## Monthly and Yearly Record

## RANGE OF BOND PRICES FOR MAY

Bond Sales-

$\stackrel{1956}{1955} \underset{\$ 91,834,000}{19765 \%}$
Bond Sales-
Jan. 1 to May 31_-_-_-_
$1956 \quad 1955$
The tables on pages 4 to 27 furnish a complete record of the transactions on the New York Stock Exchange during May and the range since Jan. 1. They need no extended introduction, as they are self-explanatory. The tables embrace every security dealt in on the Exchange. We give bonds first, using the classification adopted in the official list the italic letters in the column headed "Interest Period" indicate in each case the month when the bonds mature.

All quotations for interest-paying bonds are at a price to which accrued interest must be added. The exceptions to the rule are income bonds and bonds on which interest is in default. This method of quoting bonds became effective January 2, 1909. Quotations after decimal point represent one or more 32nds of a point.

For footnotes, see pace 14.

## General Quotations <br> OF BONDS AND STOCKS

In the earlier part of this publication complete records of the dealings on the leading stock exchanges of the country, for the latest month and for the calendar year to date, are furnished. Th this department of General quolations we comalso leading unlisted and inactive securities. The following is an index to the different classes of securities quoted:

Federal Land Bank Bonds.
industrial Bonds
Industrial and

Investing Oompanies Securities $\qquad$ Mumicipal
Canadlan
Public Utillty Bonds
Public Utility S
Railroad Bonds

Quotations for all securities are as near as pussible lor the ctosing day of the month preceding the date of issue.
The letter " $f$ " prefixed to bond prices denotes that the quotation is a flat price-that is, that the accrued interest forms part of the price, and therefore the purchaser does not have to provide for it separately in making payment. In the case of income bonds and bonds in default, the price is always "flat," and no designating mark is employed to indicate the fact.

Quotations for guaranteed stocks are "and dividend"; that is, the accrued dividend must be paid in addition to the price. It should be borne in mind in the use of these tables that the quotations for many inactive and un
The following abbreviations are often used, viz.: "M" for "gor "gor "for guaranteed, "end" for endorsed, "cons" for consolidated "conv" for convertible, "sf" for sinking fund, "Ig" for land grant "opt" for optional The italic type in the letters showing the interest period indicates the month when the bonds mature

NOTICE-All bond prices are "and interest" except where marked " $f$ " and income and defaulted bonds

## United States and Municipal Bonds

The custom in reporting prices for State and municipal securities is to quote them on the basis of the return the bonds yield per annum. Therefore, in furnishing the prices below, it will be found that for the single maturity bond serial bonds, however, we endeavor to obtain the bid yield basis for the varying maturities. For instance, if a certain bond in our list matures from 1956 to 1974 and is quoted 0.90 to $2.95 \%$ - this would indicate that the earliest maturity yields $0.90 \%$ and the later maturity is yielding $2.95 \%$.

Therefore, in the following list, it must be remembered the word "to" indicates that the figures shown are the bid yield basis for various maturities; all other figures are bid and asked prices.

Quotations for all securities are as near as possible for the closing day of the month preceding the date of issue

## STATE AND NATIONAL BANK STATEMENTS

Quotations in this department are given per share, not per cent, except for stocks of Canadian Institutions, and are as near as possible for the closing day of the month preceding date of issue, though often are nominal. An asterisk (*) denotes sales.

Figures of deposits, capital and profits for the National banks are from the Comptroller's last call; for all other institutions they are the latest obtainable, direct returns being procured by us where no periodic statements are required.

    $\qquad$
    
    
    Averages are computed by dividing total prices by the following: Industrials, 4.79; Rails, 7.72; Utilities, 11.54; 65 stocks, 25.14
    "The averages for the 20 railroad stocks and for the 65 stock composite average give effect to the Delaware \& Hudson Company's distribution of
    two additional shares of capital stock for each share held. This changes the divisor for the 20 railroads to 7.72 from 8.08 and that for the 65 stocks to 25.14 from 25.49 .
