# New York Stock Exchange-Bonds 

# Monthly and Yearly Record <br> RANGE OF BOND PRICES FOR DECEMBER <br> 1961 <br> 1960 

Bond Sales-
Bond Sales- $\qquad$ 1961
1960
December
\$135,733,000 \$130,175,500
Jan. 1 to Dec. 31 $\$ 1,636,037,100$ \$1,346,419,750

The tables on pages 4 to 29 furnish a complete record of the transactions on the New York Stock Exchange during December and the range for year since Jan. 1. They need no extended introduction, as they are selion adopted in the official embrace every security dealt in on the Exchange. We give bonds first, using the classification adopted ine bonds mature.

All quotations for interest-paying bonds are at a price to which accrued interest must be added. The exceptions to he rule are income bonds and bonds on which interest is in default. This method of quoting bonds became effective January 2, 1909. Quotations after decimal point represent one or more 32nds of a point.

## General Quotations <br> <br> OF BONDS AND STOCKS

 <br> <br> OF BONDS AND STOCKS}In the earlier part of this publication complete records of the dealings on the leading stock exchanges of the country, for the latest month and for the calendar year to date, are furnished. In this department of General Quotations we combine in one comprehensive whole, securities of all classes and description, not only those dealt in on the exchanges, but also leading unlisted and inactive securities. The following is an index to the different classes of securities quoted:

The letter " $f$ " prefixed to bond prices denotes that the quotation is a flat price-that is, that the accrued interest forms part of the price, and therefore the purchaser does not have to provide for it separately in making payment. In the case of income bonds and bonds in default, the price is always "flat," and no designating mark is employed to indicate the fact.

Quotations for guaranteed stocks are "and dividend"; that is, the accrued dividend must be paid in addition to the price.
It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the tigures are obtained from sources which are considered reliable.

The following abbreviations are often used, viz.: "M" for mortgage, "g" for gold, "gtd" for guaranteed, "end" for endorsed, "cons" for consolidated, "conv" for convertible, "sf" for sinking fund, "lg" for land grant, "opt" for optional.

The italic type in the letters showing the interest period indicates the month when the bonds mature. QUOTATIONS FOR ALL SECURITIES ARE AS OF DECEMBER 29, 1961
NOTIOE-All bond prices are "and interest" except where marked " $\mathbf{F}$ " and income and defaulted bonds

a Cuned for redemption, see page 96. b Bask $n$ Ex-fnterest. I Mat price. $k$ Last sale. $n$ Nominal. PCanadian dollar value.

## RAILROAD EQUIPMENT TRUST <br> CERTIFICATES

The prices quoted here are the dollar valuaIt being impossible to revise these figures each month, the quotations shown are the June 30 1961, valuations, published on the assumption that little change has taken place in the quoted value of the bonds since that date. For the
certificates issued since Dec. 30 the bid prices certincates issued since Dec. 30 , the bid prices
at the time of issuance are shown. For the serial issues, we are indicating the bid for the lowest, and the bid for the highest maturity.

[^30]QUOTATIONS FOR ALL SECURITIES ARE AS OF DECEMBER 29, 1961

## United States and Municipal Bonds

The custom in reporting prices for State and municipal securities is to quote them on the bassi of the return the bonds yield per annum. Therefore, in furnishing the prices below, it will be found that for the single maturity bond a bid and asked quotation is published-either actual figures or on a percentage basis. In furnishing prices for the serial bonds, however, we endeavor to obtain the bid yield basis for the varying maturities. For instance, if a certain bond in our list matures from 1963 to 1980 and is quoted 0.90 to $2.95 \%$-this would indicate that the earliest maturity yields $0.90 \%$ and the later maturity is yielding $2.95 \%$.

Therefore, in the following list, it must be remembered the word "to" indicates that the figures shown are the bid yield basis for various maturities; all other figures are bid and asked prices.
