## FISK & НАТСН,

**580** 

BANKERS AND DEALERS IN GOVERNMENT AND OTHER DESIRABLE SECURITIES,

No. 5 Nassau Street, New York, RECOMMEND TO INVESTORS THE

FIRST MORTGAGE BONDS OF THE

## THE CENTRAL Pacific Railroad Co.,

This Company is constructing, under the patron-age of the UNITED STATES GOVERNMENT

#### THE WESTERN END OF THE GREAT NATIONAL RAILWAY ACROSS THE CONTINENT.

Their line will extend from Sacramento, Califor-nia, across the Sierra Nevadas to the California State line, traversing the RICHEST AND MOST POPU-LOUS FECTION OF CALIFORNIA, and thence through the GREAT MINING REGIONS OF THE TERRITORIES, to the vicinity of Salt Lake City.

It forms the sole Western link of the only route to the Pacific which is adopted by Congress and aided by the issue of United States Bonds.

Their road is already completed, equipped, and running for 94 miles from Sacramento to within 12 miles of the summit of the Sierras, and a large amount of the work of Grading, Tunnelling, &c., beyond that point has been accomplished.

The First Mortgage Bonds of this Com-pany afford unusual inducements of Safety and Profit to Investors, for the following among other reasons, viz:

- IRST The rate of Interest is Six per Cent. in Gold, payable semi-annually in the City of New FIRST -York.
- SECOND .- The Principal is payable in Gold at maturity.
- **THIRD.**—The cost of the Bonds, **Ninety-five Per Cent.** and accrued interest, is **Ten Per Cent.** less than that of the cheapest Six Per Cent. Gold Bearing Bonds of the Government.

FOURTH.—The United States Government p. ovides nearly half the amount ne-cesary to build the entire road, and looks mainly to a small per-centage on the inture traffic for re-payment.

FIFTH.—Owing to this liberal provision, accompa-nied with Extensive Grants of Public Lands, by which the Government fosters this great national enterprise. its success is ren-dered certain, and its financial sta-bility is altogether independent of the conting encies which attend ordinary Railroad enterprises.

SIXTH.- The Security of its First Mortgage Bonds is therefore ample, and their character for safety and reliability is equalled only by that of the obligations of the Government itself.

- SEVENTH.—The net earnings of the completed portion are already largely in excess of the interest obligations which the Company will incur on twice the dis-tance. and are steadily increasing, rendering the uninterrupted payment of the Inte-rest absolutely certain.
- EIGHTH.—At the present rate of Gold they pay near-ly 8% Per Cent. per annum, on the amount in-vested.

The Bonds are issued in denominations of \$1,000 with semi-annual Gold Coupons attached, payable in New York, and are offered for the present at 95 per cent, and account interest (in present) at 95 per cent. and accrued interest (in currency) from January 1st.

Orders may be forwarded to us direct, or through the principal Banks and Bankers in all parts of the country

Remittances mey be made in drafts on New York, other funds current in this city, and the bonds will be forwarded to any address by express, free of Inquiries for further particulars, by mail or charge. otherwise, will receive punctual attention.

Seven Per Cent.

FIRST MORTGAGE BONDS.

\$2,000,000 IN COUPON BONDS OF \$1,000 EACH,

#### TWENTY YEARS TO RUN,

PRINCIPAL AND INTEREST GUARANTEED BY THE ATLANTIC AND PACIFIC RAILROAD COMPANY.

And secured by property valued at \$7,500,000, con sisting of their completed road to the Gasconade River, 127 miles from St. Louis, and 330,000 acres or rich agricultural and mineral lands on its line. By a provision of the mortgage, so often as lands are sold to the amount of \$40,000, this sum is to be funded for the redemption of a like amount of bonds, and the holders have the right at any time to take possession, in payment of the PAR value of their bonds, of any of the Company's lands at schedule rates, mineral lands excepted.

The climate of Southwest Missouri is remarkably The climate of Southwest Missouri is remarkably salubrious, the temperature even, and the winters short and mild. Its agricultural resources are not excelled by any part of the United States. Of its minerals, lead, iron and coal are found of superior qualities and in great abundance. The famous Granby lead mines, on the Company's land, are well known, and recent developments show that iron ore purer than any yet known, his a along the line of the road in greater quantities then the total iron deporoad in greater quantities than the total iron deposit of Penusylvania.

The Company is now prepared to sell these lands at from \$5 to \$40 per acre.

By a recent arrangement this road becomes the Missouri division of the Atlantic and Pacific Rail road, which has a land grant of 55,000,000 acres, and will form a direct and continuous railway from St. Louis to San Francisco, shorter and of much easier gradients than any other route.

Of the present issue of bonds a limited amount is now offered for sale at the rate of S0 per cent, sub-ject to advance at the option of the Company. For further particulars apply to:

## MR. MCCULLOCH AND THE PUBLIC DEBT.

It is impossible to compare the schedules of the public

and, as we intimated would probably be the case, there is for the first time in several months an increase in its aggregate amount. The apparent decrease of \$2,641,974 is caused by an accumulation of gold in the Treasury preliminary to the payment of the May interest on the five-twenty bonds, and the actual aggregate of the funded and unfunded debt will be seen to be larger by \$5,161,724 than at the close of March.

Minanria

There are two reasons for the anxiety with which the publication of Mr. McCulloch's monthly schedule is looked for by the people at large. The first regards the consolidation of the debt, and the second the contraction of the currency. In each of these respects the movements of the debt have relations of the closest kind with the movements of general business, and the latter are so languid as to be exquisitely sensitive just now to every irregularity of the former. Never has there been a time, however, when the negotiations of the Treasury were adjusted more skilfully, or managed with a more successful endeavor to avoid perturbation to the monetary machinery of the country. It is indeed a subject of general remark that notwithstanding the magnitude of the amounts which by conversions of Seven thirties, and by sales of consolidated bonds, as well as by the heavy payments of taxes, pass into the Treasury from the hands of the people and back again into the channels of circulating currency, still not a ripple from this cause has disturbed the steady even flow of the money market. It is also gratifying to find that Mr. McCulloch is now advancing with such rapidity in the work of consolidating the debt, that the apprehensions of embarrassment which ourselves and others have entertained from the large obligations maturing this year have now passed away. Of the August Seven-thirties nearly 33 millions have been taken in during the month, and at the present rate of progress they will be all converted before maturity, or at least the unfunded residue will be so small when the 15th August arrives as to be easily manageable, and should payment be demanded in legal tenders the claim will be readily satisfied without expansion of the volume of the outstanding greenback currency. Besides these 33 millions of Seven-thirties, the Secretary has funded 4 millions of compounds, thus reducing the aggregate of these notes to \$134,774,510. The total amount of float ing debt which has been thus funded is \$38,969,860, ineluding \$393,113 of miscellaneous matured debt, and \$1,411,677 of mutilated currency. Of bonds of 1867 and 1868 \$103,000 have been purchased, and to balance this cancelled indebtedness consolidated Five-twenties to the amount of \$41,584,150 have been issued, in addition to \$600 of Sixes of 1881, and \$340,000 of Ten-forties. In other words, 37<sup>1</sup>/<sub>2</sub> millions of short-date obligations have been withdrawn, and 42 millions of long bonds have been issued.

debt as they make their monthly appearance without noting the simplicity which is gradually taking the place of the perplexing multitude of securities which used to complicate the accounts of the Treasury. If Mr. McCulloch would add to his lucid and perspicuous tables of the movements of the debt a quarterly supplement showing the amount of interest as well as that of the principal of the debt; and if he would also include in this new schedule a statement of the respective aggregates of the marketable securities such as the various series of seven thirties and five-twenties, he would leave scarcely anything to be desired in this particular. There is at present so strong an investment demand for our National securities, they are so widely distributed and so firmly held and our public debt, moreover, bears such numerous and intimate relations to the vexed questions of National taxation, National wealth, and material progress that all the information the people can obtain is eagerly sought for. Our usual comparative tables appear elsewhere

[May 11, 1867.

Let us now examine whether these changes in the debt have caused contraction in the volume of our paper money. This money consists first of an active circulation of 403 millions of greenbacks and fractional currency, and secondly of a torpid stagnant circulation of compound notes, the total amount being \$134,774,510, of which 50 millions is in the portfolios of investors, and 84 millions is counted as reserve by the banks. Now if the 4 millions of compounds which were redeemed last month came out of the banks it is evident that their reserve will be diminished, and to that extent contraction will have been made of the total volume of the currency, and the place of the absorbed compounds will have to be supplied either by greenbacks or by other compounds. But if it be true, as we are assured, that the banks are not selling their compounds at all, and do not seem disposed to do so until they can exchange them for the new 3 per cent. certificates, then the withdrawal of the 4 millions of compounds in April was made from the pockets of investors, and produced no depletion whatever in the amount of paper money afloat in the channels of the circulation. The same argument applies to the 1,400 thousand mutilated notes. These, if mutilated, would not form a part of the active currency, and their removal cannot be properly called contraction. If this be so we have now reached the fourth month in which there has been no contraction of the currency. And Mr. McCulloch has used the discretion confided to him by the law of 12 April, 1866, by refusing to contract the currency, the reason being found, as we suppose, rather in the languid depression of general business than in any doubt as to the soundness of the great general law that depreciation of paper money is caused by redundancy, and can be cured only by correcting the redundancy, or calling in and destroying the excessive issues.

Contraction of the currency is indeed the most delicate task ever entrusted to any minister of finance in this or any other country. The time of attempting the operation is of importance. At certain parts of the year this country requires 50 millions, and at others 100 millions more of currency than is wanted during the intervals of comparative quiescence. The genius and skill of the statesman are shown in right discernment as to the auspicious time and method for effecting his object. The right method of contraction is as important to be chosen as the right time. We have to guard against the consequences of that dread which makes the banks contract three or four millions of their loans for every million which we contract of currency. The mischievous spasms arising out of contraction of loans and other bank a sturbances have to be prevented; for they constitute a tax on the people-which, where it presses with its heaviest weight, is far, more intolerable and ruinous than all the Government taxes put tos ether. It is then, we conclude, from a judicious caution as to the time and method of contraction that Mr. McCulloch has again let a month elapse without contracting the volume of the currency. The  $pe_{v_r}$ generally approve this action relative to the currency, and this especially as the conviction is gaining ground that when our gold product is enlarged, as it bids fair shortly to be; when our industry, North and South, is in a higher state of organization; when we have had time for our recuperative C powers to resume their elasticity, and when our material prosperity is established on a sounder basis, we shall find currency grievances and currency evils less formidable to deal with.

it is thought, will probably last till the second week in October. The changes made in the fundamental law of the State in 1846 were sweeping and almost revolutionary; and as several of them have proved to be of questionable utility, much of the time will be taken in considering the expediency of attempting further modifications. It is hardly probable that serious innovations will be made upon the judiciary system, however necessary; but it is to be desired that the number of public departments should be diminished. Many think that the Boards of Regents of the University, Canals, and Inspectors of State Prisons should be wiped out, and an efficient and responsible superintending official established in their place.

But the more important discussions will be upon the proposed modification of our financial system. The Convention of 1846 was called for the purpose of revising the financial policy of the State. The crisis of 1837 had been followed by severe embarrassments; State stocks had fallen con. siderably below their par value; the public works had been suspended till credit could be recovered, and the State debt, owing to extravagant outlays for improvements, exceeded thirty seven millions of dollars to a population little over two and a half millions. To this difficult problem the Convention directed attention, and provided a plan of liquida. tion which should extinguish the entire indebtedness by the year 1878. The Constitution required that from June, 1846. till June, 1855, there should be set apart annually from the revenues of the canals the sum of \$1,300,000 to pay the interest and redeem principal of the canal debt, including \$300,000 then to be borrowed; increasing the contributions after that time to \$1,700,000 annually. After complying with this requirement, the sum of \$350,000 was set apart every year as the "General Fund Debt Sinking Fund" to pay the interest and redeem the principal of the general fund and contingent debts, as well as the debts created by lending the credit of the State. So successful was this plan, that of the thirty seven millions of indebtedness then existing, only the following items remained at the end of twenty years-September 30, 1866—namely :

General fund debt	218,000 00
Total	\$10,780,682 22

In 1854, the third section of the seventh article was amended, and an additional debt authorised, redeemable in 

For the enlargement of the canals For payment of canal revenue certificates For supplying deficiencies in revenues	1.500.000
Total	\$11,567,000

In 1859, there existed a considerable floating debt, made by the enlargement of the canals, but not exactly sustained

THE CONSTITUTIONAL CONVENTION AND STATE FINANCES. The Convention recently chosen to revise the Constitution of the State of New York, will assemble at the Capitol in the funded obligations of the State, amounting at the close Albany upon Tuesday the 4th day of June next. The sersion,

by the constitution. After a warm discussion in both branches of the Legislature of that year, a law was passed, submitting to the people the question of borrowing \$2,500,000 to pay these demands. It was authorized, and the debt thus created, now stands at \$1,743,000.

On the 29th of September, 1866, the close of the fiscal year, the aggregate indebtedness from these sources was reported by the Comptroller, as follows, namely:

Seneral Fund Debt	
anal	

Total	*******	\$24,109,0	2 22

The provisions of the constitution of 1846 require the entire extinction of this indebtedness by the year 1878, in case that there should be no extraordinary falling off of the revenues from the touls on the canals.

But there has been an ther extraordinary increase made to of the last fiscal year to no les's a sum than \$27,644,000,

THE CHRONICLE.

This debt exists in the form of coupon bonds and registered stock, maturing in twelve years. Its purpose, as set forth in chapters 29, 41, 56, 226 and 325 of the laws of 1865, was to provide bounties for volunteers, to reimburse counties and towns for bounties paid by them, and to restrain the further exercise by localities of the power to create debts which the Legislature in previous years had conferred. The constitutional power of the Legislature to authorise county and town officers to borrow money may well be questioned, when it cannot itself create a debt without submitting the question to the people. Nevertheless, the power has been exercised, and a debt of thirty millions dollars authorized, for the purpose, in part, of obviating the very condition of things thus existing. The Comptroller accordingly reported the entire aggregate of State debt at the beginning of the present fiscal year at the sum of \$51,753,082 22; for which the honor of the State is obligated to provide payment by the year 1878. In addition to this is an immense burden of local indebtedness, which the Comptroller estimates at \$75,000,000, The precise amount, however, has never been ascertained, and it probably exceeds that amount. The debt of the city and county of New York alone is over \$35,000,000, and other cities of the State have been "salting down" considerable amounts of local obligations.

The members of the Constitutional Convention must perceive that heavy taxation, for many years to come, is inevi table. Outside of the General Fund, Contingent and Canal debts, aggregating \$22,347,682 22-every dollar of principal and interest must be paid by direct taxation. This requires at their hands great care lest an increase of the public burdens shall prevent the resources of the taxpayers from being exhausted. It may well be questioned whether the restriction now placed upon the Legislature in the matter of County or State debt, should not be extended to public donations. At the last session, laws were passed making grants of money to be raised by tax, to the Albany and Susquehanna, and to the Whitehall and Plattsburgh Railroads; and it is said that a "ring" existed for the express purpose of procuring similar bestowments to two other roads. Indeed, the "O'Donnell Railroad Bill," which actually passed both Houses, makes provision for such grants as an act of public policy. There can be no valid objection to the incorporation of a provision into the Constitution requiring in future that all gifts of public money, to be valid, shall be submitted to the ordeal of a public vote. The people themselves only, and not their representatives upon any pretext should be permitted to vote away their money.

The Convention of 1846 wisely endeavored also to restrict

1867, we insist, is charged with the duty of a thorough overhauling of this whole matter of local indebtedness, with a view to checking the present practice and providing safeguards for the future.

#### THE WHISKEY TAX.

The internal duties upon distilled spirits afford a fair illus. tration of the injurious working of excessive taxes. The duty upon whiskey commenced at the moderate rate of 20 cents per gallon, to be increased to 60 cents, subsequently to \$1 50, and finally, on the 1st January, 1866, to \$2, at which rate it has since continued. Assuming the average cost of distilled spirits to be 20 cents per gallon, this tax is at the rate of 1,000 per cent.

At the time of the adoption of this impost it was urged, with apparent plausibility, that spirits, being one of the luxuries of society, and not among the essentials of subsistence or comfort, no injury could result to the public were the tax to compel a partial contraction of consumption. Strong moral grounds were taken in favor of the high rate of duty. It was asserted that the free use of ardent spirits is injurious to the morals and health of society, and that a tax which would largely increase the cost of whiskey to consumers would place a wholesome check upon the drinking habits of the people. Statistics were adduced to show also that, from the large consumption of domestic spirits, this duty would become the principal source of revenue to the Government.

Not one of the arguments originally used in favor of the whiskey tax has however been justified by results. On the contrary, all that was urged against it, from the effects of similar imposts in other countries, has been confirmed by the event.

1. There has been, under this onerous tax, no proportionate increase of revenue. For evidence of this assertion we present a statement of the duties collected upon domestic distilled spirits during each of the four last fiscal years, with the rates of duty for each period :

the fates of any	Amount of Duty.	Rate of Duty.
1863	\$3,229,990	20 cents per gallon.
1864		20 to 60 cts "
1865	TE OOF BOT	\$1 50 to \$2 00 "
1866	29,198,578	<b>\$2 00 "</b>

In 1863, the revenue system was so imperfectly organized that the results in that year afford no criterion. During the first nine months of 1864, the duty was 20 cents, and for the last quarter 60 cents; yet for that year the revenue from this source reached the large total of  $28\frac{1}{2}$  millions, it being cheaper to pay the tax than to avoid it. For the first half of 1865 the duty was \$1 50 and for the latter half \$2 00, but the high duties so checked production and stimulated fraud that the revenue fell off  $12\frac{1}{2}$  millions during the year. Last year, under the tax of \$2 00 "the aggregate duty was only \$766,780 more than in 1864, when the duty was for more than three quarters of the year 20 cents; showing that with an increase of 1,000 per cent. in the rate of duty the increase of revenue was only  $2\frac{1}{2}$  per cent; and it must not be overlooked that the revenue machinery was in much better working order during 1866 than in 1864. It is impossible to conceive a more conclusive evidence that moderate duties are most favorable to ample revenues. 2. There has been no abatement of the drinking habits of the people under the excessive duties. We presume that from the obvious increase in the number of saloons in our cities, it would rather appear that the opposite result has followed. Experience in other countries has shown that it is impossible to check the consumption of spirits by increasing their price; for, as a rule, the appetites must be gratified,

the power of localities to levy taxes and create debts, expressly making this the duty of the Legislature in the 8th article of the Constitution. The idea of extending that power was not entertained for a moment. Yet under the stimulus of the war, the Legislature transcended this authority by passing numerous laws authorising Boards of Supervisors to borrow money. Since that time the same license has been exercised also in the way of allowing towns to issue their bonds for the purpose of aiding in the construction of railroads. Already the outstanding obligations thus incurred exceed the entire debt of the State, and threaten to remove the barriers interposed by the present Constitution against the mortgaging of the resources of the State. These obligations are as much a charge upon property as those of the State, and just as much an encumbrance upon its resources as though the State should assume the payment of every dollar. They affect the sources of taxation alike, and must therefore be included in the same category whenever we consider the subject of State finance. The Convention of even if it be at the sacrifice of other things more essential to health and comfort. The high duties induce the production of a cheap, deleterious article, and the result is that the vicious appetite of those who drink inordinately is rendered more craving, and their health impaired. This deterioration of ardent spirits is, according to medical testimony, one of the most fruitful sources of abandoned intemperance.

3. The tax produces demoralization among the revenue officers. The moral stamina of servants of the Government is in no wise different from that of other men. They are as capable of becoming parties to the evasion of the revenue laws as those who pay the taxes. The only condition necessary to insure their dishonesty is that the inducement be strong enough. That is secured when the tax is sufficiently heavy to enable the tax payer to cover the risks of the revenue officer in conniving at evasion. The recent investigations of the revenue commissioners, and the numerous cases of distillery frauds brought to light, show to what an extent the revenue officers actually become consenting parties to the non-payment of duties. At present, in order to place a more effective check upon the dishonesty of distillers, each distillery is placed under the surveillance of one inspector. This arrangement virtually makes the inspector an attaché of the distillery, and the intimate relations thus established directly facilitate arrangements for fraud. The distiller can well afford to offer inducements for the inspector to serve his interests rather than those of the Government, and few officers are found ready to resist the temptation.

A very common practice now in vogue to evade the tax is somewhat as follows: It was provided in the last amendments to the revenue law that the spirit after it is distilled may be placed in a bonded warehouse, and that it cannot be removed for the purpose of selling and refining unless the tax is paid, or unless the person who takes it out gives a bond, to be approved by the inspector in charge, that he will return it after it is refined. Under this provision the distiller deposits his spirits in the warehouse and takes the usual receipt for it. He then sells it in bond to some irre sponsible person, who furnishes a worthless bond which, for a consideration, the inspector accepts, and the whiskey or rum is taken out and sold. The consequence of this and other frauds is, that although the tax is \$2, and it costs about 30c. to manufacture, any quantity of whiskey can be bought in this market to day at \$1.35 per gallon. Commissioner Wells, in his late report to the Secretary of the Treasury, observes-

"The losses which have occurred, and are now occurring to the revenue, through the failure to collect the tax on distilled spirits, tobacco, and a few other articles, are of an amount almost to exceed belief. \* \*

If he had added that these losses will continue so long as the tax is so high, or, in other words, so long as the premium on dishonesty is so large, he would have furnished a true solution of the problem, and a remedy for the evil.

ceals the transaction. In a word, the truth is, that although the form of the law is generally observed, yet actually sales are regularly made at as low a price as \$1 35 per gallon. According to the investigations of the revenue commission in 1865, the consumption of distilled spirits in the United States was then about 40,000,000 gallons per annum. Upon that quantity, with a tax of \$2 per gallon, the revenue from that source should be \$80,000,000; yet last year it was only \$29,-198,578. This will afford a further idea of the extent to which evasion of the duty is carried. Where three gallons pay duty, five evade it. The average duty actually paid is about 70 cents per gallon. With odds of \$1 30 per gallon against the honest distiller, how can he compete with his fraudulent competitor? He has his choice between leaving his business and submitting to the dishonor of defrauding the Government.

But it is unnecessary to multiply objections to the present impost. We have always opposed this high rate, knowing that the experience of every country has shown that it is impossible to collect it. So far as the refiner or the dealer is concerned he does not care what the tax is, so long as all have to pay it, for in that case he can collect the amount out of the consumer. But he has a right to object to its being placed at so high a figure that the law cannot be enforced against all alike, and, as we have shown, it is clearly not the interest of the Government that it should be.

## PUBLIC DEBT OF THE UNITED STATES.

Abstract statement, as appears from the books and Treasurer's returns in the Treasury Department, on the 1st of March the 1st of April, and the 1st of May, 1867, comparatively:

DEBT BEARING	G COIN INTER	EST.	x

4. The tax in effect discriminates in favor of dishonest traders. So great is the premium which the law holds out to dishonesty that very many of the distillers systematically evade the duty. They consequently render it impossible to produce spirits without defrauding the government. In order to counteract this effect, the law provides that any purchase below \$2 per gallon will be considered as prima facie evidence of fraud, it being supposed that the honest dealer would thus be protected against being undersold by his dishonest neighbor. The refiner cannot therefore openly purchase below this figure without subjecting himself to the danger of having the spirit he has purchased seized. But how easy it is to avoid this provision of the law where the parties to the transaction are disposed to do so, it is hardly necessary for us to state. The payment of the full amount (\$2), and the paying back of part, is a common practice; or the turning out of worthless notes or stocks sometimes con-

currency separately at the dates in the foregoing table:

Gold Coin Currency	Mar. 1. \$107,271,031 52,253,368	April 1. \$105,956,477 34,328,827	May 1. \$114,250,444 33,838,558

## DEBT AND FINANCES OF CINCINNATI.

The public debt of Cincinnati, as stated by the City Auditor in his report for the fiscal year 1865-66, amounted to \$3,203,000. Of this amount \$1,805,000 is guaranteed the interest by certain beneficiaries (railroad and canal companies and the water works) leaving the actual debt to be provided for from taxation \$1,398,000. The following list describes the several issues:

Latest Monetary and Commercial English News.

**BATES OF EXCHANGE AT LONDON, AND ON LONDON** 

#### [From our own Correspondent.]

#### LONDON, Saturday, April 27, 1867.

Arising out of the circumstance that there seems much more probability of peace between France and Prussia being maintained, the tone of business during the last few days has decidedly improved, although the recent heavy fall in prices has by no means wholly recovered. However, confidence has greatly increased, both in commercial and financial circles; but in all departments extreme caution is still being observed, and business is therefore limited in extent. The most important change, in a commercial point of view, is in cotton, the rise in the value of which, during the last few days, has been very important. Since so much uncertainty has existed with regard to the question of the Duchy of Luxembourg, the cotton trade has been in a most unsettled state, and a heavy fall has taken place in prices. The hope now entertained in many quarters that we are on the eve of a pacific solution of this difficulty has produced a most buoyant feeling in the market, but although prices have advanced considerably from the lowest point of the week, they are still about 1d. per pound lower than on Saturday last. We are now approaching so rapidly the commencement of another harvest, there seems every probability that business in not likely to revive to any extent until the probable extent of cur next wheat crop is ascertained. So far as can be judged at present, our agricultural prospects are as favorable and encouraging as could be desired; but it is necessarily impossible at the present moment to advance any estimate as to the probable yield. The wheat plant, however, is looking strong and healthy, and with fine weather we shall most likely be in the position to secure an excellent crop. Should such prove to be the case some stimulus may be given to business; but, with the exception of the Cape of Good Hope, from which colony more favorable advices have been received, but which, from the comparative smallness of its trade, has but little effect in engendering an improved tone in business, our colonial and toreign advices are by no means of a sufficiently satisfactory character to justify our merchants in extending their operations in exporting British and Irish produce and manufactures.

Money continues very abundant, while the demand for it is extremely limited. Yesterday the applications for accommodations were numerous, and the discount market presented quite an active appearance; but apart from this circumstance, the money market during the course of the present week has been very quiet. At the weekly meeting of the Bank Directors on Thursday, no change was made in the rates of discount. It was not, however, contemplated that at that period, when the export demand for gold was considerably increasing, and fears were entertained of a Continental war, the bank authorities would venture on making an alteration in their terms of accommodation, even to the extent of one-half per cent. Still, there is no doubt of the fact that the tendency of the money market is strongly in the direction of greater ease, and although in the open murket the rate is at as low a figure as 24 per cent., on the security of bankers' short-dated acceptances it seems a question of doubt whether any further decline will take place. The last bank return indicates very strongly the continued falling off in the requirements of the commercial body. At the commencement of the present year "other securities " or " discounts " stood at £22,816,508; but have now fallen to £18,249,706, showing therefore a decline in the course of about four months of £4,500,000. The Bank of France return, however, shows still more striking results, "discounts" at the commencement of the year being £28,209,016, and at the present time £21,307,700, or a reduction of nearly £7,000,000. The discount business of the two national banking institutions of England and France has declined during the present year by nearly  $\pounds 12.000.000$ ; a fact sufficiently conclusive of the existing want of activity in most branches of trade in the two countries. The quotations are now as under :

On the Continent the money market remains in the same quiet state noticed during the greater part of the present year. The fear of war has necessarily checked any downward movement; but at the leading cities. viz. : at Paris, Hamburg, Amsterdam, and Berlin the supply is abundant, and considerably in excess of the requirements of the mercantile body. The supply of bullion now held by the Bank of France amounts to £31,222,600. Annexed are the quotations for money at the principal cities on the Continent at this date, and at the corresponding period in 1866:

1000.	
-B'k rate- Op. m'kt-	-B'k rateOp. m'kt-
1866. 1867. 1866. 1867.	1866. 1867. 1866. 1867.
At Paris 31/3 31/4 21/4	Turin 5 5 6
Vienna 5 4 5½ 4	Brussels 4 3 41 21 -21

Amst'rd'm 5½ 3 5½ 2 -2½	St. Petb'g. 51 7 615-7 7 -815
The changes in the rate of foreign en	schange, so far as the Continent
is concerned, have not been importan	t, but they are decidedly less
favorable to this country.	

In India, however, the quotations for exchange have considerably improved, and recent events, which have transpired, clearly indicate that the late sudden demand for silver for remittance to the East, resulted from undue misapprehensions respecting the action of the Indian Council, on one occasion, in advancing their quotations for bills at one of their fortnightly sales to a prohibitory point. This demand, however, was but temporary, and only led to the shipment from this country of silver to the value of about £250,000. During the last few days, the demand for remittance to the East has still further diminished, and bills which were disposed of at the sale of bills, on Wednesday week, have lately been re-sold at a reduction of about 1 per cent. Silver, however, is very firm, owing to the uncertainty which exists with regard to Continental politics. At present, the market is bare of supplies, and those who hold the small quantities here are by no means inclined to sell. The West Indian steamer is now about due, and as soon as the supply she is like. ly to bring over is ascertained, an accurate quotation for silver will be fixed.

The leading feature in the bullion market, however, is a decided and sudden increase in the demand for gold for export. This movement is attributable chiefly to the recent heavy sales of Five-twenty bonds and I n securities in our market on foreign account. At present the supplies taken for this purpose reach a total of about £200,000, of which £60,000 has been withdrawn from the Bank, and it is expected that unless further supplies arrive from Australia during the next few days, further withdrawals will be effected. The sum now due from Australia is £225,000.

The position of our railway companies remains as unsatisfactory as ever, and there certainly appears to be no prospect that a restoration of financial order amongst these undertakings is likely to take place except after a protracted period of semi-insolvency. Such is the distrust with regard to railway management, that the general public is decidedly unwilling to lend its aid. It seems pretty certain that if fresh capital must be subscribed, in order to meet the existing difficulties, and to pay off the debentures of those who do not wish to have them renewed, the proprietors of railway property should themselves be the first to extend the requisite aid. They are evidently the parties most interested, and if they have a desire to improve their own property, and free it from constantly recurring difficulties, subscriptions to new capital should emanate from them. But before they extend such aid, they should make it a sine qua non with the directors that no fresh lines should be undertaken, and that the strictest economy should be exercised in every department. During the last few years there has been too lavish an expenditure, and under the influence of support from the numerous finance and new banking institutions, many unwise enterprises have been undertaken. The crisis of May last brought to light the actual state of things; the credit of a large portion of the community was lost, as it were, in the course of a few hours, and those who had money to lend refrained from doing so, for they knew not whom to trust. The new railways under construction, or rather the contractors who had undertaken their construction, suffered heavily from the crisis; so much so that it became necessary to stop the works, while, as your readers know, several well-known firms were compelled to suspend payment. Since that period the difficulties of railway directors have increased, not, however, from the circumstance that their liabilities have been augmented, but from the fact that in consequence of the existing distrust, they are unable to obtain the needed pecuniary aid. The directors of the Great Western Railway Company have proposed to the shareholders that they should subscribe to a new five per cent. preference stock, to the extent of one million sterling. Promises of aid to the extent of only £250,000 have been obtained, and the directors have, therefore, looked upon this system of meeting the present emergency as a failure. It seems, however, that unless shareholders themselves make a great effort to support their directors in the difficulties into which they have unnecessarily run, there is no prospect of a speedy settlement of the railway officulty. In order to show how heavily the shares of our various public companies have been depreciated since 1865, the year in which new companies were brought forward in such abundance, I have compiled the following statement, which shows the prices of these shares at the most favorable period in 1865, and at the close of business this afternoon. I have also extended the comparison to a few days prior to the failure of Overend's in 1866:

The Consol market has been subjected to numerous fluctuations during the week, according as prices from Paris and Berlin have been favorable or unfavorable. During the early days of the week, the quotations were very sensitive, but towards the close, on numerous purchases by bankers and the public, coupled with a more satisfactory state of Continental politics, much more firmness has prevailed. To-day the market has been quite buoyant, and an important rise has taken place. The highest and lowest quotations on each day of the week are subjoined :

Week ending Apr27	Monday	Tuesday.	Wed'y.	Thur.	Friday.	Sat.
Consols for money	Holiday	905/00907/	901/@903/	90560%	90560.76	9010911

American Securities have been very flat, but have improved in value during the closing days of the week. United States 5-20 bonds have been heavily pressed for sale on German account; hence, the decline in the quotations has been considerable. Illinois Centrals, Erie Railway shares, and Atlantic and Great Western Securities have also been dull, and have given way in price. U. S. 5-20 bonds close this evening at 70<sup>‡</sup> to 70<sup>‡</sup>; Atlantic and Great Western railway debentures, 30 to 32; do Consolidated mortgage bonds 21 to 22; Erie Railway shares  $38^{\frac{1}{2}}$  to  $39^{\frac{1}{2}}$ , and Illinois Centrals  $75^{\frac{1}{2}}$ . The highest and lowest prices of American Securities each day during the week are subjoined:

HIGHEST AND LOWEST PRICES OF PRINCIPAL AMERICAN SECURITIES.

Week ending Apr. 27	Monday.	l'uesday.	Wed'day	Thu'day.	Friday.	Sat'rday.

Atlantic & G't West- ern consol'd bonds	lic	21	20 -22	21	2035-2036	21 %	
Erie Shares (\$100) Illinois shares (\$100)	ΗC	36½ 73½-74½			37 - 73½-75	38% 75%-75%	

On the Continent the market for American Securities has been considerably depressed, but the latest advices report much more firmness. At Frankfort 72, at Amsterdam 72<sup>2</sup>/<sub>4</sub>, at Berlin 72<sup>2</sup>/<sub>4</sub>, and at Hamburg 66.

The wheat trade continues very firm. Millers, however, are operating with great caution, and sales in consequence progress slowly. Prices now show an occasional advance of 1s. per qr. as compared with the close of last week.

PHILADELPHIA BANKING CAPITAL-DIVIDENDS DECLARED,-A few weeks since we referred to the fact that the National Bank of the Republic of Philadelphia was about to increase its capital to \$1,000,000 A correspondent in the Inquirer, of that city, referring to this circumstance, gives the following table (prepared from the report of the Comptroller of the Currency of Dec. 3, 1866) to illustrate how far Philadelphia is behind other cities in the amount of its National Banking capital :

						-rer	Cap	118-	De-
	Popu-	No.	Aggre-	Aggre-	Aggre-		De-	Cir-	po'its
CITIES.	lation		gate	gate		Cap-			
	1860	B'ks.	capital.	deposits.	circulation.	ital.	its.	tion.	cap'l.
New York	805,651	58 9	75,009,700	\$29 1,518,090	\$30,427,414	\$93	\$964	\$38	\$3.91
Boston	177,812	45	42,100,000	60,515,115	24,344,555	287	841	137	1.44
Providence.	50,666	25	15,546,900	6,874,75	8,639,580	809	136	170	.44
Pittsburg	49,217	16	8,900,000	20,121,000					2.26
Balt more	212,418	13	10,191,985	24,237,52	0 6,659,840	48	114	81	2.38
Philadelp'a.	562,529	30	15,542,150	54,777,269	10,147,536	28	99	18	8.50

From this statement it appears that in proportion to population Philadelphia has fewer banks, less capital, less deposits and circulation than

[May 11, 1867.

either of the cities nhmed. New York has thirteen banks, with \$1,000,000 capital each, four with \$1,500,000, one with \$1,800,000, five with \$2,000,000, three with \$3,000,000, one with \$4,000,000, two with \$5,000,000, and one with \$10,000,000. Boston has twenty banks with \$1,000,000 capital each, two with \$1,500,000, three with \$2,000,000, and one with \$3,000,000. But Philadelphia, the second city of the Union, has only five comparatively large banks, three of which have \$1,000,000 capital each, one has \$1,500,000, and another \$2,000,000. This statement does not include State banks, of which latter New York city has twelve, with an aggregate of \$9,292,500 capital; Providence thirteen, with \$2,499,200 capital; Pittsburg one, with \$1,143,500 capital, and Baltimore six, with \$2,255,058 capital; all in addition to the National banks.

It would certainly appear from this exhibit that there is room for the employment of more banking capital in Philadelphia, for deposits will increase as banking facilities increase; while the following list of dividends just announced shows the profitableness of bank investments in that city:

THE FRENCH POST-OFFICE.—The number of post offices in France, which in 1791 was only 1,419, is now not far short of 5,000. The sale of postage stamps has risen from 4,446,766 francs in 1849, to 60,695,-548 france, a sixth of the latter sum being contributed by Paris alone. About eight times as many articles now pass through the post as in 1825. For 1865 the figures were: \$11,095,000 ordinary letters, 3,722,-000 registered packets, 106,000,000 frances, 275,499,120 journals, printed papers and patterns, and 4,124,556 money orders Thirty thousand employees conduct the service; 43,000 letter-boxes are daily filled and emptied many times, and every year the mails travel 27,780,000 kilometres by rail, and 51,700,000 on the highways. When the new lines are open the total journeys will not be far short of 100,000,000 of kilometres.

We call the attention of our subscribers to the advertisement of the National Trust Company of the City of New York, in which the purposes and prospects of the corporation are fully set forth—prominent among the names of the incorporators we notice those of Messrs. Joseph U. Orvis, Charles Scribner, E. V. Haughwaut and others.

The De Lery Gold Mining Company publish in this number of the CHRONICLE an advertisement of the objects and property of the company. The office in New York is at 74 Cedar street, where Mr. J. W. Winchell, General Managing Agent, will give the fullest information as to its affairs.

# The Bankers' Gazette.

#### DIVIDENDS.

We give in our BULLETIN from day to day lists of bonds, &c., lost, and dividends declared. These tables will be continued daily, and on Saturday morning such as have been published through the week in the BULLETIN will be collected and published in the CHRONICLE. Below will be found those published the last week in the BULLETIN.

FRIDAY, May 10, 1867, P. M.

THE MONEY MARKET.—The market has shown a steady gain in ease during the week. The last bank statement showed an increase of \$8,054,731 in deposits, of which \$2,497,873 was in specie, and the balance in currency, and a gain of \$2,667,056 in legal tenders. The loans were increased \$3,140,177, chiefly through the investments of the banks in Government securities, which they prefer to lending at the present low rates of interest. It will thus be seen that the banks commenced the week with ample resources. A considerable amount of currency has been withdrawn into the Sub-Treasury during the week, but the banks have neverthless held more money than they could use at the late rates, and the rate of interest on call loans has fallen to 5 per cent on stocks, and 4 per cent. on Governments.

The banks in the interior are in an easier condition, as has been apparent from their free purchases of government securities throughout the week, a movement which has caused an enlarged flow of currency toward this point. In the Western Exchanges there is rather more ease. The opening of the canals has induced an enlarged movement of produce eastward, and bills on New York are in better supply at those cities, but not to an extent sufficient to turn the balance in their favor, though enough to check the flow of currency to the East. In a short period the purchase of the wool clip will

#### BUSINESS AT THE STOCK BOARDS.

increase our indebtedness to the West materially, and the anticipation of that movement may be expected to exert an influence early upon the market.

Discounts are decidedly easier. There is more confidence in commercial paper, and the supply of prime names is below the demand. Prime paper is current at 6@7 per cent., and very choice would pass at still lower rates were it on the market. Good to fair names are current at  $7\frac{1}{2}@10$  per cent.

The following are the quotations for loans of various classes :

UNITED STATES SECURITIES.—Governments have been active, and, upon the whole, firm throughout the week. There has been a steady demand from the interior banks, and also from the city banks, for the employment of surplus money, the second and third series of Seven-thirties having been freely bought by these parties, upon the supposition that they will soon be in demand for conversion purposes and bring a higher price. To-day, under the advance

of bonds at London and the rise in gold, there have been considerable purchases of Sixty-twos and old Sixty-fives, causing an advance of  $\frac{1}{2}$  on the former and of  $\frac{1}{2}$  on the latter.

Conversion operations are still going forward on a liberal scale. To-day the Assistant Treasurer bought about \$1,600,000 of August Seven-thirties. There are still about \$100,000,000 of the first series of Seven-thirties outstanding. This balance is largely held by insurance companies and other financial institutions, and this class of holders are very generally disposed to retain their notes until maturity, and to demand in exchange a bond dated from the maturity of the notes, in preference to converting them into the new Sixtyfives. Included in the Seven-thirties converted last month was about six millions of notes of the second series.

During the week Sixes of 1881 have advanced 2, Sixty-twos §, new Sixty-fives 1, and Ten-forties 5.

The following are the closing prices of leading securities, compared with preceding weeks :

RAILROAD AND MISCELLANEOUS STOCKS .- The course of speculation in stocks has been irregular. The combination which recently ran up prices have been checked by the operations of the opposite side, and have exhibited some symptoms of a desire to get out of their stocks. On every effort to sell, however, the market has shown a weakness which discouraged the attempt, and although a good many shares have changed hands, the real distribution of stocks perhaps does not vary much to day from the condition of a week ago The market is a very unsatisfactory one for brokers. They have comparatively little commission business, and are feeding upon each other in a spiritless speculation. The public show no interest in the market, very few stocks are wanted for investment, and outsiders have little money that they can afford to risk in speculation.

The current earnings of the roads are, on the average, up to those of last year; but the public appear not to want this class of securities. At the close prices vary but little from last week.

The following were the closing quotations at the regular board yesterday, compared with those of the six preceding weeks :

•	Mar. 29	April 5.	Apl. 12.	Apr. 18.	Apr. 26.	May 3.	May 10.

THE GOLD MARKET .- Gold has exhibited more firmness throughout the week. The anticipation of an export of specie has become more decided among the foreign bankers, while there are still lingering doubts about the London Conference settling the question of Luxemburg. There has been some disappointment at so few bonds having been sent abroad in return for the coupons of foreign bondholders, there having been no shipments of Five-twenties of moment until to day. At the same time, the tendency of cotton at Liverpool has been steadily downward. These combined considerations have produced a feeling in favor of a higher premium, and the price at one time bordered on 1384. To-day, upon a demand for gold for shipment (to the extent probably of about 11 millions,) the price advanced to  $137\frac{1}{2}$ , but subsequently reacted to 137, and closed at 1371@1.

From the statement of the movement of gold, given below, it will be seen that under the payment of interest at the Sub Treasury, \$3,721,373 last week passed into private hands, a reversal of the usual movement. This will probably find its way upon the market at once, and cause an important increase in the specie deposits of the banks.

The fluctuations in the gold market during the week closing with Friday are shown in the following table :

FOREIGN EXCHANGE.—There has been but a moderate demand for bills; but with a limited supply the tendency of rates has been upward. The failure of a firm in the cotton trade, with large liabilities, following a similar failure recently, has produced a lack of confidence in cotton bills, which to some extent has strengthened rates. To-day prime bankers' 60-days sterling closes at 1097, a rate which admits of the export of specie.

The following are the closing quotations for the several classes of foreign bills, compared with those of the three last weeks :

and in demand.

Metals have a rather improving tendency.

Wool has been very quiet, but is well held.

Fish and Fruit have been dull and heavy.

ed for FRASER ser stlouisfed or

Building materials have sold freely, sellers accepting lower prices in some cases.

Freights have been irregular. For sail vessels to Great Britain there appears very little to do, and they will take corn at 3d., cotton at 3-16d. and weight 10s., to Liverpool, but steamer room is scarce, and double the above rates are obtained. The new corn arriving must go forward by steam; hence the unusual desparity. There is a very fair business doing to the Continent at pretty full rates. Some deal charters have been made; one from St. Louis, N. B. to Liverpool at 64s.

The following table, compiled from Custom House returns, shows the exports of leading articles of commerce from the port of New York since January 1, 1867, the principal ports of destination, and the total for the same period in 1866. The export of each article to the several ports for the past week can be obtained by deducting the amount in the last number of the CHRONIOLE from that here given:

1180 Holland & Belg. 75,994 849 36,26( France : 20,25 35,68 : 163,118,218,000 Great Britain. 4,274 976 25 086 U AISTICLES. 57 Naval store Cre.Idetuff Ware g

#### Imports of Leading Articles.

The following table, compiled from Custom House returns, shows the foreign imports of certain leading articles of commerce at this port for the week ending May 3, since Jan. 1, 1867, and for the corresponding period in 1866:

[The quantity is given in packages when not otherwise specified.]

The total foreign exports from the United States since Sept. 1 now amount to 1,231,370 bales, against 1,317,695 bales for the same period last year, and the present stocks are 406,008 bales, against 428,968 bales at the same time in 1866. Below we give our usual table of the movement of Cotton at all the ports since Sept. 1, showing at a glance the total receipts, exports, stocks, &c.:

Receipts and Exports of Cotton (bales) since Sept. 1, and Stocks at Dates Mentioned.

The market has been exceedingly unsettled and variable the past week, and yet the fluctuations in prices have been unimportant. The reports by the cable have in their influence nullified each other, more peaceful intelligence having been attended with a decline in gold, which prevented holders realizing any advantage from the improved political situation, and again, warlike news being followed by an advance in gold, which prevented orders from being executed. The business of the week consequently has been the smallest we have had to note in some time, not exceeding 7,500 bales. The market closes steady but spiritles. An irregular decline in cotton goods from  $\frac{1}{2}c$ . on heavy sheetings to 2 or 3 cents on other cotton fabrics has been very discouraging to spinners, while the light receipts and decreasing stocks cause holders to be unwilling sellers. There has been another heavy failure in the trade which was severely felt in New Orleans, but had very little effect here. The following are the closing quotations:

N Orloans

The receipts of Cotton this week from all the ports show a small increase, the total reaching 19,661 bales (against 18,088 bales last week, 26,808 bales the previous week, and 27,790 bales three weeks since), making the aggregate receipts since September 1, this year, 1,679,993 bales, against 1,816,101 bales for the same period in 1865-6. The details of the week's receipts are as follows:

Received this week at*- Receipts.	Received this week at- Receipts.
New Orleans	Florida
Mobile	I NOTED CAPOLINA
	Virginia 1,380
Sivannah 2,205	*
Texas. 4,396	
Tennessee, Kentucky, &c 2,244	

In the exports this week there is also a slight increase, the total from all the ports reaching 43,160 bales, against 42,545 bales last week, and 51,768 bales the previous week. Be-

\* In this table, as well as in our general table of receipts, &c., we deduct from the receipts at each port for the week all received at such port from other Southern ports. For instance, each week there is a certain amount shipped from Florida to Savannah, which in estimating the total receipts must be de-ducted as the same shipment appears in the Florida return. We are thus par-ticular in the statement of this fact, as some of our readers fail to understand it,

Good Middling The exports of Cotton this week from New York show an increase, the total shipments amounting to 14,431 bales against 12,725 bales last week. The particulars of these shipments are as follows :

..... 1,517 To Hamburg, per steamer—Ciambra, 150. Total bales..... To Antwerp, per steamer—Midway, 98. Total bales..... To Rotterdam, per ship—Johann Wilhelm, 29. Total lales....

Below we give our table showing the exports of Cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1866; and in the last column the total for the same period of the previous year :

\* The receipts given for these ports are only the shipments from Tennessee Kentucky, &c., not otherwise enumerated. + These are the receints at all the ports of Florida to May 3, except Apalachicola, which are only to April 26. + Estimated. The stock at New York is also estimated.

Savannah

ing was at 28 ic. for middling, but, under the favorable advices from Liverpool, there was a rapid advance up to 27c. on Monday, with sales of about 1,000 bales. Next day, however, prices fell off, and the market closed quiet but firm, with middlings at 24c., low middling 23c., and ordinary 21c. Freights show no change, we quote Liverpool 9-16d. per sail, and per steam coastwise 1c., and per sail {c. Exchange on New York closes at par checking, and {c. discount buying rate. Sterling exchange 143@145.

SAVANNAH, May 4.- The receipts for the week ending May 3 were 2,264 bales (of which 59 were from Florida), against 2,469 bules last week. The shipments this week were 7,071 bales, of which 6,362 bales were to Liverpool, and 709 bales were to New York. Below we give the receipts, shipments, prices, &c., for a series of weeks :

	Receipts.	Shipm's.	Stock.	Price Mid.

May 8	. 2,264	7,071 3	17,787	25 @-

The market has been quite irregular this week, opening at 23 cents for Middling, touching 28@281c. on Monday, and closing the week at 25c., with no inquiry. These fluctuations were due to the advices from Liverpool and New York with regard to the Luxemburg question and the state of the cotton markets at those ports. Freights have con-tinued extremely dull. We quote to Liverpool 7-16d for square, and #d for round bales. Steam to New York and Philadelphia #c and Baltimore \$2 50 per bale. In sailing vessels the rates are dull at from 1@fc. to Northern ports.

NEW OBLEANS, May 4.—The mail returns for the week ending May 3, show a further decrease in the receipts, the total for the week being 5,127 bales, against 6,021 bales last week, and 9,141 bales the previous week. The shipments for the last week were only 11,891 bales, of which 6,663 bales were to Liverpool, 1,228 to Barcelona, 454 to Gibralta, 80 to Vera Cruz, 600 to Boston, 827 to Providence,'144 to Philadelphia, and 1,895 to New York. Stock on hand May 3, was 184.-513 bales. The receipts, sales and exports for a series of weeks, and the stock, price of middling, rates of freight to Liverpool and New York, and price of gold at the close of each week since March 2, were as follows:

#### \* By steam.

Early in the week, under the influence of the advices from Liverpool that the Luxemburg difficulty would probably be settled, and the improved quotations at Liverpool and New York, prices here were higher until on Wednesday Middling to Strict Middling (Liverpool quotations) were sold as high as 29@30. Subsequently, however, there was an unfavorable reaction, the Liverpool and New York Markets being reported lower, and at the close here Middling is quoted at 26@27, and Low Middling 24@25. Domestic Exchange has continued quiet with a tendency in favor of buyers, bankers checking on New York at 1 premium. The rate for commercial has been selling at par to 1-16@1 discount for New York sight. Sterling Exchange closed at 1491 for bankers.

EUBOPEAN AND INDIAN COTTON MARKETS .- In reference to these mar kets our correspondent in London writes as follows : \*

LIVEBPOOL, April 27.-In the early part of the week, the cotton trade, owing to the unfavorable opinion entertained with regard to the issue of the Luxemburg dispute, was heavy in the extreme, and an important fall in prices was the result. During the last few days, however, there has been much more activity in the demand, and the

HAVER, April 25 - A considerable fall has taken place in the value of cotton during the last few days. Very ordinary New Orleans is now selling at 125f.; for July, August and September; for May, 122f. 50c.; and for July, 121f. per 50 kilogs.

ALEXANDEJA, April 13 .- The current rumors of approaching war have in a measure paralyzed our market, and prices are almost nominal. The shipments since November 1, have been ;

#### TOBACCO.

#### FRIDAY, P. M., May 10, 1867.

The exports of crude tobacco continue large this week, the total being about the same as last week. It will be noticed from the tables we give that the receipts at New York and Baltimore are now increasing materially, but the large shipments prevent any decided increase in the stocks, which are considerably smaller than they were a year ago. The total exports from all the ports this week amount to 3,255 hhds., 1,677 cases, 423 bales, and 176 hhds. and bales of stems, besides 166,169 lbs. and a few hundred boxes of manufactured tobacco, as may be seen in the following statement:

The market this week is generally less active. Foreign buyers of Kentucky have in good part withdrawn their orders, and seem to be very unsettled in their views. There has been a fair, steady demand for consumption, but the trade on the other hand lacks animation. Sales for the week about 550 hhds., of which 250 hhds. lugs, mainly for export, at 41/205c., the balance at 8@18c., as in quality.

Seed Leaf has also been very quiet. The sales have been re stricted entirely to samples of Connecticut. There has been no Ohio offering until to-day, and no sales. Some few samples of State have been shown, but nothing done. The sales are 67 cases Connecticut, 1865 and 1866 crops, at 8@131c., 200 cases Connecticut at 8@25, the latter price for fine wrappers, 1866 crop. Manufactured Tobacco is quiet in the absence of assortments. The stock is quite small, but liberal supplies are at hand. In Foreign Tobacco we have only to notice the sale of 97 bales Mexican on private terms.

above exports have been shipped ;

\* The exports in this table to European ports are made up from mani-fests, verified and corrected by an inspection of the cargo.

The direction of exports for the week, from other ports, have been as follows:

From Baltimore-To Liverpool, 263 hhds. leaf....To Rotterdam, 871 hhds. leaf and 76 hhds. stems.

and 76 hhds. stems. From Boston—To Melbourne, 339 cases, 15 tierces and 262 boxes....To New Zealand, 29 cases....To Africa, 30 hhds....To Honolulu, 9 cases....To Hayti, 125 bales... To British Provinces, 3 hhds., 14 cases and 101 boxes. From Portland—To Halifax, 100 boxes. From Philadelphia—To Liverpool, 10,636 manufactured lbs....To Port Spain, 3,200 manufactured lbs Barbadoes, 788 manufactured lbs. From Norfolk. Va.—To Liverpool, 60 hhds., 25 cases and 286 boxes.

MABYLAND.-At Baltimore inspections have been somewhat retarded the past week, consequent upon the inauguration of new inspectors. The demand for Maryland leaf has been very brisk, all the receipts being quickly taken by shippers at full prices. Of Ohio, the receipte are light and demand moderate. We notice sales of 150 hhds, nearly all new crop, within our former range. In Kentucky descriptions there is nothing doing; market extremely dull, and quotations entirely nominal in the absence of sales. Inspections for the week, 894 hhds. Maryland, (including 10 reinspected,) 296 Ohio, 10 Virginia, and 1 Kentucky total, 1,201 hhds. Cleared, 263 hhds. to Liverpool, 871 do. leaf, and 76 do. stems to Rotterdam. We repeat the range of prices, viz :

Per 100 lbs. Maryland frosted to com'n \$1.50@ 3.00 '' sound common. 3 50@ 4.00 '' good ''	Maryland grou'd leav. new \$3.00@ 5.00 Ohio inferior to good com. 3.00@ 6.00 "brown and greenish. 6.00@ 8.00 "medinm & fine red 8.00@15.00 "com. to med. spang. 8.00@15.00 "fine spangled 15.00@20.00

**NEW ORLEANS.**—Offerings continue small, and although there is a fair inquiry, the only important transactions are 31 lugs to fine leaf at  $4\frac{1}{4}$ **14c.**, 37 lugs and leaf at  $4\frac{1}{2}$  (2c., 16 low to good leaf at  $8\frac{1}{2}$ c., 6 good leaf at 10c, 8 lugs at  $4\frac{1}{2}$ c., and 7 fine leaf at  $10\frac{1}{2}$ c., 27 leaf and lugs at  $7\frac{1}{2}$ c., 39 medium Clarksville leaf at  $11\frac{1}{2}$ c., 10 fine leaf at 12c., 4 and 8 lugs at 5c., and 1 low lugs at 4c. per lb. The receipts of the week amountto 685 hl:ds., and the exports embrace only 5 hlds. to New York, upon which the stock has increased to 2,287 hlds.

**KENTUCKY.**—At Louisville, the market has been active and buoyant Sales for the week 1,150 hhds. The supplies have also increased. We quote: common lugs  $2\frac{1}{2}$ @3, fair to good  $3\frac{1}{2}$ @5, common leaf 5@7, medium 8@11, fair to good 12@16, good to fine 17@26, faucy wrapping 20@75. Stock on hand April 13 3,727, receipts since to April 20th, country, 827, do do local 90, Receipts since to April 28th, country, 1,144, do do local 60, total 5,850. Deliveries since to April 20th 1,001, do do April 27th 1,108. Stock on hand April 27th 3,741 hhds.

May 6th.—The market was active with full attendance of buyers. Prices continue steady for all desirable grades. In the sales some Todd county shipping leaf brought \$20 25. The breaks to-day amounted to 106 hhds. with 11 rejections. Sales were of 2 hhds. at \$20 20@18 75, 2 at \$16 50@16 25, 3 at \$15@15 75, 1 at \$14 75, 5 at \$13 25@13 75, 3 at \$12@12 50, 13 at \$11@11 75, 15 at \$10@10 75, 12 at \$9@9 75, 7 at \$8@8 90, 8 at \$7 40@7 95, 8 at \$6 30@6 80, 3 at \$5 20@5 30, 9 at \$4@4 90, 11 at \$3@3 85, 2 at \$2 30@2 45.

At Clarksville, for the past two weeks, the market has been only moderately active, planters holding back for a steadier ruling in prices. European advices have tended to engender distrust among buyers, though the effect has been less operative to depress prices than in New York and other markets. The extreme backwardness of plant-, coupled with the depredations of the fly, has not as yet materially influenced prices. We are advised both by Tennessee and Kentucky planters of visits from the fly, but do not apprehend any great destruction from them, as the late rains will doubtless check their march.

Our market closes buoyant, and bidding was decidedly more animated than the week previous.

VIRGINIA-At Richmond, the receipts of tobacco are light for the season. The stocks in the different warehouses for inspection are very light, the tobacco being sampled and sold as soon as it arrives. This week the market has been more active, and prices better for all grades in good order. Those out of order dull. We quote: New Lugs, medium, \$2 50@4 50; New Good Shipping and Working, \$6@8; Medium Leaf, \$8@11; Good Stripping and Shipping, \$12@17; Common Bright, \$15@25 ; Medium Bright, \$25@35 ; Fine, \$50@75 ; Extra Fine, \$80@125. At Petersburg the market has improved, and prices are higher for all tobacco in dry safe order, particularly for the finer grades. To bacco in soft order is still low, and in very little demand. The sales during the week amount to about 350 lots of loose and hogsheads. We quote Primings and Common Lugs at 50c@\$2 50: good to very good Lugs \$4@\$9; good Leaf, \$10@\$15; very good, \$16@\$20; fine \$39@ \$50; fancy, \$61@\$100. Receipts this week, 49 hhds; last week, 78 hhds. ; Total since October 1, 887 hhds.

millers have been buying but little; country millers have appeared in the market within a day or two, buying moderately. The business early in the week embraced 30,000 bushels for Oswego. The sales to-day embraced 40,000 bushels at \$2 75 @\$2 82 for No. 2 Chicago and Milwaukee.

Corn has declined 5c. for old and 10c. for new. There have been liberal arrivals of new, much of it in poor condition, which, in the absence of distilling demand, must be forced off at relatively low prices. There has been this week a considerable supply of new Southern white corn, which was quickly taken for export at \$1 30@1 35. At to day's market old Western mixed sold at \$1 33 in store, and new from \$1 05 to 1 28, including good to prime shipping cargoes at \$1 25@ 1 27. Freights to Liverpool by sail are down to three pence, while by steam they are  $6d.@6\frac{1}{2}d.$ —giving holders of old, which only can be shipped by sail, the decided advantage.

Oats have advanced on speculative demand, but at the close in sympathy with gold are weak at 87c. for Western and 90c. for State. Rye has further advanced, with a good demand for consumption. Barley has been quiet, but firm. Peas are nominally unchanged, but supplies to the extent of fifty thousand bushels or more are on the way here from Oswego, with which a market will probably be made.

#### BREADSTUFFS.

FRIDAY, May 10, 1867, P. M.

The market shows less buoyancy throughout, but higher prices have been made during the past week for all staples, except Corn.

The receipts of Flour continue very light, and so far as we can learn there is very little on the way, but the reports from Western markets show steadily increasing supplies, though still far below the average. The advance in good serviceable Flour has been 50@75c. per bbl., though the range of quotations r main the same.

Wheat touched higher figures early in the week, but the advance has not been sustained for Spring grades. The city

ized for FRASER

#### GROCERIES.

FRIDAY, May 10, 1867-P. M.

The Grocery trade has been more uniform and steady during the past week, but the volume of business is somewhat less. There are no important influences at work upon the market, and prices are quite steady. Stocks of goods are light, but sufficient for the prevailing demand, and intelligence from foreign ports gives an average stock of groceries on hand. In but one instance, that of sugar, have prices been influenced to any extent by the advance in gold. Sugar is firmer from that reason. Buyers are exhibiting an unusual degree of caution in their purchases, and business is restricted to the actual wants of consumption. This applies to all parties at this time, from the importer to the retailer. We annex details regarding the leading articles of the trade.

#### May 11, 1867.]

TEA.

TEA has been quiet but steady for the most part since our last report. Prices are without material variation. The sales are a cargo of 12,331 half chests Oolongs to a leading jobbing house, and 4,936 do Oolongs and 1,046 boxes do., 4,300 half chests Japans, 2,500 Greens, and 1,600 do. Souchongs to the trade—the market closing quiet at our quotations.

Imports of the week include the cargo of the "Golden State" from Yokohama, amounting to 849,892 lbs. Japan; 3,794 lbs. by the "Amaranth" from Wampoa embracing 4,640 lbs. Hyson Skin, 3,105 Hyson, 24,016 Young Hyson, 2,327 Imperial, 3,853 Gunpowder, and 1,375 pkgs. from Liverpool.

The following table shows the shipments of Tea from China and Japan to the United States, from June 1, 1866, to Feb. 22, 1867, and importations at New York and Boston since Jan. 1:

			COFFEE.				1

COFFEE has been in fair demand, and in the absence of outside influences prices have been very steady. The sales for the week included 17,200 bags Rio, 150 do Costa Rica, and 1,200 Maracaibo, at rates within the range of our quotations below.

Imports of the week have been very limited amounting to only 8,865 bags as follows: of Rio 3,199 bags per "Gertrude," 3,800 bags per "Sadowa," of Singapore 3,020 bags, of St. Domingo 1,250 bags, of sundries 616 bags. At other ports there have been no importations. The stock of both Rio and other Coffee is less than last week.

The imports since January 1, and stock in first hands May 7, are

#### SUGAR.

SUGAR has been generally less active for raw, but with the higher price of gold there is an advance of fully  $\frac{1}{5}$  cent on refining grades. Refined sugar has been in steady request, and prices are unchanged. The sales of raw include 6,500 hhds. Cuba and Porto Rico, and 2,500 toxes Havana. The market closing steady.

Imports of the week have amounted to 6,253 boxes and 8,877 hhd s. of Cuba and 1,818 hhds. of other sorts at New York, 463 hhds. of Cuba at Portland, 2,367 at Philadelphia, 2,800 hhds. at Baltimore, and 1,106 hhds. at New Orleans—making the total import since Jan. 1, at all the ports, 93,438 boxes, 170,400 hhds., and 68,806 bags.

Stocks May 7, and imports since January 1, are as follows :

#### SPICES.

SPICES are in steady, moderate demand for the jobbing trade. Prices are the same. The sales are principally in small lots of the several articles in the list. A sale of 1,230 boxes Penang Pepper, in bond, on private terms, is reported.

#### FRUITS.

FRUITS have been somewhat irregular for foreign dried, and prices are lower for some articles. Layer Raisins have met a fair trade demand at a reduction of 5@10c. from last week's prices. Foreign Green Fruits are abundant, and prices are hardly sustained. Domestic Dried are dull and somewhat nominal in price.

#### THE DRY GOODS TRADE.

#### FRIDAY, P. M., May 10, 1867.

The Dry Goods Market has become rather quiet and the bulk of the Spring business seems to be over. The decline in cotton here and abroad has the effect to establish a lower basis of prices for all newly manufactured domestic goods excepting a few styles of prints and fine bleached goods which are scarce and wanted as fast as offered on the market. The auction sale of domestics referred to last week has had a perceptible depressing effect upon prices this week, and in many instances the reduction since Friday last has been quite heavy. On Monday, Denims, Stripes and Ticks were materially reduced for the lower grades. Delains were also marked down. On Tuesday a line of Allen prints (dark) were offered at 15 cents and closed out. On Wednesday standard Brown Sheetings were reduced  $\frac{1}{2}$  a cent, and a few makes of Bleached Sheetings and Shirtings, medium grades, were also reduced, while Denims, Stripes, Domestic Ginghams, Corset Jeans and Brown Drills were marked down materially. These lower prices stimulated the export demand, and the amount shipped for the week is much the largest of any time since before the war. Yesterday a line of Sprague's prints were placed upon the market at a material reduction, causing a general stampede in prices, and to-day the market is unsettled and very irreg.

\* Includes barrels and tierces reduced to hogsheads.

HAVANA, May 4.—Advices from abroad, and easier freights and higher exchange, have produced some activity in the market for lower grades, quotations of No. 12 remain the same, however, at 6<sup>2</sup>/<sub>4</sub>@7 rs. per arrobe. Sales amount to 14,000 boxes.

The following will show the receipts, exports and stocks at Havana and Matanzas :

#### MOLASSES.

MOLASSES has continued in uniformly steady demand for the different kinds, and prices are also unchanged. The sales for the week include about 2,000 hhds. of all kinds, but principally of Muscovado.

Imports of the week have been 1,560 hhds. Cuba, 542 of Porto Rico and 1,613 of others at New York, 2,820 hhds. at Portland, 2,784 hhds. at Boston, 3,222 hhds. at Philadelphia, 528 hhds. at Baltimore and 5,257 hhds. at New Orleans, making the total import at all the ports since Jan, 1, 172,439 hhds. not including New Orleans Molasses, ular. The following will show the details of the export of Dry Goods and Domestics for the present week :

DENIMS have also been materially reduced for the lower grades, and rices are still declining. Amoskeag 36, Haymaker 28 inc brown 15, York 28 inch 30, Warren brown 27 inch 15, Boston Mfg. Co. 29 inch 131, Pearl River 30, Union 16, Monitor 15, Manchester Co. 20, Suffolk 16, Arlington 18, Mount Vernon 25, Pawnee 11+.

lower. Lancaster Ginghams sell at 28 cents, Hartford 18, Hampden 19, Caledonia 161, Glasgow 21, Clyde 111, Berkshire 18, Roanoke 121, Manchester 15, Bates 21.

CANTON FLANNELS are inactive and quite nominal at this time. La. conia Bro.28, Rockland do 16, Naumkeag do 25, Nashua A 20, Extra Plush 221.

CORSET JEANS are in good demand but prices are declining. Andros-coggin 12<sup>1</sup>/<sub>2</sub>, Bates colored 13<sup>1</sup>/<sub>2</sub>, do bleached 13<sup>1</sup>/<sub>3</sub>, Naumkeag 20, Pepperel 21, Naumkeag satteen 221, Laconia 20, Indian Orchard 16, Rockport 20; Ward 18.

CAMBRICS AND SILESIAS are more steady, Washington cambrics sell at 13 cents, Victory 12, do A 13, do high colors 14, Fox Hill 101, Superior 10, Pequot 121, Waverly 121, S. S. & Sons paper cambrics at 161, do high colors 181, White Rock 151, Masonville 161, and Indian Orchard Silesias 20, Ward do at 20.

CLOTHS AND CASSIMERES show more inquiry, looking to an early revival of business. Prices are difficult to give.

LINSEYS are in light demand at this season. Park 60 inch 371, do 65 do 421, Miners' Flannel 35 and 40, Rob Roy 24, White Rock 311, Black Rock 321.

DELAINES are dull and prices have been reduced. Lowell 20, Hamilton Co. 20, Manchester dark 20, Pacific dark 20, Armures dark 23, High colors 23, Pacific Merinos 40, Mourning 20, Shepherd checks 23; Spragues 20, Skirtings 30.

LADIES SACKINGS are in fair demand, and prices are unchanged. Leicester 1 55, Middlesex 1 55, Garibaldi rep 1 377, Excelsior 1 50, Raritan rep 1 37<sup>1</sup>/<sub>4</sub>, Glenham 1 50.

CARPETS are inactive at previous prices. Velvets, J. Crossley's best \$3 60, do A1 qual. 3 35, do patent 2 85; body Brussels, Roxbury 2 75, do Bigelow 2 60; Tapestry. Brussels, G. Crossley 1 80, Lowell, ex. 3 p 2 00, do super 1 55, do med sup 1 40, Hartford Carp. Co, ex. 3-ply 2 05, do Imp. 3 ply 1 95, do superfine 1 55, Med. and low pri. Ingrain 1@1 30.

AMERICAN LINEN is in fair demand at steady rates.

FOREIGN GOODS are dull and declining. The auction houses continue to offer attractive assortments, but buyers show little animation, and decline to offer anything like satisfactory prices. There is a light demand for plain dress goods and other staple articles, but generally trade is unsatisfactory.

BROWN DRILLS are in good demand for export, home trade is light Winthrop 16, Amoskeag 20, Laconia 21, Pepperell 201, do fine jean. 211, Stark A 19, Massabesic 161, Bennington 21, Woodward duck bag 28, National bags 31, Stark A do 571, Liberty do 31.

PRINTING CLOTHS are fairly active but prices are declining. Sales are reported at 91 cents for 64x64 square cloth.

PRINTS were more steady than most other goods, and the demand was liberal for all the new and desirable styles up to yesterday, when a line of undesirable goods of the Sprague brand was placed upon the market by a jobber at a reduction of 1@2 cents, which was taken by other houses as a signal for a general break in prices, and to-day all kinds are materially reduced and the market closes very much unsettled and business at a complete stand still. We anoex nominal prices in jobbers hands. CAMDEN AND AMBOY AND NEW JERSEY R.R. CONSOLIDATION. —The first joint report of the consolidated companies—The Camden and Amboy R.R. Company—The Delaware and Raritan Canal Company, and the New Jersey R.R. Company—has been made to the stockholders, from which it appears that the three corporations, although preserving distinct organizations, are united in interest, and have one general management by officers of the consolidated

association. We have compiled the following statistics as to the condition of the companies Jan. 1st, 1867, and their operations in 1866, from the report. The Delaware and Raritan Canal and Camden and Amboy R.R. are known as the "old joint companies."

The Chicago Tribune, under the head of "A Suggestion to Insurance Companies," remarks as follows :- It is frequently remarked that every large fire is followed rapidly by others ; and the fact that such has been the case in Chicago during this season has suggested to many persons the possibility of there being a philosophical explanation of the coincidence. On Friday morning the Merchants' Hotel was'destroyed-clearly the result of an accident. On the same night the fire on South Water street took place, equally destructive of property, and as clearly the act of an incendiary. Saturday morning the elevator on the South Branch was destroyed, and that was the work of an incendiary. The aggregate loss of these three fires was considerable, and following, at but short intervals, other fires equally destructive, there are grounds for serious distrust in the security of property. Chicago is not alone in this calamity. Every large city in the Union is a sufferer in a like manner, and even the small country towns have not escaped the calamity. St. Louis and Cincinnati within a few weeks have suffered even more than Chicago, but our losses have been very severe, Fires secm to have become epidemic, and one of the first duties in cases of epidemics is to ascertain their cause, and then employ every effort to remove them.

#### TWENTY PER CENT.

Instead of issuing a scrip dividend to dealers, based on the principle that all classes of risks are equally profitable, this Company makes such cash abatement or discount from the current rates, when premiums are paid, as the general experience of underwriters will warrant, and the nett profits remaining at the close of the year, will be divided to the stockholders.

This Company continues to make Insurance on Marine and Inland Navigation and Transportation

Risks, on the most favorable terms, including Risks on Merchandise of all kinds, Hulls, and Freight. Policies issu & making loss payable in Gold or Currency, at the Office in New York, or in Sterling, at the Office of Rathbone, Bros. & Co., in Liverpeol
