The Chronicle.

THE COMMERCIAL AND FINANCIAL CHRONICLE is issued every Saturday morning by the publishers of Hunt's Merchants' Magazine with the latest news by mail and telegraph up to midnight of Friday. A DAILY BULLETIN is issued every morning with all the Commercial and Financial news of the previous day up to the hour of publication.

TERMS OF SUBSCRIPTION-PAYABLE IN ADVANCE.

(Chronicle Buildings,) 60 William Street, New York.

.

On Thursday last the only progress that was made in this measure was the eliminating of part of the foreign loan clause against the whole of which a very strong public sentiment has been directed from the first introduction of the measure. Mr. Morrill, from the Committee of Ways and Means, reported the amendments to his bill and the chances of its passage are no doubt improved in consequence.

The great objections to this measure, however, in the public mind lie undoubtedly against the irresponsible and unprecedented powers which it confers on the Secretary of the Treasury. If, in time of war, no such discretionary prerogatives were needed, why, it is asked, should they be proposed in time of peace.

Mr. Hulburd, in his admirable speech on Thursday, argued this and several other objections with lucid earnestness, and showed that the existing laws confer powers which will be found amply sufficient for all the negotiations required with a view to fund the floating debt, and withdraw, as fast as safety will permit, the redundant currency, which has been productive of such numerous mischiefs by inflating values, stimulating speculation, and deranging the entire financial machinery of the country.

We think, however, that neither of the two loan bills now before Congress fully meets the exigencies of the situation. What the country really expects Congress to do is to give stability to our finances by laying down a definite policy, and giving the assurance that it shall be carried out. This policy should provide for the payment of the mischievous and useless call loans now in the Treasury, and for the gradual withdrawal of a certain prescribed monthly amount of the greenback circulation by the only safe method which experience has proved-the converting of them into compound in terest notes. If these two points are settled, it is the opinion of well-informed financial authorities, that Congress may safely leave the Seven-thirties, and the other obligations of the Treasury, to take care of themselves until the next session. The large receipts from internal revenue, and the improving credit of the government at home and abroad, constitute a sufficient pledge and guarantee that we shall do better to pay our national obligations when due than needlessly to incommode the country by any attempt to pay them before they mature.

THE LOAN BILLS IN CONGRESS.

THE people are beginning to be somewhat discouraged at the procrastinating spirit exhibited by the House relative to certain momentous questions affecting the interests of commerce and trade. With the exception of the bonding bill, which yesterday received the signature of the President, almost nothing has been done during the current session to define the policy of the government or to remove that depressing and wearisome incertitude which checks business and prevents prudent men from venturing in any engagements or any enterprises except such as have the shortest possible time to mature.

The loan bill last week was passed over entirely, although the material interests of the country imperatively demand that some definite financial policy should be decided upon without delay in order that every man may accommodate his financial movements to the prospective exigencies which are soon to meet us.

THE PAYMENT OF INTEREST ON BANK DEPOSITS. SINCE the prodigious expansion of credits which our irredeemable paper money has developed in this country, the custom has become too general among our city banks of al-

lowing interest on the deposits of country banks payable on demand. This practice is, on many accounts, of very doubtful expediency; and is disapproved of by some of our most eminent financial men. Among other objections it is urged that by this means small banking corporations in the country are induced to accumulate heavier balances in New York than are required to provide for their current exchanges. And the obvious result is that they are tempted to weaken, in some cases, their home resources, which are unprofitable; in order that they may get interest on their city deposits. Undoubtedly the sound and safe policy for a country banker is to keep his city balances at no higher a point than is demanded by the claims of legitimate business. These balances form a part of the reserve required by law, which is expected to be kept unemployed and at instant call. The idea of making their reserve bear interest seems never to have entered, till recently, into the calculations of our banking institutions, who would no more have thought, in former times, of making a profit on the reserve than on the specie in their vaults. Whatever sum in excess of his wants is kept in New York by the country banker for the sake of interest, is really a demand loan; and must be subject to such risks as in time of panic or revulsion may be productive of grave anxiety or even worse trouble.

Notwithstanding these and other dangers incident to this objectionable system, there is reason to fear that it is rather on the increase; and this fact accounts in part for the accumulation of funds at the commercial centres which has often been cited as one prolific cause of sharp sudden turns in the loan market. When money is easy the city banker who has to pay interest on balances is compelled to keep his deposits constantly employed, and under the pressure of necessity he sometimes goes further than prudence would justify. Hence, when the legitimate channels of employment for capital are filled up, he is apt to be induced to make such loans or investments as would not tempt him were he exempt from the heavy charges connected with the payment of interest to his depositors.

The danger of this state of things is increased by the fact that this particular class of interest-bearing deposits is peculiarly sensitive to the least fluctuation in the money market-When capital is abundant and difficult to employ to advantage, these balances increase, and the city banker incurs the heaviest charge for interest; but let fear of stringency supervene, or loanable capital become scarce, and these balances are rapidly drawn down just at the very moment when the city banker could employ them to advantage and when he finds it most inconvenient to repay them. To such causes are to be attributed some of the severe symptoms which attend and give so spasmodic a character to most of the fluc-

unprofitable, but we rest our objections at present on the higher ground of safe banking, and of conservative financial management.

MR. SHERMAN AND THE CURRENCY.

"GOLD has been going down ever since the restoration of peace became certain, but how is it that the expenses of living are not going down too?" This is a very suggestive and frequent inquiry, and comes home to every man's business and family. The chief reason why general prices do not come down in proportion as gold declines is that gold has been depressed, not by natural causes, but by special forces made to act upon it for that purpose. No one can doubt, for instance, that the recent fall in gold was chiefly due to the heavy government sales of coin three weeks ago. Some fifteen millions of dollars were suddenly thrown on the market, at a time when, from the sharp turn in the foreign exchanges, the demand for gold was temporarily suspended, except for the small demand of customs duties. The price of gold fell under these circumstances, just as the price of any other commodity falls when, in face of a decreasing demand, the supply is suddenly increased, and a heavy amount pressed for sale. Now, what is there in a decline of gold produced in this way, which can reasonably be expected to act on prices in general, or to depress the cost of living? Every one knows that the inflation of prices is due to the inflation of our paper money. We may make gold or any other commodity overabundant in the market, and thus depress its price, while our paper money is equally inflated as before, and, therefore, equally depreciated. General prices will not be affected at all by our manipulations. The only way to lower prices to the specie standard is to raise the paper money to that standard. The paper dollar must be made equal to the dollar in coin, and the only known way of effectively doing this is to call in the redundant excessive issue of the paper dollars, till there are no more of them afloat than the business of the country requires on a specie standard.

But is the currency redundant? We are told that it is scarce in some parts of the country, however plentiful it may be in New York and in the other great central points of commercial activity. How can currency which is so scarce be said to be over-issued and redundant. This very easily solved difficulty puzzles many persons, and is sometimes urged by those who ought to know better. In financial science no principle is better established, or has received more uniform confirmation from facts, than that the value or purchasing power of paper money is regulated by the supply and demand. If 400 millions of dollars of currency are wanted for this country to do its business on a specie basis, and 800 millions are in forced circulation, the 800 millions will all be used, but with this certain consequence, that two dollars will do the work of one, and prices will be doubled. However, much currency is out, so long as it is not redeemable, it will all be kept active, and will tend to inflate prices. If three times or four times the normal amount is issued prices will be tripled or quadrupled. Each successive emission which is forced into the gorged current of the circulation, produces a responsive wave in the rising tide of prices; which, though not equally distributed over all parts of the country, or over all commodities, tends constantly to equilibrum according to the great law we have laid down. A redundant currency is not a currency of which a part only can be used, while the rest remains idle. All is used that is issued, and prices rise or fall in proportion as its volume is swelled and its value diluted.

tuations which have occurred in our money market during the past two years.

As we approach specie payments the wiser banking corporations in our country towns will do well to adopt the policy of keeping within narrower limits their city deposits; and of protecting themselves from probable trouble by holding an adequate reserve in their own vaults. It is hoped, indeed, that we shall reform our currency, fund our debt, and return to a specie standard without such revulsion as has invariably attended such a process in other countries. But nothing is more certain than that if financial panics and disasters should come, the chief sufferers among the country banks will be such as by having violated sound rules relative to their reserve have failed to take advantage of the safeguards which experience has shown to be the strongest protection against such disasters.

An easy calculation would show that to the city banker

for FRASER

It is, then, quite as likely for redundant paper money to be scarce as for a sound currency to be so. Nay, in pres. the payment of interest and taxes on country deposits is | ence of a depreciated money, the incessant oscillation and

323

derangement of values, the perturbation of public confidence, and the consequent wild movements of speculation, are peculiarly apt to cause irregular and eccentric movements in the distribution of the currency, making it shun some parts of the country and accumulate in more favored localities, to which it is drawn by a multitude of speculative perturbing attractions which, under such conditions, are successively evolved.

The redundancy of the currency being the cause of high prices, it is quite evident that so long as this redundancy continues we shall be disappointed if we hope to make any real progress towards a resumption of specie payments.

It is in vain for us to call upon the Secretary of the Treas. ury to exert the vast money power which has been confided to his hands for other purposes, and to use this power to put down gold or to repress speculation by some skilful strategy or some masterly manœuvres. The premium of gold may thus be controlled for a time; especially if the foreign exchanges are not unfavorable, but this remedy for high prices does not touch the real seat of the mischief. The malady lies in our paper money, and consists in the fact that there is too much of it afloat, that it has lost part of its purchasing power, and that consequently more of it is required to buy a given amount of any commodity the price of which is not tampered with, but is left free to find its level under the great general law of trade.

The only results which can be expected from such manip ulations as we have referred to are that, if they do no worse mischief, they develop a state of things in which our currency will buy less and less of the other commodities which the people want, but more and more of gold, which the people do not want. Our exports of breadstuffs and provisions consequently receive a severe check, and it is only the irre pressible foreign demand for our cotton and for our Govern ment bonds which prevents us from seeing more distinctly that all undue and artificial depression of the premium on gold is prejudicial to commerce, and constitutes a discrimination in favor of foreigners and against our own people.

We conclude, then, that one of the most mischievous financial fallacies of the day is this of supposing that the de. clining premium on gold, however produced, indicates ne cessarily a speedy return to specie payments, with an increase in the general purchasing power of greenbacks. If the depreciation of our currency were the only cause capable of acting on the price of gold, then, of course, the latter would be a precise measure of the former, and as gold went down the price of every commodity in the market would go down too. But it is well known that since the close of the war gold has been continually depressed by a number of forces which have no more influence to contract our paper money than had the recent sales of gold to which we have referred. It is surely high time that we should cease to trust to any such futile methods of reforming our currency and restoring it to par. In this point of view Mr. Sherman's resolution, offered in the Senate on Tuesday, is very unsatisfactory. It proposes virtually to forbid the Secretary of the Treasury to correct the redundancy of our paper money and declares that for twelve months the minimum amount of greenbacks and fractional currency shall never fall below \$420,000,000. The resolution does not raise up a barrier against further expansion. The Secretary would be left free to put out as much more currency as he chooses and can find law for. It is easy to see that such a regulation as this is unfavorable to lower prices of living. It tends to expand and not to contract the currency, and in Wall Street an active speculative movement is already beginning on the belief that it will be adopted as the basis of the policy of the Treasury for the current year.

THE CONSOLIDATION OF THE MISSOUBI STATE DEBT.

(Communicated.)

An act has passed both branches of the Legislature and has received the approval of the Governor of that State, which provides for the consolidation of all Missouri Bonds and the interest unpaid (since July 1, 1861) and accruing up to Jan. 1, 1868, amounting in the aggregate to \$30,000,-000 dollars. The holders of Missouri Bonds have thereby the privilege of exchanging the same and the unpaid coupons thereof, including those maturing up to Jan. 1, 1868, for a like amount in "consolidation bonds" payable thirty years after the 1st day of Jan. 1868, with coupons attached, payable simultaneously as follows: at 3 per cent for the first 4 years, at the rate of 4 per cent for the next 4 years, at 5 per cent for the next 4 years, at the rate of 6 per cent for the next 4 years and then at 7 per cent, 8 per cent, and 9 per cent, respectively each succeeding four years; making the average of interest six per cent on the consolidated debt, composed of principal and interest.

For the payment of the graduated interest and to provide for a sinking fund no reliance is placed on the assets of the State in its railroads, or on its claims upon the National Government, although all the revenues from these sources are to be placed to the credit of the sinking fund. A tax of two and a half mills on all real estate and other property is the only resource upon which the plan depends. This tax, which the people of that State have, by a majority of many thousands, made a part of its fundamental law, will be in itself ample for the liquidation of the interest under this plan.

It is a remarkable fact that the people of Missouri have shown, even under the most adverse circumstances, a high regard for their credit, and none of its public men ever dared for a moment to propose or advocate repudiation. It was against the will of a majority of the people that the State was so deeply involved in debt by its Railroad friends. At the outbreak of the war, when for the first time the State tailed to pay the interest at maturity, the State Convention which deposed Governor Claiborne Jackson declared by several resolutions its opposition to repudiation. Governor Fletcher, well knowing the sentiment of the people on this point, said in his Inaugural Message, "Let our undertakings be such as become a people whose honesty is unshaken by misfortune, and who are resolved to pay their debt." By a unanimous vote of both houses the General Assembly declared it their "fixed and unalterable purpose that the faith of the State shall be preserved with all her creditors;" and a committee was appointed which now presented this graduated interest plan as the result of their labors. The State Convention which met in 1865 and framed the new constitution, reflected the will of the people of Missouri in this respect by embodying in the fundamental law the proviso that "the credit of the State shall not be given or loaned in aid of any person, association, or corporation; nor shall the State hereafter become a stockholder in any corporation," &c.; also by prohibiting hereafter "the release of the lien held by the State upon any railroad." But, however honest and ardent the desire, its accomplishment presented most perplexing difficulties. While the act cumulation of unpaid interest increased the debt to an alarm ing amount, a large portion of the State was so depopulated and devastated by the war that many counties had to be relieved from paying any taxes. The war debt was very heavy, and had to be treated as a preferred debt. More than one-half of all the State taxes were receivable in socalled Union Military Bonds, and therefore not available for any other purpose. No revenue was received, nor could any be expected from the principal railroads of the State-the Pacific and North Missouri Railroad-nor could these be

sold. By special legislation, to secure their completion, these roads had been relieved from forfeiture and payment of interest for many years to come. The other, less valuable and unfinished roads, the sale of which was determined upon, will, in view of the condition of their early comple tion by the purchaser, bring but a trifling amount. The rate of taxation was very heavy already, and its increase would have been detrimental to immigration and the influx of capital into this State; nor would even a further increase of taxation, if practicable, have been sufficient to meet the interest. These considerations and the influences brought to bear by those interested in the decline of Missouri bonds, had almost determined the Committee to report in favor of deferring action, when Mr. Isidor Bush presented a plan for a gradual redemption of the debt, based on the European Premium Loan System.

Mr. Bush proved conclusively that this system was well adapted to the peculiar circumstances of Missouri, and that any rational and practical plan for paying the heavy debt of that State must be based on its gradual and certain increase in population, production and wealth; and thus his plan gained many warm friends and advocates. The prejudice against anything in the least resembling a lottery is so strong, however, that it could not be adopted; but it led to the adoption of the graduated interest plan. The increase of taxable property on which its calculations are based are so reasonable that they do not admit of doubt. Most probably the progressive wealth of Missouri will largely exceed the estimates of Mr. Bush, adopted by the Committee; in fact, the estimates of the State Auditor and of other authorities are far above those figures. Now when we consider that the reimbursement of that State by the National Government for war expenses, and the sale of some of her railroads, as well as of the stock owned by the State in the Bank of Missouri, will reduce the present debt by several million dollars, and that consequently the consolidation-bonds to be issued will not reach \$30,000,000, the prompt payment of the interest and the funding of the principal are most amply secured, and can be fully relied upon. It is true the State proposes to pay at first three per cent interest only; but paying that interest on both principal and accumulated interest—it amounts in reality to over $4\frac{1}{4}$ per cent. In other words, the present bondholders get for each bond of \$1,000 new consolidation bonds to the amount of \$1,420, bearing a rate of interest gradually increasing from three to nine per cent.

The law further provides that the sinking fund, into which all sums received by the State from her railroads and all surplus, after paying interest, will flow, shall be invested in these consolidation bonds, and shall not be applied to any other purpose. Railroad. The new line from Alton to East St. Louis is mainly owned by the Chicago & Alton Railroad Company, which holds 6,377 out of a total of 8,000 shares, representing its capital. The Joliet & Chicago Railroad is held under a perpetual lease (with an option of purchase), for which the company pays 8 per cent on \$500,000 bonds and 7 per cent on \$1,500,000 stock, which represent the cost of the road. The cost of the whole line as represented by stocks and bonds is now as follows:

	C .
Chicago & Alton Railroad, stock	\$4,208,600

This will not only continually reduce the amount of Missouri bonds outstanding, but may perhaps improve their market value, the State herself being in the market to buy up such bonds.

ANALYSES OF RAILROAD REPORTS. NO. 17.

CHICAGO AND ALTON RAILROAD.

The railroad line, of which the Chicago & Alton Railroad forms the greater length, extends in a very direct line between the cities of Chicago & St. Louis, and is composed as follows:

Chicago & Alton Railroad—Joliet to Alton Leased : Alton & St. Louis Railroad	23 miles.	20 miles.
" Joliet & Chicago Railroad	37	60 "
Total length of line operated	2	30 miles.

Latest Monetary and Commercial English News.

[From our own Correspondent.]

LONDON, Saturday, Feb. 28, 1866.

The Board of Trade returns for the year 1865 have at length been published, and the statement is most satisfactory. The total value of exports of British and Irish produce and manufactures was £165,862,-402, against £160,449,053 in 1864, and £146,602,342 in 1863. There was, therefore, an increase in the value of exports, so far as British and Irish produce and manufactures were concerned, of £5,420,000. The computed real value of the principal imports in the first eleven months was £180,820,357, against £197,448,426 in 1864, and £173,575,298 in 1862; but the market price of some of the leading articles of import—more especially cotton—was lower in 1865 than in 1864, and the quantities imported were much greater. In the eleven months ending Nov. 30, 1865, the value of the cotton imported was £49,294,092, against £66,991,418 in 1864, or a decrease of £17,700,000; the quantities imported, however, in the whole year, were 8,731,949 cwts., against 7,975,935 cwts. in 1864, being an increase of about 750,000 cwts.,

According to these returns, the value of our export trade to America in British and Irish produce and manufactures, last year, was nearly five millions sterling greater than in 1864, and nearly six millions in excess of 1863. The figures stand thus:

structive. They show that our receipts from American ports were increased to the extent of more than one million cwts, whilst there was a falling off in the import from Indian ports of 500,000 cwts. Brazil and Egypt show an increase, and there is also an augmentation in the receipts from Mexico; but the latter are probably American produce. On the other hand, there is a diminution of about 120,000 in the import from the Bahamas, the result of the reopening of the Southern ports. Taking the bulk of the import from the Bahamas, Bermuda, and Mexico to be American cotton, the total import of American produce last year was 1,700,000 cwts., against 730,000 cwts. in 1864, or an increase of nearly 1,000,000 cwts.

The statement of imports is as follows:

IMPORTS OF COTTON INTO THE UNITED KINGDOM.

Ω.	1863.	1864.	1865.
From United Statescwts.	57,000	126,322	1,212,790

Total	2,154,933	2,184,842	2,704,544

The total import of wheat in 1865 was 21,089,140 cwts. against 23,-318,726 cwts. in 1864, and 24,573,506 cwts. in 1863. The decrease, last year, therefore, notwithstanding that there was a falling off in the receipts from the United States of nearly 7,000,000 cwts., was confined to 2,300,000 cwts. As will be seen from the accompanying statement, the deficiency in the import from your side, has been made up in some degree, by augmented receipts from Russia, Prussia and France. Of flour, France shows an increase of 2,800,000 cwts., whilst there is a decrease in the import from the United States of 1,500,000 cwts. The following is the statement:

There has been a fair demand for discount, and as the exchanges are less favorable, doubts are entertained as to the policy of a further reduction in the rate to morrow. In the open market, the quotation is about one-quarter per cent below that of the Bank, but as the bills maturing on the 4th of the month will have to be met this week, the requirements of the commercial community will be considerable. though not equal to former occasions. The following are the rates in the open market:

	Per Cent.		Per Cent.
30 days' bills	6¾@-	4 nonths' bills 6 do do	7 to
60 do	6¾@	6 V do do	6% to 7%
3 months' bills	6%@-	1	

The discount houses allow 5 per cent for money deposited with them on call. 51 per cent if with seven, and 6 per cent if with 14 pays' notice of withdrawal.

On the Continent, no material changes have taken place during the present week in the rates of discount. The following are the quotations at the leading cities :

	Bank rate.	Open market. % c.		Bank rate.	market.
At Paris Vienna Berlin	. 4	334-4 5 6	Turin Brussels Madrid	5	₩ c. 5 5 Uncertain.

Literature.

Principles of Education, drawn from Nature and Revelation, and applied to Female Education in the Upper Classes. By the author of "Amy Herbert," and other tales, etc. Two volumes in one. NEW YORK; D. APPLETON & Co, 1866.

In the preface Miss Sewell declares that the volume is the result, not of theory, but of experience, and the subject is treated in its moral rather than economical aspects. Accordingly, she views education, not as a mere training for a useful life in the world, but with reference to its harmony with the teaching of God in Nature and in Revelation. It is defined to be "the guiding, or leading of the young mind in the way which will best enable it to obey the commandments of God."

The "systematic principle" of education, however good, cannot possibly be good for all. The mode of dealing in every case must be a subject of separate study. The object is the carrying out o God's will for the individual, the purpose of which is hidden from us in His eternal counsels; but the direction in which we are to work is pointed out to us by the peculiar endowments of character and intellect with which every person is gifted.

Bacon and Hama.

The high price of meat attracted increased supplies of beasts, sheep calves and pigs from continental ports, and stock was received during the year from nearly every country in Europe. A large proportion, however, was of inferior quality; consequently, the weight of meat imported was not sufficient to have any permanent influence in reducing prices-the total import being quite inadequate to feed London, with a population of about three millions, for more than six months. Hence, the remaining twenty-four millions had to look to home productions for their necessary supplies of butcher's meat. The imports of cattle in each of the last three years were :

· · · · · · · · · · · · · · · · · · ·	1863.	1864.	1865.

Owing to unfavorable rumors from various parts of Europe--from the Danube, in reference to the Danubian Principalities, and from Germany in reference to the altitude of Prussia respecting the Duchies of Schliswig and Holstein, the market for English securities has been dull, and the buoyancy noticeable last week has been entirely lost. Foreign securities, however, with few exceptions, the chief of which concerns the Danubian Principalitie's loan, have been firmer; and other departments of the Stock Exchange have shown a tolerably healthy tone. done in training teachers for their work.

The author treats in detail of the necessity of teaching obedience. manifesting justice in family government, the exercise of love. the utility and importance of reproof, advice, confidence, respect, truth, etc.; but the chapters on instruction in schools, governesses in families, and the training of governesses, will attract special attention, which is eminently deserved.

Training schools are suggested for national school mistresses, at which young governesses, while studying themselves, might be practically taught how to make children study. Thus they would acquire experience without risk, and be taught how to guard against their own faults. A great element in the life of one who has to teach others, is the feeling that she can govern judiciously and instruct with interest. We are gratified to be able to remark that in this country at many of our normal schools, somewhat of this is

CHRONICLE. THE

March 17, 1866.]

Let a foundation of obedience and self-discipline be laid in early childhood and freedom may be given in youth; and so make a child exact and perfect in its lessons when instruction begins, and as time goes on the habit of exact representation may be, in a great measure, laid aside, yet not entirely, even as obedience and external restraint may never wholly be given up. The exercise of memory should always be continued in some form.

The chapters on Love and Friendship are admirable for their practical sense. A perusual of this book by those having the care of the young cannot fail to be profitable.

Spenser's Poem, entitled Colin Clout's come home again, explained; with remarks upon the Amoretti Sonnets, Gc. By the author of "Remarks on the Sonnets of Shakspeare. NEW YORK : Published by JAMES MILLER.

The theory upon which Gen. Hitchcock bases his ingenious exposition makes the poetic gift a spiritual rather than an intellectual endowment, and considers the amatory declarations of the person referred to as relating to the interior burning desire to know and possess the Truth. The poetic Arcadia is the spiritual world. Bulwer says as much in "Zannoi" in these words-" The artist calls it the Ideal ; the priest calls it Faith." Our author remarks accordingly: "In keeping with the very plain doctrine of the poem of Colin Clouts in honor of Queen Cynthia, we must be very unwilling to be convinced, or we must see that Spenser's Love was not a woman, except as she was the image of an immortal Beauty which claimed all of his devotion, but which was of such a nature that he knew the world in general would not understand if he wrote openly about it. Hence his purpose of writing in secret, that is, in hermetic symbolism, which should be obscure to the world in general, but would be understood by those who belonged to the class called lovers-lovers of the Divine Beauty figured by so many poets as a lady, though seen also in man."

According to this hypothesis, the Divina Commedia, Gierusolima Liberata, and even the Iliad, Odyssey and Æneid, are allegories or parables, having a deep internal sense, which only those can perceive who "have eyes to see." The theory is plausible, and its application to the poems of Spenser and Shakspeare, so far as we can see, is without halting or incongruity. How large a part of our reading public are willing to give up the classical idea for the religious, and accept their conclusions, will not be difficult to estimate. But every thoughtful person can peruse this work with profit.

COMMERCIAL AND MISCELLANEOUS NEWS.

IMPORTS AND EXPORTS FOR THE WEEK .- The imports and exports the past week have not been unusually large. A very important item in the exports for this week is cotton, as may be seen from our summary of articles exported as given in our Commercial Epitome. The following are the imports at New York for the week ending (for dry-goods) March 8, and for the week ending (for general merchandise) March 7:

BONDED GOODS-EXTENDING TIME FOR WITHDRAWAL.-The following bill, extending the time for the withdrawal of goods from the public stores and bonded warehouses, has just passed both houses of Congress and received the signature of the President :

SECTION 1. That on and after the passage of this act, and until the 1st day of May, 1866, any goods, wares or merchandise under bond in any public or private bonded warehouse, upon which the duties are unpaid, may be withdrawn for consumption, and the bonds cancelled, on the payment of the duties and charges prescribed by law; and any goods, wares or merchandise deposited in bond in any public or private bonded warehouse on and after the 1st day of May aforesaid, and all goods, wares or merchandise remaining in warehouse under bond on said 1st day of May may be withdrawn for consumption within one year from the date of the original importation, on payment of the duties and charges to which they may be subject by law at the time of such withdrawal, and after the expiration of one year from the date of original importation; and until the expiration of three years from said date any goods, wares or merchandise in bond, as aforesaid, may be withdrawn for consumption on payment of the duties assessed on the original entry and charges and an additional duty of ten per centum of the amount of such duties and charges.

SEC. 2. And be it further enacted, That neither this nor any other act shall operate to prevent the exportation of bonded goods, wares or merchandise, for warehouse, within three years from the date of original importation, nor their transportation in bond from the port into which they were originally imported to any other port or ports for the purpose of exportation, and all acts and parts of acts incon stent v

COMPTROLLER CLARR'S LETTER TO SECRETARY MCCULLOCH-EXPLAN-ATION OF MR. HOOPER ON BEHALF OF SECRETARY MCCulloch .- We published a letter written by Comptroller Clark, last week, respecting the loan bills now before Congress. Below will be found another letter, addressed to Secretary McCulloch, with regard to the last debt statement, &c.. and also an explanation on behalf of Mr. McCulloch by Mr Hooper of the alleged inaccuracies :

TREASURY DEPARTMENT,

TREASURY DEPARTMENT, OFFICE OF COMPTROLLER OF THE CURRENCY, WASHINGTON, March 10, 1866. DEAR SIR: Your letter of yesterday is received. My letter of the 24th ult., in answer to yours of the same date, was so altered before it was published as not to indicate to whom it was addressed, and had no other object, and I think had no other effect, than to simply express my objection to your loan bill. I did not see any impropriety in my giving publicity to my discont from did not see any impropriety in my giving publicity to my dissent from your views of public financial policy.

In accepting the office I hold, I did not surrender my independence of judg-ment, nor my freedom of action. I have made no concealment from you, or any one else, of my views in regard to the bill from the time it was first pro-

any one else, of my views in regard to the bill from the time it was first pro-posed by you. After the lapse of twelve days, you notice my letter to you of the 24th of February, and quote my statement therein, that I suppose there must be, at that time, including deposits in the National Banks, at least \$150,000,000 in the Treasury of the United States. To this you now reply that the actual amount of money, on the 24th, in the Treasury and in national depositories to the credit of the government, exclusive of special gold deposits, was \$111,149,632 29. I cannot see any valid reason for your making a distinction between gold deposits and deposits made in currency. Both alike are stated in your monthly reports as liabilities and assets, and you have the right by law to use a portion of the as liabilities and assets, and you have the right by law to use a portion of the

gold, as you can safely use but a portion of the currency deposits, because you must be prepared, by having a reserve on hand, to respond to the calls of deposi-tors. In this view of the case there is no reason why you should not add your gold deposits to the \$111,149,632 29. The special gold deposits, as appears by your statement of the first day of this month, was \$12,627,600. This, added to the amount that you state was in the Treasury, &c., Feb. 24th, will make \$123,-777,532 29. Giving you the benefit, as I have, of gold deposits swelling the ag-gregate of money on hand, I now unhesitatingly state that your statement just made to me, as well as your published statement showing the condition of the Treasury and the public debt on the first of this month, is inexcusably errone-ous. ous

You state the amount of coin in the Treasury to be \$55,736,162 12; currency. \$60,282,767 12; total, \$116,018,959 24. Your monthly statement, made the first of this month, shows that you have retired \$6,466,550 of compound interest and United States Legal Tender Notes. This amount must have been paid be-fore the date of my letter, and as there is no law authorizing you to retire any of the compound interest notes in any other way than by converting them into 5-20 honds and no law authorizing the retirement of any of the United States 5-20 bonds, and no law authorizing the retirement of any of the United States legal tender notes in any other way than by converting them into compound interest notes, and no appropriation or provision made by Congress other than that now mentioned, I cannot understand why these compound interest notes and United States notes should not be counted and included as currency on hand. You have just as much right to reissue them as to pay out any other covernment notes and no right or suther its to cancel them government notes, and no right or authority to cancel them.

It also appears by your last monthly statement that you have sold, during the month, without any authority of law, \$10,672,700 of 5-20 bonds, and purchased \$11,956,000 of 7-30 notes, making your purchase \$1,283,300 more than your sale. I will remark, in passing, that while you have the right to convert 7-30 notes into 5-20 bonds as the former mature, you have no right whatever to buy or sell them them.

You have omitted entirely from your statement of the first of March, as you have uniformly omitted from your monthly statements for several months past, the amount of money on deposit in the National Banks. The amount so held on the 24th of February (the date of my letter) must have been about \$28,000,000; taking, therefore, the amount stated by you as on hand on the first of March, in coin and currency, \$116,018,954 24, add the amount of United States and com-pound interest notes retired \$6 464 \$50 and Seven thirty potce purplesed over pound interest notes retired, \$6,464,850, and Seven-thirty notes purchased, over the amount of Five-twenty bonds sold, \$1,283,300, and also the amount of deposit in National Banks, \$28,000,000, you must have had on hand a total amount of \$151,768,944 24.

Add to this the premium on the balance of the coin on hand, after deducting the amount of coin to be returned to depositors, say \$15,000,000, making the total currency value of money in your custody on the first of March, instant, \$166,768,944 24. This is manifest from your own showing in your published statement of March 1. excepting the item of deposits in National Banks. The report of the banks will show that I have not overstated the amount of those deposits. I will now state the amount of money that I suppose was in the Treasury and on deposit in the banks as set forth in my letter of the 24th of February, deriving my knowledge from other sources than exhibits from your department. The regular report of the Assistant Treasurer in New York, published within three or four days after the date of my letter, shows that the amount of money on hand in his office at that time, was over \$109,000,000. It is fair to add to this amount the compound interest and United States notes said to have been received, as they must have been paid for before that date, \$6,466,850. I estimate the amount in the Treasury in Washington, and in the hands of the Assistant Treasurers in Baltimore, Philadelphia, and Boston, in the Pacific States and the aleven Southern States and in the version decontarious of the states.

Assistant Treasurers in Baltimore, Finladelphia, and Boston, in the Pacific States and the eleven Southern States, and in the various depositories in other States and from banks, at the very moderate sum of \$12,000,000. The currency value of the gold over its reported value, \$15,000,000. Total, \$170.466,850. It seems to me to be apparent that this amount, which I supposed to be available in the Treasury on the 26th of February, is far short of reality, and exceeds what you declared it to be in your last monthly statement by more than \$54,000,000. I will add that I can show to the satisfaction of any one, that maintee of your monthly reports for the last faw monthe has shown within than \$54,000,000. I will add that I can show to the satisfaction of any one, that neither of your monthly reports for the last few months has shown within \$50,000,000 the amount of money in the Treasury, or on deposit, or in national depositories. An accurate statement of the condition of the Treasury is not merely a matter of interest to the public, it is of grand consequence that Con-gress should be correctly informed as to the actual resources of the government, that it may legislate intelligently and appropriate wisely. I will call your atten-tion to another matter in your annual report. You state that you will probably require \$112,000,000 more than your current receipts to carry you through the remainder of the present fiscal year. I regret to differ with you so widely as I do in regard to this estimate. I am of the opinion that with an economical ad-ministration of your resources, you will have a surplus on hand at the close of the fiscal year ending June 30, 1866, of nearly, or fully \$200,000,000, instead of being short \$112,000,000, the difference between my estimate and yours, and more being short \$112,000,000, the difference between my estimate and yours, and more than enough for the legitimate/requirements of the government for the entire next fiscal year commencing the 1st day of July next. It is only from a sense of duty I have gone into this discussion to which you invited me; and as there are various and contradictory statements in regard to the difference between us of views and estimates. I feel that no harm will be done, and indeed that it is proper to make public this letter. If I have erred in any of my statements or estimates, I shall be glad to be cor-

rected, and to have the public advised of the correction. Very respectfully yours.

FREEMAN CLARK.

In answer to the above letter we have the following which we take

from the proceedings of the House of Representatives on Thursday:

Mr. Hulburd addressed the House. He referred, on the opening of his remr. Hubburn addressed the House. He referred, on the opening of his re-marks, to a letter from the Comptroller of the Currency to the Secretary of the Treasury, dated March 10, showing serious errors in the report of the Secretary as to the money on hand on the 1st of March. The to al amount returned by the Secretary was \$106,018,959. The amount which the Comptroller claims as being in the question of the Secretary on the 1st of March. v of the Secretary on the 1st of Marc istr **56,76**S, ing a discrepancy between the two statements of over fifty millions. Mr. Hulburd desired to have from the Chairman of the Committee on Banking 14, mak-

proved the bill declaratory of the meaning of certain parts of the interna revenue act of June 30, 1864. By this, the 120th section applies the duty of five per centum to all dividends in scrip or money, wherever payable, and all stockholders, policy holders, depositors or parties whomsoever, including non-residents, whether citizens or aliens. The 122d section, as amended, declares stockholders in any railroad, canal, navigation, turnpike, or slack water company, to mean all persons or parties whatever that are or may be stockholders, including non-residents, whether citizens or aliens ; and the words "ail such interest, or coupon dividends or profits, whenever the same shall be payable." are declared to apply to all such interest or coupon dividends or profits whenever the same are or may be payable; and to whatsoever party or persons the same are or may be payable, including non-residents, whether citizens or aliens. Whenever the rates and amounts contained in the lists and returns shall be stated in coined money, it is made the duty of the assessor receiving the same to reduce such rates and amounts to their equivalent in legal tender currency according to the value of the coined money in the currency at the time when and place where the lists or returns are receivable, and which value the assessor shall determine. The former part of this new law is to reach a large class of persons who have heretofore been exempt from the tax, and the latter to meet cases where persons have made their returns according to a specie instead of a paper basis.

THE ENGLISH BANK CHARTER ACT OF 1844 .-- It has been confident ly expected that the English Bank Act would be discussed, and probably modified at this session of Parliament. The following extract from the debates in the House of Commons of Feb. 14, would indicate that no change is to be made :

"Mr. Samuelson asked the Chancellor of the Exchequer whether he intended, duing the present session, to introduce an amendment of the Bank Charter Act of 1844, enabling the Bank of England to increase its i sues against securities, beyond the amount to which they are at present limited by that Act.

The Chancellor of Exchequer, (Mr. Gladstone) said that, looking at the prospect of public business, he was very doubtfal, or more than doubtful, whether it would be in the power of the government to make any proposal with regard to the difficult subject of the issue of bank notes during the present session. But, with regard to the particular question of the honorable member, if it is implied whether the government intended to make the Bank of England to resume the discretionary system which existed before the Act of 1844, he was bound not to limit his answer to the present sesssion, but to say that the government would not be disposed, either during the present or any future session, to introduce such a measure." (Hear, hear.)

Years. 1861 1862. 1863. 1864	Steam, No. 295 295 305 305	Sail. No. 232 543 952 954	Total. No. 527 838 1,257 1,259	Tonnage. Tons. 276,689 359,612 507,434 571,438
1865	371	602	973	409,062

The progress of the Lake Superior trade will be shown by the amount of tolls received from 1855 to 1865, inclusive, the rate of toll being 6 cents per ton on vessels tonnage :

Years.		Tolls.
1855		\$16.672 16
1856	7,594 84 1862	21,607 17
1857		30,574 44
1858	10,883 87 1864	34,287 31
1859	16,941 84 1865	22,339 60
1860	24,777 82	

The Superintendent says, in his report to the Governor, that the reports made by vessels are imperfect, and that the statement given appreximates very nearly to the actual amounts of the several articles. But this imperfect list represents a commerce of more than \$10,000,000 in value, while the trade on the opening of the canal in 1855 was quite small. Lake Superior will, before ten years are past, have a yearly trade of more than \$20,000,000 in value.

and Currency an explanation of this discrepancy.

Mr. Hooper (Mass.,) in the absence of the Chairman of the Committee, rose and gave the explanation asked. The Secretary of the Treasury had represented the amount of commin the Treasury, on the 1st of March, as \$55,000,000, and of currency, \$60,000,000, making a total of \$115,000,000. The letter to which the and that the Secretary had omitted to include the amount deposited in national banks, and other items, amounting together to more than \$50,000,000. The Combanks, and other items, amounting together to more than \$50,000,000. The Com-mittee of Ways and Means having seen that letter, had appointed a sub-com-mittee to ascertain whether there was any foundation for the statement; that the sub-committee had learned that the amount of money in the National Banks had been included in the Secretary's calculation, and had made a part of the \$115,000,000 reported by the Secretary. Therefore, the Comptroller in adding that sum of \$28,000.000 in the National Banks was mistaken, as that sum had elready been included. The Comptroller had further stated that there was an already been included. The Comptroller had further stated that there was an amount of United States notes that had been retired, but which the Secretary should not have retired, but the fact was that they were retired. He would not now go into the question whether the Secretary had the authority to retire them. It had been done and, therefore, that anount was not in the Treasury. The Comptroller had then added a sum of 1,300,000 for the difference bet seen the amount of Seven-thirties purchashed and of Five-twenty bonds sold, saying that that money should be in the Treasury, also because the Secretary had no authority to make that disposition of the bonds, but the fact was that that disposition of the bonds, but the fact was that that disposed by the reserve the the mount of the secret between the the mount of the secret between the the mount of the bonds. sition had been made, and therefore that amount was not in the Treasury. The Comptroller had then added \$15,000,000 for the value of gold beyond currency; that is, if the Secretary undertook to sell his gold he would get for premiums on it \$15,000,000. The fact was that the coin had not been sold, and therefore the amount of premium could not be in the Treasury; there was therefore no reason to suppose that the monthly statement of the Secretary was not entirely accurate. The result of the investigation made by the sub-committee was \$115,000,000 was the correct amount in the Treasury on the first of March. The result of the investigation made by the sub-committee was that

FRIDAY, March 16, 1866, P. M.

THE MONEY MARKET.-The prevailing tendency in monetary affairs has been toward increased ease. The prevailing inactivity of business throws a large amount of surplus funds into the banks and the hands of private bankers; beside which the condition of exchanges with the interior is wholly in favor of New York, and a considerable amount of currency is steadily flowing in this direction. The result of this increase of surplus funds has been a decline in the rate of interest. The banks have reduced their rate on call loans generally to six per cent; while private firms are willing to lend large amounts at five per cent. The inability of private bankers to employ their tunds at other than five per cent on demand loans, naturally increases the demand for business paper; but, as the supply of bills is large, there has been no important reduction in the rate of discount. Prime bills may perhaps be quoted $\frac{1}{2}$ per cent lower than last week; at present the minimum rate is 7 per cent on the best names; but there are large lines of choice names held firmly at $6\frac{1}{2}$ per cent, though without finding buyers. So long as the banks maintain the rate at 7 per cent, the rate among brokers is not likely to go below that point. Buyers of paper exercise a close discrimination respecting names, and paper ranking below "prime" is difficult of sale. The declining ten_ dency of prices in the dry goods trade makes it difficult to negotiate a large amount of jobbers' paper, which in ordinary times has passed freely at moderate rates. The large

tion of the short obligations into a 5 per cent bond; and this naturally strengthens the price of Five-twenties, and consequently of Seven-thirties, which have the privilege of conversion into Five-twenties. As usual, the approach of the payment of the coupons upon the Five-twenty bonds has the the effect of strengthening the price, holders being less willing to part with the bonds when within six weeks, or possibly a shorter period, they will receive three per cent in gold upon them.

Five twenties have advanced during the week $\frac{1}{2}@_{3}^{s}$. Tenforties remain stationary and dull. The first series Seventhirties stand at par; and the second and third at 997, the advance on both the latter series being $\frac{s}{3}$. Certificates of Indebtedness are scarce, and quoted at 99 $\frac{1}{3}$. It has been supposed that the Government has been a buyer of those obligations during the week; but we are unable to ascertain such to be the fact.

The following are the closing quotations for the leading Government Securities, compared with those of previous weeks:

U. S. 6's, 1881 toup. U. S. 5-20's, 1862 coupons. U. S. 5-20's, 1864 " U. S. 5-20's, 1865 " U. S. 10-40's, " U. S. 7-30's 1st series. U. S. 7-30's 2d Series U. S. 7-30's 3rd series. U. RAILROAD AND MISCELLANEOUS SECURITIES .--- The stock market has been stimulated by the operations of strong cliques for an advance in prices. Several of the leading stocks have been thus manipulated, including Michigan Southern, Reading, Cleveland and Pittsburg, New York Central, and Hudson River. The operations of these combinations have been supported by a considerable late outstanding "short" interest, which has been very generally covered during the week. Fresh sellers options, however, have been put out freely, in anticipation of a downward reaction, when the current movements have reached their climax. The outside public take comparatively little interest in stock movements, and the current speculation is a game chiefly between the brokers. The chief support to Michigan Southern has been the statement of the operations of the road, showing a net surplus of earnings for the first eleven months of the fisal year of \$880,000. This unexpectedly favorable exhibit has tended to improve the tone of the market generally. New York Central has advanced $1\frac{3}{4}$, upon an anticipation that the existing legal restrictions upon the passenger fares will be repealed by the legislature.

The miscellaneous list has sympathised with the improvement in railroads. Cumberland coal has advanced $\frac{4}{3}$; Quicksilver $\frac{1}{2}$; Mariposa $\frac{3}{4}$. Reports from Canton company have started an active speculation in the stock, under which the price has advanced $4\frac{3}{4}$.

auction sales of dry goods cause an excessive supply of auctioneers' paper, which is current mostly at 9@10 per cent. Produce commission paper is scarce at 8@10 per cent.

UNITED STATES SECURITIES.—Governments have been in very active demand during the week. The feeling of insecurity, in connection with business enterprises, upon a declining market, has to a certain extent a tendency to divert capital into this class of investments, as affording high interest in connection with the best security; and to this the upward tendency in National securities appears to be partially due. At the same time, the growth of confidence in the credit of the Government naturally aids the upward movement in prices. An idea prevails in some quarters that an attempt will be made by the Treasury to fund a por-

Mining and petroleum stocks have been very active, and prices have advanced materially. The improved processes of separating gold ores has so largely enhanced the value of gold properties that most of the gold stock are now worth 50@75 per cent more than a few weeks ago; and there appears to be a *bona fide* prospect of many of the companies paying good dividends.

The following are the closing quotations for leading stocks compared with those of previous weeks :

FOREIGN EXCHANGE.—The rates for foreign bills have declined steadily during the week, and transactions have been limited. The increased shipments of cotton have augmented the supply of bills on London and Paris, and the rates have become again weak and unsettled for that class of bills. New York sterling produce bills are very scarce, and bring $106\frac{3}{4}@107\frac{1}{2}$.

The following are the closing quotations for the several classes of foreign bills, compared with those of the three last weeks:

Tondon Commil	Feb. 23,	March 2.	March
London Comm'l do bkrs'long	$107 @108 \\ 108\% @108\%$	107 @108	197 @1

THE GOLD MARKET.—On Monday gold took an upward bound to 132, partially as the result of large transactions, supposed to be intended to strengthen the stock market, and partially from purchases to cover the sales of "short" operators who had failed upon their contracts. The price, however, subsequently declined $1\frac{1}{2}$, and has since fluctuated between $129\frac{1}{2}$ and $130\frac{1}{2}$, with considerable speculative activity.

The prevailing tone of the market favors an upward movement, it being supposed that before the May Five-twenty coupons fall due there will be a scarcity of gold; for it is understood to be the policy of the Treasury not to sell gold at the present low premium.

FRASE

NEW YORK CITY BANKS.—The following statement shows the condition of the Associated Banks of the City of New York, for the week ending with the commencement of business on March 10, 1866:

NATIONAL BANKS .- The Second National Bank at Galesburg, Ill., is the only additional depository designated for public money by the Secretary of the Treasury during last week. The Merchants' National Bank of Savannah, Ga., with a capital of \$50,000, completed its organization during the week. Six additional National Banks, mainly in Southern States, have been authorized, with an aggregate capital of \$750,000. One of these, at least, organized without circulation, and the largest one gets circulation on but one-third of its capital. Number of National Banks authorized during the week, 7; previously, 1,630; total number, 1,637. Cir-culation issued to National Banks during the week, \$2,123,-960; previously, \$258,432,790; total, \$260,556,750.

The following comparison shows the progress of the national banks, in respect to number, capital and circulation from Jan. 6, 1866 :

Date.	Banks.	Capital.	Circulation.

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, March 16, 1866.

The temper of the business community has been thoroughly spoiled by the late decline and considerable fluctuations in gold, and the severe disappointments to trade which March has brought. It is very difficult to sell anything at a profit. It is almost universally true that a concession of 10 per cent would be necessary if sales were pressed. Holders are looking to Congress for some measure of relief in stopping the decline in gold; and upon recent action there is less disposition to give way further on imported goods; but in domestic produce the desire to realize is shown in every way short of absolute panic.

Cotton is an example of the feverish tone of trade. Nearly every day the past week it has varied one or two cents per pound. Breadstuffs will well illustrate the desire to realize. With very reduced stocks of sound flours and wheat, and no prospect of an immediate increase of supplies, prices have been barely supported, and the close is dull.

Provisions have been materially influenced by English orders for Bacon and Lard. In the face of a decline in gold these two articles advanced early in the week, and business has been large at 143c@15c for Cumberland Bacon, 18c for long cut hams, and 191c for prime Lard. The decline in Pork has been partially stayed through the influence of orders, although Mess Pork can have no relations with the British market, unless, in case of a Fenian war, there should be an army demand. Beef, Butter and Cheese have been firm,-the former being taken moderately for export. The country can spare but a very moderate quantity of provisions for export. The stocks of hog products are just now at their highest figures; but there is no great accumulation anywhere except in Mess Pork at this market.

Groceries have been extremely dull all the week, with a downward tendency in prices. The demand usually active at this season is very quiet.

Naval stores have lost the partial improvement of last week, and prices are now generally at the lowest point since the restoration of peace. Oils have been moderately active, and only linseed oil shows a slight decline.

Metals have shown considerable activity in iron and pig tin. The sales embrace 4,500 tons pig iron, at \$46@\$47 currency for No. 1 American, and 2,000 pigs Straits tin, at 231c gold. Lead and spelter have also shown a better feeling.

East India goods have shown great and rather improving strength on a gold basis, but transactions have been but moderate.

Hides and leather have been dull, with prices tending downward. Fruits and fish have been dull; but Sicily fruits have slightly improved from scarcity. Tallow has been firm and moderately active. Petroleum has been dull and steadily declining; prices have not been so low as now in a long time.

In freights we notice large shipments of cotton, bacon, and corn to Great Britain, but besides these, there is little going forward.

IMPORTS OF LEADING ARTICLES.

The following table shows the foreign imports of certain leading articles of commerce at this port for the past week, since January 1, 1866, and for the corresponding period in 1865:

DODE DACKIN	G AT C	INCINNATI-REVIE	TO W	THE PAST SEASON	The

PORK PACKING AT CINCINNATI-REVIEW OF THE PAST SEASON.-The whole number of houses engaged in curing pork this season, was fortywhole number of houses engaged in curing pork this season, was forty-two, and the total number of hogs reported by those houses is 354,079, which is about 25,000 less than the total receipts reported up to the middle of February, so that over this number must have been consumed in the city or put up for family use. The average weight is 238 18-31 lbs. per hog, and the yield of leaf and trimming lard 32 13-25 lbs. per hog. Of the whole number of hogs reported, about 10,000 head were rendered into lard, in the fore part of the season, excepting the shoulders and hams; and in making up the yield of lard; that thus made is ex-cluded, in order to get at the correct yield of lard per hog, of what is known to the trade as leaf lard. The yield of head and gut lard has been large, the percentage of increase being greater than that of leaf. The season's packing compares with that of last season as follows: The season's packing compares with that of last season as follows : Yield lard. Av. weight. No. hogs. 350,600 24 1-5 $201\frac{1}{8}$ 218 18-31 1864-65..... 32 15-25 354,079 1865-66

The averages for the past season compare as follows : Av. wt. Yield lard. 188 11-12 23 1-8 Av. wt. Yield lard.

COTTON.

FRIDAY. P. M., March 16.

The receipts of cotton at the different ports, the past week, show an increase over the previous two or three weeks, having reached about 46,000 bales. At New York we have received 19,639 bales, and exported 10,621 bales.

Much has been written with regard to the coming crop, and widely differing estimates have been made, ranging from one to three million bales. When we consider, however, that the conclusion is in each case based upon uncertain premises, we can easily see that it is far too soon to attempt to give exact figures. The fact that a very large amount of cotton has been and is being planted, is admitted by all. It is also equally true that the labor question promises a more favorable solution than most dared to hope previous to the 1st of January. The freed men have generally entered into contracts, making their compensation depend, in part at least, upon the crop to be raised. That they will in every case work faithfully, and fulfill the agreements they have entered into, is more than could be expected of any race of men. But when we remember that their pay depends upon their continuing to the end, and that they have already tried the pleasures and experienced the penalties of idleness, we think it is not over sanguine to expect in the main a successful result so far as the labor question is concerned But it is urged that a want of means is a serious impediment to extensive cultivation. Just to what extent capital has gone South predicated on the next crop it is, of course, impossible to say. That much has been invested in this way is certain. Yet. aside from this, do we sufficiently appreciate the effect of the return the South is receiving for the more than two million bales she is sending to market this year, amounting, at \$175 a bale, to 350 millions of dollars? Nor has cotton, by any means, been her only source of revenue since the close of the war.

We have not thrown out these ideas for the purpose of presenting any estimate of our own. Until we have learned the number of acres that have been planted in each State, the amount of labor still existing in the South, and been assured by the coming up of the plant that the seed is not defective, exact estimates appear to us of little value. We may add, however, that with favorable weather the probabilities are certainly in favor of a good crop. Sales for the week, 13,000 bales, of which 1,500 bales to-day. The following are closing quotations:

336

The past week has been one of the most irregular reported in the cotton market in many months. On Saturday last the dullness of the previous day was continued. On Monday there was an active and buoyant opening on the speculative reports. On Tuesday a very flat market. On Wednesday the foreign news quoting a half-penny advance in Liverpool, which was not generally anticipated in this market led to a large speculative busines, and an advance of 1@2c. per lb. On Thursday the improvement was sustained at the government sale; strict middling Mobile selling at $42\frac{1}{2}c$; low do. 40c, but the speculative demand was less active, and the tone less buoyant.

The diminishing stock in New York affords much encouragement to holders, while the liberal rate at which receipts keep up at the Southern ports have a contrary effect. The great strength and increasing consumption of American cotton in England is noted, as well as the dullness of goods at low and unsatisfactory prices. These influences must pecessarily keep our market feverish.

To-day the news received by the Africa at Halifax to March 3d is regarded as favorable ; but a severe rain storm interferes with business.

March 3-Cotton, sales to-day of 10,000 bales, including 3,000 to speculators and ex; orters." The market closed quiet, but steady. The Australasian's news was not published till the close of business.

The Brokers' circular reports the sales of cotton for the week ending March 2d at 76,000 bales; of which 10,000 were taken by speculators, and 14,000 by exporters. The market opened flat, and declined $\frac{1}{2}d$, but subsequently became buoyant, and prices advanced & @1 1 in the week for American, and 1d@ld for other descriptions. The authorized quotations are : Fair Orleans 20#d. middling Orleans 191d, fair Mobiles 20d, middling Mobiles 19d, fair Uplands 20d; middling Uplands 183d. The sales (Friday) are estimated at 10.000 bales. The market closing quiet, but steady. The stock is estimated at 400,000 bales, of which 218,500 are American.

BREADSTUFFS.

FRIDAY NIGHT. March 16. There has been generally a more steady tone in the market for breadstuffs than prevailed at our last report, but very little improvement in prices has been effected,-nor can an active business be noted ; the depression in business circles is so great that none will buy more than to supply the order in hand, and commission dealers show much desire to clear out stocks in store.

Flour has come forward more freely by rail, but with a good demand prices of sound flours have ruled firm, although speculative views for a sharp rise have not been realized. Each slight advance brings out sellers in great force. Some discussion has been had as to the practicability of introducing French floars to make good the deficiency in fine family flours, but we do not learn that any orders have gone out.

Wheat has been in steady milling demand, mostly for fine Spring Reds and prime White Wheats; there has been no important change Inferior wheats are seeking buyers, but are not wanted.

Corn has been active and firm, mostly for export. Oats have been in good demand and freely offered. Barley has been active at some concession. Rye is wanted for Germany.

The following are the closing quotations :

LIVERPOOL, March 3 .-- By telegraph, via Halifax, we have, by the Africa under this date, as follows:

Breadstuffs are dull but steady. Richardson, Spence & Co., and Wake-field, Nash & Co., report Flour dull but steady. Wheat quiet but firm; Winter Red 10@10s 6d; Southern Red 10@10s 6d. Corn steady at 28s 6d@28s 9d for mixed.

LONDON MAEKETS .-- Baring's Circular reports breadsuffs quiet and steady.

THE DRY GOODS TRADE.

FRIDAY, P. M., March 16, 1866.

The Dry Goods market is without material change from the condition indicated last week. The decline in prices has not been so marked as for the past two weeks, but nevertheless still continues, with no immediate prospect of stability. The large number of buyers, so often referred to, seem to have become alarmed at the general depression in all branches of business, and have gone home, either buying but a few pieces or not at all. The expected Spring trade is going by default, and still greater cautiousness is manifested as the season advances But few goods are bought, and those only at the moment needed, and forwarded by express. Apropos, it is said that the express compa nies were never before doing such a business as at present in smal parcels of goods of all descriptions. BROWN SHEETINGS and SHIRTINGS have been dealt in in a small way but generally at figures below a regular fixed price. Prices have steadily softened until quotations are nominal, though not decidedly lower. Standards have been sold to some extent at 24 cents, but this is below the agents' figures. Amoskeag A, Stark A, Appleton A, Lawrence C, & Atlantic P A & A H are quoted at 25. Appleton B 32, Atlantic heavy A 37 inch 26, Atlantic P H 25, do heavy shirt-ing A V 22, do A G 20, do fine sheeting 24, Amory 37 inch 25, Indian Head B 30 inch 21, do E 48 inch 42, Nashua extra A 36 inch 24, do fiue C 40 inch 26, Wachusetts 26, Massachusetts A 4-4 23, do B B 4-4 24, Medford 25, Newmarket Manuf Co 33 inch 22, do do 36 inch 23, G Washington hy 34, Griswold 3-4 14, Warren 22, Anchor 18, Beaver Brook 19, Humbolt 18, Live Oak J 16, Merrimack X X 18, Portsmouth Steam Co E 17, do F 18, do P 15, do B 121, 30 inch Portsmouth U 16, 33 inch Commonwealth D 19, Silver Lake H 18, Warwick H 19, do P 21, Western's 15, Pocassett Canoe 39 inch 26, do K 36 inch 22, do H 28 inch 16, Western States 36 inch 25, Phoenix Cotton Manuf Co 24, do do 39 inch 25, World wide 36 inch 17, Grafton 28 inch 16, do 30 in. 17, Shetucket B 27 inch 17, do A 30 in. 18, Indian Queen 36 inch 20, New England 36 inch 20, Pittsfield A 36 inch 20, Wa Wa Wanda 36,

for FRASER

inch 20. Indian Orchard, W 33 inch 19c, do BB 33 20c, do C 37 ⁹3c do A 40 27c.

BLEACHED SHEETINGS and SHIRTINGS are in some demand and the price of leading makes is well sustained from a scarcity, but medium and common grades are lower and dull. New York Mills are held at 50c, Wamsutta 4-4 471. Canoe 27 inch 15, Continental 30 inch 18, Auburnville 4-4 35, White Rock 36 inch 37, Portsmouth Steam Co. C 20, do F 19, do E 18, do P 16, do B 13, Kent River 3-4 14, Uxbridge imp 4-4 31, Bartlett Steam Mills 33 inch 26, do do 5-4 271, do do 7-8 25, do 4-4 33, Newmarket 33 inch 26, do 36 inch 30, Nashua 5-4 extra heavy 35, Attawaugan X X 27, do watertwist 30, Bedford O 18,

CORSET JEANS are abundant and offered low. Indian Orchard 20, Amoskeag 27, Newmarket 21

PRINT CLOTHS are still unsettled and inactive. Sales of a few pieces have been made 13@14 for 64x64.

PRINTS have been dealt in more by jobbers than first hands though there is less quoted change in prices. Jobbers have been selling them at prices below those named by agents, which are nearly the same as last week. Sprague's are quoted at 27 cents for 32 inch fancy, purples and shirtings, 22 for canaries, 23 for solid colors, 23 for indigo black and green, green and blue and green and yellow, 24 for blue and white, 25 for blue and orange, 24 for German plaids, 23 for madder rubies, shirtings, and frocks, and 23 for staple styles, 19 for Loudon mourning. American Print Works madder are reduced to 21, Richmond and Merrimack 21. Garners are quoted at 22, Amoskeag pink 21, do purple 20, do shirting 19, do dark 19, do light 19, do mourning 18 Swiss ruby 20, Dutchess B 18, Lowell dark 18, do light 18, Naumkeag 18, Spring Valley 16, Wamsutta 17, Glen Cove full madders 15, Wauregan fancies 19, do rubies, pinks and purples 20.

GINGHAMS are dull and nominal. Lancaster 26, Glasgow 25.

LAWNS are moderately dealt in, and the supply is less abundant. Pacific fancy 271, Lodi fancy plain and mourning 25.

JACCONETS are without animation, and prices are nominal. White Rock 22 for high colors, 19 for plain, and 19 for Slater's.

TICKS have met less reduction, but are inactive, and could be purchased below quotations. Amoskeag A C A 80, do A 521, do B 471, do C 421, do D 371, Albany 27 inch 17, American 30, Pittsfield 27 inch 17, G en Allen 3-4 17, Chattanooga 3-4 20, Concord 4-4 32, Passaic 7 8 30¹/₂, Pacific extra 7-8 42, Sacondale 3-4 17, Windsor 7-8 32, Henry Clay 3-4 27, Suwanee 4-4 32.

COTTON FLANNELS are nominal. Ald ich and Rockland 30 cents Columbia 271, Nashua A 30.

STRIPES and CHECKS are more in demand for particular localities, but prices are not sustained. American stripes 3-3 23, do 6-3 24, Louisiana plaids 32, Ringgold fast plaids 27, Simpson's chambrays 32, Amoskeag stripes 45.

DENIMS are in some demand at present quotations. Amoskeag 521, Peabody blue 25, Wauregan 25, and Albany 20.

DRILLS are lower but inactive. Amoskeag brown are quoted at 29, Stark H 25, and Massabusic A 25, Indian drills 261, Grenville 22, Live Oak and Quinnebaugh 17.

CAMBRICS and SILESIAS are dull and lower. Federal cambrics 17, Saratoga and Milton Mills 16, Portsmouth A 14, Slaters plain Silesias 23, and Live Oak 23, Brookfield 26.

MOUSLIN DELAINS are more steady in prices, but inactive. Hamilton and Pacific are quoted at 26, Manchester 23, Challies 26.

HOOP SKIRTS are quiet at last week's quotations. Bradley's Duplex Elliptic--20 to 50 Hoops, 87½c to \$1 05, Empress Trail, \$1 25, S. T. & A. T. Meyer's IXL 1¼ inch tapes, 20 to 40 hoops, 48c to 73c. 2-inch tapes, 20 to 40 hoops, 68c to \$1 12.

BALMORAL SKIRTS are quiet and prices steady. Pontoosuc Co's Imperial bring \$75 per dozen, do Picnic \$63. No. 1 do \$60, No. 2 do \$45, extra do \$48, and No. 4 do \$39: Barker's \$40 for No. 1, and \$34 50 for No. 2; G. H. Gilbert & Co.'s black and white spring styles \$45, do assorted colors bring \$39; and Lewis \$36.

CLOTHS are dull as are all kinds of woolen goods. Some fine grades are called for in small quantities, but prices are nominally the same. Cotton warps are quoted at \$2 15 for No. 1,\$2 05 for No. 2, and \$1 95 for No. 3. Utica all wool beavers \$3 50 for light weights, and \$4 for

heavy do.

CASSIMERES are quiet. Dighton's silk mixed cassimeres spring weight sell at \$2 121@2 871, Suffolk mills fancy \$1 25@1 75 for 3-4, and \$2 50@3 50 for 6-4, Rochester Grey do \$1 35, Fullerton & Co's fancy do \$1 621@\$2, Saxon Woolen Mills diagonal do \$1 75, Mapleville Woolen Mills double and twist do \$1 871, Spring Mills fancy do \$1 08¹/₂, Centreville black and white checks \$1 50. Dean & La Monte's fancy \$1 50@1 75, Baltic Woolen Co's do \$1 50@1 871, plough, loom and anvil 671c net.

LINSEYS are out of season and prices nominal. Westerleys are sold at 35@ 371, and White Rock 40c.

CABPETS are steadily called for and with small stocks prices are firm. Lowell Co.'s Ingrain bring \$1 60 for superfine, \$1 75 for extra super, and \$2 15 for three ply. The Hartford Co.'s \$1 60 for medium superfine, \$1 75 for superfine, \$2 07 $\frac{1}{2}$ for imperial three ply, and \$2 25 for extra three ply; Brussels \$2 45 for 3 fr, \$2 55 for 4 fr, and \$2 65 for 5 fr.

FLANNELS are dull at this season and the demand confined to completing assortments merely. Plain scarlet and orange 321@35; plain white 34@a 75; scarlet twilled and blue and mixed do 371@65; army. standard $77\frac{1}{2}$; 4-4 Shaker 65@95; California blue mixed 55; Home Woolen Company's fancy plaid shirting do $67\frac{1}{2}$; Lucas mills white domets $87\frac{1}{2}@50$; Tremont all wool fancy shirting dc $62\frac{1}{2}$ for $\frac{2}{3}$, and \$1for 6-4 do; Gilbert's standard flannels $\frac{3}{2}$ No. 1 \$1.12 $\frac{1}{2}$, No. 2 do 90; No 3 do 69; No. 4 do 62 $\frac{1}{2}$; $\frac{7}{4}$ No. 1 do \$1 32 $\frac{1}{2}$, No. 2 \$1 07 $\frac{1}{4}$, No. 8 do 80c, No. 4 62 $\frac{1}{4}$; 4-4 No. 1 do \$150, No. 2 do \$1 20, No. 2 do 87 $\frac{1}{4}$ ° No.

THE CHRONICLE.

4 do 80c; 5-4 No. 1 do \$1 87¹/₃, No. 2 do \$1 50, No. 3 do \$1 15, No. 4 do \$1; 6-4 No. 1 do \$2 25, No. 2 do \$1 85, No. 3 do \$1 32, No. 4 do \$1 20.

AMERICAN LINEN is quiet at former rates. American Linen Co's bleached Huckabucks 25, J brown 23, T. bleached crash 20¹/₂, A brown 18¹/₂, B do 16.

FOREIGN GOODS are still dull and declining. Some special styles are moderately active at remunerative prices, but in most instances goods have been pressed to considerable extent, and prices are lower. The auction sales have been without animation. On Tuesday Messrs. Haggerty & Co. held a sale, at which a great variety of black and colored silks were offered, and for the best qualities fair prices were realized. Dress goods generally sold low. Linen goods showed little change from recent sales. A quantity of domestic were disposed of, the prices of which are given as an indication of the prices at which buyers will take goods. Scott's extra brown sheetings brought $19\frac{1}{2}$ cents, World-wide do $15\frac{1}{2}$, Suffolk do were duplicated at $15\frac{1}{2}$, Tremont E sold at 15, 36-inch English brown sheetings brought $17\frac{1}{2}$, and were duplicated at 17, 4-4Manhattan K do 19, 4-4 Otsego 20, 7-8 Augusta, 171, 4-4 do 201, 4-4 Graniteville 21, 4-4 Hamilton standard 211, 4-4 Irvington 21, 4-4 Washington were duplicated at 19, 4-4 Carolina brought 211, 4-4 Merrimack 17¹/₂, and duplicated, 4-4 Pepperill 21²/₂, do O 21, American 6x3 stripes 20, ploughboy 6x8 do 21, and duplicated, Manchester ginghams 191. Locust Grove ticks 371. Chattanooga do 17. Kennebeck do 271. Glencove madder prints 121. Everit cottonades 32@331. McClellan do 35, blue cords 271, nankin checks 33, York Mills cottonades 321@33, black and brown cambrics $12@12\frac{1}{2}$, 4 4 cambric prints $21\frac{1}{2}@25$, $4x^2$ Pennsylvania checks 20@201.

LONDON.—Our own correspondent at London, under date of Wednesday, Feb. 28, on the subject of the Manchester market for cotton yarn and cotton goods, &c., writes as follows:

At Manchester there has been increased activity- Export yarns have been in demand, and have realised higher prices. Home trade yarns have changed bands at fully late rates. For cloth, the market has been very firm, on rather higher terms. Annexed are the quotations :

COMMERCE OF HONOLULU.—The Hawaiian Gazette publishes a tabular statement of the commerce of Honolulu, from which we glean that their exports of sugar in 1865 were 15,318,097 lbs. against 10,414,441 lbs. in 1864, showing an increase in 1865 of 4,903,653 lbs. Of Molasses, the increase of 1865 amounts to 200,000 galls. Of Rice and Paddy there is a deficiency in 1865, as compared with the previous year, of 270,898 lbs.; of Coffee an increase of 213,622 lbs.; of Salt, 600 tons, and of Fungus a deficiency of 142,586 lbs., of Flour a deficiency of 1,286 bbls.; of Cotton an increase of 9,500 lbs.; of Goat Skins an increase of 22,650; of Hides a decrease of 223,845 lbs.; of Pulu a dercease of 422,231 lbs.; of Whale and Sperm Oil a decrease of 113,700 galls., &c. The exhibit showing a total value of exports in 1864 of g1,079,343 52, and in 1865, \$1,521,211 82, an increase in 1865 of \$441,868 30.

DETAILED STATEMENT.

The following is a detailed statement of the movement the past week ending March 16, 1866:

ENTERED FOR CONSUMPTION.

We call attention to the advertisement in our columns of the *Real Estate and Mining Bureau* of Mr. S. H. Grant, 70 Broadway. Mr. Grant offers for sale valuable plantations and mining lands.

We notice also the advertisement of The Safe Deposit Company, 146 Broadway. This Company undertakes to keep safely Bullion, Securities and other valuables, and must commend itself to the public at the present time, when burglaries are so frequent, and private offices are unsafe places for the deposit of such articles.

The Hope Fire Insurance Company, whose advertisement appears in our columns, shows a favorable statement, having paid in losses during the last year the large sum of \$201,588 14.

WHOLESALE.

All goods deposited in public stores or bonded warehouses must be withdrawn therefrom, or the duties thereon paid within one year from the date of the original importation, but may be withdrawn by the owner for exportation to Foreign Countries, or may be transhipped to any port of the Pacific, or West-ern Coast of the United States, at any time before the expiration of three years from the date of the original importation, such goods on arrival at a Pacific or West-Western port, to be subject to the same rules and regulations as if originally imported there; any goods remaining in public store or bonded warehouse be-yond three years shall be regarded as abandoned to the Government, and sold under such regulations as the Secretary of the Treasury may prescribe. Mer-chandise upon which duties have been paid may re-main in warehouse in custody of the officers of the customs at the expense and risk of the owners of said merchandise, and if exported directly from said custody to a Foreign Country within three years, shall be entitled to return duties, proper evidence of such merchandise having been landed abroad to be furnish-

ed to the collector by the importer, one per centum of said duties to be retained by the Government. In addition to the duties noted below, a discrim-inating duty of 10 per cent. ad val. is levied on all imports under flags that have no reciprocal treaties with the United States with the United States.

To on all goods, wares, and merchandise, of the growth or produce of Countries East of the Cape of Good Hope, when imported from places this side of the Cape of Good Hope, a duty of 10 por cent. ad nal. is levied in addition to the dutics imposed on any such articles when imported directly from the place or places of their growth or production; Raw Cotton and Raw Silk excepted.

The tor in all cases to be 2,240 D.

FRASER

THE CHRONICLE.

The Railway Monitor.

MISSOURI BONDS.—The act recently passed by the Missouri Legislature to provide for the consolidation of the railroad debt of the State, shows that its total amount on the 1st January, 1868, will be \$30,199,050. The details are thus given :

Companies to which issued. Pacific Railroad	Original principal.	Accrued interest.	Total amount.
do Southwestern	\$7,000,000	\$2,940,000	\$9,940,000
	4,500,000	. 2,030,000	6,530,000
North Missouri Railroad	4,350,000	1,827,000	6,177,000
Iron Mountain Railroad	3,500,000	1,470,920	4,971,420
Cairo & Fulton Railroad	650,000	273,000	923,000
Platte County Railroad	700,000	294,000	994,000
Total railroad	\$20,701,000	\$8,834,420	\$29,535,420
Revenue bonds for int. of 1859			
sected ac bolids for Int. of 1859	431,000	232,630	663,630
Total railwood and more			

Total railroad and revenue \$21,132,000 \$9,067 050 \$30,199,050

From the above there is to be deducted the amount paid in coupons and bonds by the several State banks, and by the late owners of the Platte County Railroad, being about \$200,000.

The consolidated bords to be issued in exchange for the original bonds with accrued interest added, will bear interest for the four years from January 1, 1868, at the rate of three per cent only; for the four years from January 1, 1872, at the rate of four per cent, and for the four years from January 1, 1876, at the rate of five per cent, and thus increasing by quadrennial periods to 6, 7, 8, 9, and 10 per cent, will retain the latter rate until their maturity January 1, 1918. This will average 7.76 per cent per annum simple interest through the fifty years. This sliding scale, however, is regarded as the reverse of equitable by the majority of bond holders.

CLEVELAND AND PITTSBURG RAILROAD.—The report of the Cleveland and Pittsburg Railroad Company for the year ending December 31, 1865, gives the following as the result of the years operations:

Receipts from— Passengers Freight P. F. W. & C. R. R. Co Miscellaneous	\$1,029,065 1,569,584 148,113 97,727	Payments for- Operating Interest Dividends Surplus earnings	\$1,959,798 873,266 212,729 298,697
Total	\$2 \$44,499	Total pital have been as fol	\$2,844,490
Construction and equip Floating debt extingui Assets increased by p	pment shed	· · · · · · · · · · · · · · · · · · ·	\$878,691 66,762 153,244
Total extraordina which have been me	ry expenses. et by an issu		\$1,098,697

amounting to \$1,000,000 at 80c..... \$800,000

This road, if well managed, ought to net \$1,000,000 profits and pay 10 per cent dividends; but if its capital is to be increased year by year, without a corresponding increase in productive value, it will be a serious injury to it. The above showing, however, is far from being discouraging to stockholders.

ENGLAND AND FRANCE TO BE CONNECTED.—There are two projects on foot to accomplish this purpose. The one is to establish a railroad ferry across the Straits of Dover, and the other to construct a vast pontoon railway from shore to shore. In the first case the ferry-steamers are to be large enough to take on a whole train at once, and thus avoid trans shipment at either landing. London and Paris being considered as the termini. The railway supported by anchored pontoons is certainly a grand conception, but impracticable. The necessity for some improvement on the nasty steamtubs that now make the passage, however, is too patent to be questioned.

BALTIMORE AND OHIO RAILROAD EXTENSION.—The Baltimore and Ohio Railroad Company have broken ground for their new connection for the West, from Washington via Point of Rocks.

COMPARATIVE MONTHLY EARNINGS OF PRINCIPAL RAILROADS.

NEW UNITED STATES 30 YEAR SIX PER CENT. BONDS, RUDOLPH GARRIGUE, Vice-Pres. ISSUED TO AID THE CONSTRUCTION OF THE JOHN E. KAHL, Secretary. Ætna Insurance Co., PACIFIC, RAILROAD. GREAT CENTRAL Hartford, Conn. They have Thirty Years to run, and bear Interest at the rate of Six Per Cent. Per Annum in lawful INCORPORATED 1819. money. The interest is payable Semi Annually in January and July, They are an Absolute and Unconditional Obligation of the United States and are Exempt from State and Municipal Taxation, like all other Government Bonds, They are Received by the Bank Department as Security for the Circulation of National Banks, and circulation is issued upon them at the rate of Eighty Per Cent. of their par value. The length of time they have to run renders them very Desirable for Capital..... \$3,000,000 money THOMAS A. ALEXANDER, President. LUCIUS J. HENDEE, Secretary. DIRECTORS. DRAYTON HILLYER, THOS. A. ALEXANDER, WALTER KENEY, JOSEPH CHURCH ROBERT BUELE, EBENEZER FLOWER, BANKING PURPOSES, OR FOR INVESTMENT. ELIPHALET A. BULKELEY, ROLAND MATHER, CHAS. H. BRAINARD, WILLIAM F. TUTTLE, As they Cannot be Called in by the Government, and the Rate of Interest cannot be Reduced for Thirty Years. As gold declines, their relative value to gold bearing bonds, which are liable to be paid off so much earlier, will proportionately increase, and after 1881 they will probably be the SAMUEL S. WARD, GEORGE ROBERTS, AUSTIN DUNHAM, THOMAS K. BRACE, Only 6 per cent. Bond of the U.S. in Existence, and they can now be bought at a rate at which they will pay a Better Rate of Interest on the amount invested in the meantime than any of the gold-bearing bonds at present prices, unless gold shall average from 20 to 30 per cent. premium for the next ten to fifteen years. So high an average premium on gold for this length of time is beyond all reasonable expectation, and largely in Excess of the most intelligent financial NEW YORK AGENCY, No. 62 Wall Street. JAMES A. ALEXANDER, Agent. estimates. They are issued only in limited amounts, as the work on the Pacific Railroad progresses. There is but a small amount now in the market, and the demand is daily increasing. Miscellaneous. Hanover Fire Insurance ALSO, FOR SALE, THE Central Pacific R.R. 7 per cent. State Aid Bonds, COMPANY, No. 45 WALL STREET. Principal and Interest payable in gold, interest guaranteed and paid by the State of California. These bonds are secured by a mortgage on 160 miles of road from Sacramento to the California State line, forming a part of the Great Pacific Railroad Route adopted and aided by the United States Government, They are further secured by a JANUARY 1st 1866. Cash capital..... \$400,000 00 156,303 98 Surplus..... Gross Assets..... Total Liabilities..... \$556,303 98 SINKING FUND OF \$50,000 PER ANNUM IN GOLD. 24,550 00 reserved from the earnings of the road, and *Pledged for their Redemption*. About sixty miles of the road are already completed, on which the *Earnings are very Large*, having been in the month of October, 1865, on fifty-three miles of road then running, upward DORAS L. STONE, President. BENJ. S. WALCOTT, Secretary. E.R.Mudge, Sawyer&Co. No. 35 & 37 PARK PLACE, N. Y., \$65,000 IN GOLD, $\mathbf{O}_{\mathbf{F}}$ the road having as yet penetrated to no very important points. With thirty miles additional completed, which will probably be ready for working by the middle of June next, the earnings are expected to be not less than AGENTS FOR WASHINGTON MILLS, Chicopee Manufacturing Co., SARATOGA Victory Manufacturing Co., and BURLINGTON WOOLEN CO. \$200,000 Per Month, in Gold, by careful estimates based upon the present amount of traffic over the same region without railroad facilities. This part of the Great Pacific Route is destined to be one of the NEW SKIRT, 1866. Most Profitable Lines of Railroad in the World. W. Bradley's These Bonds are a First Class Security in every respect, and a limited amount will be offered upon terms which render them a **DUPLEX ELLIPTIC.** VERY ATTRACTIVE AND DESIRABLE INVESTMENT.
