Mar. 30.

No change in their rediscount rates was made during March by any of the Federal Reserve banks except that on March 2 the Federal Reserve Bank of Dallas marked up its rate from $4\frac{1}{2}$ to 5% on all classes of paper and for all maturities. This left only three of the 12 Reserve banks, namely the Federal Reserve Bank of Minneapolis, the Reserve Bank of Kansas City and the Reserve Bank of San Francisco, still quoting the $4\frac{1}{2}$ % rate, all the others having during 1928 moved up to 5%.

THE RETURNS OF THE FEDERAL RESERVE AND MEMBER BANKS —BROKERS' LOANS.

In the case of brokers loans the record was one of further large expansion, but with a sharp downward turn the last week of the month as a result of the collapse of prices on the Stock Exchange and the enormous liquidation in Stock Exchange borrowing entailed thereby. After the reduction in the total of these loans which occurred during two weeks of February following the warning of the Federal Reserve Board on Feb. 6, against loans on speculative account, the

total of these brokers' loans had already begun to move upward again, the last week of February, the amount rising from \$5,477,000,000 on Feb. 20 to \$5,507,000,000 on Feb. 27. On March 6, a huge further jump of \$140,000,000 occurred, raising the total to \$5,647,000,000. On March 13, an inconsequential reduction of \$20,000,000 occurred, to \$5,627,000,000, but the very next week there was renewed expansion in the prodigious sum of \$166,000,000, raising the amount to a new high figure in all time at \$5,793,000,000, or \$124,000,000 larger even than the previous high figure of \$5,669,000,000 recorded on Feb. 6, the day on which the Federal Reserve Board issued its famous warning. This renewed expansion stirred the Federal Reserve Board to new activity and paved the way for the collapse in the stock market which came the ensuing week. The great liquidation on the Stock Exchange then brought a reduction in the return for March 27 of \$144,000,000, which, though quite a substantial amount, was far less than expected, being not even equal to the previous week's increase of \$166,000,000. It left the total still \$5,649,000,000, which was \$142,000,000 more than the total of \$5,507,000,000 on Feb. 27, and compared with \$5,669,000,000 on Feb. 6, at the time of the Federal Reserve warning.

What was particularly disquieting was the great further increase in the outside loans, those "for account of others." These rose from \$2,724,000,000 Feb. 27 to \$2,823,000,000 March 6, to \$2,862,000,000 March 13 and to \$2,934,000,000 March 20, from which latter figure there was a reduction only to \$2,898,000,000 March 27. Loans made by the reporting member banks for account of out-of-town banks also kept rising and March 20 stood at \$1,768,000,000 against \$1,693,000,000 on Feb. 27, but a sharp reduction to \$1,680,000,000 appeared in the statement for March 27, supporting current rumors that Chicago had been withdrawing large amounts from this center in order to provide for its own local speculative needs. Loans made for the reporting member banks for their own account did not vary greatly, but naturally tended lower as the depositors engaged more and more in withdrawing deposits to be loaned for their individual accounts. The total March 27 was \$1,071,000,000 against \$1,090,000,000 Feb. 27.

After the close of the month the Stock Exchange's own figures appeared. As previously explained, these Stock Exchange figures are compiled only once a month and are always for the even month. They are also more comprehensive than the Federal Reserve weekly figures and accordingly deal with correspondingly larger totals. For the month of February the Stock Exchange had shown a reduction of \$56,618,325, but for March a new increase in amount of \$125,911,491 appears, thereby establishing another new high record and bringing the amount up to \$6,804,457,408, at which figure comparison is with \$4,640,174,172 on March 31 1928, and with only \$3,289,781,174 on March 31 1927.

COURSE OF STERLING EXCHANGE DURING MARCH.

Sterling exchange, like all the other foreign exchanges, remained under the influence of the tension in the money market at this center, the extremely high money rates prevailing here proving very attractive to foreign funds. Two other European banks were obliged to follow the action of the Bank of England the previous month in raising its rate of discount. On March 14, the Bank of Italy, which on Jan. 6, had reduced its rate to 6%, advanced again to 7%. On March 23, the Bank of the Netherlands, which had kept its rate unchanged at $4\frac{1}{2}$ % since Oct. 13 1927, advanced to 5 $\frac{1}{2}$ %. The Reserve Bank of Peru increased its rate on March 6 from 6% to 7%, and the Bank of the Republic of Colombia on March 18 moved up from 7% to 8%. The Bank of England, through its advance to 5 $\frac{1}{2}$ %, appears to have gained control, at least for the time being, of the sterling exchange market, receiving no doubt, aid and co-operation on the part of the Federal Reserve banks in this country. No gold engagements in London for New York occurred during March and though rates at this center for sterling exchange on London moved irregularly up and down in small fractions, and more or less erratically, it is a remarkable fact that rates for sight bills and cable transfers were almost precisely the same on Saturday, March 30, as on March 1. On March 30 the range for sight bills was 4.84 13-16@4.84 15-16 and on March 1 the range was 4.84 13-16@4.85. Cable transfers sold March 30 at 4.85 5-16, while on March 1 these transfers sold at a range of 4.85 $\frac{1}{4}$ @4.85 5-16. Throughout the whole month high money at New York exerted pressure on sterling. Seasonal factors would ordinarily serve to bring about firmness in sterling exchange at this time, if not an actual advance in rates, but under prevailing conditions, with money rates in New York so extremely high, all other factors dwindled into insignificance or are entirely submerged. The Bank of England has resorted to strenuous measures to make its discount rate effective, and thus far, as stated, has been successful in its endeavors and yet high money here has constituted a formidable obstacle. On the one hand there have been fears that the rate might have to be raised, while on the other hand there has been not a little agitation to prevail on the Bank to lower its rate to at least 5%. The London market all through the month gave voice to strong hopes that the Federal Reserve banks would not increase their rediscount rates, or take other steps to so

tighten the credit situation here as to invite British short term funds to the New York market, to the detriment of the sterling rate or the jeopardy of the Bank of England's gold holdings. The further rise in the rates for bankers acceptances

in this market was looked upon as a particularly discouraging circumstance, as it offered further inducement for the transfer of British short term funds to New York for investment in the same. It was considered surprising in foreign exchange circles when the rate for call money on the New York Stock Exchange advanced to 20% that the effect on sterling exchange should have been comparatively so slight. Bankers attributed this entirely to the fact that British and American banks through private agreements or understanding endeavor to offset the high money rates here by refusing or discouraging transfers of funds from London to New York in keeping with the co-operative attitude which has formed part of central bank policies for such a long time. Canadian exchange continued at a discount in this market all through the month, but very little further gold (only \$1,500,000) came here from the Dominion, the reason being that there is a decided disinclination to permit shipments of the metal to New York, though whether this is the result of a common agreement among the Canadian banks themselves or is the result of official pressure is not known. The Bank of England was able to replenish its gold holdings through purchases in the open market and through receipts of the metal from Holland, Germany and other sources. As to the gold movement at New York the Federal Reserve Bank reports two shipments from Germany aggregating \$16,486,000, two from Argentina totaling \$4,500,000, and one of \$1,500,000 from Canada as making up the bulk of United States imports during March. Aggregate imports during the month are put at \$23,000,000; exports at \$1,000,000, with a decrease of \$7,500,000 in earmarked gold, making a net gain to the country of \$29,500,000.

THE CONTINENTAL AND OTHER FOREIGN EXCHANGES.

There were no striking developments in the exchanges on the Continental centers of Europe, aside from the influence exerted by the high money rates at New York which constituted a weakening agency all around. Taking the month as a whole, the German mark showed, perhaps the greatest weakness, checks on Berlin March 30 being quoted at 23.70@23.71, against 23.72 on March 1. Bankers asserted that the German Reichsbank was losing control of the money market in Germany, as funds kept leaving the German market. Cablegrams on March 9, reported that the Reichsbank had sold 46,000,000 marks (approximately \$11,000,000) gold to New York, the first sale since 1927,

and a week later press dispatches stated that an additional \$7,000,000 gold had been engaged in Germany for American account. This gold later began to arrive and, as noted above, the Federal Reserve Bank of New York reports arrivals of gold here of \$16,486,000 during the month from Germany. The Bank of Germany in its weekly statements reported a loss of gold the first week of the month of 46,104,000 marks, of 35,955,000 marks the second week, but a slight increase (72,000 marks) in the third week with 35,756,000 marks, a further increase the fourth week of the month. In its note circulation the bank showed a decrease of 215,366,000 marks, of 171,856,000 marks, and of 132,807,000 marks in the first three weeks of the month respectively, with 788,989,000 marks increase the last week. There were no features of consequence in French exchange. Checks on Paris were quoted at 3.90 9-16@3.90% March 30, and at 3.90 1/4@3.90 1/2 on March 1, the course of French exchange being wholly under the control of the Bank of France, which showed an increase of 25,542,529 francs gold in the week ending March 2; a decrease of 39,259,188 francs in the week ending March 9, but an increase of 10,848,793 francs in the week ending March 16, an increase of 86,619,623 francs in the week ending March 23, and an increase of 65,098,000 francs in the week ending March 30. In the case of the Italian lira the feature was the advance on March 14, already noted in the Bank of Italy's discount rate from 6% to 7%. The fluctuations in the lira were very small, checks on Italy being quoted March 30 at 5.23@5.23 1/4, against 5.23 3/8@5.23 3/8 on March 1. The fluctuations in the Greek drachmae were also narrow, checks on Greece being quoted at 1.29 1/4@1.29 1/2 on March 30 against 1.29@1.29 1/2 on March 1.

The developments regarding the exchanges on the countries neutral during the war also were without any developments of great consequence, although all of them were under pressure as a result of the pull of high money rates here on funds abroad. Holland guilders were quite weak at one time, though showing improvement the latter part of the month; the Bank of the Netherlands, as already noted, advanced its rate of discount on Saturday March 23, from 4 1/2% to 5 1/2% and this had a strengthening influence on exchange rates on Amsterdam. Cablegrams from London on March 20 reported the arrival in Great Britain of over £2,000,000 in sovereigns from Holland and a further shipment of £1,000,000 the following week was reported. The shipments were made, it was understood, in order to main-

tan exchange rates. In this market checks on Amsterdam, after declining to 40.00% @ 40.04 March 12, recovered to 40.05 1/2 @ 40.09 March 25, evidently as a result of the marking up of its discount rate by the Bank of the Netherlands on March 23; the range March 30 was 40.03 @ 40.07. Swiss francs were slightly higher at 19.23 1/4 @ 19.23 1/2 March 30 for checks against 19.22 1/4 @ 19.22 1/2 March 1. The Scandinavian exchanges felt the influence of high money rates at New York. The Danish Crown for checks was 26.64 March 30 against 26.65 @ 26.65 1/2 March 1; the Swedish crown 26.69 1/2 @ 26.70 1/2 against 26.70 1/2 @ 26.71, and the Norwegian crown at 26.65 1/2 @ 26.66 against 26.66. The Spanish peseta, after declining the early part of the month because of political developments, made substantial recovery the latter part. On March 1, checks on Spain were 15.23 1/2 @ 15.31. By March 8 the rate was down to 14.64 @ 14.75. A recovery to 15.12 @ 15.34 March 21 followed, with the range March 30, 15.08 @ 15.15.

The South American exchanges were also devoid of features of any great moment. As noted above \$4,500,000 gold came from the Argentine during the month. The Brazilian milreis showed decided weakness, which was attributed largely to depressed business conditions local to Brazil. The milreis for checks was 11.79 @ 11.81 March 30, against 11.87 @ 11.93 March 1. The Argentine peso was also lower, but more moderately so; checks on Argentina being quoted March 30 at 42.02 @ 42.05 against 42.06 @ 42.08 on March 1.

In the Far Eastern exchanges the Japanese yen showed further weakness the early part of the month, but with some recovery the latter part. Checks on Yokohama on March 7 were down to 44, against 44 1/4 @ 44 1/2 on March 1, but on March 30 the range was 44 9-16 @ 44 1/4. The weakness in the yen was claimed to be the result of the low money rates in Tokyo which induce heavy transfers of Japanese funds to the British and American markets, despite the adverse exchange position. This outward flow of funds for investment is of course not favorable to yen exchange. The Chinese exchanges were slightly lower, due mainly to a further fractional decline in silver which was quoted at 25 15-16d. per oz. on March 30 against 26 1/2 d. on Feb. 28. The tael on Shanghai was 62 3/8 @ 62 1/2 on March 30 against 62 1/2 @ 62 11-16 on March 1. The dollar on Hong Kong, however, was somewhat higher at 49 @ 49 5-16 March 31, against 48 3/8 @ 49 1/4 March 1. Rupees on Bombay were 36.40 @ 36 1/2 March 30 the same as on March 1.

General Quotations

OF BONDS AND STOCKS

In the earlier part of this publication complete records of the dealings on the leading stock exchanges of the country, for the latest month and for the calendar year to date, are furnished. In this department of General Quotations we combine in one comprehensive whole, securities of all classes and descriptions, not only those dealt in on the exchanges but also leading unlisted and inactive securities. The following is an index to the different classes of securities quoted:

Steam Railroad Bonds.....	69	Public Utility Bonds.....	77	Insurance Stocks and Scrip.....	80, 101
Joint Stock Land Bank Bonds.....	74	Public Utility Stocks.....	82	Real Estate Trust and Land Stocks.....	89
Joint Stock Land Bank Stocks.....	76	Industrial & Miscellaneous Bonds.....	85	Title Guarantee and Safe Deposit Stocks.....	89
Federal Land Bank Bonds.....	93	Industrial & Miscellaneous Stocks.....	81	United States and Municipal Bonds.....	85
Real Estate Bonds.....	87	Exchange Seats.....	87	Canadian Municipal Bonds.....	94
Investment Trust Stocks and Bonds.....	78	Textile Manufacturing Stocks.....	88	Foreign Government Bonds.....	94
		Mining Stocks.....	88		

Quotations from all Stock Exchanges are as near as possible for the closing day of the month preceding the date of issue. As the New York Stock Exchange began with Jan. 2 1909 to quote all bond prices "and interest," we have adopted the same method and no longer employ a designating mark to indicate the fact except where there is a deviation from this rule. The reader will understand, therefore, that unless the letter "f" is prefixed to the price, he must pay accrued interest in addition to the price. This, however, does not apply to income bonds or bonds in default, in which cases the price includes the interest, should there be any.

The letter "f" prefixed to bond prices denotes that the quotation is a flat price—that is, that the accrued interest forms part of the price, and therefore the purchaser does not have to provide for it separately in making payment. As already stated in the case of income bonds and bonds in default, the price is always "flat," and no designating mark is employed to indicate the fact.

Quotations for guaranteed stocks are "and dividend"; that is, the accrued dividend must be paid in addition to the price. Stock prices marked thus (d) are per share. All others are per cent except bank stock prices, which are quoted per share unless otherwise stated.

It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.

The following abbreviations are often used, viz.: "M" for mortgage, "g" for gold, "gu" for guaranteed, "end" for endorsed, "cons" for consolidated conv" for convertible, "s f" for sinking fund, "l g" for land grant, "op" for optional.

The black-faced type in the letters showing the interest period indicates the month when the bonds mature.

NOTICE.—All bond prices are "and interest" except where marked "f" and income and defaulted bonds.

a Purchaser also pays accrued div. d Price per share, not per cent. k Last sale. n Nominal. r Canadian price. s Sale price. t New stock u Ex-cash and stock dividend. e Ex-stock dividend. w Ex-100% stock dividend. z Ex-dividend. y Ex-rights. † Without par value

United States and Municipal Bonds

In reporting below prices for State and municipal securities, we give bid and asked quotations wherever they can be obtained. The custom, however, is to quote municipal securities on the basis of the return they yield per annum. Therefore in most cases it will be found that instead of actual prices we have inserted in the column headed "To Net" certain figures to indicate the interest rate at which business in the bonds is being done. Thus 4.35% means that the particular security can be bought or sold at a price that will yield the purchaser or seller 4.35% per annum to the maturity of the issue. Where two figures appear, as for instance "4.25% to 4.35%", the rate of return varies according to the maturity—the shorter maturities yielding the lowest rate, and the longer maturities yielding the highest return. Recently however, owing to the tension in the money market, it has happened in not a few instances that the shorter maturities have been yielding the highest rate of return and the longer maturities the lowest rate of return, and where that happens to be the case, the range has been reversed to read, say 4.35% to 4.25%. In State and municipal bonds the custom has always been to quote them "and interest." That is, the accrued interest must in all cases be added on. There are a very few which form exceptions to the rule—that is, where the prices given are flat prices, the accrued interest having been taken into account in making them. These are indicated by a special mark, thus (f).

0 Basis. f Flat price. n Nominal. o Tax-exempt, under a law approved March 13 1909, and which went into effect Sept. 1 1909. bonds issued after that date by municipal corporations are tax-exempt and these, accordingly sell on a better basis.

STATE AND MUNICIPAL BONDS

Table with columns for Bonds, Bid, Ask, To Net, and multiple columns for various bond listings across different states including Kansas, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New York, and Paterson.

b. Basis. f Flat price. n Nominal. d Now paid by N. Y. City.

STATE AND MUNICIPAL BONDS

Main table containing bond listings for various states including Buffalo, Nlag Falls, Yonkers, and others. Columns include Bond description, Bid, Ask, and Net prices.

* Subject to taxation. By an amendment to the constitution of Ohio adopted Sept. 3, 1912, bonds issued after Jan. 1, 1913 by municipalities in that State are subject to taxation. Bonds issued prior to Jan. 1, 1913 are exempt from taxation. b Basis. d Nom part of N. Y. City. f Flat price. n Nominal.

Table with columns for Bonds, Issued, Asked, To Net, Bid, and Net. It lists various municipal bonds from states like Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, and South Dakota.

• Basis. Flat price. n Nominal.

Insurance Stocks

Table with columns: Par, Capital, Net Surplus Dec. 31 1928, Unearned Premium Reserve, Bld., Ast., and Share. It lists various insurance companies such as Aetna Insur, Fire & Marine, and others, with their respective financial figures and stock prices.

a Holding company. b Incorporated 1928. f All stock owned by National Surety Co. g All stock owned by North British & Mercantile Co. k Last sale. t New stock. v Ex-stock dividend. y Ex-rights. * Figures shown are Dec. 31 1927.

Banks & Trust Companies

STATE AND NATIONAL BANK STATEMENTS

Quotations in this department are given per share, not per cent, except for stocks of Canadian Institutions, and are as near as possible for the closing day of the month preceding date of issue, though often are nominal. An asterisk (*) denotes sales.

Figures of deposits, capital and profits for the national banks are from the Comptroller's last call; for all other institutions they are the latest obtainable, direct returns being procured by us where no periodic statements are required. For the Clearing House banks of New York, Philadelphia and Boston, deposits are taken from the latest-weekly statement.
