## General Quotations <br> OF BONDS AND STOCKS

In the earlier part of this publication complete records of the dealings on the leading stock exchanges of the country, for the latest month and for the calendar year to date, are furnished. In this department of General Quotations we combine in one comprehensive whole, securities of all classes and description, not only those dealt in on the exchanges, but also leading unlisted and inactive securities. The following is an index to the different classes of securities quoted:
 ndustrial and Miscell ---....-uotati

Quotations for all securities are as near as possible for the closing day of the month preceding the date of isue
The letter " f " prefixed to bond prices denotes that the quotation forms part of the price and therefore the purchaser does ne qave to is a nar price--hat is, that the accrued interest case of income bonds and bonds in default, the price is always "flat" and no the fact.

Quotations for guaranteed stocks are "and dividend"; that is, the accrued dividend must be paid in addition to the price. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.

The following abbreviations are often used, viz. " $M$ " for mortgage, " $g$ " for gold, "gtd" for guaranteed, "end" for endorsed, "cons" for consolidated, "conv" for convertible, "sf" for sinking fund, "lg"' for land grant "opt" for optional. The italic type in the letters showing the interest period indicates the month when the bonds mature. NOTICE-All bond prices are "and interest" except where marked "f" and income and defaulted boads

a Oalled for redemption, see page 65. b Basis, F Fat price. k Last sale. n Nominal. r Oanadian dollar value.

## United States and Municipal Bonds

The custom in reporting prices for State and municipal securities is to quote them on the basis of the return the bonds yield per annum. Therefore, in furnishing the prices below, it will be found that for the single maturity bond a bid and asked quotation is published-either actuald basis tor the varying maturities. For instance, if a certain bond bonds, however, we endeaver list matures from 1956 to 1974 and is quoted 0.90 to $2.95 \%$-this would indicate that the earliest maturity yields $0.90 \%$ and the later maturity is yielding $2.95 \%$.

Therefore, in the following list, it must be remembered the word "to" indicates that the figures shown are the bid yield basis for various maturities; all other figures are bid and asked prices.

Quotations for all securities are as near as possible for the closing day of the month preceding the date of issue

## Banks and Trust Companies

## STATE AND NATIONAL BANK STATEMENTS

Quotations in this department are given per share, not per cent, except for stocks of Canadian Institutions, and are as near as possible for the closing day of the month preceding date of issue, though often are nominal. An asterisk (*) denotes sales.

Figures of deposits, capital and profits for the National banks are from the Comptroller's last call; for all other instltutions they are the latest obtainable, direct returns being procured by us where no periodic statements are required.
