RECOMMEND TO INVESTORS THE

FIRST MORTGAGE BONDS OF THE

THE CENTRAL

Pacific Railroad Co.,

This Company is constructing, under the patronage of the UNITED STATES GOVERNMENT

THE WESTERN END OF THE

GREAT NATIONAL RAILWAY
ACROSS THE CONTINENT.

Their line will extend from Sacramento, California, across the Sierra Nevadas to the California State line, traversing the RICHEST AND MOST POPULOUS SECTION OF CALIFORNIA, and thence through the GREAT MINING REGIONS OF THE TERRITORIES, to the vicinity of Salt Lake City.

It forms the sole Western link of the only route to the Pacific which is adopted by Congress and aided by the issue of United States Bonds.

Their road is already completed, equipped, and running for 94 miles from Sacramento to within 12 miles of the summit of the Sierras, and a large amount of the work of Grading, Tunnelling, &c., beyond that point has been accomplished.

The First Mortgage Bonds of this Company afford unusual inducements of Safety and Profit to Investors, for the following among other reasons, viz:

FIRST.—The rate of Interest is Six per Cent. in Gold, payable semi-annually in the City of New York.

SECOND.—The Principal is payable in Gold at maturity.

THIRD.—The cost of the Bonds, Ninety-five Per Cent. and accrued interest, is Ten Per Cent. less than that of the cheapest Six Per Cent. Gold Bearing Bonds of the Government.

FOURTH.—The United States Government provides nearly half the amount necessary to build the entire road, and looks mainly to a small percentage on the future traffic for re-payment.

FIFTH.—Owing to this liberal provision, accompanied with Extensive Grants of Public Lands, by which the Government fosters this great national enterprise, its success is rendered certain, and its financial stability is altogether independent of the contingencies which attend ordinary Railroad enterprises.

SIXTH.—The Security of its First Mortgage Bonds is therefore ample, and their character for safety and reliability is equalled only by that of the obligations of the Government itself.

SEVENTH.—The net earnings of the completed portion are already largely in excess of the interest obligations which the Company will incur on twice the distance, and are steadily increasing, rendering the uninterrupted payment of the Interest absolutely certain.

EIGHTH.—At the present rate of Gold they pay nearly 8½ Per Cent. per annum, on the amount invested.

The Bonds are issued in denominations of \$1,000 with semi-annual Gold Coupons attached, payable in New York, and are offered for the present at 95 per cent. and accrued interest (in currency) from January 1st.

Orders may be forwarded to us direct, or through the principal Banks and Bankers in all parts of the country.

Remittances may be made in drafts on New York, or in Legal Tender Notes, National Bank Notes or other funds current in this city, and the bonds will be forwarded to any address by express, free of charge. Inquiries for further particulars, by mail or otherwise, will receive punctual attention.

Fisk & Hatch,

BANKERS AND DEALERS IN
GOVERNMENT SECURITIES

NO. 5 NASSAU STREET, N.Y.

N.B.—All kinds of Government Securities received at the full market price in exchange for the above Bonds. Also,

All descriptions of Government Securities kept constantly on hand, and Bought Sold or Exchanged.

Gold Coin and U. S. Coupons bought, sold, and collected.

Deposits received on Liberal Terms, subject to check at sight.

Collections made throughout the country.

Miscellaneous Stocks and Bonds bought and sold at the Stock Exchange on commission for cash.

Special attention given to the Exchange of SEVENTY-THREE NOTES of all the series for the new FIVE Y BONDS of 1865, on the most favorable terms.

THE
UNION PACIFIC RAILROAD
COMPANY,

THEIR FIRST MORTGAGE BONDS
AS AN INVESTMENT.

The rapid progress of the Union Pacific Railroad, now building west from Omaha, Nebraska, and forming, with its western connections, an unbroken line across the Continent, attracts attention to the value of the First Mortgage Bonds which the Company now offer to the public. The first question asked by prudent investors is, "Are these bonds secure?" Next, "Are they a profitable investment?" To reply in brief:

1st.—The early completion of the whole great line to the Pacific is as certain as any future business event can be. The Government grant of over twenty million acres of land and fifty million dollars in its own bonds practically guarantees it. One-fourth of the work is already done, and the track continues to be laid at the rate of two miles a day.

2d.—The Union Pacific Railroad bonds are issued upon what promises to be one of the most profitable lines of railroad in the country. For many years it must be the only line connecting the Atlantic and Pacific; and, being without competition, it can maintain remunerative rates.

3d.—425 miles of this road are finished and fully equipped with depots, locomotives, cars, &c., and two trains are daily running each way. The materials for the remaining 92 miles to the eastern base of the Rocky Mountains are on hand, and it is under contract to be done in September.

4th.—The net earnings of the sections already finished are SEVERAL TIMES GREATER than the gold interest upon the First Mortgage Bonds upon such sections, and if not another mile of the road were built, the part already completed would not only pay interest and expenses, but be profitable to the Company.

5th.—The Union Pacific Railroad bonds can be issued only as the road progresses, and therefore can never be in the market unless they represent a BONA FIDE property.

6th.—Their amount is strictly limited by law to a sum equal to what is granted by the U.S. Government and for which it takes a SECOND lien as its security. This amount upon the first 517 miles west from Omaha is only \$16,000 per mile.

7th.—The fact that the U.S. Government considers a second lien upon the road a good investment, and that some of the shrewdest railroad builders of the country have already paid in five million dollars upon the stock (which is to them a third lien), may well inspire confidence in a first lien.

8th.—Although it is not claimed that there can be any better securities than Governments, there are parties who consider a first mortgage upon such a property as this the very best security in the world, and who sell their Governments to re-invest in these bonds—thus securing a greater interest.

9th.—As the Union Pacific Railroad bonds are offered for the present at 90 cents on the dollar and accrued interest, they are the cheapest security in the market, being more than 15 per cent. less than U.S. Stocks.

10th.—At the current rate of premium on gold, they pay

Over Nine Per Cent. Interest.

The daily subscriptions are already large, and they will continue to be received in New York by the

THE TRADESMEN'S BANK DEFALCATION.

It has often been observed that a financial panic is usually preceded by a series of defalcations and embezzlements, which have secretly and gradually undermined public confidence, until at length, when the mine has thus been loaded and the train laid, a larger or smaller local explosion brings on the general catastrophe prostrating the whole fabric of monetary confidence, and spreading consternation, bankruptcy and ruin throughout the community. Something of this apprehensive vague uneasiness has pervaded Wall street for several months past. And the recent disclosures of wrong-doing in the Tradesmen's National Bank, of this city, have had an influence in reviving the feeling. Eighty or ninety thousand dollars, of course, are not in the aggregate so large a loss as to embarrass a sound banking institution having one million of dollars of capital and a clear half million of reported and unreported surplus. Nor is it that the people doubt the solvency of the Tradesmen's Bank. What seems to be doubted is the stability of the system in which frauds such as these are of possible occurrence, and can go

on unsuspected for years under the eye of officers so vigilant experienced and able as those of the institution in question are believed to be. Not only is this general charge of instability brought against our financial machinery, a second point is that within the banks themselves there is a reform needed in the internal management of the safeguards against speculation; which, however sufficient to protect their stockholders and the public heretofore, are now continually showing themselves too weak and inadequate to cope with the difficulties and dangers of the present. A third complaint, which is frequently heard, is that the personal reputation of clerks and subordinate bank officers is less impaired than formerly in the public estimation, when habits of profuse expenditure are indulged which are notoriously beyond the means of men living on moderate fixed salaries and possessing no additional income from honest, honorable sources. The time has been when such speculative proclivities or extravagance in personal or domestic expenditure as may now be indulged without question by younger or more experienced clerks in confidential positions would have called forth inquiry and remark from their superiors, and if not satisfactorily explained, might have even brought on the offenders the penalty of summary dismissal.

Those three points imperatively claim, and indeed they are well worthy of, the scrutiny of all those persons among us to whose keeping is in any way entrusted the stability, the credit, and the public reputation of our banks and fiduciary corporations. Far be it from us, however, to single out and cast any reproach upon the officers and directors of the Tradesmen's Bank. Enough has not yet been published of the circumstances of the fraud to enable a disinterested judge to pronounce with exact accuracy how far these men ought to be held answerable at the bar of public opinion for what has been done by their tellers. Though human sagacity and forethought exhaust all their preventive ingenuity, we are assured on high authority that "it must needs be that offences come." We must also admit that the offence in this particular instance has come from a most unexpected quarter. Like a thunderbolt from a clear sky, this sudden stroke fell without warning, and must have astounded and stupefied all the friends and connections of the parties implicated. A month ago had the officials of our city banks been convened together, there would have been seen among them two elderly men, in high esteem for integrity, ability and experience, and enjoying the distinguished reputation of having served one of our oldest banking institutions for some thirty years. If it had been announced in the assembly which we have imagined, that a forgery, an embezzlement had been discovered, you would have suspected any body sooner than these quiet, grave, sedate, trusty and apparently trustworthy tellers. And had any one proclaimed

to each of the two associates as did the prophet to the criminal monarch, "Thou art the man," the attesting witness would have found no one to believe him. And yet, what are the facts? Both these long-trusted men have fallen. They have robbed the bank. The proofs of extraordinary and aggravated guilt are overwhelming, and are confirmed by the testimony of the criminals' own lips. One has defrauded the bank of \$65,000, and the other of \$35,000.

It will answer no useful purpose to detail in this place the sad story told about the shifts and contrivances by which these men, grave and self-possessed as they seemed outwardly, but racked inwardly by night and day with a thousand terrors contrived to lull suspicion, and to hide from the avenging Nemesis. It is of more practical need for us to say that there is little doubt, but if a forced holiday had been periodically given to these two men, and if trusted experts had been put in their places to do their work once a fortnight or once a month, the chief part of the machinery which was effective for years to conceal their embezzlement would have been destroyed or thrown out of gear. It may safely be recommended to our bank directors to suspect the confidential clerk who never takes a holiday.

As the case is before the courts we reserve all further remarks until the unpublished facts shall be more fully known. We will only add that the robbery with which Baker and Arnold are charged is not only a wrong to the bank, which the refunding of the sums embezzled would cancel and atone. It reaches far deeper in guilt. It is a crime of the greatest magnitude against the public weal, and as an incendiary who starts a general conflagration is visited by the law with heavy pains and penalties, so should the defaulter, the bank peculator, the dishonest clerk be punished, for he is an incendiary in another sense, and his act may, for aught he knows, come to light at a critical moment, give a shock to public confidence, and start a financial conflagration involving multitudes in one common ruin.

THE CRY FOR MORE CURRENCY.

There are two opposite errors of inflation and excessive contraction into which those financial theorists are apt to fall who do not keep distinctly in view the great fundamental laws in monetary science, relative to the amount of currency required by any country where commerce and industry are free and active. Of these laws, one of the most important lies at the foundation of what is called the theory of contraction. It may be expressed as follows: "the value, or purchasing power, of paper money varies inversely with its volume." If you increase the volume of paper dollars afloat you reduce the value of the paper dollar, and conversely if you want to augment the value of the paper dollar, the only way of doing so is to lessen the aggregate in circulation. In other words, a depreciated paper currency like ours can be raised to par with gold by no method we can possibly adopt, so long as we do not bring into play the principle of contraction. An eminent authority on practical banking questions gives another view of this subject. "The only possible means," he says, "by which specie payments can be reached, is by retracing the steps by which specie was abandoned as the standard. As prices were advanced by the manufacture of hundreds of millions of paper tokens called by law money, swelling thereby the volume of the currency, and decreasing its value as compared with fixed property, so prices can only be restored to natural values by recalling the paper tokens issued under the pressure of the rebellion. As the legal tender paper is cancelled, market values will recede, and by no other process can this desirable result be attained. Upon this financial authorities agree, and the only point of

difference is as to the time when this withdrawal of legal tenders can be made most safely." Redundancy of the currency then brings depreciation and depreciation brings high prices. Consequently, to depress high prices we must correct the evil which has caused them; namely, redundancy of paper money. And the obvious way to do this is to call in and cancel the over-issues.

The second great law to which reference was made is that "the money market," as it is called, that is, the movements of capital between lender and borrower, is "disturbed with every disturbance of the volume of the currency." If you augment the currency you stimulate the movement of capital and "money becomes easy." If you diminish the currency afloat you arrest or check the movements of capital between the lender and the borrower, and "money becomes stringent." In this reciprocal interaction between the volume of the floating paper money and movements of capital in the loan market, we find an explanation of the great activity of business of all kinds during the extravagant inflation of our currency in 1863 and 1864, and of the depression and gloom which we sometimes suffered by the slight contraction which has been effected since the war. Those acquainted with the commercial history of England during the second and third decades of this century will call to mind frequent illustrations of this principle. For almost invariably the alternate depression or activity of business responded to the enlargement or diminution of the bank issues as certainly, and as regularly as any cause is followed by its co-relative effect in the domain of physical science.

From all this it follows that if we could at pleasure contract the currency sufficiently, we might resume specie payments immediately, and that the chief if not the only reason why we cannot immediately call in and withdraw one hundred millions or more of our currency so as to make the outstanding greenback dollar worth par in coin, is that before we had gone far, before we had withdrawn more than a few millions, the money market would be thrown into confusion, the movements of capital between lender and borrower would be paralyzed, business would be at a dead-lock, and the policy would have to be reversed amidst the execrations and the upbraidings of the whole nation. To adopt such a policy, and to attempt to carry it out, if such an attempt could in this country be carried to such lengths as we have supposed, would inflict mischief on our trade compared with which those resulting hitherto from our paper money inflation are comparatively small and innocuous.

A third law relative to the currency, to which, at present, we need only refer briefly, is that "Contraction of the currency must be slowly, and gradually, and skilfully done, or it cannot be done at all." Under a despotism, indeed, where the decree of the master is everything and the groans of the people are nothing, such a policy might be carried to great extremes, but the failure of Russia some years ago to reform her currency is a memorable example that even by an absolute sovereign financial laws are too strong to be resisted, and will claim their rightful homage, however they may be ignored.

There is, however, another law about the currency which we must not omit, as it has been very much abused and misapplied. It tells us that the value of paper money varies with the demand and the supply." Thus a depreciated paper money may appreciate if the demand is increased, even if the supply should remain stationary. We well remember how, after the battle of Gettysburg, and after several other decisive events in the war, the price of gold went down, and kept down for a considerable period. The reason was not found in the smaller volume of the currency, but in the

larger field for the use of that currency. In this law we find an explanation of the fact that gold is not now selling at 200, although the volume of our currency is twice as large as before the war. More currency is wanted now. The field for the use of currency is larger. The wealth, the commerce, the activity of the country, require more currency to fulfil the functions for which money is used. From this law the deduction has been made that the best way to specie payments—although it be the longest way—is to grow up to them. The advocates of this view maintain that we should not contract the currency, but should keep its volume stationary at about its present level, not suffering it to be increased at all, and waiting till in ten, or fifteen, or twenty years, the growth of the country, and perhaps the depreciation of gold through the immense productiveness of the mines, should gradually diminish the margin of depreciation, and gradually bring up our currency to equality with gold, or else bring down gold to equality with our currency. We do not propose to offer at present any remarks on this theory. We only place beside it, by way of contrast, a statement which we were sorry to see in a speech, by Mr. Pendleton, a few days ago, "the condition of the country," he says, "could bear an increase in the currency. The ravages of war at the South—the destruction of capital there—the loss of houses, horses, cattle, agricultural implements—the scarcity of provisions—the enfranchisement of the negro—the importance of settling the whole population to labor at once—create a demand for more currency. Every interest there would be advanced by the stimulating effects of an enlarged currency."

In regard to the two errors to which we referred at the outset, we conclude that on the one hand the contraction of the currency, however necessary, must not be pressed too far or hastened too rashly lest we introduce fatal disturbance into the money market, and on the other hand we must not allow the clamor for more currency to prevent our seeing that more paper money means more inflation, more depreciation of the currency, a larger premium on gold, higher prices for all the necessities of life, and a departure to a still greater distance from the standard of coin.

THE EFFECT OF GRAIN RECEIPTS ON RAILROAD EARNINGS.

The receipts of grain at the leading markets of the West are beginning to show the result of the abundant harvest of which we have been receiving accumulating evidence during the past few months. Previous to the middle of July the total arrivals had touched a very low figure, for the week ending June 30th reaching only 127,000 bushels, and the week ending July 6 only 100,000 bushels, indicating the almost total exhaustion of the old stock. Since then, week by week, notwithstanding the exhaustion of the old crop, we find the arrivals steadily and rapidly increasing, which is certainly a very favorable indication. In fact, these weekly statements always furnish the most satisfactory evidence we have as to the extent and condition of the years yield. Individual opinions, as gathered through the press while the crop is growing or being harvested, are of course valuable, but when the result is seen in the arrivals at the lake ports facts are substituted for opinions. Of course there are numerous influences affecting the question of early receipts, besides the mere circumstance of a large or small crop. This year, for instance, the present high prices would naturally lead the farmer to hurry his grain to market; and yet, on the other hand, when we remember the extremely small amount of old wheat we now possess, the large decline in prices during the past few weeks, and the less favorable accounts of the crop we are at present receiving from abroad, we should expect the farmer to hold back his grain for

another rise, unless he became convinced by the evidence of his own eyes that the harvest was really very abundant. If, therefore, we needed any further proof of this abundance, we think it may be found in the figures below, showing the comparative receipts of flour and grain at Chicago, Milwaukee, Detroit and Toledo for the weeks ending August 3d, 10th and 17th, this year, and in 1866:

Week ending	Wheat, bus.	Flour, bbls.	Rye, bush.	Oats, bush.

Toledo.....	166,858	2,095	12,992	6,341
Total.....	280,334	139,364	36,079	34,893

From these figures it appears how largely the arrivals this year of wheat, flour and rye are in excess of the receipts in 1866, the total increase of wheat for the three weeks amounting to 989,155 bushels, or nearly double the receipts for the same time last year. Of course, thus far the grain is chiefly winter wheat, and this fact will account for the large proportion at Toledo and the insignificant arrivals at Milwaukee; at the latter port a decrease being shown, occasioned, no doubt, by the lateness of this year's harvest for Spring wheat.

But our object in referring to this matter at present was more to notice the first evidence of reviving business induced by this abundant harvest, as seen in the weekly traffic returns of the principal railroads of the Northwest. These returns, which for some time past have shown a decrease in earnings, compared with those of 1866, are now again on the increase in every case. In the following table we compare the reported weekly earnings (gross and per mile) of the leading railroads in 1866 and 1867:

The prospect that these roads will do a large freight business this autumn, much above that of last year, would seem to be almost certain. The harvest is but just ended, and the increase of grain shipments, though proportionately large, are nothing compared to what they will be as the season advances; the largest receipts of wheat at Chicago for one week have been 355,911 bushels, while last year, an unusually bad season, they reached in a single week in October upwards of 900,000 bushels. As the earnings have thus increased at the very opening of the season, so that instead of a uniform

balance against the present year, the roads are able to show a balance in its favor, we may fairly conclude that the heavier traffic of the autumn months will enable them to show a very decided increase in their earnings over the same months of 1866.

Thus the first benefit of an abundant harvest is seen in increased railroad returns, and it is safe to anticipate that these

favorable influences will gradually extend themselves through all branches of trade. Many are disappointed because a more rapid improvement in the business of the country has not been developed. This could not be expected; the improvement must be slow; for not until consumers can obtain cheaper breadstuffs can they have any great surplus to spend on other than the necessities of life.

THE NATIONAL BANKS—THEIR CONDITION FIRST MONDAY OF JULY, 1867.

We have received from Mr. Hurlburt, the Comptroller of the Currency, the following statements of the National Banks of the several States for the quarter ending the first Monday of July, 1867. Our readers will find the returns for the previous quarter in the last volume of the CHRONICLE (Vol. iii.) page 554.

DEBT AND FINANCES OF BUFFALO.

The Comptroller of Buffalo, under date of July 1st, 1867, has issued his report on the financial affairs of that city for the year ending December 31, 1866, embracing the whole field of its valuation, taxation and indebtedness, and the receipts and disbursements on all accounts. The report also contains a comprehensive exhibit of the progress of the city, as relates to its finances, for the ten years ending as above. From this very valuable document we have compiled the following summary.

The debt liabilities of the city are ranged under the two heads of funded debt and temporary loans, which together amount to \$905,334.

The following are the details of the *Funded Debt* as it existed at the close of the year 1866:

Buffalo, including Squaw and Cranberry islands, covers an area of 23,874.64 acres.

The distribution of the area is thus—taxable lots, 20,856.74 acres; streets, 2,043.64; creeks, canals, slips and basins, 483.73; school lots, 28.54; engine-houses and police-stations, 1.27; market grounds, 10.90; church lots, 18.09; cemeteries, 257.32; public grounds, 31.29; hospital and asylum lots, 43.80; pest-house lots (on Squaw and Cranberry Islands), 8.75; Erie County property, 60.31; New York State property, 2.77; United States property, 38.89 acres.

The public improvements of the city consist of—paved streets, 54.17 miles; plank side-walks, 217.24; stone side-walks, 63.11, and sewers, 57.76 miles. Total length of streets, 297.57 miles. The Assessors' valuation of property belonging to the city in 1866 was \$697,060, viz., engine lots and houses, \$63,360; central school property, \$39,400; squares and parks, \$329,250; markets and market grounds, \$177,000; public burying grounds, \$16,000; police-stations, \$13,000; court house and jail, (5-8ths of 90,000) \$56,250; pest-house and grounds \$2,800. These values are not assessable for taxation. The total valuation of school property (general and local) is \$321,970.

The population of the city by the United States census was, in 1810, 1,508; in 1820, 2,095; in 1830, 8,668, in 1840, 18,213; in 1850, 42,261; in 1860, 81,129. The Erie Canal was opened in 1825, and the Albany and Buffalo line of railroads in 1842. The population by the State census of 1855 was 74,214; of 1860, 81,129, and of 1865, 94,502. The increase from 1860 to 1865 was 16.49 per cent., or a fraction more than 3 per cent. per annum compounded. At the same rate the population in 1866 would be 96,872.

The valuation of real and personal property for taxation in each of the past ten years has been as follows:

Year.	Real.	Personal.	Total.	Year.	Real.	Personal.	Total.
1857.	\$29,446,280	\$6,065,670	\$35,511,950	1862.	\$24,677,175	\$6,944,180	\$31,621,355
1858.	27,743,945	5,485,080	33,229,025	1863.	25,110,815	6,528,045	31,738,860
1859.	24,997,300	4,748,080	29,745,380	1864.	25,491,900	6,517,510	32,009,410
1860.	24,358,905	5,893,470	30,252,373	1865.	25,868,210	7,730,030	33,598,240
1861.	24,232,955	6,472,175	30,705,130	1866.	26,438,325	8,519,375	34,957,700

It will be seen that the total valuation in 1857 was larger than in the year 1866. This may be attributed to the fact that the general revulsion of business during the former year occasioned severe losses to the business community, and the valuation of property gradually fell for several succeeding years, until it had reached its minimum in 1860 and 1861. After that time it has as gradually increased to its present valuation. It may be remarked, also, that the valuation placed on personal property is not commensurate with that of real estate, which may be accounted for by the general investment of surplus capital in national securities, which are not liable to taxation.

The accounts of the city are kept so as to show the receipts and expenditures based on general tax and other city income separately from the receipts and expenditures dependent on local assessments. The latter are chiefly for street, district school and other improvements. The receipts and expenditures of the general fund, according to the comptroller's statement, for each of the last ten fiscal years:

Year.	Receipts.	Expenditures.	Year.	Receipts.	Expenditures.
1857.....	\$460,450 64	\$345,834 47	1862.....	\$327,181 88	\$284,196 19
1858.....	438,340 42	364,904 18	1863.....	363,694 20	334,504 83
1859.....	299,437 46	304,783 83	1864.....	440,537 47	403,857 33
1860.....	309,733 40	302,443 18	1865.....	647,451 38	501,218 86
1861.....	278,848 14	283,644 49	1866.....	531,008 67	485,444 16

The general fund is raised by a tax levied annually upon the whole valuation; the income from markets, fees, and interest upon taxes, licenses, fines and penalties are also credited to this fund, which furnishes the means to defray the ordinary expenses of the city government. Of the receipts in 1866, \$460,262 03 was from taxes, \$32,219 75 from school fund, and the remainder (\$38,526 89) from miscellaneous sources. The tax receipts would indicate a rate of \$1 $\frac{1}{2}$ on the \$100 valuation. The principal objects of expenditures in the same years were: schools, \$151,909 66; police, \$56,772 77; fire department, \$45,841 03; public debt interest, \$36,542 13, and principal, \$8,000; lamps, \$32,405 96; water, \$20,004 25; streets, \$13,856 22; public health, \$11,930 11; harbor, \$13,802 10; &c., &c. A table in the report specifies the expenditures of each department for ten years.

The financial condition of the city, as shown on the general balance sheet of December, 1866, was as follows:

LIABILITIES.		RESOURCES.	
Bonded or funded debt...	\$612,000 00	Taxes not collectable....	18,436 42—
General treasury warrants	245,000 00	Res'ces (Local fund).....	20,211 28
Gen'l fund liabilities..	\$857,000 00	Worthless....	4,504 08—
School prop'ty bonds.....	\$13,311 50	Tax certificates unredeemed	236,418 08
Local treasury warrants ...	171,906 98—	Interest.....	84,337 27—
Tax loan bonds.....	280,022 72	Property owned by city..	697,060 00
Total liabilities.....	\$1,322,241 20	School houses, lots, &c..	321,970 00
Surplus resources.....	146,246 68	Total resources.....	\$1,468,487 88
Res'ces (Gen'l fund).....	\$131,431 75		

The following compares the population, valuation, income and expenditures, debt, and the total liabilities and resources of the city in 1860 and 1866:

	Absolute		Per capita.	
	1860.	1866.	1860.	1866.
Population.....	81,129	96,872		
Valuation.....	\$30,262,373	\$34,957,700	\$373 01	\$360 89
Income.....	309,783	531,008	3 32	5 43
Expenditures.....	302,443	485,444	3 73	5 01
General debt.....	537,000	612,000	6 62	6 32
School and tax bonds.....	197,605	293,334	2 43	3 03
Total bonded debt.....	734,605	905,334	9 05	9 35
Total liabilities.....	1,011,079	1,322,628	12 46	13 65
Total resources.....	1,250,686	1,468,487	15 41	15 46

From this it appears that the valuation is lower in 1866 than in 1860 by \$12.12 per capita. In the meanwhile the expenditures have increased from \$3 23 to \$5 01, or 34.32 per cent. The funded debt is but a fraction higher. Considering the increased cost of labor and commodities, this result exhibits a rare instance of municipal economy.

[From our own Correspondent.]

LONDON, Saturday, August 10, 1867.

The weather of the present week has been of a variable, and, therefore, of an unsatisfactory character. Harvest work has not only been delayed, but the crops have failed to mature, and, in several quarters, considerable damage has been done. At one period it was feared that

the harvest was about to turn out most unfavorably, and that the continuance of wet and changeable weather would destroy all the prospects which have for so long a period been so encouraging. At present it is difficult to know which view to take of the matter; the weather is, in fact, so changeable that the encouraging influence of to-day's sun is suddenly altered by the clouds and storm of to-morrow. On Monday last the weather was as fine as could have been desired; in the early districts the reapers were in the fields, and a considerable quantity of wheat was cut; but on Tuesday there was a heavy fall of rain, and all harvest work was in consequence entirely suspended. On Wednesday the weather, though not so unfavorable, was very changeable, and heavy showers of rain fell throughout the country; but since that period the aspect has been more satisfactory, and there is now every appearance that it will so continue. Although the wheat has manifestly suffered to some extent, the benefit which at the same time has been derived from these rains must not be under-estimated. Your readers, for instance, are well aware that meat has been at a very high price for several years past. With the immense consumption now going on it cannot be expected that the value of butchers' meat will decline to any important extent, but yet there is no doubt that the supply will be increased in consequence of the present excellent facilities afforded for fattening cattle, and for sending them in a thoroughly fit condition to market—the late rains having been productive of immense benefit to the pastures. The grass lands throughout the country are rich with verdure and are as green as in the height of Spring, while turnips and the root crops have increased to a very large extent since the period when rain first commenced to fall after the late dry weather. But to bring the subject more to the question of wheat and a supply of bread, it may be observed that the crop of potatoes is almost doubled—a circumstance that, in this country, operates very powerfully on the wheat trade.

But if we assume that the crop of wheat in this country will be below an average, what is likely to be the course of the market between the present time and the close of the year? There are some who persist in believing that the value of wheat in this country must continue to rule high, but I may state that these are few in number. Most persons, indeed, connected with the corn trade, are of opinion that in the event of the crop of wheat being under an average, but not greatly deficient, the quotations, in the face of our large prospective importations, must give way. To those who have not watched carefully the course of the foreign markets, this assertion has been a matter of surprise; but if we look into the future, and endeavor to ascertain what supplies of wheat we are likely to receive, it is certain that no other conclusion can be arrived at.

In respect to the United States I shall say but little. I may state, however, that on this side we are led to believe that we shall once more be in the receipt of large supplies from your side, and that the trade in breadstuffs, which has been so long in abeyance, will shortly be resumed on an extensive scale. Through a private source I was informed yesterday that a leading American house had made very large purchases of wheat at Chicago; that the produce had been drawn against; that the exchange had been corrected, and that the outflow of bullion from New York was likely to be checked. Beyond this I shall state no more, because by the time this letter reaches you, the result of the harvest throughout the Union will, I should think, have been accurately ascertained, and from the remarks which follow, your readers will be able to form an opinion of their own as to the future price of wheat in this country.

You will remember that in one of my letters, written about six weeks since, I mentioned that the crop in the South of Russia had suffered considerably from a protracted drought of ten week's duration; but as that was by no means an unusual circumstance, and as the farmers in the interior were forwarding large supplies of produce to the Odessa market, it might prove that the injury reported to have been done had been greatly overstated. No doubt, had the dry weather continued, the crop would have been lost; but genial rains opportunely set in, and the plant not only recovered, but the crop has turned out as satisfactorily as it did last year. You will bear in mind that the South of Russia during the last twelve months, has furnished us with the greater proportion of our foreign supplies of wheat, and it therefore follows that a successful crop in that region is likely to have, and will have, an important bearing upon the course of prices here. In Austria the crop is very abundant, and the result of the harvest in Hungary is equally satisfactory. In Galicia the crop has suffered from floods and heavy storms; but, with that exception, the wheat crop in these districts has proved abundant, and we shall consequently receive large supplies from Hungary and Austria, via the Danube and Trieste. In Prussia, the result, so far, does not appear to be unfavorable. On the banks of the Vistula, viz., in Polish Prussia, heavy rains and floods have pre-

vailed; but these are always made the most of, both in that country and abroad. As to France, the favorable harvest which was anticipated has proved rather unsatisfactory; nevertheless it is a better crop than last year; and if France needed but little foreign wheat then, it is manifest that she is capable of depending entirely upon her own resources during the next twelve months, with the crop which she has now secured. In Spain, Portugal and Algeria the crops of wheat have been partial failures; but these countries will not require any considerable supplies. The most unsatisfactory accounts appear to be from Algeria, in which country the crop has almost entirely failed. From the foregoing remarks it may be observed that, excluding the United States, our prospect as regards a foreign wheat supply, is equal to last year. In reference to our crop I am of opinion that if we should have fine weather for harvesting it, the result will be satisfactory, giving us at least an average yield. Assuming, therefore, that we receive no supplies from your side, there is no cause at present for a rise in prices so long as the weather remains fine. But, as I have already mentioned, we anticipate a large supply of wheat and flour from the United States, and it is in accordance with the extent of our imports of American produce that prices will decline on this side. As you are the best judges of the magnitude of your own crop, I leave the question of the fall that is likely to take place with you.

Our imports of wheat this year have been very large, and considerably in excess of 1866 and the two preceding years. The following statement shows the extent of our imports in July, and during the seven months ending July 31:

Trade remains extremely quiet. As regards cotton, Brazilian and Egyptian produce continue to be pressed for sale, and hence a further decline has taken place in prices. On the other hand American produce is somewhat firmer, and a fair amount of business having been transacted, the quotations are, in some instances, rather higher than on Saturday last. The total sales of the week at Liverpool amount to 65,790 bales, of which speculators have taken 1,810 bales, exporters 20,870 bales, and the trade 43,610 bales. At Manchester business continues very quiet; indeed the trade of the city presents quite a depressed appearance, and prices have a drooping tendency. Wool and woollen goods are decidedly quiet, the changeable state of the weather during the last few weeks having checked any improvement in this quarter. The public sales of colonial wool will be commenced on Thursday next, and during their progress about 120,000 bales will be brought forward. All other branches of trade remain extremely quiet.

In the money market the only feature of importance is the complete failure of the new Russian loan. Some weeks since the Russian Government appeared in our market for a loan of £3,000,000, and at Berlin, almost at the same period, for a similar sum, the proceeds of the loan being, it was stated, for the completion or construction of railways. The new loan for £12,000,000 lately introduced at Paris, Amsterdam and in this market has met with but little attention, and so far as we ourselves are concerned, scarcely a subscription has been sent in. Foreign securities in the Stock Exchange have been very flat, the demands for fresh loans on the part of Russia, and the delay which still prevails respecting the settlement of the Spanish Passive debt having caused an uneasy feeling to exist in reference to many foreign securities. Money is still very abundant; the demand for accommodation is very limited, and hence the rates of discount remain extremely easy. Bullion in the Banks of England and France continues to accumulate, and at present they hold the unprecedented heavy supply of £59,350,000. Annexed are the present rates for accommodation:

On the continent the value of money has not materially changed since my last. The principal markets are well supplied, and the condition of business is about the same as it has been. The progress of the harvest is necessarily absorbing considerable supplies of coin to pay laborers; but in other respects there seems to be no new feature. The quotations at the leading cities at this date and at this period last year, are subjoined:

	B'k rate		Op. m'kt			B'k rate		Op. m'kt

Amst'rd'm ..	7	2½	7	2-2½	St. Pet'g ..	5½	7	8½	8½

There has been no material alteration in the rates of foreign exchange.

The result of the last sale of India Council Bills showed that the demand for remittance to the East had slightly increased. The bullion movements of the week, so far as exports are concerned, have been unimportant; but the imports of gold have been considerable, and chiefly from the United States. We believe, however, that as your exports of wheat and other cereals will shortly be on a considerable scale, our imports of specie from your side will entirely cease. American eagles are also much quieter; but the principal change in bullion is a decline of ½d. in the value of Mexican dollars, the supply here being considerable, while there is scarcely any demand for shipment to Hong Kong. The prices of bullion are now as under:

Owing to the large mass of money lying idle, from the want of means to employ it in trade, combined with the more settled weather towards the close of the week, the consol market has assumed a firmer appearance, and the upward movement in prices has been rather rapid. The banks have large unemployed balances, and some of the leading institutions have effected large purchases of stock. There seems to be no doubt that the consol market will continue very firm, and that we shall yet see the quotations at a very high point. Railways have commanded more attention, and prices have improved. The following statement shows the prices of consols on each day of the week:

Week ending Aug 10	Monday	Tuesday	Wed'y.	Thur.	Friday	Sat.
Consols for money	94½-94¾	94½-94¾	94-94½	94½-94¾	94½-94¾	94½-94¾

Taken as a whole, the market for American Securities has ruled firm. United States 5-20 bonds have been dealt in to a fair extent, and prices have improved. In Erie Railway shares the fluctuations have been considerable; and Illinois Central are rather weaker. Atlantic and Great Western Railway securities have commanded but little attention. United States 5-20 bonds close at 73½ to 73¾; Atlantic and Great Western Railway Debentures 26 to 28, do Consolidated Mortgage bonds 22 to 23; Erie Railway shares 44½ to 45½, and Illinois Central 77½ to 77¾. The highest and lowest prices of the principal American Securities on each day of the week are subjoined:

London Money Market.—Trade is reported to be improving, and the money market firmer, producing a natural reaction against stocks. Consols close heavy and lower. U. S. bonds, however, which fell off ½ point are recovered, and close as at the commencement. Railroad stocks close lower.

Liverpool Breadstuffs Market.—Breadstuffs have lost strength, and

prices of corn and oats are much lower. This is natural on the incoming of the new crop, and with prospects of an average harvest at home and abundance from abroad. Wheat and flour have been without change, also barley. Peas are 6d. lower.

The quotations given for corn the first three days of the week is believed to be incorrect. It agrees with the report sent to the Associated Press, but private telegrams put the quotation much lower.

FRIDAY, Aug. 23, 1867, P. M.

THE MONEY MARKET.—The Banks statement of last Monday revealed the fact that the money market had begun to feel the disturbing effect of the Western crop movement. The legal tender ilne showed a loss of 6½ millions and the deposits a decrease of about 5½ millions, while the amount of loans and discounts was almost stationary. So large were the surplus balances of the banks that this large withdrawal of funds has had little effect upon the market, beyond causing less to be done at the minimum rate of 3 per cent., the bulk of transactions having been on the basis of 4@5 per cent. During the present week there have been further withdrawals of currency to the West, though probably not to the extent of last week's shipments, and at the close there is a perceptible reduction of the amount of money offered by the banks; so that, judging from the elements at present at work, it cannot be deemed improbable that the banks may early make an effort to advance the rate on call loans about 1 per cent.

The banks show less disposition to discount paper at 6@6½ per cent. apparently from an impression that they will be able soon to get the full legal rate. The consequent preference for demand loans has a tendency to keep down the rate upon those operations.

An expectation prevails in some quarters that the Treasury will come to the relief of the market by buying a few millions of Seven-thirties, this supposition being based upon the fact that the balance in the Sub-Treasury runs unusually high, rather than upon any official intimations to that effect. Perhaps it may not be deemed improbable that the Secretary will become a buyer of the Seven-thirties of June or July, or both; for his balances will well enable him to do so, while it is to be presumed that he is desirous of losing no opportunity for carrying forward his funding operations; but whether he will deem it prudent to buy the notes at the present high price, and whether he would not, at the same time, be a seller of Five-twenties to a corresponding amount, are matters open to question.

It must also be taken into account that the balance in the Sub-Treasury is swelled by about \$7,000,000 of Compound Notes, lately redeemed, and by about \$2,500,000 of Clearing House certificates recently paid off; both of which items will be early marked off, reducing the balance nearly ten millions. Really, therefore, the coin and currency balance of the Sub-Treasury is only \$121,000,000; and not \$131,000,000, as appears from the statement of yesterday.

Since the 15th inst about \$7,000,000 of August Compound Notes have been redeemed at the Sub-Treasury, and about \$6,000,000 at Boston. A considerable amount must also have been retired at other Sub-Treasuries and at Washington. As a considerable proportion of these liquidations have been made in bank currency there must have been a reduction in the legal tender reserves large enough to make itself felt by the banks.

The following are the quotations for loans of various classes:

	Per cent.		Per cent.
Call loans	4 @ 5	Good endorsed bills, 3 & 4 months	7½ @ 8
Loans on bonds & mort.	6 @ 7	do single names	9 @ 10
Prime endorsed bills, 2 months	6 @ 7	Lower grades	11 @ 15

UNITED STATES SECURITIES.—The market for Governments has been unsettled and irregular, partially in consequence of the expectation of diminished ease in money, and partially from the arrival of an unusually large amount of securities from the country. There has been considerable speculative movement; some having sold "short," in expectation of lower prices, while others being large holders have used every means for sustaining the market. At each successive decline, the foreign bankers have come into the market as buyers partially sustaining the market; but the predominant tendency has been toward lower prices. To-day the market has been excited by a vague impression that the Treasury will shortly resume the purchase of Seven-thirties. The "shorts," in consequence, have freely covered their contracts, and the result has been an advance in prices of ¼@½ per cent. upon yesterday's figures. Holders are very sensitive as to the tendencies of the money market, and indications favor the supposition that, in the event of money becoming closer, quotations would fall heavily.

The following are the closing prices of leading securities, compared with preceding weeks :

RAILROAD AND MISCELLANEOUS STOCKS.—The stock market has shown rather more activity, but has been devoid of speculative spirit, in the absence of outside operators. At the beginning of the week there was an apparent desire among the larger holders of stocks to realise, the unfavorable aspect of the banks' statement having somewhat shaken their confidence in the permanent ease of the money market. Prices fell off 1@2½ per cent. under the realising movement, but the decline subsequently brought in buyers, causing a partial recovery, so that at the close prices do not vary materially from those of last Friday. The market, however, lacks confidence, and would be likely to yield materially in the event of any adverse turn in the loan market.

THE GOLD MARKET.—The course of the gold premium has been comparatively steady. The speculation based upon rumors of over-issues of national obligations proved of short duration, and on the operators realizing upon their gold, the price fell back to about its former figures. The "short" interest appears to have been to a large extent settled, and the rate of interest on gold loans has been easier, having ranged from "flat" to 1 64 per cent. per day. The demand for customs duties has been quite active, but it has been fully met by the sales of coin by the Treasury. The export movement is now confined to small shipments of bullion. As the period approaches for the export of the new crops of breadstuffs and cotton there is less disposition among the foreign houses to keep large balances in coin. The expectation of the payment of over four millions of coin interest on Ten-forty bonds on Sept. 1st has a tendency to make the market easier.

The fluctuations in the gold market during the week closing with Friday are shown in the following table :

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, August 23.

Trade in nearly all of the leading staples, has been quite brisk during the past week at full or improving prices. The requirements of the retail trade begin to be generally felt in our wholesale markets, and as the demand for consumption improves, there is a disposition among most holders to slightly advance prices.

Breadstuffs and Cotton have been quiet and drooping, pending the marketing of the new crops. Groceries have been very active and rather firmer. Tobacco was active and closed buoyant.

In Provisions there have been some change, generally towards better prices. Mess Pork closed firm at \$23 50 on a speculative demand based on the anticipation that there will be a short hog crop during the next packing season. Lard has advanced on English orders to 14c. for prime, closing quiet. Bacon and Cut Meats are in good demand. Beef continues very quiet. Butter has been less buoyant. Cheese has sold largely for export.

Foreign Dry Hides have latterly been more active, and a shade firmer. The latest transactions include 10,000 Montevideo to arrive at 20½ cents gold. Leather and Skins are also doing better.

Naval Stores have been firm, with a good demand for Spirits Turpentine and fine Rosins. The latest transaction of moment was 800 barrels Spirits Turpentine for export at 50½ cents in bond. Oils have been quiet. Tallow advanced with gold, with a moderate business.

Petroleum has been rather quiet without essential change, the demand for future delivery has nearly ceased. Whiskey has again become active; about 2,000 barrels was sold to-day at 37 to 40 cents in bond, closing firm at the higher figure.

Fish have been more steady but quiet. Hops continue nominal. The accounts from the yards of this State are more favorable. Metals have been rather quiet but very firm.

Wool has latterly shown increased activity at slightly better prices. The sales include large lines of Western at 43@56c. for No. 1 and extra fleece, and 30@31c. for unwashed.

Freights have been dull. The shipments of Breadstuffs to Great Britain have been trifling, and the business has principally been in Provisions Naval Stores and Tobacco, with some Petroleum at the close.

Receipts of Domestic Produce for the Week, and since January 1.

The receipts of domestic produce for the week ending August 23, since Jan. 1, and for the same time in 1866, have been as follows:

COTTON.

FRIDAY, P. M., Aug. 23, 1867.

The receipts of cotton this week show a decrease over last week, the total at all the ports reaching 6,161 bales (against 6,830 bales last week, 5,597 bales the previous week, and 5,993 bales three weeks since), making the aggregate receipts since Sept. 1, this year 1,860,936 bales, against 2,024,794 bales for the same period in 1865-6. The details of the week's receipts are as follows:

The exports show a still further decrease, the total for the week from all the ports having reached only 1,902 bales, against 4,539 bales last week and 8,395 bales the previous week. There were in fact no shipments from any port with the exception of New York, New Orleans and one bale from Boston as may be seen in the following table in which we give the particulars of the shipments from all the ports:

For the corresponding week in 1866 the shipments of cotton from all the ports amounted to 10,354 bales. The total foreign exports from the United States since September 1 are now 1,543,047 bales, against 1,520,304 bales for the same period last year, and the stocks at all the ports reach only 130,405 bales, against 297,006 bales at the same time in 1866. Below we give our usual table of the movement of Cotton at all the ports since Sept. 1, showing at a glance the total receipts, exports, stocks, &c.:

* In this table, as well as in our general table of receipts, &c., we deduct from the receipts at each port for the week all received at such port from other Southern ports. For instance, each week there is a certain amount shipped from Florida to Savannah, which in estimating the total receipts must be deducted as the same shipment appears in the Florida return. We are thus particular in the statement of this fact, as some of our readers fail to understand it.

The market this week has not been very active. Early in the week it was dull and depressed, while the accounts from the new crop were generally favorable. There is now no export demand, our own price being above the Liverpool market, so that the business has been mainly for spinning; and with continued dullness in the goods market, and rather more favorable interpretation of the crop accounts, middling Uplands declined to 28c. But the occurrence of severe rains within the last two or three days, extending over a portion of the cotton growing region, has caused some apprehension, but the growing plant may have been more or less injured on the low lands of the Atlantic States, and holders have been rather firmer, but without stimulating the demand. The sales of the week amount to about 8,500 bales, the market closing firm at the annexed quotations:

THE GROWING CROP.—Another storm of rain all along the Atlantic coast has, during the past week, given rise to additional complaints and fears of damage to the growing crop. This wet weather is particularly unfortunate just at present, as it not only discolors the now rapidly opening bolls, but also serves to increase the danger to the plant from the cotton worm. With the exception of this storm, however, (the actual effects of which it is too early yet to know) our advices this week do not materially differ from those heretofore published by us. We have not room to insert extracts, but the result of the information received is that Georgia and South Carolina (with the exception of Sea Islands) the crop at present promises to be a fair one, and if the surroundings are favorable the remainder of the season, the yield will be in excess of last year. In Alabama and Mississippi the prospects are certainly much better than a year ago. From Alabama especially reports continue very encouraging, though not so universally so as was the case a short time since. We hear of the worm in that State, and also in Georgia and South Carolina, but it has not, up to the present time, done any great amount of injury; in the low lands of Mississippi, however, damage has evidently resulted from this cause. Louisiana and Texas send very doleful reports of the worm from portions of each State. In Texas it is the coast counties in particular that are suffering, while other parts of the State are doing well; but all the low and swampy lands of Louisiana, especially the portions of that State and of Mississippi which lie along the Mississippi Red and Yazoo Rivers are said to be suffering badly. Under these circumstances any estimate of the probable yield of all the States would evidently be premature.

MOBILE, Aug. 17.—By mail we have received one week's later dates from Mobile. The receipts for the week ending Aug. 16 were 444 bales, against 348 bales last week, and the shipments were 1,943 bales, of which 821 bales were to Boston, and 1,122 bales were to New Orleans, leaving the stock on hand and on shipboard not cleared of 4,220 bales. The following are the weekly receipts sales and exports for a series of weeks, and the stock, price of middling, rates of freight to Liverpool and New York, and price of gold at the close of each week:

The more favorable accounts from Liverpool, the bad accounts about the growing crop in the State, and the limited stock on hand have lead factors to advance prices during the last three days of the week, and the transactions were very limited. The market closed with increased buoyancy, ordinary being quoted at (Liverpool classification) 20 1/2 @ 22 1/2, low middling 26, and middling 28. Domestic exchange has exhibited but little variation. Bankers checking on New York 1/2 per cent. premium, mostly the latter. The rate for commercial has been 1/2 @ 3/4 premium for New York sight. Sterling exchange closed 154 for bankers.

CHARLESTON, Aug. 17.—The receipts for the week ending Aug 15 amount to 1,084 bales, against 1,507 bales last week. Shipments for this week amount to 1,158 bales, (against 2,431 bales last week), of which 414 bales were to New York, 88 bales to Philadelphia, and 656 bales to Baltimore. The receipts, sales and exports for a series of weeks, and the stock, price of middling rates of freight to Liverpool and New York, and price of gold at the close of each week since June 7, were as follows:

The market this week has been firm with an advancing tendency. Stock, however, is so limited that the business is much restricted. Middling closed at 26 1/2 @ 27c. Freight to Liverpool by sail are nominal at 1/2d. for square and 1/2d. for round bales; to New York, 1/2 @ 1/2c.; to Baltimore and Philadelphia \$1 50 per bale.

EUROPEAN AND INDIAN COTTON MARKETS.—In reference to these markets our correspondent in London, writes as follows:

LIVERPOOL, Aug. 10.—With the exception of American produce, the value of cotton has further declined during the present week. As regards American cotton a good business has been transacted, and although the market is freely supplied, there is no actual pressure to sell, and the quotations are, in some instances, a shade higher than at the close of last week. On the other hand, Brazilian cotton has declined 1/2d., Egyptian 1/2d., and East India cotton 1/2d. per lb. The total sales of the week are 65,790 bales, of which 1,810 bales are on speculation, 20,370 bales for export, and 43,610 bales to the trade. Annexed are the prices current of American cotton at this date, and at this period last year:

TOBACCO.

FRIDAY, P. M., August 23, 1867.

We have another week of extremely large exports of crude tobacco, the total in fact being in excess of any previous week of the present season, reaching 9,197 hhds., 769 cases, 1,069 bales, against 4,789 hhds., 542 cases, 770 bales last week. Of these shipments for the past week 4,355 hhds. were from New York, 3,991 hhds. from Baltimore, 841 hhds. from New Orleans, and 10 hhds. from Boston; and the directions of these shipments were as follows. 1,816 hhds. to Great Britain, 2,837 hhds. to Havre, 2,477 hhds. to Bremen, 138 hhds. to Hamburg, 576 hhds. to Rotterdam, 1,144 hhds. to Spain, and the balance to different ports. The following table gives the particulars of the exports for the week from all the ports:

The market for Kentucky leaf was rather quiet until yesterday and to day, when speculative orders from the West came on the market, and export orders were more freely executed, prices closing at some advance for the prime heavy sorts. The sales of the week foot up about 1,400 hhds., of which 200 to the city trade, 500 for speculation, and 700 for export; and the sales thus far for August amount to nearly 7,000 hhds. The range of prices paid is mostly from 8 to 16c.

Seed leaf has been as active as the limited offerings would permit. There is complaint of the want of suitable assortment; prices of desirable lots tend upward. The sales embrace 86 cases Ohio at 8c., 240 cases Connecticut, crop of 1865, private terms, 904 cases Ohio, about 17½c., 155 cases Connecticut 22@25c.

There has also been a good business in foreign. We notice sales of 52 bales Havana in bond on private terms, 350 do at 80@92c., free, and 27 bales Yara at \$1.05.

Manufactured tobacco has shared in the activity and buoyancy of the market for crude. The sales and re-sales for the week are estimated at 10,000 bxs., and prices have advanced so that our inside quotations are nominal. New black work ranges from 17@25c., in bond, for export, and bright 22@50c., in bond, for home use.

The receipts of tobacco at New York this week, and since Nov. 1, have been as follows:

From San Francisco—To Victoria, 25 pkgs.

MARYLAND AND OHIO.—At Baltimore, receipts of both Maryland and Ohio were larger than for several previous weeks. The demand for Maryland continues good, bulk of inspections being taken by shippers at full former prices. Of Ohio the enquiry is fair, with sales of 450 hhds. for Germany, at prices without quotable change. In Kentucky leaf we report sales of 75 hhds. heavy on private terms, market closing with an upward tendency. Inspections for the week, 1,283 hhds. Mary.

VIRGINIA.—At Richmond, in the market for the past week we have to report breaks and receipts light. Market firm with no change to note in prices. 928 hogsheads, 110 tierces, and 57 boxes, offered and sold as follows:

Manufacturing Tobacco.—Lugs, common to medium, dark working \$5 00@9; good, dark working, \$8@12; sun cured, common, \$7@12; sun cured, good, \$12@18; coal cured, common, \$7@12; bright, \$12@20. Leaf—common, dark working \$7@9; medium, dark working, \$10@14; good, \$15@17; fine and wrapping, \$18@21; sun cured, \$15@25@32; yellow wrappers, common, \$20@35.

Stemming Tobacco.—Leaf—Common, \$12@14; good, \$15@17; fine, \$18@20@23. Stems—very common to good, \$1@4 50.

At Petersburg there has been less activity in the tobacco market, and prices have slightly declined. The breaks continue heavy and receipts very fair. Sales the past week amount to about three hundred and seventy-five hogsheads. We quote: Lugs, common, \$4 50 to \$6 50, fair \$7 to \$8 50, good shipping \$9 to \$10 50, good working \$8 50 to \$10. Leaf common \$8 50 to \$10, medium \$12 to \$14, good working \$15 to \$18, fine \$17 to \$20, good shipping \$16 to \$18, fine \$18 to \$25. Receipts this week 339 hhds; last week 300 hhds; total since Oct. 1, 7,429 hhds.

KENTUCKY.—At Louisville there has been quite a falling off in the supplies, which of course diminishes the offerings at the daily auction mart. The extreme low stage of the river very materially restricts supplies, while, at the same time, it checks shipments. The market is pretty well sustained, the preponderance of supplies being lugs and medium leaf, with a fair shipping demand all the week, and, though prices have been rather dragging, the week closes with more firmness for all grades, and a full and rather active demand. The crop prospects are just now rather undefined, though the prevailing dry, hot weather is unfavorable alike for tobacco as well as all products of vegetation. The sales at the four auction warehouses to-day were 60 hhds. with 4 rejections, and the sales of the week sum up 754 hhds., with 55 rejections, and the total sales of the season, since the 1st of November, sum up 33,100 hhds. The latest transactions were as follows: 2 hhds. at \$17 50@19 00, 6 at \$15@15 25, 2 at \$14 25@14 50, 5 at \$13@13 75, 2 at \$12 25@12 50, 6 at \$11@11 75, 11 at \$10@10 75, 6 at \$9@9 80, 2 at \$8 10, 4 at \$7 15@7 50, 4 at \$6 10@6 75, 5 at \$5@5 95, 4 at \$4 60 @4 95, and 1 at \$3 40.

NEW ORLEANS.—Since the issue of our last the market has been characterized by increased stagnancy. The stock on hand is very light, and on the whole rather undesirable, and as holders firmly adhere to previous requirements, buyers find it impracticable to operate, their limited instructions not authorizing them to pay the figures demanded. Under these circumstances the transactions have been trifling, being almost exclusively confined to small lots to the city trade. The sales for the week were about 175 hhds., including 25 hhds. stems at 1c., 52 hhds. refused low leaf 4½@5c., 60 hhds. at 6c., 11 hhds. admitted at 9½c., the balance on private terms. Receipts for the week 439 hhds. Exports for the week—to Liverpool 320; to Vigo, for orders, 420, and to Matamoros 1; total, 741 hhds. Stock on hand and on shipboard, 910 hhds.

BREADSTUFFS.

FRIDAY, August 23, 1867, P. M.

The market continues exceedingly variable and unsettled in tone and prices.

Flour from new wheat has continued to arrive freely all the week. It is still in disfavor with the bakers, and being in some cases pressed for sale from the wharf at steadily declining prices, until good extras from Winter Wheat have been sold at \$10 25@11 per bbl. At this decline business in them has

improved, mainly for the New England States, and the buoyancy in old flours has been checked, although those manufactured from old Spring Wheat still bring one dollar per bbl. more than relative grades from New Winter. Some of the State brands now coming upon the market are from a mixture of old and new wheat, and serve to unsettle quotations for that grade. A good deal of new flour is going into store in the expectation that with a little age it will bring more satisfactory prices.

Wheat has arrived moderately, but with shipping orders being held out of the market, prices have been drooping. Millers entered the market freely on Wednesday, and bought largely of Amber Winter at \$2 37@2 40, and White Western at \$2 50@2 65, but that was the only day of good business during the entire week, and since then prices have declined 3@5c. per bushel, except for California White, which is scarce and wanted, at \$2 75@2 80. Samples of the new Spring Wheat have been received; they are superb, both in quality and condition; and we may expect liberal supplies early in December. But stocks are low. Confidence in present prices is strong, and receivers will undoubtedly store liberally rather than accept two dollars for No. 1 Milwaukee.

Corn has fluctuated materially. The movement has been almost entirely speculative, with very little for export or consumption. Some irregularity in the Liverpool quotations has contributed to the unsettled tone. But at the close there is a good demand for consumption, and export prices firm.

Oats have declined in anticipation of the early receipt of large supplies. A portion of the receipts from New Jersey are weather beaten, and sell at a large concession. Rye has advanced from scarcity. Barley is quiet. We notice receipts of new crop from Canada West, but no prices have been made. Peas are quite nominal.

LIVERPOOL.—The latest mail dates to 9th August report changeable weather again; and though so far the injury done to the crops was but slight, a certain degree of anxiety was felt. The country markets all became firmer, and some have advanced. The French harvest so far did not give much satisfaction. The English markets had advanced, but the latest telegrams by the cable report the market quiet and prices weak. The following are the latest mail quotations:

GROCERIES.

FRIDAY NIGHT, Aug. 23.

The market has been rather more active for the leading staples in this line of trade, and prices in some cases have slightly improved. The demand to supply the small traders of the interior is usually large at this season, and the market naturally feels its influence. The slight advance in gold has, however, been the main cause of the advance in currency prices. The imports have been large in Cuba sugar only, of which 18,318 boxes and 6,576 hogsheads have been received at this port. Of tea, coffee and molasses the receipts have not been heavy. The details will be found under the respective heads below.

TEA.

There is the regular business doing in invoices, but we hear of no large transactions. Prices are generally steady, but holders are disposed to press sales as fast as possible without dropping prices.

The imports of the week have been only 118 boxes by steamer from London. At Boston 603 pkgs. were received from Calcutta. Our usual table of shipments from China, and imports at New York and Boston is omitted, as it remains unchanged, except as to the particulars above named.

COFFEE.

The demand was quite brisk until Thursday, when the weather was unfavorable, and all parties disposed to await the later advices by the Rio steamer now due. The sales of the week were mainly Rio, and foot up about 18,000 bags. At other markets also the business in Coffee has been good.

The imports of the week have been 2,800 bags of Rio, per "Industry," 4,683 do. per "Trinculo," 1,080 bags Maracaibo, 300 Laguayra, 440 St. Domingo and 686 bags of sundries. The cargo of the "Shawmut," reported last week at 7,755 bags, should have been 8,285.

The imports since January 1, and stock in first hands Aug. 20, are as follows:

SUGAR.

The market was very active in the middle of the week, and prices advanced $\frac{1}{4}$ c., with sales at 11 $\frac{1}{2}$ @ 12c. for fair to good refining. The sales of the week are about 7,500 hhds. (including 4,500 on Tuesday and Wednesday) and 3,500 hhds., the market closing firm but less buoyant. Refined sugars are steady at 16 $\frac{1}{2}$ c. for best crushed.

The imports of the week have shown a considerable increase over previous weeks, particularly in Cuba boxes, of which nearly 30,000 have been received at the several ports. Cuba hhds. are also in excess of last week's receipts—at this port 7,054 bags of Manilla are included in the imports. The details for the week are as follows:

MOLASSES.

The market has been active, and prices have been very full. The sales of the week are about 2,000 hhds., including 1,000 hhds. Barbadoes 200 do. Porto Rico, and 800 do. Cuba Muscovado. The demand is mostly from the trade, and low distilling grades are neglected.

The imports of Cuba molasses have been larger this week both at New York and other ports. Of other kinds the receipts have fallen off. The details are as follows:

THE DRY GOODS TRADE.

FRIDAY, P. M., August 23, 1867.

The market in the early part of the week did not show as much activity as was expected, but improved latterly, and more purchasers from the country are making inquiries for goods, and either purchasing or taking a survey of the market. Prices of nearly all goods have been quite steady since our last; on Thursday a slight decline was noticed in the price of one or two well known makes of brown sheetings. The jobbing houses at this time of the year usually expect a very large business, and are apt to manifest some dissatisfaction if it does not commence with great activity. There has been no "rush" as yet, but there is every indication of a steady Fall business as soon as the money for the year's crops begins to be distributed among consumers, and they begin to purchase

of the country merchants. The important house of Messrs. H. B. Claflin & Co. was closed on Monday and Tuesday in consequence of the death of Mr. H. B. Claflin, Jr., who we are informed, was for some time a partner of the firm, residing at Manchester, England. Foreign goods have sold at the auctions rather more actively; the demand for desirable goods is very fair, though prices obtained are not much better than last week. The exports of the week have been fair, both of domestics and dry goods.

The exports of dry goods for the past week and since January 1, 1867, and the total for the same time in 1866 and 1860 are shown in the following table:

We annex a few particulars of leading articles of domestic manufacture, our prices quoted being those of the leading jobbers:

BROWN SHEETINGS AND SHIRTINGS are in active request; during the early part of the week the lower grades were most sought for, but latterly medium and better sorts have also been in demand. A decline of 2 cents. on Appleton A, and $\frac{1}{2}$ cent. on Amoskeag A and B has taken place. Standards are held at $16\frac{1}{2}$ @ $17\frac{1}{2}$ c. PRINT CLOTHS have been quite active at 9@9 $\frac{1}{2}$ cents for 64x64 square cloth, with large sales at Providence and a very firm feeling.

PRINTS show a decidedly increased demand at the close of the week, and prices are maintained firmly. Some talk has been heard on the part of holders of advancing the price in consequence of the firmness in printing cloths, but as yet they remain at former figures. Some very handsome new styles in the market meet with much favor. American 15, Amoskeag dark 14, do purple 15, do shirting 14-16, do palm leaf 15, Merrimac D 15-15 $\frac{1}{2}$, do purple 16 $\frac{1}{2}$, do W dark 18-19, do purple 19, do pink 19, Sprague's 15 $\frac{1}{2}$ do purple 16, do shirting 16 $\frac{1}{2}$, do pink 16 $\frac{1}{2}$, do turkey red 15, do blue check 16, do solid 14 $\frac{1}{2}$, do indigo blue 15 $\frac{1}{2}$, do Swiss ruby. 16, London Mourning 14 $\frac{1}{2}$, Simpson Mourning 14 $\frac{1}{2}$, Amoskeag Mourning 13, Dunnell's 15, Allen pink 16, Arnold's 12 $\frac{1}{2}$, Gloucester 15, Wamsutta 11 $\frac{1}{2}$, Pacific 15 $\frac{1}{2}$, Freeman 12 $\frac{1}{2}$, Cochecho 16, Lowell 12 $\frac{1}{2}$, Hamilton 15-15 $\frac{1}{2}$, Victory 12 $\frac{1}{2}$, Home 10, Empire State 9, Lancaster 15, Wauregan light 14, Hovey 8 $\frac{1}{2}$, Atlantic 8 $\frac{1}{2}$.

AMERICAN LINEN continues in steady request at unchanged rates.

FOREIGN GOODS are improving steadily for all kinds of plain and new styles of dress and staple goods. The auction sales are increasing in interest, and the season promises to be a more satisfactory one. The importations, as is well known, have been much below those of last year, and importers have such confidence in the future of the market as to withdraw at the auction sales such goods as do not bring prices to suit them.

The Railway Monitor.

MEMPHIS AND OHIO RAILROAD.—Governor Brownlow has taken possession of this road for the State of Tennessee, the Company having failed to meet their obligations to the State.

CONSOLIDATION.—The Columbus and Indianapolis Central, the Union and Logansport, and the Toledo and Logansport and Burlington Railroad Companies have agreed upon articles of consolidation. The extent of these roads is as follows:

Columbus & Ind. Central (Columbus to Indianapolis).....	188.0	
Branch to Union City.....	19.5	207.5
Union & Logansport Railroad.....		92.0
Toledo, Logansport & Burlington Railroad.....		61.0
Total length of consolidated road.....	360.5	

The consolidation will take the legal title of Columbus and Indiana Railroad Company, and is expected to be completed for use in November next. B. E. Smith, of Columbus, Ohio, is President.

PACIFIC RAILROAD SUBSIDY.—Our readers are well aware that beside the grant of ten sections of land on each side of the lines, these railroads receive from the Government a large subsidy in a loan of currency bonds. The following table, prepared at the Treasury Department, shows the length of each line and the amount of bonds to be issued as the successive sections are completed:

RAILROADS.	Length in miles.	Amount per mile.	Total amount.
CENTRAL PACIFIC—From Sacramento to the W. base of the Sierra Nevada.....	7.18	\$16,000	\$114,880
Thence across the Sierra Nevada.....	150.00	48,000	7,200,000
Thence to the probable junction with the Union Pacific RR. (78.295 miles E. of Salt Lake City).....	544.115	32,000	17,411,680
Total Central Pacific Railroad.....	701.295	\$.....	\$24,726,560
UNION PACIFIC—From Omaha to the E. base of the Rocky Mountains.....	516.00	16,000	8,256,000

Thence across the Rocky Mountains.....	150.00	48,000	7,200,000
Thence to the probable junction (78.295 miles east of Salt Lake City) with the Central Pacific Railroad.....	289.705	32,000	9,270,560
Total Union Pacific Railroad.....	955.705	\$.....	\$24,726,560
UNION PACIFIC (Eastern Division) —For a length equal to the distance from the mouth of the Kansas River to the 100th meridian.....	381.00	16,000	6,096,000
CENTRAL BRANCH OF UNION PACIFIC (late Atchison and Pike's Peak R.R.)—For 100 miles next to the Missouri River.....	100.00	16,000	1,600,000
SIoux CITY AND PACIFIC—From Sioux City to a junction with the Union Pacific Railroad at Fremont.....	100.00	16,000	1,600,000
WESTERN PACIFIC—From San Jose to Sacramento, and probably to be consolidated with the Central Pacific.....	120.00	16,000	1,920,000
Grand Total.....	2,358.00	\$.....	\$60,669,120

The bonds issued for these railroads bear 6 per cent. currency interest, and the companies severally are authorized to issue an equal amount of their own bonds having priority over the government issues. At this date the Central has completed 105 miles, the Union Pacific 416 miles, and the Eastern Division 234 miles.

MISCELLANEOUS.—We learn that the tunnel at the Point of Rocks on the Baltimore and Ohio Railroad, has been so far completed as to be ready to receive the track. The tunnel at Williams' Point, a mile and a half beyond, is being vigorously worked, in order, it is said, to have the double track completed by the 17th of September.

The San Paulo (Brazilian) Railway was opened on 16th of February, 1867. It is 86½ miles in length. The traffic for the month of May was about \$64,000.

A company has been organized at New Orleans called the "Electrical Brake Co. of America." It is claimed that a railway train running forty four miles an hour can be stopped by electricity between fifty and one hundred yards.

INSURANCE COMPANY.

No. 35 WALL STREET, NEW YORK.

Assets, January 1st, 1867.....\$1,261,349

ORGANIZED APRIL, 1841.

During the past year this Company has paid to its Policy-holders,

IN CASH,

a rebate on premiums in lieu of scrip, equivalent in value to an average scrip dividend of

TWENTY PER CENT.

Instead of issuing a scrip dividend to dealers, based on the principle that all classes of risks are equally profitable, this Company makes such cash abatement or discount from the current rates, when premiums are paid, as the general experience of underwriters will warrant, and the nett profits remaining at the close of the year, will be divided to the stockholders.

This Company continues to make Insurance on Marine and Inland Navigation and Transportation Risks, on the most favorable terms, including Risks on Merchandise of all kinds, Hulls, and Freight.

Policies issued making loss payable in Gold or Currency, at the Office in New York, or in Sterling, at the Office of Rathbone, Bros. & Co., in Liverpool.

Safes.**IMPORTANT**

TO

BANKERS & MERCHANTS.

This Company offer for the consideration of Bankers, Merchants and those desiring the *best* burglar proof security the following certificates:

LILLIE'S

**DOUBLE CHILLED AND WROUGHT IRON
FIRE AND BURGLAR PROOF
Safes.**

OFFICE OF THE NOVELTY IRON WORKS, }
New York. 18th December, 1866. }

Messrs. LEWIS LILLIE & SON,

Gentlemen,—We have subjected the sample of double chilled iron you furnished us to the most severe tests (as regards drilling through it) we could bring to bear upon it, and without success.

It is our opinion that it can only be penetrated by the use of a large number of drills, and the expenditure of much power with days of time, and we think it impossible for a burglar with his time and power to penetrate it at all.

Yours truly,

ISAAC V. HOLMES, Supt.
LYMAN G. HALL, Foreman.

HINKLEY AND WILLIAMS WORKS, }
Boston, Mass., January 22, 1867. }

We having made an attempt to drill a sample of double chilled iron furnished us by Messrs. Lillie & Son, and failed to penetrate it more than five-eighths (5/8) of an inch, after hours of labor, feel that we can endorse the above Novelty Iron Works' certificate in all particulars.

JARVIS WILLIAMS, Treasurer.

PHILADELPHIA, PA., February 25, 1867.

Messrs. LEWIS LILLIE & SON,

Gentlemen,—We have tried a sample of double chilled iron similar to that sent to the Novelty Works, New York, and our experience with it is about the same, viz: that it can only be penetrated by a long continued operation of the most skillful mechanics and the best tools.

Very truly,

W. H. BECHTEL,
W. H. STRAHAN,

Foremen in Messrs. Merrick & Son's Southworth Foundry, Philadelphia, Pa.

OFFICE UNION FOUNDRY WORKS, }
Chicago, Ill., March 13, 1867. }

Messrs. MURRAY & WINNE,

Agents Lillie Safe and Iron Co.,

Gentlemen,—We subjected the sample of new combination of metals for safes sent us by you to as thorough tests of the drill as we could, and failed to penetrate the metal at all. We think it would be impossible for burglars to enter the safes made of this metal by means of the drill during the longest time in ordinary business they could have access to them—in fact, that the metal is proof against the drill.

Truly yours,

N. S. BOUTON & CO.

OFFICE OF NORTHWESTERN MAN'G CO., }
Chicago, March 11, 1867. }

Messrs. MURRAY & WINNE,

Agents Lillie Safe and Iron Co.,

Gentlemen,—We subjected the sample you furnished us (of a new combination of metals to be used in the manufacture of Lillie's Safes) to the severest tests of our Power Drill, and with the best tempered drills our skill and experience could produce.

After operating upon it with different drills several hours without penetrating it more than half an inch and at that point unable to make further progress, we became satisfied that if not utterly impenetrable, it would at least require days of time, a large number of drills and machine power to penetrate through it; and that it was entirely out of the power of even the most skillful burglar to penetrate a safe made of this material.

R. T. CRANE, President.

A full assortment of these unequalled Burglar-proof Safes constantly on hand at our Warehouses. Also, safes of every description, designed for both Fire and Burglar-proof security. The public are invited to call and examine for themselves as to the merits of our Safes.
