THE CHRONICLE.

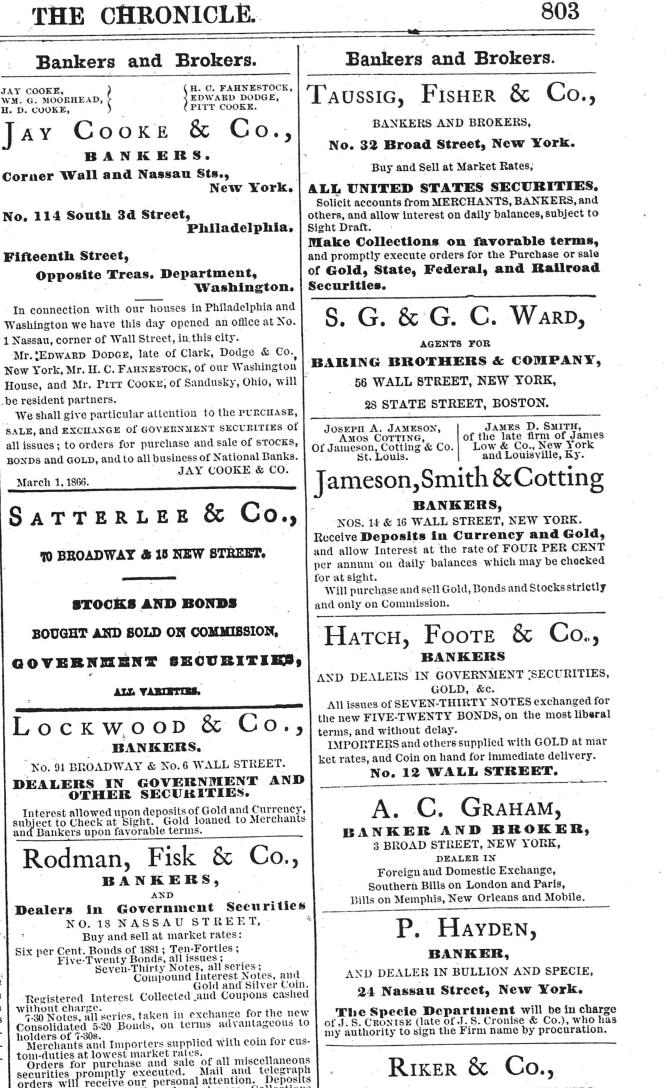

JAY COOKE, WM. G. MOORHEAD, H. D. COOKE,

Fifteenth Street,

be resident partners.

March 1, 1866.

AY

Financial. THE

UNION PACIFIC RAILROAD

COMPANY,

Are now constructing a Railroad from

OMAHA, NEBRASKA,

westward towards the Pacific Ocean, making, with its connections, an unbroken line

ACROSS THE CONTINENT.

The Company now offer a limited amount of their

First Mortgage Bonds

having thirty years to run, and bearing annual interest payable on the first day of January and July in the City of New York, at the rate of

SIX PER CENT. IN GOLD,

AT

Ninety Cents on the Dollar.

This road was completed from Omaha 305 miles west on the 1st of January, 1867, and is fully equipped, and trains are regularly running over it. The Company has now on hand sufficient iron, ties, etc., to finish the remaining portion to the eastern base of the Rocky Mountains, 212 miles, which is under contract to be done September 1st of this year, and it is expected that the entire road will be in running order from Omaha to its western connection with the Central Pacific, now being rapidly built eastward from Sacramento, Cal., during 1870.

Means of the Company.

Estimating the distance to be built by the Union Pacific to be 1,565 miles, the United States Government issues its Six per cent. Thirty-year Bonds to the Company as the road is finished at the average rate of about \$28,250 per mile, amounting to \$14,208,000.

The Company is also permitted to issue its own First Mortgage Bonds to an equal amount, and at the same time, which, by special Act of Congress, are made a First Mortgage on the entire line, the bonds of the United States BEING SUBORDINATE TO THEM.

The Government makes a donation of 12,800 acres of land to the mile, amounting to 20,032,000 acres, estimated to be worth \$30,000,000, making the total resources, exclusive of the capital, \$118,416,000; but the full value of the lands cannot now be realized.

The authorized Capital Stock of the Company is one hundred million dollars, of which five millions have already been paid in, and of which it is not supposed that more than twenty-five millions at most will be required.

The cost of the road is estimated by competent engineers to be about one hundred million dollars, exclusive of equipment.

Prospects for Business.

The railroad connection between Omaha and the East is now complete, and the earnings of the Union Pacific on the sections already finished for the month of May were \$261,782. These sectional earnings as the road progresses will much more than pay the interest on the Company's bonds, and the through business over the only line of railroad between the Atlantic and Pacific must be immense.

Value and Security of the Bonds.

The Company respectfully submit, that the above statement of facts fully demonstrates the security of OTHER SECURITIES.

Interest allowed upon deposits of Gold and Currency, subject to Check at Sight. Gold loaned to Merchants and Bankers upon favorable terms.

Rodman, Fisk & Co., BANKERS,

Dealers in Government Securities NO. 18 NASSAU STREET,

Buy and sell at market rates:

Registered Interest Conected and Compose without charge. 7:30 Notes, all series, taken in exchange for the new Consolidated 5:20 Bonds, on terms advantageous to holders of 7:30s. Merchants and Importers supplied with coin for cus-tom-duties at lowest market rates. Orders for purchase and sale of all miscellaneous securities promptly executed. Mail and telegraph orders will receive our personal attention. Deposits received, and interest allowed on balances. Collections made on all points with quick returns. RODMAN, FISK & CO.

BROKERS IN MINING STOCKS, NO. 5 NEW STREET AND 80 BROADWAY.

their Bonds, and as additional proof they would suggest that the Bonds now offered are less than ten million dollars on 517 miles of road, on which over twenty million dollars have already been expended; on 330 miles of this road the cars are now running, and the remaining 187 miles are nearly completed.

At the present rate of premium on gold these bonds pay an annual interest on the present cost of

Nine per cent.,

and it is believed that on the completion of the road, like the Government Bonds, they will go above par. The Company intend to sell but a limited amount at the present low rates, and retain the right to advance the price at their option.

Subscriptions will be received in New York by the CONTINENTAL NATIONAL BANK, No. 7 Nassau St. CLARK, DODGE & Co., Bankers, 51 Wall St. JOHN J. CISCO & SON, Bankers, No. 33 Wall St.

and by BANKS AND BANKERS generally throughout the United States, of whom maps and descriptive pamphlets may be obtained. They will also be sent by mail from the Company's Office, No. 20 Nassau street, New York, on application. Subscribers will select their own Agents in whom they have confidence, who alone will be responsible to them for the safe delivery of the bonds.

FISK & HATCH,

BANKERS AND DEALERS IN GOVERNMENT AND OTHER DESIRABLE SECURITIES,

No. 5 Nassau Street, New York, RECOMMEND TO INVESTORS THE

FIRST MORTGAGE BONDS OF THE

THE CENTRAL

Pacific Railroad Co.,

This Company is constructing, under the patron-age of the UNITED STATES GOVERNMENT THE WESTERN END OF THE

GREAT NATIONAL RAILWAY ACROSS THE CONTINENT.

Their line will extend from Sacramento, Califor-nia, across the Sierra Nevadas to the California State line, traversing the RICHEST AND MOST POPU-LOUS SECTION OF CALIFORNIA, and thence through the GREAT MINING REGIONS OF THE TERRITORIES, to the vicinity of Salt Lake City.

It forms the sole Western link of the only route to the Pacific which is adopted by Congress and aided by the issue of United States Bonds.

Their road is already completed, equipped, and running for 94 miles from Sacramento to within 12 miles of the summit of the Sierras, and a large amount of the work of Grading, Tunnelling, &c., beyond that point has been secondicated. beyond that point has been accomplished.

The First Mortgage Bonds of this Com-pany afford unusual inducements of Safery and Prodt to Investors, for the following among other reasons, viz:

FIRST -The rate of Interest is Six per Cent. in Gold, payable semi-annually in the City of New York

SECOND.-The Principal is payable in Gold at matur tv.

THIED.—The cost of the Bonds, Ninety-five Per Cent. and accrued interest, is Ten Per Cent. les- than that of the cheapest Six Per Cent. Gold Bearing Bonds of the Government.

FOURTE.-The United States Government provides nearly half the amount ne-cessary to build the entire road, and looks mainly to a small per-centage on the future traffic for re-payment.

FIFTH.—Owing to this liberal provision, accompa-nied with Extensive Grants of Public Lands, by which the Government fosters this great national enterprise. its success is ren-dered certain, and its financial sta-bility is altogether independent of the conting encies which attend ordi-nary Bailroad enterprises. nary Hailroad enterprises.

SIXTH. - The Security of its First Mortgage **Bonds** is therefore **ample**, and their character for safety and reliability is equalled only by that of the obligations of the **Government itselt**.

SEVENTH .- The net earnings of the completed portion are already largely in excess of the interest obligations which the Company will incur on twice the distance. and are steadily increasing, rendering the uninterrupted payment of the Interest absolutely certain.

EIGHTH.-At the present rate of Gold they pay nearly S% Per Cent. per annum, on the amount invested.

The Bonds are issued in denominations of \$1,000 with semi-annual Gold Coupons attached, payable in New York, and are offered for the present at 95 per cent. and accrued interest (in currency) from January 1st.

Orders may be forwarded to us direct, or through the principal Banks and Bankers in all parts of the country.

Remittances may be made in drafts on New York, National Banl in Legal Notes. 'ende

THE COURSE OF THE MONEY MARKET.

An unexampled accession of ease in money yesterday took

ease everywhere else. Now, in forecasting the monetary probabilities of the next few months, there are several points which claim attention. The first regards the financial position of the banks, and the second the possible interference of Congress in financial affairs during the summer session. In both these directions the indications seem to be rather more suggestive of monetary ease than of monetary stringency, although of course there is a cloud of uncertainty hanging over some of the proofs on which opinion is formed in the view of so-much conflicting evidence.

As to the banks of the great central cities they offer several favorable features. For they are abundantly supplied with available capital. A long period of caution and conservative management has made them strong. For the first time in a year or more the quarterly bank returns to Washington have been made up without any disturbance of the money market, and we have no doubt from the investigations we have been able to make both here and in other financial centres that the reports when published a few weeks hence will prove that these institutions generally are more healthy and sound and therefore more useful to the country than in any previous period since the National Currency Act was first passed by Congress. It would have been Utopian to have expected that sixteen or seventeen hundred banks, many of them entirely new, could in three or four years be brought into activity without the intrusion of a few unworthy institutions, whose weakness and instability would unfit them for union with the other members of the sisterhood of banks. But it was to be expected, and it is in fact realized, that the exposure of the rotten parts of the financial edifice should be speedy, and that the excision of the unsound banks should be effected without compromising the safety or disturbing the integrity of the vast national organization as a whole. Among the numerous appliances which have been brought into play for the purposes referred to it is impossible to overestimate the influence of the press. Publicity of the condition of the banks must ever be regarded as one indispensable condition for annihilating or keeping in check those forces which lead to unsound and dangerous business. The visits of the Government examiners, and the reports given monthly and quarterly to the department at Washington, derive their chief value from this : that they expose the interior of the banks to publicity, and thus afford means of verifying their accounts and testing their soundness, in the interest and for the information of their stockholders, of their dealers, and of the public generally, whose fortunes and business efficiency are so intimately associated with every movement of these institutions. We need not urge the obvious fact that the rendering of the official quarterly reports ought not to impose on the b

some of our financial men by surprise. Money was freely offered in large sums on government bonds at four to five per cent. The expectation had been that as the banks are required to report on Monday to the Department, some positive symptoms of stringency might result from the changing of loans. Two causes, however, seem to have disappointed such expectations. First a very much smaller aggregate of loans were called in during the closing days of the week than has often occurred in such circumstances, and the needed funds have more easily than usual been obtained to replace such loans; while, secondly, the public confidence, which controls so powerfully the movements of money, is no longer in that sensitive, tremulous condition which has so long been its most prominent and most perilous characteristic.

Next to the prospects of the crops the great financial anxieties at this moment among our merchants, bankers and manufacturers are as to the next changes in the loan market. If there is ease there they anticipate prosperity and the necessity of modifying their usual business. W

FISK & HATCH,

BANKERS AND DEALERS IN GOVERNMENT AND OTHER DESIRABLE SECURITIES,

No. 5 Nassau Street, New York, RECOMMEND TO INVESTORS THE

FIRST MORTGAGE BONDS OF THE

THE CENTRAL Pacific Railroad Co.,

This Company is constructing, under the patron-age of the UNITED STATES GOVERNMENT THE WESTERN END OF THE

GREAT NATIONAL RAILWAY ACROSS THE CONTINENT.

Their line will extend from Sacramento, California, across the Sierra Nevadas to the California State line, travelsing the RICHEST AND MOST POPU-LOUS EECTION OF CALIFORNIA, and thence through the GREAT MINING REGIONS OF THE TERRITORIES, to the vicinity of Salt Lake City.

It forms the sole Western link of the only route to the Pacific which is adopted by Congress and aided by the issue of United States Bonds.

Their road is already completed, equipped, and running for 94 miles from Sacramento to within 12 miles of the summit of the Sierras, and a large amount of the work of Grading, Tunnelling, &c., beyond that point has been accomplished.

The First Mortgage Bonds of this Company afford unusual inducements of Safety and Prout to Investors, for the following among other reasons, viz :

FIRST -The rate of Interest is Six per Cent. in Gold, payable semi-annually in the City or New York

SECOND .- The Principal is payable in Gold at maturity.

THIBD.—The cost of the Bonds, Ninety-five Per Cent. and accrued interest, is Ten Per Cent. - les- than that of the cheapest Six_Per Cent. Gold

Bearing Bonds of the Government.

FOURTH.—The United States Government provides nearly half the amount ne-cessary to build the entire road, and looks malily to a small per-centage on the future traffic for re-payment.

- FIFTH.-Owing to this liberal provision, accompanied with Extensive Grants of Public Lands, by which the Government fosters this Lands, by which the Government losters this great national enterprise. its success is ren-dered certain, and its financial sta-bility is altogether independent of the contingencies which attend ordi-nary Kailroad enterprises.
- SIXTH. The Security of its First Mortgage **Bonds** is therefore **ample**, and their character for safety and reliability is equalled only by that of the obligations of the **Government itselt**.
- SEVENTH .- The net earnings of the completed portion are already largely in excess of the interest obligations which the Company willingur on twice the distance. and are steadily increasing, rendering the uninterrupted payment of the Interest absolutely certain.

EIGHTH.-At the present rate of Gold they pay nearly S% Per Cent. per annum, on the amount invested.

The Bonds are issued in denominations of \$1,000 with semi-annual Gold Coupons attached, payable in New York, and are offered for the present at 95 per cent. and accrued interest (in currency) from January 1st.

Orders may be forwarded to us direct, or through the principal Banks and Bankers in all parts of the country.

Dividends.

The Chronicle.

THE COMMERCIAL AND FINANCIAL CHRONICLE is issued every Saturday morning by the publishers of Huni's Merchants' Magazine, with the latest news up to midnight of Friday.

THE COURSE OF THE MONEY MARKET.

An unexampled accession of ease in money yesterday took

ease everywhere else. Now, in forecasting the monetary probabilities of the next few months, there are several points which claim attention. The first regards the financial position of the banks, and the second the possible interference of Congress in financial affairs during the summer session. In both these directions the indications seem to be rather more suggestive of monetary ease than of monetary stringency, although of course there is a cloud of uncertainty hanging over some of the proofs on which opinion is formed in the view of so much conflicting evidence.

As to the banks of the great central cities they offer several favorable features. For they are abundantly supplied with available capital. A long period of caution and conservative management has made them strong. For the first time in a year or more the quarterly bank returns to Washington have been made up without any disturbance of the money market, and we have no doubt from the investigations we have been able to make both here and in other financial centres that the reports when published a few weeks hence will prove that these institutions generally are more healthy and sound and therefore more useful to the country than in any previous period since the National Currency Act was first passed by Congress. It would have been Utopian to have expected that sixteen or seventeen hundred banks, many of them entirely new, could in three or four years be brought into activity without the intrusion of a few unworthy institutions, whose weakness and instability would unfit them for union with the other members of the sisterhood of banks. But it was to be expected, and it is in fact realized, that the exposure of the rotten parts of the financial edifice should be speedy, and that the excision of the unsound banks should be effected without compromising the safety or disturbing the integrity of the vast national organization as a whole. Among the numerous appliances which have been brought into play for the purposes referred to it is impossible to overestimate the influence of the press. Publicity of the condition of the banks must ever be regarded as one indispensable condition for annihilating or keeping in check those forces which lead to unsound and dangerous business. The visits of the Government examiners, and the reports given monthly and quarterly to the department at Washington, derive their chief value from this : that they expose the interior of the banks to publicity, and thus afford means of verifying their accounts and testing their soundness, in the interest and for the information of their stockholders, of their dealers, and of the public generally, whose fortunes and business efficiency are so intimately associated with every movement of these institutions. We need not urge the obvious fact that the rendering of their official quarterly reports ought not to impose on the banks the necessity of modifying their usual business. We re-

some of our financial men by surprise. Money was freely offered in large sums on government bonds at four to five per cent. The expectation had been that as the banks are required to report on Monday to the Department, some positive symptoms of stringency might result from the changing of loans. Two causes, however, seem to have disappointed such expectations. First a very much smaller aggregate of loans were called in during the closing days of the week than has often occurred in such circumstances, and the needed funds have more easily than usual been obtained to replace such loans; while, secondly, the public confidence, which controls so powerfully the movements of money, is no longer in that sensitive, tremulous condition which has so long been its most prominent and most perilous characteristic.

Next to the prospects of the crops the great financial inxieties at this moment among our merchants, bankers and manufacturers are as to the next changes in the loan market. If there is ease there they anticipate prosperity and 806

THE CHRONICLE.

[June 29, 1867.

gard it, therefore, as a good sign, and a proof of the soundness of the banks, that the perturbations and irregularities which have been complained of in the money market as attendant on previous quarterly reports have in the present case been avoided, while the reports themselves show unusually satisfactory results. Were our banks, like those of England eighteen months ago, unduly expanded; or were they now filled, as in 1864, with securities of doubtful value, we should not dare to conclude so hopefully as to the future. But in the presence of so many undoubted facts indicative of strength, while the bank vaults are filled with Government bonds, and other securities of undoubted soundness and appreciating value, we have little hesitation in putting on record the opinion that, notwithstanding the failure of a few banks in New Orleans and elsewhere, the National Banks generally are in such a condition that in the absence of any unforeseen influences arising out of Congressional interference, a considerable period of exemption from the ordinary causes of monetary stringency may probably be enjoyed, which, if Providence should grant us an abundant harvest, may be productive of the happiest results on the trade, commerce, wealth and general prospects of the country.

Here, however, the question arises as to what Congress will do. And beyond a few general facts it is impossible to go in the way of prediction. First, Congress will probably discuss several financial changes affecting the currency and the banks. It is not at all probable that the restoration of the South, and the impeachment of the President will be the only subjects on which the oratory of the honorable members will expend its energy. But we believe we have authority for saying that by none of the leaders of either party are any changes of importance anticipated to be effected this summer, either in the banking act or in the laws affecting the contraction of the currency. On the latter question, indeed, the opinion prevails that the policy which Mr. McCulloch has adopted during the last six months of suspending all attempts to contract the volume of the currency by withdrawing greenbacks and destroying them, will have the sanction of a considerable majority on both sides of each branch of Congress. If these anticipations should prove true, monetary ease may be confidently relied on, so long at least as the public confidence is not shaken or the public credit compromised by political or other complications, which in this place we purposely exclude from our calculations.

THE ADVANCE AT THE STOCK EXCHANGE.

So great are the anomalies which have marked the course of business in all classes of securities, except Gov-

speculative purchases of petroleum, manufacturing, or mining stocks, which soon became either altogether unsaleable, or could only find purchasers at a price scarcely covering the interest on the original purchase money. In our hotels and railroad cars, in our merchant's offices and our bankswherever we make the inquiry in our chief cities-we find it not difficult to meet with men who have directly or indirectly suffered from the collapse of some of the ten thousand companies with whose prospectuses all parts of the country were inundated two or three years ago. The great reservoir of the public wealth has thus been depleted in two ways. First, through the failure of the crops, by which our people generally have been more or less impoverished; and, secondly, by extravagant speculation, which has reduced multitudes to indigence, and has made almost every one "feel poor," which in its effects on business is as bad as being poor. When to these circumstances we add the pressure of a galling burden of ill adjusted taxation which our young giant nation has scarcely accustomed its shoulders to bear, and the prodigal habits of domestic expenditure which have grown up and have conferred on us at home and abroad the reputation of being the most extravagant and profuse, as well as the most energetic and enterprising nation in modern Christendom, we shall show some of the reasons, though only a small part of the reasons for that languor which has seized us, and has diffused its cataleptic oppressive torpor over so large a part of our productive energies.

If in the long depression which has prevailed in Wall street, we see reflected the mercantile and financial gloom under which the whole nation has suffered, shall we not see in the improvement that is now developing itself at the Stock Exchange, a bright promise of good which is to overspread the whole country?

It is not without significance that at the London Stock Exchange an improvement is apparent, quite as marked and as unexpected as that we note here. A recent number of the London *Economist* refers to it in the following terms:

The rise in prices during this week and last has puzzled some people, and especially, perhaps, those who have given some attention to philosophical principles, but have not thought the subject quite out. It is generally imagined that some physical quantity—supply, and some other almost mechanical entity, demand, determine price, and rightly independent we believe supply, and determine price, but the understood, we believe, supply and demand do determine price, but the sense in which they do so requires a very nice and delicate exposition, which we cannot go into here. The material point for the present pur-pose is this; that the circumstances which act on price are quite as much mental as material. A person who thinks prices are going to rise, goes and buys, and by his application to buy he raises or tends to raise the price. Just so a person who thinks prices are about to fall is apt to sell, and by so selling he reduces or tends to reduce the price of the article. It cannot bo put too strongly that price is an affair of the nerves as much as it is an affair of anything.

It is certain, we believe, that the great rise in the shares of the London and Westminster Bank, though caused by a special fact which every one knew, did tend to raise the price of everything else. It made people feel more cheerful; it produced the effect of a great splash in a dull pool; it woke up people's minds, and made them think things would be different. The great rise in Consols, which has ruined one or two small dealers, is not to be wondered at. They rose more rapidly in value both after 1847 and 1857 than after 1866. And it is more reasonable that in a depression of prices which arises from distrust, those things which are least to be disturbed should sink least at first, and should rise soonest from the common fall. It is far from our intention to encourage inordinate hopes, or to countenance a speculative reckless spirit among our mercantile classes. The object we have in view will be accomplished if we induce some of our more desponding readers to look more hopefully for the turn of the tide, when legitimate risks and mercantile ventures, which would have been rash in the extreme a few months ago may be less perilous, or may be embraced within the limits of prudence and sound business policy.

ernment bonds, that during the past six months the remark has been on almost every one's lips that the thinkers have been losers, while the men who have followed the instincts and impulses of the moment have almost invariably grown rich by their operations, or have, at least, avoided serious loss. In face of an inflated currency, low prices have ruled steadily; and though all descriptions of negotiable securities have confessedly been offering in the market far below their intrinsic worth, still the sellers have been more urgent than the buyers; the speculative feeling seemed extinguished; and all those forces which tend to put up quotations suffered from temporary paralysis. In looking back, it is easy to select and point out some of the causes to which this long reign of depression is due. Business in all departments has been dull and unremunerative; we have had three successive bad harvests; a vast aggregate of money has been lost by people in all parts of the country whose ordinary prudence had unhappily been silenced by the desire to grow suddenly rich, and who have ventured greater or smaller sums in published last week, seems to have put an end for the pre-

THE CONTROVERSY ON CERTIFIED CHEQUES.

The letter of the Comptroller of the Currency, which we

sent to the excitement about certified cheques. It is now known that no power is claimed by that officer to dictate to the banks, to interfere with their long established principles of management, or to disturb any of those safeguards and economical expedients which are sanctioned by experience and useful in business. While Mr. Hulburd does not claim under the law any right to forbid the certification of cheques, he does claim the right to correspond in a semi-official way on the reports of the examiners, which are periodically made to him relative to every bank in the country. We hope indeed, to hear more from these reports, and as the Comptroller has now got his office and his methods well organized, the public expect to see evidence that the examiners visit every one of the banks however remote at frequent intervals, and that wherever he finds anything which rightly or wrongly seems irregular, he avails himself of the undoubted right to ask for explanations. What has been complained of, and what the public generally are not satisfied with, is rather the secrecy with which most of the investigations of the Currency Bureau with the banks are enveloped. Here in New York, the heart and brain of the whole banking organism, we ought to know promptly from official publication many facts of which the Bureau is cognizant relative to broken and other banks all over the country, which now reach us, and through us the whole nation, in a very slow, round-about, and unsatisfactory manner. The information the Bank Department obtains is reported there by law not for the private information of the officers of that Bureau, but for the public, and the public ought to be put in posssession of the information without delay.

The letter before us on certified cheques was addressed to Mr. Haight, the President of the Bank of the Commonwealth, in this city, and has elicited a reply which exhibits the reasons why the banks of New York have adopted the practice of certifying the cheques of their dealers, and claims that in this city the practice is safe, necessary, and superior to any plan that has ever been substituted or suggested instead of it. On the unsefulness of the custom Mr. Haight says that "certifying checks in excess of actual balances at the moment the certification is made, is a practice that has grown to be a necessity in the transaction of business here. The practice is much older than the National banking system and than the New York State system, on which that was modeled. It is the outgrowth and result of the tendency of the business mind to overcome the hindrances that a rigid adherence to the original cast iron system of banking presented to the increasing growth and extent of business in this city. And although the large transactions of bankers and brokers occasions the practice to be spoken of as employed for them alone, such is not the fact; for there is no merchant of credit and responsibility, whose matured notes or cheques for such reasonable sums as he might give them, being presented and refused payment at one o'clock, because his deposits were not usually made till two, would not evoke a displeasure that would be speedily manifested in a closing of the account." To do away with the necessity for the certifying of cheques two expedients have been suggested; first, the establishment of a Stock-Exchange Clearing House, and secondly, the use of cheques without the security and guarantee given by certification. The latter of these suggestions Mr. Haight discusses as follows:

be reasonably able to inform itself; in the other, it of necessity trusts scores of customers of other banks, of whom it can hardly be presumed to know much. Or in one case it may have certified its customers' cheques to the extent of \$10,000,000, and have received from them. on deposit, certified cheques to the amount of \$11,000,000 with perfect safety on both sides, and in the other it may not have certified a dollar, and having on deposit \$11,000,000 of cheques on other banks, not certified, rendered itself liable to pay that amount to any number of brokers holding its customers' cheques, who may require the banks to pay them rather than hold their cheques till after the day's clearings. Such requirement on the part of broker, banker or merchant would hardly be deemed "impudent"—a refusal of the bank to pay might be deemed so. But would paying under such circums'ances, be absolutely safe? Would it not have been safer to have certified at first and secured certified cheques from them?

But you say that we would probably reject without hesitation a proposition to certify in *this* way for our depositors without discrimination. To which I reply not only *probably*, but most *certainly*. It is just this ability to discriminate, this exercise of judgment, discretion, tact and experience that is presumed to give value to the services of a bank's officers. And if in the exercise of these qualities a discriminating policy is adopted that results in a mutual advantage to bank and depositor alike, who can have just cause of complaint? For it by no means follows that the banker, broker, or merchant is alone benefited in these transactions. The resulting balance inures most substantially to the benefit of the bank, enabling it to loan money far in excess of its capital for the substantial profit of its stockholders. As, then, the depositor trusts the bank, why should not the bank trust its depositors? In these transactions the depositor is trusted for but for an hour or two the bank is trusted for days. It ought, therefore, to be assumed that *both* act with discrimination, and that in the exercise of this discrimi nation the safety of both may be reasonably assured. Brokers alone do *not* claim this indulgence—it is extended alike to bankers and merchants, in different degrees, with such reasonable discrimination as bank officers are presumed to exercise—and, in this city at least, it is not an indulgence that is by any means extraordinary. You speak of it as an "abuse of a practice." Like all other practices, not wrong in themselves, it may be abused; but I am not, by any means, prepared to admit that it is generally abused, or that its abuses have not been rare and exceptional.

As to the plan of a Stock Exchange Clearing House, the letter before us offers no observations. The Comptroller, we believe, is of opinion that the certification of cheques might be dispensed with, by the establishment of a clearing institution to fulfil to the dealers in stocks similar functions to those for which the gold dealers depend on the new Gold Exchange Bank. We believe that the general opinion in Wall street is not favorable to the scheme, the merits of which have never, in any country, been submitted to the test of experience.

Mr. Hulburd, it will be remembered, condemns in his letter the use of "cashiers' cheques," which he thinks are not sanctioned by the law. But Mr. Haight very properly shows that the use of these cheques is older than the banking act, and has never yet been interfered with under that act, for the excellent reason that without such cheques neither the business of the Treasury could be conducted in selling its gold and bonds, nor the business of the public, which is, if possible, more important still. Of the use of such cheques he gives the sujoined illustration :

A bank purchases of Jay, Cooke & Co. \$500,000 of United States bonds. Instead of the primitive plan of counting out the money to them, which they must again count and deposit in their bank, where it must again be counted, it gives them a "cashiers' cheque," which the deposit in their bank; and in the settlement of the balances at they clearing House it counts against the bank upon which it is drawn. Much trouble has thus been saved and "nobody hurt." As the cheque was not issued to circulate as money, and as its use was only an incidental power exercised in carrying on the business of banking, I cannot see that its use is prohibited under either section 8 or section 23.

I beg to ask (so long as cheques are, and of necessity must be, used in the transfer of balances), how much safer than the present system it would be for banks to receive in deposit cheques on each other not certified, against which they become liable to pay their own customers' cheques, than to discriminate in certifying for them, and to require in turn, as is done, that their deposits shall consist of certified cheques on other banks ? In the one case the bank trusts its own customer, of whose character, capital and business capacity it may be presumed to

ASER

The argument then both as to the certifying by a bank of its dealer's cheques, and as to the issuing of its own cashier's cheques may be summed up in the statement, that these practices are sanctioned by long experience as safe, that being demanded by the exigencies of business they are indispensable, and that nothing better can be devised in their stead.

THE FALL TRADE AND PRICES.

It appears to be now very generally anticipated that abundant crops will insure an active Fall business; and should no adverse conditions of the seasons supervene, there is every reason for relying on this expectation being realized. An abundance of tood products is one of the surest causes of commercial prosperity, and although the late extreme depression of trade may somewhat mar the exhilarating effects anticipated, the general result must appear in a marked improvement in the commerce of the country.

We notice, however, in some quarters a disposition to draw a singularly mistaken conclusion from this prospect. It is imagined that the improvement in business will induce higher prices for products, and this supposition no doubt has a certain influence in stimulating preparations for the Fall business. It may be natural enough that those who have lately suffered severely from the steady decline in prices should jump to this conclusion; but brief reflection will show that it has no warrant in reason. The true view to be taken of the question is that plentiful crops will facilitate the decline in prices; but will afford opportunity for the decline-with the least possible injury to all interests. High prices are the result of an unnatural condition of affairs, and cannot be maintained. We have seen during the past year, that even under the circumstances of a short supply of breadstuffs the tendency of values to react from high prices to lower will make itself felt. The decline, under those circumstances, is caused in great part by the cumpulsory contraction of consumption, and is attended with heavy losses to the manufacturer; who, while he is compelled to let down his prices to meet the ability of consumers, cannot at once compensate himself by the reduction of wages.

How does the case stand under the circumstances of ample crops and cheap food? It is evident that the reduced prices of domestic articles of food leaves in the hands of consumers so much more to be expended upon other products, and so far tends to increase the demand for goods generally. But it by no means follows that this improved demand must produce higher prices. The cheapness of breadstuffs and of animal food will facilitate the reduction of wages, so long vainly attempted by employers; which will so far reduce the cost of goods as to enable producers to sell at late prices and yet realise a fair profit. And this amelioration of the condition of the manufacturer will naturally induce an enlarged production of goods. So also the hopeful feeling inspired by the crop prospects will encourage the return of a large amount of capital to active employment which has been withdrawn under the discouragements attending the depression of trade; and this again will aid materially in promot ing an enlarged production. In this way will the increased demand be counteracted by an enlarged production and prices be prevented from advancing, if not indeed further reduced.

It is singular how the idea we are combating could have originated, in face of the commonly admitted principle that abundance implies, as its natural consequence, cheapness. It accords with universal experience that an ample supply of food products is accompanied with a general cheapening of other products. Cheap bread tends to public content, and to the health and vigor of the working classes; while it facilitates the economising of capital and the accumulation of savings, and thereby increases the productive power of the com-Manufacturers will therefore commit a grave munity. practical error if they construe the crop prospects as foreshadowing higher prices for their products. One result may be certainly calculated upon as likely to follow their blunder; the improving tendency of business would be rudely checked, merchants would refuse to pay the advance demanded, business would halt; and with the disappointment of ardent expectations confidence would be shaken, capital would be withdrawn into inactivity again, and in this way much of the good effects of the prevailing abundance would be needlessly sacrificed. In the meantime, stocks of goods would accumulate, and the ultimate rush to sell under the pressure of necessity would cause an extreme decline in prices.

for FRASER

The bearings of currency movements upon the course of prices we have not thought it necessary to notice, for the reason that there appears to be no prospect of any fluctuations in the volume of the circulation materially affecting the question.

CENTRAL RAILBOAD OF NEW JERSEY.

This road extends from Phillipsburg, on the Delaware, to Elizabethport, on the waters of the harbor of New York, a distance of 64 miles, with an extension to Jersey City, opposing New York (opened in 1864), a further distance of 10 miles. It is, throughout. a double track road, and a third rail is laid between the junction of the Delaware, Lackawanna and Western Railroad, at Hampton, to Elizabethport, for the accommodation of the wide cars of that line. A third track is about to be laid between Elizabeth City and Jersey City, the traffic on this portion of the line having increased beyond the capacity of the two existing tracks. During the past year a stock yard and market, covering 40 acres, has been opened at Communipaw, and the new coal depot at Port Johnston has been brought into use. The works of the American Dock and Improvement Company are also being carried on with energy and success. Though the stock yard and dock properties belong to separate organizations, the Central company own the largest interest therein, and exercise full control over both. The improvements made by the company during the past three years have more than doubled its capital account: but the increase of business in consequence of their completion has been sufficient to ensure the continuance of the usual 10 per cent. dividend. It is not intended to make further new expenses on account of construction, but simply to finish up the work on hand.

The amount of rolling stock owned by the company at the close of each of the last five fiscal years is shown in the following statement:

· .	'62.	'63.	'64.	'65.	'66.	'62. '63. '64. '65. '66.

Surplus	60,321	365,029	500,000			

An extra dividend of 10 per cent was paid from the renewal fund on surplus earnings as found at the end of 1863. This amounted to \$515,000, leaving in the fund named \$63,255, to which was added \$60,000 premium on new stock issued making the true balance at the end of 1863 \$123,255, and with the surplus of 1864 a total of \$628,159, at which amount the renewal fund still remains.

The following statements exhibit the operations on the road and ferries for the same five years :---

RAILROADS OF THE WORLD.

The following statement, which we have compiled from the most authentic sources accessible, shows the length of railroad constructed and in operation at the end of 1866 in each country into which they have been introduced, and their relation to the extent and population of the countries respectively. We believe it to be as nearly accurate as it is possible to make such a summary :

The interest and principal of the bonds marked thus (*) are payable in gold by Messrs. Lees & Waller in New York. All others are payable in San Francisco.

The coupons of the bonds of 1858, the judgment bonds of 1863 and 1864, and the school bonds of 1866, are receivable for taxes of the current year.

The amount of debt July 1, 1866, as above	\$4,947,294
Coupons then due and not presented	68,420

tively trifling. Owing to the magnificent weather much depression has prevailed in the wheat trade during the present week throughout the whole country. The fall in prices is about two shillings per quarter ; but, at the moment, it does not seem likely that a further decline will take place. The extent of our home, as well as foreign supplies, does not admit of such a movement. Supply and demand are in fact too equally balanced to allow of much fluctuation in prices ; supply being sufficiently extensive, with the aid of fine weather, to produce a downward movement; while millers continue to operate with extreme caution, which not only checks the probability of any advance, but assists the tendency to lower quotations. It must, however, be admitted that there is only a tendency to lower prices. The fall of 2s. per quarter, which has taken place this week is trifling, if we take into consideration the present high range of values, and, as we stated above, it seems doubtful whether prices will experience any further decline. Much will, of course, depend upon the extent of our importations; but, with the exception of Russia, there seems to be but little prospect of heavy foreign receipts. Supplies of Russian produce continue to be received from French ports, and these appear likely to continue for some time to come. From this circumstance, it may therefore be inferred that the harvest prospects in France are very favorable, and the nature of the latest advices from Paris and elsewhere confirm such an assertion. As the week closes, millers show a disposition to operate rather more freely in wheat, at the recent decline of 2s. per quarter; but even in making purchases at this reduction they exhibit much caution, and confine their transactions to the supply of actual and immediate wants. So long as our harvest prospects remain favorable, the trade is likely to be characterized by much inactivity, but even fine weather, and the prospect of a favorable harvest, are not likely to depress the market for any length of time. Possibly, when the greater part of our harvest is secured, and we are certain that the crop here will be a full average one, while abundant importations of foreign produce are likely to take place, an important fall in prices will be the result. That a heavy decline in the quotations will be the effect of au abundant harvest over the greater part of the world can scarcely admit of a doubt; but it is yet many weeks till harvest, and, in the mean time, our supplies seem only about adequate to the wants of the country. I strongly incline to the opinion that the supplies of home-grown produce in the hands of the farmers are larger than has been represented. They are, however, undoubtedly smaller than last year; but from many reliable sources of information. I hear that the actual falling off is not so great as has been represented, Should such prove to be the truth, and as confirmatory of the remark it may be observed that the various markets of the kingdom are freely though not abundantly, supplied with wheat, the greater will be the fall in the quotations if we secure an abundant crop. Possibly at no former period were there so few complaints made respecting the appearance of the crops, and as farmers certainly hold less old produce than usual, it is undoubtedly a favorable circumstance that they show a disposition to meet the views of buyers, and to make some concession in prices.

The Whitsuntide holidays have, in some measure, interfered with the course of business throughout the manufacturing districts; consequently, transactions in goods have been to only a moderate extent. At Liverpool the cotton trade has held steady, notwithstanding that some descriptions of East India produce show a decline in value of about 1d. per lb. At Manchester there has been a moderate demand for yarns and cloth, and, in anticipation of a good trade next week, full prices have been demanded and obtained. In reference to the report of the cotton market, it will be observed that the stocks of cotton in Liverpool, London and Havre, including the supplies of American and American produce afloat to those ports are 350,000 bales less than they were last year. This circumstance, combined with the fact that there is an increasing demand for goods, would seem to suggest that the cotton trade will be characterized by some degree of firmness during the next few weeks. Money continues very abundant, and there is no increase in the demand for accommodation. Hence, the quotations for discount tend downwards, and there is every prospect that we shall soon witness a two per cent. minimum rate of discount at the Bank of England. Considering the abundance of money, the Russian Railway loan has been a great failure. The sum required has, indeed, been obtained; but the applications have not been numerous, and the result shows that the great body of the investing public are by no means disposed to embark in fresh enterprises of any kind. The coldness with which the Russian loan has been received will operate strongly in checking the introduction of loans for other foreign governments; and if a loan for a country like Russia, and for a government like the Russian, which, throughout the Crimean war, duly and punctually remitted the interest due

[From our own Correspondent.]

LONDON, Saturday, June 15, 1867.

Apart from the Stock Exchange very little of interest has transpired this week in any department of business. That confidence is increasing is undoubted; but it makes slow progress, and for this reason, perhaps, is more certain of being permanent when it shall have been wholly restored. The aggregate trade of the country is still contracted, and although in some departments there has been more activity, and transactions have been on a more extensive scale, yet, taken as a body, the mercantile community complain that there is a great want of active and remunerative business. It seems probable that affairs will remain in their present quiet state until we are more fully acquainted with the probable, if not certain, result of the harvest, not only in this country, but in France and in the United States. In many, if not in most respects, the position of the country commercially must be looked upon as satisfactory, for although there is a want of animation there is no actual depression, and although prices exhibit in many cases an important decline as compared with last year, yet quotations have not fallen to a point at which there is not a good profit in respect to all legitimate and unspeculative transactions. Advices from Bombay state that notwithstanding the late heavy fall in prices the position of the cotton trade is

zed for FRASER

to the bondholders in this country, is, in a certain sense, unsuccessfulit seems likely that such countries as Italy, or Spain have a somewhat remote chance of obtaining even a moiety of the sums they require. The Italian loan will probably be brought forward in the course of a few weeks, but there is every prospect that much litigation will ensue before the Italian Government will venture on its introduction. Spain, from the lengthened want of good faith on the part of its government with respect to the holders of Passive stock, will not probably appear as a borrower in our market, and if she did appear, would scarcely be able to obtain a single subscription. Foreign loans, therefore, are not likely to disturb our money market to any extent. Tradc, even if an immediate revival took place, would not cause an immediate demand for accommodation, and hence, as bullion continues to flow towards England, and to accumulate in the Bank, there is the almost certain prospect in the immediate future of a fall in the Bank minimum to 2 per cent. Annexed are the present rates for money, so far as the best paper is concerned-

Bank Minimum	er Cent. @2⅓	4 months' bank bills	Per Cent
30 to 60 days' bills	21/021	6 months' bank bills	93/08
3 months' bills	24@2%		

Very few changes of importance have taken place in the rates on the Continent during the present week. Generally speaking, the demand has continued quiet, with a downward movement in the quotations. The supply of bullion in the Bank of France shows a further increase; the amount held being £34,536,770. The rates for money at the leading continental cities are subjoined—

-B'k rate- 1866, 1867.	Op. m'kt- 1866. 1867.	-B'k	rateOp. m'kt 1867. 1866. 1867.

week, but they are rather less favorable to this country.

In the bullion market there is a better feeling apparent, and an increased amount of business has been transacted both as regards gold and silver. The export demand, however, is very limited, but, nevertheless, more active than it was last week. The week's imports of gold have been about £300,000, and further large arrivals are anticipated. The quotations for bullion are now as under :

Quicksilver, £6 17s. per bottle; discount 3 per cent.

Monday last was a holiday in the Stock Exchange; but on Tuesday, owing to the brilliant weather, the announcement of large shipments of gold from New York, and the decline in the price of wheat the consol market was very buoyant, and a rise of rather more than one per cent. took place in the quotations. Since then the market has been subjected to numerous fluctuations; nevertheless, the tone has continued satisfactory, and although on numerous heavy sales for the realization of profits prices have given way, the actual advance established since Saturday last is about one half per cent. It is thought that there is

of Consols to $94\frac{1}{4}$. The tendency to higher prices has continued. Consols closing at $94\frac{1}{5}$, U. S. 6's at $73\frac{1}{4}$, Illinois Central shares at 80, Erie shares at 42, and Atlantic and Great Western at $25\frac{1}{5}$. The closing course has been as follows:

CENTRAL PACIFIC RAILBOAD.—The following statement of the progress and condition of this road is made by Messrs. Fisk & Hatch, who are agents for the sale of its bonds:

The western half of the Great National Pacific Railroad is being constructed by the Central Pacific Railroad Company of California, beginning at Sacramento, on the navigable waters of that coast, and extending eastward through the richest portion of California, Nevada and Utah to Salt Lake City. It receives all the franchises, subsidies and privileges granted by the acts of Congress to the Eastern portions, and enjoys in addition some important and exclusive local advantages peculiar to the western end of the route, and which lend value to its securities.

(1.) The road lies wholly within territories yielding the precious metals, where gold and silver remain the currency. Its revenues are collected in coin and its business rests on a specie basis.

(2.) It has already a local business sufficient to make it one of the best paying roads in the world, and which is rapidly increasing. The net earnings are now three quarters of the total and three times its annual interest amount.

(3.) Besides the lucrative local business it will receive the whole volume of through traffic undivided. Parallel competition is almost impossible.

(4.) The hardest construction work of the Central Pacific occurred at the start, and has been nearly overcome in the first 150 miles. By September next the entire work across the Sierra Nevada range will be finished, and the road in operation to a point from whence the construction to Salt Lake will be easy.

(5.) The state, city and county corporations of California have aided the company by grants worth \$3,000,000 in gold, independently of the issue of U.S. bonds, amounting on 726 miles east of Sacramento to an average of \$35,000 per mile, or upwards of \$25,000,000 in all, besides a total of 10,000,000 acres of public lands.

(6) The laws of California specially recognise, authorize and enforce contracts to pay in gold. The agreement to pay principal and interest of the first mortgage bonds in gold coin is therefere valid and binding.

These bonds are specially made a first lien upon the road, property equipments, &c., furnished by the whole capital stock, government aid and donations. As the amount of their issue is limited to the same amount as the government subsidy the cost and value of the property pledged for redemption is about three times their utmost issue. They are now offered at 94 per cent. with accrued interest from January 1, in currency, the c mpany reserving the right to advarce the price whenever it is their interest to do so. As they bear six per cent interest in gold, payable in New York, they present some of the most attractive inducements of safety, stability and profit which are offered to investors At the present price of gold they pay over 8½ per cent. upon the invest ment.

These bonds are for sale by banks and bankers generally.

FRIDAY, June 28, 1867, P. M.

THE MONEY MARKET .- The market has exhibited unexpected ease throughout the week. The bank statement showed a large gain in legal tenders, with a moderate reduction in loans; so that the banks commenced the week in a comparatively strong position. The expectation that the banks of the interior would withdraw their deposits from the banks of this city, in preparation for their quart. erly statements to be made on Monday next, have not been realised. On the contrary there has been a steady flow of currency from the interior, and the banks, instead of boing depleted of greenbacks, as on former like occasions, have steadily augmented their stock of legal tenders. This has been the chief course of the growing ease of money during the week.

general light supply among dealers, there has been no disposition to press sales. The foreign dealers have been moderate buyers of Sixty-twos and cld Sixty fives, for shipment. At the moment, Sixes of 1881 are the only bonds that show any special firmness.

Seven thirties of the June and July series advanced to $106\frac{1}{4}@\frac{3}{5}$, on the demand for conversion purposes. At this point, however, the Government suspended purchases. apparently with a view of putting down the price; but quotations have, notwithstanding, been maintained.

It is understood that about the beginning of next week the Government will be prepared to issue Five-twenty bonds dated July 1, 1867, in conversion of the outstanding balance of August Seventhirties. There is about eighty millions of the notes outstanding, and although the bonds are dated six weeks ahead of the maturity of the notes, it is not doubted «that the whole amount will be promptly funded. The bonds will be offered in even exchange for the notes.

The following are the closing prices of leading securities, compared with preceding weeks :

U. S. 5-20's, 1862 coupons. $109\frac{5}{6}$ $109\frac{5}{6}$ $109\frac{5}{6}$ U. S. 5-20's, 1864 105\frac{5}{6} $105\frac{3}{6}$ $105\frac{5}{6}$ $105\frac{5}{6}$ U. RAILROAD AND MISCELLANEOUS STOCKS .--- The stock market has shown an unexpected activity. There have been large buyers of the leading stocks, and prices on some of the roads have advanced 5@6 per cent., with very large sales. About two weeks ago there was a very general anticipation that the preparation of the banks for their quarterly statements would involve a partial stringency in money at the close of the month; and upon the strength of this expectation stocks were sold "short" quite freely. The disappointment of the expectations respecting the course of money has caused an active demand for stocks to cover the "short" contracts, and hence the advance in prices. At the same time there has been a certain amount of buying in expectation of a brisk upward movement next month. There appears to be a slight accession of outside operators; and judging from present indications, next month may witness a freer participation in stock movements by the public than has been experienced at any time this year. The greatest activity has been in Erie, Michigan Southern and Northwestern preferred.

Express stocks have shown unusual activity in connection with movements growing out of the competition between the old express companies and the Merchants" Union. The latter company has made an additional call upon its stockholders, and the price closes at 191@20 for stock on which \$30 has been paid up.

The business at the two stock boards for the current week amounted to 625,660, against the previous week's business 264,661 shares. The principal stocks sold were-Thicago and Northwestern, common 74,580 and preferred 51 975; Chicago, Rock Island and Pacific 50,042; Cleveland and Pittsburg 45,974; Erie 109,260; Hudson River 5,725; Michigan Southern 78,150; New York Central 32,260; Pittsburg, Fort Wayne and Chicago 12,431; Reading 21,266. The miscellaneous stocks sold amounting to-Coal, 3,436; Mining, 10,400; Improvement, 9,430; Telegraph, 15,702; Steamship, 22,868, and Express 25,791, in the week's aggregate 87,627 shares,

The supply of money on call is very abundant, and loans are made at 5@6 per cent. on stocks, and 4@5 per cent. on Governments.

Discounts move more freely, and at easier rates than last week. The banks are holding back somewhat until after Monday; but prime paper finds ready buyers at $6\frac{1}{2}$ @7 per cent.

The following are the quotations for loans of various classes :

•	Per cent.		Pe	r cent.

Previous week... 967,300 1,116,100 707,000 696,500 916,700 412,000 4,815,600 THE GOLD MARKET.—Gold has shown considerable firmness throughout the week, the price having ranged at $137\frac{1}{2}$ @138 $\frac{1}{2}$. The market has been largely oversold in anticipation of the payment of the July coupons, amounting to about \$19,000,000. At the same time, the prospect of the extra session of Congress has raised apprehensions which have tended to put up the premium. There has been some difficulty in borrowing gold, and $\frac{1}{2}$ per cent. per day has been paid in some cases. There is a very general anticipation that, after the payment of the July coupons, there will be a slight reaction in the premium. There is less disposition among the foreign bankers to ship gold, as they can now lend it at high rates of interest. The current exports are confined chiefly to bullion. The shipments to-morrow are likely to aggregate about \$800,000.

The fluctuations in the gold market during the week closing with Friday are shown in the following table :

		Open-		High-		Clos-	Tone of
			owest,		ange	. ing.	Market.

FOREIGN EXCHANGE.—The market has been dull and rates rather weak, until this afternoon, when there was a slight stiffening of quotations. The best bankers' sterling 60 days bills have sold as low as $109\frac{7}{3}$. To-day the range is $109\frac{3}{3}$ @110¹/₃, the lower rate being chiefly for bills drawn against shipments of bonds, of which, there is a fair supply on the market.

The following are the closing quotations for the several classes of foreign bills, compared with those of the three last weeks:

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, June 28.

Trade has been rather better this week—in fact, may be pronounced brisk for the season. Prices have taken an upward turn for many leading staples, and no material decline can be noted in any important item.

Cotton is rather firmer and moderately active. Breadstuffs have advanced, but with a downward tendency. Tobacco has been active. Groceries have been somewhat irregular—low grades of coffee having declined, and sugar having advanced, with large sales.

Pork has slightly advanced, new mess closing with free sales at \$21.15 cash. Lard is lower and selling freely. Bacon shows a good degree of activity. The movement in Pork and all other hog products is liberal, both for export and home use; but stocks of all kinds, except Bacon and current supplies, are unexpectedly large. By some it is argued that the liberal supplies indicate a short supply of hogs for the next packing season, while others contend that the increase of hogs at the South will more than make good the deficiency arising from the free marketing of hogs which is now going on. Beef of all kinds is very scarce. Butter is more steady, supplies having fallen off. Cheese is arriving freely, and at lower prices is going forward to Great Britain; the Liverpool and other steamers have taken about 25,000 boxes the past week.

Hides have been active and advancing; Montevideo s elling at 21c., and Buenos Ayres 22c., gold, for average weights. Leather is doing better. Goat and Deer Skins are dull.

In Naval Stores we notice some activity for spirits Turpentine, closing firm at 61c., but other Naval Stores are dull, and Common Rosin declined to \$3 25; only the extra grades being in demand at \$7 50@\$8 50 per bbl.

Metals have been firmer for iron, copper and tin, in which the sales have been large, part for future delivery. East India goods of all kinds are dull and gold prices weak. Fish have a downward tendency for dry cod and mackerel. Hops are quiet and nominal.

Petroleum has been decidedly better. Crude has advanced $\frac{1}{2}$ c. and refined 1c. per gallon. Receipts have fallen off, and stocks have been reduced, and the close is quite buoyant. Oils have been dull and drooping. Tallow has been active. High wines have been very active at 35c.@40c., in bond, the lower price from wharf—the higher figure in up-town and Brooklyn stores. The government is making renewed efforts to stop the sale of the contraband article.

Wool continues in fair demand and firm.

ed for FRASER

Freights have been fairly active. The shipments of provisions, tobacco and petroleum to Great Britain and the Continent, with latterly more cotton and grain, the latter mostly to Great Britain.

Receipts of Domestic Produce for the Week, and since January 1.

Exports of Leading Articles from New York.

The following table, compiled from Custom House returns, shows the exports of leading articles of commerce from the port of New York since January 1, 1867. The export of each article to the several ports for the past week can be obtained by deducting the amount in the last number of the CHRONICLE from that here given:

COTTON.

FRIDAY, P. M., June 28, 1867.

- The receipts this week of cotton at all the ports show a small decrease, compared with the figures of last week, the total reaching 10,023 bales (against 10,952 bales last week, 17,845 bales the previous week, and 14,416 bales three weeks since), making the aggregate receipts since Sept. 1, this year, 1,804,002 bales, against 1,951,121 bales for the same period in 1865-6. The details of the week's receipts are as follows:

Savannah 1,828 Texas 1,765 Tennessee, Kentucky, &c 1,941	Nev Mol Cha Sav	w Orleansbales bile arleston	2,395 549 748 1,828 1,765	Floridabales North Carolinabales Virginia Total receipts for week	3
--	--------------------------	------------------------------------	---------------------------------------	--	---

The aggregate receipts at all the ports for the corresponding week of 1866 was 17,121 bales. We have this week in the aggregate exports from all the ports a decided decrease, although even now the shipments are in excess of the movement last year. The total this week reaches 14,556 bales, against 24,409 bales last week and 32,360 bales the previous week. Below we give the particulars of the week's shipments from all the ports:

Receipts and Exports of Cotton (bales) since Sept. 1, and Stocks at Dates Mentioned.

The market this week opened very dull and prices exhibited a strong downward tendency. The lower quotations and dull accounts from Liverpool and from the spinning districts discouraged buyers, and they persistently held off until Thursday, when the the reports of severe damage to the growing crop by the prolonged rain gave an impulse to the demand, and prices at the close have recovered about one cent from the lowest point. The increased movement is not speculative alone, but also arises from a renewed demand by shippers and spinners, Fifteen hundred bales were taken for Liverpool today. The improved tone is somewhat increased by an easier money market, and the reduced stocks at all points-390,000 bales of American at Liverpool and only 250,000 bales at all the American shipping ports-imparts renewed confidence to holders and stimulates a speculative demand. Sales for the week are 10,500 bales, of which about 6,000 bales were today and yesterday. The following are the closing quotations : N. Orleans

-Exported this week to-

For the week corresponding with this in 1866 we reported the total shipments at 10,000 bales, and for the previous week of the same year they were 11,251 bales. The total foreign exports from the United States since Sept. 1 now amount to 1,419,418 bales, against 1,458,280 bales for the same period last year, and the present stocks are 258,960 bales, against 344,802 bales at the same time in 1866. Below we give our usual table of the movement of Cotton at all the ports since Sept. 1, showing at a glance the total receipts, exports, stocks, &c.:

* In this table, as well as in our general table of receipts, &c., we deduct from the receipts at each port for the week all received at such port from other Southern ports. For instance, each week there is a certain amount shipped from Florida to Savannah, which in estimating the total receipts must be deducted as the same shipment appears in the Florida return. We are thus particed in the statement of this fact, as some of our readers fail to understand it.

ASER,

* The receipts given for these ports are only the shipments from Tennessee Kentucky, &c., not otherwise enumerated. + These are the receipts at all the ports of Florida to June 21, except Apalachicols, which are only to June 14. # Estimated. The stock at New York is also estimated.

THE CHRONICLE.

THE GROWING CROP.-Since our last the cotton plant, at least throughout portions of Georgia, North and South Carolina and Virginia, has suffered from the recent severe and long continued storm. The previous fine weather had enabled the planters in those sections to get out of the grass (the fruits of the late cold, wet spring,) and the promises for a good yield were very fair indeed. How far these promises have been blighted by the storm cannot be known at present. The latest advices, however, indicate a return of good weather, but report great damage to have been done. The later accounts from Louisiana and Texas are also encouraging, and may be summed up in the following from the New Orleans Price Current of the 22d instant: "The weather has been warm and showery, too much so for the cotton crop, which has already suffered from excessive moisture. Previous to the late wet spell the accounts were more encouraging." From Arkansas we also hear great complaints of the rains, floods, and cold. Alabama and portions of Mississippi, however, send us very encouraging advices. Our reports from those States are to June 22d.

NEW ORLEANS, June 22 .- The mail returns for the week ending June 21, show a small increase in the receipts, the total for the week being 2,395 bales, against 2.038 bales last week, and 3,358 bales the previous week. The shipments for the last week were 6,466 bales, of which 3,182 bales were to Havre, 1,011 to Malaga, 864 to Boston, 345 to Philadelphia, and 1,064 to New York. Stock on hand June 21, was 76,751 bales. The receipts, sales and exports for a series of weeks, and the stock, price of middling, rates of freight to Liverpool and New York, and price of gold at the close of each week since April 5, were as follows:

EUROPEAN AND INDIAN COTTON MARKETS .- In reference to these markets our correspondent in London writing under the date of June 15 states : *

LIVERPOOL, June 15.—The prices current for cotton to day, do not exhibit any material change as compared with Saturday last. In the earlier part of the week, owing to the holidays the demand was quiet, and but little business was transacted, while prices were rather drooping; but during the last few days there has been a steady demand for most descriptions, and the quotations have ruled firm. The only change to notice in values is in East India produce, which is rather lower in price. The total sales of the week amount to 60,960 bales, of which 3,750 bales are on speculation, 14,936 bales for export, and 42,280 bales to the trade. Annexed are the prices current of American cotton now and at this date last year :

TOBACCO.

FRIDAY, P. M., June 28, 1867.

We have to report this week the largest exports of Tobacco of any week during the last twelve months, the total of hhds.

* For latest news respecting the Liverpool cotton market see Telegraph des patches at the close of our London letter in a previous part of this paper.-[Ed. COMMERCIAL & FINANCIAL CHRONICLE.

reaching 5,880 hhds., over two thousand of which were sent to Bremen-1,001 hhds. hhds. having been shipped to that port from New York and 1,080 hhds. from Baltimore. Our trade in tobacco with Germany is assuming very large proportions. Since the first of November last 26,284 hhds., 22,439 cases, 5,791 bales and 8 tierces of leaf; also, 2,946 hhds. and 739 bales of stems, besides considerable manufactured tobacco have been exported from the United States to the two German ports of Bremen and Hamburg. During the same period we have also sent to Belgium and Holland over 16,000 hhds. The following table gives the particulars of the week's shipments from all the ports:

The ports.					Ster	ns		Man'f,

The market this week has been fairly active for Kentucky and Seed Leaf, but prices have been less buoyant, rather favoring buyers.

The sales of Kentucky Leaf continue large, embracing about 1.000 hhds. for the past week, and the sales for June thus far foot up 5,300 hhds. But the receipts are also large and the stock shows some increase, and the prices, though not quotably lower, are scarcely so firm. The demand continues to be mostly for export, within the range of 5@14c. for lugs to good heavy leaf.

* The exports in this table to European ports are made up from mani-fests, verified and corrected by an inspection of the cargo.

The direction of the exports for the week, from the other ports, have been as follows:

From Baltimore—To Bremen 1,080 hhds....To Amsterdam 895 hhds....To Demerara 299 lbs. manf'd....To Rio Janeiro 15 hhds.
From Boston—To Honolulu 11 cases....To Melbourne 561 bozes....To Suriram 10 hhds, and 1 box...To St. Pierre Miquelon 5 cases and 22 boxes. To Hayti 75 bales...To British Provinces 14 boxes.
From Philadelphia—To Havana 2,413 manf'd lbs.
From San Francisco—To Honolulu 97 boxes.
From New Orleans—To Havre 4 hhds....To Vigo 385 hhds.

VIRGINIA .- At Richmond the market was active and buoyant, with

VIRGINIA.—At richmond the market was active and oddyant, with large breaks. Receipts have become light, with the probability of con-tinuing so during the harvest. The sales for the week foot up 1,237 hhds., 128 tcs. and 121 bxs., at the following prices: Manufacturing Tobacco.—Lugs, common to medium, dark working, \$3 50@\$7; good, dark working, \$5@8; sun cured, common, \$8@10; sun cured, good, \$10@15; coal cured, common, \$8@10; coal cured, bright, \$18@18. cosl cured fancy \$20@45. Leaf-common dark working \$12@18; coal cured, fancy, \$20@45. Leaf—common, dark working, \$6@9; medium, dark working, \$10@12; good, dark working, \$11@14; fine and wrapping, \$15@20; sun cured, \$15@25@30; yellow wrap-pers, common, \$20@35; yellow wrappers, medium to extra, \$35@100 @200.

Shipping Tobacco.-Lugs, very common and heavy weights, \$3@

Seed Leaf is also less buoyant, and the business not so large as last week. Still the demand is good and prices about steady. The sales include :

Ohio-90 cases, private terms; 123 do., 94c.; 80 do., 74@ 16c.; 80 do., old, private terms; 100 do., new, private terms; 40 do., private terms. Total, 513 cases Ohio.

Connecticut-40 cases, 20c.; 180 do., new, private terms; 108 do., new, private terms. Total, 328 cases Connecticut.

Foreign Tobacco is quiet. There is none in first hands. We have only to notice the sale of 50 bales Yara from second hands, for consumption, at about 90c.

Manufactured Tobaccos remain quiet.

QUOTATIONS IN CURRENCY.

Stemming Tobacco.-Leaf, common, \$10@13; good, \$12@15; fine \$16@20@22

At Petersburgh, notwithstanding the breaks have been very large the past week, the market has ruled active for all desirable kinds of tobacco with some improvement in prices of all kinds, though common nondescript and dirty tobacco is still comparatively neglected. We note the sales of shipping tobacco at \$15 to \$21 for fair to prime, and some sun cured leaf, bright and clean, at \$40. We quote poor to common lugs at \$25@5; fair to good, \$6@9; middling, \$10@12;; fair to good, \$13@20; sun cured fancy, \$15@40; coal cured wrappers, \$15@ 100. It will be seen that the receipts have fallen off about 100 hhds. as compared with last week, and it is clear to our minds that the crop will be in market very early. Receipts this week, 253 hhds.; last week, 397 hhds.; total since October 1, 5,138 hhds.

KENTUCKY,-At Louisville the market has continued buoyant with large sales. The sales for the week were about 1,500 hhds. We quote: Common lugs, \$2 50@3; fair to good \$3 50@5; common leaf, \$5@7; medium, \$8@10; fair to good, \$11@16; good to fine, \$16@20; fancy cutting, \$25@40; fancy wrapping, \$20@50 per 100 lbs.

NEW OBLEANS .- The market has been very active and closed with the demand still good. The sales of the week were 845 hhds., mostly, within range of 7@13c., but prices cover the entire range of 41c.@22c. Receipts for the week 256 hhds. Exports for the week—To Vigo, 885 to Boston 10, To New York 5, to Havre 4. Total, 404 hhds. Stock on hand, 5,166 hhds.

MARYLAND.—At Baltimore inspections are again lighter of both Maryland and Ohio, and are likely to fall off still more during the harvesting season. Ohio leaf has been most active the past week—sales in the aggregate reaching nearly 2,400 hhds.—and were taken for France, Duisburg and Bremen at prices without quotable change. Maryland has been in fair demand, principally for Bremen and Holland; common grades are less sought for, but the receipts of the better descriptions have mostly been taken at full former prices. Of Kentucky we notice sales of 125 hhds. new crop Southern; prices not transpired. Inspections this week 1,266 hhds. Maryland, 863 hhds. Ohio—total, 2,129 hhds. Cleared same time, 895 hhds. to Amsterdam, 1,080 do. to Bremen, and 15 hhds. to Brazil; also, to day, 1,106 hhds. to Rotterdam; in all 3,096 hhds.

BREADSTUFFS.

FRIDAY, June 28, 1867, P. M.

The market has been firmer for flour and wheat, but dull and drooping for corn and oats, closing somewhat irregular and unsettled.

The slight reaction in flour which had set in at the date of our last, continued, and the trade taking confidence came in and bought freely. There was also some speculation in good lines of extra State, and on Tuesday there had been an advance of 50 cents to \$1 per bbl., the market closing quiet; but on Wednesday reports of severe damage to the wheat about ready to harvest in the middle States caused some excitement, and a further material advance took place. At the close the market is somewhat irregular, the advance not being fully supported, except for favorite brands of fresh ground. The damage done the wheat has evidently been exaggerated; but stocks at all points are light, and the new wheat comes forward slowly; so that some time must elapse before we can have any surplus for export, such as the prices of last week were calculated to invite.

Wheat has advanced rather more in proportion than flour, as it had declined more. The advance has been in part speculative, but millers have bought freely. There has been a large advance at the West, owing to the falling off in the receipts, and very light stocks at the principal markets. The receipts at the West are detailed below. The stocks are not on an average more than one-fourth as large as in June 1866. This market closed dull and heavy. Corn has been dull, and supplies have been interrupted by the break, and buyers have held off. At the close the corn from the break is at hand, and buyers came forward freely, giving a slight upward turn to prices of strictly prime, which are scarce; while old brought \$1.12 $\frac{1}{2}$, and prime new \$1.11, but fair steamer corn was bought at \$1.07@\$1.08.

Oats have declined, with rather more doing; considerable quantities are arriving from Virginia. Rye has advanced 10c. from the lowest point, closing quiet. Barley and barley malt are scarce and firm. Peas are merely nominal; the receipts have been cleared off the market.

The following are closing quotations:

LIVERPOOL, 14th June.—The weather continues favorable, and the corn trade dull. There has been only a limited demand for wheat, at a decline of 2d. to 3d. per cental, closing with less pressure to sell. Flour, very slow, and the supply of French is increasing. Indian corn declined to 35s. for new, but has suddenly rallied about 3s. per quarter, closing at 38s. to 39s. for new and old mixed and yellow. Peas offered at 38s. on spot, and 37s. to arrive. Barley, good demand. Oats unchanged.

GROCERIES.

FRIDAY NIGHT, June 28.

The Grocery trade has shown considerable improvement in tone and business during the week. The call for speculative purposes is increasing and prices have advanced for sugar and coffee. The market is much more active than was generally expected at this season, both with first and second hands, and there are indications of a still further increased activity and of higher prices.

TEA.

TEA has been more sought after, and a fair amount of business in Greens and Japan teas has been done. Prices show no change, and holders are quite firm in their views. The sales for the week from first hands are 2,500 half chests Oolongs, 3,310 do Greens, 1,040 do Japans, and 400 do Souchongs.

The imports of the week have been small, including only the cargo of the "Aurora Australis" from Shanghae with 39,365 lbs. Twankay, 1.533 lbs. Hyson Skin, 118,072 lbs. Hyson, 333,487 lbs. Young Hyson, 57,982 lbs. Imperial, and 62,385 lbs. Gunpowder—making a total of 618,824 lbs.

The following table shows the shipments of Tea from China and Japan to the United States from June 1, 1866, to April 15, 1867, and importations at New York and Boston since Jap. 1.

The movement in breadstuffs at this market has been as follows:

Mail dates from Hong Kong are to April 29th. The China Overland Trade Report states: "The tea season may now be considered fairly closed, and little is as yet known as to the prospect of the crop, although advices lead to the belief that the market will open at Foochow at more favorable rates than prevailed last year. Smaller quantities of money and opium are being sent up country than usual, and this will no doubt have an effect towards keeping down the market, which it is to be hoped that buyers will not neutralize by over competition.

COFFEE.

COFFFE was rather quiet for Rio early in the week, and prices were reduced 1@1 cent. Later, however, a better demand exists, and to-day the market has materially improved, and holders feel warranted in

advancing prices $\frac{1}{2}$ ent. The sales from first hands are 4,795 bags Rio.

Imports since our last have been very insignificant, including only a cargo of 4,000 bags Rio per " Iser," and 983 bags of sundries.

The imports since January 1, and stock in first hands June 25, are follows

SUGAR has continued active, with the exception of Wednesday's busi ness, and prices have been advanced $\frac{1}{4}$ @ $\frac{1}{2}$ cent since our last report. Advices from Havana to June 22 report a more active market and higher prices. The demand is principally from the trade, although there is some speculative feeling shown. The sales for the week are 8,050 hhds. Cuba and Porto Rico and 990 boxes Havana, the market closing firm.

The imports have been comparatively small at all the ports for the week, excepting Baltimore, where they were rather above an average as follows

HAVANA, June 22 .- The market has continued active during the week at an advance of $\frac{1}{2}$ rl. for qualities below No. 12. Sales have amounted to about 18,000 boxes. The deficit in the present year's crop is variously estimated from 15 to 40 per cent, it is probably nearer the former figures than the latter. No. 12 is quoted $8\frac{1}{3}$ rs.

The following will show the receipts, exports and stocks at Havana and Matanzas:

THE DRY GOODS TRADE.

p ht. box . 271 2 28

do

FRIDAY, P. M., June 28, 1867.

The indications of improvement noticed in the dry goods market during the past two weeks are still more apparent today. The increased business which the abundant crops suggest is followed by a speculative feeling on the part of holders and dealers, and with the light production at this time there are some indications of operations for an advance in prices. The market in Boston is already influenced by this prospect, and here there is much more animation than was generally expected during the dull season. Prices of prime brands of all kinds of domestic goods are firmly held. Lower grades and odd lots are being closed out at almost nominal rates. The country is believed to be almost entirely bare of goods of all kinds, and this belief is strengthened by the continual receipt of orders for small lots to keep up assortments. Woollen goods are improving in demand and the market has a more healthful tone. The production is somewhat increasing, looking to Fall and Winter business. Foreign goods are without animation or particular feature of interest. The Manchester market is quiet, and goods can now be had at very short notice. Importers are therefore more cautious, and a steadier market must result. The exports for the week are again quite The following are the details :---

BOSTON AND WORCESTER RAILROAD.—The stockholders of the Boston and Worcester Railroad have decided in favor of a consolidation with the Western Railroad of Massachusetts, by a vote of 8,235 to 559.

PORTLAND AND KENNEBEC RAILROAD DIVIDEND.—The Portland and Kennebec Railroad has declared a dividend of 3 per cent., payable August 1. The road has been in operation nearly twenty years, and this is the first dividend declared by it.

UNION PACIFIC RAILROAD.—An Omaha despatch via St. Louis June 27, says that General Dodge, Chief Engineer of the Union Pacific Railroad; General Rawlings, Chief of General Grant's staff; Captain Dunnadie, General Myers, Chief Quartermaster of the Department of the Platte; Mr. Blickens, J. L. Williams, J. F. Carter, Government directors; and Colonel Seymour, Consulting Engineer of the Union Pacific Road; General Simpson, Genera 1 Frank P. Blair, Major White, Government Commissioners; Mr. Rogers, of New York; Mr. Coleman, of Cincinnati; Mr. Corwith, of Galena; Mr. Evans, of Dubuque; and Mr. Van Leunis, State Geologist, of Fowa, left that city yesterday for the West.

A portion of these go to accept the last completed section of the Union Pacific Railroad, and General Dodge, General Rawlins and Mr. Blickens to fix a point at the base of the mountains where the triple subsidy (\$84,000 per mile) commences. General Augur will join a party at Crow Creek, near the base of the mountains.

Wells, Fargo & Co. send regularly every other day three coaches from Julesburg to Denver, 182 miles. These, as is necessary, have military protection to insure their freedom from hostile Indian attacks.

BUFFALO AND ERIE RAILROAD.—The consolidation of the Buffalo and State Line and the Erie and Northeast Railroads was completed on the 25th inst. by the action of the stockholders of the former company, agreeing to the terms by a vote of thirty-five thousand nine hundred and thirty-six shares, out of a total of ihirty-nine thousand six hundred and thirty-seven. The new company is to be known as the Buffalo and Erie Railroad Company.

A MISSOURI RAILROAD TAKEN BY GOVERNOR FLETCHER.—The St. Louis *Democrat* has a despatch dated yesterday, which says:

"Governor Fletcher to-day took possession of the Atlantic and Pacific Railroad, formerly known as the southwest branch of the Missouri Pacific road, which was purchased from the State by General Fremont and associates, the purchasers having neglected to pay the first annual instalment, due June 15, and otherwise failed to perform their contract. The road has been placed in charge of General Clinton B. Fisk, of St. Louis. The Governor's action meets the hearty approval of the people of Southwest Missouri, and the citizens of Rolla held a mass meeting to-night, at which Governor \$> letcher spoke."

COMPARATIVE MONTHLY EARNINGS OF PRINCIPAL RAILROADS.
