Averages are computed by dividing total prices by the following: Industrials, 4.79; Rails, 8.08; Utilities, 11.54; 65 Stocks, 25.49.

*The averages for the 30 industrial stocks and for the 65-stock composite average give effect to the Standard Oil Co. (New Jersey) three-for-one stock split. This changed the divisor for the 30 Industrials to 4.89 from 5.11 and that for the 65 stocks to 25.76 from 26.38.

†The averages for the 30 industrial stocks and for the 65-stock composite average give effect to the Johns-Manville two-for-one common stock split. This changed the divisor for the 30 Industrials to 4.79 from 4.89 and that for the 65 stocks to 25.49 from 25.76.

New York Stock Exchange - - Bonds

Monthly and Yearly Record

RANGE OF BOND PRICES FOR MARCH

Bond Sales—	1956	1955	Bond Sales—	1956	1955
March	\$99,986,900	\$81,373,000	Jan. 1 to March 31	\$276,309,900	\$262,464,900

The tables on pages 4 to 27 furnish a complete record of the transactions on the New York Stock Exchange during March and the range since Jan. 1. They need no extended introduction, as they are self-explanatory. The tables embrace every security dealt in on the Exchange. We give bonds first, using the classification adopted in the official list the italic letters in the column headed "Interest Period" indicate in each case the month when the bonds mature.

All quotations for interest-paying bonds are at a price to which accrued interest must be added. The exceptions to the rule are income bonds and bonds on which interest is in default. This method of quoting bonds became effective January 2, 1909. Quotations after decimal point represent one or more 32nds of a point.

General Quotations OF BONDS AND STOCKS

In the earlier part of this publication complete records of the dealings on the leading stock exchanges of the country, for the latest month and for the calendar year to date, are furnished. In this department of General Quotations we combine in one comprehensive whole, securities of all classes and description, not only those dealt in on the exchanges, but also leading unlisted and inactive securities. The following is an index to the different classes of securities quoted:

Table with 3 columns: Exchange Name, Page, Exchange Name, Page. Lists categories like Federal Land Bank Bonds, Municipal Bonds, RR Equipment Trusts, etc.

Quotations for all securities are as near as possible for the closing day of the month preceding the date of issue. The letter "f" prefixed to bond prices denotes that the quotation is a flat price—that is, that the accrued interest forms part of the price, and therefore the purchaser does not have to provide for it separately in making payment. In the case of income bonds and bonds in default, the price is always "flat," and no designating mark is employed to indicate the fact.

Quotations for guaranteed stocks are "and dividend"; that is, the accrued dividend must be paid in addition to the price. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.

The following abbreviations are often used, viz.: "M" for mortgage, "g" for gold, "gtd" for guaranteed, "end" for endorsed, "cons" for consolidated, "conv" for convertible, "sf" for sinking fund, "lg" for land grant, "opt" for optional. The italic type in the letters showing the interest period indicates the month when the bonds mature.

RAILROAD EQUIPMENT TRUST CERTIFICATES

The prices quoted here are the dollar valuations for practically all the outstanding issues. It being impossible to revise these figures each month, the quotations shown are the Dec. 31, 1955, valuations, published on the assumption that little change has taken place in the quoted value of the bonds since that date. For the certificates issued since Dec. 31, the bid prices at the time of issuance are shown. For the serial issues, we are indicating the bid for the lowest, and the bid for the highest maturity.
