length to be convinced that every scheme, however plausible, must fail, except it rest on the stable foundation of contraction. The chief cause, the fundamental reason of the premium on specie, is not to be sought in the traffic in the precious metals, nor in our foreign exchanges, nor in the movements of speculators. It is in the redundancy of the currency. Our paper money has lost part of its purchasing power. It is depreciated by being issued in excess. The paper dollar has become an unstable, sensitive, changeable measure of value. It will purchase less at one time than another, and always less than the dollar in coin. For more paper money is out than the country would require, if the notes were convertible into coin on demand. And consequently these notes are liable to fluctuate in value from a thousand causes, not one of which would be able to produce any appreciable change were the currency at its normal volume, and were there no redundancy of issue permitted.

NO. 14.

ICLI

Many of the errors which have prevailed on currency questions among us would have been avoided if sufficient attention had been given to the fact that the value of money is regulated like that of other commodities, by the mutual relation between the supply and the demand.

But experience shows that the demand for currency varies greatly at different periods of the year. The moving of the crops, the outbreak of a financial panic, the negotiation of a government loan tend, with many other commercial and political causes, to extend the field for the use of currency. No rigidly fixed amount of money, whether it be coin, or bank notes, or government paper, will suffice for the wants of a great commercial people, and, perhaps, the interests of the nation are as much compromised where the currency is too small as where it is too large. "If," says an able modern writer, "the amount of money in a country remains the same at a time when the monetary requirements of the community do not remain the same, but experience an increase, then the value of the currency will be altered. Hence, all business will be deranged, and all contracts vitiated. In like manner, if the amount of the currency be diminished while the monetary requirements of the community continue as before, an analogous result will ensue. The value of money will be raised and prices lowered. In either case the same quantity of goods or land, houses or labor, will no longer obtain for its owner the same amount of money." From the fact that the demand for currency is liable to fluctuations, it follows that in our case the efforts we make to appreciate the value of our paper money by diminishing its volume, may be made at certain times with more advantage and with less risk. In the opinion of the Secretary of the

CONGRESS AND THE CURRENCY.

It is easy to forsee that at the coming session of Congress financial measures will attract an unusual amount of attention; and among these the first place will perhaps be claimed by the regulation of the National currency. The swelling current of our paper money has reached a height beyond which it cannot go without bringing upon the nation evils which it is impossible to contemplate at a distance without the greatest anxiety. Happily, however, as yet the remedy is in our own hands. We have only to adopt judiciously and with perseverance a policy of contracting the currency, and in proportion as we succeed in this the disasters which threaten will be averted.

During the past two or three years we have been vainly trying to regulate the currency and being down the price of gold by futile legislation and by other empirical methods. But the only good result has been that the public seem at 418

THE CHRONICLE.

[September 30, 1865.

Treasury, and of many prominent financial men, the present time is one of those favorable conjunctures. We are inform. ed accordingly that it is probable Mr. McCulloch is about to call in and destroy 50 millions of currency; and rumor says that the official announcement of his plan will be made public in a few days. The general success of the policy adopted since Mr. McCulloch was placed half a year ago at the head of the Treasury justify the favorable opinion of any financial reforms he may have to suggest for the consideration of Congress; and the efforts he may make for the contraction of our paper money by a special loan, will at least serve to shew the feasibility of similar plans, to enlarge the horizon of our experience, and to suggest some cautions for our practical guidance in the future.

THE OWNERSHIP OF LOST OR STOLEN BONDS.

THE heavy bank robbery on Tuesday last at Concord, Mas sachusetts, is involved in mystery, and there are some peculiar circumstances in the case on which, for obvious reasons, it is premature to offer remark. But the magnitude and frequency of such frauds, and the vast number of government and State bonds which have been stolen or lost during the last few months, have awakened a profound and mischievous dis trust in the public mind. By many persons it is supposed that if an innocent person in good faith invests in government or other securities which prove to have been stolen, he may lose his money, and be compelled to give up the securities, though he bought them in the open market, without any suspicion of fraud, and in the ordinary course of business.

This is not the law; however, and it is proper that such persons should know that they are mistaken. Were their view correct of their rights as holders in good faith of government securities, nobody could be induced to invest in them; except at a heavy discount, the amount of which would be a sort of insurance against the attendant risks. The damage hence resulting to our public credit at home and abroad would be so serious as to bring a swift and effective remedy.

This misapprehension in reference to the ownership of lost or stolen bonds has probably arisen from the well known general rule of the common law that, "except by sale in the open market, no one can acquire a title to a chattel personal from any one who has himself no title to it; and that, in the case of stolen goods, the thief can give no title, nor can any one who derives his title from the thief hold them as against the original owner, who, as long as he can identify his goods, can reclaim them from any possessor." Consequently, if a man

true owner cannot recover it after it has been paid away fairly and honestly upon a valuable and bona fide consideration. So a bank note is constantly and universally, both at home and abroad, treated as money, and paid and received as cash; and it is necessary for the purposes of commerce that their currency should be established and secured." We have cited this decision thus fully because it has not only been uniformly followed ever since in the English courts and in our own; but the principle of it has been held to apply to bonds, and other negotiable instruments which pass current from hand to hand as representatives of money by delivery only. And it is now laid down as a rule, that where, by the custom of trade, any bond, note, or other instrument, is transferable by delivery, and is also capable of being sued upon by the holder, it is entitled to the privileges of a negotiable instrument, and the property in it passes to any person who buys it in good faith.

It is impossible to overestimate the importance of clear definite certainty on such points of commercial law. Thousands of millions of these paper evidences of debt are found in the channels of commerce everywhere, and they represent a large part of our floating and fixed capital. The interest of all classes of the community in these questions is universal and absorbing, and while an easy triumph should be denied to fraud, a perfect security should be given to property.

While then the ownership of stolen bonds can only be invalidated by satisfactory proof that the holder has not purchased for full value in the ordinary course of business; or else that he is guilty of fraud or dishonesty, wilful ignorance or guilty knowledge; it is evident that banks, savings institutions and other corporations which hold large amounts of government and other securities in trust ought to take more pains to protect the public from loss. And among the obvious methods of doing this, so far at least as five-twenties, tenforties, and other government bonds are concerned, one of the most important and effective is to convert their coupon bonds into registered bonds. This conversion can be effected without expense, by simply sending them to Washington with a written request to have them replaced by registered securities. A glance at he list of stolen securities published weekly in the CHRONICLE shows the necessity of this change, and we are glad to find on inquiry that it is now going on with more rapidity than ever before.

LABOR MOVEMENTS.

THE special Convention of the Trade Assembly, held this week at Albany, is a significant symptom of important social tendencies among the working class of the United States. The whole operative population of the country is at present earnestly intent upon the twofold purpose of securing a limitation of the hours of labor and diverting production into the hands of co-operative associations; the former being an immediate object, the latter an ultimate hope. The trades unions have, by common consent, determined upon enforcing a contraction of the term of labor to eight hours per day, and aim at securing legislation fixing that as the legal definition of a day's work. In New England, New Jersey and Pennsylvania, the agitation has assumed considerable force, attempts having been made, in some instances, to enforce the new limit by means of strikes. New York has moved in the matter with less zeal; and the extra convention at Albany was intended to bring this State into the van of the movement. The discussions of the convention exhibit a degree of intelligence, of familiarity with social questions, and of dispassionate debate, which challenge respect for the class represented, and show that our operatives are well capable said Lord Mansfield, "as in the case of money stolen, the of taking care of themselves. The members evidently were

buy a horse which has been stolen, the looser can seize it wherever found, and the purchaser has no remedy, except against the person of whom he bought it.

The growth of modern commerce and trade has caused such a multiplication of paper evidences of debt that we find, for more than a century, an exception established in the courts in favor of negotiable instruments, of which possession constitutes ownership, when they have been put in that state in which, according to the usage and custom of trade, they are transferable like coin from one man to another by delivery only. The first reported case in which this point was distinctly raised is, we believe, that of Miller vs. Race, reported 1 Burr 452. This was an action on a Bank of England note, which was sent by mail, fell into the hands of a thief, and was the next day recieved by the plaintiff, " for a full and valuable consideration, in the usual course and way of his business, with out any notice or knowledge of its having been stolen." The court held that the plaintiff had a good title, even as against the person from whom the note had been stolen. " For,"

conscious of their importance as one of the two parties to the great copartnership of production, and while taking high ground in the assertion of what they conceived to be their own rights, were yet disposed to be considerate of the rights and interests of employers. Resolutions were adopted by the convention pledging the trades unions to vigorously advocate the adoption of eight hours as the common limit of a day's labor, and to ask for the legalization of that definition when they consider the question to be fully understood.

Now, the true question in this case is, whether the community at large need enlightenment on the subject, or the operatives themselves. We have little doubt that, when the question comes to be fairly discussed upon its merits, the public verdict will be against the party raising it. It must be fully admitted that the tendency of education, and of the economy of muscle effected by machinery, is to steadily diminish the period of human labor. It must be further conceded that the extensive substitution of machines for manual labor creates a demand for ampler leisure; inasmuch as the manipulation of machinery, frequently complex and delicate, requires education, which cannot well be obtained without cutting off a portion of the hours of toil. But these considerations are utterly inadequate to sustain the conclusion, that the term of labor should be instantly reduced fully one tourth, and that the same limit should be applied to all employments. The convention affirms in one of its resolutions that "it is undoubtedly and undeniably the right of working men to declare and fix how many hours they shall labor." If it be possible to have rights involving a natural impossibility, this claim must be conceded. The working men, however, mistake in supposing they have the power to "fix" how many hours they must labor. That is a matter to be determined by the necessities of the community, those of the working class included, and resolutions of the employed class can do nothing more than very temporarily disturb that natural and inevitable regulation which arises from the conjoint operation of the demand for labor, the wants of the laborer and the capacity of the workman. Whatever may be the term of labor in a community, it may be taken for granted that it is the inevitable result of the general condition of society and commerce; and any attempt to enforce a new term would find itself in conflict with the normal condition of affairs and consequently impotent. To effect a reduction in the hours of labor, we must persuade the community to limit their consumption of commodities, or we must find other means of doing the world's work than human hands, or we must qualify the workman to do more work within a given time. The two latter methods of amelioration are practicable, and are constantly in steady operation; but these arbitrary attempts of the operatives cannot anticipate their results one day. The only means for promoting a shortening of the hours of labor are the intellectual and moral elevation of the working class, by an improved employment of the leisure they already possess; and the true function of trades associations should be the fostering of such improvement. In a word, the true order of improvement is, first the elevation of the workman, then the limitation of his term of toil, as a natural consequence; not the shortening of the hours of labor and then the mental and moral elevation of the laborer. This principle, we apprehend to be based upon the axiom that all ameliorations of the condition of society must follow, not precede, the elevation of the character of the individual man.

for the same period of work in all employments is obviously inconsistent with the varying degrees of physical effort or exhaustion in the several branches of labor. It surely will not be contended that the clerk, the salesman or the stagedriver are not able, in perfect consistency with good health, to devote a larger period to business than the smith, the engineer or the miner. The natural process of adjustment will regulate the term of labor with a more equitable regard to the degree of labor than is proposed in the uniform standard of eight hours.

Very little reflection would show the working men that a premature adoption of the eight hours system would involve social and commercial derangements, from which their own class would be the greatest sufferers. A reduction of 20 per ceut in the hours of work, would amount to a limitation in the labor of the country almost to the same extent; we say almost; for it must be allowed that, in trades where the hours of work are so excessive as to trench upon the workman's health, there would be a partial compensation, equal results being produced within a shortened period. A reduction of the aggregate amount of labor would render a large proportion of the capital of the country idle, thereby compelling it to seek employment in other countries. The demand for products being about the saule as before, and the supply being largely diminished, we should naturally have a general advance in prices,-a state of things which would fall with especial severity upon the working masses, even though the workman were able to obtain as much for eight hours' labor as he had formerly received for ten or twelve hours. It is, however, very questionable whether employers could afford to pay the same wages for the shortened term ; for the cheaper wages of other countries would enable foreign producers to under-sell our own, which would compel the latter to seek relief in the reduction of wages. By this process the advance of prices would be rendered only temporary, and the ultimate result would be a return to former prices, and a reduction in wages proportioned to the diminution of the term of labor. A regard for their own interests therefore, should induce the working men to pause before further committing themselves to this ill-advised movement.

THE NEW INDIAN COMMONWEALTH.

A grand Indian Council was held, in September, at Fort Smith, Arkansas. On the part of the Federal Government were Judge Cooley, the commissioner of Indian Affairs, Colonel Sells, the chief of the Southern Superintendency, Colonel Ely S. Parker, of the Seneca Nation, and aid to General Grant, Mr. Mix, and Mr. Wistar, a Quaker gentleman who has taken a deep interest in the welfare of the native population of this country. The Indians represented in the convention were the Cherokees, Creeks, Choctaws, Chickasaws, Seminoles, Senecas, Omahas, and Shawnees. Part of these had takeu up arms in the cause of the Rebellion, virtually abrogating the treaties existing between them and the United States; and it was therefore necessary to institute amicable relations, once more, to escape a tedious and sanguinary Indian war. The terms of the treaty agreed upon embraced an acknowledgement on the part of the Indians, that they had entered into an alliance with the Confederate States so called, and thereby forfeited their rights to home and possessions in the territories of this country. But the Federal Government promises, nevertheless, to exercise clemency, and re-establish just relations with the several tribes and nations. The treaty concludes as follows:

When the abbreviation of the hours of work comes about through the process indicated, the result will be found to differ materially from the state of things demanded by the trades unions. We shall not then find an uniform term in

"The undersigned do hereby acknowledge themselves to be under the protection of the United States of America, and covenant and agree that hereafter they will in all things recognize the government of all the divisions of labor. The request of the working men the United States as exercising executive jurisdiction over them, and will not enter into any allegiance or conventional agreement with any state, nation, power, or sovereign whatsoever; that any treaty or alliance for session of lands, or any sct heretofore done by them, or any of their people, by which they renounced their allegiance to the United States, is hereby revoked cancelled and repudiated. In consideration of the foregoing stipulations made by the members of the respective nations and tribes of Indians present, the United States, through its commissioners, promises that it will re-establish peace and friendship with all the nations and tribes of Indians, within the limits of the so-called Indian country; that it will afford ample protection for the security of persons and property of the respective nations or tribes, and declares its willingness to enter into treaties, to arrange and settle all questions relating to, and growing out of former treaties with such nations, as affected by any treaties made by said nations with the so called Confederate States at this council now convened for that purpose, or at such time in the future as may now be appointed."

After the treaty had been signed further delegations of rebel Indians, Comanches, Seminoles, Creeks, Washitas, Potawatamies, Cherokees, and others arrived at the fort, and joined in the negotiations, urging that their lands, annuities, and other possessions ought not to be forfeited.

On the 21st a treaty was signed by the commissioners and the Choctaws and Chickasaws, providing for peace and friendship between the United States and said tribes; that they will exert all their influence in compelling the Indians of the Plains to maintain peaceful relations with each other, with the Indians of the Territory, and with the United States; that slavery shall be abolished forever; that the freedmen shall be suitably provided for, that lands shall be issued to the Indians of Kansas and elsewhere; that the right of way shall be granted to railroads, and that the consolidation of Indian tribes, with a Territorial form of government, shall be recommended by them to their respective councils.

The same treaty has since been made between Colonel Sells and the Osages at Humboldt in Kansas. Colonel Parker and Secretary Irwin have set out for Bluff Creek, in the State of Colorado, at which place, on the 4th of October, they will, together with General Sanborn, Superintendent Murphy, Kit Carson aud Wm. W. Bent hold a grand council, and treat with Arrapohoes, Sheyennes, and other nations.

The credit of these negociations must be principally ascribed to the wisdom and humanity of the present Secretary of the Interior, Hon. James Harlan. The inhabitants of the states beyond the Mississippi, excited by the barbarous outrages of the fiendish Dakotahs, were very anxious for a war of extermination against the Indians, asserting that outrages and atrocities will never cease until this is adopted and ended. But this itself would be an atrocity of the most in excusable character. Besides the country can hardly afford to carry on an Indian war. It is the most expensive of all wars. We now have about 30,000 troops west of the Missouri River to repress the hostilities of Indian tribes. We have 10,000 cavalry near Fort Harah. To haul corn from three to six hundred miles to support our cavalry, makes it cost about five dollars per bushel. Remembering this, does it not seem worth while to think of the expense of a prolonged Indian war. As a question of dollars and cents, it would cost less to feed, as panpers, the 300,000 Indians of this country for ten years, than to fight them for twelve months, to say nothing of the humanity side of the question. Had not the Indian agents in former times connived with dishonest traders, sharing the profits of swindling these Indians, it is more than probable that many of their atrocities would never have been committed. If Mr. Harlan succeeds in correcting this abuse, there-will be no more wars, and a beneficial condition of affairs will ensue. The stipulations propose a grand consolidation of all Indian tribes into one nation, the territory of which shall be the present Indian Territory, and such other as the government may decide upon. The tribes now living in Kansas are to be removed south, and the southwestern tribes are expected to compel the Indians of the Plains to observe the treaties.

FRASER

There are in Kansas, the Indian Reservations owned by the Kickapoos, Delawares, Ottawas, Shawnees, Potawatomies, Wyandots, Miamis, Weas, and Pawnees, who have removed hither from the other side of the Mississippi, and the Kaws and Osages, who are aborigines. Their lands are valuable, and the country cannot afford to trifle in the matter. This question of Western development—the bringing to the surface the latent and undeveloped wealth o.' the productive Far West—is becoming a question of finance. The country—with a debt on its hands of \$3,000,000,000, with an annual interest of \$180,000,000—cannot afford to let the minerals of the Rocky Mountain region lie concealed in the gulches and gorges of that country, and the fertile valleys and productive prairies of Kansas and the West go untilled.

The Ottawas, formerly residing in Northwestern Ohio, will, in about two years, be admitted to the full rights of citizens of the United States. They, together with the Delawares and Shawnees, are civilized, cultivate the soil, and have a college of their own. Most of them are Baptists. The Ottawas own land individually, and will remain upon it; the Shawnees will remove, and perhaps the Senecas and Delawares, whose fertile domains tempt fearfully the cupidity of the settlers of Kansas.

From these negotiations we anticipate the most favorable results. The nations with whom our Government has made treaties will check effectually the incursions of the warlike tribes of the Sioux, averting the horrors of Indian war from our borders. They have came into allegiance to the Federal Government. thus doing away with the anomaly of independant jurisdictions on the same soil, and enabling the United States to exercise over them an efficient guardianship. If the experiment about to be carried out with the Ottawas, of conferring American citizenship shall operate successfully, it will probably be extended to the other nations, especially to those like the Delawares, Senecas and Choctaws, that have adopted a civilised life. By being included in a single territory, the inconveniences incident upon a plurality of nationalities will be obviated; they will be governed better, and acquire civilisation more rapidly. There will be no antagonism of race to hinder.

The example of the Iroquois of New York illustrates forcibly what even Indians, still barbarous, can accomplish by political union. Long prior to the colonisation of this con tinent by Europeans, the progenitors of the Six Nations dwelt in Lower Canada a single people, in vassalage to the Adirondacks. Following the example of the Turks when subject to the Avars, they attempted to win their independence, but were defeated, and like the ancient Israelites were thrust out to seek new homes. "Emerging from the mountain" near Oswego Falls, they founded their parent settlement near Onondaga Lake. Increasing in numbers, two nations separated from the parent stock, the Mohawks and Senecas. Afterwards the Oneidas and Cayugas formed distinct states. The Tuscororas, Eries, Cats and Hurons appear also to have been of kindred stock. Warfare now began to check their growth, and a wise man among the Mohawks originated the idea of a confederacy of the nations. Five of them accordingly met at Onondaga, and framed the Constitution of the Iroquois commonwealth. Each nation remained as before, a sovereign republic divided into clans or tribes; and the sachems exercised supreme legislative and judicial authority. They were counsellors rather than magistrates, however, and their judgment, whenever it was not approved by the nation, was never enforced. The chiefs were an order of nobility, with powers of a military character.

[September 30, 1865.

420

The sachems constituted the Senate of the Romans of the New World. There were fifty of them in all—Mohawks 9; Oneidas 9; Onondaga 14; Cayugas 10; Senecas 8. All the

THE CHRONICLE.

nations were divided into eight tribes or clans, and the office of sachem always remained inalienable in the tribe where it first belonged. But it never descended from father to son, because the son was by immemorial usage of a tribe different from that of his father.

For more than a century the Iroquois "went forth conquering and to conquer." The Cat and Erie nations were destroyed, and the Hurons of Upper Canada. The Miamis, Susquehannas, Illinois, and other tribes of the Valley of the Ohio and Upper Mississippi, were subjugated; the Delawares were compelled to resign national powers; the Cherokees and Catawbas were attacked; and the confederated victors contemplated the subjugation of Powhatan and his subject nations. Their dominion extended from the St. Lawrence to the Tennessee. They compelled the French to abandon all idea of extending west of Montreal.

Such was the race that once ruled supreme in New York. A century and a half ago the Iroquois bade fair to become masters of half the continent. Now they have dwindled to a few thousands. But since they have adopted a partial civilization they have increased somewhat in numbers—a proof that civilized life is the most favorable condition of human beings.

It is the judgment of those who have considered the matter, that the State of New York, abandoning the present policy of guardianship, shall adopt the residue of this people as citizens. They will be more likely to become a useful population, and would hasten to adopt the customs and religion of their white neighbors. Humanity as well as sound political economy demand this measure, and in the event that they do not migrate to new homes in the western country, it must eventually be adopted. The establishment of the Indians in a separate territory, with full rights of citizenship, will obviate the evils incident to their present dependent condition, make them useful members of society, and secure their highest improvement without amalgamating them with the white population of the country. The problem is important and our humanity demands its solution.

THE FENIAN ASSOCIATION.

THERE would seem to be in this country a disposition among some to exaggerate the importance of the fraternity of Fenians existing in Ireland, Canada and the United States, and alarm appears also to exist on the part of the British Government in relation to their doings and movements. Several arrests have been made in Dublin; a newspaper, *The Irish People*, has been suppressed; and several vessels of war have been despatched to this side of the Atlantic. An impression is said to exist on the part of the British Cabinet, that the Federal authorities are secretly fomenting the

Rosicrucians and Illuminatists are examples. But we doubt whether they do more than affiliate men of similar convictions, keep up a general enthusiaism. They might serve one important purpose, it is true, in the event of actual hostilities, and aid the party with which they were associated. But we do not believe that they would be able to initiate downright revolution.

We have had considerable experience in this country with such Associations. In our own Revolution the Masonic order in manyways indirectly and incidentally furthered its progress. But with the exception of an alledged instance or two of capital punishment on its own members, it has been harmless. Then there were the United Americans, whose object was to prevent the ascendancy of adopted citizens in our politics. A few years later the Society of the Star-spangled Banner sprung up like a mushroom or the gourd of Jonah, and ramified throughout every State of the Union. It was able to elect Governors, Legislators, and Congressmen, but broke down in in a desperate effort to make a President. The foreign-born citizens were for a time much alarmed, but their fright has long been over, and they now fraternize cordially in the same political parties with their former "Know-nothing" adversaries.

"Lone Star" lodges for the acquisition of Cuba, and "Huuters' Lodges" to effect the liberation of Canada, were also common a quarter of a century ago, but they failed to create much excitement.

Since the breaking out of the rebellion, the existence of a formidable organisation known popularly as "Knights of the Golden Circle," "Sons of Liberty," etc., was brought to light. But although it attempted several audacious measures they all miscarried. Few of the enrolled "Knights" would venture upon an overt act of treason. In their conclaves and public journals many things were threatened, but the Government had little difficulty in restraining their actions. There is or has been a "State Rights Association" in the city of New York, which has accomplished little except bluster. We have also the Union League. It may be numerically powerful but that is all. It was not noticed by the Government during the rebellion, and the political Conventions give it no attention, although it takes great pains to thrust itself upon their notice. Its influence is as imperceptible as the weight of the fly upon the horn of the ox. The truth is secret societies are not indigenous to the American soil; and though frequently instituted, fall speedily to pieces and are forgotten. They do not raise up statemen or warriors for an emergency; but in a brief period become effete and degenerate into a public laughing stock.

England, a little while since, had a little experience also, with secret political organizations. The Chartists alarmed her

movement, perhaps for the ulterior purpose of annexing Canada without difficulty to the United States.

It is estimated that over one hundred thousand Fenians are enrolled in Ireland, and several times that number in America. Reports are current that they have accumulated a large stock of arms, and hold their drills at regular periods. In former movements contemplating revolution the Irish Presbyterians have not participated; but this time, they are said to be somewhat implicated. This has given rise to the opinion that the purpose of the organisation—the separation of Ireland from the United Kingdom—has been rendered acceptable to them by the promise of suitable guarantees for freedom of conscience.

Secret organizations always have existed, and while human nature remains the same, they will continue. They are generally formed upon some central idea, and their mysterious character renders them fascinating to many. The Sufis, Chaldeans, Esseneans, Therapeutists, Pythagoreans, Free Masons,

somewhat, but when their actual power was discovered their roaring was found to be gentle as that of a dove. "Young Ireland" had had no better fortune. Fenianism as another out. break, just as imposing, just as threatening, just as sure to miscarry and become ridiculous.

Our British neighbors may therefore assure themselves. If the Golden Circle could do little harm in this country, or the Union League terminate the Rebellion, the Fenian Societies on this side of the ocean will have little chance to disturb the government of the United Kingdom, or establish an Irish Republic over the sea. The Celtic races, besides, do not affect a free commonwealth. France twice leaped from a democracy to imperialism, and Ireland would lose as little time in establishing a despotism. It may answer for designing men to keep up an organization ostensibly for the purpose of gaining Irish independence; but it cannot be successful even in keeping its own purposes secret. Its counsels can easily be learned by the British premier in time to ensure

[September 30, 1865.

its defeat. It can have only an ephemeral existence. The appellation of Fenian, we venture to predict, will yet become a nickname for Irishmen, as contraband is for negro; and the organization itself will dwindle down to the dimensions of a bugbear so ridiculous that men will refuse to acknowledge their alarm.

The apprehensions which are exhibited in relation to the noisy fraternity are hardly warranted. The British Government has no occasion to suppress newspapers or arrest Fenians. Such a policy is as unwise as the Quaker female preacher declared it was to make war for the purpose of killing men; for if left alone they will die of themselves. The Irish character is too unstable and vacillating, and it lacks circumspection. The Fenian association is too frail an affair to elaborate material for revolution. A brief delay will disperse the brotherhood, and then the Cabinet in London will find only occasion to laugh at their own alarm.

LIMITED LIABILITY.

In the wise and enlightened system of laws, which at present prevail in the State of New York, the principle of limited liability has already, to a great extent, been recognized. The liabilities of stockholders in joint stock companies is limited, and so is that of certain copartners; but much remains to be done in order that our laws in this respect may approach in excellence those which prevail in various parts of Europe, and particularly Great Britain.

In the latter country, as we learn from the Act 25 and 26 Victoria chap. 89, an official copy of which lies before us, this principle is extended to all copartnerships of seven or more persons, and by a late amendment, to copartnerships of two persons, whether the interest of each copartner is determined by the possession of stock, or simply by their rights as shareholders. In other words a simple business copartnership, "having for its object the acquisition of gain," and in which the partners have each of them a certain specified share of the gains and losses, may come under the beneficent provisions of this act.

To understand the importance of this provision we can do no better than to simply advert to the disadvantages which we in this country now suffer for the want of it.

Failures in business are not uncommon events. Every ten or fifteen years, some times oftner, a commercial panie sweeps over the country, resulting in ruin to a large portion of our business men. No resuscitation awaits them. They are buried, forgotten, consigned to the past; and a new generation of commercial firms springs up from the *debris* they form, and scoff at the supposed improvidence of their unfortunate predecessors, many of whom also in their turn finally meet a similar end. From this fearful penalty, this banishment of the young and active, is it any wonder that questionable assignments are made; that assets are hidden away; that relatives are secretly made the repositories of wealth belonging to creditors; in short, that men, to escape a punishment which their misfortunes do not deserve, are willing to do wrong in order to escape it? It is well known that the law as it stands is exercised less in protecting the rights of the innocent, than in affording shelter to the guilty; whereas, its true province should be that of equally protecting the one, and preventing or punishing the other.

The principle, which, in the case of bankruptcy, completely embraces both of these important functions, is limited liability. The creditor knows beforehand how far he may trust with safety; the debtor to what extent he is liable. Beyond this the law does not go; it leaves both parties at this point. Whatever clse they may do is at at their own individual risk.

The act before us is very elaborately drawn and comprises nearly one hundred quarto pages of printing. It is divided into nine parts, relating to the following subject matters :

1. To the Constitution and Incorporation of Companies and Associations under the act.

2. To the distribution of the capital and liability of members of such Companies and Associations.

3. To the management and administration of such Companies and Associations.

4. To the winding up of such Companies, &c.

5. To the Registration office.

6. To application of the act to Companies registered under a previous act.

7. To Companies authorized to register under the present act.

8. To application of the act to unregistered Companies.

9. To repeal of acts and temporary provisions.

In order to come under the provisions of this act, so far as it relates to limited liability, it is necessary for the members of an association to first jointly subscribe to a memorandum of association which shall comply with the particulars contained in the following form :

MEM. OF ASSOCIATION.

1. The name of the Company is The American Steamship Company, Limited.

2. The registered office of the Company will be situate in England.

8. The objects for which the Company is established are, the conveyance of passengers and goods in ships or boats between such places as the Company may from time to time determine, and doing all such other things as are incidental or conducive to the attainment of the above object.

4. The liability of the members is limited.

5. The capital of the Company is £200,000 divided into one thousand shares of £200 each.

Names, Addresses

Addresses, and Description of Subscribers shares taken

Hundreds of enterprising and intelligent young men, who have been degraded from the rank of merchant to that of clerk, can be seen at any time in New York; and few of them, when once placed beneath the iron heel of the law, ever possess courage and hope enough to struggle on until they are delivered by the statutes of limitation, or the two-thirds act.

And yet, after all, what is an ordinary business failure? An unfortunate adventure—that is all. Under wise laws a business man, who has once failed, tries again. Under unwise laws, he despairs. It is as though the law said—unless he removes to other countries, and leaves behind him his business connections, and some of the skill which he has acquired, and which is only applicable under a certain localized state of affairs; or unless he forsakes every occupation in which capital in goods or money can be brought into action—he must retire and give way to others, who, in time, may share precisely his own fate.

RASEF

John Smith, of
John Jones, of
Jean Valjean, of
ParisNew York,
London,
Shipping Merchant....Hardware Merchant....250Dealer in Jet Goods....500

Smith and Jones are, therefore, one-fourth partners in the concern, and Valjean one-half. The next step is to fill this Memorandum with the Registrar of Joint Stock Companies, always affixing the term "limited" to the title of the Company thus: The American Steamship Company (limited); or, Smith, Jones & Valjean, (limited) &c. This step complied with, and payment made of the necessary fees, which are very small and are specifically rated in the act, the Company becomes entitled to a certificate from the Registrar signifying that it has complied with the law, and is thereupon a "Body corporate by the name contained in the memorandum of Association, capable forthwith of exercising all the functions of an Incorporated Company, and having perpetual succession, and a common seal with power to hold lands, but with such liability on the part of the members to contribute to the assets of the Company in the event of the same being

wound up, as is herein-after mentioned;" such certificate being conclusive evidence that the requisitions of the act have all been complied with.

The function of "perpetual succession," it may be remembered in passing, is not one of the least of the valuable privileges conferred by the act. Should one partner of a firm become deceased, no such alternatives are presented to the heirs as the threat of breaking up the business of the firm, unless the interest of the deceased is sacrificed to his surviving co-partners at a price under its real value. It is provided that the names of the members of the Company, however often changed, must be officially known to the Registrar, and the financial condition of its affairs must not only be open to the inspection of its members, but to any person willing to pay a shilling for a printed copy of its last periodical report, made out in accordance with the specifications of the act. The liability of shareholders is limited to the amount put in by each.

Among the provisions for the protection of creditors are the following: the company shall have at all time, a regular and known place of business, it shall have a conspicuous signboard with the name of the Company upon it, and the attachment of the term "limited," and this shall hold good upon such business cards or other documents as it may publish, and upon which the name of the company occurs. All mortgages or other liens or charges shall be known to the Registrar. Twice a year it shall report its financial condition to the Registrar, according to a certain form, and shall post a copy of the same up in its office so that the public may see it. A penalty is attached to the violation of any of these provisions.

The "winding-up" clauses are of great length and very carefully framed to protect both the members and their creditors.

This then is a brief outline of one of the most important pieces of legislation that has ever been enacted in any country, and forms next to the newest of the series of famous acts which, beginning in the reign of Geo. III. have done so much towards making England the centre of commercial enterprise. To those interested in procuring similar legislation for our own country, the chapters of these acts might not be without value. They are as follows: 21 & 22 Geo. III. c. 46 (Parliament of Ireland): 7 and 8 Vict. c. 110, 111, 113; 8 and 9 Vict. c. 98; 9 and 10 Vict. c[.] 28, 75; 10 and 11 Vict. c. 78; 11 and 12 Vict. c. 45; 12 and 13 Vict. c. 108; 19 and 20 Vict. c. 47; 20 and 21 Vict. c. 14. 49, 78, 80; and 21 and 22 Vict. c. 60, 91.

That the great principle embodied in these acts shall find further expression in our code of laws is much to be desired; and if it is carried into practice will prove of vast and un-

Northern Division—Cleveland to Sandusky Southern Division—Toledo to Grafton (C. C. & C. R. R.)	60.0 miles. 87.5 "
- Total length of road owned by Company	147.5 miles.
Cleveland, Columbus and Cincinnati Railroad, from Graf- ton to Cleveland, leased (\$66,000 per annum)	25.0 miles.

Total length operated by Company... 172.5 miles. This road forms, in its Southern Division, a link in the great Lake Shore Line, extending from Buffalo, N. Y., to Chicago, Ill., a length of 528 miles; passing through Dunkirk, Eric, Cleveland, Grafton, Monroeville, Clyde, Toledo, Elkhart, La Porte, etc., at all of which places it connects with other important lines, and is carried through to the Mississippi by numerous independent prolongations. The Northern Division formerly (from the Fall of 1863 to the end of 1858,) extended beyond Sandusky to a connection with the Southern Division at Clay Junction, eight miles east of Toledo; but this portion of the road (39 miles long) having become financially a burden to the Company was taken up. The country traversed by the Cleveland and Toledo Railroad is well settled, and has many flourishing towns. Cleveland, Sandusky and Toledo are the chief lake ports in Ohio, and three of its most prosperous cities. The growth of these in population and business has been wonderful. But in these elements they have scarcely surpassed the country in material development. The local traffic of this road from year to year measures this development, while the through traffic gives some idea of the rapid strides made by the Great West beyond its immediate tributary area.

The *Rolling Stock* of the road is seen by the following statement of the engines and cars on the road at the end of the last five years :

Engines	$\begin{array}{r} 1860 - 61 \\ 32 \end{array}$	1861–62 32	$\begin{array}{r}1862-63\\32\end{array}$	1863-64 37	'64–5 37
Passenger and mail cars Freight cars	61 362	61 393	56 479	54 636	54 638
Total cars	423	454	535	690	692

-not including the gravel and working cars.

The business of the road is shown in the two tables given below. The first is a statement of the number of *passengers* carried, and the direction of travel from the commencement of operations Dec. 30, 1852, as follows:

Business	East	ward	Wes	tward	Total	Pas. Carried
	Thro'		Thro'	Way.	Passeng's.	One mile
1852-53 (8 mos.)	24,115%	50,367%	23,878	51,2481	149,609½	7,498,472

alloyed benefit to our business men; many of whom are daily jeopardizing all they possess in the world for the sake of acquiring a little more than they have, and who cannot help jeopardizing it unless they either give up business, or doom themselves to the inert life of a special partner.

The passage of such an act in this State would also keep a great many people away from venturesome stock operations, and induce them to embark their capital in safer enterprises, who now, merely because they shrink from unlimited responsibility, are debarred from entering the lists of commercial activity.

And finally it would tend to mobilize capital, to bring it out from hoards and hiding places, and to keep it well and fully employed.

ANALYSES OF RAILROAD REPORTS. No. 3.

CLEVELAND AND TOLEDO RAILROAD.

THE Cleveland and Toledo Railroad consists of two divisions as follows: As a general result of the operations we give the following statement of the income account, which we have prepared from the opening of the road to the close of the last business year:

		Earnings	Interest,	Divid'ds	Suplus
Gr	oss Running		rents,	on	after
Fiscal year ending Earn	ings. Expen's.	Expen's.	etc.	stock.	divid'ds.

Literature.

What I Saw on the West Coast of South and North America, and at the Hawaiian Islands. By H. WILLIS BAXLEY, M. D. New York: D. APPLETON & Co., 443 and 445 Broadway, 1865.

In 'the latter part of Mr. Buchanan's administration, Doctor Baxley was appointed a Special Commissioner, and in that capacity visited the countries on the Western Coast of America, and the Hawaiian Islands. What his specific duties were, is not stated ; but he appears to have made it his business to criticise "what he saw" not always in the most candid or friendly manner. He has a special gift to perceive the worst of everything. His style is often discursive, but wordy, and much is written with an affectation of "fine writing" where little is really expressed. Setting out upon his journey, the author reached Aspinwall in eight days from New York. Thence he passed to Panama, pausing to remark the mortality that prevailed while the railway was built, and to descant on the insalubrity of the Chagres river. Panama is a tropical paradise, the former resort of buccaneers, where the American must' amiably lay aside home habits and adopt the customs of the place. At the port of Paita in Peru cotton was discovered in abundance awaiting transportation by a British steamer; its quality little inferior to that of the United States. At Callao the impressed soldiers, cholo mongrels and negroes, attracted notice. It is a port which may at a future day have a large trade. Lima the capital is seven miles distant. But our author considers Peru an unhappy country. Elections have been annulled by the President when his partisans had not been returned, the halls of legislation closed, and all that Peruvians have gained by casting off the yoke of Spain is the privilege of submitting to a Presidential yoke not

RASER

less galling. The senators of this country are designated by lot from the Chamber of Deputies, who are themselves chosen by electors elected by the people. There is no public school system, and the clergy are ignorant and depraved.

The total imports of 1860 were valued at \$3,562,957, of which the United States furnished \$192,836; Great Britain and France supplying five-eights. Nitre is exported in large quantities. Agriculture languishes because of the want of labor—and whenever he notes this of any country the author by intimation ascribes it to the emancipation of the slaves. If slavery only existed there, he would consider it a paradise.

Chili and Valparaiso are more attractive than Peru and its capital. There is more energy among the population; and the climate for a northern man is certainly pleasanter. The sketch of travel through the country is instructive and interesting. The coal and copper mines are rich, and more than half the copper imported by England comes from Chili.

At present the British "Pacific Steam Navigation Company" have the nearly exclusive steam navigation of the west coast of South America. They run twelve steamers along a route of 4000 miles, stopping at upward of forty ports. The Admiralty have caused this coast to be thoroughly surveyed, and disasters are rare.

The next country visited was California, and the description is valuable and interesting. The wealth of nature both in the soil and beneath the earth awake admiration. After a visit to the Yosemite country, the next place of destination was Hawaii. The government of this Hawaiian kingdom is a constitutional monarchy like that of Great Britain. The inhabitants are still in the process of transition of habits and manners. Churches are numerous, as the islanders emulate other Protestant nations in maintaining diversity of belief. But our author is in unfortunate temper toward the missionaries, whom he charges with interference in political affairs.

The consuls appointed by the United States to this country are: charged with recognised incapacity, questionable character, and defective performance of duty. Their periodical removal and distance from supervision, add to the potency of the cvil. A Commissioner, sent to the court of the late king Kamehameha, at his first reception was dressed in a Bowery boy's suit, and spit tobacco juice at the feet of the king, while patronisingly avowing his admiration of the civilized condition of the islands. Licensed plundering and stupid blundering seem to characterize our foreign service, while at home the tendency is to deterioration, ignorance, and corruption. Whether our author is a proper critic, with his decided prejudice against "puritanism" and his reiterated declarations in various forms that negro slavery is a normal condition and not incompatible with liberty, his observations deserve attention. He has undertaken the easiest part of the work of reform, that of finding fault, and it must be acknowledged that he has done it thoroughly.

Eighth Annual report of the Board of Commissioners of Central Park, for the year ending December 31st, 1864. New York: 1865.

THE Central Park commissioners, in conformity with the unphilosophical principle lately favorite with the Legislature in relation to the matters of the city of New York, were constituted with an equal number from each political party. They have been engaged in their work with commendable zeal and activity, improving and embellishing with careful regard to the public taste and convenience. During the last year they have made their principal outlay upon that part newly added, north of 106th street. Their aim, at the northern end of the park, has been to preserve as far as possible the existing bold and striking features of natural landscape. A lake of about twelve acres at the northeastern corner is well advanced. In planting, progress has been make to the extent of 20,658 trees and shrubs during the year. The transplanting of large trees is not desirable. The building of the exterior enclosure is necessarily delayed for want of money. The drainage is still imperfect, no system of sewerage for the adjoining wards having been adopted. The cost of the land in which the park is situated was \$4,815,-671.60; and of the improvements \$4,368,136.50-making a total of \$9,183,808.10. The total valuation of property in the 12th 19th, and 22nd wards, surrounding the park, amounted in 1856 to \$26,429,565; in 1864 it was \$54,712,458-an increase of \$28,-282,893.

The number of visitors was increased to about 6,000,000 in 1864. Pedestrians were most numerous January 17th, when 45,129 entered the park; and least so on the 30th of March, when only 46 entered. The greatest number of equestrians, 1,075, were there on the 12th of June; a single one visited it on the 26th of March. On the 29th of May 13,014 vehicles entered and on the 26th of March only 101. The afternoon after 3 o'clock appears to be the period when when the grounds are most frequented.

The report shows that the commissioners are at work with a zeal and enthusiasm most commendable; and the Central Park will remain to future time, the monument of their labor, and the glory of the city of New York.

Lyrics of Life. By ROBERT BROWNING, with illustrations. Boston: TICKNOR & FIELDS.

This is the third volume we have seen of the series of Companion Poets for the People, the publication of which has been lately began by Messrs. Ticknor & Fields. The plan of the publishers is to present the choicest poems of the best poets in an attractive style, at a price so low as to bring the series within the reach of every household. The present volume contains popular selections from Robert Browning, while the previous ones issued contained similar selections from Longfellow and Tennyson. So much taste and elegance is displayed in the preparation of the volumes, that the series cannot fail to become extremely popular.

Foreign News.

GREAT BRITAIN.

LONDON AND LIVERPOOL DATES TO SEPTEMBER 16.

The market has been characterized by great dullness during the week. There was very little business transacted, and quotations are frequently only nominal. The demand for discounts was limited, and money on call ranged from 3 to 4 per cent during the week, with a tendency toward the lower price.

Business generally appears to be in a transition state, nearly all parties holding on for a fall or rise, as the case may be. The uncertainty respecting the cotton supply, and the amount to be brought forward from the United States, have operated to produce ϵ xtreme cantion. The commercial world has not yet recovered from the alarm entertained at the time of the Bombay cotton failures, and there is a vague uneasiness and a not unquiet waiting for developments.

The rumor is confirmed that the Greek Government is negotiating a new loan with some London firms.

A project for a new joint stock Exchange (limited), on the plan of the Paris Open Bourse, has been started under auspices that indicate a possibility rather than a probability of its success. The principal ground of opposition to the existing Exchange is the "capricious and uncertain administration of rules affecting fresh joint stock establishments."

The suit of the Great Western Railroad of Canada against the Commercial Bank of Canada, involving £200,000, has been decided against the Bank.

The ship Fiery Cross, which has just arrived in the London Docks from Foo-choo-foo, has brought the first cargo of the new season's tea, for which her owners will be paid £1 per ton more than the usual freight, according to established custom. The Serica, which sailed on the same day from the same port, nearly gained the extra payment, having arrived only twelve hours after the Fiery Cross.

that is a very general case, show no signs of weakness in their prices; nor are others disposed to give way more than d or $\frac{1}{2}d$ per lb, and but partially the latter fraction. Concession hows itself most in yarns for India shirtings and coarser goods. The sellers, who are generally reckoned the most steady going, will abate nothing from their last weeks quotations. Good articles of all classes are especially firm; and only those makers who were lately too high for business are now found to yield a little. The recent purchases of best $8\frac{1}{2}$ lb 40 in. shirtings for China, together with present inquiries, render these articles very strong.

At Leeds there is a moderate business in cloths; there is a good trade being transacted in the warehouses, and buyers from London, Manchester, and other provincial towns, are looking after the new patterns for the Spring business, and generally approve of them. The shipping-houses are also busy, as is the case with the dyers and the finishers; and, in addition, the flax and yarn trades are also active.

THE CONTINENT.

PARIS DATES TO SEPTEMBER 15.

Trade in general is improving in France. The full official returns for the first seven months of the present year show an increase in imports of 149,000,000f. as compared with the corresponding period last year. The total imports amounted to 1,532,972,000f. The articles on which the principal increase occurred, are wool, 38,000,000f.; cotton, 29,000,000f.; raw silk, 19,000,000f.; seeds for sowing, 12,500,000f.; seeds for crushing, 5,000,000f.; olive oil, 4,000,000r.; oil of other quality, 4,000,000f.; sugar, 5,000,000f.; coffee, 2,000,000f.; cow horns, 4,000,000f., coal, 6,000,000f.; cast metal, 5,000,000f.; indigo, 5,000,000f.; linen thread, 5,000,000f.; woolen thread, 3,000,000f.; cotton thread, 2,000,000f.; woolen stuffs, 3,000,000f.; jute, 1,000,000f.

The exports which show a falling off of 28,362,000, on a total of 1,664,445,000f. are exceptional, and are attributed to the civil war in the United States, which checked the usual demand for fancy articles, and partly to the disease among silk worms. The wrought silks exported amount to 211,514,000f., being a diminution of near 54,000,000f. as compared with last year. The woolen stuffs exported this year amount to 182,682,000f., being a decline of 15,000,000f. as compared with last year, but a considerable increase as compared with the years 1861 and 1863.

Although the general trade of France is improving, there is a great deal of distress among the small tradesmen and mechanics of Paris. Bankruptcies are on the increase among this class. During the last month 152 bankruptcies were reported in the Department of the Seine, being 33 more than during the month of June.

Reports from the grain-growing districts respecting the harvest are unfavorable. Accounts from the province of Galicia, the Grand Duchy of Posen, the Kingdom of Poland, Lithuania, and the Ukraine, give a melancholy description of the result of the harvest. The dry weather in the months of May and June, and the incessant rain from the middle of July to the end of August, so much injured the corn crops that the produce is less than the average of other years. In the Ukraine, and in the provinces of Volhynia and Podolia terrific thunderstorms, accompanied by hail, destroyed a vast quantity of corn and fruit. The most fertile districts in Tchihiven, Kiew, Tcherkaski, Lethyn, and Albopol mere nearly laid waste. More than 18,000 acres of land planted with beetroot for the numerous factories which exist in the government of Kiew will not produce sufficient to pay for the labour and seed. The accounts received of the corn crops throughout the Russian empire are in general unfavorable.

The figures of the Austrian customs receipts for the last 25 years exhibit in a striking manner the prostration of the industrial energies of that kingdom. The returns have occasioned animated discussions in the press, and in commercial circles respecting the steady decay, with a growing tendency against the protection system which has been carried to an extreme by Austrian statesman. The success of the French experiment is largely increasing the ranks of the free traders. The Chambers of Commerce of the various citie sof the Empire discuss the question with great earnestness, and several have taken ground in favor of a more liberal policy, although the Chamber of Vienna, while professing to favor free trade principles in the abstract, in reality gives its influence against any change in practice.

The Grand Trunk Railway Company have announced the payment of the interest on the Atlantic and St. Lawrence sterling shares and certificates, on and after the 15th instant.

The report of the directors of the London Bank of Mexico and South America (Limited), shows net profits at the rate of 20 per cert per annum, reckoning from the dates of payment of the calls.

At an extraordinary meeting of the new London Merchants' Company (Limited), Mr. John Fleming, in the chair, it was resolved to wind up the Company in consequence of a disagreement as to the value of the three amalgamated firms. The money paid in by the stock holders will therefore be refunded, the interest according to a special vote, going to defray the expenses of the company thus far.

The restoration of the long supended trade between Liverpool and the Southern States of America has imparted a buoyancy to commercial circles. Within the last few days there were two arrivals from New Orleans. There are at present three vessels loading in the Liverpool Docks for the South.

At Manchester the contest for a reduction of prices between buyers and sellers still continues to affect trade, and no business, except to fill immediate contracts, is transacted. Heavy receipts of cotton have checked business, both in that article and in yarn and cloth. Such spinners, however, as are well situated in regard to orders, and

COMMERCIAL AND MISCELLANEOUS NEWS.

MONTHLY MAIL SERVICE WITH BRAZIL.-In accordance with the law of Congress and the advertisement from the Post-Office Department, a contract was lately signed between the United States, by Postmaster-General Dennison, and the United States and Brazil Mail Steamship Company, through its president, J. F. Navarro, to carry the mails between the two countries for the next ten years, by a monthly line of first-class steamers, the subsidy from this govern-ment being one hundred and fifty thousand dollars. The Brazilian Government having already granted this company a similar contract the total subsidy will be three hundred thousand dollars per annum, besides complete immunity from all port charges and custom-house dues by both countries. The average speed is to be not less than two hundred miles per day. The departures from New York will be every 29th, and from Rio Janeiro every 2d of each month. The establishment of this so much needed line has been in contemplation for the last fourteen years; but the conflicting interests of the different parties seeking the contract, as also the unwillingness of this Government to grant subsidies to any one, have precluded its going into operation long before. However, every difficulty has been overcome now; and, with such liberal subsidy and the patronage from both governments, it is expected the line will be highly successful. It will put us in regular communication with all the Portuguese and Spanish countries bordering on the northern and eastern coast of South America.

This is the only company now subsidized by this government,

FRIDAY, September 29, 1865, P. M.

THE MONEY MARKET. Monetary affairs remain steady. There has been, during the week, a slight increase in the demand for loans and discounts; but the supply of funds appears to have correspondingly augmented; and the rates are therefore unchanged. The high prices of grain at the western centres, induced by speculation, have prevented purchases by New York merchants, and the demand for money for moving the crops is consequently much less than usual at this season. This condition of affairs, however, cannot continue much longer, and an active movement of currency to the West may be early expected. The Chicago journals report that the bankers there are inconveniently burthened with bills on New York, and are beginning to send them to this city to be exchanged for money. This may be regarded as the beginning of the movement we have indicated. At the same time, an active speculation in stocks has set in, during the present week, which appears likely to continue; and with these active sources of demand, the prospect would seem to favor an advance in the rates of interest. On de. mand loans, the general rate is 5 per cent, with exceptions at 6 per cent.

426

although the contract for the China mails already awarded to the Pacific Mail Steamship Company will be signed in a tew days. The agency, very properly, will be in the hands of a house uniting among its members the American and Portuguese element.

The Bankers' Gazette.

We give in our BULLETIN from day to day lists of bonds, &c., lost and the dividends declared, with times of opening and closing books. These tables will be continued daily, and on Saturday morning, such as have been published through the week in the BULLETIN, will be collected and published in the CHRONICLE. Below will be found those published the last week in the BULLETIN.

RASER

The banks report an increase in the supply of jobbers' paper—a natural result of the late activity of business. There has been a slight increase in the supply of cotton bills; but the proportion of this class of paper upon the market is still quite unimportant. The prevailing rate for prime bills is 7 per cent; for second class Sa10 per cent. We quote for good names as follows:

0	Per Cent.	Per Cent.
Dry Goods Grocers Cotton bills	7 a Ban 7 a Pro	kers
RAILROAD AND MI	SCELLANEOUS	SECURITIESWe have

THE CHRONICLE.

repeatedly noted the tone of firmness pervading the stock market during a period of extreme dullness, and have indicated a probability that the confidence would ultimately develope into an active demand, if not a brisk speculative movement. The course of the market during the past week has confirmed these indications, by a general revival of activity in stocks.

The improvement has originated with an outside demand, partly for investment and partly speculative, which has been responded to by a renewal of speculation by professional operators; the result being an aggregate of transactions for the week equal to the business of the whole preceding month. The improvement appears to have arisen naturally out of the continued enlarged earnings of all the roads, and especially of roads interested in the coal traffic. The demand for Reading has been very active, and is understood to have come chiefly from parties largely interested in the road. The sales of this stock at the regular board alone amount to 29, 000 shares for the week; the price having advanced from 1091 to 114. Michigan Southern and Cleveland & Pittsburg have also been active, and close at an advance. Milwaukee & Prairie du Chien have continued very firm, the price having risen from $54\frac{1}{2}$ to 58; but close dull and lower; there is very little of the stock upon this market.

The chief interest has centered in Erie, owing to the prospeot of the 28,000 shares held as collateral by a speculative director being early returned to the company. Mr. Pearson, as agent of the company, is about consummating negotiations for a loan of \$5,000,000 on 30 years bonds, with English capitalists; the bonds to be taken at 70 in gold, and the principal and interest at 6 per cent also payable in gold. This will realize for the company about 5,400,000 in currency, which will enable them to pay off Mr. Drew's loan of about \$2,000,000, and have a balance for the liquidation of outstanding obligations, and for construction and other purposes.

Coal stocks show a general improvement, in consequence of the pospects of a large demand and high prices for coal during the winter. Speculative combinations are being made for the purpose of running up prices of some of the leading coal stocks.

The following has been the closing quotations for leading stocks at the beginning, middle, and close of the week;

			35

GOLD MARKET.—The course of the premium has been steady during the week. There has been an active demand for customs, but no important export of specie. The payment of the 5-20 November coupons has supplied on an average about \$250,000 per day, which is about one-half the requirements for duties; so that the drain upon the market has not been so heavy as of late. The Stock Exchange Board has concluded to permit, on and after Monday next, the negotiation of Five-tweaties at the board without the November coupon; which will admit of the early withdrawal from the Treasury of all the gold due thereon, except so much as may be due to foreign holders, thus affording an important relief to the market. The rates of foreign exchange do not yet admit of the exportation of gold otherwise than in bars.

The export of gold on Saturday and Wednesday last was \$523,262, almost exclusively in gold bars.

The following have been the highest and lowest quotations for gold on each of the last six days:

	Highest.	Lowest.			. Lowest
Sept. 23	1438	1431	Sept. 27	144	1 1431
Sept. 25	1433	1431	Sept. 28	144	143 3
Sept. 26	144	1434	Sept. 29	144	143 3

UNITED STATES SECURITIES .- It is now generally understood, though not officially announced, that the Secretary of the Treasury will offer to fund interest-bearing legal tenders and certificates of indebtedness into coin-interest bonds. The nncertainty as to the kind of bonds to be issued, whether 5 per cent or 6 per cent, and as to the amount also, has produced a depression in government securities during the last few days, and the prevailing disposition has been to sell. A large amount of "shorts" has been put out in anticipation of the new issues, which has temporarily depressed quotations, though it furnishes the basis of a future advance, when contracts are filled. Old Five-twenties have declined 3, and new 3; 6's of 1881 are $\frac{1}{4}$ lower. Ten-forties retain their late price. Certificates of Indebtedness are firmer, in antic- the condition of the Associated Banks of the city of New

FOREIGN EXCHANGE.—There has been a disappointment of the general expectation of activity and higher rates for Importers do not appear to be in haste to remit, exchange. and the light supply of commercial bills has therefore been sufficient to prevent an advance on the rates to the specie shipping point; though quotations have been sufficiently high to admit of a considerable amount of bills being drawn The principal transactions have been against gold bars. done within a few hours before the steamer day, at a liberal concession from the rates previously asked, showing the inability of drawers to bring up buyers to their views. The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, Sept. 29.

Trade is on the whole free from speculative excitement, and the volume of transactions are on a somewhat diminished scale, but there is little or no yielding in prices. Cotton is but a trifle lower, and breadstuffs have quickly recovered from a slight decline. The supplies of breadstuffs from the West are quite inadequate, and it is now certain that the close of navigation will come upon us with light stocks.

Provisions are the dearest staple in the list, and there is a vast speculation in them. The Western pork packers, instead of preparing for the coming season, have come into this market and bought pork largely, and are holding for an advance. Lard has been run up to unheard of prices, and dressed hogs have brought extreme figures. Foreign orders for bacon cannot be filled. It seems certain that the West will not furnish us much more than half its usual quantity of hog products. We apprehend, however, that when the packing season arrives, it will be found that the South is will supplied with hogs, and that a great share of the demand upon which speculation relies will be found wanting.

Oils are quiet and unchanged.

....

Petroleum has been excited by the foreign intelligence by the Cuba, and a decided advance on the week has been established.

New raisins have arrived, and the market opens brisk at very full prices. A steamer is now nearly due at this port from Malaga with a cargo of 20,000 boxes.

There has been a decided improvement in Naval Stores. The stocks in the market are light; the receipts, though quite liberal, have been barely large enough to fill the orders, especially for Rosin and Spirits Turpentine. In the former we notice a large export demand, and an advance within a day or two of more than a dollar a barrel. There is a fair stock of Crude Turpentine on hand, but it is wanted for export, and the stock at Wilmington is known to be light, and the market is firmer. Tar is in better supply, but not sufficient to materially depress prices.

Building materials continue very scarce and prices rule very high. Lumber is in good demand, but owing to the scarcity of labor in

We give below as a comparative statement the receipts of a few leading articles, per all routes, since Jan. 1, 1865, and for the same period last year :

porroa mot jour .		A

THE CHRONICLE.

ding Company's monthly sale held on the 13th inst., comprising 87,000 bags Java and Padang, went off at an advance of $\frac{1}{2}$ cent on the valuations for the better qualities, but at a decline of $\frac{1}{2}$ cent for the common sorts, good ord realized $4^{F}\frac{1}{2}$ cents.

COPPER quiet. Tough Cake and Tile £36, Best Selected £89, Sheathing £91, Y. M. Sheathing Sid.

CORN.—There has been a fair supply of New English Wheat this week, generally in inferior condition, and prices of this description are again 2s per qr lower, ranging from 34s@38s per qr for low quality, and very little realizing over £42. Average price of English Wheat for week ending 9th inst. was 46s on 60,834 qrs returned. In Foreign little doing. White American Wheat 46s@48s; Winter Red 45s@47s; Spring 44s@46s per qr; American Flour 24s@27s per barrel.

HEMP-150 bales good current quality Manila (1858 import), at pub lic sale, sold from £33@33 10s, and 120 bales very ord Sunn went from £9 15s@18 10s.

JUTE-6,900 bales at auction were chiefly disposed of from £10 10s @£22 5s for common to good, with rejections and inferior from £9@10 5s. Privately about 9,0(0 bales have changed hands for arrival, including the marks R B J, usual assortment, to Liverpool at £18 for old, and £19 15s for new.

INDIGO—The next quarterly sales of East India are fixed for the 10th of October.

IRON-Welsh quiet, rails and bars £7@7 10s f o b in Wales. Scotch pigs 57s 3d for mixed Nos. on Clyde.

LINSEED—Imports for the week 12,205 qrs. The market has further improved, with a considerable demand for export to America. Calcutta on the spot now commands 598 6d@60s, and Bombay 61s@61s 6d; a parcel of good Petersburgh, just arrived, sold at 57s 3d. For arrival a good business has been done in Calcutta at 598 6d@60s, and 1s more for Mirzapore, closing with buyers at these prices. Imports since 1st Jan. 376,835 qrs, against 357,715 qrs last year.

NAVAL STORES—Spirits of Turpentine are less active, and now obtainable at 47s 6d for French. A sale of American is reported at 60s. Petroleum 2s 3d.

LINSEED CAKES-A slight improvement in the demand without change in price.

 \dot{O}_{1LS} —Fish firm, but no sales in sperm are reported over £100, Pale Seal £45, pale southern £45, Cod £49. Linseed dearer, buyers at 368 6d on the spot. Rape very firm, brown on the spot or for this month is scarce, and there are buyers of English at £46, and of foreign at £46 10, for the next three month's delivery a good business at £45 10s for English and £46 foreign, for the first four months next year there are buyers of English at £44 10s, and sellers at £45; refined continues firm at £48@48 10s, refined cotton is in good demand at £35 10s@37 according to quality, and crude is scarce at £29 10@30. Olive in good demand, with sales of Mogadore at £49, now £50 is demanded, Seville commands £50 10s@51, Malaga £51 10s@52, and Gallipoli £54; a cargo of Seville sold at £49 c f & i to a direct port in the U K. Cocoa nut firm; Ceylon at 44s@44s 6d, and for Cochin 46s@46s 6d is demanded; for arrival 10s per ton more is asked. Palm scarce, and for fine Lagos 38s 6d@39s is obtainable; palm nut 33s 6d@34s.

RIDE quiet, and the only reported sales are 2,000 bags Necranzie 9s 9d cash.

In MOLASSES no sales.

RUM quiet at 1s 9d for Demerara, and 1s 8d for good Leewards.

LEAD-Common Pig £19@£19 10s.

SALTPETRE—Nothing doing. The price of British Refined is 28s@29. SPELTER dull at £21 10s.

SUGAR—The market has been very firm at last week's prices. Of British West India 3500 hhds sold. Of 12,503 bags Mauritius at public sale about10,000 bags sold at 27s@31s for brown, 31s 6d@34s for grey syrups, and 36s6d@38s 6d for semi-crystalised. 2221 bags Bengal mostly sold at 26s for brown date, 30s@31s for Gurpattah date, and 35s 6d@ 38s for white Benares. 1131 bags Madras were realised at 28s@29s for brown Native. 1752 bags Penang sold at 30s@34s 6d. Privately 1500 bags crystalised Mauritius sold at 36s@38s, and 350 bags brown and yellow date Bengal at 28s@30s 9d. Foreign: 649 hhds 165 barrels Porto Rico were fully two-thirds realished at 38s@39s 6d. 2164 bags clayed Manila (washed) sold at 30s 6d@31s. The private transactions have comprised 1100 boxes fine Derosne Havana at 40s, 783 hhds 11 tierces 184 barrels Porto Rico at 33s 6d@35s, 6500 bags clay-

little doing but prices unchanged, anything good being worth 85s per cwt. TALLOW—The stock of N. A. on the spot is very limited, and held at 47s@48s. BEEF—Fine qualities command extreme prices, but secondary sorts are lower; India Mess 75s@102s 6d. PORK—Very little doing, but holders are very firm at 80s@95s. BACON—Owing to the very small stock, the sales are very limited at 60s@66s. BUTTER—The weather being very hot, is rather a slow sale; extra fine 100s@106s. CHEESE—The arrivals being in excess of demand, we must quote it lower; extra 55s@57s.

HAVANA.—Dates are to the 23d. We quote :

SUGAR (clayed.)—The active demand which we announced in our previous number, particulary for specific descriptions of which the stock is unusually small, has continued uninterrupted—and, although the transactions have been chiefly directed to purchases for the United States, there is no lack of speculators in the market, who in view of the rapid decrease of stock are sanguine as to the enhancing value of sugar. On the whole therefore, sellers are even firmer than they were last week, and the market is likely to be well supported hereafter.

ed Manila at 31s 6d(@32s, and seven floating cargoes, viz, two Havana, together 6483 boxes No. 12 at 26s 6d fully insured for U. K.; three Cuba Muscovado, 505 hhds at 23s 6d lying at Havre, and to be re-ship-2ed for Clyde, 188 hhds 1600 boxes (low) at 22s 6d, 207 hhds 76 tierces 53 barrels at 23s 9d; and two Brazil, 400 cases white Bahia at 25s, and 200 cases 200 bags brown ditto at 22s 6d, all with landing weights and for U. K.

TALLOW—There has been more activity in the market at improving prices; on the spot old St. Petersburg Y. C. is now worth 46s, and New 46s 6d, 46s 3d@46s 6d all the year, 47s 9d January to March, and 48s March only.

TEA market firm. Two ships have arrived with about 23,000 pkgs new season's Congons, which have found buyers at very full prices, ranging from 3s 2d@3s per lb. Fine Moyune Green Teas are still wanted for America, but the market is cleared of them for the present —the same remark applies to uncoloured Japans. Good Common Congou 1s@1s 1d per lb.

Tin-Blocks 93s, Bars 94s, Refined 97s. Foreign: Straits 88s@88s 6d, Banca 91s@92s.

LIVERPOOL.—The following report of Liverpool markets to the 15th will be found valuable, in view of the speculative prices of these staples in this market :

NAVAL STORES—There is a better inquiry, and a fair quantity of Rosin has been sold at from 188 6d up to 258. Spirits of Turpentine have also advanced 1s, to 478@488. PETROLEUM—Owing to some speculative inquiry, has advanced to 2s 8d@2s 9d for Refined, and now more is asked. Spirits sells in retail at 2s 9d per gallon. LARD—Very

MOLASSES.—We hear of no transactions on the spot. Clayed is quoted $4\frac{2}{3}$ @ 5 rs, and Muscovado 5 @ $5\frac{1}{3}$ rs. In Matanzas fair clayed can be had at 4 rs.

Rum being scarce and in demand, 21 o in chestnut pipes is now held at \$29 @ \$30—and in oak casks at \$35 @ \$36.

HONEY.—There being no stock on hand, the price is nominal at 41 rs. per gallon.

WAX is plentiful, and being dull, yellow can be had at \$8 @ \$9, and white at \$11 @ $11\frac{1}{2}$ per @.

TOBACCO.—The supply of new continues very limited, owing to the late heavy rains rendering roads intransitable. Business on the whole has not been very active, for want of desirable qualities. The demand for New York has improved, and sales are reported of assorted lots and fillers at \$25 @ \$30 and \$14 @ \$18, respectively. Our stock of new is not large, mostly consisting of indifferent descriptions, which are held

at comparatively high prices.

SEGARS.—Are without change.

COTTON.

The market early on Monday much depressed, but before business was fairly opened, the latest intelligence by the Moravian off

Farther Point, indicating a recovery of the decline in the Liverpool market, gave renewed steadiness, to ours, which the later intelligence by the Cuba, of a farthing advance, and an active market on the 16th fairly checked the decline, at prices about one cent below the closing quotations of last Friday. The market since Wednesday, however, has simply ruled firm. There has been no general activity, and the speculative feeling which has heretofore ruled so strong, seems to be wholly wanting. The receipts keep up steadily to the highest average of the season, and stocks, although exports have been stimulated, are increasing in all the principal markets. The stocks on the Atlantic and Gulf seaboards, are now approximating 400,000 bales in all, and it will be seen that there is a large stock at Memphis. A gentleman from Augusta informs us that there are about 100,000 bales at and near that market, which are coming forward as rapidly as transportation can be obtained.

The views which we have heretofore expressed respecting the quantity of cotton to come forward, have been regarded as indicating too large a supply, we are content at this time to point to the record of the past three months, showing that our estimates have been constantly exceeded; and that if we are to be found finally in the wrong,-to have over-estimated the supply of cotton to be obtained from the South,-the evidence in support of that theory is as yet wholly wanting.

At to-day's market, there was a fair miscellaneous trade at steady prices. The following are closing quotations:

MEMPHIS.—Dates to the 22d bring the following report :

COTTON is less active and lower, owing to the reported decline of 1c in New York. Receipts by river, 419 bales. Shipments 2,000 bales; stock on hand 7,200 bales. We quote sales of 238 bales at the following rates :--Ordinary 31@32, Good ordinary 33@35, Low middling 35@37, Middling 38@39, Strict middling 39@41, Good middling 41@13, Mid. dling fair 44@45.

CHARLESTON.—Dates are to the 22d, and report as follows :

With very limited supplies our transactions are necessarily small. The receipts during the week have amounted to about fifty bales of Sea Island, and 1,423 bales of Upland cotton. Some days since the Europen news brought information of an advance in the foreign market, and holders have, consequently, been very firm during the week. There has been an improvement of fully one cent per pound since our last report, and yesterday the market was very firm. Small lots were disposed of yesterday at 37 cents for Strict middling and 38 cents for Good middling cotton. Some few lots of Sea Islands and Mains have been sold at prices at from 70@95 cents. We quote :--Middling 36c, Strict middling 37c Good middling 38c.

NEW ORLEANS .-- Mail dates are to the evening of the 18th. The regular report says :

"We have again to notice a quiet cotton market, the demand being checked by the large amount of previous sales not yet delivered, and the non-arrival of the steamship with the New York mail. With a limited stock prices were rather heavy, but factors generally adhered to their previous pretentions with continued firmness, and we still quote ordinary at 33@35c., good ordinary at 38@40c., low middling at 41@ 43c., and middling at 44@45c. The outside figures for the grades below middling are for strict classifications.

THE CHRONICLE.

Very heavy imports, mostly East India, coupled with rather lower advices from America, caused our market to open dull, and prices were in many cases id to id lower. Manchester market, however, not hav-ing sympathised with the decline here, a much better tone has sprung and the above decline has been almost entirely recovered. On the ing sympatnised with the decline here, a much better tone has sprung up, and the above decline has been almost entirely recovered. On the 16th there was an advance of a farthing, with sales of 25,000 bales, making 45,000 bales for two days. The following quotations and statis-tics are from the circular of the 15th:

d,

f;

"The weather still continues remarkably fine and hot, and the whole of the Wheat crop may now be considered safely gathered, and, with exception of what was housed at first, in good condition. The second crop of Hay is also reported as being unusually good and heavy. We have had very little animation in our Wheat trade, prices of which are nominally unaltered. There has been a fair consumptive inquiry for Indian Corn, and though a good deal has been received, prices have not given way more than 3d@6d per qr.

Deliveries of Wheat from our own farmers for the past week consist of 60,834 qrs; price 46s, against 43s 6d same period last year.

At this morning's merket there was only a moderate attendance, and the demand for Wheat being quite of a retail character, the prices current on this day week were barely supported. Flour also was slow of sale. Indian Corn was less freely offered, and sold to a moderate extent for consumption at rather better prices; Mixed American 298 3d @298 6d.

Imports for past week consist of 13,280 qrs. Wheat, 33,200 qrs. In dian Corn, 6,388 sacks. and 694 bbls. Flour. Exports for same period consist of 2,447 qrs. Wheat, 4,212 qrs. Indian Corn, 955 sacks, and 1 bbl. Flour.

THE DRY GOODS TRADE.

The Dry Goods Market has rallied, seemingly from its own inherent strength, from the utter stagnation of last week and is again buoyant and firm. The attempt to break the market, so apparent in the operations of some leading jobbers, failed almost wholly in its effect. Prices of standard goods receded two or three cents but that was a slight concession from what was anticipated by the large reductions made by jobbers in the early part of last week. Standard goods fell from 371 to 34, where they have remained, although in a few instances they are held at 35, owing to the scarcity of goods. Of course under this firmness on the part of first hands and a lack of goods, the jobbers have again advanced their prices to the near vicinity of two weeks ago. The sudden fall of goods in jobbers' hands called back the frightened trade, and there has been a good degree of activity during the week. At the concessions made by the agents, all grades of goods have been taken as soon as they arrived, and the small accumulation has been entirely cleared out during the past two days. The scarcity of goods keeps up prices to a figure far above cost of production, which must continue until the present active demand from the South and West is supplied. The mills are crowded to their utmost capacity, and the product is at the present time very great, but not equal to the wants of the country.

BROWN SHEETINGS AND SHIRTINGS are firm and scarce for the finer grades. The sales have increased during the week and the market is almost bare of goods. The prices are three and a half cents lower than two weeks ago for standards, at which goods are There was a bteter feeling noticeable among quickly taken. agents, and much less difficulty in obtaining figures. Appleton A, Atlantic A., P. A., A. H., & P. H., are held at 34 cents; Amory and Indian Head A. and Wachusetts sold quickly at 34 cents, now held at 35. Indian Orchard S. Atlantic Shirtings P. E. and H. Appleton B. sells at 40; D. 31, W. 48, and are also held at 35. N. at 26. Augusta Mills 4-4 at 321, and 7-8 at 271. Auburn 27, Indian Queen 30, and Rockey Point Sheetings at 33. Atlantic heavy Shirtings at 29, and fine Sheetings at 361. Indian Orchard W. at 31, B. B., & C. at 36, N. at 37, and A. at 38. Newmarket 33 inch at 35, and 36 inch at 36. Nashua A. 33. BLEACHED SHEETINGS AND SHIRTINGS are again firm and in The market is poorly supplied and mostly sold to good demand. arrive at value. Prices are some 10 cents on a yard lower than before the reaction but firm at this reduction, and there is a great scramble among the jobbers for goods as soon as they arrive. There are no Walthams in market. Bartlett Steam Mills, 33 inch sell at 421, 44 inch at 471, 5-4 at 55, and 7-8 at 40. Uxbridge imp. 45, Attawaugan XX. are held at 43.

high figures were they in market. Amoskeag are valued at 37 cents.

CORSET JEANS are scarce and firmer. Indian Orchards are held at 32c, New Market 33c.

COTTON FLANNELS have suffered but little in the reduction in prices on other goods, and are scarce and firm. Columbia is held at 40c.

STRIPES and TICKS are also steady and firm, with but little variation in prices. In most instances they are sold ahead at value. Willow Brook Mills Ticks are held 4-4 at 85c, and $\frac{7}{4}$ at 70c, Atlantic 7 8 50c, Concord 4-4 40c, Pacific extra $\frac{7}{4}$ 50c, Union checks 3x3 and 6x3 at $47\frac{1}{4}c$, and Ringold fast plaids at 33c.

DENIMS and COTTONADES are also steady, and sell at firm prices as fast as received.

PRINT CLOTHS are scarce, and no sales are known to have taken place here or at Providence.

PRINTS have fluctuated somewhat. Falling off early in the week and again advancing. The sales have been larger and prices are now quite firm. Sprague's prints are sold out and no goods are expected for some days. Columbia Fall Madders are held at 28c, Concord purples 29, Wauregan rubies, prints and purples, 32c, Merimacs W closed out at 34c, D at 32c, Garners are held at 32c, Amoskeag 29 a 30c, Duchess B $27\frac{1}{2}c$, and Wamsutta $26\frac{1}{2}c$.

GINGHAMS are steady and firm with fair demand. Willow Brook sells at 40c, Lancaster 35c.

JACONETS are also steady with no change in prices. Slater's sellat 31 cents.

SILISIAS and Cambrics are quiet. Slater's plain silisias sell at 32c, Indian Orchard at 36 a 45c. Cambrics Saratoga and Milton Mills at 20c, and Fancy Brand at 21c.

MOUSLIN DELAINES are steady at firm prices. Manchester sell at 35c, all wool and challies at 55c. Hamilton Delaines at 35c.

LINSEYS are steady, Highland Mills all wool sell at 50c, Park Mills No, 45 at 45c, No. 35 at 50c, and Miners' flannels at 60c.

WOOLEN GOODS have been steady and firm for desirable styles of cassimeres and satinets.

FOREIGN GOODS are more steady, and prices are slightly higher and firmer. The several auction sales have been well attended, and better prices have been realised, although considerably below that of two weeks ago.

Messrs. Wilmerding, Hoguet & Co. held a sale on Wednesday, consisting of woolen and tailoring goods. The offering was not large, but comprised many seasonable goods which brought fair prices, and some grades sold above the rates of last week. $\frac{1}{4}$ red padding brought 32 cents, fancy printed satinet 32 a 42, $\frac{1}{4}$ fancy wool cassimers 71, $\frac{1}{4}$ indigo blue coatings 70, fancy make black cassimere \$1.17 $\frac{1}{4}$, fine fancy do \$1.77 $\frac{1}{4}$, $\frac{1}{4}$ black tricots \$1.70, $\frac{1}{4}$ indigo blue cloths 67 $\frac{1}{4}$, blue twilled flannel 61 a 62 $\frac{1}{4}$, fancy cassimere vestings \$1.55 a \$1.75, Lyons all silk fancy vestings \$3.25 a \$3.60, Lyons all silk black velvets \$4,05, sealskin cloakings \$1.15 a \$1.40.

Messrs. Hadden & Co. held a sales of carpets &c. on Wednesday. The offering was in less variety than usual from the fact that the productions of the various manufacturers are well sold up at private sale. This firm hold regular weekly sales of this class of fabrics, put up in lots adapted to the general wants of the trade, and which have thus far been quite satisfactory. Carpet paper brought 92 cents, J. C. & Sons' H. tapestry rugs \$4,10 each, do F velvet do \$5, 12-4 printed drugget squares \$9.50, 12-4 crimson do \$10, 14-4 green do \$11.75, 12-4 printed drugget \$2.621 per yard, Extra cottage carpeting 41¹/₂ a 42c, 4 4 ingrain, cotton chain, wool filling 651 a 70, made by Thos. Maywhirter. Messrs. Kobbe & Corlies held a special sale of ribbons, millinery, silks, velvets &c., at 4 months. The ribbons were of the importation of Messrs. Solelisc Freres, and presented one of the largest and most attractive offerings, in the variety of colors and quality. made this season. In the present state of the market prices were not fully sustained, but there were nearly twelve hundred cartons in duplicate sold, in addition to the sample lots, at about 21 a 5 per cent reduction from the rates obtained at room sales. The silks and velvets were generally sold at satisfactory prices. A sale of woolens and tailoring goods by Messrs. Wilmerdings & Mount on Tuesday, passed off with considerable spirit at satisfactory prices. Linen ducks brought 221 a 23c, 6-4 blouse linen 23 a 24c; 4-4 Spanish linen 30c, 7-8 elastic linen coatings 301c, black

DRILLS are scarce for heavy grades and high, and would bring

Italians 66 a 69c, 28 inch Paris cassimere vestings \$1.771 a \$2.371, super do \$2.371 a \$2.621, super French do \$2 a 2.85, Lyons fancy velvet do \$3.75 a \$4.621, Lyons all silk fancy \$2,75 a \$3. IMPORTS OF DRY GOODS AT NEW YORK FOR THIS MONTH.

Below we give the movement of Foreign Dry Goods at the port

of New York for the month of September, 1865, and the corresponding month of 1862, 1863 and 1864. It will be seen that there is a very large increase in the imports this month over the corresponding month of the previous three years. Last year especially the receipts were small, and a very small portion was thrown upon the market, the demand been very limited. This month, however, there has been great activity in the trade and, consequently, the total thrown on the market is almost three times the total of September, 1864, and largely in excess of the previous years.

Imports of Foreign Dry Goods at New York for the Month of September.

The Railway Monitor.

PACIFIC RAILROAD.-The Pacific Railroad of Missouri is at last completed from the Mississippi River to the confluence of the Kansas with the Missouri River. This important line extends from St. Louis, a distance of 283 miles, and is the first link in the great railroad which at no great distance in time will connect the Atlantic and Pacific States of the Union. The event transpired on the 19th September, 1865, when the same hand-that of the Hon. Luther M. Kennett-which turned the first spade of earth at the commencement of the enterprise, performed the finishing stroke by driving the last spike. The Pacific Railroad Company was incorporated by the Legislature of Missouri February 12, 1849, and was organized January 31, 1850. The formal breaking of the ground took place July 4, 1851. The road and equipment has cost about \$12,000,000, toward which the State has contributed \$7,000,000 in bonds, to secure which it holds a first lien on the property. At Kansas City this road will connect with the Union Pacific Railroad, E. D., which has already been opened to a point opposite Lawrence 40 miles west, and is now progressing towards the point where the main line of the Union Pacific Railroad will cross the hundredth meridian.

NORTHERN ILLINOIS RAILROAD.—The construction of the river section of this road is progressing rapidly. It is already in operation from Savanna to Fulton, 17 miles, and will probably be completed to Port Byron, 21 miles further south in the coming October. The company's charter extends to Rock Island, a distance of 17 miles from Port Byron; but this section will be constructed by the Chicago and Rock Island Company, and operated in common by the two companies. In connection with the Racine and Mississippi Railroad, a line of 197 miles will stretch from Racine on Lake Michigan to Rock Island on the Mississippi. This line is about to be consolidated under the title of the Western Union Railroad. The river line will be continued south to Quincy by the Warsaw, Rock Island and Galena Company. RAILROAD DIVIDENDS.--The following companies have declared dividends :

Chicago and Rock Island, for the half year	5 p	er c.
Philadelphia, Wilmington, and Baltimore, for the half year	5	66
Pittsburg, Ft. Wayne, and Chicago, for the quarter	21	- 46
Hartford and New Haven, for the guarter	8	66 -
Panama (and steamships) for the quarter	6	66

The Panama Company also distributes to the stockholders \$2.000 000 in stock, two shares being given to every holder of five shares.

BALTIMORE AND OHIO RAILROAD EXTENSIONS .-- Two very important railroad enterprises, in which the West is interested, are now under full headway. The one is the construction of a railroad from Washington to Point of Rocks, on the Baltimore and Ohio Railroad, near Harper's Ferry; and the other is the completion of the Pittsburg and Connellsville Railroad, between Pittsburg and Cumberland, the latter also a point on the Baltimore and Ohio Railroad, 178 miles west of Baltimore. The Point of Rocks road will be 40 or 50 miles long. It is 70 miles now from Baltimore to Point of Rocks, and 91 miles from Washington to Point of Rocks, by the present railroad. By the new road it will only be 40 or 50 miles to Point of Rocks from Washington. It is being built by the Baltimore and Ohio Railroad Company. The Pittsburg and Connellsville road is 148 miles long; 59 miles are completed and in operation between Pittsburg and Connellsville; the remaining 89 miles will be completed, it is hoped, in about a year. When these two links are completed, there will be an air-line railroad from Chicago to Washington, as follows : Chicago to Pittsburg, by Fort Wayne and Chicago road, 468 miles; Pittsburg to Cumberland. by Pitts-burg and Connellsville road, 148 miles; Cumberland to Washington, by Baltimore and Ohio and Point of Rocks road, 155 miles--total from Chicago to Washington, only 771 miles, or 71 miles shorter than the present shortest route by way of Harrisburg and Baltimore. The difference in time, however, will be still greater. It now requires 40 hours to go from Washington to Chicago By the new route, through trains can easily be run in 30 hours; and that will be only 25 miles per hour.

Life Insurance.

THE MANHATTAN LIFE INSUR-ANCE COMPANY. NOS. 156 AND 158 BROADWAY, N. Y.

Dividends Paid to Policyholders..... 750,000

From the great success of this Company, they are enabled to offer superior advantages to policy-holders. Life-policies are issued, payable in annual, or in one, five, or ten annual, installments; also, non-for-feiture endowment policies, payable in ten annual payments, which are paid at death, or on arriving at any particular age. Life insurance, as an investment, has no superior, as it has saved millions of dollars to the insured and thousands of families from ruin the insured, and thousands of families from ruin. Dividends are paid to policy-holders, thus enabling them to continue their policies, if otherwise unable to do so.

This favorable feature has been the means of saving many policies that would have been forfeited for want of means to continue them, and, in several in-stances, families, once wealthy, have thus been saved from utter ruin.

HENRY STOKES, Pres. C. Y. WEMPLE, Secretary J. S. HALSEY, Ass. Sec. S. N. STEEBINS, Actuary. ABRAM DUBOIS, Medical Examiner.
