# New York Stock Exchange - - Bonds 

Monthly and Yearly Record

## RANGE OF BOND PRICES FOR AUGUST

## Bond Sales-

August $\qquad$ 1957
1956
$\$ 74,992,900$ \$79,789,600
The tables on pages 4 to 27 furnish a complete record of the transactions on the New York Stock Exchange during August and the range since January 1. They need no extended introduction, as they are self-explanatory. The tables embrace every security dealt in on the Exchange. We give bonds first, using the classification adopted in the oture list. The italic letters in the column headed "Interest Period" indicate in each case the month when the bonds matare.

All quotations for interest-paying bonds are at a price to which accrued interest must be added. The exceptions to
rule are income bonds and bonds on which interest is in default. This method of quoting bonds became effective January 2, 1909. Quotations after decimal point represent one or more 32nds of a point.

For footnotes, see page 15.

September, 1957

No par value. tCorrected volume. 〔Companies repo
distributed. wi When issued. $x$ Ex-dividend. y Ex-rights.
The volume of trading and range of sale prices published here, is simply the trading and range for the new shares since this issue
was either split, or since new stock was issued in connection with a stock dividend. The range and volume for the old shares can be found in the back issues of the BANK AND QUOTATION RECORD, in the month when the issue was removed from trading.

Details of all 1957 stock dividends and split-ups, are indicated below in alphabetical arrangement.

| Basis of Split or Stoek Dividend | Date Admitited to Trading | Name of Lesue | Bade of Epllt or stook Dividend | Date Admitted to Tradime |

## General Quotations

## OF BONDS AND STOCKS

In the earlier part of this publication complete records of the dealings on the leading stock exchanges of the country, for the latest month and for the calendar year to date, are furnished. In this department of General Quotations we combine in one comprehensive whole, securities of all classes and description, not only those dealt in on the exchanges, but also leading unlisted and inactive securities. The following is an index to the different classes of securities quoted:

Quotations for all securities are as near as possible for the closing day of the month preceding the date of issue. The letter " f " prefixed to bond prices denotes that the quotation is a flat price-that is, that the accrued interest forms part of the price, and therefore the purchaser does not have to provide for it separately in making payment to indicate the fact.

Quotations for guaranteed stocks are "and dividend"; that is, the accrued dividend must be paid in addition to the price. It should be borne in mind in the use of these tables that the quotations for many inactive and un merely nominal, but in all cases the figures are obtained from sources which, are consld "gtd" for guaranteed, "end" for The following abbreviations are often used, viz: "M" for mortgage, "g" for gold, "gtd" for guaranteed, "ont The italic type in the letters showing the interest period indicates the month when the bonds mature.

NOTICE-All bond prices are "and interest" except where marked " f " and income and defauted bonds

## Industrial and Miscellaneous Securities

Under the heading "Industrial and Miscellaneous Securities" we include all Bond issues which do not appear under the previous three headings, namely "Railroads," "Investing Companies" and "Public Utilities." Real Estate Bonds, however, can be found on a succeeding page.

NOTICE-All bond prices are "and interest" except where marked "f" and income and defaulted bonds
NOTICE-All bond prices are "and interest" except where marked "f" and income and defaulted bonds
Quotations for all securties are as near as possible for the closing day of the month preceding the date of issue

## Insurance Stocks

Quotations for all securtiles are as near as possible for the closing day of the month preceding the date of lssue

# United States and Municipal Bonds 

The custom in reporting prices for State and municipal securities is to quote them on the basis of the return the bonds yield per annum. Therefore, in furnishing the prices below, it will be found that for the single maturity bond a bid and asked quotation is pubished-either actual figures or on a percentage osasities. For instance, if a certain serial bonds, however, we endeavor tist matures from 1958 to 1974 and is quoted 0.90 to $2.95 \%$-this would indicate that the earliest maturity yields $0.90 \%$ and the later maturity is yielding $2.95 \%$

Therefore, in the following list, it must be remembered the word "to" indicates that the figures shown are the bid yield basis for various maturities; all other figures are bid and asked prices.

## STATE AND NATIONAL BANK STATEMENTS

Quotations in this department are given per share, not per cent, except for stocks of Canadian Institutions, and are as near as possible for the closing day of the month preceding date of issue, though often are nominal. An asterisk (*) denotes sales.

Figures of deposits, capital and profits for the National banks are from the Comptroller's last call; for all other institutions they are the latest obtainable, direct returns being procured by us where no periodic statements are required.
