RAILROAD COMPANY.

\$600,000 Second Mortgage Bonds For Sale.

These Bonds are part of a series of One Million of Dollars secured by Mortgage on 290 miles of Railroad, of which Messrs. Denning Duer and James Robb are Trustees. They have 20 years to run with 7 per cent. interest coupons, payable semi-annually in New York. The liens on the Railroad having priority, amount to \$2,889,530, making the total incumbrance \$3,889,530, and its estimated value exceeds 10 millions of dollars. Since the conclusion of the war extensive improvements have been made, and its condition will compare favorably with that of leading lines of Western Railway. The profits of the Company from 1853 to 1862 were large, and after paying interest on Bonded Debt yielded over 15 per cent. to the shareholders. Those of the fiscal year ending 30th June, 1867, were \$547,187 76, being more than double of the liability for annual interest, including the issue of the 2d Mortgage Bonds, and earned during a most unfavorable season owing to the failure of Southern crops.

We are prepared to receive bids for the above Bonds in whole or in part, and recommend them to the public as unquestionable security.

525 MILES

OF THE

UNION PACIFIC RAILROAD,

Running West from Omaha Across the Continent

ARE NOW COMPLETED.

This brings the line to the eastern base of the Rocky Mountains, and it is expected that the track will be laid thirty miles further, to Evans Pass, the highest point on the road, by January. The maximum grade from the foot of the mountains to the summit is but eighty feet to the mile, while that of many eastern roads is over one hundred. Work in the rock-cuttings on the western slope will continue through the winter, and there is now no reason to doubt that the entire grand line to the Pacific will be open for business in 1870.

The means provided for the construction of this Great National Work are ample. The United States grants its Six Per Cent Bonds at the rate of from \$16,000 to \$48,000 per mile, for which it takes a SECOND LIEN as security, and receives payment to a large if not to the full extent of its claim in services. These Bonds are issued as each twenty-mile section is finished, and after it has been examined by United States Commissioners and pronounced to be in all respects a first-class road, thoroughly supplied with depots, repair-shops, stations, and all the necessary rolling stock and other equipments.

The United States also makes a donation of 12,800 acres of land to the mile, which will be a source of large revenue to the Company. Much of this land in the Platte Valley is among the most fertile in the world and other large portions are covered with heavy pine forests and abound in coal of the best quality.

The Company is also authorized to issue its own First Mortgage Bonds to an amount equal to the issue of the Government and no more. Hon. E. D. Morgan and Hon. Oakes Ames are Trustees for the Bondholders and deliver the Bonds to the Company only as the work progresses, so that they always represent an actual and productive value.

The authorized capital of the Company is One Hundred Million Dollars, of which over five millions have already been paid in upon the work already done.

EARNINGS OF THE COMPANY.

At present the profits of the Company are derived only from its local traffic, but this is already much more than sufficient to pay the interest on all the Bonds the Company can issue, if not another mile were built. It is not doubted that when the road is completed the through traffic of the only line connecting the Atlantic and Pacific States will be large beyond precedent, and, as there will be no competition, it can always be done at profitable rates.

It will be noticed that the Union Pacific Railroad is, in fact, a GOVERNMENT WORK, built under the supervision of Government officers, and to a large extent with Government money, and that its bonds are issued under Government direction. It is believed that no similar security is so carefully guarded, and certainly no other is based upon a larger or more valuable property. As the Company's

FIRST MORTGAGE BONDS

are offered for the present at NINETY CENTS ON THE DOLLAR, they are the cheapest security in the market, being more than 15 per cent. lower than U. S. Stocks. They pay

SIX PER CENT. IN GOLD,

or over NINE PER CENT. upon the investment and have thirty years to run before maturity. Subscriptions will be received in New York at the Company's Office, No. 20 Nassau Street, and by

CONTINENTAL NATIONAL BANK, No. 7 Nassau Street.

CLARK, DODGE & CO., Bankers, No. 51 Wall Street.

JOHN J. CISCO & SON, Bankers, No. 33 Wall Street.

and by the Company's advertised Agents throughout the United States. Remittances should be made in drafts or other funds payable in New York, and the bonds will be sent free of charge by return express. Parties subscribing through local agents, will look to them for their safe delivery.

A NEW PAMPHLET AND MAP

showing the Progress of the Work, Resources for Construction, and Value of Bonds, may be obtained at Company's Offices or of its advertised Agents or will be sent free on application.

It will act as administrator or executor of estates, and as guardian for minors, and as receiver in litigated cases. The Company is also constituted by its charter a legal depository for money paid into Court.

SECURITY OF THE COMPANY.

The Capital stock of ONE MILLION DOLLARS is divided among over five hundred Shareholders comprising many gentlemen of large wealth and financial experience, who are also personally liable to depositors for all obligations of the Company to double the amount of their capital stock.

By its charter, no loan can be made, directly or indirectly, to any trustee, officer or employee of the Company.

The Trustees are compelled to exhibit annually a full statement of their affairs to the Supreme Court, and it is made the duty of the Court to see that they are properly conducted.

The charter restricts the investment of its Capital to United States Government Stocks, or New York State Stocks, or Bonds of Incorporated Cities of this State; or on Loans on Bond and Mortgage on unimproved Real Estate in this State, worth double the amount loaned.

The Company will make loans from its Deposits and Trust Funds on Government Securities, State Stocks and City Stocks of this State; but it is not permitted to DISCOUNT or deal in COMMERCIAL OR BUSINESS paper.

The above provisions constitute this Company a very secure Depository for Money and for trusts committed to its charge.

ADVANTAGES TO DEPOSITORS.

As the NATIONAL TRUST COMPANY receives deposits in large or small amounts, and permits them to be drawn as a whole or in part by CHECK AT SIGHT and WITHOUT NOTICE, allowing interest on all daily balances, parties can keep accounts in this institution, with special advantages of security, convenience and profit.

At a meeting of the Board of Directors, held Monday, December 30, 1867, the resignation of GEO. W. SAVAGE, Esq., as President, was accepted, and the following resolution was unanimously adopted:

Resolved, That the thanks of this Board are due, and are hereby tendered to Geo. W. Savage, Esq., (who resigns to assume the Presidency of the International Insurance Company,) for his devotion to the interests of the stockholders, and the able manner in which he has performed his duties as President of this Company and that this Board congratulate Mr. Savage upon the present prosperous condition of the Company, which is largely due to his efficient administration.

Subsequently NICHOLAS C. MILLER was unanimously elected President, and MOSES M. BRADLEY appointed Secretary.

THE CHRONICLE.

With this number THE CHRONICLE enters upon its sixth volume. The unusual favor with which this journal has been received and the steadfast friends it has in so short a period secured, shows that we did not overestimate the urgency of the want which it supplies. With regard to the coming year it is unnecessary for us to make any promises, as our course in the past is we think a sufficient guaranty for the future. We contemplate no changes, except such as may be involved in continual progress, but shall always strive to present truth in such a light that it may command respect, and help to direct public opinion during the troublous times upon which our country has now entered.

The statistical departments of our paper will continue to receive our closest attention. In to-day's issue will be found our yearly compilations. The table of the prices of gold we carry back six years, thus giving in this issue the premium each day since the 13th of January, 1862. We would also call attention to our tables of stock fluctuations, rates of exchange, &c. To make room for so much additional matter we have been compelled to omit some of our weekly stock and bond pages. They will appear however as usual hereafter.

MR. SPAULDING ON THE FUNDING BILL.

In prospect of the re-assembling of Congress on Monday all sorts of rumors are afloat relative to the probable course that may be adopted in dealing with the financial question. Under such influences it is no wonder that Wall street is agitated, that speculation is rife, that uncertainty begets distrust, and the steady firmness, the smooth easy working of the business machinery of the country is more or less deranged. We may be well assured, however, that in the financial domain Congress will do nothing rashly. Political motives, prudential motives, commercial motives, all combine with those derived from enlightened statesmanship and the exigencies of the present crisis to avert from us any inopportune legislation.

In a financial point of view, one of the gratifying signs of the times is the universal condemnation which Mr. Sherman's Funding Bill has evoked from all classes of our people, in all sections of the country. It was one of the provisions of that measure, as our readers will remember, to spend twenty millions of dollars in commissions, and to distribute this prodigious sum among the brokers and agents employed by the Treasury to carry out this funding scheme. In the present outcry for retrenchment and financial reform, such profuse extravagance, such an unprecedented outlay of the public money for projects of this kind would be fatal to any party. The general belief is that far too much has been lately spent on charges for funding purposes. And a keener watch will consequently be kept over these expenses in future. It is said that during the last twelve months nine-tenths of the funding operations of the government have been carried on at small expense through the Sub-Treasuries, and that the remaining small fraction of the work of funding which has been done by agents and brokers has cost the country for charges and commissions, more than all the Sub-Treasuries have cost to carry on the financial business of the Government. How true these allegations may be we look to Congress to tell us. But in presence of the annoying and irritating belief which everywhere prevails that money has been unnecessarily squandered on purchases of Compounds, on Seven-Thirties; on the sales of gold, Five-Twenties, and Ten-Forties, any new project involving such expenditure would certainly fail, even if it were much less offensive than the scheme before us, and called for a much less enormous expenditure than twenty millions of dollars.

We are glad to see that Mr. Spaulding, who is well known as one of the leading promoters of the legal tender act of 1862, has written a letter disapproving of Mr. Sherman's bill, in reply to an inquiry from Mr. Morgan of the Senate Committee on Finance. This letter contains some preliminary statements as to the part the legal tenders were intended to play in the funding of the debt into long bonds, and con-

tends that this function was performed in a way which has, on the whole, proved efficient. The objects of the law of 25th February, 1862, Mr. Spaulding says were two. First, the issue of the legal tender notes, paying them out to the army and navy, and to the other creditors of the Government; and, secondly, their final funding into a 20 years six per cent. bond. The bill aimed, he says, "to provide the means by which the floating and temporary debt then bearing heavily upon the Treasury might, by the operation of the act, be funded into a long bond without a heavy sacrifice in making the negotiation. Some gentlemen are now trying to reverse the obvious intent of the act, and unfund all this bonded debt, by again putting it into a *floating* and temporary form. I regard all these late shifts and quibbles to unsettle what is already honorably fixed and determined by the Treasury Department under and in pursuance of law, as unworthy of this great nation, unstatesmanlike in those who advocate it, and, if persisted in, it will, I think, inevitably destroy the credit of the Government, and postpone indefinitely a resumption of specie payments."

Mr. Spaulding exposes an important error in the report with which the Finance Committee accompanied the funding bill when they presented it to the Senate. In this report it seems to be taken for granted or implicitly admitted at least, that if the Secretary of the Treasury gave any assurance while the five-twenty loan of 1862 was negotiating, that the principal of the bonds as well as the interest would be paid in gold, then such a declaration might form part of the contract and would be binding on the government. The statement is added that the "Committee can find no official declaration made by the Secretary on the subject until after the loan was negotiated." Now it is well known that this loan was not closed till the beginning of the year 1864, and Mr. Spaulding reproduces the following letter on the subject of gold payment under date of August 5, 1863, when nearly three hundred millions of these five-twenties had still to be issued.

TREASURY DEPARTMENT,
WASHINGTON, D. C., August 5, 1863.

GENTLEMEN—Your letter of the 3d inst., relative to the redemption of six per cent. Five Twenty bonds of the loan of February 25, 1862, has been received. The following is the decision of the Secretary of the Treasury in regard to the redemption of the public debt: "All coupon and registered bonds, forming a part of the permanent loan of the United States, will be redeemed in gold. The Five-Twenty sixes, being redeemable at any time within twenty years after the lapse of five years, belong to the permanent loan, and so also do the 20 years sixes of July 17, 1861, into which the three years Seven-Thirties are convertible. All obligations and notes forming a part of the temporary loan will be paid at maturity in United States notes, unless, before such maturity, payment in specie shall have been generally resumed. The Seven-Thirty three-year bonds or notes form part of the temporary loan, with the privilege of conversion into 20 years sixes, in sums not less than \$500. They will, therefore, be paid, if the holders prefer payment to conversion in United States notes.

GEO. HARRINGTON, Acting Secretary of the Treasury.
To Messrs. FISK & HATCH, Bankers, New York.

To establish the pertinency of this letter, it is only needful to remember that the books of the Department show that on the 3d of August 216 millions of the Five-Twenties had been issued, and that the aggregate was increased to 514 millions before the loan was finally closed in the following January.

We have not space to insert Mr. Spaulding's further arguments against the theory, that the bonds which form a large part of our funded debt were issued under a law which, making greenbacks a legal tender, authorized greenback payment as a legal liquidation of the principal after five years from the date when the bonds were issued. The chief point which he attempts to make is that Mr. Sherman's bill has a very close relation to this greenback payment scheme. Having discussed this and some subordinate matters, he proceeds as follows:

Why take the back track under these funding loan bills? Why open the question at all at this time! The *floating* debt and temporary

loans are *already funded*, or so nearly funded that there cannot be any reasonable doubt that, by the 15th of July next, when the last series of 7-30 notes fall due, the whole will be funded into bonds, none of which are payable until 1882, being 15 years yet before they become due. The government is not legally or morally bound to pay one dollar of the principal of these bonds until they become due then why trouble ourselves about funding that which is already funded, especially when it has been done by repudiating the acts and declarations of the Secretary of the Treasury in the discharge of his official duties? Why raise the question now, as to the kind of money with which we are to pay bonds already outstanding, and which are not becoming due until 1882? Long before these bonds become due specie payments will no doubt be resumed, and we shall then have but one standard of value, and only one kind of money, namely, coin or its equivalent, in which to pay these bonds. Our population and resources will be nearly double then to what they are now. We shall be abundantly able to pay at that time in that currency which is recognized by all civilized nations as the true standard and measure of value, and thereby the honor and good faith of the nation will be fully maintained.

I would suggest further, that in the provision in the bill, which limits the legal tender currency to \$400,000,000 is a good one, provided there is any sane man in Congress who proposes, in a time of peace to dilute and still further depreciate the currency, by increasing it above that sum; but I think the maximum of the greenback currency must not exceed \$250,000,000 or \$300,000,000 when we reach the specie standard, if we would successfully maintain specie payments. And it seems to me, that it would greatly facilitate a resumption of specie payments, if the national banks were required to hold a part of their reserves in coin, and that some safe plan should be devised by which the sub treasuries in the principal cities, especially in New York, could make daily settlements with the banks through the clearing house, and requiring only balances to be paid, substantially in the same manner as the banks in the principal cities make their daily settlements with each other. In this way no large movement of coin to or from the Sub-Treasury would be necessary, and the daily payments could be made with comparative ease.

To sum up Mr. Spaulding's arguments then, the new funding bill offers to do nothing that really wants doing, and would incidentally produce a great deal of mischief. After the heavy expenses the people have already incurred in funding the existing debt, this bill would unsettle everything, throw the whole 200 millions of Government securities into confusion and chaos, that we may spend twenty millions of dollars for commissions in trying to get our bonds funded into some new form. We agree with Mr. Spaulding that all agitation now relative to such schemes, or to the kindred schemes of paying off the Five-Twenties in greenbacks under the five years option are mischievous in the extreme, and cannot fail, as far as they have any influence at all, to lower our credit unnecessarily, both at home and abroad. Except the Five-Twenties were made payable in greenbacks the holders would not give them up for the new bond yielding less interest. And if we attempt to force them to make the exchange by this bold act of semi-confiscation, the attempt would be fatal.

What, it may be asked, ought Congress to do? You object to Sherman's bill, what other measure would you give us instead? We reply that no new legislation is needed relative to the debt. Existing laws, if rightly worked, will do whatever is needed. The debt is funding itself rapidly. Let it alone. To meddle with the machinery, is to check its movements and to do harm. With regard to the currency, one thing is wanted and but one thing. Let contraction be stopped. The currency for a while should be left to itself, that the country may recuperate and a reaction be developed from the depression caused by the recent too severe depletion of the active currency. With the exception of this arrest of contraction, we repeat that it is neither desirable nor likely that Congress will for some time to come mature or attempt to pass any financial measures whatsoever.

PRICES IN 1867.

Having reached the close of the year 1867, it may be of interest to inquire what progress has been made, within the period, toward that lower level of values from which we departed soon after the commencement of the war. The question is one of great importance; since a period of high prices usually produces languid industry and repressive mercantile caution on the one hand, and, on the other, an unhealthy

speculation and a limitation of the engagements of the people at large.

The course of the gold premium during the year has corresponded so nearly with the range in 1866, that, in comparing prices for the two periods, it is hardly necessary to take note of the fluctuations in the precious metals. At the close of the past year the premium was at the identical figures of Dec. 31, 1866. In making a comparison with preceding years, however, the requisite adjustment would require to be made for the differences in the gold premium, and in the depreciation of our paper currency which this premium imperfectly indicates, at the respective periods. The following gives the wholesale currency prices of leading articles of produce at New York, at the opening of January of each of the last eight years:

It is not unfrequently the misfortune of great wars that they leave behind them a general enhancement of prices; and it is in the nature of things that the return of values to the normal standard should be slow. The fact that the production of the country is interrupted during hostilities, and further that the supplying and equipment of the forces involve a very wasteful expenditure, tend to induce a general scarcity; and with scarcity comes its consequence, high prices. In such cases there can be no return except so far as there is a recovery of the former reserve of supplies. And yet, to this process of re-accumulation, there are obstacles which are to be overcome only through the operation of tardy causes. The loss of stalwart producers has to be compensated by the conversion of many former non-producers into producers; a large amount of labor has to be exacted from muscle; invention has to bring forth its labor-saving contrivances; and for all these results not months but years are required. Besides these ameliorating tendencies must be delayed in working out their remedies. When in addition to the industrial derangements,

there is also a disturbance of the financial arrangements of the country. In our case this currency question is the one of gravest importance. Other disturbing causes would easily adjust themselves, but our redundant currency will permit no sudden return to the specie standard; this can only be realized as we make our paper dollar approximate to value of the gold dollar.

But in addition to these causes of derangement we have suffered somewhat through the short crops, and also through wars in other countries. The trade of Germany has sustained injury from a great struggle, with which the commercial interests of England, our chief customer, have sympathized. Mexico has been prostrated by an invasion, and appears to be now on the verge of a revolution. The South American republics are in a chronic condition of war. The seasons have also been against us. For the last three years the grain crops of the world at large have fallen below the average, causing very extraordinary prices for breadstuffs. And when it is considered how directly the price of bread bears upon values generally, it is readily apparent how this circumstance has tended to keep up prices.

We have referred thus to the causes tending to retard the decline in prices because we apprehend that some surprise will be felt, on comparing present quotations with those of a year ago, that we have not made more progress in the direction of normal values. The truth is, that the disturbance of our industrial and monetary arrangements is too radical and deep seated to admit of anything beyond a slow and protracted recovery; so that while we have little to fear in the way of mercantile derangements from a general sudden fall in values, we have little to hope from an early return to old prices. By an examination of the above table, it will be seen that the instances of products being higher than a year ago are quite exceptional, and are set off by cases where there has been a material decline. Upon an average, the decline in the commodities above enumerated is about ten per cent. within the year. The most important exceptions are in cotton, naval stores and iron. The fall of \$14 per ton, or 28 per cent., in the value of iron, and 50 per cent. in the value of cotton are quite important in those bearing upon the future course of prices; inasmuch as the former is one of the most important materials used in the various appliances for production, and that the latter enters into the consumption of every family.

The commodities quoted are principally agricultural products. Were it possible to give comparative prices of manufactures, we think it would be found that in that department of industry prices have generally declined more than on the products here instanced. On many kinds of goods the fall has been so severe as to involve the manufacturers in embarrassing losses and not unfrequently even in bankruptcy. This inequality between the manufacturing and the agricultural interests is one of the derangements bequeathed us by the war. But the losses in the one branch and the handsome profits in the other may be relied upon to effect a more even distribution of labor and capital between the two departments when the values of the two classes of products will be equalized.

REVIEW OF THE MONTH.

The closing month of the year exhibited a partial improvement on those immediately preceding. There was a recovery of confidence in commercial circles; merchants showed less distrust in prices; the traders of the interior, being benefitted by abundant crops, came into the markets for a second supply of goods, and the jobbing houses closed the year with much lighter stocks than appeared probable thirty days ago. In monetary circles, also, there has been a general improvement. The extreme sensitiveness of credit, and the high rates of interest which characterised October and November have disappeared, and call loans have ranged steady at 6@7 per cent., while discounts of prime paper have been made generally at

7@8 per cent., merchants having found no difficulty in procuring adequate accommodation. The opening of Congress was anticipated with fears of trouble growing out of impeachment and with doubts lest Congress might prove strongly in favor of a fresh inflation of the currency. These apprehensions have been dispelled; and with a general confidence that Congress will attempt no extreme measures on financial questions, there is a much more healthy tone in business generally.

The assurance given by the Secretary of the Treasury, that contraction will be temporarily suspended, has infused a more confident spirit into Wall street. Stock speculation has revived and government securities have become firmer. It needed but the removal of the check imposed by contraction to encourage an active speculation for higher prices in the share market. For some time the conviction has been growing that the railroads of the country are a good investment; the large earnings of the last few months have strengthened this feeling; while the placing of the Harlem, Hudson River, New York Central and Erie, virtually under the control of one master mind, with the understanding that they shall be subjected to a rigorous economy in management has done much toward inspiring confidence in this class of investments. Within the last three months a large amount of railroad shares has gone into the hands of private capitalists, to be held as a permanent investment, or to be sold at higher prices; and this movement has given an appearance of much firmness to prices during December. The total sales of shares at the stock boards for the month amount to 1,760,721; which, though materially below the transactions in December, 1866, is yet fully up to the average for the year. The total sales for the year 1867 are 21,271,036 shares, which is about 2½ millions below the transactions of the previous year. How far this decrease in stock operations is due to the enforcement of contraction is a question upon which there will not be much difference of opinion. It will be seen from a comparison given below that the transactions in bonds show a very large increase both in December and for the year, upon 1866. This gain, however, is apparent rather than real, the difference having arisen from the organization of a board in the Stock Exchange, with three daily sessions, especially for Government securities, which has caused a much less proportion of the business to be done at the counters of the dealers.

The following table shows the volume of shares sold at the New York Stock Exchange Board and the Open Board of Brokers in the three first quarters, and in the month of December, and the total in all the year 1867:

Since Jan. 1

The gold movement for the month has exhibited features usual in December. The shipments of cotton and produce have not, as is usual at the close of the year, nearly sufficed for liquidating our maturing foreign obligations, and we have had to ship from this port \$6,843,878 in coin and bullion during the month. The receipts of treasure from California, however, have increased largely upon late months, so that our exports have exceeded our California arrivals by only \$3,431,799. The total supply from California arrived here, during the year, is only \$28,391,396, against \$41,431,726 in 1866. We have imported from foreign countries \$3,160,720, making a total supply, from the Pacific and abroad, of \$31,552,116. Our exports for the year amount to \$51,791,283 against \$62,563,583 in 1866 and \$30,003,683 in 1865. The total supply of gold coming upon the market during the year, that is to say from California arrivals, foreign imports and interest payments by the treasury, amounts to \$98,423,465. The amount withdrawn from the market, in the payment of customs duties and foreign exports, aggregates \$168,649,807; so that the withdrawals exceed the new supply by \$70,226,342; as the banks have now \$2,213,253 less than at the beginning of the year, there remains a difference between supply and withdrawals of \$68,013,089, which has been made up by sales of coin by the treasury and by arrivals of which there is no recorded movement.

The receipts and shipments of coin and bullion at New York in the three first quarters, and in the month December, with the total since January 1, being the full aggregate for the year 1867, have been as shown in the following statement:

The following formula furnishes the details of the general movement of coin and bullion at the port for the first three quarters and the month of December, with the total since January 1, being the whole year 1867:

The course of the gold premium during the month has been steadily downward. The defeat of the impeachment measure, and the unexpectedly conservative tone of Congress upon questions of finance have weakened the price; while the anticipation of the payment of about \$30,000,000 of coin by the Treasury during January has had a still stronger influence in that direction. The unexpectedly large exports have checked the downward tendency. The price closed at 133½, almost the identical quotation of the same period of 1866.

The statement which follows shows the daily fluctuations in the price of American gold coin at the Gold Room during the month of December:

Foreign exchange has been unexpectedly firm. For the greater part of the month rates have ruled over the specie shipping point; but at the close there was a slight yielding in quotations. The low price realised upon our exports of cotton, and the check upon our shipments of produce through the premature closing of the canals, with several million bushels of grain in the boats, have caused the supply of bills to fall below the wants of remitters, which have been upon quite a liberal scale.

The following table shows the course of Foreign Exchange, daily, for the month of December:

COURSE OF FOREIGN EXCHANGE (60 DAYS) AT NEW YORK—DECEMBER.

BOSTON DIVIDENDS.

We are indebted to Mr. Joseph G. Martin, of Boston, for tables of Railroad and Manufacturing Dividends payable in that city this month, January, 1868. We have also added, for comparison, the figures for the previous three years. It will be noticed that the railroads have had a profitable year, their dividends in many cases exceeding those of last year, and being considerably in excess of the previous year. The total amount of the payments in January, 1866, was \$2,186,214; January, 1867, was \$2,574,429, and January, 1868, \$2,751,158.

On the other hand, however, the manufacturing exhibit, although more favorable than we anticipated, shows a considerable falling off. The aggregate payments in January, 1866, reached the large total of \$3,384,850; but in January, 1867, the total was reduced to \$2,590,750, and this year, Jan., 1868, it is only \$1,120,000. Still it will be seen that some of the companies continue to divide large profits among their stockholders.

DAILY PRICES OF GOLD AT NEW YORK FOR SIX YEARS.

The tables which follow exhibit a concise review of the Gold Market at New York, from the suspension of specie payments, at the close of 1861, to the close of the year 1867, embracing a period of six years. From January 1, 1862, to and including June 20, 1864, the prices are based on the daily sales at the New York Stock Exchange, from June 21, 1864, to December 31, 1867, on the quotations at the Gold Room. This change of the sources of information was rendered necessary by the total cessation of sales at the Stock Board immediately after the passage of the Gold Bill in Congress, and the infrequency of sales thereat up to the present day.

The panic in railways has necessarily been the subject of much discussion, while to many the heavy depreciation in the value of the shares, and the uncertainty, if not loss, of dividend has been a serious misfortune. Not a few persons in this country have treated railway property as if it were, next to consols, the soundest and safest. Hence, many who had small sums to invest, and who calculated upon the certain payment of the interest, placed them in railway shares, in the belief that they should receive a fair return for their capital. This class, and it really is very numerous, required the interest half yearly to meet their domestic expenses, so that much anxiety has been caused in many families throughout the land. Besides not only have the losses in the past been heavy, but were the holders of railway shares disposed to sell their property they would be compelled to part with it at an enormous sacrifice, while the future looks uncertain, dark and dreary. The embarrassments of railway companies are far too heavy to be overcome in a few weeks, and it will probably take many years before railway property may be looked upon as a safe, and a still greater number of years before it can be looked upon as a profitable investment. The position of this great interest has also operated to an important degree in checking that return of confidence which is so much desired. People have for a long period lost faith in one another to a very important extent. The revelations of the present week respecting railway management are by no means calculated to promote a cessation of distrust, but, on the other hand, to increase the anxiety which still exists, and to dispose the general public to refrain from embarking in any fresh enterprise whatever, either at home or abroad.

The wheat trade has presented no especial feature. Millers have operated to a very moderate extent, and the business transacted has been chiefly of a hand to mouth character. Good and fine wheats, however, have sold at full prices, but superior qualities are dull and irregular in value. The following statement shows the extent of our imports and exports into and from the United Kingdom, since the 1st of September, 1866 and 1867:

Throughout the manufacturing districts business has continued very quiet. As regards cotton, rather a good demand has been experienced; but holders of American produce have pressed sales, and hence prices have further declined. American produce, on the spot, has not altered in value since Saturday last; but most other descriptions show a fall of $\frac{1}{4}$ d. @ $\frac{1}{2}$ d. per lb. In wool and most other articles buyers have continued to operate with great caution.

Advices from Alexandria state that the bulk of the new received from the interior was of very poor quality. The crop was looked upon as a partial failure.

During the earlier days of the week there was a tolerably active demand for accommodation, and the rates of discount ruled decidedly firm, with an upward tendency. It was perceived that there was less disposition on the part of the banks and discount houses to take even the best descriptions of paper at $1\frac{1}{2}$ per cent., and consequently a strong disposition was manifest for the open market minimum to approach more closely, if not equal that of the Bank of England. But notwithstanding that we are closer to the end of the year, the demand has fallen off during the last two days, and as there is a good supply of loanable capital seeking employment in this department, easier quotations have been current. The best descriptions of paper have been taken at as low a figure as $1\frac{1}{8}$ per cent.; but this may be considered an exceptional quotation, the more general minimum in the open market being $1\frac{1}{2}$ @ $1\frac{3}{4}$ per cent. So far as regards the best paper, the rates of discount are now as under:

	Per Cent.		Per Cent.
30 to 60 days' bills.....	1½ @ 1½	6 months' bank bills.....	2½ @ 3
3 months' bills.....	1½ @ 2	4 & 6 months' trade bills....	3 @ 3½
4 months' bank bills.....	2 @ 2½		

It is believed, however, that during next week there will be an increased demand, but it is certain to be of an exceptional, and, therefore, temporary character. When we have fairly entered upon the new year, there is no doubt that the money market will rule extremely inactive, owing to the abundant supply of money, and to the absence of fresh enterprise, more especially as regards commercial affairs.

During the present week a loan of £5,500,000 stock has been introduced here for the Portuguese Government. The amount actually reserved for this country was £3,750,000. The price of issue was £38 10s., and the rate of interest 3 per cent. per annum. The whole amount has been applied for.

There have been but few changes in the rates of discount on the Continent during the present week. The leading markets have exhibited a great want of healthy activity, and there seems to be no prospect of any speedy revival. The quotations remain unchanged. The supply of bullion held by the Bank of France now amounts to £40,038,567, while discounts are at £20,128,720. The following statement shows the bank and open market rates at the leading cities at this date, and at this period last year:

The rates of foreign exchange have not materially varied during the present week. Bills on Italy have been rather more saleable.

The bullion movements of the week have been comparatively trifling. The demand for gold for export has fallen off, but it is still sufficiently strong to take off all arrivals. Silver is very quiet at late rates. The quotations for bullion are subjoined:

The Consol market has been flat during the week, owing to the anxiety felt respecting the movements of the Fenians and to the excitement in the railway share market. The decline in prices has not, however, been important, and at the close of the week a comparatively steady tone prevails. The highest and lowest prices on each day of the week are subjoined:

American securities have ruled firm and a moderate amount of business has been transacted. As regards the leading descriptions, a slight improvement has taken place, but it is not to any important extent. United States 5 20 bonds close this evening at 72½ @ 72½, Atlantic and Great Western Railway debentures 22 @ 23, do. consolidated mortgage bonds 19½ @ 20, Erie Railway shares 48½ @ 49½, and Illinois Central 88½ @ 89½. FRIDAY, JAN. 3, 1868, P. M.

THE MONEY MARKET.—The week opened with an improved condition of the banks. In the loans there was an increase of \$154,000; while in the currency portion of the deposits there was a gain of \$3,500,000, and in legal tenders an increase of \$2,400,000. In spite of this improvement, however, there has been a closer loan market, the rate of interest upon call loans having ranged mostly at 7 per cent. on stocks and 6 per cent. on Governments.

This firmer aspect of the market appears to have been due to an increased activity in stock speculation, to the preparation of the banks for their quarterly statement of the 6th inst., and to the issue, within the last few days, of about \$5,000,000 of new stock by the Rock Island Railroad Company. The week closes, however, with more ease, and round amounts have been loaned to-day at 6 per cent. on stocks.

The very large amount of coin to come upon the market from the Treasury, equal in currency to \$10,000,000, is not unlikely to have a certain effect upon the market; inasmuch as it constitutes so much additional collateral seeking advances.

Discounts are comparatively easy. There is only a very moderate supply of prime paper on the market, which is readily taken up by the banks at 7 per cent., and on the street at 7@8 per cent.

The following are the quotations for loans of various classes:

	Per cent.		Per cent.
Call loans.....	6 @	Good endorsed bills, 3 & 4 months.....	7 @ 9
Loans on bonds & mort..	.. @ 7	do single names.....	9 @ 12
Prime endorsed bills, 2 months.....	7 @ 7½	Lower grades.....	15 @ 25

UNITED STATES SECURITIES.—The market for Governments was firm during the early part of the week. Since the middle of the week, however, there has been less demand; some of the larger dealers have shown an anxiety to sell, and prices have slightly declined. To-day a considerable amount of Five-Twenties (variously estimated at 1½ to 2 millions) was brought home by the Cuba; the bonds were freely offered this afternoon, and the price of Sixty-Twos fell off to 107½@108.

The amount of Sixes of 1867 in the hands of European investors is estimated at \$5,000,000, most of which have been presented at the Sub-Treasury for redemption. The amount paid up to the close of business to-day is about \$700,000. Foreign bankers estimate that of the amount received from abroad about two-thirds of the proceeds will be invested in other securities.

RAILROAD AND MISCELLANEOUS STOCKS.—The stock market has assumed a decidedly firmer tone. The suspension of contraction and the more hopeful tone pervading business generally has encouraged the market to co-operate with the cliques engaged in advance movements, and prices are, in most cases, higher than last week.

The chief feature in the market is the heavy fall in Rock Island shares. It turns out that while the stock was being manipulated for an advance in the price, the company had sold 49,000 shares, for the purpose of completing the road from Des Moines to Omaha. Upon this operation being discovered, the stock fell from near par to 88½; subsequently the price rallied to 95½, and closes at 94½. Michigan Southern, Cleveland and Pittsburg, Northwestern preferred and Ohio and Mississippi are at present especially firm.

The following were the closing quotations at the regular board, compared with those of the six preceding weeks:

COMMERCIAL EPITOME.

The improved tone in business circles is very general, though sufficient time has not elapsed since the holidays to admit of a very large trade.

Cotton has materially advanced with large sales. Breadstuffs have been more active for export, with a considerable advance in Wheat. Groceries have been doing fairly, and there is an improved demand for Tobacco.

Provisions have been rather dull; hog products must still be quoted unsettled. Strong efforts to stimulate a speculative rise have been made, but quite failed; the speculative support was no sooner withdrawn than prices relapsed. At the close to-day Pork was weaker for future delivery than at any previous period this season. New Mess selling for February at \$22 25. Bacon is also very unsettled—the demand for shipment has improved, but holders have advanced their prices so much as to restrict business. Cumberland closed at $10\frac{3}{4}@10\frac{3}{4}c.$, and Short Rib $11\frac{1}{4}@11\frac{1}{2}c.$ There is much dispute about the Liverpool quotation; holders asserting that it has been reduced for the sole purpose of facilitating the execution of orders here. Lard is doing rather better. At the West, the markets are reported in a very unsatisfactory state, and it is remarked that the decline in gold, the continued large receipts of hogs at the leading packing places, and the total absence of demand of importance for the product, have pretty much blocked the business, and the regular packers have generally withdrawn. Having invested their capital and their credit in pork, they now find that they are compelled to hold almost the entire stock cured, there being no demand for the product, so that the question of a long or short supply is but a secondary consideration, because in either case their hands are tied.

Hides have been quiet but firm, and Leather at the late decline is rather more active. Petroleum is lower and closed at 23½c. for Standard White in bond, and 10c. for Crude in bulk. The large decline in Philadelphia under a supply in excess of the demand, has unsettled this market. Oils have been very quiet, except a slight improvement in Linseed.

East India Goods have been generally drooping under excessive stocks of all kinds.

Metals have been quiet, but stocks of most descriptions are on a reduced scale, and the position of the trade is regarded as having assumed a more favorable aspect.

Fish have been moderately active. Hops are dull and heavy. Building Materials have been quiet, with a partial decline in prices. Tallow has been quite active.

Wool opens the New Year with a very strong feeling, reduced stocks, and a fair demand for consumption. The market for Woollen Goods is not quite so favorable as was expected, but still leaves a margin of profit to the manufacturer.

Freights were dull until yesterday when room was taken for several thousand bales Cotton to Liverpool at $\frac{3}{4}$ d. by steam, 9-16d by sail; also, 60,000 bush, grain mostly by steam closing at $6\frac{1}{2}$ d@7d. for Corn and Wheat, at which all the available room was taken up. It is now probable that about 200,000 bush. Grain per week will go forward to British ports, with increased quantities of Provisions, and some further improvement in rates is looked for.

Naval Stores have been doing better for Spirits Turpentine and Rosin ; the supplies to come forward are much reduced.

The following table, compiled from Custom House returns, shows the exports of leading articles of commerce from the port of New York since January 1, 1867. The export of each article to the several ports *for the past week* can be obtained by deducting the amount 'n the last number of the CHRONICLE from that here given:

COTTON.

FRIDAY, P. M., Jan. 3, 1868.

The receipts of cotton continue large, though less than last week, the total at all the ports this week reaching 97,842 bales (against 105,617 bales last week, 87,757 bales the previous week, and 79,176 bales three weeks since) making the aggregate receipts since September 1, this year, 846,967 bales, against 758,167 bales for the same period in 1866, being an excess this season over last season of 88,800 bales. The details of the receipts for the past week, and the corresponding week of 1866, are as follows:

* In this table, as well as in our general table of receipts, &c., we deduct from the receipts at each port for the week all received at such port from other Southern ports. For instance, each week there is a certain amount shipped from Florida to Savannah, which in estimating the total receipts must be deducted as the same shipment appears in the Florida return. We are thus particular in the statement of this fact, as some of our readers fail to understand it.

† The receipts and exports for New Orleans and Mobile are made up from telegraph returns, our mail returns not having reached us this week.

In the exports this week there is a further large increase, the total from all the ports reaching 80,946 bales, against 69,477 bales last week, and 43,466 bales the previous week. The following table furnishes the particulars of the week's shipments from all the ports:

For the corresponding week of 1866-7 the shipments from all the ports amounted to 32,927 bales, showing an increase for the week this year of 48,019 bales. The total foreign exports from the United States since September 1, 1867, now reach 440,145 bales, against 282,708 bales for the same period last year, and the stocks at all the ports are at present 334,031 bales, against 548,893 bales at the same time in 1866-7. Below we give our usual table of the movement of Cotton at all the ports since Sept. 1, showing at a glance the total receipts, exports, stocks, &c.:

We have had a strong, buoyant and somewhat excited market since our last, with an advance of 1½c. per lb. The improvement has for a basis an increased business at Liverpool, with an advance in Middling Uplands from 7½ to 7¾d., a better demand for goods at Manchester, a more active demand here from spinners and a return of speculative confidence. Speculators have bought largely not only in this market, but through the cable they have been large buyers of cotton afloat. The receipts at the ports continue liberal but not larger than was anticipated, and in view of the restored confidence in the staple, the question of current receipts has been but little considered. The sales of the week (5 days) foot up 25,831 bales of which 4,697 bales were taken by spinners, 13,910 bales for export and 7,244 bales on speculation. At the close the market is active and buoyant at the following quotations:

In the exports of Cotton this week from New York there is a decrease, the total shipments reaching only 13,571 bales, against 15,934 bales last week. Below we give our table showing the exports of Cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1867; and in the last column the total for the same period of the previous year:

* The receipts given for these ports are only the shipments from Tennessee, Kentucky, &c., not otherwise enumerated.
† These are the receipts at Apalachicola to Dec. 21, and at all the other ports of Florida to Dec. 7.

EUROPEAN AND INDIAN COTTON MARKETS.—In reference to these markets, our correspondent in London, writing under the date of December 21, states:*

LIVERPOOL, Dec. 21.—There has been a good demand for cotton during the past week, but prices continue to be influenced by heavy sales of American produce, to arrive. As regards American produce, on the spot, however, last week's quotations are supported; but Brazilian produce has fallen ½d. to ¾d.; Egyptian, ½d. to ¾d.; and East Indian, ½d. per lb. The total sales of the week amount to 68,530 bales, of which 1,670 bales are on speculation, 11,400 bales declared for export, and 55,460 bales to the trade. Annexed are the prices of American cotton at this date, and at this period last year:

The market is but moderately active, and prices without essential change.

Early in the week there was some pressure to sell, to close accounts for the end of the year, but since the first inst. the demand for export has been good, and buyers find some difficulty from the imperfect assortments of Kentucky, &c., that are offered. The sales for the week are about 600 hhds. low to medium Clarksville, mainly for export, at 6½@12½c.; and 50 hhds. new crop Virginia at 5@10½c. Seed Leaf has been without a single transaction of moment. J. S. Gans & Son, estimate the stock of seed leaf in the country as follows:

Connecticut and Massachusetts, crop of 1865	5,000 cases.
1866	14,000 do.
New York, crops of 1865 and 1866	4,000 do.
Ohio	4,000 do.
Pennsylvania, crops of 1864, '65, '66	6,000 do.
Total	33,000 cases.

Manufactured tobacco has been quiet, and the business in Spanish has been limited to 42 bales for consumption, and 18 bales in bond, for export on private terms.

* The exports in this table to European ports are made up from manifests, verified and corrected by an inspection of the cargo.

The direction of the foreign exports for the week, from the other ports, has been as follows:

From Baltimore—To Liverpool, 70 hhds. of leaf ... To Bremen, 752 hhds. leaf ... To Demerara, 4 hhds. leaf and 73 lbs. manufactured.

From Boston—To Calcutta, 400 cases.... To Turks Island and a market, 1 case
 To British Provinces, 2 boxes.
 From San Francisco—To Victoria, 45 cases To Japan, 37 cases.... To Mexico
 2 cases. To Honolulu, 6 cases and 182 pkgs.
 From Portland—To Halifax, 93 boxes.
 From New Orleans—To Bremen, 10 hhds.

MARYLAND AND OHIO.—Baltimore receipts are quite nominal, and with the recurrence of the holiday season business for all descriptions of leaf is consequently restricted; though prices are steady under light stocks in factors' hands. The limited sales effected have been within our range annexed. Inspected this week, 138 hhds., Maryland, (40 re-inspected), 50 Ohio and 1 Kentucky—total 189 hhds. Cleared same period, 752 hhds. to Bremen, 70 to Liverpool, and 4 to West Indies—total 826 hhds.

MISSOURI.—Receipts of Tobacco at St. Louis for the year 1867 have been 86,999 hhds. The stock now on hand is 816 hhds. Tobacco is one of Missouri's most important products, and we have no doubt but that she will in time stand forth as the leading tobacco growing State of the Union. Her crop for the four years, prior to the one just ended, has been as follows:

BREADSTUFFS.

FRIDAY, Jan. 3, 1868, P. M.

Business has been interrupted by the New Year holidays, but on the whole has been more active at better prices. The movement at Western markets is more liberal than a year ago. At this point the receipts of Flour have fallen off, although they have somewhat increased again towards the close. The demand was very light early in the week, but prices were very firmly supported, and yesterday, on better accounts from Liverpool, some advance took place in the low and medium grades, with considerable speculative feeling. Nothing of moment, however, was done for export, and to-day, although some holders asked more money, buyers showed no disposition to do more than supply their immediate wants at old prices.

Wheat was very sparingly offered, and throughout the week there has been a fair export demand, but parties have been about five cents apart until yesterday, when a few loads were taken by millers and exporters, at \$2 36@ \$2 39 for No. 2 Spring, and \$2 44@ \$2 45 for No. 1 do. To-day holders showed a disposition to further advance, the demand for milling and shipment being continued, the extreme views of holders were realized to a moderate extent. No. 2 Spring \$2 40, No. 1 do \$2 50, with extra Club \$2 55. A large advance has taken place in the Western markets.

Corn has arrived freely by rail, but with a very small stock in store, a good export demand, easier rates of freight, and a higher quotation from Liverpool, prices have steadily but slowly improved, and closed firm at \$1 39@ \$1 40 for New Mixed afloat, and \$1 41@ \$1 41½ for Old do. in store. The supply of New will probably increase considerably.

Oats have been quiet but closed more active, and Rye, Barley and Barley Malt nearly nominal.

LIVERPOOL, Dec. 20.—The floating trade has been quiet after an extensive business; prices in the country markets are fully maintained, but London has been dull. At to-day's market there was a fair inquiry, but it did not lead to much business. The Rochester (N. Y.) Express, Dec. 31, says:

"We are indebted to Mr. Evans for the annual statement of the amount of the cargoes weighed at the lock during the past season of navigation, from which it appears that the totals were as follows: Number of cargoes, 8,981; reported weight, 2,611,176,912 pounds; number of cargoes weighed at this lock to which additions were made, 4,375; weight, 33,047,397 pounds; total weight, 2,644,224,309; average weight of cargoes, 378,774 pounds; light boats weighed here for the first time, 233; reweighed, 47; lumber cargoes, 225. The time required to weigh a boat and get it in and out is fifteen minutes. The total of cargoes, adding those to which additions were made here, is 7,261. Number in 1866, 8,153; in 1865, 6,023; in 1864, 7,241. The weighmaster thinks that three minutes' time might be saved in weighing each cargo, by the substitution of a single span towing-path bridge in place of the present one, so that boats could be towed in and out without casting off the towing-line, and meet and pass without wedging; a widening of the canal a few feet at the south end of the weighlock, on the berme bank, is also recommended.

The lock has been in a condition to prevent its use for 22 days and 16 hours during the season; from May 6 to May 24, while putting in a new lock, and three days at another time, when there was a breakage.

GROCERIES.

FRIDAY EVENING, Jan. 4, 1868.

The Grocery Trade, like all other branches of business, has been much interrupted by the occurrence of the New Years' holidays, and the general desire to square up accounts at the end of the year. The accounts of stocks show only moderate quantities of goods on hand, with the one exception of Coffee, the stock of which is quite large. Prices are steady in all branches, and there is at the close of the week a fair prospect of a steady healthy business.

The tables of imports of the several articles, which are given in full detail under the respective heads below, are now complete for the year 1867. The totals show the following results at New York, and the amount at all the leading ports including New York.

TEA.

The demand for tea has been limited for the time, and while prices are steady we notice only a light business. The sales are 3,300 half chests green and 900 do. colored Japans.

The imports of tea this week have been only 366 packages, by steamer, from London.

The following table shows the shipments of Tea from China and Japan to the United States from June 1, 1867, to Nov. 1, the date of latest advices by mail; and importations at New York and Boston in the year 1867:

The above table includes all shipments to the United States, except 12,869 packages to San Francisco.

The indirect importation in 1867 has been at New York 17,054, and at Boston 1,715 pkgs.

COFFEE.

The market for coffee has somewhat strengthened during the week, and prices are a fraction higher, notwithstanding the large stocks. The sales have also been more liberal, amounting to 6,900 bags Rio and 1,200 Maracaibo.

The imports for the week have been 8,409 bags of Rio, 4,861 per "Agnes," and 4,048 per "Jarlen." There have come to hand also 2,680 bags of St. Domingo, and 445 of sundries.

The imports in the year 1867, and stock in first hands Dec. 31, are as follows:

SUGAR.

There was less activity in the sugar market, until since January 1st when there is a fair trade demand to report. Prices continue steady. The sales are 1,100 hhds. Cuba and Porto Rico, 4,342 boxes Havana, and 4,500 bags Pernambuco, to arrive.

The imports for the week at all the ports have been 8,779 boxes, against 9,534 last week, and 2,641 hhds. against 714 last week. The stock at New York is 25,683 boxes against 26,154, and 14,361 hhds. against 14,259 last week. The details are as follows:

HAVANA, Dec. 28th—SUGAR (CLAYED).—The Christmas festivities, together with the causes referred to in our previous issues have kept the market in a very dull condition, and for the few sales which have been effected this week 7½@8rs. per arroba for No. 12 as a basis, has been the price paid for good or new sugar.

No further engagements for future delivery of this class have been reported since our last. The receipts from the country are steadily increasing as the continuance of dry weather keeps the roads in a propitious condition, and we may therefore have a sufficient stock at market for operations on a larger scale than presently, after the New Year holidays are over.

Receipts, exports and stocks at Havana and Matanzas have been as follows:

SPICES.

The demand is confined to the immediate trade wants. Prices are however, quite steady.

FRUITS.

There is but a light business to report in foreign dried fruits, and that chiefly with the trade for immediate use. Prices have receded a little. Domestic dried fruits are also very quiet.

We annex ruling quotations of goods in first hands:

THE DRY GOODS TRADE.

FRIDAY, P. M., January 3, 1868.

Trade in dry goods has been very much restricted during the past week by the occurrence of the usual time of settling up the years business and squaring accounts. There are reports of much curtailing of expenses, and of the reduction of the size of establishments occupied by dry goods houses. While a very large number are more or less adopting the plan of doing a retail business in connection with the jobbing trade. The heavy reduction of prices consequent upon the light demand, and the heavy reduction in the raw material has had a very disastrous effect upon the profits of the last two or three years, although the failures have been but small in number. There is now no further probability of trouble, as stocks are very small in all hands, and a large number of the manufacturers are curtailing production from 10 to 25 per cent. This will have the effect to keep up prices, and give more confidence and stability to the trade. The export demand this week is only moderate.

The exports of dry goods for the week ending Dec. 31, and since January 1, 1867, and the total for the same time in 1866 and 1860 are shown in the following table:

Insurance.

UNITED STATES LIFE INSURANCE COMPANY, In the City of New York.

NO. 40 WALL STREET.

ASSETS.....\$2,300,000

New and important plans of Life Insurance have been adopted by this Company. See new Prospectus. Profits available after policies have run one year, and annually thereafter.

JOHN EADIE, President.
NICHOLAS DE GROOT, Secretary.

Sun Mutual Insurance COMPANY.

(INSURANCE BUILDINGS)

49 WALL STREET.

Incorporated 1841.

Capital and Assets,.....\$1,614,540 78

This Company having recently added to its previous assets a paid up cash capital of \$500,000, and subscription notes in advance of premiums of \$300,000, continues to issue policies of insurance against Marine and Inland Navigation Risks. No Fire Risks disconnected from Marine taken by the Company. Dealers are entitled to participate in the profits.

MOSES H. GRINNELL, President.
JOHN P. PAULISON, Vice-President.
ISAAC H. WALKER, Secretary.

The Mercantile Mutual INSURANCE COMPANY.

No. 35 WALL STREET, NEW YORK.

Assets, January 1st, 1867.....\$1,261,349

ORGANIZED APRIL, 1844.

During the past year this Company has paid to its Policy-holders,

IN CASH,
a rebate on premiums in lieu of scrip, equivalent in value to an average scrip dividend of

TWENTY PER CENT.

Instead of issuing a scrip dividend to dealers, based on the principle that all classes of risks are equally profitable, this Company makes such cash abatement or discount from the current rates, when premiums are paid, as the general experience of underwriters will warrant, and the net profits remaining at the close of the year, will be divided to the stockholders.

This Company continues to make Insurance on Marine and Inland Navigation and Transportation Risks, on the most favorable terms, including Risks on Merchandise of all kinds, Hulls, and Freight.

Policies issued making loss payable in Gold or Currency, at the Office in New York, or in Sterling, at the Office of Rathbone, Bros. & Co., in Liverpool.
