# FIRST MORTGAGE BONDS

OF THE  
**CENTRAL PACIFIC RAILROAD CO.**  
OF CALIFORNIA.

Interest at the rate of Six per Cent. per annum, payable Semi-Annually, on the First days of January and July.

Principal and Interest payable in U. S. Gold Coin in the City of New York.

Amount of Issue, \$7,336,000. In Coupon Bonds of \$1,000 each.

The Bonds have Thirty Years to run, and are secured by a First Mortgage, constituting an absolute prior lien on that portion of the Road, Equipments, Franchises, and Entire Property of the Central Pacific Railroad Company, located in the State of California, and extending from Sacramento City to the California State Line, forming a part of the GREAT PACIFIC RAILROAD ROUTE, adopted and aided by the UNITED STATES GOVERNMENT.

The amount of these First Mortgage Bonds to be issued per mile, is limited by law to the amount of United States Bonds allowed and issued to aid the construction of the Road, and the Mortgage by which they are secured is declared by Act of Congress to constitute a lien prior and superior to that of the United States Government.

The aid received from the Government (in amount equal to this First Mortgage) is economically and judiciously applied to the construction and equipment of the road, together with nearly \$7,000,000, received from Stock Subscriptions and other sources. The First Mortgage therefore amounts to but about 35 per cent. of the actual cost and value of the Property which it covers.

The road is now completed, equipped and running from Sacramento City to Alta, a distance of 73 miles, and the earnings for the three months ending August 1st, were as follows, viz.:

May, 1866.....	\$65,115 88
June " .....	67,429 78
July " .....	85,000 00

### IN GOLD.

The earnings are steadily increasing, and are estimated at over \$100,000 in gold for the month of August—the official report for that month not having been received at this date.

The construction of the road is going vigorously forward—24 miles additional being nearly ready for the cars—and it will probably be in full operation to the California State Line—156 miles from Sacramento City—during the summer of 1867, when its earnings must be very large, as the entire trade of Nevada, and a large proportion of that of Utah, Idaho, and Montana must pass over its line. It has been shown by reliable statistics that in 1863 over \$13,000,000 in Gold was paid for freighting goods from California to Nevada alone.

This part of the Great Pacific Railroad Route is destined to be one of the most profitable lines of railroad in the world, and its First Mortgage Bonds are among the best secured and most desirable investments ever offered.

Over \$1,000,000 has already been expended in grading beyond the point to which the road is now running, and the iron is bought and paid for sufficient to lay the track the entire distance to the State line.

The Road has been completed and equipped thus far without the sale of a single dollar of its First Mortgage Bonds, and they are now offered to the public for the first time, after the earnings of the Road have reached the sum of \$100,000 per month in Gold, only about twenty-five per cent. of which is required for operating expenses.

The Bonds are offered at 95 per cent. and accrued interest from July 1st, in Currency. Orders may be forwarded to us direct, or through the principal Banks and Bankers in all parts of the country.

Remittances may be made in drafts on New York, or in Legal Tender Notes, National Bank Notes, or other funds current in this city, and the Bonds will be forwarded to any address by Express, free of charge. Inquiries for further particulars, by mail or otherwise, will receive punctual attention.

Interest Seven per cent., Free of Government Tax  
Payable semi-annually on 1st April and 1st  
October, in New York.

**PRESENT ISSUE OF BONDS \$900,000**  
Limited to \$15,000 per mile.

This Road is located in one of the most densely populated and most highly productive sections of Illinois.

The Company have completed and in operation ninety miles of road, and are constructing sixty miles, which will be completed within twelve months.

Under a perpetual agreement this line has been connected with that of the Chicago and Alton Railroad Company, thirty miles from St. Louis, and on completion of the work now in progress will connect with the same road one hundred and twenty-six miles from Chicago. Under this agreement a bonus of ten per cent. is paid to the St. Louis, Jacksonville and Chicago Company, on all traffic delivered to the Chicago and Alton Company, and harmonious action in conducting the traffic upon the two lines is effectually secured.

### FIRST MORTGAGE BONDS

OF THE  
**ST. PAUL AND PACIFIC RAILROAD COMPANY**  
of Minnesota. Interest at Seven per cent., semi-annually, first January and July, free from Government Tax, in the City of New York. Principal payable in 1892.

The road runs through one of the best portions of the State, and has been completed to St. Cloud, eighty miles, at an expense of over \$3,000,000.

**THESE BONDS ARE ONLY \$10,000 PER MILE.**  
Government Bonds at the highest market price will be received in payment. For particulars apply to  
**TURNER BROTHERS, Bankers,**  
Corner Nassau and Pine Sts., New York.

### SEVEN PER CENT. FIRST MORTGAGE BONDS

OF THE  
**NORTH MISSOURI RAILROAD COMPANY.**

We offer for sale the Seven Per Cent. First Mortgage Bonds of the North Missouri Railroad Company, having thirty years to run. Coupons payable in New York on January 1 and July 1, in each year.

Before accepting the agency for sale of these bonds, we made careful inquiry into the condition and prospects of the road, which was examined by Mr. Wm. Milnor Roberts and others, on our behalf, and their highly satisfactory report enables us to recommend the bonds as first-class securities, and safe and judicious investment.

The proceeds of these bonds (\$6,000,000 in all) will be used in extending a road, already completed 170 miles into North Missouri, to the Iowa State line, where it is to connect with the railroads of Iowa, and also westward to the junction with the Pacific Railroad (at Leavenworth) and other railroads leading up the Missouri River, so that the mortgage of \$3,000,000 will cover a complete and well-stocked road of 289 miles in length, costing at least \$10,000,000, with a net annual revenue after the first year of over \$1,500,000, or a sum nearly four times beyond the amount needed to pay the interest on these bonds, the income of the road of course increasing every year.

The Railroad connects the great City of St. Louis with its 200,000 inhabitants, not only with the richest portions of Missouri, but with the States of Kansas and Iowa and the great Pacific Railroads.

The first \$2,000,000 have been sold at 80 cents, and the remainder are now offered at 75 cents. At this rate they yield nearly 8 1/2 per cent. income, and add 20 per cent. to principal at maturity.

Any further inquiries will be answered at our office.

# FIRST MORTGAGE BONDS

OF THE  
**CENTRAL PACIFIC RAILROAD CO.**  
 OF CALIFORNIA.

Interest at the rate of Six per Cent. per annum, payable Semi-Annually, on the First days of January and July.

Principal and Interest payable in U. S. Gold Coin in the City of New York.

Amount of Issue, \$7,336,000. In Coupon Bonds of \$1,000 each.

The Bonds have Thirty Years to run, and are secured by a First Mortgage, constituting an absolute prior lien on that portion of the Road, Equipments, Franchises, and Entire Property of the Central Pacific Railroad Company, located in the State of California, and extending from Sacramento City to the California State Line, forming a part of the GREAT PACIFIC RAILROAD ROUTE, adopted and aided by the UNITED STATES GOVERNMENT.

The amount of these First Mortgage Bonds to be issued per mile, is limited by law to the amount of United States Bonds allowed and issued to aid the construction of the Road, and the Mortgage by which they are secured is declared by Act of Congress to constitute a lien prior and superior to that of the United States Government.

The aid received from the Government (in amount equal to this First Mortgage) is economically and judiciously applied to the construction and equipment of the road, together with nearly \$7,000,000, received from Stock Subscriptions and other sources. The First Mortgage therefore amounts to but about 35 per cent. of the actual cost and value of the Property which it covers.

The road is now completed, equipped and running from Sacramento City to Alta, a distance of 73 miles, and the earnings for the three months ending August 1st, were as follows, viz.:

May, 1866.....	\$65,115 83
June ".....	67,429 78
July ".....	85,000 00

### IN GOLD.

The earnings are steadily increasing, and are estimated at over \$100,000 in gold for the month of August—the official report for that month not having been received at this date.

The construction of the road is going vigorously forward—24 miles additional being nearly ready for the cars—and it will probably be in full operation to the California State Line—156 miles from Sacramento City—during the summer of 1867, when its earnings must be very large, as the entire trade of Nevada, and a large proportion of that of Utah, Idaho, and Montana must pass over its line. It has been shown by reliable statistics that in 1863 over \$13,000,000 in Gold was paid for freighting goods from California to Nevada alone.

This part of the Great Pacific Railroad Route is destined to be one of the most profitable lines of railroad in the world, and its First Mortgage Bonds are among the best secured and most desirable investments ever offered.

Over \$1,000,000 has already been expended in grading beyond the point to which the road is now running, and the iron is bought and paid for sufficient to lay the track the entire distance to the State line.

The Road has been completed and equipped thus far without the sale of a single dollar of its First Mortgage Bonds, and they are now offered to the public for the first time, after the earnings of the Road have reached the sum of \$100,000 per month in Gold, only about twenty-five per cent. of which is required for operating expenses.

The Bonds are offered at 95 per cent. and accrued interest from July 1st, in Currency. Orders may be forwarded to us direct, or through the principal Banks and Bankers in all parts of the country.

Remittances may be made in drafts on New York, or in Legal Tender Notes, National Bank Notes, or other funds current in this city, and the Bonds will be forwarded to any address by Express, free of charge. Inquiries for further particulars, by mail or otherwise, will receive punctual attention.

**PRESENT ISSUE OF BONDS \$900,000**  
**Limited to \$15,000 per mile.**

This Road is located in one of the most densely populated and most highly productive sections of Illinois.

The Company have completed and in operation ninety miles of road, and are constructing sixty miles, which will be completed within twelve months.

Under a perpetual agreement this line has been connected with that of the Chicago and Alton Railroad Company, thirty miles from St. Louis, and on completion of the work now in progress will connect with the same road one hundred and twenty-six miles from Chicago. Under this agreement a bonus of ten per cent. is paid to the St. Louis, Jacksonville and Chicago Company, on all traffic delivered to the Chicago and Alton Company, and harmonious action in conducting the traffic upon the two lines is effectually secured.

### FIRST MORTGAGE BONDS

OF THE  
**ST. PAUL AND PACIFIC RAILROAD COMPANY**  
 of Minnesota. Interest at Seven per cent., semi-annually, first January and July, free from Government Tax, in the City of New York. Principal payable in 1892.

The road runs through one of the best portions of the State, and has been completed to St. Cloud, eighty miles, at an expense of over \$3,000,000.

**THESE BONDS ARE ONLY \$10,000 PER MILE.**  
 Government Bonds at the highest market price will be received in payment. For particulars apply to

### SEVEN PER CENT. FIRST MORTGAGE BONDS

OF THE  
**NORTH MISSOURI RAILROAD COMPANY.**

We offer for sale the Seven Per Cent. First Mortgage Bonds of the North Missouri Railroad Company, having thirty years to run. Coupons payable in New York on January 1 and July 1, in each year.

Before accepting the agency for sale of these bonds, we made careful inquiry into the condition and prospects of the road, which was examined by Mr. Wm. Milnor Roberts and others, on our behalf, and their highly satisfactory report enables us to recommend the bonds as first-class securities, and safe and judicious investment.

The proceeds of these bonds (\$6,000,000 in all) will be used in extending a road, already completed 170 miles into North Missouri, to the Iowa State line, where it is to connect with the railroads of Iowa, and also westward to the junction with the Pacific Railroad (at Leavenworth) and other railroads leading up the Missouri River, so that the mortgage of \$5,000,000 will cover a complete and well-stocked road of 389 miles in length, costing at least \$10,000,000, with a net annual revenue after the first year of over \$1,500,000, or a sum nearly four times beyond the amount needed to pay the interest on these bonds, the income of the road of course increasing every year.

The Railroad connects the great City of St. Louis with its 200,000 inhabitants, not only with the richest portions of Missouri, but with the States of Kansas and Iowa and the great Pacific Railroads.

The first 500,000 have been sold at 80 cents, and the remainder are now offered at 85 cents. At this rate they yield nearly 8 1/2 per cent. income, and add 20 per cent. to principal at maturity.

Any further inquiries will be answered at our office.

Counsel. SAMUEL E. LYON, Esq.  
ALEXANDER HAMILTON, JR., Esq.

OFFICE, 45 WILLIAM STREET, NEW YORK.

THE INTERNATIONAL OCEAN TELEGRAPH COMPANY is organized to connect the United States, by way of Florida, with Cuba, the other West India Islands, and by extensions to the Isthmus of Panama, to connect telegraphically with South and Central America, and the Continents of Europe and Africa.

For these purposes the INTERNATIONAL OCEAN TELEGRAPH COMPANY has obtained the following valuable grants and privileges:

THE EXCLUSIVE PRIVILEGE from the Government of the United States, by Act of Congress approved May 5th, 1866, for fourteen years, to connect the United States, along the coast of Florida, with Cuba, other West India Islands, and the Bahamas.

THE EXCLUSIVE PRIVILEGE from the State of Florida, for twenty years, for the same purpose.

A grant from her Catholic Majesty's Government, dated Madrid, 29th August, 1866, to land cables on the shores of Cuba, and to connect at Havana with the Telegraphic System of the Island on favorable terms.

By telegram from Madrid, dated Dec. 8th, 1866, the Company is informed that her Catholic Majesty's Government has conceded to the Company the exclusive privilege to land cables on the shores of Cuba and Porto Rico for the period of forty years.

A grant from the Government of Santo Domingo, dated 5th October, 1866, to land cables and operate telegraphic lines in that republic.

According to the United States Treasury returns for the year ending June, 1865, the value of the imports and exports between the United States and the countries brought into telegraphic communication by this Company exceeds \$124,000,000.

Official Statements prepared by the direction of the British Government in the year 1866, show that the entire trade of the West India Islands amounted, in 1865, to the sum of \$420,580,919.

Of this sum the trade of Cuba alone amounted to \$296,000,000, divided as follows:

Trade between Cuba and United States.....	\$50,600,608
Trade between Cuba and Europe.. . . . .	245,309,372

The commercial relations of the United States with Cuba are so extensive that a sufficient amount of business may be expected from this source alone to yield a large return upon the capital invested.

Havana, as the financial centre of the West Indies, would add largely to the business in its connection as such centre with the other Islands. But in addition to the business with the United States, the relations of all the West India Islands as colonies of various nations of Europe would both politically and commercially require of necessity a large number of messages to be sent over this line for transmission to and from Europe.

Without offering any detailed estimate of the business, the suggestions already made, with reference to the statistical tables of the trade between the West Indies and Europe, and the West Indies and the United States, point to a very large profit, which is placed beyond the risk of competition for a long term of years by the exclusive privileges granted to the Company.

In these suggestions the extension of telegraphic communication over this line to South America, the Isthmus of Panama and Central America have not been considered; that this communication can be made, and will add largely to the business, cannot be doubted.

Responsible parties have offered to contract for cables of the most approved kind, to be laid and guaranteed for a reasonable time, and not to be paid for until in successful operation.

To Bankers, Brokers and Dealers in Government and other Securities.

### THE NECESSITY OF A SETTLED FINANCIAL POLICY.

The air is full of rumors as to the financial policy of the Secretary of the Treasury and of the committees of Congress. We would recommend our readers to receive with considerable distrust the rumors which come from Washington on fiscal and monetary questions. These statements, for the most part, are invented to operate on the markets. It can scarcely happen that previous to the holidays very important developments will be made; though Mr. Chandler's unpopular bank bill may perhaps receive its quietus on Tuesday. We trust also that the procrastination which at the close of the last two sessions produced so much hasty and bad legislation will not have to be again complained of.

Seldom have the financial deliberations of Congress been so anxiously scrutinized as at present by all classes of our citizens. But of all the fiscal questions which have arisen, or are expected to be up for deliberation, none are invested with so much general interest as those affecting the currency. By controlling the volume of our circulating money Con-

gress has the power to regulate its value or purchasing power; and in the regulation of the value of the money by which are carried on and measured the business activities of thirty millions of the most energetic, prosperous, enterprising people on the face of the earth, a responsibility is involved, the magnitude of which may well appal the boldest.

The probability is that during this short session we shall not have much financial legislation. But it is of importance that both in what is done, and in what is left undone, Congress should be guided by the soundest principles which the science and art of statesmanship can supply. The country has arrived at such a pass that we cannot afford to make mistakes, to tamper with the currency, to rush blindly into danger, or to put in jeopardy any of our monetary interests. The time is past for rash experiments. The people as yet are patient of their prodigious burdens; but it will be unsafe to add to them. The welfare of future years depends on the financial wisdom with which our monetary laws are contrived and administered to meet the existing crisis. Several measures have already been introduced into both Houses, whose design it is to correct some evils, real or supposed, in our existing financial machinery. On these several schemes it is premature at present to offer any special remarks. We shall therefore confine ourselves to the general principles to which all our legislation relative to the currency, the debt and the National Treasury, should for the present be compelled to harmonize itself.

First of all, the country wants a settled financial policy. Last Spring Congress adopted the excellent rule that no further addition should be made to the paper currency; let no influences, however strong, ever move us from this resolve. The National Bank circulation is fixed at 300 millions; the limits of the greenback currency are known. Congress has legislated, and the people are determined, to put this impassable limit on redundancy and high prices. No measures of the last session were more popular than those in which it was said to the rising waves of paper money inflation—"Hitherto but no farther, come." But we have decided further. The tide has not only been prohibited from rising higher, but it has begun to recede. We have a law, which is now in actual operation, that as much as safely can be withdrawn of our greenback currency shall be cancelled monthly, and lest evil should come from the overzealous eagerness of some official in carrying out the most delicate and dangerous operation known to financial statesmanship, it is expressly provided that in no single month shall the amount of greenbacks cancelled exceed four millions of dollars. The contraction may fall below this maximum point, but never is it to rise higher. Here, then, is our currency policy. The National Bank notes are fixed at three hundred millions, and the greenbacks are to diminish in volume just as slowly or as

fast as can be done with safety. This policy is settled, let us not unsettle it. It would contribute greatly to reassure the people, and might give an impulse to the retarded, hesitating wheels of business, if Congress would adopt a resolution complementary to Mr. Alley's famous resolution of last session, declaring on the one hand that the contraction policy then affirmed shall not be deviated from by any increase either of government paper money or of National Bank notes, and on the other hand that no more rapid reduction than that of four millions a month shall obtain sanction or become law.

But the people also require a definite policy as to the gold in the Treasury. Let Congress cease to listen to the dreams of unpractical theorists or to the mischievous schemes of greedy speculators. The gold balance as well as the idle currency in the Treasury belongs to the people, and should be used wisely for public and not private ends. We do not blame the Secretary of the Treasury if he has followed sometimes the plan, to which he has been advised, of hoarding gold; and sometimes the opposite plan of secretly and suddenly selling it. Congress has laid down no settled policy on the subject, and if blame lies any where it lies with the legislative branch of the Government, which has failed to do its whole duty. The questions involved are too great, and embrace interests too vast and far reaching, to be left to the unaided judgment of a single officer of the executive department, however great his integrity, capacity or experience.

Another point on which we need a fixed policy is the consolidation of our debt. By the December statement, elsewhere given, it will be seen that we have, within a few months, to redeem nearly nine hundred millions of short-dated indebtedness, comprising 147 millions of compound interest notes and 724 millions of seven-thirties, besides other maturing claims. Now if we had a settled policy, which every one knew and could rely upon, let us see what could be done relative to this threatening pile of maturing debt.

First, the anticipation that specie payments are to be resumed during the life-time of the seven-thirty notes, or of the outstanding compounds, would cease to operate on the public mind. The holders of these securities would be disabused of the absurd hope that they may receive gold at par in payment of the principal and interest. Thousands and tens of thousands of misguided expectant investors who hold fast their notes, under this singular hallucination, would be glad to sell them, or to convert them into five-twenties. The consequence must be that, as soon as the Treasury Department could make the necessary arrangements, the whole mass of these short loans would pour in, and would be converted into long bonds. Suppose, however, no such definite policy is resolved upon, the majority of the holders of this of short securities will believe the prediction that specie payments may be soon resumed. Of what use will it be to advertise that they may convert into Five-twenties? Will they not hold their notes in hopes to get gold for them? Can men with such expectations be expected to part with seven-thirty notes, or compound legal tenders, at present prices? Is it not clear that the circulation of such delusive promises of early resumption is calculated to have a very mischievous effect on the public credit, and to contribute to produce serious embarrassment hereafter to the Treasury?

For these reasons, as well as for others which have often been urged, we trust that a fixed policy will be decided on, published, and adhered to by Congress, and that by this authoritative means prevalent mistakes may be corrected, and threatening evils turned aside. It is also of the highest importance that full publicity should be enforced as to all the

doings of the Treasury, whether in regard to the cancelling of the currency, the sale of gold, or to the conversion of securities.

#### THE LABOR MARKET AND IMMIGRATION.

The present condition of the labor market presents features of significant interest. There is no longer that extreme scarcity of hands which was one of the early results of the close of the war. By one means or another the several branches of industry have obtained as much labor as they require; and now we witness the commencement of a glut in the market. In some branches of manufactures employers are discharging a portion of their force; and in most trades there is such an increased competition for employment that it is found practicable to commence a reduction of wages.

This changed aspect is due to a combination of causes. The natural result of high wages is to induce an increased resort to the use of labor-saving contrivances; and this process has doubtless been in active operation during the last three or four years, enabling producers to realize a given result with a diminished number of hands. It may be presumed also that, for some months past, all the returned soldiers have found their way back into the ranks of the laboring classes, forming a most important accession to the productive force of the country. The devastated condition of the South has also contributed to drive from that section to the border States and the North large numbers of the more intelligent negroes and not a few of the young men of the South, whose fortunes have been scattered by the vicissitudes of war, preferring to submit to the necessity of earning a living in the North, where they are strangers, to doing so among their friends and where their circumstances would constantly remind them of their changed condition. Again, the high price of labor has, no doubt, induced many to engage in the lighter employments who otherwise would have remained inactive; and, in this way, minors and women have contributed more than their wonted share to the production of the country.

But the chief accession to the supply of labor has come from immigration. The arrivals of emigrants at this port during the present year have been on a scale exceeding anything within the last twelve years. Up to the 12th inst., 235,111 emigrant passengers had been registered at Castle Garden; and unusually large numbers have arrived at other ports. During the last three years 662,263 emigrants have arrived at New York; which is about 400,000 more than for the three years next preceding the war. This very large accession has gone far toward supplying the deficiencies of the producing population caused by the casualties of war; and one of the most conclusive indications that the vacuum thus caused has been already filled up, is the fact that the tide of immigration has now turned backward. Many of those lately arrived are suffering from their inability to find employment. We learn, indeed, that recently the number of emigrants returned from Castle Garden has averaged about 2,000 per week, the majority being destined for Ireland. The offices of the European consuls, especially those of England, Germany and Sweden, are still beset with crowds whose means have been exhausted while fruitlessly waiting for employment; which indicates the probability of a continuance of this efflux.

It is clear, from these facts, that we have reached a condition in which the supply of labor exceeds the demand for it. We do not mean to imply that the supply exceeds our means in capital for employing it; for while there is a surplus of labor, there is at the same time a large amount of idle capital. The truth rather is that our ability to produce exceeds our ability to purchase. The yield of goods and commodities resulting from the labor at present employed exceeds what

the people are prepared to buy at current prices. If all the producing resources of the country are to be employed, it must therefore be upon terms which will admit of the products being sold at lower prices than at present. The moral of the present surplus of labor is thus very obvious; it means lower wages and lower prices generally. That result is inevitable. The competition for employment must necessitate a reduction of wages. This consequence is the more certain from the fact that employers, in many instances, are losing heavily upon their productions, necessitating them either to suspend operations or to reduce wages. The process is painful to the working classes, and one to which many capitalists, out of consideration for their hands, are reluctant to yield. But it is compelled by an inexorable natural necessity; and the sooner it is yielded to the less will be the suffering to all parties.

Legislation may afford a certain amount of relief, and should be prompt to yield it. The large advance in prices necessitated by the current heavy taxation tends to limit the consumption of goods, and consequently to curtail the demand for labor. And the derangements and uncertainty arising out of the inflated condition of the currency have a direct tendency to discourage production generally; which again operates against the laborer's interest. By appropriate legislation upon the matters of taxation and currency it is therefore within the power of Congress to afford much relief to the working classes in their struggle against the adverse results of high prices. The interest of the operatives lies in yielding, without rash resistance, to the tendencies in the labor market above indicated. It is very clear that employers cannot longer pay the current rates of wages without incurring an injury in which workmen must suffer in common with the capitalist. If the demand for a reduction of wages is resisted, the resistance must therefore be unsuccessful, and can only inflict unnecessary suffering upon the workmen. By accepting lower wages production will be sustained, the demand for labor will be kept up, few will suffer from lack of work, though all may have to partially curtail their enjoyments, and ere long an important compensation will be realized in a reduction of the costs of living; all that is taken from the laborer in the shape of wages being returned to him in the form of commodities.

**TRADE OF GREAT BRITAIN AND THE UNITED STATES.**

**COTTON, BREADSTUFFS, PROVISIONS, ETC.**

The British Board of Trade returns for the month of October and the ten months ending October 31, received by the last mail, show more conclusively the effect of the recent panic on the trade of the United Kingdom. A high rate for money is said to stimulate exports and to discourage imports, and the statements now at hand show precisely these results. In the export trade of that country there is a very large increase this year as compared with 1865, viz.: of about twenty-three millions sterling, and the total for the month of October is £1,600,000 greater than in the corresponding month in 1865. With regard to imports a decline has taken place as the year has progressed, viz., from £23,243,701, the highest point touched in the month of June, to £18,356,015, the total for the month of September. Taking, however, the returns as a whole, the trade for the first ten months was most satisfactory in its extent, but it does not appear to have been so remunerative as in former years. Many branches, however, have evidently been carried on at a considerable profit, for unless large profits had been made we should certainly have heard of more numerous failures from the other side.

The declared value of the exports of British and Irish produce and manufactures during the month of October was £16,895,894, against £15,547,225 in 1865, and £12,871,491

in 1864. For the ten months, the aggregate value of the shipments was £158,832,792, whilst in the corresponding period in 1865, the total shipments were valued at £185,264,602, and in 1864 at £136,275,652. The figures for each month in each of the last three years are subjoined:

The computed real value of the imports of the principal articles of merchandise in the month of September was £10,356,015; against £21,632,731 in 1865; and £19,961,633 in 1864. The total for the nine months is £174,167,605, against £137,303,165 last year, and £160,974,110 in 1864. The following figures show the total value for each of the first nine months of the present and last two years:

**COTTON.**

The imports of cotton in October were 36,000 cwts. less than in 1865, but from the United States, the arrivals showed an increase of 27,000 bales. The arrivals from Mexico and the West Indies have now ceased, and from Egypt only a small quantity of the new crop has as yet been received. Our latest advices from Egypt state that the crop had been over-estimated, the total growth being expected to reach a total of 400,000 bales, or 200,000 bales less than the estimates first put forward. In the East Indies the crop is said to be looking well. The import of cotton into the United Kingdom during the ten months ending October 30 was 10,610,271 cwts., against 6,315,565 cwts. in 1865, and 6,146,796 cwts. in 1864. The particulars of these imports are subjoined:

**BREADSTUFFS.**

This market has now assumed an important position

throughout the world, and a considerable rise has taken place in prices since the 1st of September. In England the rise is as much as 17s. 6d. per quarter of eight bushels, and in other countries the advance is equally important. In England the crop is somewhat below an average; but a considerable proportion has been harvested in poor condition; hence, the whole of the crop is not immediately available for consumption. In the northern counties this is especially the case, and millers in those districts are therefore compelled to go south to purchase the drier and better harvested wheats produced in that quarter. The French crop is certainly not so deficient as many persons would have led us to expect, and it is now a certainty that not only will the cargoes which had been purchased at Black Sea ports be ordered to England, but that, without these, exports of flour from French to English ports will shortly take place. Large supplies of Russian flour have for the last few weeks been received into the eastern English ports, at the rate of about 25,000 sacks of 280 lbs. weight per week; but as the navigation of the Baltic would shortly close, a termination to these importations would ensue. The Prussian crop of wheat has certainly been injured by the recent war, for although prices are so high in England, the imports from the ports of Dantzic, &c., show a considerable falling off from last year. The accounts we have received from the south of Russia are confirmatory of the excellent crop produced in that quarter. As fair supplies of wheat and large supplies of flour were expected from the Baltic prior to the close of navigation, and as there were about 700,000 quarters of wheat afloat to Great Britain from the south of Russia at the date of our latest advices, there was a decided pause in the wheat trade, and millers showed no disposition to buy, except at reduced rates. But as the information at hand from this port was to the effect that very little produce was being shipped to Europe, holders of wheat and flour were very firm, and fully the recent advance in prices was demanded. The import of wheat into the United Kingdom in October was 1,830,569 cwts., against 3,058,269 cwts.; and of flour 258,623 cwts., against 295,396 cwts. last year. PROVISIONS.

The imports of these during the ten months were not materially in excess of last year. Prices in England continued to rule high, but as the supply of pigs in the kingdom was very large, and as the pork season had opened at very moderate quotations, it was expected that a fall in the value of salted meats would take place. The imports in the ten months are subjoined:

LIVE STOCK.

There has been no abatement in the value of butcher's meat in England, consequently prices remain at a high point. The cattle plague cannot be said to have died away, for several cases have recently been reported; and as such have occurred, fears are entertained that in the event of the Government modifying or cancelling the present regulations in reference to the cattle traffic of the kingdom, further serious outbreaks will take place. Some of the leading farmers, who have even incurred much loss and inconvenience, are strongly in favor of an adherence to the existing rules for a further period of six months. The following are the figures relating to the imports of live stock for the ten months:

[From our own Correspondent.]

LONDON, Saturday, Dec. 1, 1866.

The Bank return of the present week is a very favorable statement, and the position of the establishment is now one of great strength. The Bank Directors, however, have considered it prudent to make no change in the rates of discount, and the minimum quotation remains, therefore, at four per cent. As the rate is at so moderate a point, the policy of the Directors has not excited discussion, and it is now maintained that we shall not witness a lower rate for accommodation during the present year. We are fast approaching the close of 1866, and between now and then numerous and heavy payments will have to be made. During the whole of the present month we shall have considerable activity in the demand for discount, in connection, partly, with ordinary payments, and partly with the payments on new loans, of which several for small accounts, on account of our Australian Colonies, have recently been brought forward. The Russian loan of £6,000,000 will absorb a large amount in some shape or other; but as the Russian government is said to be largely indebted to the mercantile body in this country, it does not seem probable that any considerable portion will be sent away on this account. The mercantile demand for discount is still small; but the recent loans have reduced the supply of available money; hence, in addition to a better inquiry for accommodation, the source of supply has been to some extent contracted, and higher rates have, therefore, been obtained. Money, however, is now returning freely from the Provinces. The Bank return shows this circumstance most conclusively. During the six days embraced in that return, £203,000 in bar gold was taken to the Bank; whilst £65,000 in sovereigns was withdrawn from export, making a balance in favor of the Bank of

£138,000. The Bank return, however, shows an increase in the supply of bullion for the week of £422,656, the difference between these two amounts being attributable to the return of coin from the provinces, which had been withdrawn from the metropolis, or had been retained in the agricultural districts for completing the late tedious harvest. With a contracted home trade, and universal caution in entering into fresh engagements, the actual mercantile demand is not likely to be up to the average. But, at the same time, much money is refused for numerous purposes. Calls, to meet the losses of defunct or semi-defunct companies, continue to be freely made, and these rather than showing signs of diminishing, have certainly a tendency to increase. Scarcely a day, and certainly not a week, elapses, without some call being made or some company applying for power to wind up. The company mania may now be said to have died out, and as many have evidently learned a very enduring lesson, it will probably be some years before we shall witness such a host of new undertakings in so short a time. The affairs of Overend, Gurney & Co. remain in a state of abeyance. The official liquidators are said to have sufficient funds in hand to pay 5s. in the pound to the creditors, but at present they do not seem inclined to move in the matter. The creditors appear, indeed, to be a patient people, for although there has been so much discussion with regard to this concern, they have scarcely moved at all, and even now seem disposed to await quietly the announcement of the payment of the first dividend. The Agra Bank will shortly commence business, as soon as the requisite formalities have been gone through with at the Court of Chancery. The applications for shares have been greater than was required; but although they have been thus far successful, the Directors will probably find some difficulty in raising the new bank to the standard of the Agra and United Service Bank. The success of the new institution, however, is universally desired. Several meetings of the London, Chatham and Dover Railway proprietors have been held this week. The new directors proposed a short time since to raise £1,500,000, which should be a first charge on the line, the debenture holders to have the first choice of subscribing to this new capital. At a meeting of the debenture holders, on Monday last, this proposal was received with disapprobation. The meeting was very noisy in character, and demands were made to sell the line, but eventually a quieter feeling prevailed, and an arrangement was arrived at between the directors and the debenture-holders, for the latter to inspect the books of the company before they committed themselves to any arrangement. Thus the matter stands for the present. The General Credit and Finance Company have brought their proposals before their shareholders this week, and have obtained their consent to change the name of the undertaking to the General Credit and Discount Company, and to reduce the liability on each share. These are the leading facts in reference to public companies, although many minor cases might be related, but they have very little interest abroad. They are chiefly in connection with the preliminary arrangements of winding up third-rate undertakings.

The Bank has greatly increased in strength during the last few weeks; but, at the same time, the liabilities of the banking department are heavy, and the circulation of notes is still about £2,000,000 above the average of ordinary times. The following statement shows the position of the establishment at the commencement of the present year, during the height of the panic, and on Wednesday evening last:

	Circulation.	Advances.	Bullion.	Reserve.	Bank rate.
January 3	£22,221,867	£24,737,687	£13,106,133	£5,979,748	8
May 2	23,309,819	20,390,395	13,509,140	5,636,140	7
" 8	—	—	—	—	8
" 9	22,806,660	20,844,217	15,156,140	5,811,745	9
" 12	—	—	—	—	10
" 17	26,650,817	30,943,259	12,323,805	1,202,810	10
" 23	26,020,693	31,050,406	11,857,786	1,388,216	10
" 30	26,562,525	33,447,463	11,878,775	859,980	10
Nov. 28	23,003,209	19,186,008	18,175,570	10,688,820	4

The note circulation is therefore about £800,000 higher than at the commencement of the year, but £3,500,000 less than at the period when the Bank's resources were most severely pressed upon. Advances, since the 30th of May, have fallen to the extent of £14,260,000 whilst, as compared with the same period, there is an increase of £6,300,000 in the supply of bullion, and of £9,800,000 in the reserve of notes and coin.

The demand for discount during the present week has, as stated above, ruled active, and the rates in the open market are only about one-eighth beneath those of the Bank of England. A large amount has been required, viz.: £550,000, to pay up in full the Victoria 6 per cent. loan, and as the letters of allotment for the Russian loan will be shortly issued, further sums will be required to pay the first instalment. A New Zealand loan for £250,000 was announced yesterday, and as the position of the money market is favorable for the introduction of foreign loans, there will probably be further applications. As the fourth of the month is approaching, we shall experience a good de

mand to meet the engagements then falling due. To-day there is an active inquiry for accommodation, and the rates for the best paper, having various periods to run, are as follows:

	Per Cent.		Per Cent.
Bank minimum.....	4 @	3 months' bills.....	4 @
Open market rates:		4 & 6 months' trade bills....	4 1/2 @ 5
30 to 60 days' bills.....	3 3/4 @ 4	4 & 6 months' bank bills....	4 @ 4 1/4

There has been very little change in the rate on the Continent during the week. The supply of money at Paris has increased to the extent of £712,000, and the open market rates for the best paper is 2 1/2 @ 3/4 per cent., or 3/8ths to 1/2 per cent. beneath the official minimum. In other quarters the quotations rule stationary. The following are the rates at the leading cities:

	Bank rate.	Open market.		Bank rate.	Open market.
At Paris.....	3	2 1/2 %	Turin.....	6	—
Vienna.....	5	5 1/2 %	Brussels.....	3	2 1/4
Berlin.....	4 1/2	4	.....	3 1/2	adv—
.....	5 adv	—	Madrid.....	7	—
Frankfort.....	3 1/2	3 1/2	Hamburg.....	—	3 1/2
Amsterdam.....	5	5	St. Petersburg.....	7	8 @ 9

Bills on Continental cities have been in increased demand, and the quotations are somewhat lower, but there is no especial change from last week.

Owing to the Fenian disturbances in Ireland there has been less firmness in the Consol market during the present week, and prices have steadily declined. Yesterday, in consequence of the favorable returns of the Banks of England and France, the market opened with increased firmness, at an advance of nearly one-quarter per cent.; but at the close prices were rather weak. There is very little business doing to-day, and no material change has taken place in the quotations.

The highest and lowest prices each day during the week are subjoined:

W'kend'g Dec 1	Monday.	Tuesday.	Wed'day.	Thursday	Friday.	Sat'day.
Consol. for mon'y	89 3/4 @ 90	89 3/4 @ 7/8	89 3/4 @ 3/4	89 3/4 @ 3/4	89 3/4 @ 90	89 3/4 @ 7/8

Rather a large business has been done in the market for United States Five-twenty bonds. Prices, however, owing to the receipt of a higher exchange, and a heavier premium on gold from New York, have occasionally had a flat tendency. Atlantic and Great Western Railway securities have ruled heavy, and at one period of the week there was considerable depression. In Illinois Central Railway shares very little business has been done; but Eries have been dealt in to a fair extent, at lower prices. The closing quotations to-day are subjoined: United States Five-twenty bonds, 70 3/8 to 70 5/8; Atlantic and Great Western Railway debentures, 54 to 58; do. Consolidated Mortgage bonds, 41 to 41 1/2; Erie Railway shares, 45 1/2 to 46 1/2; and Illinois Centrals, 76 1/2 to 77 1/2. Mexican stock is much firmer, and at one period of the day the quotation was as high as 19 1/2 @ 1/4. To-day's price is 19 1/2 @ 1/4. Russian scrip, which has sold as high as 2 1/2 @ 1/4 premium, is now quoted at 1 3/4 @ 1/4 premium.

As the week closes the trade for English wheat is very inactive, and millers bid 1s. to 2s. per quarter less money; but factors at present refuse to sell. Russian wheat, ex-ship, has, in some instances, been disposed of at a decline of 1s. per quarter.

English Market Reports—Per Cable.

The money market has been remarkably steady through the week with discounts at 3 1/2 @ 4 per cent., and consols, ex-dividend, at 88 1/2 @ 1/4 for money, and 88 3/4 @ 1/4 for account. United States 6's (5-20's) of 1866 have scarcely varied a fraction from day to day. The series of 1864 and 1865 have now been admitted to call at the Exchange, and are selling from 1 to 1 1/4 less than the old bonds. In American railroad shares there has been increased activity, and prices have advanced. The following statement shows the daily closing price of Consols, and the specified American securities:

	Fri. 7.	Sat. 8.	Mon. 10.	Tues. 11.	Wed. 12.	Thur. 13.
Consols for money.....	88 3/4	88 3/4	88 3/4	88 3/4	88 3/4	88 3/4
U. S. 5-20's, 1862.....	71	71	71	71	71	71
Illinois Central shares....	77 1/2	77 1/2	77 1/2	77 1/2	77 1/2	77 1/2
Erie Railway shares....	46 1/2	46 1/2	47	47 1/2	47 1/2	47 1/2

At Frankfort United States Sixes, 1862, are quoted at 75 3/4 @ 1/4.

The Cotton market at Liverpool has been active, and on Thursday closed steady. The total business of the week has been from 75,000 to 80,000 bales, against 65,000 bales the previous week. Upland middlings closed at 14 1/2, being a gain on the week of 1/2 @ 3/4 d. per pound.

The recent activity observed in the Breadstuffs market has noticeably subsided. Prices, however, are not seriously affected. Wheat is 1d. per cental lower. Western Corn, on the 10th, was quoted at 39s. per quarter, and next day at 38s. 3d., being 9d. lower. No report has been received of later date than Tuesday.

The Provisions market has been generally inactive and dull. The increased firmness in Pork, reported on Monday, appears from later reports to have been lost.

American Turpentine is reported lower. Tallow is steady. Petroleum unchanged.

The Manchester market is reported steady.

**AN ACT TO AMEND THE NATIONAL CURRENCY ACT.**—On Wednesday of this week the Bank bill was reported to the House by Mr. Hooper, Chairman of the Committee on Banking and Currency. It is entitled an act to amend an act to provide a national currency, secured by a pledge of United States bonds, and to provide for the circulation and redemption thereof, and is, in all its main features, similar to the bill reported last year, as an amendment to the act of 1864, and for which this is a substitute. First, it limits the circulation of any one bank to \$1,000,000; second, redemption in New York; third, reduction of the circulation of existing banks \$31,000,000 by scaling down the circulation of all banks whose capital exceeds \$300,000; fourth, distributing \$30,000,000 of this circulation equally among State banks yet to be converted into National banks, and to new banks in States that have heretofore received the least ratable proportion of circulation; fifth, fuller and more complete returns to the Comptroller of the Currency; sixth, more power to the Comptroller to close up defaulting banks; seventh, more severe punishment for counterfeiting.

**SPECIE PAYMENT AND THE LEGAL TENDER CURRENCY.**—The following interesting correspondence between Hon. E. G. Spaulding and the Secretary of the Treasury has been sent us for publication:

MR. SPAULDING TO SECRETARY M'CUCCLOCH.

FARMERS AND MECHANICS NATIONAL BANK,  
No. 3 Spaulding's Exchange,  
Buffalo, Dec. 4, 1866.

DEAR SIR—You will do me a favor by sending to me by mail a pamphlet copy of your report and accompanying documents. I have only seen a synopsis of it, but it seems to me that you understand the situation, and have stated it with force and ability. I congratulate you on the favorable exhibit of the public debt, which is in a great measure due to your discreet and prudent management of the national finances. You have no doubt now, to a large extent, control of the finances of the country, and I think that you will, of necessity, contract moderately, so as to preserve a tolerably easy money market, in order to be able to fund the compound 6's and the 7-30's into long gold-bearing bonds, between this and the 15th of July, 1868. There may be occasional spasms and tightness for money with the speculators, but generally I shall look for plenty of money for legitimate business for at least a year to come. If the speculators should get some check it would be a good thing for the country, and all men engaged in industrial pursuits would not complain.

I hope you will be able to reach the specie standard with at least \$250,000,000 of plain legal tender United States notes still outstanding. The amount of gold and silver coin now available in this country is so small that it constitutes a very inadequate basis on which to rest the largely increasing volume of business to be transacted, and unless we can have legal tender in some form, other than gold and silver coin, I think we will hereafter be very much exposed to panics and revulsions, to the injury of legitimate business, and, consequently, diminished revenues. If we can maintain \$250,000,000 of the paper tender at the specie standard, in addition to the supply of gold and silver, I think the business of the country would in future be much more steady and uniform.

Yours truly,  
E. G. SPAULDING.

Hon. HUGH M'CUCCLOCH, Secretary of the Treasury.

SECRETARY M'CUCCLOCH'S REPLY.

TREASURY DEPARTMENT,  
WASHINGTON, Dec. 7, 1866.

DEAR SIR.—Your favor of the 4th instant is received. You will receive a copy of my report through the Comptroller of the Currency. It was very hastily written, but is, I think, sound in doctrine. What we need is an increase of labor. If we could have the productive industry of the country in full exercise, we could return to specie payments without any very large curtailment of United States notes. My object has been to keep the market steady, and to work back to specie payments without a financial collapse. I shall act in future as I

have in the past, with great caution, and attempt no impracticable thing.

I am, very truly, yours,

H. M'CUCCLOCH.

Hon. E. G. SPAULDING, Farmers' and Mechanics' Bank, Buffalo, N. Y.

**MANCHESTER COTTON YARN AND GOODS' MARKET, LONDON WOOL SALES, ETC.**—In reference to these markets, our correspondent in London writes as follows:

**MANCHESTER, Nov. 28.**—The yarn market is very flat. Manufacturers show no disposition to buy, and spinners are only able to conclude sales by submitting to a reduction in the quotations. The trade is dull, both as regards home trade and shipping yarns. In cotton cloth very little business is doing. There is no material change to notice in prices, but the tendency is strongly downwards.

**LONDON WOOL SALES**—These sales progress with fair spirit, but taken, as a whole, the biddings cannot be considered active. The best descriptions of wool move off freely at full prices; but inferior qualities are quite 1/4 to 1d. per lb. lower than at the last series of sales. There is a moderate export inquiry.

We call attention to the advertisement by Messrs. L. P. Morton & Co., of the International Ocean Telegraph Company, the shares of which are offered by them for subscriptions. The advantages under which this corporation commences operations, and the facts which should make the enterprise successful and profitable are stated very clearly in the advertisement.

FRIDAY, P. M., Dec. 14, 1866,

**THE MONEY MARKET.**—There has been no important change in the aspect of monetary affairs during the week. Exchange with the West still favors this city, and moderate amounts of currency continue to arrive from that section, consisting chiefly of National Bank notes. There is a slight flow of greenbacks to the South; but not sufficient to materially affect the course of the market. The demand from the brokers has been limited until the close of the week, when a more active speculative movement has produced a somewhat freer demand for call loans.

The tone of general business is more settled. The recent fall in the price of merchandise has removed the reluctance to operate shown among buyers, and the view prevails very generally that the present range of prices affords a basis for a moderately active business. At the same time, there is in some branches of trade a beginning of the reduction of wages, which, as it cheapens production, also affords hope of a freer commercial movement. These features of improvement in trade generally have not, however, eradicated from the discount market a certain degree of caution. There is a disposition to extend the term of credit to six months, which creates a certain degree of mistrust among buyers of notes, and operates injuriously upon the credit of paper generally. The generally unhealthy condition of trade has a tendency to produce more than usual caution in the selection of names, and much paper that has ordinarily ranked A 1 is now classed in a lower grade. Prime 2 to 4 months paper passes at 6½@7 per cent.; but a large amount of "good" paper is negotiated at irregular rates.

On demand loans the rate is very generally 6 per cent., with exceptions at 5@7 per cent.

The following are the quotations for loans of various classes:

	Per cent.		Per cent.
Call loans.....	6 @ 7	Good endorsed bills, 3 & 4 months.....	6½ @ 7
Loans on bonds & mortg.	6 @ 7	do single names.....	7 @ 8
Prime endorsed bills, 2 months.....	6½ @ —	Lower grades.....	8 @ 10

**UNITED STATES SECURITIES.**—The confirmed depression of the gold premium has had the effect of putting down the price of old Five-twenties; and other Governments have declined in sympathy. Five-twenties of 1862 have declined 1¼; do. 1864, ¼; do. 1865, 1; do. 1865, new issue, ½, and Ten-forties ¾. Seven-thirties are ¾@ per cent. lower. The decline in prices, however, has the effect of drawing out buyers, especially from the interior, and transactions have been fully up to the average. At London the price of Five-twenties has ruled steady at 71. The London Exchange has authorized the calling of each description of Five-twenties at its board. Some sales of bonds upon foreign account have been reported during the week, but they were probably some inconsiderable lots held here on account of foreign owners, rather than bonds returned here from abroad.

The following are the closing prices of leading securities, compared with preceding weeks:

**RAILROAD AND MISCELLANEOUS SECURITIES.**—The general tone of the stock market has been more buoyant. There is a steady recovery from the depression resulting from the flurry in the money market last month, and more disposition to buy for an advance of prices. During the latter half of the week a smart attack has been made upon the "short" interest, resulting in an advance of prices. The rise has been somewhat irregular, being confined to certain specialties, chiefly Northwestern, Cleveland and Pittsburg, Michigan Southern, and Cleveland and Toledo. A party who had sold short largely upon Northwestern has been "cornered" during the last two or three days, with a consequent advance of the common stock to 54½, and of the preferred to 76½. The favorable exhibit in the annual report of the N. Y. Central road had the effect of putting up the price of the stock 1½@2 per cent. The activity of the last three days appears to have been spasmodic, and appearances indicate a return to dulness on the approach of the holidays.

The total sales at the boards during the week amount to 551,083 shares, against 322,400 for last week. The transactions in Northwestern reach the very unusual total of 164,319 shares; in Erie 55,903; in Cleveland and Pittsburg 46,500, in Michigan Southern 52,900, in Reading 64,055, and in Chicago and Rock Island 27,690.

The following are the closing quotations at the regular board today, compared with those of the six preceding weeks:

For the details of the week's transactions, the reader is referred to the tables headed "Business at the Stock Boards," in the next previous page.

**THE GOLD MARKET.**—Gold continues upon the whole weak. The supply upon the market is liberal compared with the limited demand both for custom and export. At the same time a further addition to the stock will come out of the Treasury in January in payment of coupons, the anticipation of which tends to further depress the premium. The professions of Mr. McCulloch in favor of a resumption of specie payments, and the proposal introduced into Congress for weekly sales of gold, have also a certain effect upon the price of gold. On the other hand, the extraordinary character of some of the political measures introduced into Congress has an opposite tendency. The large "short" interest on gold has been very generally covered during the week, and loans are easy, 3@5 per cent being paid for having gold carried.

The following have been the highest and lowest quotations for gold on each of the last six days :

	Highest.	Lowest.		Highest.	Lowest.

**FOREIGN EXCHANGE.**—The expectations of a liberal supply of cotton bills from the South have been disappointed. There has, however, been an unusually large amount of bills drawn against shipments of cotton made from this port during the week. The demand for bills has been quite active, and the rates of Exchange are firmer, having, this afternoon, verged upon the specie shipping limit. Bankers' prime 60-days' sterling closes at 109 1/2.

The following are the closing quotations for the several classes of foreign bills, compared with those of the three last weeks :

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, Dec. 14.

There is some improvement in trade the past week. December is not usually a busy month; and current transactions are fully up to the average volume, for the time. Stocks in dealers hands are quite reduced. We have had a general anticipation of a marked decline in prices; and, for this reason, long continued dulness; but imperative demands for consumption cannot be longer held back.

Cotton has advanced with considerable activity. Bread, stuffs have recovered from the depression heretofore noticed but the improvement is quite irregular and not well supported. Groceries show rather more activity, especially in Sugar and Molasses. There has been more doing in tobacco.

Provisions have been quite active, and in hog products there has been a general though moderate advance in prices. The unfavorable weather for packing which prevailed last week was followed by cold weather on Monday, upon which live hogs have advanced in this market from 6 3/4c. to 8 1/4c. per pound, and dressed hogs from 7 3/4c. to 9 3/4c. Pork has also advanced over a dollar a barrel, and lard nearly one cent.

Naval Stores have been irregular. Spirits Turpentine is firmer, having sold at 68c.; but Common Rosin has declined to \$4, and finer grades of Rosin are about a dollar a barrel lower. Crude Turpentine, Tar, &c., are dull.

The business in Hides early in the week was quite large, prices ruling in favor of the buyer, and domestic slaughters declined 1 cent per lb. The market closes quiet. There have been large sales of foreign Deer Skins.

Metals have shown no marked activity. Some transactions in Pig Iron show steadily declining prices.

All East India Goods are dull, but Manilla Hemp and Calcutta Linseed are quite firm.

Fish and Fruit at some decline, close more steady. Hops are firmer. Tallow has slightly improved in the past two days.

Petroleum has slightly improved, with sales of several thousand bbls. on Wednesday. The extreme low prices have encouraged a moderate speculative movement.

In Freights there is no important change. The shipments of Cotton to Liverpool have increased; and on Tuesday and Wednesday, the shipments of grain to Liverpool and outposts were about a quarter million bushels. But latterly the offerings have been limited and rates are drooping.

Receipts of Domestic Produce for the Week, and since January 1.

**COTTON.**

FRIDAY, P. M., Dec. 14, 1866.

The receipts of Cotton the past week at all the ports amount to 63,941 bales, against 60,843 bales the previous week, making the total receipts since September 1, this year, 521,703 bales, against 670,466 bales for the same period in 1865. The exports from all the ports for this week show a slight increase, the total reaching 24,281 bales, of which 22,564 bales were to Liverpool, 101 bales were to Havre, 500 bales were to Spain, 617 bales to Hamburg, and 499 to Mexico, as follows:

\* These figures we have received by telegraph, our usual weekly mail report having failed to reach us.

The total foreign exports from the United States since September 1 now amount to 184,135 bales, against 322,601 bales last year. Below we give our usual table of the move-

ment of Cotton at all the ports since Sept. 1, showing at a glance the total receipts, exports, stocks, &c.:

The market this week has been active and buoyant. The favorable advices from Liverpool, with no further increase in deliveries at the ports, and a disposition to accept lower estimates of the crop, have resulted in an increased export and speculative demand. There has also been less said about the New England spinners working short time, and it is now doubtful whether any general movement of the sort will take place. Very little was done last Saturday, but on Monday, Tuesday and Wednesday the sales aggregated 14,000 bales. Yesterday less was done, and prices receded slightly from the advance; and to-day the market is also quiet, as the Liverpool report is not quite so strong. Exchange is easier, and advanced rates of freight are demanded by the steamers for Liverpool. The sales for the week amount to about 18,000 bales.

\* Reshipments.

There are no exports of cotton this week from Philadelphia or Baltimore, and only 24 bales from Boston, all of which were shipped to Liverpool per the steamer Africa.

GALVESTON, Dec. 1.—We have received one week's later statement by mail from Galveston. The receipts for week ending Nov. 30 were 5,405 bales, against 3,572 last week, and the shipments were 2,493 bales, of which 941 bales were to Liverpool, per bark Fille de L'Air, 1,363 to New York, and the balance to New Orleans. Below we give the receipts, sales, and shipments for a series of weeks, and the stock, price of middling, rates of freight to Liverpool and New York, and price of gold at the close of each week:

Per steamer.

The sales for the week amount to 1,942 bales, showing increased activity. Towards the close of the week there was less disposition to operate, buyers being unwilling to meet the views of factors. Freights are active, many parties shipping on their own account, in preference to selling at the prices offered.

SAVANNAH, Dec. 8.—The receipts for the week ending Dec. 7 were 5,831 bales (of which 222 were from Florida), against 6,460 bales last week. The shipments this week were 8,240 bales, of which 3,889 were to Liverpool per ship Thomas Freeman, 2,967 were to New York, 1,048 were to Boston, 216 to Philadelphia, and 120 to Baltimore. The transactions this week have continued very limited, sellers still declining to meet the views of buyers. Quotations are nominal. Freights to Liverpool are 1/2@d., and to New York by steamship 1c. Sterling exchange is nominal at 150.

CHARLESTON, Dec. 8.—The receipts for the week ending Dec. 7 amount to 5,221 bales, against 4,899 bales last week. Shipments for this week amount to 5,267 bales, against 3,880 bales last week, of which 2,609 were to Liverpool (per ship Missouri), 2,524 were to New York, and 126 to Baltimore. The receipts, sales, and exports for a series of weeks, and the stock, price of middling, rates of freight to Liverpool and New York, and price of gold at the close of each week since Oct. 5, were as follows:

The market has exhibited some activity during the week, but has shown considerable weakness, in sympathy with the dullness reported at Liverpool and New York. Middling closes at 31, low middling 30, strict middling at 32, and good middling at 33. Sterling 60-day bills were selling at \$6 60@56 62.

LIVERPOOL, LONDON, INDIAN AND OTHER COTTON MARKETS.—Our own correspondent in London writes as follows respecting those markets:\*

LIVERPOOL, Dec. 1.—In the early part of the week there was a fair demand for cotton, but since then the inquiry has fallen off, and the quotations are now a shade lower than at the close of last week. The principal changes, however, are confined to middling qualities of American and Brazilian produce, which exhibit a fall in price of 1/4d per lb. The aggregate business done is moderately large, and the trade have taken a fair supply. The total sales of the week ending Thursday evening

The tobacco market this week, in hogsheads, has been quiet. The season is drawing to a close, and the assortment on the market very much reduced. The business of the week is only about 25 hhds., about equally divided between exporters and the trade. The range of prices paid is from 4½c. to 17c. In seed leaf there has been a pretty fair business, the sales footing up some 1,000 cases in the range of 36@34c., including 168 cases old Connecticut, 34c.; 64 do. old Ohio, 6½c.; 15 cases New Pennsylvania, fancy wrappers, 31½c.; 100 do. new Ohio wrappers, 15c.; 87 cases old Ohio wrappers, private terms; 49 do. Ohio assorted, 6c.; 64 do. Ohio assorted, 9½c.; 400 do. Pennsylvania, new—a running lot—10c.

Foreign tobacco has been rather more active. The sales of Yara amount to about 250 bales, part at auction, at 60@78c. We also notice sales of 150 bales Havana at 75@95c. Manufactured tobacco has met with an improved demand from the trade, but no large transactions are reported.

THE TOBACCO CROP.—The crop of tobacco this year promises to prove a very successful one, both in quantity and quality, although the estimates made of the total yield of the country are very contradictory. Some place it at only 140,000 hogsheads, while others give a much higher figure. The following detailed estimate, in pounds, we take from Rader's Circular for this month:

\* Segar Leaf, called Seed leaf.

+ Segar Leaf and Hogshead Tobacco.

With regard to the Virginia crop, the following, from a late number of the Richmond Times, will be found to be of interest:

The crop of this year, though small, is in quality one of the best ever made, and we have reason to believe there will be a good demand for every pound of Virginia and North Carolina tobacco. The crop of North Carolina finding a market in Virginia, and coming under the same inspection, the crops of the two States are known as "Virginia Tobacco."

From the best information we can get we do not think the crop will reach two thirds of the crop before the war; certainly it will not exceed two thirds. We estimate it in round numbers between forty and fifty-five thousand hogsheads. The crop for several years previous to the war was between seventy and seventy five thousand hogsheads.

In North Carolina the counties of Caswell, Rockingham and Person produced fine crops this year, and probably as much tobacco as they ever made previously. In Warren, Granville and Franklin counties, which, before the war, produced more tobacco than all the rest of the State, the crop is very short, cotton, to a great extent, having taken the place of tobacco. In Granville not over one-half a crop, and in Craven and Franklin not over one-fourth. The crop of Warren County will be very much raised, as it produced not only very fine "manufacturing" tobacco, but a great deal of fine "shipping," suitable for the continental markets of Europe. In fact Warren produced more shipping tobacco of good quality than all the other counties of the State together.—Richmond Times.

MARYLAND.—At Baltimore the market is without any material change. Receipts continue light, and selections of Maryland difficult to make. Sales amount to 300@100 hhds., and at prices within our former range. Ohio and Kentucky continue inactive; no sales reported. Inspected this week, 436 hhds. Maryland, 41 Ohio and 4 Kentucky—total 541 hhds. Cleared, 796 hhds. to Amsterdam, 800 do. and 111 do. stems to Bremen. The receipts of Virginia tobacco at Baltimore for the week, were 113 hhds. and 402 pkgs., with no sales reported.

The following is from our London correspondent:

LONDON, Dec. 1.—During the past month there has been an improved demand for tobacco, and upwards of 1,300 hhds. have changed hands. With the exception of a few sales of Western old strips, in which a slight concession in price has been granted, full rates have been obtained. The new imports are looked upon as of very unsatisfactory quality. The import into London in October was 837 hhds. The deliveries were 1,044 hhds. against 819 hhds. last year. The stock here is 24,425 hhds., against 22,905 hhds. last year; 18,059 hhds. in 1864; 18,034 hhds. in 1863, and 21,610 hhds. in 1862.

BREADSTUFFS.

NEW YORK, Dec. 14, 1866.

The market has been very irregular during the past week. The receipts are liberal, but as the period has arrived for closing inland navigation, holders have exhibited more strength, although stocks are somewhat larger and the demand less pressing than was anticipated.

Flour ruled very dull and heavy early in the week; but since Tuesday the trade have bought more freely, and yesterday and to-day there was considerable speculation, and prices have improved 25@50c. per barrel on the low and medium grades. There was less buoyancy at the close, owing to the fact that the movement was too entirely speculative.

Wheat has arrived freely, and receivers have been forced to sell a portion of the supplies, under which good No. 2 Spring declined to \$2 18, but since Wednesday, with the advance in flour, there has been more demand and reduced stocks, upon which prices have recovered 5@7c. per bushel. The strength of the market is mainly speculative, but millers are the only buyers who supply only immediate wants. The stocks of wheat in the principal markets of the country aggregate about 4,500,000 bushels. The receipts at the principal points are much smaller than at this time last year.

Corn has been entirely under speculative control. Shipments to Europe have again ceased. The stock is large, and the demand for consumption very light; but speculators are very confident. Barley was taken freely for Great Britain early in the week, but the demand has since subsided, and the close is flat at 95c. for prime Canada West in bond, per 48 pounds. Rye has been taken for England and Germany to the extent of about 50,000 bushels, mostly Canada in bond, at \$1 08@1 10 per 56 pounds. A few loads of oats have been shipped to Great Britain, and there has been an active speculation, the market closing firm. About 65,000 bushels Canada peas have been taken for Great Britain at \$1 34@1 36 for Canada in bond, closing quiet.

At Milwaukee, wheat, 310,000 bushels.

LIVERPOOL, Dec. 1.—The trade has been very quiet this week. There has been quite a pause in the demand for wheat and flour, but with very light stocks, buyers resist any concession in price. Indian meal is at 40s. per quarter, but meets a very slow sale thereat. The price of barley

from New York has depressed the market; holders ask 5s. for the finest samples, but sales are not practicable over 4s. 9d. per 60 lbs. At to-day's market there was a small attendance, and a limited demand for wheat; prices were rather in favor of buyers, especially in Illinois, of which several lots were offering ex-quay. Flour was 6d. to 1s. per sack lower. Indian corn being scarce on the spot could not be had under 40s. per qr., but for arrival next week there were sellers at 39s.

GROCERIES.

FRIDAY, P. M., Dec. 14.

The trade in Groceries has become more settled and steadier than previous to the meeting of Congress, in part from the steadier price of gold. But business is still rather light, and not very encouraging. The favorable advices from the coming crops of most kinds has tended to a further reduction in prices, and business is only moderate.

The stock of all the leading groceries is large, and as far as prices in the future are to be influenced by the supply the probability seems to be that the tendency will not be upward. In Tea, dullness prevails in the English market, with large stocks on hand. The shipments from China and Japan from June 1 to October 1, have been:

To Great Britain.....	72,691,791 lbs.,	against 50,179,972 in 1865
To United States (Atlantic).....	4,357,272	3,387,55
To San Francisco.....	28,568	17,435

—showing a considerable increase over last year.

Of Coffee, the stocks, December 1, at the five principal ports New York, Philadelphia, Boston, Baltimore, and New Orleans, were reported at 5,796 tons against 3,482 tons in 1865, being an increase of about 70 per cent.; the imports since Jan. 1 having been 66,300 tons, against 49,177 last year. The excess is accounted for in a great degree by the increase in imports of Rio at other ports than New York.

Of Sugar the stock at the four principal northern ports was reported December 1st at 65,884 tons against 41,140 tons in 1865, the imports having been since January 1st 367,374 tons against 317,306 in 1865. The stocks in Great Britain are also in excess of last year. In the four principal ports there were reported at latest dates (raw sugar) as 194,403 tons against 179,246 in 1865, the imports having been 461,190 tons against 438,051 in 1865.

The stock of Sugar at Havana and Matanzas Dec. 6th was 52,837 boxes against 39,175 last year.

From these figures indicating large stocks at ports of export and also of consumption, we must conclude that prices will not be forced up soon by short supplies. There has been, however, a small business during the last two months and with an increased demand in this month and January the excess in stocks may be cleared off.

TEA.

TEAS have been very quiet in both first and second hands, with no sales from first hands reported during the week. Prices are nominal. At the auction sales on Tuesday nearly the whole offering was withdrawn. The market closes dull and inactive.

Imports of the week have been only 350 pkgs Rising Star from Aspinwall, and 242 pkgs per Denmark from Liverpool.

The following table shows the shipments of tea from China and Japan to the United States, from June 1 to Oct. 15, 1866, and importations at New York and Boston since Nov. 1:

HONG KONG, Oct. 15.—Advices from England have had a depressing

effect on the market for shipments there, but buyers for the American markets have been operating on an extensive scale at the several ports. At Among there has been a steady inquiry for Oolongs for America at \$26 to \$28 per picul for better grades. At Shanghai settlements of green teas for shipment to America had been large. Total settlement amount to 27,200 chests. At Yokohama a fair amount of business has been done. The stock is moderately large but teamen are firm in their demands, and there seems no immediate prospect of lower prices. The purchases have been for the American market.

COFFEE.

COFFEE has declined from last week's quotations, and with the favorable reports Rio is dull. Other kinds have been inactive, but with less decline. The sales are larger than for last week, but still small, amounting to only 6,550 bags Rio. The market closes more steady but inactive. The imports of coffee during the week have been of Rio 5,378 bags per St. Arago, from Havre, 3,200, per Favorite, 2,540, per Mary Black, 3,802 per Wayfare, 3,400 per Arreagon, 4,000 per Pryche, 3,256 per Domitila. Total Rio, 25,576, against 18,090 last week, and 1,250 bags of Hayti. There have been no receipts at Baltimore.

The receipts for the week, and stocks of coffee in first hands (Dec. 11,) are as follows:

SUGAR.

SUGAR was very quiet and declining early in the week, but latterly there is more activity, although at no advance. The sales of raw sugar for the week are about 4,000 hogsheads Cuba and Porto Rico, and 3,700 boxes Havana, the market closing steady at our quotations. Refined sugar has been fairly active, but at lower figures.

The receipts of sugar have been rather larger in hogsheads, &c., and in Cuba boxes than last week. The details of imports are given below:

FRUIT.

FRUITS are in light demand, but prices are very steady for most kinds. A limited business is doing by jobbers, with little or no variations from previous reports.

SPICES.

SPICES have been in a fair jobbing demand, but transactions from first hands are very small. There is but little change in prices, the market closing quiet.

THE DRY GOODS TRADE.

FRIDAY, P. M., Dec. 14, 1866.

The dry goods market has met with little or no change this week. Business is light and irregular, although no uneasiness or weakness is noticed among the regular trade. Some outside holders of goods are placing them upon the market at nominal figures, which operates to depress prices of other goods, especially in jobbers' hands. Agents profess to care but little about the matter, and hold their stocks quite firmly at prices above the market. A few grades of goods and less desirable makes are exceptions to this remark, since they are somewhat nominal in price, especially for large lots. The higher quotations for cotton and a more active market here and in Liverpool strengthens holders somewhat, and leads to the belief that there will be but little further decline in prices.

The following table shows the export of domestic cottons and dry goods from New York and from Boston:

**NEW YORK CENTRAL RAILROAD.**—The following statements are compiled from the annual reports of the New York Central Road:

EARNINGS YEAR ENDING SEPTEMBER 30.

	1865.	1866.		1865.	1866.
Passengers.....	\$4,521,454	\$4,360,248	Dec.....	\$161,266	
Freights.....	8,776,027	9,671,919	Inc.....	855,892	
Other.....	678,042	561,617	Dec.....	113,425	
<b>Total earnings.....</b>	<b>\$13,975,523</b>	<b>\$14,596,784</b>			
Operating expenses.....	\$10,882,358	\$11,013,441			
Sinking funds.....	111,182	112,102			
Rent.....	60,000	60,000			
U. S. taxes.....	411,924	396,155			
Interest.....	974,169	1,049,995			
<b>Total expenses.....</b>	<b>\$12,439,633</b>	<b>\$12,631,693</b>			
Net income.....	1,535,890	1,965,091			
Dividends paid—6 per cent.....	1,469,469	1,478,460			
<b>Surplus.....</b>	<b>\$66,430</b>	<b>\$486,831</b>			

COST OF ROAD IN STOCK AND DEBT.

	1865.	1866.
Stock.....	\$24,591,000	\$24,801,000
Debt.....	14,627,442	14,095,804
<b>Total.....</b>	<b>\$39,218,442</b>	<b>\$38,896,802</b>

**ERIE RAILWAY TRAFFIC.**—The earnings of the Erie Railway and Buffalo Division for the month of November, 1866, were:

Erie Railway.....	\$1,330,448 73
Buffalo Division.....	86,878 79—\$1,417,327 52
<b>For November, 1865:</b>	
Erie Railway.....	\$1,522,471 55
Buffalo Division.....	115,121 00—1,637,592 55
<b>Decrease on Erie Railway and Buffalo Division.....</b>	<b>\$220,265 03</b>

The earnings of November, 1866, do not include those of the Canandaigua branch, as that branch is not now operated by this company. The earnings of that branch should be added to those of the Erie for November, 1866, in comparing the relative earnings.

**OREGON CENTRAL RAILROAD.**—The Oregon Legislature have passed a bill extending aid to the Oregon Central Railroad, which is to be built from Portland to the northern line of California, con-

necting with the California and Oregon Railroad. By this bill the State agrees to pay 7 per cent interest on \$1,000,000 of the company's bonds for twenty years.

**WESTERN UNION TELEGRAPH.**—This company have opened their new line overland to California via Denver City, Bridger's Pass, and the overland stage route as now traveled. This line is in addition to that via Fort Laramie and South Pass. The company have also opened their new line between Salt Lake City and Montana, thus bringing the mining districts of that country into direct communication with the rest of the telegraphic world.

**CEDAR RAPIDS & MISSOURI RAILROAD.**—The Chicago & Northwestern Company have completed this road to Woodbine 300 miles west from the Mississippi. It was opened for traffic on the 27th ult. It will be completed to Omaha by the 1st January.

**SAVANNAH, ALBANY AND GULF RAILROAD.**—The Florida branch of this road is now open. This improvement, besides its convenience to the public, and especially to the planters of Florida, is destined to advance greatly the interest of the parent road and the City of Savannah. It also completes the Atlantic and Gulf connection from Savannah and St. Mark's.

**ST. LOUIS, JACKSONVILLE AND CHICAGO RAILROAD.**—This Company, through their agents L. P. Morton & Co., 30 Bond street, advertise their first mortgage convertible bonds, limited to \$15,000 per mile. The amount now offered is \$900,000. These bonds bear interest 7 per cent., payable semi annually, April 1 and October 1 in New York, and are redeemable in 1894. Already about ninety miles of the road are in operation, and sixty miles more are to be completed within twelve months. See ADVERTISEMENT.

**PITTSBURG & CONNELLSVILLE RAILROAD.**—The Sand Pat Tunnel on this line has been cut through. Its total length is 750 feet; width, 22 feet; height, 19 feet. It is intended for double track. When the road is completed to Cumberland there will be a very direct route from Baltimore to Pittsburg.

**INSURANCE COMPANY.**

OFFICE No. 35 WALL STREET, NEW YORK.

Assets, Jan. 1st, 1866..... \$1,366,000

ORGANIZED APRIL, 1814.

The Company has paid to its Customers, up to the present time, Losses amounting to over

**EIGHTEEN MILLIONS OF DOLLARS.**

For the past nine years the cash dividends paid to Stockholders, made from ONE-THIRD of the net profits, have amounted in the aggregate to **One Hundred and Twenty-one and a half per cent.**

Instead of issuing a scrip dividend to dealers, based on the principle that all classes of risks are equally profitable, this Company will hereafter make such cash abatement or discount from the current rates, when premiums are paid, as the general experience of underwriters will warrant, and the net profits remaining at the close of the year, will be divided to the stockholders.

This Company continues to make Insurance on Marine and Inland Navigation and Transportation Risks, on the most favorable terms, including Risks on Merchandise of all kinds, Hulls, and Freight.

Policies issued making loss payable in Gold or Currency, at the Office in New York, or in Sterling, at the Office of Rathbone, Bros. & Co., in Liverpool.

**INSURANCE COMPANY.**

OFFICE No. 35 WALL STREET, NEW YORK.

Assets, Jan. 1st, 1866..... \$1,366,699

ORGANIZED APRIL, 1844.

The Company has paid to its Customers, up to the present time, Losses amounting to over

**EIGHTEEN MILLIONS OF DOLLARS.**

For the past nine years the cash dividends paid to Stockholders, made from ONE-THIRD of the net profits, have amounted in the aggregate to

**One Hundred and Twenty-one and a half per cent.**

Instead of issuing a scrip dividend to dealers, based on the principle that all classes of risks are equally profitable, this Company will hereafter make such cash abatement or discount from the current rates, when premiums are paid, as the general experience of underwriters will warrant, and the nett profits remaining at the close of the year, will be divided to the stockholders.

This Company continues to make Insurance on Marine and Inland Navigation and Transportation Risks, on the most favorable terms, including Risks on Merchandise of all kinds, Hulls, and Freight.

Policies issued making loss payable in Gold or Currency, at the Office in New York, or in Sterling, at the Office of Rathbone, Bros. & Co., in Liverpool.
