## General Quotations <br> OF BONDS AND STOCKS

In the earlier part of this publication complete records of the dealings on the leading stock exchanges of the country， for the latest month and for the calendar year to date，are furnished．In this department of General Quotations we com－ bine in one comprehensive whole，securities of all classes and description，not only those dealt in on the exchanges，

Quotations for all securities are as near as possible for the closing day of the month preceding the date of issue．
The letter＂ f ＂prefixed to bond prices denotes that the quotation is a flat price－that is，that the accrued interest forms part of the price，and therefore the purchaser does not have to provide for it separately in making payment．In the case of income bonds and bonds in default，the price is always＂flat，＂and no designating mark is employed to indicate the fact．

Quotations for guaranteed stocks are＂and dividend＂；that is，the accrued dividend must be paid in addition to the price
It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal，but in all cases the figures are obtained from sources which are considered reliable

The following abbreviations are often used，viz．：＂M＂for mortgage，＂g＂for gold，＂gtd＂for guaranteed，＂end＂for endorsed，＂cons＂for consolidated，＂conv＂for convertible，＂sf＂for sinking fund，＂lg＂for land grant，＂opt＂for optional．

The italic type in the letters showing the interest period indicates the month when the bonds mature．
VOTICE－All bond prices are＂and interest＂except where marked＂$f$＂and income and defaulted bonds

| The prices quoted here are the dollar valustions for practically all the outstanding issues. It being impossible to revise these figures each month, the quotations shown are the June 30, 1959, valuations, published on the assumption value of the bonds since that date. For the certificates issued since Dec. 31, the bid prices at the time of issuance are shown. For theserial issues, we are indicating the bid for the sowest, and the bid for the highest maturity, |  |  |  | Chicaso Burlington \& Cuincy RR |  |

## UNITED STATES AND MUNIOIPAL BONDS

The custom in reporting prices for State and municipal securities is to quote them on the basis of the return the bonds yield per annum. Therefore, in furnishing the prices below, it will be found that for the single maturity bond a bid and asked quotation is published-either actual figures or on a percentage basis. In furnishing prices for the serial bonds, however, we endeavor to obtain the bid yield basis for the varying maturities. For instance, if a certain bond in our list _.atures from 1960 to 1974 and is quoted 0.90 to $2.95 \%$-this would indicate that the earliest maturity yields $0.50 \%$ and the later maturity is yielding $2.95 \%$

Therefore, in the following list, it must be remembered the word "to" indicates that the figures shown are the bid yield basis for various maturities; all other figures are bid and asked prices.

Quotations for all securities are as near as possible for the closing day of the month preceding the date of issue
