PACIFIC MAIL STEAMSHIP COMPANY'S  
THROUGH LINE

**TO CALIFORNIA,**

Touching at Mexican Ports

AND

CARRYING THE UNITED STATES MAILS FOUR  
TIMES A MONTH.

On the 1st, 9th, 16th and 24th of Each  
Month.

Leave PIER 42 NORTH RIVER, foot of Canal street  
at 12 o'clock noon, as above (except when those dates  
fall on Sunday, and then on the preceding Saturday),  
for ASPINWALL, connecting via Panama Railway  
with one of the Company's Steamships from Panama  
for SAN FRANCISCO, touching at ACAPELCO.  
Departures of 1st and 16th connect at Panama with  
steamers for SOUTH PACIFIC and CENTRAL AMER-  
ICAN PORTS. Those of the 1st touch at MANZA-  
NILLO.

One hundred pounds baggage allowed each adult.  
Baggage-masters accompany baggage through, and  
attend to ladies and children without male protec-  
tors. Baggage received on the dock the day before  
sailing, from steamboats, railroads, and passengers  
who prefer to send them down early. An experienced  
surgeon on board. Medicine and attendance free.  
For passage tickets or further information apply at  
the Company's ticket office, on the wharf, foot of  
Canal street, North River, New York.

F. R. BABY, Agent.

Company, submit the following Statement of its  
affairs on the 31st December, 1867:

Premiums received on Marine Risks,  
from 1st January, 1867, to 31st De-  
cember, 1867..... \$7,322,015 75  
Premiums on Policies not marked off  
1st January, 1867..... 2,838,109 71

Total amount of Marine Premiums.. \$10,160,125 46

No Policies have been issued upon Life  
Risks; nor upon Fire Risks discon-  
nected with Marine Risks.

Premiums marked off from 1st Janu-  
ary, 1867 to 31st December, 1867..... \$7,597,123 16

Losses paid during the  
same period..... \$4,224,364 61

Returns of Premiums and  
Expenses..... \$1,305,865 98

The Company has the following As-  
sets, viz.:

United States and State of New York  
Stock, City, Bank and other Stocks. \$6,864,485 00

Loans secured by Stocks, and other-  
wise..... 2,175,450 00

Total Amount of Assets..... \$13,108,177 11

Six per cent interest on the outstand-  
ing certificates of profits will be paid  
to the holders thereof, or their legal representatives  
on and after Tuesday the Fourth of  
February next.

Fifty per cent. of the outstanding certi-  
ficates of the issue of 1865 will be redeem-  
ed and paid to the holders thereof, or their legal  
representatives, on and after Tuesday the  
Fourth of February next, from which date  
interest on the amount so redeemable will cease.  
The certificates to be produced at the time of pay-  
ment, and cancelled to the extent paid.

A dividend of Thirty Per Cent. is  
declared on the net earned premiums  
of the Company, for the year ending 31st  
December, 1867, for which certificates will be  
issued on and after Tuesday the Seventh of April  
next.

By order of the Board,

J. H. CHAPMAN,  
Secretary

**Financial.****North Missouri Railroad**

**FIRST MORTGAGE**

**30 YEARS SEVEN PER CENT BONDS**

INTEREST PAYABLE JANUARY AND JULY,

AT THE NATIONAL BANK OF COMMERCE IN NEW YORK

The Road is completed and in operation from ST. LOUIS to BRUNSWICK, on the Missouri River, and to ATLANTA, in Northeast Missouri, 242 MILES.

The entire length of road which will be completed in NOVEMBER OF THIS YEAR, 382 1-2 MILES.

**Amount in Actual Cash Expended in Construction to date, \$11,310,000.**

The only lien upon the Road is this First Mortgage of Six Millions, and which is LESS THAN \$16,000 PER MILE.

This Road connects with the Union Pacific at Kansas City, already completed westward 350 miles, and with the Iowa Central and the Cedar Rapids Railroads in Iowa, forming by the Iowa Central a direct connection with St. Paul, and by the latter with Dubuque. It runs through the choicest agricultural and coal lands in the State of Missouri; and by its connections will have the finest and most populous portions of Iowa and Minnesota tributaries to it. The road now completed is constructed in the most substantial manner.

We recommend the above loan as an undoubted security, and are authorized to offer a limited amount of the Bonds at 83 1-2 and accrued interest. For the character of the security we refer, by permission, to R. LENOX KENNEDY, Esq., President National Bank of Commerce, New York.

Messrs. E. D. MORGAN & CO., New York.

ONE OF THE  
**BEST INVESTMENTS.**  
 ———  
 THE  
**FIRST MORTGAGE BONDS**  
 OF THE  
**UNION PACIFIC RAILROAD COMPANY.**  
 ———  
**900 MILES COMPLETED.**

A limited amount of the First Mortgage Bonds of the Union Pacific Railroad Company are offered to the public, as one of the safest and most profitable investments.

1. They are a first mortgage upon the longest and most important railroad in the country.
2. By law they can be issued to the company only as the road is completed, so that they always represent a real value.
3. Their amount is limited by act of Congress to fifty million dollars on the entire Pacific line, or an average of less than \$80,000 per mile.
4. Hon. E. D. Morgan, of the United States Senate, and Hon. Oakes Ames, of the United States House of Representatives, are the trustees for the bondholders, to see that all their interests are protected.
5. Five Government Directors, appointed by the President of the United States, are responsible to the country for the management of its affairs.
6. Three United States Commissioners must certify that the road is well built and equipped, and in all respects a first-class railway, before any bonds can be issued upon it.
7. The United States Government lends the company its own bonds to the same amount that the company issues, for which it takes a second mortgage as security.
8. As additional aid, it makes an absolute donation of 12,800 acres of land to the mile lying upon each side of the road.
9. The bonds pay six per cent in gold, and the principal is also payable in gold.
10. The earnings from the local or way business were over four million dollars last year, which, after paying operating expenses, was much more than sufficient to pay the interest. These earnings will be vastly increased on the completion of the entire line in 1869.
12. No political action can reduce the rate of interest. It must remain for thirty years—*six per cent per annum in gold*, now equal to between eight and nine per cent in currency. *The principal is then payable in gold.* If a bond, with such guarantees, were issued by the Government, its market price would not be less than from 20 to 25 per cent premium. As these bonds are issued under Government authority and supervision, upon what is very largely a Government work, they must ultimately approach Government prices. No other corporate bonds are made so secure.
13. The issue will soon be exhausted. The sales have sometimes been half a million a day, and nearly twenty millions have already been sold. About ten millions more may be offered. It is not improbable that at some time not far distant all the remainder of the bonds the company can issue will be taken by some combination of capitalists and withdrawn from the market, except at a large advance. The long time, the high gold interest, and the perfect security, must make these bonds very valuable for export.

All the predictions which the officers of this Company have made in relation to the progress and business success of their enterprise, or the value and advance in the price of their securities, have been more than confirmed, and they therefore suggest that parties who desire to invest in their bonds will find it to their advantage to do so at once.

Subscriptions will be received in New York

**At the Company's Office, No. 20 Nassau Street**

AND BY

**John J. Cisco & Son, Bankers, No. 59 Wall Street**

And by the Company's advertised agents throughout the United States.

*Bonds sent free, but parties subscribing through local agents, will look to them for their safe delivery.*

A NEW PAMPHLET AND MAP was issued October 1st, containing a report of the work to that date, and a more complete statement in relation to the value of the bonds than can be given in an advertisement, which will be sent free on application at the Company's offices or to any of the advertised agents.

**JOHN J. CISCO, Treasurer New York.**

Oct 6th, 1868.

### OUR EXTRA.

We furnish our readers with an eight page extra to-day, containing the reports in full of the Secretary of the Treasury and the Comptroller of the Currency.

### THE TREASURY REPORT.

There are three topics in the Treasury report which, during the last week, have been anxiously canvassed—the funding of the debt, the question of taxation, and the resumption of coin payments. The Secretary of the Treasury may certainly be complimented in having prepared, as his last report, a document which in lucid statement, practical wisdom and judicious suggestion, will compare favorably with any financial state paper ever issued in this country or elsewhere. In reading this paper we seem to pass over the entire period of Mr. McCulloch's Secretaryship, which forms indeed an interesting chapter in the financial history of this country. When he entered the Cabinet our finances were in the deplorable state of confusion and derangement incident to the conclusion of the war. Eight hundred millions of money had to be raised in a shorter space of time than so large a sum was ever obtained by any government in the

world. The short date Seven-Thirties, by means of which the loan was negotiated, have now been funded into long bonds, as have also the whole of the short obligations which are supposed likely to embarrass the Treasury. The funding process is just about completed, and the report before us offers, as one of its chief features, an account of the closing up of the transaction.

A second point of interest in the period of Mr. McCulloch's service of office, is the growth of our internal revenue system. Clumsy and costly, oppressive and inquisitorial it destroyed much more of the nation's wealth than it brought into the Treasury, and as it became too burdensome to be borne, it has by successive acts been so modified and improved that it compares favorably as a system with the revenue methods of other countries. Of course we are speaking from a legislative point of view, and when the administering of the revenue laws is made so pure and strict, and faithful, as to break up the whisky ring, and to stop the tobacco frauds, the improvement in our fiscal methods may be pushed still further, so as to relieve the industrial energies of the people from the direct pressure of taxation, and to let the fiscal screw press where the body politic is the least sensitive.

By far the most important part of the report before us is that discussing the currency. After showing how our irredeemable paper currency increased the cost of the war, and have added to the peace and expenditure of the Government; how it causes instability in prices, perturbation in trade, and hinderance to industrial progress; how it shakes the public credit by raising dangerous questions as to the payment of the public debt; how it gives to the rich and robs the poor, he concludes that "if our country is in a measure prosperous with such an incubus upon it, it is because it is so magnificent in extent, so diversified in climate, so rich in soil, so abundant in minerals, with a people so full of energy, that even a debased currency can only retard but not put a stop to its progress."

What is the remedy for this evil which is thus vividly set before us? On this point the reply of Mr. McCulloch is two-fold. First, he very justly says the remedy is to be found in "a reduction of the paper circulation of the country till it appreciated to the specie standard." This sound view of the subject Mr. McCulloch says he still adheres to, and he adds that the remedy was emphatically condemned by Congress, and it is now too late to return to it. At a future time we shall have something to say about this gloomy view of contraction as being condemned by Congress and impossible of readoption. Congress intended, as we have often showed, to forbid the abuses of contraction rather than to stop contraction itself or to condemn the country forever to the miseries of a redundant, depreciated, irredeemable

circulation. As there is no other remedy for redundancy but contraction, so there is no other permanent remedy than this for the depreciation and instability which redundancy brings.

The case does, however, admit of palliation. Secondly, therefore Mr. McCulloch proposes that the coin contract law should be enacted, and that another law shall be passed providing, first, that after January, 1, 1870, the green backs shall cease to be a legal tender for private debts subsequently incurred, and secondly, that after the further lapse of one year greenbacks shall cease to be legal tender for any purpose except Government dues for which they are now receivable. Thirdly, he proposes to contract the outstanding volume of the greenbacks by making them convertible at the pleasure of the holders into bonds, bearing such a rate of interest as Congress may appoint.

This proposition of the Secretary is so judicious, and would meet so many of the conditions of the case, that we wonder it has not received more attention from the daily press. When the pending trials in the Supreme Court have settled the mooted questions about the constitutionality of the legal tender law, we shall recur to this important aspect of the currency question.

#### THE COMPTROLLER OF THE CURRENCY ON CERTIFIED CHECKS.

The annual reports of the heads of the financial bureaus are annually important and voluminous, and yet somewhat inconsistent in some of their recommendations. The report of

Mr. Hulburt, though in the main an able document, wanting a clear elucidation of important current questions affecting banking, is yet open to objection on some of its conclusions. We have had repeatedly to take exception to the views of the Comptroller relative to the certification of checks, but never so decidedly as in connection with this present document.

As we view the matter, the report appears to have totally misconceived the nature and purpose of certifications as practiced by the banks of this city. The certification of a check is an affirmation by the bank on which it is drawn that the drawer is "good" for the sum specified on the order, and is regarded as binding the bank for the payment of the check. The drawer may have assets to cover the check, or he may not; and, in the latter case, the bank certifies on the understanding that his account will be made good before the close of business on the same day; these anticipatory certifications are, of course, granted only to firms of known means and credit; and the practice appears to be an almost inevitable adjunct of the present method of transacting business, especially in Wall street. A broker buys, say \$100,000 of bonds, for which he has to pay principally with money borrowed from another party, giving the bonds as collateral for the loan; he cannot procure the money until he has deposited the bonds with the lender, and yet he cannot procure the bonds until he can give the seller a satisfactory check. The seller of the bonds refuses the undorsed check of the buyer because the amount is large, and he does not sufficiently know the position of the drawer. To avoid this difficulty the buyer of the bonds asks his bank to certify his check for \$100,000 as "good," promising to deposit before the close of the day the check of the party with whom he has arranged to borrow on security of the bonds. The bank knows his affairs, has confidence in his probity, and guarantees his check; the effect being to grant him a credit for the time necessary to get the bonds, deposit them with the money lender, and place the check of the latter in the hands of the bank. The banks in making this a common practice with brokers of good standing, have an important compensation in saving the handling of an immense amount of money. The fact of the check being certified causes the receiver to

deposit it with his bank instead of presenting it for payment; and thus the trouble and time of counting so much currency is saved to both the bank on which it is drawn and that in which it is deposited, while the risk of carrying money from bank to bank is avoided. Next morning, the check is settled, through the Clearing House, without the use of a dollar of currency, the currency lying dormant in the banks instead of repeatedly changing hands. Certification is thus seen to be a very important economy of time and trouble to the banks and their customers. Without some such arrangement, indeed, it would be almost impossible to carry on the enormous daily transactions of Wall street's Banks, bankers and brokers would have to double their establishments for the purpose of turning over and over and from hand to hand the currency which, under the present joint operations of certification and Clearing House settlements, lie, undisturbed in the bank vaults, representing the transactions but not used in them, beyond the settlement of balances between banks.

The Comptroller characterises the expedient of certification as an "inflation" to the extent of about \$112,000,000. That the checks serve the functions of circulation for the day is unquestionable; but it is an error to regard them as an addition to the active circulation; for they cause, as before stated, the currency in the banks to remain inactive, instead of being turned over say twice daily. Without the use of checks there would be the same amount of business transacted as with them, except so far as operations might be curtailed by the clumsy, embarrassing and more costly method of effecting exchanges. Mr. Hulburt is literally accurate in representing the certification of checks as an extension of "credit" to the customers of the banks; but his language leads to a very mistaken conclusion, when he says that the banks thus furnish "\$112,000,000 of credit for speculation," and that "a fictitious capital of \$120,000,000 is created by means of certified checks." In the case of certification where the assets do not, at the time, stand to the drawers credit, there is of course an extension of credit; the credit, however, is but momentary; it is not independently of funds to be provided by the party to whom it is granted, but in anticipation of a deposit to be made immediately after, when the credit ceases to be such. The transaction effected through the certified check is really represented by the drawer's own means, and could have been effected equally without the certification, only by a less convenient method, as before indicated. The Comptroller's objections, if they had any force at all, would apply against the use of checks certified or uncertified. For if certification were abolished, checks would inevitably be used to about the same extent as now; the difference being that the business would be transacted only through firms of the highest credit, whose checks would pass without certification. If the certified checks are an inflation, why should not the uncertified be regarded as such? And why, according to this reasoning, should not all checking be abolished as "fictitious credit" conducive to demoralizing speculation?

The Comptroller attempts to prove more than even he himself allows in affirming that the New York banks "furnish \$70,000,000 of capital and \$112,000,000 of credit for speculation." According to this, the speculative loans, represented almost entirely by demand loans, ought to stand at \$182,000; yet, in another part of his report, he represents the demand loans as averaging only \$68,500,000; conclusively disproving the assumption that the banks afford \$112,000,000 of "credit" or "fictitious capital" through certification.

It is much to be regretted that the Comptroller, upon these hastily conceived opinions, should have undertaken the grave responsibility of recommending that "National Banks be prohibited by law \* \* \* from certifying checks to be

good which are not drawn against actually existing cash deposits standing to the credit of the drawer when the checks are made and presented." Such a course would be an unwarrantable and mischievous interference with the method of conducting business established between the banks and the public. It would accomplish no conservative purpose; would remedy no evil; would cause serious temporary embarrassment and perpetual inconvenience; and the effects would not fall alone upon the speculative interests of Wall street, but also upon a large extent of wholesale operations in commerce, where certification is found to be as necessary to the convenience of transfer as in the transactions on the Stock Exchange.

### PUBLIC DEBT OF THE UNITED STATES.

Abstract statement, as appears from the books and Treasurer's returns in the Treasury Department, on the 1st of November, and 1st of December 1868:

#### DEBT BEARING COIN INTEREST.

	November 1.	December 1.	Increase.	Decrease.
5 per cent. bonds....	\$221,588,400 00	\$221,588,400 00	\$ .....	\$ .....
6 " 1881....	283,671,300 00	283,671,300 00	.....	.....
6 " (5-20's) ..	1,602,312,250 00	1,602,570,400 00	258,150 00	.....
Total .....	2,107,577,950 00	2,107,836,100 00	258,150 00	.....

#### DEBT BEARING CURRENCY INTEREST.

	November 1.	December 1.	Increase.	Decrease.
6 per ct. (RR) bonds	\$42,194,000 00	\$44,337,000 00	\$2,143,000 00	\$ .....

[From our own Correspondent.]

LONDON, Wednesday, November 25, 1868.

During the present week business has been greatly retarded by the county elections, and, as a consequence, much quietness has prevailed in nearly all departments. There have, indeed, been some exceptions, but they have been few, the general character of trade being decidedly inactive, while but few signs of a coming improvement have as yet presented themselves to the public mind. The causes to which allusion was made last week are in force now, and it is very probable that as soon as the elections are concluded, the remark will be that the close of the year is too near to admit of any increase of business for the present. Such will, no doubt, be the case, and for that reason quietness must be expected to prevail in commercial circles for the next six weeks at least. The great caution hitherto pursued by the commercial body must be expected to continue, inasmuch as any departure from such a course would, under the existing circumstances, be deemed extremely imprudent. The next revival of activity will probably commence when preparations are being made for a supply of Spring goods; but, just in the same way that a fair degree of activity was experienced when the retail houses were laying in a stock of winter goods, so a spasm of animation may be expected to prevail when a similar operation is undergone for a supply of Spring goods. At the present time, however, it is difficult to foresee much more than a temporary improvement.

Some persons have asserted that the Bank directors ought to have raised their *minimum* rate of discount to three per cent last week, and not to have adopted a half-measure by advancing it to only 2½ per cent. The state of the money market during the present week seems, however, to suggest that the course they pursued was the more correct one, and, indeed, it is not improbable that rather than raise it to 3 per cent, it would have been better to have allowed it to remain at 2 per cent. This week choice bills, which will mature during the present year, have been discounted at 2 per cent, and three months' bills at 2½ per cent. The business of the Bank has materially fallen off, but the reduction in the amount of business done is to some extent compensated by the higher rate charged for accommodation. Had trade been active, it is quite possible that a rise to 3 per cent might have been fully justified, and would have been desirable; but as trade is almost wholly devoid of activity, a sudden rise to 3 per cent might have inspired some alarm, and checked that tendency to improvement apparent at the present time. The commercial mind might have been led to understand that foreign loans had necessitated a large withdrawal of gold from the country, and that the advance of one per cent in the rates of discount was intended to operate in preventing an outflow of the precious metals. Such, however, is by no means the case. Beyond the withdrawal of £1,000,000 for Russia there is no export demand for

gold for the Continent, and there is an almost complete absence of inquiry for silver for shipment to the East. The trade demand for money is still very quiet, and it is quite evident that in order that a rise in the bank *minimum* should, under present circumstances with regard to trade, be looked upon as a favorable feature, it should follow, and be caused by, an improvement in the general condition of business. Trade, at the present time, is so quiet that every encouragement should be given to it, and no apprehensions should be instilled into the mercantile mind that foreign loans are likely to make money dear. The foreign loans lately introduced will, of course, have some effect upon our money market, and also on our trade, because, as they are chiefly for railway purposes, some large purchases of goods necessary to the construction of railways must be made on this side. As yet the foreign loans brought forward here have not been sufficiently numerous to affect our money market very materially. The actual sums of money sent away have been small, and not until £1,000,000 was taken out of the Bank by Messrs. Baring for Russia was any effect perceptible. That heavy withdrawal induced the Directors to raise the rate of discount, but in the face of so much idle money here and at Paris, and with trade so quiet, it would seem evident that in raising the quotation only to 2½ per cent the more prudent course was adopted. The money market at the present time is characterized by much quietness, but as large sums of money will be required during the last two weeks of the year, the present quotations will undoubtedly be supported.

In the wheat trade there has been continued flatness, and a further decline of fully 1s. per quarter has taken place in the quotations. Within the last few days a heavy rain has fallen throughout the country, and the result has been most beneficial to agriculture. The wheat already planted will have, therefore, a good start, for at no former period has the time for ploughing and sowing been so favorable as during the present season. The following is the statement of imports and exports:

WHEAT.					
From—		Imports.		Exports.

#### English Market Reports—Per Cable.

The daily closing quotations in the markets of London and Liverpool for the past week, have been reported by submarine telegraph as shown in the following summary:

**London Money and Stock Market.**—Consols opened the week at 92½@ for money, and 92½@ for account, and ruled quiet at about the same rates, closing at 92½ for money and 92½@ for account. United States Five-Twenty bonds had been steadily held at a fraction lower quotation than that current the previous week. In the railway stock market we note considerable activity in the Atlantic and Great Western Consolidated Mortgage bonds, with a gain in the quotation of 4½ per cent on the opening price. Erie shares were depressed early in the week, but toward the close a better feeling was apparent. Illinois Central shares have ruled quiet and steady. Our latest despatch this evening reports the tone of the stock market easier, without quotable change, however, in prices. United States Five-Twenties bonds at Frankfurt have ruled dull and depressed throughout the entire week, closing at 78½ for the issue of 1862.

	Sat.	Mon.	Tues.	Wed.	Thu.	Fri.
Consols for money.....	92½-¾	92½	92½	92½	92½	92½
" for account.....	92½-¾	92½	92½	92½-¾	92½-¾	93½
U. S. 6's (5 20's) 1862..	74½	74½	74½	74½	74½	74½
Illinois Central shares..	96½	96	96½	96½	96½	96½
Erie Railway shares..	25½	25	26	26½	26	26½
Atl. & G. W. (consols).	37½	37½	37½	40½	41½	42

The daily closing quotations for U. S. 6's (1862) at Frankfurt were—  
Frankfurt ..... 79 79½-¾ .... 79 78½-79 78½

**Liverpool Cotton Market.**—See special report of cotton.

**Liverpool Breadstuffs Market.**—There is a better tone to report with regard to Flour and Wheat, towards the latter part of the week, but in the remaining articles in the reported list the same quietude prevails that has characterized this market for several weeks past. Flour has gained 6d. and Western Red Wheat 5d., while Corn has lost 3d., Oats 1d. and Peas 6d.

	Sat.	Mon.	Tues.	Wed.	Thu.	Fri.

## Department Reports.

### REPORT OF THE SECRETARY OF THE TREASURY.

TREASURY DEPARTMENT, December 1, 1868.

In compliance with the requirements of law, the Secretary of the Treasury has the honor to make to Congress the following report:

In his former communications the Secretary has expressed so fully his views upon the great subjects of the currency, the revenues, and the public debt, that it may be thought quite unnecessary for him again to press them upon the attention of Congress. These subjects, however, have lost none of their importance; on the contrary, the public mind during the past year has been turned to their consideration with more absorbing interest than at any former period. The Secretary will, therefore, he trusts, be pardoned for restating some of the views heretofore presented by him.

If there is any question in finance or political economy which can be pronounced settled by argument and trial, it is that inconvertible and depreciated paper money is injurious to public and private interests, a positive political and financial evil, for which there can be but one justification or excuse, to wit: a temporary necessity arising from unexpected and pressing emergency; and it follows, consequently, that such a circulation should only be tolerated until, without a financial shock, it can be withdrawn or made convertible into specie. If an irredeemable bank note circulation is no evidence of bankrupt or badly managed banking institutions, which should be deprived of their franchises, or compelled to husband and make available their resources in order that they may be prepared at the earliest day practicable to take up their dishonored obligations, why should not an irredeemable Government currency be regarded as an evidence of bad management of the national finances, if not of national bankruptcy? And why should not such wise and equal revenue laws be enacted, and such economy in the use of the public moneys be enforced, as will enable the Government either judiciously to fund, or promptly to redeem its broken promises? The United States notes, although declared by law to be lawful money, are, nevertheless, a dishonored and disreputable currency. The fact that they are a legal tender, possessing such attributes of money as the statute can give them, adds nothing to their real value, but makes them all the more dishonorable to the Government, and subversive of good morals. The people are compelled to take as money what is not money; and becoming demoralized by its constantly changing value, they are in danger of losing that sense of honor in their dealings with the Government and with each other which is necessary for the well-being of society. It is vain to expect on the part of the people a faithful fulfilment of their duties to the Government as long as the Government is faithless to its own obligations; nor will those who do not hesitate to defraud the public revenues long continue to be scrupulous in their private business. Justifiable and necessary as the measure was then regarded, it is now apparent that an unfortunate step was taken when irredeemable promises were issued as lawful money; and especially when they were made a valid tender in payment of debts contracted when specie was the legal as well as the commercial standard of value. The legal-tender notes enabled debtors to pay their debts in a currency largely inferior to that which was alone recognized as money at the time they were incurred, and thus the validity of contracts was virtually impaired. If all creditors had been compelled by law to pay into the public treasury fifty per cent., or ten per cent., or, indeed, any portion of the amounts received by them from their debtors, such a law would have been condemned as unequal and unjust; and yet the effect of it would have been to lessen, to the extent of the receipts from this source, the necessity for other kinds of taxation, and thus to relieve in some measure the class unjustly, because unequally taxed. By the legal-tender acts a portion of the property of one class of citizens was virtually confiscated for the benefit of another, without an increase thereby of the public revenues, and consequently without any compensation to the injured class. There can be no doubt that these acts have tended to blunt and deaden the public conscience, nor that they are chargeable, in no small degree, with the demoralization which so generally prevails.

The economical objections to these notes as lawful money—stated at length in previous reports of the Secretary—may be thus briefly restated. They increase immensely the cost of the war, and they have added largely to the expenses of the Government since the restoration of peace; they have caused instability in prices, unsteadiness in trade, and put a check upon judicious enterprises; they have driven specie from circulation and made it merchandise; they have sent to foreign countries the product of our mines, at the same time that our European debt has been steadily increasing, and has now reached such magnitude as to be a heavy drain upon the national resources, and a serious obstacle in the way of a return to specie payments; they have shaken the public credit by raising dangerous questions in regard to the payment of the public debt; in connection with high taxes (to the necessity for which they have largely contributed) they are preventing ship building, and thereby the restoration of the commerce which was destroyed by the war; they are an excuse for (if indeed they do not necessitate) protective tariffs, and yet fail, by their fluctuating value, to protect the American manufacturer against his foreign competitor; they are filling the coffers of the rich, but, by reason of the high prices which they create and sustain, they are almost intolerable to persons of limited incomes. The language of one of the greatest men of modern times, so often, but not too often, quoted, is none too strong in its descriptions of the injustice and the evils of an inconvertible currency:

"Of all the contrivances for cheating the laboring classes of mankind, none has been more effectual than that which deludes them with paper money. Ordinary tyranny, oppression, excessive taxation—these bear lightly on the happiness of the mass of the community compared with a fraudulent currency and the robberies committed by depreciated paper. Our own history has recorded for our instruction enough, and more than enough, of the demoralizing tendency, the injustice, and the intolerable oppression, on the virtuous and well disposed, of a degraded paper currency authorized or in any way countenanced by Government."

The experience of all nations that have tried the experiment of inconvertible paper money has proved the truth of the eloquent words of Mr. Webster. If our country is in a measure prosperous with such an incubus upon it, it is because it is so magnificent in extent, so diversified in climate, so rich in soil, so abundant in minerals, with a people so full of energy, that even a debased currency can only retard, but not put a stop to its progress.

The Secretary still adheres to the opinion so frequently expressed by him, that a reduction of the paper circulation of the country until it appreciated to the specie standard was the true solution of our financial problem. But as this policy was emphatically condemned by Congress, and it is now too late to return to it, he recommends the following measures as the next best calculated to effect the desired result.

Agreements for the payment of coin seem to be the only ones, not contrary to good morals, the performance of which cannot be enforced in the courts. "Coin contracts" executed before the passage of the legal-tender acts, as well as those executed since, are satisfied in all the States except California, by the payment of the amounts called for in depreciated notes. This shackle upon commerce, this check upon our national progress, this restriction upon individual rights, should no longer be continued. If it be admitted that the condition of the country during the war, and for a time after its close, created a necessity for laws and decisions making promissory notes (fluctuating in value according to the result of battles and of speculative combinations) the medium in which contracts should be discharged, this necessity no longer exists. Steps should now be taken to give stability to business and security to enterprise; and to this end specific contracts to be executed in coin should at once be legalized. Perhaps no law could be passed which would be productive of better results with so little private or public inconvenience. Such a law would simply enable the citizen to do what the Government is doing in its receipts for customs, and in the payment of its bonded debt; it would merely authorize the enforcement of contracts voluntarily entered into, according to their letter. The effect of such a law would be to check the outflow of specie to other countries, by creating a necessity for the use of it at home; to encourage enterprises extending into the future, by removing all uncertainty in regard to the value of the currency with which they are to be carried on. Such a law

would remove a formidable embarrassment in our foreign trade, would familiarize our people again with specie as the standard of value, and show how groundless is the apprehension so generally existing, that a withdrawal of depreciated notes or the appreciation of those notes to par, would produce a scarcity of money, by proving that specie, expelled from the country by an inferior circulating medium, will return again when it is made the basis of contracts, and is needed in their performance. Business is now necessarily speculative because the basis is unreliable. Currency, by reason of its uncertain future value, although usually plentiful in the cities, and readily obtained there at low rates on short time, with ample collaterals, is comparatively scarce and dear in the agricultural districts, where longer loans on commercial paper are required. Prudent men hesitate both to lend or to borrow for any considerable period, by reason of their inability to determine the value of the medium in which the loans are to be paid. With currency now worth seventy cents on the dollar, and which within six months may advance to eighty, or decline to sixty, is it strange that the flow is to the business centres, where it can be loaned "on call," leaving the interior without proper supplies, at reasonable rates, for moving the crops and conducting other legitimate business? Is it strange that, in such an unsettled condition of the currency, gambling is active while enterprise halts, trade stagnates, and distrust and apprehension exist in regard to the future? It is not supposed that such a measure as is recommended will cure the financial evils which now afflict the country, but it will be a decided movement in the right direction, and the Secretary indulges the hope that it will receive the early and favorable consideration of Congress.

The legal-tender acts were war measures. By reference to the debates upon their passage, it will be perceived that, by all who advocated them, they were expected to be temporary only. It was feared that irredeemable Government notes, in the unfortunate condition of the country, could only be saved from great depreciation by being made a legal tender—the great fact not being sufficiently considered, that by possessing this character, their depreciation would not be prevented, but merely disguised. Hence it was declared that they should be "lawful money and a legal tender in payment of all debts, public or private, within the United States, except duties on imports and interest on the public debt." They were issued in an emergency for which it then seemed that no other provision could be made. They were, in fact, a forced loan, justified only by the condition of the country, and they were so recognized by Congress and the people. By no member of Congress and by no public journal was the issue of these notes as lawful money advocated of any other ground than that of necessity; and the question arises, should they not now, or at an early day, be divested of the character which was conferred upon them in a condition of the country so different from the present. The Secretary believes that they should, and he therefore recommends, in addition to the enactment by which contracts for the payment of coin can be enforced, that it be declared, that after the first day of January, eighteen hundred and seventy, United States notes shall cease to be a legal tender in payment of all private debts subsequently contracted; and that after the first day of January, eighteen hundred and seventy-one, they shall cease to be a legal tender on any contract, or for any purpose whatever, except Government dues, for which they are now receivable. The law should also authorize the conversion of these notes, at the pleasure of the holders, into bonds, bearing such rate of interest as may be authorized by Congress on the debt into which the present outstanding bonds may be funded. The period for which they would continue to be a legal tender would be sufficient to enable the people and the banks to prepare for the contemplated change and the privilege of their conversion would save them from depreciation. What has been said by the Secretary in his previous reports on the pernicious effects upon business and the public morals of inconvertible legal tender notes, and what is said in this report upon the advantages which would result from legalizing coin contracts, sustain this recommendation. It may not be improper, however, to suggest another reason for divesting these notes of their legal tender character by legislative action. Although the decisions of the courts have been generally favorable to the constitutionality of the acts by which they were authorized, grave doubts are entertained by many of the ablest lawyers of the country as to the correctness of these decisions; and it is to be borne in mind that they have not yet been sustained by the Supreme Court of the United States.

The illustrious lawyer and statesman, whose language upon the subject of irredeemable paper money has been quoted, in the Senate of the United States, on the twenty-first day of December, eighteen hundred and thirty-six, expressed the following opinion:

"Most unquestionably there is no legal tender in this country, under the authority of this Government or any other, but gold and silver, either the coinage of our own mints or foreign coins, at rates regulated by Congress. This is a constitutional principle, perfectly plain, and of the very highest importance. The States are expressly prohibited from making anything but gold and silver a legal tender in payment of debts, and although no such express prohibition is applied to Congress, yet, as Congress has no power granted to it in this respect but to coin money and to regulate the value of foreign coins, it clearly has no power to substitute paper or anything else for coin as a tender in payment of debts and in discharge of contracts. Congress has exercised this power fully in both its branches. It has coined money, and still coins it; it has regulated the value of foreign coins, and still regulates their value. The legal tender, therefore, the constitutional standard of value, is established, and cannot be overthrown. To overthrow it would shake the whole system."

It is by no means certain that the Supreme Court will differ from Mr. Webster upon this question, and no one can fail to perceive how important it is that the legislation recommended should precede a decision (from which there can be no appeal) that United States notes are not, under the Federal Constitution, a legal tender.

The receipts from customs for the last three years have been as follows:

For the fiscal year ending June 30, 1866.....	\$179,945,651 58
For the fiscal year ending June 30, 1867.....	176,417,810 88
For the fiscal year ending June 30, 1868.....	164,464,599 56

While it appears from these figures that the customs receipts since the commencement of the fiscal year 1865 have been, in a revenue point of view, entirely satisfactory, the question naturally arises, what do these large receipts, under a high tariff, indicate in regard to our foreign trade and to our financial relations with foreign nations.

It is impossible to ascertain with precision the amount of our securities held in Europe, nor is there any perfectly reliable data for ascertaining, even, what amount has gone there annually since the first bonds were issued for the prosecution of the late war. In his report of 1866, the Secretary estimated the amount of United States securities of different kinds, including railroad and other stocks, held in Europe, at \$600,000,000. He soon after became satisfied that this estimate was too low, by from one hundred to one hundred and fifty millions. It would be safe to put the amount so held at the present time, exclusive of stocks, at eight hundred and fifty millions of dollars, of which not less than six hundred millions are United States bonds, nearly all of which have left the United States within the last six years. The amount is formidable, and little satisfaction is derived from the consideration that these securities have been transferred in payment of interest and for foreign commodities; and just as little from the consideration that probably not over five hundred millions of dollars in gold values have been received for these eight hundred and fifty millions of debt. In this estimate of our foreign indebtedness, railroad and other stocks are not included, as they are not a debt, but the evidence merely of the ownership of property in the United States. Fortunately, for some years past individual credits have been curtailed, and our foreign and domestic trade, in this particular, has not been unsatisfactory. In addition, then, to the stocks referred to and the individual indebtedness, of the amount of which no accurate estimate can be made, Europe holds not less than eight hundred and fifty millions of American securities, on nearly all of which interest, and on the greater part of which interest in gold, is being paid. Nor, under the present revenue systems, and with a depreciated paper currency, is the increase of our foreign debt likely to be stayed. With an abundant harvest, and a large surplus of agricultural products of all descriptions, United States bonds are still creating, to no small extent, the exchange with which our foreign balances are being adjusted. We are even

now increasing our debt to Europe at the rate of sixty or seventy millions of dollars per annum in the form of gold-bearing bonds.

The gold and silver product of California and the Territories since 1848 has been upwards of thirteen hundred millions of dollars. Allowing that one hundred millions have been used in manufactures, and that the coin in the country has been increased to an equal amount, the balance of this immense sum—eleven hundred millions—has gone to other countries in exchange for their productions. Within a period of twenty years, in addition to our agricultural products, and to our manufactures, which have been exported in large quantities, we have parted with eleven hundred millions of dollars of the precious metals, and are, nevertheless, confronted with a foreign debt of some eight hundred and fifty millions, which is steadily increasing; and all this has occurred under tariffs in a great degree framed with the view of protecting American against foreign manufacturers. But this is not all. During the recent war, most of our vessels engaged in the foreign trade were either destroyed by rebel cruisers or transferred to foreigners. Our exports, as well as our imports, are now chiefly in foreign bottoms. The carrying trade between the United States and Europe is almost literally in the hands of Europeans. Were it not for the remnant of ships still employed in the China trade, and the stand we are making by the establishment of a line of steamers on the Pacific, the coastwise trade, which is retained by the exclusion of foreign competition, would seem to be about all that can, under existing legislation, be relied upon for the employment of American shipping.

There are many intelligent persons who entertain the opinion that the country has been benefitted by the transfer of our bonds to Europe, on the ground that capital has been received in exchange for them, which has been profitably employed in the development of our national resources; and that it matters little whether the interest upon the debt is received by our own people or by the people of other countries. This opinion is the result of misapprehension of facts, and is unsound in principle. It is not to a large extent true that capital, which is being used in developing the national resources, has been received in exchange for the bonds which are held in Europe. While many articles, such as railroad iron, machinery, and raw materials, used in manufacturing—the value of which to the country is acknowledged—have been so received, a large proportion of the receipts have been of a different description. Our bonds have been largely paid for in articles for which no nation can afford to run in debt—for articles which have neither stimulated industry nor increased the productive power of the country, which have in fact added nothing to the national wealth. A reference to the custom-house entries will substantiate the correctness of these statements. Two-thirds of the importations of the United States consist of articles which, in economical times, would be pronounced luxuries. The war and a redundant currency have brought about unexampled extravagance, which can only be satisfied by the most costly products of foreign countries. No exception could be taken to such importations, if they were paid for in our own productions. This, unfortunately, is not the fact. They are annually swelling our foreign debt, without increasing our ability to pay it. How disastrous such a course of trade, if long continued, must be, it requires no spirit of prophecy to predict.

Nor is it an unimportant matter that the interest upon a large portion of our securities is received by citizens of other countries instead of our own. If the interest upon a public debt is paid out where the taxes to provide for it are collected, the debt, although a burden upon the mass of tax-payers who are not holders of securities, may be so managed as not to be a severe burden upon the nation. The money which goes into the Treasury by means of taxes will flow out again into the same community in the payment of interest; and were it not for the expenses attending it, the process would not, in a purely economical view, be an exhausting one. If the bonds of the United States were equally distributed among the people of the different States, there would be less complaint of the debt than is now heard. Anti-tax parties will attain strength only in those States in which few bonds are held. If the people of the West are more sensible of the burdens of Federal taxation than are those of the Eastern States, it is because they are not holders to the same extent of national securities. This inequality cannot, of course, be prevented by legal or artificial processes. The securities will be most largely held where capital is the most abundant; and they will be more equally distributed among the respective States—if not among the people—as the new States approach the older ones in wealth.

These manifest truths indicate how important it is that the debt of the United States should be a home debt, so that the money which is collected for taxes may be paid to our own people in the way of interest. In fact, a large national debt, to be tolerable, must of necessity be a home debt. A nation that owes heavily must have its own people for creditors. If it does not, the debt will be a dead weight upon its industry, and will be quite likely to force it eventually into bankruptcy. The United States are not only able to pay the interest on their debt, but to set a good example to other nations by steadily and rapidly reducing that debt. What is now required, as has been already intimated, are measures which will tend not only to prevent further exportation of our bonds, and in the regular course of trade to bring back to the country those that have been exported, but which will also tend to restore those important interests that are now languishing, as the result of the war and adverse legislation. The first and most important of these measures are those which shall bring about, without unnecessary delay, the restoration of the specie standard. The final difficulties under which the country is laboring may be traced directly to the issue and continuance in circulation of irredeemable promises as lawful money. The country will not be really and reliably prosperous until there is a return to specie payments. The question of a solvent, convertible currency underlies all other financial and economical questions. It is, in fact, a fundamental question; and until it is settled, and settled in accordance with the teachings of experience, all attempts at other financial and economical reforms will either fail absolutely or be but partially successful. A sound currency is the life-blood of a commercial nation. If this is debased, the whole current of its commercial life must be disordered and irregular. The starting point in reformatory legislation must be here. Our debased currency must be retired or raised to the par of specie, or cease to be lawful money, before substantial progress can be made with other reforms.

Next in importance to the subject of the currency is that of the revenue. Taxes are indispensable for the support of the Government, for the maintenance of the public credit and the payment of the public debt. To tax heavily, not only without impoverishing the people, but without checking enterprise or putting shackles upon industry, requires the most careful study, not only of the resources of the country and its relations with other nations, but also of the character of the people as affected by the nature of their institutions. While much may be learned by the study of the revenue systems of European nations, which have been perfected by years of experience and the employment of the highest talent, it must be obvious that these systems must undergo very considerable modifications before they will be fitted to the political and physical condition of the United States. In a popular government like ours, where the people virtually assess the taxes, as well as pay them, the popular will, if not the popular prejudice, must be listened to in the preparation of revenue laws. Justice must, in some instances, yield to expediency; and some legitimate sources of revenue may be unavailable because a resort to them might be odious to a majority of tax-payers. The people of the United States are enterprising and self-reliant. Most of them are the "architects of their own fortunes;" few the inheritors of wealth. Engaged in various enterprises, with constantly varying results, and in sharp competition with each other, they submit reluctantly to inquisitions of tax-gatherers, which might not be obnoxious to people less independent, and living under less liberal institutions. Then, too, the United States are a new country, of large extent and diversified interests; with great natural resources, in the early process of development. Not only may systems of revenue which are suited to England, or Germany, or France, be unsuited to this country, but careful and judicious observation and study are indispensable to the preparation of tax bills suited to the peculiar interests of its different sections. It was with a view of supplying Congress with such information as was needed to secure the passage of equal and wise excise and tariff laws, which would yield the largest revenue with the least oppression and inconvenience to the people, that a revenue commission was created in 1865. The creation of this commission was the first practical movement towards a careful examination of the business and resources of the country, with a view to the adoption of a judicious revenue system. The reports of this commission were interesting

and valuable, and they exhibited so clearly the necessity for further and more complete investigations, that by the act of July 13, 1866, the Secretary of the Treasury was authorized to appoint an officer in his department, to be styled the special commissioner of revenue, whose duty it should be "to inquire into all the sources of national revenue, and the best method of collecting the revenue; the relation of foreign trade to domestic industry; the mutual adjustment of the systems of taxation by customs and excise, with a view of insuring the requisite revenue with the least disturbance or inconvenience to the progress of industry and the development of the resources of the country, etc. Under this act Mr. David A. Wells was appointed special commissioner of the revenue. With what energy and ability he has undertaken the very difficult duties devolved upon him has been manifested by the reports which he has already submitted to Congress. That which accompanies, or will soon follow this communication, will prove more fully than those which have preceded it have done, the importance of the investigations in which he is engaged, and the judicious labor which he is bestowing upon them. The facts which he presents, and the recommendations based upon them, are entitled to the most careful consideration of Congress. These reports of the Commissioner are so complete that they relieve the Secretary from discussing elaborately the questions of which they treat. His remarks, therefore, upon the internal revenues and the tariff will be general and brief.

The following is a statement of receipts from internal revenues for the last three fiscal years:

For the year ending June 30, 1866.....	\$399,226,813 42
For the year ending June 30, 1867.....	266,627,537 43
For the year ending June 30, 1868.....	191,087,589 41

It thus appears that the internal revenue receipts for the year ending June 30, 1867, fell below the receipts for the year ending June 30, 1866, \$13,199,275 99, and that the receipts for the year ending June 30, 1868, fell short of the receipts for 1867, \$74,939,948 02. The receipts for the first four months of the present fiscal year were \$18,736,348 33. If the receipts for these months are an index of those for the remaining eight, the receipts for the present fiscal year will be \$146,209,044.

This large reduction of internal revenue receipts is attributable both to inefficient collections and to a reduction of taxes. It is quite obvious that the receipts from customs cannot be maintained without an increase of exports or of our foreign debt. If the receipts from customs should be diminished, even with a large reduction of the expenses of the Government, our internal revenues must necessarily be increased. The first thing to be done is to introduce economy into all branches of the public service, not by reduced appropriations to be made good by "deficiency bills," but by putting a stop to all unnecessary demands upon the Treasury. There is no department of the Government which is conducted with proper economy. The habits formed during the war are still strong, and will only yield to the requirements of inexorable law. The average expenses of the next ten years for the civil service ought not to exceed forty millions of dollars per annum. Those of the War Department, after the bounties are paid, should be brought down to thirty-five millions of dollars, and those of the Navy to twenty millions. The outlays for pensions and Indians cannot for some years be considerably reduced, but they can doubtless be brought within thirty millions. The interest on the public debt when the whole debt shall be funded, at an average rate of interest of five per cent., will amount to one hundred and twenty-five millions, which will be reduced with the annual reduction of the principal.

When the internal revenue and tariff laws shall be revised so as to be made to harmonize with each other, it is supposed that three hundred millions can annually be realized from these sources, without burdensome taxation. How much shall be raised from each can be determined when the whole subject of revenue shall be thoroughly investigated by Congress, with the light shed upon it by Commissioner Wells in his exhaustive report of the present year. The Secretary does not doubt, however, that the best interests of the country will be subserved by a reduction of the tariff and an increase of excise duties.

According to this estimate, the account would stand as follows:

Receipts from customs and internal revenues.....	\$300,000,000
Expenditures for the civil service.....	\$40,000,000
Expenditures by the War Department.....	35,000,000
Expenditures by the Navy Department.....	20,000,000
Expenditures for pensions and Indians.....	30,000,000
Expenditures for interest on the public debt.....	125,000,000
Total.....	\$250,000,000

Leaving, as an excess of receipts, \$50,000,000 to be applied to the payment of the principal of the debt. If the growth of the country should make an increase of expenditures necessary, this increase will, by the same cause, be provided for by increased receipts under the same rate of taxation; and, as it is to be hoped that the regular increase of the revenues, without an increase of taxation, resulting from the advance of the country in wealth and population, will be greater than the necessary increase of expenses, there will be a constantly increasing amount, in addition to that arising from a decrease of interest, to be annually applied to the payment of the debt. If large additional expenditures should be unavoidable, they should at once be provided for by additional taxes. What is required, then, at the present time, is a positive limitation of the annual outlays to three hundred millions of dollars, including fifty millions to be applied to the payment of the principal of the debt, and such modifications of the revenue laws will secure this amount, without unwise restrictions upon commerce, and with the least possible oppression and inconvenience to the tax-payers. In the foregoing estimates of resources, miscellaneous receipts and receipts from sales of public lands are omitted. The miscellaneous receipts heretofore have been derived from sales of gold and of property purchased by the War and Navy Departments during the war, and no longer needed. On a return to specie payments, there will be no premiums on coin, very little Government property will hereafter be sold, and under the homestead law, and with liberal donations of the public domain, which are likely to be made as heretofore, no considerable amount can be expected from lands. Whatever may be received from these sources will doubtless be covered by miscellaneous expenses, of which no estimate can be made.

The Act of March 31, 1868, exempting from taxes nearly all the manufactures of the country other than distilled spirits, fermented liquors, and tobacco, was sudden and unexpected. It not only deprived the Treasury of an immense revenue, but the reduction was so great as to leave an impression on the public mind that it would be only temporary, and that a tax in some degree equivalent to that which was removed would of necessity soon be resorted to. It is, perhaps, for this reason that this measure has failed to give relief to the public by a diminution of prices, and has benefited manufacturers rather than consumers. The frequent and important changes which have been made in the internal revenue laws, the ease with which exemptions from taxation have been obtained, and the suddenness with which taxes have been greatly augmented or reduced, have constituted one of the greatest evils of the system. Sudden changes in the revenue laws are not only destructive of all business calculations, but they excite—not unreasonably—a feeling of discontent and a sense of injustice among the people, most unfavorable to an efficient collection of taxes. While it is admitted that, in a new and growing country like ours, modifications of the taxes will be frequently necessary, some definite policy should at once be inaugurated in regard to our internal revenues, the general principles of which should be regarded as finally established.

Assuming that the receipts from customs will be reduced by a reduction of duties, or by the effects of a return to specie payments upon importations under the present tariff, and that, consequently, there must be an increase of internal taxes, there are three sources of revenue which are likely to be considered.

First. An increase of taxes upon distilled spirits.

The idea of deriving the bulk of the revenue from this article is a very popular one; and even our unfortunate experience has only partially convinced the public of its impossibility. The late exorbitant tax on distilled spirits, intended, perhaps, not merely as a revenue measure, but as an encouragement to temperance, proved to be the most demoralizing tax ever

imposed by Congress, corrupting both the manufacturers and the revenue officers, and familiarizing the people with stupendous violations of the law. The restoration of it, or any considerable increase of the present tax, would lead to a repetition of the frauds which have brought the internal revenue system into such utter disgrace.

Second. A restoration of the tax on manufacturers abolished in March last.

The objections to the restoration of this tax are, that it would indicate vacillation on the part of Congress, and that this tax, principally on account of numerous exemptions, was partial and unjust. It is also apparent that, if restored, it would fail to be permanent by reason of the persistent and united hostility of a class of citizens influential and powerful, and whose influence and power are rapidly increasing.

Third. An increased and uniform tax on sales; and this the Secretary respectfully recommends.

Under the present law, wholesale and retail dealers in goods, wares, and merchandise of foreign or domestic production, wholesale and retail dealers in liquors, and dealers in tobacco, are subject to a similar but unequal tax upon sales. This inequality should be removed, and a tax levied upon all sales sufficient, with the revenues from other sources, to meet the wants of the Government. The reasons in favor of a tax upon sales are, that it could be levied generally throughout the country, and would not be liable to the imputation of class legislation; that it would be so equally distributed as not to bear so oppressively as other taxes upon individuals or sections; and that no depression of one branch of industry, which did not injuriously affect the business of the entire country, could greatly lessen its productiveness.

As has been already stated, the receipts from customs for the fiscal year, ending June 30, 1866, were, \$179,046,651 58; for the year ending June 30, 1867, \$176,417,810 88; and for the last fiscal year, \$164,464,599 56. These figures show that the tariff has produced large revenues, although it is in no just sense a revenue tariff. In this respect it has exceeded the expectations of its friends, if, indeed, it has not disappointed them. It has not checked importations, and complaint is made that it has not given the anticipated protection to home manufactures—not because it was not skillfully framed to this end, but because an inflated currency—the effect of which upon importations was not fully comprehended—has, in a measure, defeated its object. It has advanced the prices of dutiable articles, and, by adding to the cost of living, has been oppressive to consumers without being of decided benefit to those industries in whose interest it is regarded as having been prepared. In his last report, the Secretary recommended the extension of specific duties, but did not recommend a complete revision of the tariff, on the ground that this work could not be intelligently done as long as business was subject to constant derangement by an irredeemable currency. The same difficulty still exists, but as decided action upon the subject of the currency ought not to be longer postponed, the present may not be an unfavorable time for a thorough examination of the tariff. It is obvious that a revision of it is required, not only to relieve it of incongruities and obscurity, and to harmonize it with excise taxes and with our agricultural and commercial interests, but also to adapt it to the very decided change which must take place in the business of the country upon the restoration of the specie standard. Large revenues are now derived from customs, because a redundant currency produces extravagance, which stimulates importations. If the currency were convertible, and business were regular and healthy, the tariff would be severely protective, if not in many instances prohibitory. Indeed, of some valuable articles it is prohibitory already.

There will be in the future, as there have been in the past, widely different opinions upon this long vexed and very important subject; but the indications are decided that the more enlightened sentiment of the country demands that the tariff shall hereafter be a tariff for revenue and not for protection, and that the revenues to be derived from it shall be no larger than, in connection with those received from other sources, will be required for the economical administration of the Government, the maintenance of the public faith, and the gradual extinguishment of the public debt. While the country is not at present, and may not be for many years to come, prepared for the abrogation of all restrictions upon foreign commerce, it is unquestionably prepared for a revenue tariff. The public debt is an encumbrance upon the property of the nation, and the taxes, the necessity for which it creates, by whatever mode and from whatever sources collected, are at last a charge upon the consumers. Taxes should not, therefore, be increased, nor will the tax-payers permit them to be permanently increased, for the benefit of any interest or section. Fortunately, or, unfortunately, as the question may be regarded from different standpoints, the necessities of the Government will be such for many years that large revenues must be derived from customs, so that a strictly revenue tariff must incidentally benefit our home manufactures. According to the estimate made by the Secretary, an annual revenue of three hundred millions will be required to meet the necessary demands upon the Treasury, and for a satisfactory reduction of the public debt. How much of this amount shall be derived from customs it will be for Congress to determine. In examining this difficult question, the magnitude of our foreign debt, and the necessity not only of preventing its increase, but of rapidly reducing it, must be kept steadily in view. It may be necessary that a large portion of our bonds now held in Europe be taken up with bonds bearing a lower rate of interest, payable in some European city, in order that they may be less likely to be returned to the United States at unpropitious times. Whether this is accomplished or not, it is of the last importance that our tax laws, and especially the tariff, should be so framed as to encourage exports and enlarge our commerce with foreign nations, so that balances may be in our favor, and the interest, and in due time the principal, of our foreign debt may be paid by our surplus productions. Many of the investigations of the Revenue Commissioner have been made with the view of furnishing Congress with the data necessary for a thorough examination and a wise determination of this most important question, and it is fortunate that the subsidence of political excitement removes many of the difficulties heretofore in the way of an impartial consideration of it.

The public debt on the 1st day of November, 1867, amounted to \$2,491,504,450, and consisted of the following items:

Debt bearing coin interest.....	\$1,778,110,991 80
Debt bearing currency interest.....	426,768,640 00
Matured debt not presented for payment.....	18,237,538 83
Debt bearing no interest.....	402,385,677 39

Total.....\$2,625,502,848 02

Cash in the Treasury.....133,998,398 02

Amount of debt less cash in the Treasury.....\$2,491,504,450 00

On the first day of November, 1868, it amounted to \$2,527,129,552 82, and consisted of the following items:

Debt bearing coin interest.....	\$2,107,577,950 00
Debt bearing currency interest.....	114,519,000 00
Matured debt not presented for payment.....	9,753,723 64
Debt bearing no interest.....	409,151,898 42

Total.....\$2,641,002,572 86

Cash in the Treasury.....113,873,019 24

Amount of debt less cash in the Treasury.....\$2,527,129,552 82

By a comparison of these statements it appears that the debt, between the first day of November, 1867, and the first day of November, 1868, increased \$35,625,102 82. Of this increase, \$24,152,000 is chargeable to the Pacific railroads, and \$7,200,000 to the purchase of Russian America. Within the same period there was paid for bounties \$44,060,515, and at least \$4,000,000 for interest on compound and seven three-tenth notes, which had accrued prior to the first of November, 1867. If these extraordinary advances and payments had not been made, the receipts would have exceeded the expenditures \$43,787,412 18. Considering the heavy reduction of internal taxes made at the last session of Congress, and the large expenditures which have attended the military operations against the Indians on the frontier, and the maintenance of large forces at expensive points in the Southern States, this statement of the amount of the debt cannot be regarded an unsatisfactory one. The bounties will, it is expected, be entirely paid within the next three months, and very little interest, except that which accrues upon the funded debt, is here-

after to be provided for. Should there be henceforth no extraordinary expenditures, and no further donations of public moneys in the form of bounties or of additional subsidies to railroad companies—with proper economy in the administration of the General Government, and with judicious amendments of the revenue laws, and proper enforcement thereof, the public debt, without oppressive taxation, can be rapidly diminished, and easily extinguished within the period heretofore named by the Secretary.

The ability of the United States to maintain their integrity against insurrection, as well as against a foreign enemy, can no longer be doubted. The question of their ability, under democratic institutions, to sustain a large national debt is still to be decided. That this question should be affirmatively settled, it is, in the opinion of the Secretary, of the highest importance that the tax-paying voters should be encouraged by the fact that the debt is in the progress of rapid extinguishment, and is not to be a permanent burden upon them and their posterity. If it be understood that this debt is to be a perpetual incumbrance upon the property and industry of the nation, it is certainly to be feared that the collection of taxes necessary to pay the interest upon it may require the exercise of power by the Central Government, inconsistent with republicanism, and dangerous to the liberties of the people. The debt must be paid. Direct repudiation is an impossibility; indirect repudiation, by further issues of legal-tender notes, would be madness. To insure its payment without a change in the essential character of the Government every year should witness a reduction of its amount and a diminution of its burdens. The Secretary is confident that he expressed the sentiments of the intelligent tax-payers of the country when he said in his report of 1865:

"The debt is large, but if kept at home, as it is desirable it should be, with a judicious system of taxation, it need not be oppressive. It is, however, a debt. While it is capital to the holders of the securities, it is still a national debt, and an encumbrance upon the national estate. Neither its advantages nor its burdens are or can be shared or borne equally by the people. Its influences are anti-republican. It adds to the power of the Executive by increasing Federal patronage; it must be distasteful to the people, because it fills the country with informers and tax-gatherers. It is dangerous to the public virtue, because it involves the collection and disbursement of vast sums of money, and renders rigid national economy almost impracticable. It is, in a word, a national burden, and the work of removing it, no matter how desirable it may be for individual investment, should not long be postponed.

"As all true men desire to leave to their heirs unincumbered estates, so should it be the ambition of the people of the United States to relieve their descendants of this national mortgage. We need not be anxious that future generations shall share the burden with us. Wars are not at an end, and posterity will have enough to do to take care of the debts of their own creation.

"The Secretary respectfully suggests that on this subject the expression of Congress should be decided and emphatic. It is of the greatest importance in the management of a matter of so surpassing interest that the right start should be made. Nothing but revenue will sustain the national credit, and nothing less than a fixed policy for the reduction of the public debt will be likely to prevent its increase."

And in his report of 1867, when he remarked:

"Old debts are hard debts to pay; the longer they are continued, the more odious they become. If the present generation should throw the burden of this debt on the next, it will be quite likely to be handed down from one generation to another, a perpetual, if not a constantly increasing burden upon the people. Our country is full of enterprise and resources. The debt will be lightened every year with great rapidity by the increase of wealth and population. With a proper reduction in the expenses of the Government, with a revenue system adapted to the industry of the country, and not oppressing it, the debt may be paid before the expiration of the present century. The wisdom of a policy which shall bring about such a result is vindicated in advance by the history of nations whose people are burdened with inherited debts, and with no prospect of relief for themselves or their posterity."

In his last report, the Secretary referred to the condition of the Treasury at the close of the war, and at some subsequent periods, alluding especially to the emergency in the spring of 1865, arising from the very large requisitions which were waiting for payment, and the still larger requisitions that were to be provided for to enable the War Department to pay arrearages due to the army, and other expenses which had already been incurred in the suppression of the rebellion. In briefly reviewing the administration of the Treasury, from April, 1865, he did not think it necessary to state how much of the large revenue receipts had been expended in the payment of debts incurred during the war; and he would not undertake to do it now, did not misapprehension exist in the public mind in regard to the expenditures of the Government since the conclusion of hostilities, prejudicial to both the law-making and the law-executing branches of the Government.

The war was virtually closed in April, 1865. On the first day of that month the public debt amounted, according to the books and accounts of the department, to \$2,366,955,077 34. On the first day of September following it amounted to \$2,757,629,571 43, having increased in four months \$390,734,494 09. From that period it continued to decline until November 1, 1867, when it had fallen to \$2,491,504,450. On the first day of November last, it had risen to \$2,527,129,552 82. By this statement it appears that between the first day of April, 1865, and the first day of September of the same year, the debt increased \$390,734,494 09, and that between the first day of September, 1865, and the first day of November, 1868, it decreased \$230,560,018 61; and that on the last day mentioned it was \$160,174,475 48 larger than it was on the first day of April, 1865. Since then the Treasurer's receipts from all sources of revenue have been as follows:

For April, May, and June, 1865.....	\$83,519,164 13
For the year ending June 30, 1866.....	558,032,620 06
For the year ending June 30, 1867.....	490,634,010 27
For the year ending June 30, 1868.....	405,638,083 32
June 30 to November 1, 1868.....	124,652,184 42

Total of receipts.....\$1,662,476,062 20

To which should be added the increase of the debt between the first day of April, 1865, and the first day of November, 1868.....160,174,475 48

Total.....\$1,822,650,537 68

This exhibit shows that the average sum of \$1,822,650,537 68 was expended in the payment of the interest and of other demands upon the Treasury in three years and seven months, being an average annual expenditure of \$508,646,061 68.

If the statement of the public debt on the 1st day of April, 1865, had included all debts due at that time, and \$1,822,650,537 68 had really been expended in payment of the interest on the public debt, and the current expenses of the Government between that day and the first day of November last, there would have been a profligacy and a recklessness in the expenditures of the public moneys discreditable to the Government and disheartening to tax payers. Fortunately this is not the fact. That statement (as is true of all other monthly statements of the Treasury) exhibited only the adjusted debt, according to the books of the Treasury, and did not, and could not, include the large sums due to the soldiers of the great Union army (numbering at that time little less than a million of men) for "pay" and for "bounties," or on claims of various kinds which must of necessity have been unsettled. For the purpose of putting this matter right, the Secretary has endeavored to ascertain from the War and Navy Departments how much of their respective disbursements, since the close of the war, has been in payment of debts properly chargeable to the expenses of the war. The following is the result of his inquiries:

By the War Department.....	\$595,431,125 90
By the Navy Department.....	35,000,000 00

It has been impossible to obtain an exact statement of the amount of such debts paid by the Navy Department, but sufficient information has been received to justify the Secretary in estimating in round numbers at thirty-five millions, which is probably an under rather than over estimate. The expenditures of the War Department have been furnished in detail, and are believed to be substantially correct.

These figures show that the money expended by the War and Navy Departments, between the first day of April, 1865, and the first day of November, 1868, on claims justly chargeable to the expenses of the war, amounted to.....\$639,431,125 90  
To which should be added amount advanced to the Pacific roads.....42,194,000 00  
Amount paid for Alaska.....7,230,000 00

Total.....\$679,825,125 90

Deducting this sum from the amount of the revenues, \$1,662,476,662 20, and \$169,174,475 41, the increase of the public debt—the remainder, \$1,142,825,411 78, or an average of \$318,928,021 89 per annum, is the amount actually expended in the payment of current expenses and interest.

It is thus shown that within a period of three years and seven months, the revenues or the receipts from all sources of revenue reached the enormous sum of \$1,662,476,662 20, and that \$639,431,125 90 were paid on debts which were actually due at the close of the war, and for bounties which, like the pay of the army, were a part of the expenses of the war. Adding the amount thus paid to the debt, as exhibited by the books of the Treasury on the first day of April, 1865, it appears that the debt of the United States at that time was \$2,997,386,293 24, and that the actual reduction has been \$470,256,650 42; and but for the advances to the Pacific roads, and the amount paid for Alaska, would have been \$519,650,650 42.

Nothing can better exhibit the greatness of the resources of this young nation than this statement, or show more clearly its ability to make "short work" of the extinguishment of the public debt. It will be borne in mind that these immense revenues have been collected, while one-third part of the country was in a state of great destitution, resulting from its terrible struggle to separate itself from the Union, with its political condition unsettled, and its industry in a great degree paralyzed; and while, also, the other two-thirds were slowly recovering from the drain upon their productive labor and resources—a necessary accompaniment of a gigantic and protracted war.

The Secretary has noticed with deep regret indications of a growing sentiment in Congress—notwithstanding the favorable exhibits which have been from time to time made of the debt-paying power of the country—in favor of a postponement of the payment of any part of the principal of the debt until the national resources shall be so increased as to make the payment of it more easy. If this sentiment shall so prevail as to give direction to the action of the Government he would feel that a very great error had been committed, which could hardly fail to be a severe misfortune to the country. The people of the United States will never be so willing to be taxed for the purpose of reducing the debt as at the present time. Now, the necessity for its creation is better understood and appreciated than it can be at a future day. Now it is regarded by a large majority of tax-payers as a part of the great price paid for the maintenance of the Government, and, therefore, a sacred debt. The longer the reduction of it is postponed, the greater will be the difficulties in the way of accomplishing it, and the more intolerable will seem to be the burden of taxation. The Secretary, therefore, renews the recommendations made in his first report, that a certain definite sum be annually applied to the payment of the interest and the principal of the debt. The amount suggested was two hundred millions of dollars. As the debt is considerably smaller than its maximum was estimated at, the amount to be so applied annually might now safely be fixed at one hundred and seventy-five millions of dollars, according to the estimate already made in this report.

The subject of the currency in which the five-twenty bonds may be paid—agitated for some time past—was freely discussed during the recent political canvass, and made a question upon which parties, to some extent, were divided. The premature and unfortunate agitation and discussion of this question have been damaging to the credit of the Government, both at home and abroad, by exciting apprehensions that the good faith of the nation might not be maintained, and have thus prevented our bonds from advancing in price, as they otherwise would have advanced, after it was perceived that the maximum of the debt had been reached, and have rendered funding at a low rate of interest too unpromising to be undertaken. In his report in 1865, the Secretary used the following language:

"Before concluding his remarks upon the national debt, the Secretary would suggest that the credit of the five-twenty bonds issued under the acts of February 25, 1862, and June 30, 1864, would be improved in Europe, and, consequently, their market value advanced at home, if Congress should declare that the principal as well as the interest of these bonds is to be paid in coin. The policy of the Government in regard to its funded debt is well understood in the United States, but the absence of a provision in these acts that the principal of the bonds issued under them should be paid in coin, while such a provision is contained in the act under which the ten-forties were issued, has created some apprehension in Europe that the five-twenty bonds might be called in at the expiration of five years, and paid in United States notes. Although it is not desirable that our securities should be held out of the United States, it is desirable that they should be of good credit in foreign markets, on account of the influence which these markets exert upon our own. It is, therefore, important that all misapprehensions on these points should be removed by an explicit declaration of Congress that these bonds are to be paid in coin."

Without intending to criticize the inaction of Congress in regard to a matter of so great importance, the Secretary does not hesitate to say that, if his recommendations had been adopted, the public debt would have been much less than it is, and that the reduction of the rate of interest would ere this have been in rapid progress. The Secretary does not think it necessary to discuss the question in this report. His opinions upon it are well known to Congress and the people. They were definitely presented in his report for 1867, and they remain unchanged. He begs leave merely to suggest, as he has substantially done before, that alleviation of the burden of the public debt is to be obtained—not in a denial of the national credit; not in threats of repudiation; not in a further issue of irredeemable notes; not in arguments addressed to the fears of the bondholders; but in a clear and explicit declaration by Congress that the national faith, in letter and spirit, shall be inviolably maintained; that the bonds of the United States, intended to be negotiated abroad, as well as at home, are to be paid—when the time of payment arrives—in that currency which is alone recognized as money in the dealings of nation with nation. Let Congress say this promptly, and there can be but little doubt that the credit of the Government will so advance that within the next two years the interest on the larger portion of the debt can be reduced to a satisfactory rate. He, therefore, earnestly recommends that it be declared, without delay, by joint resolution, that the principal of all bonds of the United States is to be paid in coin.

It is also recommended that the Secretary be authorized to issue \$500,000,000 of bonds, \$50,000,000 of which shall mature annually; the first \$50,000,000 to be payable, principal and interest, in lawful money—the principal and interest of the rest in coin; and also such further amount of bonds as may be necessary to take up the outstanding six per cents and the non-interest bearing debt, payable in coin thirty days after date, and redeemable at any time after ten years at the pleasure of the Government—the interest to be paid semi-annually in coin, and in no case to exceed the rate of five per cent.; provided that the Secretary may, in his discretion, make the principal and interest of \$500,000,000 of these bonds payable at such city or cities in Europe as he may deem best.

The fact that, according to the recommendation, \$50,000,000 of the bonds to be issued are to become due each year for ten consecutive years (at the expiration of which time all of the bonds would be under the control of the Government) would ensure an annual reduction of \$50,000,000 of the public debt, and impart a credit to the other bonds which would ensure the negotiation of them on favorable terms.

Of the expediency of an issue of bonds corresponding, to some extent, in amount with those held in Europe—the interest and principal of which shall be paid in the countries where they are to be negotiated—there can be but little doubt. On this point, the Secretary used the following language in his report of 1866:

"The question now to be considered is not how shall our bonds be prevented from going abroad—for a large amount has already gone, and others will follow as long as our credit is good, and we continue to buy more than we can pay for in any other way—but how shall they be prevented from being thrown upon the home market, to thwart our efforts in restoring the specie

standard? The Secretary sees no practicable method of doing this at an early day, but by substituting for them bonds, which being payable, principal and interest, in Europe, will be less likely to be returned when their return is the least to be desired. The holders of our securities in Europe are now subject to great inconvenience, and not a little expense in collecting their coupons; and it is supposed that five per cent., or, perhaps, four-and-a-half per cent. bonds, payable in London or Frankfurt, could be substituted for our six per cents, without any other expense to the United States than the trifling commissions to the agents through whom the exchanges might be made. The saving of interest to be thus effected would be no inconsiderable item; and the advantages of having our bonds in Europe placed in the hands of actual investors is too important to be disregarded."

The Secretary has nothing further to say on this point than that careful reflection has only strengthened his convictions of the correctness of the views expressed in the foregoing extract.

In recommending the issue of bonds bearing a lower rate of interest, to be exchanged for the outstanding six per cents, the Secretary must not be understood as having changed his opinion in regard to the expediency or the wisdom of the recommendation in his last report:

"That the act of March 3, 1865, be so amended as to authorize the Secretary of the Treasury to issue six per cent. gold-bearing bonds, to be known as the consolidated debt of the United States, having twenty years to run, and redeemable, if it may be thought advisable, at an earlier day, to be exchanged at par for any and all other obligations of the Government, one-sixth part of the interest on which, in lieu of all other taxes, at each semi-annual payment, shall be reserved by the Government, and paid over to the States according to population."

He refers to what he then said in advocacy of that recommendation, as an expression of his well-considered opinions at the present time, and he is only prevented from repeating the recommendation by the fact that it met with little approval at the last session, and has not grown into favor since. He sincerely hopes that the future history of the debt will vindicate the wisdom of those who are unable to approve the proposition.

The following is a statement of the public debt of the 1st of July, 1868:

DEBT BEARING COIN INTEREST.	
5 per cent bonds.....	\$221,588,400 00
6 per cent bonds of 1867 and 1868.....	6,893,441 80
6 per cent bonds, 1881.....	2,367,200 00
6 per cent 5-20 bonds.....	1,557,844,690 00
Navy pension fund.....	12,000,000 00
	\$2,083,003,641 80

DEBT BEARING CURRENCY INTEREST.	
6 per cent bonds.....	\$29,069,000 00
3-year compound interest notes.....	21,634,890 00
3-year 7-30 notes.....	25,534,900 00
3 per cent certificates.....	50,000,000 00
	126,238,790 00

MATURED DEBT NOT PRESENTED FOR PAYMENT.	
3-year 7-30 notes, due August 15, 1867, and June 15, and July 15, 1868.....	\$12,182,750 00
Compound interest notes, matured June 10, July 15, August 15, October 15, and December 15, 1867, and May 15, 1868.....	6,556,920 00
Bonds, Texas indemnity.....	250,000 00
Treasury notes acts July 17, 1861, and prior thereto.....	15,111 64
Bonds, April 15, 1842.....	6,000 00
Treasury notes, March 3, 1863.....	555,492 00
Temporary loan.....	737,029 00
Certificates of indebtedness.....	18,000 00
	20,527,302 64

DEBT BEARING NO INTEREST.	
United States notes.....	\$356,141,723 00
Fractional Currency.....	32,626,951 75
Gold certificates of deposit.....	17,678,640 00
	406,447,314 75

Total debt.....	\$2,636,297,649 19
Amount in Treasury, coin.....	\$100,510,561 28
Amount in Treasury, currency.....	30,595,970 97
	131,066,532 25

Amount of debt, less cash in Treasury.....\$2,505,290,516 94

The following is a statement of receipts and expenditures for the fiscal year ending June 30, 1868:

Receipts from customs.....	164,464,599 66
Receipts from lands.....	1,318,715 41
Receipts from direct tax.....	1,788,145 85
Receipts from internal revenue.....	191,087,589 41
Receipts from miscellaneous sources (of which amount there was received for premium on bonds sold to redeem Treasury notes, the sum of \$7,078,203 42).....	46,949,033 09

Total receipts, exclusive of loans.....\$405,638,083 32

Expenditures for the civil service (of which amount there was paid for premium on purchase of Treasury notes prior to maturity, \$7,001,151 004).....	\$60,011,018 71
Expenditures for pensions and Indians.....	27,883,069 10
Expenditures by War Department.....	123,246,648 62
Expenditures by Navy Department.....	25,775,502 72
Expenditures for interest on the public debt.....	140,424,045 71

Total expenditures, exclusive of principal of public debt.....\$377,340,284 86

The following is a statement of receipts and expenditures for the quarter ending September 30, 1868:

The receipts from customs.....	\$49,676,594 67
The receipts from lands.....	714,895 03
The receipts from direct tax.....	15,536 02
The receipts from internal revenue.....	38,735,863 08
The receipts from miscellaneous sources (of which amount there was received from premium on bonds sold to redeem Treasury notes the sum of \$587,725 12).....	6,249,979 97

Total receipts, exclusive of loans.....\$95,392,868 77

Expenditures for the civil service (of which amount there was paid, as premium on purchase of Treasury notes prior to maturity, \$300,000).....	\$21,227,106 33
Expenditures for—	
Pensions and Indians.....	12,358,647 70
War Department.....	27,219,117 02
Navy Department.....	5,604,785 33
Interest on public debt.....	38,742,814 37

Total expenditures, exclusive of principal of public debt.....\$105,152,470 75

The Secretary estimates that, under existing laws, the receipts and expenditures for the three quarters ending June 30, 1869, will be as follows:

From Customs.....	\$125,000,000 00
Lands.....	1,000,000 00
Internal revenue.....	100,000,000 00
Miscellaneous sources.....	20,000,000 00

Receipts.....\$246,000,000 00

And that the expenditures for the same period, if there be no reduction of the army, will be:

For the civil service.....	\$40,000,000 00
Pensions and Indians.....	18,000,000 00
War Department, including \$6,000,000 bounties.....	66,000,000 00
Navy Department.....	16,000,000 00
Interest on public debt.....	91,000,000 00

Expenditures..... \$231,000,000 00

The receipts and expenditures under existing laws for the fiscal year ending June 30, 1870, are estimated as follows:

From Customs.....	\$160,000,000 00
Internal revenue.....	140,000,000 00
Lands.....	2,000,000 00
Miscellaneous sources.....	25,000,000 00

Receipts..... \$327,000,000 00

The expenditures for the same period, if the expenses of the army should be kept up to about the present average, will be as follows:

For the civil service.....	\$50,000,000 00
Pensions and Indians.....	30,000,000 00
War Department.....	75,000,000 00
Navy Department.....	20,000,000 00
Interest on public debt.....	128,000,000 00

Expenditures..... \$303,000,000 00

The accompanying report of the Commissioner of Internal Revenue gives the necessary information in regard to the bureau, and contains many very judicious recommendations and suggestions, which are worthy the careful consideration of Congress.

The internal branch of the revenue service is the one in which the people feel the deepest interest. The customs duties are collected at a few points, and although paid eventually by the consumers, they are felt only by the great mass of the people in the increased cost of the articles consumed. Not so with the internal taxes. These are collected in every part of the Union; and their burdens fall, to a large extent, directly upon the tax-payers. Assessors, collectors, inspectors, detectives—necessary instruments in the collection of the revenues—are found in every part of the country. There is no village or rural district where their faces are not seen, and where collections are not made. The eyes of the whole people are therefore directed to this system, and it is of the greatest importance that its administration should be such as to entitle it to public respect. Unfortunately this is not the case. Its demoralization is admitted; and the question arises, where is the remedy? The Secretary is of opinion that it is to be found in such amendments to the act as will equalize the burdens of taxation, and in an elevation of the standard of qualification for revenue officers.

Upon the subject of internal taxes the Secretary has already spoken. In regard to the character of the revenue officers, he has only to say that there must be a decided change for the better in this respect, if the system is to be rescued from its demoralized condition. After careful reflection the Secretary has come to the conclusion that this change would follow the passage of the bill reported by Mr. Jenckes, from the Joint Committee on Retrenchment and Reform, on the 14th of May last, entitled "A bill to regulate the civil service and promote the efficiency thereof." The Secretary gives to this bill his hearty approval, and refers to the search which was made upon its introduction, by the gentleman who reported it, for an able and lucid exposition of its provisions, and for a faithful and graphic description of the evils of the present system of appointments to office.

On the 5th day of October last, the day for their regular quarterly reports, the number of national banks was sixteen hundred and forty-four, seventeen of which were in voluntary liquidation.

Their capital was.....	\$120,634,511 00
Their discounts.....	655,875,277 35
Their circulation.....	295,684,244 00
Their deposits.....	601,830,278 40

In no other country was so large a capital ever invested in banking, under a single system, as is now invested in the national banks; never before were the interests of a people so interwoven with a system of banking as are the interests of the people of the United States with their national banking system. It is not strange, therefore, that the condition and management of the national banks should be, to them and to their representatives, a matter of the deepest concern. That the national banking system is a perfect one is not asserted by its friends; that it is a very decided improvement, as far as circulation is regarded, upon the systems which it has superseded, must be admitted by its opponents. Before it was established, the several States, whether in conformity with the Constitution or not—jointly with the General Government, during the existence of the charter of the U. S. Bank, and solely after the expiration of that charter—exercised the power of issuing bills of credit, in the form of bank notes, through institutions of their own creation, and thus controlled the paper money, and thereby, in no small degree, the business and commerce of the country. In May, 1863, when the National Currency Bureau was established in Washington, some fifteen hundred banks, organized under State laws, furnished the people of the United States with a bank-note currency. In some of the States the banks were compelled to protect, partially at least, the holders of their notes against loss, by deposits of securities with the proper authorities. In other States, the capital of the banks (that capital being wholly under the control of their managers) was the only security for the redemption of their notes. In some States there was no limit to the amount of notes that might be issued, if secured according to the requirements of their statutes, nor any necessary relation of circulation to capital. In others, while notes could be issued only in certain proportions to capital, there was no restriction upon the number of banks that might be organized. The notes of a few banks, being payable or redeemable at commercial centres, were current in most of the States, while the notes of other banks (perhaps just as solvent) were uncirculated beyond the limits of the States by whose authority they were issued. How valueless were the notes of many of the State banks is still keenly remembered by the thousands who suffered by their insolvency. The direct losses sustained by the people by an unsecured bank-note circulation, and the indirect losses to the country resulting from deranged exchanges, caused by a local currency constantly subject to the manipulations of money-changers, and from the utter unsuitableness of such a currency to the circumstances of the country, can be counted by millions. It is only necessary to compare the circulation of the State banks with that furnished by the national banks, to vindicate the superiority of the present system. Under the national banking system, the Government, which authorizes the issue of bank notes, and compels the people to receive them as money, assumes its just responsibility, and guarantees their payment. This is the feature which especially distinguishes it from others, and gives to it its greatest value.

The object of the Secretary, however, in referring to the national banks, is not to extol them, but to call the attention of Congress to the accompanying instructive report of the Comptroller of the Currency, especially to that part of it which exhibits the condition and management of the banks in the commercial metropolis, and to the amendments proposed by him to the act.

On the fifth day of October last, the loans or discounts of the banks in the City of New York amounted to \$163,634,070 23 only \$90,000,000 of which consisted of commercial paper, the balance, being chiefly made up of what are known as loans on call—that is to say, of loans on collaterals, subject to be called in at the pleasure of the banks. Merchants or manufacturers cannot, of course, borrow on such terms, and it is understood that these loans are confined mainly to persons dealing, or rather speculating, in stocks or coin. This statement shows to what extent the business of the banks in New York has been diverted from legitimate channels, and how deeply involved the banks have become in the uncertain and dangerous speculations of the street.

The deposits of these institutions on the day mentioned amounted to \$226,645,655 80, and of their assets, \$113,332,688 20, consisted of certain cash items which were in fact mainly certified checks, which had been passed

to the credit of depositors, and constituted a part of the \$226,645,655 80 of deposits, although the banks always deduct such checks from their deposits in making up their statement for the payment of interest, and their estimates for reserves. It is understood to be the practice of a number of the banks (perhaps the practice exists to a limited extent in all) to certify the checks of their customers in advance of the deposits out of which they are expected to be paid; in other words, to certify checks to be good, under an agreement between the banks and the drawers, that the money to protect them shall be deposited during the day, or at least before the checks, which go through the clearing-house, can be presented for payment. The Secretary has learned with great surprise that a number of banks—generally regarded as being under judicious management—certify in a single day the checks of stock and gold brokers to many times the amount of their capitals, with no money actually on deposit for the protection of the checks at the time of their certification. A more dangerous practice, or one more inconsistent with prudent, not to say honest banking, cannot be conceived. It is unauthorized by the act, and should be prohibited by severe penalties. Aside from the risk incurred by this reckless method of banking, the effect of such practice is to foster speculation by creating inflation. It is in fact part and parcel of that fictitious credit which is so injurious to the regular business of the city, and to the business of all parts of the country, which feel and are affected by the pulsations of the commercial centre. It is this very dangerous practice, combined with the more general practice of making loans "on call," which leads to unsafe extensions of credits, and makes many of the banks in New York helpless when the money market is stringent. Can anything be more discreditable to the banks of the great emporium of the country, or afford more conclusive evidence of their imprudent management, than the fact, that with a capital—including their surplus and their undivided profits—of one hundred millions of dollars, the withdrawal from circulation of ten or fifteen millions of legal-tender notes, by combinations for speculative purposes, can create a money stringency, by which not only the stock market is broken down, but the entire business of the city and to some extent the business of the country is injuriously affected. If the banks were no more extended than they ought to be, or had proper control over their customers, no such combinations would be likely to be formed, or if formed, they would utterly fail of their object.

These remarks do not, of course, apply to all the banks in New York, for some of them are strictly commercial institutions, and are under the control of men who are distinguished alike for their talents and their conservatism. They are, however, applicable to them as a class, and they undoubtedly apply in some measure to many banks in other cities.

The recommendation of the Comptroller, that all national banks be prohibited by law from certifying checks which are not drawn upon deposits actually existing at the time the checks are certified to be good, is heartily concurred in.

The Secretary has long entertained the opinion that the practice of paying interest on deposits—tending, as it does, to keep the banks constantly extended in their discounts—is injudicious and unsafe. He therefore approves of the recommendation of the Comptroller, that national banks be prohibited from paying interest on bank or individual balances.

The Secretary also agrees with the Comptroller in his recommendation that authority be given to him to call upon the banks for reports on days to be fixed by himself. If a reserve is necessary, it should be kept constantly on hand, and the business of the country ought not to be disturbed by the preparation of the banks for the quarterly reports.

The views of the Secretary in regard to the necessity of a central redeeming agency for the national banks have been frequently presented, and it is not necessary for him to repeat them.

There are other suggestions in the Comptroller's report deserving the attention of Congress, which the Secretary lacks the time to consider. There is one subject, however, not discussed by the Comptroller, to which the Secretary invites special attention.

Although the national banking system should be relieved from the limitation now imposed upon the aggregate amount of notes that may be issued, this cannot safely be done as long as the suspension of specie payments continues. Nevertheless, measures should at once be adopted to remedy, as far as practicable, the inequality which exists in the distribution of the circulation. As the Government has, by the tax upon the notes of State banks, deprived the States of the power of furnishing facilities to their citizens, it is obviously just that those States, which are thus deprived of these facilities, or which do not share equally with other States in the benefits of the national banking system, should be supplied with both banks and notes. There are two modes by which this may be accomplished. One by reducing the circulation of the banks of large capital only; the other by limiting the amount of notes to be furnished to all the banks—say, to seventy per cent. of their respective capitals. The latter mode is preferable, as by it no discrimination would be made between the banks, and all would be strengthened by a reduction of their liabilities, and by a release of a part of their means now deposited with the Treasurer, which would be of material service to them in the preparation they must make for a return to specie payments. If a redeeming agency should be established, the reduction of the circulation of the existing banks could be effected as rapidly as new banks can be organized in the Western and Southern States, where they are needed.

The new Territory of Alaska has been the object of much attention during the past year, but its distance, and the uncertainty and infrequency of communication with it, and our imperfect knowledge of its condition, have somewhat embarrassed the department in organizing therein a satisfactory revenue system.

Under the authority of the act of the last session, the administration, by special agency (which in the absence of the regular machinery was of necessity resorted to) has been superseded by the appointment of a collector to reside at Sitka, who left for his post in September last, and has probably, ere this, entered upon the discharge of his duties.

A gentleman from this department accompanied him, to assist in establishing the collection service on a proper foundation, and in perfecting arrangements for the prevention of smuggling.

Recognizing also the vast importance of reliable information on matters not immediately connected with these objects, but having nevertheless a most important bearing upon them, more or less direct, another agent, long familiar with that country, was, at the same time, dispatched with directions to apply himself to the ascertainment of its natural resources, the inducements and probable channels of trade, and the needs of commerce in the way of lights and other aids to navigation. He was also particularly entrusted with a supervision of the fur interests and the enforcement of the law prohibiting the killing of the most valuable fur-bearing animals.

The existence of coal at numerous points has been known for years, and some of the beds were worked by the Russians with indifferent success; none, however, has been hitherto procured on the North American Pacific coast equal to that from the Nanaimo mines, on Vancouver's Island; and this, though raised from a considerable depth, is not of superior quality. The officers of the cutters were therefore instructed to explore the coast as far as practicable, for the purpose of ascertaining the supply and the quality of coal in the Territory. A number of localities producing coal were visited, including the abandoned Russian mines, but at none did the outcroppings exhibit any flattering promise, except on the coast of Cook's inlet. There, near Fort Kenay, about seven hundred miles from Sitka, were found upon the cliffs numerous parallel veins extending many miles along the shore. Some of the coal taken from them proved to be superior to that from the Nanaimo mines. The indications are that the supply is abundant and the quality fair.

The protection of the fur-bearing animals is a matter of importance hardly to be overrated. In consequence of information received last spring, the captain of the Wayanda was directed to visit, as early in the season as practicable, the islands in Behring's Sea, where the fur seal chiefly abounds. On his arrival at St. Paul's and St. George's Islands, he found there several large parties engaged in hunting the animals indiscriminately, and in traffic with the natives in ardent spirits and other forbidden articles. Quarrels had arisen, and the natives complained that the reckless and unskilful movements of the new hunters had already driven the animals from some of their usual haunts. The captain of the cutter instituted such measures as he felt authorized to institute for the maintenance of the peace, and the protection of the animals from indiscriminate slaughter.

The preservation of these animals, by the observance of strict regulations in hunting them, is not only a matter of the highest importance in an economical view, but a matter of life or death to the natives. Hitherto, seals have been hunted under the supervision of the Russian Company, and exclusively by the natives, who are trained from children to that occupation, and derive from it their clothing and subsistence. They have been governed by exact and stringent rules as to the time of hunting, and the number and kind of seals to be taken. It is recommended that these rules be continued by legal enactment, and that the existing law prohibiting absolutely the killing of the fur seal and sea otter be repealed, as starvation of the people would result from its strict enforcement. The natives (with the exception of the Indians in the southern part of the territory, who are fierce and warlike) are a gentle, harmless race, easy to govern, but of great enterprise and daring in the pursuit of game—many of them passing annually in their skin canoes from the mainland and Aleutian Islands to the Islands of St. Paul and St. George, a distance of about one hundred and fifty miles, through a strong sea, and returning with the proceeds of their hunt.

The seals are extremely timid and cautious. They approach their accustomed grounds each year with the greatest circumspection, sending advance parties to reconnoitre, and at once forsaking places where they are alarmed by unusual or unwelcome visitors. They have been in this way driven from point to point, and have taken refuge in these remote islands, whence, if they are now driven, they must resort to the Asiatic coast. There can be no doubt that, without proper regulations for hunting these valuable animals, and the more valuable but less numerous sea otters, a very profitable trade will soon be entirely destroyed.

The United States cannot, of course, administer such a trade as a Government monopoly, and the only alternative seems to be to grant the exclusive privilege of taking these animals to a responsible company for a series of years, limiting the number of skins to be taken annually by stringent provisions. A royalty or tax might be imposed upon each skin taken, and a revenue be thus secured sufficient to pay a large part of the expenses of the Territory.

Our relations with the Hudson Bay Company and the regulation of the transit of merchandise between their interior trading posts and the sea-coast, by way of Stikine river, will doubtless require early attention, but at present the Secretary is not sufficiently advised to offer any recommendations upon the subject.

The recent political changes in Spain, and the indications of a more liberal commercial policy on her part before the revolution took place, adds force to the remarks and recommendation of the Secretary in his last report, in regard to our commercial relations with that country. He again strongly recommends the repeal of the acts of July 13, 1832, and June 30, 1834, so that Spanish vessels may be subject to our general laws, which are ample to afford protection against unfriendly Spanish legislation, and are free from the innumerable difficulties of administration which exist under these special enactments.

The Secretary asks attention to the necessity of more exact and stringent laws respecting the carriage of passengers, and also of such legislation as shall settle, so far as they can be settled in this manner, some of the vexed questions arising under steamboat laws.

It is necessary merely to repeat what has been at other times stated in regard to the insufficiency of the tax fund to meet the necessary expenses of the marine hospitals, notwithstanding the economy which, during the past year, has reduced the expenditures more than \$12,000. It is impossible to ignore the fact that these hospitals are, and must be, unless the rate of tax is greatly increased, a constant drain upon the Treasury.

The revenue cutter service now comprises twenty-five steamers and seventeen sailing vessels. Of the six steamers on the lakes, all but one are at present, agreeably to the views of Congress, out of commission, the Sherman alone being in active service.

Five of the steamers on the sea-coast are small tugs, from forty to sixty tons burden, the utility and efficiency of which at the leading ports—as substitutes for ordinary rowboats on the one hand, and for the light cutters on the other, both in the harbor duties of inspection and police, and in the prevention and detection of smuggling—have been so thoroughly tested by experience that it is thought they should be employed still more extensively than they now are. Upon the lakes in particular they would be of the greatest value, and they should be substituted for the large steamers now there, which should, with one exception, be sold, as they are depreciating in value and are a useless expense. The exception is the S. P. Chase, which is of such dimensions that she might be brought to the sea-coast, where she could be used to advantage. This would probably be preferable to a sale of her where she lies. The schooner Black, being old and not fit for further service, has been sold. The Morris, also, is about to be disposed of for the same reason. The steamer Nemaha, stationed at Norfolk, has been destroyed by accidental fire.

On the Pacific coast are the Wayanda, in Alaska, and the Lincoln, at San Francisco, both in excellent condition; the schooner Reliance, recently ordered to Sitka, is also in good order. The schooner Lane, at Puget Sound, is old and unfit for the requirements of that station.

The addition of several thousand miles of sea-coast, by the purchase of Alaska, renders the cutter force in the Pacific inadequate for even the ordinary duties pertaining to the service, without regard to the additional demands upon it for the protection of the fur-bearing animals. The recommendation heretofore made that two first-class steamers be built or purchased for the Western coast is therefore renewed. A steam-cutter is also needed for Charleston, and one for the coast of Texas.

In his report for the year 1866, the Secretary called the attention of Congress especially to the condition of the shipping interest of the United States. In his report of last year, he again referred to it in the following language:

"The shipping interest of the United States, to a great degree prostrated by the war, has not revived during the past year. Our shipyards are, with rare exceptions, inactive. Our surplus products are being chiefly transported to foreign countries in foreign vessels. The Secretary is still forced to admit, in the language of his last report, 'that with unequalled facilities for obtaining the materials, and with acknowledged skill in shipbuilding, with thousands of miles of sea-coast, indented with the finest harbors in the world, with surplus products that require in their transportation a large and increasing tonnage, we can neither profitably build ships, nor successfully compete with English ships in the transportation of our own productions.'

"No change for the better has taken place since that report was made. On the contrary, the indications are that the great shipbuilding interest of the Eastern and Middle States has been steadily declining, and that, consequently, the United States is gradually ceasing to be a great maritime power. A return to specie payments will do much, but will not be sufficient to avert this declension and give activity to our shipyards. The materials which enter into the construction of vessels should be relieved from taxation by means of drawbacks; or if this may be regarded as impracticable, subsidies might be allowed as an offset to taxation. If subsidies are objectionable, then it is recommended that all restrictions upon the registration of foreign-built vessels be removed, so that the people of the United States, who cannot profitably build vessels, may be permitted to purchase them in the cheapest market. It is certainly unwise to retain upon the statute books a law restrictive upon commerce when it no longer accomplishes the object for which it was enacted."

What was said by the Secretary in 1866 and 1867 upon this subject is true at the present time, and he therefore feels it his duty to repeat his recommendations. The shipping interest was not only prostrated by the war, but its continued depression is attributable to the financial legislation, and the high taxes consequent upon the war. The honor and the welfare of the country demand its restoration.

Accompanying this report there is a very accurate and instructive chart, prepared by Mr. S. Nimmo, Jr., a clerk in this department, which presents, in a condensed form, the progress of shipbuilding in the United States from 1817 to 1862.

Since the abrogation of the treaty of June 4, 1854, between the United States and Canada, no favorable opportunity for a reconsideration of the commercial relations of the two countries has been presented. Canada has yet to consolidate a political confederation with the other English colonies and possessions on this continent, and until the hostility of Nova Scotia to

that measure is removed, and the concurrence of Northwest British America is secured, the authorities at Ottawa are in no situation to make an adequate proposition to the United States, in exchange for the great concession of an exceptional tariff, on our northern frontier, in favor of the leading Canadian staples. On the other hand, until the United States shall have fully matured a satisfactory system of duties, external as well as internal, the Secretary would be indisposed to favor any special arrangement which would remove any material branch of the revenue system from legislative control. Meanwhile, a Canadian policy for the enlargement of the Welland and St. Lawrence Canals to dimensions adequate to pass vessels of one thousand tons burden from the Upper Lakes to the Atlantic, will doubtless be regarded as indispensable to any substantial renewal, by treaty or legislation, of the former arrangement. The discussions and experience of the last twelve months are regarded by the Secretary as warranting an authoritative comparison of views between the representatives of Great Britain and Canada and the Government of the United States; and in that event this department will cheerfully contribute, by all appropriate means, to comprehensive measures which shall assimilate the revenue systems of the respective countries, make their markets mutually available, and, for all commercial or social purposes, render the frontier as nearly an imaginary line as possible. There certainly seems no just reason why all the communities on the American continent might not imitate the example of the Zoll Verien of the German States.

The progress of the coast survey has been satisfactory, and commensurate with the appropriations, as will be seen from the annual report of the superintendent of that work. During the past year surveys have been in progress in the following localities, named in geographical order, viz: On the coast of Maine, in Penobscot bay and on the islands lying within its entrance; on the shores of St. George's and Medonick rivers; in Muscongus bay; on the estuaries of Quolug bay, and in the vicinity of Portland; completing all the in-shore work between the Penobscot and Cape Elizabeth. In Massachusetts, between the Barnstable and Monomay, completing the survey of Cape Cod. In Rhode Island, on the western part of Narragansett bay. In New York, at Rondout and in the bay of New York. In New Jersey, on the coast near the head of Barnegat bay. In Maryland and Virginia, on the Potomac river and the southern part of Chesapeake bay. In North Carolina, in Pamlico sound and on its western shore, including Neuse and Bay rivers, and of the coast north of Hatteras. In South Carolina, on the estuaries of Port Royal sound. In Georgia, on St. Catherine's, Doboy, and St. Andrew's sounds; in the Florida straits and in the bay between the Keys and main shore of Florida. On the coast between Pensacola and Mobile entrances. At the passes of the Mississippi, and in Galveston, Matagorda and Corpus Christi bays, on the coast of Texas. In California surveying parties have been at work on the coast between Buenaventura and Santa Barbara, at Point Sal, and on the peninsula of San Francisco. In Oregon, on Yaquina bay, Columbia and Uehaleur rivers. In Washington Territory, on Fuca straits and in Puget sound.

In the Coast Survey Office, forty-eight charts have been entirely or partially engraved during the year, of which nineteen have been published. Regular observations of the tides at seven principal stations have been kept up, and tide tables for all parts of the United States, for the ensuing year, have been published. A new edition of the Directory or Coast Pilot for the western coast has been prepared, and a preliminary guide for the navigation of the north-western coast has been compiled.

This brief glance at the operation of the Coast Survey during the past year shows the great scope of that work, which has justly earned a large measure of public favor. Its importance to the commerce and navigation of the country are now well understood, nor can its incidental contributions to science fail to be appreciated by the representatives of the people. The work should be pressed steadily forward, with means sufficient for the most effective working of the existing organization, so that it may embrace, at no distant period, the whole of our extended coast line within its operations, including the principal harbors in our newly acquired Territory of Alaska.

The report of the Lighthouse Board is, as usual, an interesting one. No bureau of the Treasury Department is conducted with more ability, or with a more strict regard to the public interests than this.

In view of the extension of the lighthouse system consequent upon the increase of the commerce of the country and the acquisition of sea-coast territory, it is respectfully submitted that some authoritative definition of the limit to which aids to navigation shall be extended by the General Government should be established.

It may well be doubted whether the General Government should be called upon to do more than to thoroughly provide the sea and lake coasts with lights of high order, both stationary and floating, and so to place lights of inferior order as to enable vessels to reach secure anchorages at any season of the year.

The act of Congress approved August 31, 1852, establishing the Lighthouse Board, directs that the coasts of the United States shall be divided into twelve districts. It is recommended that authority be given to increase the number of districts to fourteen.

The business of the bureau would be facilitated if Congress should confer the franking privilege upon the Lighthouse Board, in the same manner and upon the same terms as it is now exercised by the several bureaus of the Treasury Department.

The attention of Congress is called to the annual report of the Director of the Mint, which contains the usual statistics of the coinage of the country, and various suggestions and recommendations, which are worthy of consideration.

The total value of the bullion deposited at the mint and branches during the fiscal year was \$27,166,318 70, of which \$25,472,894 82 was in gold, and \$1,693,423 88 in silver. Deducting the redeposit, the amount of actual deposit was \$24,591,325 84.

The coinage for the year was: In gold coin, \$18,114,425; gold bars, \$6,026,810 06; silver coin, \$1,136,750; silver bars, \$456,236 40; nickel, copper, and bronze coinage, (one, two, three and five-cent pieces,) \$1,713,385; total coinage, \$29,964,560; total bars stamped, \$6,483,046 54.

The gold deposits of domestic production were: At Philadelphia, \$1,300,338 53; at San Francisco, \$14,850,117 84; at New York, \$5,409,996 55; at Denver, \$357,935 11. The silver deposits were: At Philadelphia, \$67,700 78; at San Francisco, \$651,239 05; at New York, \$262,313 06; at Denver, \$5,082 67.

The gold and silver deposits of foreign production were \$1,686,602 35. The amount of gold coined at Philadelphia was \$3,864,425; at San Francisco, \$14,979,558 52; of silver at Philadelphia, \$314,750; at San Francisco, \$822,000; of nickel, copper, and bronze at Philadelphia, \$1,713,385. Total number of pieces struck, \$49,735,840.

The branch mint at Denver has never coined money, and its expenses are entirely out of proportion to its business. The law under which it was organized should be repealed, and the institution reorganized as an assay office.

During the past year the branch mint building at Carson City, Nevada, has been completed, and the necessary machinery and fixtures have been forwarded. It will be ready for work early next season.

The mint at Philadelphia and the branch mint at San Francisco have the confidence of the people and of the Government, and when the new mint building in San Francisco is erected, these mints will be of ample capacity to supply coinage for the whole country. The business of coinage requires large and expensive establishments, under charge of men of science and of undoubted integrity; and such can be successfully maintained only at commercial centres, where bullion of different degrees of fineness is continually offered for manipulation. The establishment of additional branch mints is, therefore, unnecessary, and would be injudicious.

The entire deposits at the branch mint in San Francisco were formerly in unparted bullion; now nearly two-thirds of the amount is deposited in bars, refined by private establishments. The law requires that the parting charge shall equal the actual cost of the process: but the experience of the past four years shows that not less than thirty thousand dollars annually may be saved to the Government by discontinuing the business of refining upon the Pacific coast, and it is, therefore, recommended that the Secretary be authorized to exchange the unparted bullion deposited at the mint for refined bars, whenever in his opinion it may be for the public interest to do so.

It is also recommended that authority be given for the redemption of the one and two-cent pieces by the Treasurer, under such rules and regulations as may be prescribed by the department.

On the first day of April last Mr. R. W. Raymond was appointed Commissioner of Mining Statistics, in place of Mr. J. Ross Browne, now Commissioner to China.

Mr. Raymond was instructed to continue the work so ably commenced by his predecessor, and his report will show with what diligence and ability he is performing the duties assigned to him. The Secretary invites the attention of Congress to this report, and asks for the recommendations which it contains due consideration.

The following extract, from the Secretary's report of 1867, presents, in language which he cannot make more explicit, his present views:

"The Secretary respectfully recommends the reorganization of the accounting offices of the Treasury Department, so as to place this branch of the public service under one responsible head, according to what seems to have been designed in the original organization of the department, and followed until the increase of business led to the creation of the office of Second Comptroller, and subsequently to that of Commissioner of Customs. There are now three officers controlling the settlement of accounts, each independent of the others, and, as a consequence, the rules and decisions are not uniform where the same or like questions arise. In the judgment of the Secretary, the concentration of the accounting offices under one head would secure greater efficiency, as well as greater uniformity of practice, than can be expected under a divided supervision. It is believed, also, that it would be advantageous to relieve the Commissioner of Customs of the duty of settling accounts, and to confine his labors to the supervision of the revenue from customs, now sufficiently large to demand his whole time. It is therefore recommended that the office of Chief Comptroller be created, having general supervision of the accounting officers, and appellate jurisdiction from their decisions: to which should be transferred the duty of examining and countersigning warrants on the Treasury, and of collecting debts due the Government, now constituting a part of the duties of the First Comptroller; and that the adjustment of accounts pertaining to the customs be restored to the latter office.

"The Secretary also renews the recommendation contained in his last annual report, of a reorganization of the bureaus of the department, and most respectfully and earnestly solicits for it the favorable action of Congress. The compensation now paid is inadequate to the services performed, and simple justice to gentlemen of the ability and character of those employed in the department requires a liberal addition to their present compensation. Since the rates of compensation now allowed were established, the duties, labors, and responsibilities of the bureaus have been largely increased, and the necessary expenses of living in Washington have been more than doubled."

The Secretary, also, again recommends that a change be made in regard to the adjustment and settlement of accounts in the office of the Third Auditor; that a period be fixed within which war claims shall be presented, and that measures be adopted to perpetuate testimony in cases of claims that are disallowed.

The able report of the Treasurer gives a detailed account of the operations of the Treasury during the last fiscal year, and contains many valuable suggestions for the consideration of Congress.

The report of the Supervising Architect gives full and detailed accounts of the progress that has been made in the construction of public buildings.

The reports of the heads of all the respective bureaus will be found to be of unusual interest—containing, as they do, accurate information in regard to the affairs of the Government in this interesting period of its history.

Mr. S. M. Clark having resigned the office of Superintendent of the Bureau of Engraving and Printing, Mr. G. B. McCartee has been placed temporarily in charge of it. As the past management and present condition of this bureau are now under investigation by the Joint Committee on Replenishment and Reform, the Secretary feels at liberty only to say, at this time, that, from the examinations which he has caused to be made by officers and clerks of this department, he feels justified in remarking that the reports which have been at various times put in circulation in regard to over issues of notes or securities, and of dishonesty in the administration of the bureau, are unfounded.

A systematic effort is being made to reduce the expenses of the administration of the customs service, and with considerable success. The process is necessarily slow and beset with difficulties; but material reduction has been already made, and still greater is in progress.

During the war the business of the Treasury Department was so largely and rapidly increased, and so many inexperienced men necessarily employed, that perfect order and system could not be enforced. Many accounts were unsettled, and some branches of business had fallen into confusion. Much attention has been given by the Secretary "to straightening up" the affairs of the Department. He is now gratified in being able to say, that order and system have been introduced where they were found to be needed; that the bureaus are in good working order, and that the "machinery" of the department is in as satisfactory condition as perhaps it can be, under existing laws. The result of the examinations which he has caused to be made has excited his admiration of the wisdom displayed by Mr. Hamilton in the system of accounting which he introduced, and most favorably impressed him with the value of the services of the men who, poorly paid, and little known beyond the walls of the Treasury Building, have for years conducted, with unflinching fidelity, the details of a business larger and more complicated than was ever devolved upon a single department by any Government in the world.

In concluding this communication, it may not be inappropriate for the Secretary, in a few brief words, to review some points in the general policy of the administration of the Treasury for the past four years.

The following statement—published in the last Treasury report—exhibits the condition of the Treasury on the 1st of April, 1865:

Funded debt.....	\$1,100,361,241 00
Matured debt.....	349,420 09
Temporary loan certificates.....	52,452,323 29
Certificates of indebtedness.....	171,790,000 00
Interest bearing notes.....	526,812,800 00
Suspended or unpaid requisitions.....	114,256,548 93
United States notes, legal tenders.....	433,160,569 00
Fractional currency.....	24,254,094 07
Cash in the Treasury.....	\$2,423,437,002 18
	56,481,924 84
Total.....	\$2,366,955,077 34

By this statement it appears that, with \$56,481,924 84 in the Treasury, there were requisitions waiting for payment (the delay in the payment of which was greatly discrediting the Government) to the amount of \$114,256,548 93; that there were \$52,452,323 29 of temporary loan certificates liable to be presented in from ten to thirty days' notice, and \$171,790,000 of certificates of indebtedness, which had been issued to contractors, for want of the money to pay the requisitions in their favor, and which were maturing daily. At the same time, the efforts to negotiate securities were not being attended with the usual success, while the expenses of the war were not less than two millions of dollars per day. The vouchers issued to contractors for the necessary supplies of the army and navy—payable one-half in certificates of indebtedness and the other half in money—were being sold at a discount of from ten to twenty per cent., indicating by their depreciation how low was the credit of the Government, and how uncertain was the time of payment.

The fall of Richmond and the surrender of the army of Virginia under General Lee (which virtually closed the war), had not the effect of relieving the Treasury. On the contrary, its embarrassments were increased thereby, inasmuch as it seemed to leave the Government without excuse for not paying its debts, at the same time that popular appeals for subscriptions to the public loans were divested of much of their strength. As long as the Government was in danger by the continuation of hostilities, the patriotism of the people could be successfully appealed to for the purpose of raising money and sustaining the public credit, without which the war could not be vigorously prosecuted. When hostilities ceased, and the safety and unity of the Government were assured, self-interest became again the controlling power. It will be remembered that it was then generally supposed that the country was already fully supplied with securities, and that there was also throughout the Union a prevailing apprehension that financial disaster would speedily follow the termination of the war. The greatness of the emergency gave the Secretary no time to try experiments for borrowing on a new security of long time and lower interest, and removed from his mind all doubts or hesitation in regard to the course to be pursued. It was estimated that at least seven hundred millions of dollars should be raised, in addition to the revenue receipts, for the payment of the requisitions already drawn, and those that must soon follow—preparatory to the disbandment of the great Union army—and of other demands upon the Treasury. The anxious inquiries then were, by what means can this large amount of money be raised? and not what will be the cost of raising it. How can the soldiers be paid, and the army be disbanded, so that the extraordinary expenses of the War Department may be stopped? and not what rate of interest shall be paid for the money. These were the inquiries pressed upon the Secretary. He answered them by calling to his aid the well-tried agent who had

been employed by his immediate predecessors and by offering the seven and three tenths notes—the most popular loan ever offered to the people—in every city and village, and by securing the advocacy of the press, throughout the length and breadth of the land. In less than four months from the time the work of obtaining subscriptions was actively commenced the Treasury was in a condition to meet every demand upon it. But while the Treasury was thus relieved, the character of the debt was by no means satisfactory. On the first day of September it consisted of the following items:

Funded debt.....	\$1,109,568,191 80
Matured debt.....	1,503,020 09
Temporary loan.....	107,148,713 16
Certificates of indebtedness.....	85,093,000 00
Five per cent. legal tender notes.....	33,954,230 00
Compound interest legal tender notes.....	217,024,160 00
Seven-thirty notes.....	830,000,000 00
United States notes, legal tenders.....	433,160,569 00
Fractional currency.....	26,344,742 51
Suspended requisitions uncalled for.....	2,111,000 00

Total.....\$2,845,907,626 56  
Deduct cash in Treasury.....88,218,055 13

Balance.....\$2,757,689,571 43

From this statement it will be perceived that \$1,276,834,123.25 of the public debt consisted of various forms of temporary securities, \$433,160,569 of the United States notes—the excess of which over \$400,000,000 having been put into circulation in payment of temporary loans—and \$26,344,742 of fractional currency. Portions of this temporary debt were maturing daily, and all of it, including \$18,415,000 of the funded debt, was to be provided for within a period of three years. The seven-thirty notes were, by law and the terms of the loan, convertible at maturity, at the will of the holder, into five-twenty bonds, or payable, like the rest of these temporary obligations, in lawful money.

It was, of course, necessary to make provision for the daily maturing debt, and also for taking up from time to time such portions of it as could be advantageously converted into bonds or paid in currency before maturity, for the purpose of avoiding the necessity of accumulating large sums of money, and of relieving the Treasury from the danger it would be exposed to if a very considerable portion of the debt were permitted to mature, with no other means for paying it than that afforded by sales of bonds in a market too uncertain to be confidently relied upon in an emergency. In addition to the temporary loan, payment of which could be demanded on so short a notice as to make it virtually a debt payable on demand, the certificates of indebtedness, which were maturing at the rate of from fifteen to twenty millions per month; the five per cent. notes which matured in January following, and the compound interest notes, which were payable at various times within a period of three years, there were \$320,000,000 of seven-thirty notes which would become due as follows, viz.:

August 15, 1867.....	\$300,000,000
June 15, 1868.....	300,000,000
July 15, 1869.....	230,000,000

As the option of conversion was with the holders of these notes, it depended upon the condition of the market whether they would be presented for payment in lawful money, or to be exchanged for bonds. No prudent man, intrusted with the care of the nation's interest and credit, would permit two or three hundred millions of debt to mature without making provision for its payment; nor would he, if it could be avoided, accumulate large sums of money in the Treasury which would not be called for, if the price of bonds should be such as to make the conversion of the notes preferable to their payment in lawful money. The policy of the Secretary was, therefore, as he remarked in a former report, determined by the condition of the Treasury and the country, and by the character of the debt. It was simply, first, to put and keep the Treasury in such condition as not only to be prepared to pay all claims upon presentation, but also to be strong enough to prevent the success of any combinations that might be formed to control its management; and, second, to take up quietly, in advance of their maturity, by payment or conversion, such portions of the temporary debt as would obviate the necessity of accumulating large currency balances in the Treasury, and at the same time relieve it from the danger of being forced to a further issue of legal-tender notes, or to a sale of bonds, at whatever price they might command. In carrying out this policy, it seemed also to be the duty of the Secretary to have due regard to the interests of the people, and to prevent, as far as possible, the work of funding from disturbing legitimate business. As financial trouble has almost invariably followed closely upon the termination of protracted wars, it was generally feared, as has been already remarked, that such trouble would be unavoidable, at the close of the great and expensive war in which the United States had been for four years engaged. This, of course, it was important to avoid, as its occurrence might not only render funding difficult, but might prostrate those great interests upon which the Government depended for its revenues. It was, and constantly has been, therefore, the aim of the Secretary so to administer the Treasury, while borrowing money and funding the temporary obligations, as to prevent a commercial crisis, and to keep the business of the country as steady as was possible on the basis of an irredeemable and constantly fluctuating currency. Whether his efforts have contributed to that end or not, he does not undertake to say; but the fact is unquestioned that a great war has been closed, large loans have been effected, heavy revenues have been collected, and some thirteen hundred millions of dollars of temporary obligations have been paid or funded, and a great debt brought into manageable shape, not only without a financial crisis, but without any disturbance to the ordinary business of the country. To accomplish these things successfully, the Secretary deemed it necessary, as has been before stated, that the Treasury should be kept constantly in a strong condition, with power to prevent the credit of the Government and the great interests of the people from being placed at the mercy of adverse influences. Notwithstanding the magnitude and character of the debt, this power the Treasury has for the last three years possessed; and it has been the well-known existence, rather than the exercise of it, which has in repeated instances saved the country from panic and disaster. The gold reserve, the maintenance of which has subjected the Secretary to constant and bitter criticism, has given a confidence to the holders of our securities at home and abroad, by the constant evidence which it exhibited of the ability of the Government, without depending upon purchases in the market, to pay the interest upon the public debt, and a steadiness to trade, by preventing violent fluctuations in the convertible value of the currency, which have been a more than ample compensation to the country for any loss of interest that may have been sustained thereby. If the gold in the Treasury had been sold down to what was absolutely needed for the payment of the interest on the public debt, not only would the public credit have been endangered, but the currency; and, consequently, the entire business of the country would have been constantly subject to the dangerous power of speculative combinations.

Of the unavailing effort that was made by the Secretary to contract the currency, with the view of appreciating it to the specie standard, he forbears to speak. His action in respect to contraction, although authorized, and for a time sustained, was subsequently disapproved (as he thinks, unwisely) by Congress. This is a question, however, that can be better determined hereafter than now.

Complaint has been made that in the administration of the Treasury Department since the war there has been too much of interference with the stock and money market. This complaint, when honestly made, has been the result of a want of reflection, or of imperfect knowledge of the financial condition of the Government. The transactions of the Treasury have, from necessity, been connected with the stock and money market of New York. If the debt after the close of the war had been a funded debt, with nothing to be done in relation to it but to pay the accruing interest, or if business had been conducted on a specie basis, and consequently been free from the constant changes to which it has been and must be subject—as long as there is any considerable difference between the legal and commercial standard of value—the Treasury could have been managed with entire independence of the stock exchange or the gold room. Such, however, was not the fact. More than one-half of the national debt, according to the foregoing exhibits, consisted of temporary obligations, which were to be paid in lawful money, or converted into bonds, and there was in circulation a large amount of irredeemable promises constantly changing in their convertible value. The Secretary, therefore, could not be indifferent to the condition of the market, nor avoid connection with it, for it was, in fact, with the market he had to deal. He would have been happy had it been otherwise. If bonds were to be sold to provide the means for paying the debts that were payable in lawful money, it was a matter of great importance to the Treasury that the price of bonds should not be depressed by artificial processes. If the seven thirty notes were to be converted into five-twenty bonds, it was equally important that they should sustain such relations to each other, in regard to prices, that conversions would be effected. If bonds were at a discount, the notes would be presented for payment in legal tenders; and these could only be obtained by further issues, or the sale of some kind of securities. For three years, therefore the state of the market has been a matter of deep solicitude to the Secretary. If he had been indifferent to it, or failed carefully to study the influences that controlled it, or had hesitated to exercise the power with which Congress had clothed him for successfully funding the temporary debt by conversions or sales, he would have been false to his trust. The task of converting a thousand millions of temporary obligations into a funded debt, on a market constantly subject to natural and artificial fluctuations, without depressing the prices of bonds, and without disturbing the business of the country, however it may be regarded now, when the work has been accomplished, was, while it was being performed, an exceedingly delicate one. It is but simple justice to say, that its successful accomplishment is

in a great measure attributable to the judicious action of the Assistant Treasurer at New York, Mr. Van Dyck.

Similar complaint has also been made of the manner in which gold and bonds have been disposed of, by what has been styled "secret sales;" and yet precisely the same course has been pursued in these sales that careful and prudent men pursue, who sell on their own account. The sales have been made when currency was needed, and prices were satisfactory. It was not considered wise or prudent to advise the dealers precisely when and to what amount sales were to be made (no sane man operating on his own account would have done this), but all sales of gold have been made in the open market, and of bonds by agents or the Assistant Treasurer in New York, in the ordinary way, with a view of obtaining the very best prices, and with the least possible disturbance of business. In the large transactions of the Treasury, agents have been indispensable, but none have been employed when the work could be done equally well by the officers of the department. Whether done by agents or officers, the Secretary has no reason to suppose that it has not been done skillfully and honestly, as well as economically. He is now gratified in being able to say, that unless a very stringent market, such as was produced a few weeks ago by powerful combinations in New York, should send to the Treasury large amounts of the three per cent. certificates for redemption, no further sales of bonds are likely to be necessary. Until, however, the receipts from internal revenues are increased, the necessities of the Government will require that the sales of gold shall be continued. These sales are now being made by advertisements for sealed bids, instead of the agencies heretofore employed. The result, so far, has not been entirely satisfactory, but a proper respect for what, according to the tone of the press, appeared to be the public sentiment, seemed to require it. The new mode will be fairly tested, and continued, if it can be, without a sacrifice of the public interest.

The Secretary has thus referred to a few points in his administration of the Treasury, for the purpose of explaining some things which may have been imperfectly understood, and not for the purpose of defending his own action. Deeply sensible of the responsibilities resting upon him, but neither appalled nor disheartened by them, he has performed the duties of his office according to the best of his judgment and the lights that were before him, without deprecating criticism; and plainly and earnestly presented his own views without seeking popular favor. It has been his good fortune to have had for his immediate predecessors two of the ablest men in the country, to whose judicious labors he has been greatly indebted for any success that may have attended his administration of the Treasury. Nor is he under less obligation to his associates, the officers and leading clerks of the department, whose ability and whose devotion to the public service have commanded his respect and admiration.

HUGH McCULLOCH,  
Secretary of the Treasury,

HON. SCHUYLER COLFAX,  
Speaker of the House of Representatives.

## REPORT OF THE COMPTROLLER OF THE CURRENCY.

OFFICE OF THE COMPTROLLER OF THE CURRENCY,  
Washington, November 10, 1868.

SIR: In compliance with the provisions of section 61 of the national currency act, I have the honor to present, through you, to the Congress of the United States, the following report:

Since the last annual report 12 national banks have been organized, of which five are new associations. One was organized to take the place of an existing State bank, and six were organized to take the place of national banks previously organized, but now in liquidation and winding up, making the total number organized up to October, 1868.

Table exhibiting the number of banks, with the amount of capital, bonds deposited, and circulation, in each State and Territory, September 30, 1868.

States and Territories.	ORGANIZATION.			Capital paid in.	Bonds on deposit.	Circulation issued.	Circulation in actual.
	Organized.	Closed or closing.	In operation.				
Maine.....	61	..	61	\$9,085,000 00	\$8,407,250	\$7,569,166	\$7,510,066
New Hampshire...	40	..	40	4,785,000 00	4,839,000	4,328,195	4,281,695

From the number of banks organized, heretofore stated to be 1,685, should be deducted 56, leaving the number in active operation 1,629.

The banks to be excluded are the following:

NEVER COMPLETED THEIR ORGANIZATION SO AS TO COMMENCE BUSINESS.

The First National Bank of Lansing, Michigan, No. 232.  
The First National Bank of Penn Yan, New York, No. 169.  
The Second National Bank of Canton, Ohio, No. 463.  
The Second National Bank of Ottumwa, Iowa, No. 195.

SUPERSEDED BY SUBSEQUENT ORGANIZATION WITH THE SAME TITLES.

The First National Bank of Norwich, Connecticut, original No. 65, present No. 458.  
The First National Bank of Utica, New York, original No. 120; present No. 1,395.

IN VOLUNTARY LIQUIDATION.

The First National Bank of Columbia, Missouri.  
The First National Bank of Carondelet, Missouri.  
The National Union Bank of Rochester, New York.  
The National Bank of the Metropolis, Washington, D. C.

The First National Bank of Leonardsville, New York.  
The Farmers' National Bank of Richmond, Virginia.  
The Farmers' National Bank of Waukesha, Wisconsin.  
The City National Bank of Savannah, Georgia.  
The National Bank of Crawford County, Meadville, Pennsylvania.  
The First National Bank of Elkhart, Indiana.  
The First National Bank of New Ulm, Minnesota.  
The Pittston National Bank, Pennsylvania.  
The Berkshire National Bank of Adams, Massachusetts.  
The Fourth National Bank of Indianapolis, Indiana.  
The Kittanning National Bank, Kittanning, Pennsylvania.  
The First National Bank of Providence, Pennsylvania.  
The National State Bank of Dubuque, Iowa.  
The Ohio National Bank of Cincinnati, Ohio.

Since October 1, 1867:

The First National Bank of Kingston, New York.  
The First National Bank of Bluffton, Indiana.  
The First National Bank of Skaneateles, New York.  
The First National Bank of Jackson, Mississippi.  
The First National Bank of Downingtown, Pennsylvania.  
The National Exchange Bank of Richmond, Virginia.  
The Appleton National Bank, Appleton, Wisconsin.  
The National Bank of Whitestown, New York.  
The First National Bank of New Brunswick, New Jersey.  
The First National Bank of Titusville, Pennsylvania.  
The First National Bank of Cuyahoga Falls, Ohio.  
The First National Bank of Cedarburg, Wisconsin.  
The Commercial National Bank of Cincinnati, Ohio.  
The Second National Bank of Watertown, New York.  
The Second National Bank of Des Moines, Iowa.  
The First National Bank of South Worcester, New York.  
The National Mechanics and Farmers' Bank of Albany, New York.  
The First National Bank of Plumer, Pennsylvania.

Of the banks in liquidation, the following are winding up for the purpose of consolidating with other banks:

The Pittston National Bank, Pittston, Pennsylvania, with the First National Bank of Pittston.  
The Berkshire National Bank of Adams, Massachusetts, with the First National Bank of Berkshire.  
The Fourth National Bank of Indianapolis, Indiana, with the Citizens' National Bank of Indianapolis.  
The Kittanning National Bank, Kittanning, Pennsylvania, with the First National Bank of Kittanning.  
The First National Bank of Providence, Pennsylvania, with the Second National Bank of Scranton, Pennsylvania.  
The National State Bank of Dubuque, Iowa, with the First National Bank of Dubuque.  
The Ohio National Bank of Cincinnati, Ohio, with the Merchants' National Bank, of Cincinnati.  
The First National Bank of Titusville, Pennsylvania, with the Second National Bank of Titusville.  
The National Exchange Bank of Richmond, Virginia, with the First National Bank of Richmond.  
The Second National Bank at Watertown, New York, with the first National Bank of Watertown.

The following banks in liquidation are succeeded by new organizations, which are to take their circulation as fast as it is redeemed; this being the only process by which a change of location can be effected.

The First National Bank of Downingtown, Pennsylvania, succeeded by the First National Bank of Honeybrook, Pennsylvania.  
The First National Bank of New Brunswick, New Jersey, succeeded by the Princeton National Bank, Princeton, New Jersey.  
The Second National Bank of Des Moines, Iowa, succeeded by the Pacific National Bank of Council Bluffs, Iowa.  
The First National Bank of Plumer, Pennsylvania, succeeded by the First National Bank of Sharon, Pennsylvania.

## REPORTS.

The national currency act requires every association to make a report, exhibiting in detail its resources and liabilities on the first Monday of January, April, July and October, of each year. In addition to this, every association is required on the first Tuesday of each month to make a statement, exhibiting the average amount of loans and discounts, specie and other lawful money, deposits, and circulation; and banks not located in the cities named in section 31 of the act are required also to return the amount due them available for the redemption of their circulation.

The quarterly reports, coming, as they do, upon a certain specified day, known in advance, and for which the amplest preparation may be made, can hardly be expected to present the actual working condition of the banks. They are, of course, careful to exhibit the full amount of reserve required, and otherwise a full compliance with all the important provisions of the law. But it is in the large cities, especially in New York, that this plan proves most objectionable. Gold and stock speculators, knowing that at certain time the banks will make it a point to have a full supply of lawful money in their vaults, get up combinations for the purpose of producing a scarcity of legal-tender notes, and a stringent money market, so as to depress the market for government, State, railroad, and other securities. National banks, held firmly to the requirements of the law, are seriously embarrassed by such trickery. Their necessities compel them to have the lawful money at any hazard. Besides the damage resulting from an unnecessary and forced depression of public securities, regular commercial transactions are impeded, suspended, or forced to be carried on at ruinous rates, owing to the artificial stringency thus produced. It is becoming more manifest, as one quarter succeeds another, that the evil is becoming more and more intolerable. Honest industry, regular trade, and legitimate business of every kind, which depend upon the banks for their usual facilities, are subjected to great inconvenience, hardship, and loss, through the abuses thus practiced.

This state of things calls for a prompt and efficient remedy. This may be found in an amendment to section 34 of the act, authorizing the Comptroller of the Currency to call upon the banks for five detailed statements or reports during each year, fixing upon some day that is past for the date of the report. In this way the condition of the banks may be ascertained at irregular intervals, without previous preparation on their part; and the precise period when the reports will be called for being unknown to the public, outside operators will be prevented from conspiring against the banks and the honest trade of the country.

This subject is commended to the early attention of Congress.

## BANKS IN VOLUNTARY LIQUIDATION.

Section 42 of the currency act provides that any association may go into liquidation and be closed by a vote of shareholders owning two-thirds of its stock; that due notice of such action shall be published, &c.; and at any time after the expiration of one year from the publication of such notice, the said association may pay over to the Treasurer of the United States the amount of its outstanding notes in lawful money of the United States, and take up the bonds which it has on deposit with the Treasurer as security for such circulating notes—leaving it optional with the bank or its representatives to take up the bonds, or not.

Under this provision a bank may go into liquidation, pay off its depositors and other creditors, do no business, have no existence as a bank of discount and deposit, and yet reap all the benefits of a circulation guarantied by the government. In some cases the ownership has been concentrated in the hands of two or three individuals, who continue to do business as private bankers, avoid taxation, evade the requirements of the currency act, and still retain the most profitable feature of a national bank.

To correct abuse of this kind, it is suggested that national banking associations which go into voluntary liquidation be required to provide for their outstanding circulation in lawful money, and take up their bonds within three or six months; in default of which, the Comptroller shall have power to sell their bonds at public auction in New York City, and, after paying to the Treasurer the amount of the outstanding circulation of the bank in lawful money, to pay over any excess realized from the sale of the bonds to the association or its legal representatives.

Banks that are winding up for the purpose of consolidating with other banks, or for the purpose of reorganizing at some other and more desirable points, should be excepted from the foregoing requirements.

## A CENTRAL REDEEMING AGENCY.

The opinion was expressed in the last annual report from this office that it was important that a system of redemptions for national bank notes should be established as early as practicable, by means of which they should be made convertible into the lawful money of the country, whether it be paper or gold, at the principal centre of trade. Without repeating the argument then made, the conviction is again expressed that only by rigid, unfailing redemptions at a central point can the ban currency of the country be kept at a uniform par value.

A prevalent objection to this doctrine is, that it would render the country banks tributary to New York. While there is strong reason to believe this objection would prove to be unfounded, yet it may be entirely removed by authorizing the national banks of the country to take the whole matter into their own hands. If Congress should provide by law for the organization of a national bank in New York City, without circulation, in which every national bank should be required to

become a stockholder in proportion to its surplus fund, a bank with a capital of from ten to fifteen or twenty millions could be established, which would become the redeeming agency of the whole country, and the clearing-house of all national bank notes in circulation. It would be owned, controlled, and managed by the banks themselves for their benefit, and in their interest. It should have one department devoted exclusively to redemptions and exchanges of currency, and another department devoted to a general banking business. The latter department could be made to pay all the expenses of the redemptions and exchanges, and yield a revenue to the stockholders in addition, which would be so much interest on their surplus funds thus invested. Such an institution would prove of incalculable benefit to the banking, commercial and industrial interests of the country. It would place the bank circulation of the country at once upon the soundest footing, and demonstrate practically the fact that the banks stand ready to make their issues not only redeemable, but actually convertible at all times in the great markets of the Union.

Moreover, such an agency, by becoming a place of deposit for that portion of the reserves kept in New York, would remedy the evils adverted to in my last report, growing out of the payment of interest on the balances of the country banks, and their consequent use by the New York City banks. The reserves, instead of being loaned on call to speculators and brokers, as is largely done at present, would be held exactly where they would be needed, and would be applied to just the purpose for which they were intended. They would be actual reserves, and at all times available as such; thus adding to the safety and the credit of the currency of the country, and carrying into practical operation the spirit and intent of the law on this subject.

This suggestion is earnestly commended to the consideration of Congress, as tending to reconcile the interests of all sections on the question of redemptions.

## THE PERIODICAL STRINGENCY IN NEW YORK CITY.

A careful study of the bank statements of New York taken separately, and the application of the facts so obtained to the aggregate statement or abstract of the whole, affords valuable and instructive information.

The abstract shows the total of loans to be \$163,634,000.

An examination of the statements in detail shows the character of the loan to be substantially as follows:

Commercial or business paper.....	\$90,000,000
Demand loans.....	68,500,000
Accommodation loans.....	3,500,000
Suspended loans.....	1,500,000
Total.....	163,500,000

Nine sixteenths, or rather more than half the loan, is legitimate business paper; the balance is upon call, or for accommodation. The amount loaned on call for commercial purposes is not stated; but reliable information leads to the belief that it is very small. The customs and necessities of trade are of such a character as to preclude loans of this kind. The merchant, with his capital invested in trade, must know when his liabilities are to mature, in order that he may be prepared to meet them. It would be unsafe for him to use money in his business which he is liable to be called on to pay at any moment. Consequently, merchants and others in business where the profits are regular and legitimate, yielding a fair return to skill and industry, cannot afford to borrow money on call. Dealers in money, stocks and gold constitute almost the only class of business men whose transactions are of such a nature as to make call loans desirable or profitable; and it is scarcely possible to avoid the inference that nearly one-half of the available resources of the national banks in the city of New York are used in the operations of the stock and gold exchange; that they are loaned upon the security of stocks which are bought and sold largely on speculation, and which are manipulated by cliques and combinations, according as the bulls or bears are, for the moment, in the ascendancy.

In addition to this direct loan of \$70,000,000, they furnish facilities by means of certified checks to the same class of operators to an amount ranging from \$110,000,000 to \$120,000,000 daily, (on the 5th of October the amount was \$112,800,000), and these checks are made to swell the amount of individual deposits. They are credited to depositors as money, and are circulated and treated as money by the banks and by their customers; yet, when ascertaining the amount of deposits upon which they must hold a reserve, or upon which they must pay taxes, the banks invariably deduct all such checks on hand. For instance, on the 1st Monday of October they reported:

Individual deposits.....	\$224,170,000
But deducting checks on hand.....	112,800,000

They had actual deposits of..... \$111,370,000

Taking the call loans and the certified checks together, the somewhat startling fact is developed, that the New York National Banks furnish \$70,000,000 of capital and \$112,000,000 of credit for speculation.

The use of certified checks is a direct inflation to that extent; which stimulates the stock market, and keeps the price of a large class of miscellaneous securities much above their actual value, so that the market is feverish and fluctuating, and a slight stringency reduces the prices. Taking advantage of an active demand for money to move the crops, west and south, shrewd operators form their combinations to depress the market by "locking up" money—withdrawing all they can control or borrow from the common fund: money becomes scarce, the rate of interest advances, and stocks decline. The legitimate demand for money continues; and, fearful of trenching on their reserve, the banks are straitened for means. They dare not call in their demand loans, for that would compel their customers to sell securities on a falling market, which would make matters worse. Habitually lending their means to the utmost limit of prudence, and their credit much beyond that limit, to brokers and speculators, they are powerless to afford relief. Their customers, by the force of circumstances, become their masters. The banks cannot hold back or withdraw from the dilemma in which their mode of doing business has placed them. They must carry the load to save their margins. A panic, which should greatly reduce the price of

securities, would occasion serious if not fatal results to the banks most extensively engaged in such operations, and would produce a feeling of insecurity which would be very dangerous to the entire banking interest of the country.

The fact that a banking interest with capital and surplus of \$100,000,000 can be, and has been repeatedly placed at the mercy of a few shrewd, though bold and unscrupulous men, is evidence of some inherent defect in its management, and the foregoing statement may serve in some degree to show where the error lies:

1st. In demand or call loans to brokers and speculators, on collateral security, by which nearly one-half the active resources of the banks are used directly to foster and promote speculative operations.

2d. Certified checks or loans of credit to the same class of men, whereby stocks are inflated and immense operations are carried on daily upon fictitious capital.

3d. The payment of interest on bank balances; which, being payable on demand, must be loaned on call in order to avoid loss.

The necessity for making call loans is, in part, owing to the fact that a large fund, belonging to country banks, is held by the New York City banks, subject to the payment of interest. This fund is liable to be demanded at any time. But, bearing interest, it cannot be suffered to lie unemployed, and so must be loaned on call. It may be merely a coincidence; but on the first Monday of October, the bank deposits held by the New York City banks were \$68,529,417, and the call loans reported were \$68,500,000. These loans, as before stated, are made to brokers, stock and gold operators, on collateral security, and constitute a large portion of the capital used in speculation. Thus, by a vicious practice, the reserve fund of the country is handed over to the tender mercies of Wall street and its purloins.

Not content with the \$70,000,000 so absorbed, a fictitious capital of \$120,000,000 is created by means of certified checks, which, by an ingenious arrangement, after being traded on the street, are finally traded back to the banks that issue them, without materially increasing or diminishing the cash deposits. Many of the largest and best managed national banks in New York deprecate the practice herein set forth, and look with anxiety and alarm toward the final issue; but they are all involved in the danger. The failure of one or more institutions, through reckless management, would endanger the whole. If all bankers were wise and prudent, no law would be required to restrain them; but they are in the position of trustees—trustees for their stockholders, trustees for their depositors, and trustees for the public. If they habitually engage in practices dangerous to stockholders, depositors and the public, the law may be invoked to provide a remedy. It is not becoming that institutions organized under an act of Congress for the public good, should so far pervert their corporate powers and privileges as to work detriment to the public interests. If they regard legislative interference as arbitrary and tyrannical, they may have the option of conforming to the requirements of law, or of withdrawing from a system to which they add no strength.

A return to specie payments would be the best remedy for speculation; as every departure from specie value is the signal and incentive for its rise and reign. As a present corrective, however, it is recommended that national banks be prohibited by law from paying interest on bank balances, and also from certifying checks to be good which are not drawn against actually existing cash deposits standing to the credit of the drawer when the checks are made and presented.

#### PANICS

Notwithstanding the fact, however, that the troubles to which the banking interest is liable are caused primarily by the disregard of sound principles on the part of the banks themselves, it is nevertheless true that they do recur from time to time, and that they are usually the cause of wide-spread disaster—disaster reaching far beyond the immediate circle in which the trouble originated, and extending into every branch of trade, and into every section of the country.

When money is abundant, the temptation is very great to find employment for it as much as possible; and though the danger of too great extension is palpable, and has been demonstrated by experience, yet the majority of bankers are prone to go on, carrying full sail, until they find themselves in the breakers, repeating the same mistakes and suffering the same retributions which they themselves, or their predecessors, have before made and suffered. The facts must be taken as they are found to exist. Panics come; and while it would be wise to learn lessons of wisdom from experience, so as to avoid their recurrence, the fact that we are, and will probably continue to be, liable to panics as long as men make mistakes, or act in reckless disregard of established principles, should be duly considered. Recognizing this fact, it may not be without profit to ascertain the nature of the trouble that prevails in a time of financial pressure.

If banks habitually lend all their available means when times are easy, or when there is no extraneous demand for money, it is evident that when an extra demand arises, it can be met only by withdrawing or calling in loans previously made. For instance, during the Summer months there is but little demand for money throughout the country generally, beyond the ordinary wants of regular trade, and a large surplus is accumulated in the large cities, principally in New York. The banks in New York, with their coffers full to overflowing, seek employment for their money, and loan freely as far as they can find to borrowers, and at low rates. Their funds are thus absorbed, and to a considerable extent form the basis upon which a large amount of business is transacted. Abundance of money at low rates stimulates and builds up a certain kind of business, which comes to depend upon the banks for its activity and support. Meantime the grain crops of the West, and the cotton crops of the South, are gathered, and are made ready for shipment to market. Both are prime necessities to the country at large. They must go forward, and money is required to buy them and to move them. The demand is paramount and must be answered; but it can be met only by withdrawing money that has been absorbed and become the very life blood of a business built up and supported by its use.

The banks contract their loans, and murmurs are heard of stringency. The crops require all the money in the country to pay for them; but Wall street demands its share, insisting, and not without reason, that the banks encourage its speculative operations by tendering means in abundance, and now to withdraw the accustomed support will be ruinous to its interests. The banks, interested so largely in the operations of their customers, cannot afford to call in their loans, or to cut off supplies; their own safety is at stake, and they must carry their customers through, or suffer with them the consequences of a dangerous convulsion, possibly of a fatal collapse.

This is substantially the history of a panic under the present order of things. Possibly it might be prevented by a proper conservatism exercised in season; but prudence is not the most distinguishing trait of the times. The important question, therefore, is how to relieve the public? There is not money enough in the country to meet all the demands at once. A suspicion that a financial institution is unable to respond to all demands, is almost fatal to its stability; and when confidence is unsettled, judgment loses its sway, and unreasoning panic follows.

#### THE REMEDY.

If the Treasury of the United States could hold in reserve a certain amount of legal tender notes in excess of the amount of money in regular circulation, to be advanced to banking institutions at a specified rate of interest upon the deposit of United States bonds as collateral security, a source of relief would be established which would effectually prevent a monetary pressure from being carried to any ruinous extent.

This proposition is not anomalous or without precedent. In time of severe pressure, the Bank of England has been authorized by the Chancellor of the Exchequer to issue its notes in excess of the limitations prescribed in its charter. This was done in violation, or without authority, of law, upon the pledge by the Government of an act of indemnity. In our government no power to make such pledges exists; and, therefore, any extraordinary provision of the character suggested must be authorized by law.

The measure is one of relief and protection to the interests of the public at large, and therefore justifiable. If the consequences of overtrading, speculation, and otherwise reckless conduct could be confined to the parties or institutions so overtrading or speculating, they might well be left to their own resources; but immense interests are involved which are in no way responsible for the trouble. A financial panic generally extends to commercial circles, and in several instances has damaged the trade and industry of the country to such an extent that its effects have been felt for years. Any measure that would mitigate or prevent such calamities would be a measure of national importance and a proper subject for Congressional legislation.

#### SPECIE PAYMENTS.

The subject of specie payments naturally comes up whenever the currency question is discussed, and much ingenuity has been exercised in devising plans for an early resumption.

The principle obstacle to specie payments may be found in the statement of the public debt of the United States for the 1st of October, 1868, under the head of "Debt bearing no interest," as follows:

United States notes	\$26,021,073 00
Fractional currency	32,933,614 17
Making together	388,954,687 17

of Government notes circulating as money, and designed to take the place of gold and silver by being made "a legal tender for all debts, public and private, except duties on imports" and interest on the bonded debt. As long as the people prefer an inferior currency—inferior because irredeemable and inconvertible except at a heavy discount—they will have it to the entire exclusion of the precious metals. Whenever the people conclude that it is more economical to conduct the business of the country on a specie basis, they can ordain specie payments by making provision through their representatives in Congress for the payment or withdrawal of the present depreciated paper currency issued and kept in circulation by the Government. And whenever the people wish to restore the credit of the nation, they can do it through their representatives in Congress, by removing the only embarrassment that stands in the way—by directing that provision shall be made for the payment of a floating indebtedness amounting to \$383,000,000, consisting of promises to pay that are never paid—and so establish the fact that the United States is a solvent debtor, able and willing to pay every debt as it becomes due. Specie payments and the restoration of public credit are within the reach, and depend upon the will, of the people of the United States.

#### FREE BANKING.

Whenever Congress shall inaugurate measures looking to the appreciation of United States notes to a gold standard, the effect of such measures will probably be to diminish the volume of such notes in circulation. To what extent the reduction would have to be carried in order to place them permanently on a specie basis, would at present be mere matter of speculation. Doubtless a large amount might be carried, with profit to the Government and with benefit to the public.

As soon as the effect of such measures becomes apparent, by the gradual approach of legal tender notes to a par with gold, the restrictions imposed upon the issue of circulating notes by national banks may be safely removed, provided the establishment of a central redeeming agency in the city of New York, at which all national bank notes are redeemable at par, shall be required by law. Any inconvenience resulting from a reduction of legal tenders may thus be remedied, and the remedy will be in the hands of the only competent judge of the necessities of the case—the business public of the United States.

Respectfully submitted,

H. R. HULBURD,  
Comptroller of the Currency.

Hon. HUGH McCULLOCH,

Secretary of the Treasury.

## COMMERCIAL AND MISCELLANEOUS NEWS.

**IMPORTS AND EXPORTS FOR THE WEEK.**—The imports this week show considerable decrease both in dry goods, and in general merchandise, the total being \$4,899,237, against \$5,320,493 last week and \$8,657,355 the previous week. The exports are \$4,020,901 this week, against \$4,269,207 last week, and \$3,261,984 the previous week. The exports of cotton the past week were 14,229 bales, against 18,531 bales last week. The following are the imports at New York for week ending (for dry goods) Dec. 4, and for the week ending (for general merchandise) Dec. 5:

## FOREIGN IMPORTS AT NEW YORK FOR THE WEEK.

	1865.	1866.	1867.	1868.
Dry goods.....	\$1,994,024	\$1,432,820	\$471,886	\$941,508
General merchandise...	3,119,605	3,196,152	1,715,286	3,917,729
Total for the week....	\$5,113,629	\$4,628,972	\$2,187,172	\$4,899,237
Previously reported....	199,293,696	265,965,571	224,078,747	238,103,117

Since Jan. 1.....\$195,542,325    \$270,594,153    \$226,265,919    \$233,002,254

In our report of the dry-goods trade will be found the imports of dry goods for one week later.

The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports, for the week ending Dec. 8:

## EXPORTS FROM NEW YORK FOR THE WEEK.

	1865.	1866.	1867.	1868.
For the week.....	\$4,618,019	\$3,101,416	\$4,628,013	\$4,020,901
Previously reported....	160,805,808	175,383,922	175,000,821	152,871,264

Since Jan. 1.....\$166,423,887    \$175,485,333    \$179,678,834    \$156,892,265

The value of exports from this port to different countries (exclusive of specie) for the past week, and since January 1, compared with the corresponding time of last year, is shown in the following table:

To	1868.	1867.
	This week.	Week.
Great Britain.....	\$1,828,259	\$2,545,248
France.....	29,217	342,078

<b>Miscellaneous.</b>				
Union Trust Company.....	4	Jan 2	Company's Office	Dec 25.

FRIDAY, December 11, 1868, P. M.

**THE MONEY MARKET.**—The last bank statement indicated a further outflow of currency, the legal tenders being \$2,900,000 lower, while it is to be presumed that there was a loss also of bank currency. The deposits showed an increase of \$2,400,000, arising from an addition to the loans of \$5,100,000. The addition to the loans was in part attributable to investments by the banks in U. S. bonds, which they reckon as part of their loans. The statement showed a reduction in the legal tender surplus of about \$1,400,000; which, following a loss of about \$3,500,000 the week previous, was not a favorable showing.

It is quite probable that to-morrow's statement will show a further loss of legal tenders; for the banks have been shipping considerable amounts of currency through the week. The late excessive stringency in money checked severely the forwarding of produce from the interior; and now that the loan market has become easier, there is a very brisk demand from the interior, which would otherwise have come earlier. The demand connected with the pork crop is quite active, and is causing currency to be sent freely to Cincinnati and Chicago, and remittances are made even to Milwaukee. The Southwestern cities also are drawing moderate amounts from their correspondents here. At the Southern ports, generally, exchange rules against New York, and considerable amounts both of currency and gold are being sent there, the gold being mainly destined for Texas, where the planters appear to have little confidence in greenbacks. The Treasury has been calling in funds from the Government depositories, both in the West and at New York, which has taken a moderate amount of money from the banks within the week.

The result of these movements has been apparent in an increased activity in money and an advance of the rate on call loans to 7 per cent. At the close of to-day there was a very active demand, and some parties are said to have found difficulty in making up their bank account.

Discounts at the beginning of the week, were easy at 7@8 per cent for prime paper; at the close there was more difficulty in negotiating paper, rates being strong at 7@9 per cent.

The following are the quotations for loans of various classes:

	Per cent.		Per cent.
Call loans.....	7 @	Good endorsed bills, 3 &	
Loans on bonds & mort..	@ 7	4 months.....	8 @ 10
Prime endorsed bills, 2	@ 8	do single names.....	9 @ 11
months.....	7 @ 8	Lower grades.....	12 @ 15

**UNITED STATES BONDS.**—Government securities have been dull and, at the close, range ¼@½ below our last quotations. A combination of influences has tended to depress the market against causes which, at this season, usually induces more or less firmness.

The assembling of Congress has renewed the agitation respecting the remodelling of the form of the debt; and although no very definite plans have so far been developed, yet as there is little to guide opinion as to what may be the result of legislation on the question, and as the probabilities are that a strong attempt will be made to reduce the rate of interest, there is an inclination among investors to postpone purchases of this class of securities, while the same considerations make holders the more disposed to sell. The activity in money has checked buying by the banks and financial institutions, which usually at this season invest a portion of their funds in bonds with a view to holding them until the Spring demand for money sets in. The activity in money at the West is causing bonds to be thrown upon the market, and any surplus there quickly finds its way here. Speculators and some of the dealers avail themselves of this condition of things to break prices, in order to make a market in which to buy preparatory to the rise which usually occurs in January under the demand for the employment of half-yearly interest and dividends. The suggestion in the President's message favoring the withholding of the interest on bonds for sixteen years, thereby creating a fund with which to pay the principal, though regarded everywhere as utopian and denounced as repudiatory, has yet had the effect of creating an uneasy feeling among some bondholders, especially as it gives an appearance of moderation to the less violent schemes advocated by other semi-repudiationists. By some it is regarded as foreshadowing a Southern policy, of which Mr. Johnson emulates to be an exponent. In sympathy with these influences the market closes weak.

The following are the closing prices of leading government securities, compared with preceding weeks:

	Oct. 30.	Nov. 13.	Nov. 20.	Nov. 27.	Dec. 4.	Dec. 11.
U. S. 6's, 1881 coup.....	112½	112½	114½	115½	115	114½

U. S. 10-40's, ".....	103½	105½	106½	106½	105½	105½

**RAILROAD AND MISCELLANEOUS STOCKS.**—The stock market has been dull, and, on the whole, weak, every stock on the list being lower, and the range of decline being 1@5 per cent. There appears to be no special interest of any influence at present committed in favor of higher prices. Stocks are, perhaps, very generally distributed on the street. The larger operators, connected with the management of the companies, are in the main holding comparatively few stocks, and are, therefore, interested in prices going lower, so as to afford them an opportunity of buying preparatory to an upward movement in the new year, when money is abundant. The dragging, insipid tone of the market thus resulting induces the smaller speculative holders to gradually sell out their stocks, with the consequence of a steady fall in prices. The growing activity in money encourages this selling process. The market still feels the effect of the recent exposures of speculative management of roads and of the numerous suits against directors.

The chief feature has been New York Central. At the beginning of the week reports were circulated that the directors, at the annual meeting held on Wednesday, would make an extra dividend in either stock or cash, on which the stock advanced to 127½. As the meeting separated without taking any action relative to the dividend, the stock fell back to 123½, and closes dull at 124. Toward the close, Erie has exhibited more movement, advancing to-day from 38 to 40½. The rise is partially predicated on a rumor that the direction has retired 200,000 shares of the new stock, or upon an impression that if they have not yet done so, they shortly will. The Company has this week signed papers leasing the Atlantic and Great Western Railroad for twelve years, upon condition of the payment of 30 per cent of the gross receipts of the leased road to the Atlantic and Great Western Company; or not less than \$1,800,000 per annum; the Erie Company engaging to keep the track, buildings and rolling stock in good repair. It also appears from a statement made by the President that the Erie Company is building an extension which will give it a narrow gauge connection with Chicago. These arrangements appear to be very generally construed on the street as favorable to the prospects of the Company, and have increased the disposition to buy the stock.

The market closes dull and weak.

The following were the closing quotations at the regular board compared with those of the six preceding weeks:

	Oct. 30.	Nov. 6.	Nov. 13.	Nov. 20.	Nov. 27.	Dec. 4.	Dec. 11.

**THE GOLD MARKET.**—The steady upward tendency in gold continues. On Saturday the price advanced to 136½ upon sensation rumors of the death of Napoleon, riots in Paris, and difficulty between Russia and Turkey; from this the price subsequently reacted, and has since ranged between 135½ and 136½, closing at 135½. The advance of foreign exchange to near the specie shipping rate has induced a very strong feeling among foreign bankers. The loss of bullion this week from the vaults of the Bank of England and the Bank of France is regarded as foreshadowing a rise of the rate of discount in the European money markets; which also has a tendency to encourage buying. Cash gold is easier, loans having been made through the week at 4@7 per cent "for carrying."

The fluctuations in the gold market, and the business at the Gold Board during the week closing with Friday, are shown in the following table:

	Quotations.	Open.	Low.	High.	Clos.	Total	Balances.
		ing.	est.	ing.	ing.	clearings.	Gold. Currency.
Saturday, Dec. 5.....	135½	135½	136½	136½	136½	61,610,000	\$1,986,717 \$3,276,456

Balance on Saturday evening.....	\$88,482,011 40
Decrease during the week.....	650,842 19

Total amount of Gold Certificates issued, \$1,614,000. Included in the receipts of customs were \$88,000 in gold, and \$1,470,656 in Gold Certificates.

**FOREIGN EXCHANGE.**—The rates for sterling bills have advanced to close upon the specie shipping point, prime bankers' sight drafts being 110½. This quotation is ½ above the rate for 60 days bills, a difference equal to 5½ per cent. for money at London. This wide difference has arisen from the fact that large amounts of sight bills have to be delivered this month and next in return for exchange borrowed against stocks during the late stringency in money, as a means of raising funds to carry stocks. Apart from this, rates are made firm by the comparative scarcity of cotton bills.

The following are the closing quotations for the several classes of foreign bills, compared with those of the three last weeks:

	Nov. 20.	Nov. 27.	Dec. 4.	Dec. 11.

The Commercial Times.

## COMMERCIAL EPITOME.

FRIDAY NIGHT, Dec. 11.

Trade continues dull, but it is plain that there is a rapid growth of confidence in commercial circles—an improvement which there are many circumstances to favor, but any considerable revival of business is not expected till after the holidays. At the same time, it must be borne in mind that speculation is likely to be held in check by the various financial measures which are or may be pending in Congress—some of them tending more or less effectively to the resumption of specie payment.

Cotton declined, but afterwards recovered tone and price. Breadstuffs have slightly advanced. Groceries have been doing better, especially in Sugars. Tobacco has had an upward tendency.

Hides have sold largely at very full prices, and the stock is very small. Leather has partially advanced.

Naval Stores have slightly declined, and close quiet. Oils show a general improvement, with an increased demand. Petroleum has taken an upward turn, with considerable activity in the past few days, but the movement is mostly speculators; shippers refuse to pay the prices to any extent.

East India Goods have developed a better tone, and Calcutta Linseed has decidedly advanced. Metals have been fairly active; Copper has further advanced, in anticipation of a higher tariff on the imported article; Tin has brought more money; Pig Iron has been very irregular, and Spelter declined.

Fish of all kinds scarce and firm. Hops have been taken freely for export at low prices. Hay has also declined. Whiskey has been heavy. Building materials of all kinds are quiet and firm. Tallow has slightly declined, leading to more activity.

Wool is very firmly held, and the demand shows some improvement, though still limited. There do not appear to be any needy holders; stocks are light, and the quantity yet to come forward from the wool-growers is believed to be small.

Freights have ruled extremely dull; but the amount of room on the berth is limited—(most of the room for British ports having been engaged ahead), and rates are without much change. The advance in Breadstuffs has reduced the amount going abroad, and Petroleum shipments have been curtailed by the speculative complications, but large quantities of Provisions and Cotton have afforded employment to all the available room. Business to Liverpool by steam to-day was at 6½d. for corn and 1½@¾d. for cotton.

In Provisions, we note more activity in Beef for shipments; and in hog products there is no pressure to realize, but shippers still manifest considerable caution, though not unwilling to operate when choice goods are offered. The general consumptive demand is good. At to day's market mess pork sold largely for January and February delivery, at \$25 00@25 25; prime steam lard, home delivery, 15½@15¾c.; and short-ribbed bacon, for January, at 13½c.

**Receipts of Domestic Produce for the Week and since Jan. 1.**

The receipts of domestic produce for the week and since Jan. 1 and for the same time in 1867, have been as follows:

### Exports of Leading Articles from New York.

The following table, compiled from Custom House returns, shows the exports of leading articles of commerce from the port of New York since January 1, 1868. The export of each article to the several ports *for the past week* can be obtained by deducting the amount in the last number of the CHRONICLE from that here given :

[illegible]

## Imports of Leading Articles.

The following table, compiled from Custom House returns, show the foreign imports of certain leading articles of commerce at this port for the last week, since Jan. 1, 1868, and for the corresponding period in 1867:

[The quantity is given in packages when not otherwise specified.]

	For the week.	Since Jan. 1, 1868.	Same time 1867.		For the week.	Since Jan. 1, 1868.	Same time 1867.

## COTTON.

FRIDAY, P. M., December 11, 1868.

By special telegrams received by us to-night from each of the Southern ports we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, Dec. 11. From the figures thus obtained it appears that the total receipts for the last seven days have reached 88,404 bales, (against 91,233 bales last week, 76,989 bales the previous week, and 73,120 bales three weeks since,) making the aggregate receipts since September 1, 1868 up to this date, 814,716 bales, against 643,568 bales for the same period in 1867, being an excess this season over last season of 171,148 bales. The details of the receipts for this week (as per telegraph) and the corresponding week of 1867 are as follows:

	Receipts—1868.	Receipts—1867.		Receipts—1868.	Receipts—1867.
Received this week at—			Received this week at—		
New Orleans.....bales.	35,270	24,273	Florida.....bales	784	938
Mobile.....	12,287	20,833	North Carolina.....	1,262	1,172
Charleston.....	7,905	9,701	Virginia.....	4,981	7,231
Savannah.....	15,314	18,445	Total receipts.....	88,404	91,96
Texas.....	4,516	2,569	Decrease this year.....	3,550	
Tennessee, &c.....	6,085	6,743			

The exports for the week ending to-night reach a total of 54,307 bales, of which 32,465 were to Great Britain, and 21,842 bales to the Continent, while the stocks at all the ports, as made up this evening, are now 267,936 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us by our own correspondents at the various ports to-night:

Week ending	Exported to—	Total	Same week	Stock—
Dec. 11.	G't Britain. Contin't.	this week.	1867.	1868.
New Orleans.....	9,698	11,059	20,757	21,155
Mobile.....	...	...	1,267	118,630
Charleston.....	4,176	141	4,317	44,789
Savannah.....	6,209	...	4,741	59,721
Texas.....	...	1,408	6,209	11,542
New York.....	11,878	7,916	1,408	32,258
Other ports.....	504	1,318	19,794	18,126
Total.....	32,465	21,842	16,263	29,891
Total since Sept 1.	210,580	164,169	375,049	12,800
			286,944	25,357

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 4,445 bales, while the stocks to-night are 30,961 bales less than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports since Sept. 1, according to the latest

mail returns. We do not include our telegrams to night, as we cannot insure the accuracy or obtain the detail necessary, by telegraph:

## Receipts and Exports of Cotton (bales) since Sept. 1, and Stocks at Dates Mentioned.

The market has shown but little animation this week, though with only moderate offerings prices have been firm and higher, closing on Thursday at 25c for Middling Uplands. This firmness is chiefly the result of the constant purchases here and at the Southern markets of the shorts to cover their contracts. Spinners have only bought to supply more pressing wants, while the sales for export are mostly to cover sales at Liverpool for December and January shipment. To-day, with unfavorable Liverpool accounts and a better stock statement from there than was anticipated, our own market is dull but not quotably lower. The sales for forward delivery have reached 3,000 bales (all Low Middling except 200 bales to-day) at rather easier rates, 1,500 bales for February being sold at 22½c, and 700 bales at the same price for January. To-day 200 bales of Middling are reported at 24c, and 100 bales Low Middling at 23c. For immediate delivery the total sales of the week foot up 18,914 bales (including 1,672 bales to arrive), of which 6,750 bales were taken by spinners, 3,526 bales on speculation, 9,037 bales for export, 601 in transit and the following are the closing quotations:

	Upland & Florida.	Mobile.	New Orleans.	Texas.
Ordinary.....	22 @....	22½ @....	22½ @....	22½ @....
Good Ordinary.....	23 @....	23½ @....	23½ @....	23½ @....
Low Middling.....	24 @....	24½ @....	24½ @....	24½ @....
Middling.....	25 @....	25½ @....	25½ @....	25½ @....

Below we give the sales for immediate delivery, and price of middling cotton at this market each day of the past week:

Thursday.....	3,497	25 @....	25½ @....	25½ @....	25½ @....
Friday.....	2,794	25 @....	25½ @....	25½ @....	25½ @....

TRANSIT COTTON.—Although there have been large offerings of Transit Cotton during the week, the sales have been confined to two lines; one of 301 bales low middling at 23c, Mobile to Liverpool by sail, and the other 300 bales same at 23½c by steam, Mobile to Liverpool. The high rates asked have prevented further transactions.

RECEIPTS AND EXPORTS.—The receipts continue this week on a very fair scale. There is a manifest disposition among some of the planters to hold back for better prices, and the continued large sales here at full rates for forward delivery encourage them in this course. Still the receipts are liberal and, as the exports are only fair, stocks at some of the Southern ports are increasing. Very much in the future depends upon the extent of the India crop this year. Our advices from Bombay are very decided in stating that there will be no falling off in the shipments at that point. Others, who are usually well informed claim on different information a different result. All admit that early in the year in many districts there was too much rain, but later there has been a change and the prospects are better. Still from some of the Northwestern provinces unfavorable reports are received showing a decreased planting and a probable falling off in the yield. On the other hand, from Oomrawutty, Hingunhaut, Dholera and Dharwar (and in those districts about three-quarters of the entire crop is raised) the reports at latest dates appear to agree in representing a considerable increased acreage in cotton and a very promising appearance of the plant. We are thus particular in these statements as we desire our own planters to receive the highest possible price for their cotton. If by holding on, as some advise, their prospects would be improved, we should of course urge them to do so; but if the result of such a policy is, as we fear, simply to temporarily put up the rates, through an artificial scarcity, to be followed by a more decided fall when Bombay shipments come in more freely, they would be the losers in having to market the most of their crop at lower figures than can now be realized.

The exports of Cotton this week from New York show a decrease, the total reaching only 14,229 bales, against 18,531 bales last week. Below we give our table showing the exports of Cotton from New York, and their direction for each of the last three weeks; also the total exports and direction since September 1, 1868; and in the last column the total for the same period of the previous year:

#### Exports of Cotton (bales) from New York since Sept. 1, 1868

**GOLD EXCHANGE AND FREIGHTS.**—Gold has fluctuated the past week between 135½ and 136½, and the close yesterday was 135½. Foreign exchange closed firm, especially for sight bills, which are selling at ½ above 60 days paper. The latest transactions recorded were done on a basis of 109½@109¾ for 60 days prime bankers sterling, and 110½ for prime bankers 3 days. In freights we notice a slight concession to Bremen. To Liverpool they continue active at ¼@½d by steam.

**BY TELEGRAPH FROM THE SOUTH AND EUROPE.**—The following despatches from the Southern ports contain some matters of interest not given above:

CHARLESTON, S. C., Dec. 11.—Net receipts of the week, 7,905 bales; receipts coastwise, 124 bales—total receipts, 8,029 bales. Exports—to Great Britain

4,176 bales, to other foreign ports, 141 bales; coastwise, 3,150 bales. Stock on hand 11,542 bales. Sales of the week, 2,579 bales. The market is firm; Middlings, 23½; Sea Island 60@61 30.

SAVANNAH, GA., Dec. 11.—Weekly net receipts, 182 bales Sea Island and 15,132 bales Uplands; coastwise, 165 bales Sea Island—total 347 bales Sea Island and 15,132 bales Uplands. Exports—to Liverpool, 6,209 bales; to other foreign ports, none; coastwise, 184 bales Sea Island and 4,239 bales Uplands. Stock on hand 2,844 bales Sea Island and 29,414 bales Uplands. Sales of the week, 5,542 bales. The market is firm; Middlings at 23½c.

NEW ORLEANS, La., Dec. 11.—Net receipts of the week, 35,270 bales; gross, 39,548 bales; receipts to-day, 6,778 bales. Exports of the week—Liverpool, 9,693 bales; continent, 11,059 bales coastwise, 2,691 bales. Stock, 118,680 bales.

MOBILE, Ala., Dec. 11.—Demand limited. Sales, 300 bales; Middlings, 23½c—closed at inside figures. Receipts, 2,513 bales. Exports, 1,238 bales. Sales of the week, 9,000 bales. Receipts, 12,287 bales. Exports—foreign, none; coastwise, 1,768 bales. Stock on hand, 44,779 bales.

WILMINGTON, N. C., Dec. 11.—The total receipts of the week, 983 bales; exports, coastwise, 432 bales; stock, 500 bales. Market firm; Middlings, 23c. Sales of the week, 400 bales. No receipts coastwise or exports to foreign ports.

NORFOLK, Va., Dec. 11.—Net receipts of the week, 5,127 bales; exports, coastwise, 4,750 bales; on hand, in store and on shipboard not cleared, 1,255 bales. The market is quiet, and strictly Low Middlings, are quoted at 23c. Sales of the week, 600 bales.

GALVESTON, Dec. 11.—Receipts of the week, 4,516 bales. Exports—to Bremen, 1,408 bales; to Boston, 1,008 bales; to New York, 853 bales; to New Orleans, 39 bales. Stock on hand, 18,126 bales. The market is firm; good Ordinary, 16½@16¾c. Sales of the week, 1,443 bales.

LIVERPOOL, Dec. 11, 5 P. M.—The market opened steady this morning at 10½d for middling Uplands, and 11½d for middling Orleans; but as the day advanced business became quiet, and prices tended downwards, closing at 10½@11½ for middling Upland and 11@11½ for middling Orleans. The sales of the day have amounted to 10,000 bales. The sales of the week have been 64,000 bales, of which 15,000 were taken for export and 3,000 on speculation. The stock of cotton in warehouse and shipboard is estimated at 365,000 bales, of which 49,000 are from the United States. The stock of cotton at sea bound to this port is estimated at 238,000 bales, of which 95,000 are from the United States. The following table will show the daily closing prices of the week:

#### TOBACCO.

FRIDAY, P. M., December 11, 1868.

There is a decrease in the exports of crude tobacco this week, the total at all the ports reaching only 758 hhds., 216 cases, 354 bales and 140 pkgs. stems, against 1,341 hhds., 489 cases, 95 bales and 87 stems for the previous seven days. Of these exports for this week, 290 hhds., 162 cases, 324 bales and 14 stems were from New York; 424 hhds. and 126 pkgs. stems from Baltimore; 19 cases and 25 bales from Boston. The direction of the shipments of hhds. was as follows: 409 hhds. and 126 do stems to Bremen, 90 hhds. to Marseilles; 53 hhds. to Gibraltar; 8 hhds. to Liverpool, and the balance to different ports. During the same period the exports of manufactured tobacco reached 60,315 lbs., of which 24,600 were London. The full particulars of the week's shipments from all the ports were as follows:

The market has ruled rather quiet the past week.

The demand for Kentucky Leaf has been less pressing, either for consumption or shipment, and prices have been barely supported. The sales amount to about 400 hhds., half of which to cutters and the balance for export, prices ranging from 8 to 14½c. The liberal estimates of the crop (190,000 hhds. of all growths,) and the full stocks in some of the foreign markets, cause buyers to operate sparingly.

Seed Leaf has also been dull; stocks are small, and the assortments not such as to attract buyers. The estimates of the crop of 1868 are about 56,000 cases against 34,000 cases last year, and buyers are not disposed to press orders. The sales are 29 cases Pennsylvania, 11c; 150 cases Connecticut, crop of 1867, 13½@17c, and 25 cases Conn. wrappers, 40@45c, actual weight for export. Havana remains quiet; 100 bales fillers sold at 12@14c, gold, in bond, with a retail trade in the range of 85@105c, currency, duty paid. Nothing new is reported in manufactured tobacco.

\* The exports in this table to European ports are made up from manifests, verified and corrected by an inspection of the cargo.

The direction of the foreign exports for the week, from the other ports, has been as follows:

From Baltimore—To Bremen 409 hhds. and 126 do stems....To Liverpool 10  
hhds....To Demerara 5 hhds and 1,541 lbs manufactured.  
From Boston—To St. Pierre Mique on 19 cases and 17 boxes....To Port au  
Prince and Kingston 50 half bales....To British Provinces 34 boxes.  
From New Orleans To Bremen 44 hhds.  
From San Francisco To Victoria 35 cases....To Mexico 5 bales.

## BREADSTUFFS.

FRIDAY, Dec. 11, 1868, P. M.

The market this week has been generally buoyant except for Indian Corn. The receipts of flour have materially diminished, although more liberal toward the close, and prices have taken an upward turn, especially in the low grades, of

which the offerings have been quite limited and the demand brisk. Not only has the trade been anxious to secure supplies but shippers and speculators have been in the market for round lots which they have found it difficult to secure at a material advance. The medium grades have also improved, but the higher grades are without quotable advance.

Wheat has advanced 10c per bushel on Spring; but an effort to advance Winter Wheats has not been wholly successful, although they have been more freely taken at some improvement for consumption. Spring Wheats have felt an active milling demand with some speculation and export, and prices have been steadily advanced; the views of holders keeping, however, so far ahead of those of buyers that business has not been large. No. 2 Spring closed at \$1 62@1 65, in store and afloat, but with free sellers at these figures.

Corn has been drooping. There has been a moderate export demand, with \$1 16½ paid to-day for prime mixed for Liverpool, and the Trade has purchased moderately, but with the receipts of new corn, the offerings have exceeded the demand. The new Western Mixed may be quoted at \$1 05@ \$1 10. Rye has become dull and closes weak. Barley continues somewhat unsettled, by the parcels of foreign which are offering. Oats have been advanced to 80c afloat, but the close is dull and heavy. Barley Malt and Canada Peas are entirely nominal and unsettled.

The following are closing quotations:

SAN FRANCISCO BREADSTUFFS MARKET.—The following able review of the condition of the grain trade on the Pacific coast is taken from the *San Francisco Commercial Herald and Market Review* :

Our receipts of flour and grain are now considerably in excess of any former year in our history at the corresponding date of the season, while our exports to Great Britain and elsewhere have been liberal and the shipments East go to swell the aggregate beyond those of like periods of the past. At the same time, our warehouses are all filled to repletion, as is also the case with the great majority of those in the interior situate at prominent grain-growing localities and at available points, for shipment to tide-water, in case it should be required for export during the winter.

During the past few weeks there has been a slight monetary stringency apparent in certain quarters from whence farmers and dealers have been accustomed to draw their supplies. The effect has been to loosen the girths of many feeble wheat holders, driving them, contrary to their previous inclinations, to sell more or less of their grain. This has had the effect to weaken prices somewhat, and to enable a few shippers to enter the market as purchasers, with a view to better their grain averages. This has been done to a limited extent, and has afforded slight monetary relief by furnishing an increased supply of sterling bills.

The weather is yet propitious, and has been remarkably so for the ingathering of our vast grain crops, most of them being now well nigh secured and housed from the rain, which may reasonably be looked for at any time, when our farmers will again be enabled to speed the plow and sow the seed for another harvest, preparations for which having already been made for a wider extended area for wheat cultivation than ever before in our history.

It is beginning to be a matter of serious concern with the thinking part of our commercial community as to the tonnage supply at disposal for the removal of our remaining wheat surplus prior to the ingathering of another harvest. Early in the season many of our wheat growers refused to sell their grain and willfully withheld the same from market, holding it far above the reach of those anxious to purchase it. The result has been to drive away a score of our largest and best ships, compelling their owners to accept charters for guano, dyewoods, etc., besides sending others to Hongkong, Manila, etc., seeking business. These ships are now beyond recall, and those of our producers who are yet holding out for fancy prices for their breadstuffs will soon find that shippers are indisposed to continue their ventures into a new year when it must necessarily come into direct competition with a new crop. Eastern advices report a declining wheat market. Rates now telegraphed across the country are far below those ruling at any time within two years past.

We remark a fair export inquiry for China, including liberal invoice of flour and wheat ; two small cargoes are also being prepared for Rio de Janeiro. The Australian demand seems to be nearly at an end for this season, the business seemingly overdone early in the summer. We however, note the Penang now on the berth for Sydney to carry flour.

Our millers seem to be all fully employed, the local requirement exceeding 600 bbls per day. This, with a constant export drain, keeps the city mills running night and day. The business is also profitable millers having the run of the wheat market, making selections suited to their wants within a wide range of prices, oftentimes far below the export rate, for the reason that the barley and oats mixed with the wheat, and which renders it undesirable for shipping, is worth when cleaned the first cost, to say the least, while the cheat, chess, etc.—in fact, all the offal—is worth net \$20 per ton to the miller, thus enabling him to sell his flour comparatively below the relative value of the wheat. It should be remarked that a considerable portion of the wheat now offered for sale is foul and otherwise inferior, and for the lower grades the demand is moderate even at very low rates, while for choice samples good prices are readily paid. We have yet an estimated surplus of four millions cents breadstuff for export, which, of course, includes the million surplus promised from Oregon.

## GROCERIES.

FRIDAY EVENING, December 11, 1868.

Trade in this line has generally shown an improvement, but rather in the better tone than in the amount of transactions. Little has been done in Rio Coffee, and in Tea the business has been confined chiefly to a line trade. Sugar has recovered from the previous depression and prices are advanced. In Molasses the chief feature has been the liberal sales of New Orleans.

The imports for the week are quite limited ; included in them are one cargo of Japan Teas, one cargo of Rio Coffee at this port and one at New Orleans, and 3,797 bags of St. Domingo Coffee by steamer. The receipts of Tea by steamers from England and the Continent continue to be quite liberal. New Orleans Molasses comes in freely, the receipts being 4,026 bbls. for the week. Full details of the imports at the several ports for the week, and since Jan. 1, are given below under the respective heads. The totals are as follows :

	This week.	From Jan 1 to date— 1868.	1867.
Tea.....lbs.	279,105	33,528,695	33,346,231
Tea (indirect import).....pkgs.	2,848	43,373	18,921
Coffee, Rio.....bags.	7,800	1,059,200	1,137,726
Coffee, other.....bags.	4,439	372,296	....
Sugar.....boxes.	7,673	473,714	377,448
Sugar.....hhds.	2,268	557,042	443,636
Sugar.....bags.	....	400,303	111,174
Molasses.....hhds.	1,414	402,900	345,112
Molasses, New Orleans.....bbls.	4,026	19,277	12,687

## TEA.

There has been a fair line trade during most of the week, though dull at the moment. In invoices a very moderate business has transpired, closing with an auction sale to-day of some 700 half chests, mostly blacks, in English order, at prices which could hardly have proved remunerative. Sales embrace 5,819 half chests Japans, 2,246 do Oolongs and 828 do Greens.

Imports of the week embrace a cargo of Japans, per "Emma," from Nagasaki, and 2,848 pkgs. by European steamers at this port, and 94 at Boston. No further advices from China are at hand, and our usual table, having only the changes above noted, is omitted.

## COFFEE.

Prime and choice grades have been scarce, and for these there has been an active demand. The inferior kinds during all the former part of the week were dull and overlooked, and for all kinds a deduction of  $\frac{1}{2}$  cent was made. Within a day or two, however, there has been a better prospect for the lower grades, and sales made to-day of fair Rio are understood to have brought prices  $\frac{1}{2}$  cent better than could have been obtained two days since. In other descriptions the only noticeable feature is the sale of 3,000 mats Java. Sales include 3,456 bags of Rio, 3,000 mats of Java, and 262 bags of other kinds.

Imports of the week have been very small, including only two cargoes of Rio, viz., "Lord Baltimore," at this port, with 4,000 bags, and "Pocahontas," at New Orleans, with 3,800 bags. Of other sorts, 3,797 bags from St. Domingo per steamer Port au Prince, and 600 bags from Liverpool are the only receipts.

The stock of Rio coffee Dec. 10, and the imports from Jan. 1 to date in 1868 and 1867 were as follows :

	New York.	Phila- del.	Balti- more.	New Orleans.	Savan. & Gal- veston.	Total.
Stock.....	154,143	1,700	30,000	2,000	4,000	194,843
Same date 1867.	110,695	1,800	28,000	35,000	1,500	178,495
Imports.....	710,299	13,736	237,544	75,259	16,562	1,059,200
" in 1867.	726,869	23,770	252,920	111,968	3,542	1,187,728

Of other sorts the stock at New York Dec. 10, and the imports at the several ports since Jan. 1 were as follows:

In bags.	(New York)	Boston	Philadel.	Balt.	N. Orle's	Total
Stock.	Import.	Import.	Import.	Import.	Import.	Import.
Java.....	1,936	85,552	21,178	.....	.....	87,030

Total.....	40,478	300,061	47,829	22,778	1,379	372,296
Same '67.....	20,153	214,033	50,013	.....	.....	.....

\* Includes mats, &c., reduced to bags. † 3,190 mats. ‡ Also 13,000 mats.

### SUGAR.

Holders of raw Sugar have been extremely confident in the firmness and advance of the market, and have in consequence held tenaciously for full prices. With a dull demand for their own productions, refiners have been unable to operate, but for nearly all of the week under review there has been a constantly strengthening market for refined sugars, which has sent their manufacturers into the market as buyers for as little as would supply their wants, and the result has been a week of entirely firm prices but somewhat spasmodic business. The trade has taken little or nothing. Prices for all kinds have advanced, those for refined the most decidedly, and the market for all classes strong. Sales include 3,094 hhds. of Cuba, 46 do Demerara, and 2,914 boxes.

The imports of the week show a decrease from the previous week in boxes, but a slight increase in hogsheads. At all the ports the receipts foot up 7,673 boxes, against 10,550—and 2,268 hhds., against 713 last week, making the total receipts to date 473,714 boxes and 557,042 hhds., against 377,448 boxes and 443,636 hhds. to same date last year. Details for the week are as follows:

At—	Cuba	P. Rico	Other	N. O.	At—	Cuba	P. Rico	Other	N. O.
b'rs.	hhds.	hhds.	hhds.	hhds.	boxes.	hhds.	hhds.	hhds.	hhds.

Same time 1867	377,448	351,399	.....	92,237	443,636

\* Includes barrels and tierces reduced to hogsheads.

### MOLASSES.

There has been an almost daily succession of auction sales of New Orleans Molasses. Sales of this description can hardly be considered as contributing to the firmness of a market, and under their influence prices of this kind of molasses have until to-day been gradually declining. We notice to-day, however, that an improvement of 2@3c. per gallon was obtained on some lots. Foreign meantime has been neglected, and prices, in the absence of transactions, are hardly more than nominal. Sales include 3,417 bbls. New Orleans, nearly all at public sale; 623 hhds. Cuba, 567 do Porto Rico, and 964 do Trinidad, at P. S.

The aggregate receipts are small. The receipts at all ports foot up 1,414 hhds. against 1,974 last week. The total receipts at the ports since Jan. 1 now reach 402,900 hhds., against 345,112 hhds. in 1867. Details for the week are as follows:

Hhds	Porto Rico	Deme- rra	N. O.	Hhds.	Porto Rico	Deme- rra	N. O.
at—	Cuba	Rico	Other	at—	Cuba	Rico	Other

\* Includes barrels and tierces reduced to hogsheads.

### SPICES.

A fair trade has continued throughout the week, jobbers taking as usual what was required to fill their immediate wants without going further. It is observable that the English market for Cloves has been for some time dull, and is now better than our own. Prices are

strengthened by this relative position of the markets, and it is not unlikely that this spice will continue to go abroad to a considerable extent

### FRUITS.

In foreign dried stocks here and in neighboring cities continue too large to admit of much animation in the trade. We note the sale at auction to-day of 401 bags of Tarragona Almonds at 13½@19½c., and 15 bales of Princess do at 31@35½c. Domestic dried have been quiet and receipts liberal. Southern, under pressure of heavy stock, have declined about 1 cent. Foreign green fruit has been in good supply, and prices steady. Malaga Lemons are a fraction higher. Havana Oranges have arrived in large quantities, though still nominally holding their former prices.

Annexed are the ruling quotations in first hands.

### Tea.

## THE DRY GOODS TRADE.

FRIDAY, P. M., December 11, 1868.

The market during the past week has been characterized by the usual features incident to this period of the year. Inactivity has prevailed, but as this is expected, there is no disappointment in the trade on account of slack business.

The tone of the market is healthy; the steadiness which has lately prevailed in the cotton market, and the light stocks

held by jobbers and retailers, inspire agents with much confidence in future prices, and no attempt is therefore made to force goods to sale. But, on the contrary, we have heard of some sales of popular brands of cotton goods, for January delivery, at full present rates. Assuming that the price of cotton remains at about the present quotations, the prospect is good for higher prices of domestic goods on the opening of Spring trade.

The exports of dry goods for the past week, and since January 1, 1868, and the total for the same time in 1867 and 1860 are shown in the following table:

Exports to	FROM NEW YORK.		FROM BOSTON.	
	Domestics. pkgs.	D. Goods. Val.	Domestics. pkgs.	Dry Goods. cases.

We annex a few particulars of leading articles of domestic manufacture, our prices quoted being those of the leading jobbers:

**BROWN SHEETINGS AND SHIRTINGS** have been in light demand by the trade generally, and in some instances jobbers have reduced the price to attract buyers. But manufacturers and agents have been firm in their prices, and show great confidence in the future, based upon the prospective value of the raw staple, and the limited supply of stock on hand of manufactured goods with which to commence the early business of next season. We quote: Agawam 36 inches 11½, Amoskeag A 36 15, do B 36 15, Atlantic A 36 15½, do H 36 15, do P 36 12½, do L 36 12½, do V 33 13, Appleton A 33 15, Augusta 36 14, do 30 12½, Bedford R 30 10, Boott H 27 10½, do O 34 11½, do S 40 12½, do W 45 17½, Commonwealth O 27 8, Grafton A 27 8, Great Falls M 36 12½, do S 33 11½, Indian Head 36 15½, do 30 13½, Indian Orchard A 40 14, do C 36 13, do BB 36 12, do W 34 11½, do NN 36 14, Laconia O 39 12½, do B 37 12½, do E 36 12, Lawrence C 36 15, do E 36 13½, do F 36 12½, do G 34 11½, do H 27 10½, do LL 36 12½, Lyman C 36 13½, do E 36 15, Massachusetts BB 36 12½, do J 30 12, Medford 36 14½, Nashua fine 33 13½, do 36 15, do E 39 17, Newmarket A 12½, Pacific extra 36 15, do H 36 15, do L 36 12½, Pepperell 6-4 29, do 7-4 32½, do 8-4 40, do 9-4 45, do 10-4 50, do 11-4 55, Pepperell E fine 39 13½, do R 36 12½, do O 33 11½, do N 30 10½, do G 30 13, Pocasset F 30 10, do K 36 12½, do 40 15, Saranac fine O 23 12½, do R 36 14½, do E 39 16½, Sigourney 36 10, Stark A 36 14½, Swift River 36 11½, Tiger 27 8, Tremont M 33 10½.

**BLEACHED SHEETINGS AND SHIRTINGS.**—The demand has been light, but prices have ruled more steady this week than last. Jobbers are canvassing the market, and securing all lots on which a slight concession will be made. We understand many of the popular brands are engaged several weeks ahead at full asking rates. We make but few changes in our quotations. Amoskeag 46 18, do 42 16, do A 36 15, Androscoggin 36 16, Appleton 36 15, Attawaugan XX 36 —, Atlantic Cambric 36 25, Ballou & Son 36 14, do 33 12½, Bartlett's 36 15, do 33 14, do 30 13½, Bates 36 18, do B 33 14½, Blackstone 36 14, do D 36 13, Boott B 36 14, do C 33 13, do E 12½, do H 28 10½, do O 30 12, do R 27 10, do L 36 14, do W 45 17½, Dwight 36 —, Ellerton E 42 20, do 27 9½, Forrest Mills 36 14, Forestdale 36 15½, Globe 27 8, Fruit of the Loom 36 17, Gold Medal 36 14, Greene Mfg Co 36 12, do 30 10½, Great Falls K 36 14½, do M 33 12½, do S 31 11½, do A 33 14, Hill's Semp. Idem 36 16, do 33 14½, Hope 36 13½, James 36 14, do 33 —, do 31 —, Lawrence B 36 13½, Lonsdale 36 16, Masonville 36 16, Newmarket O 36 13, New York Mills 36 25, Pepperell 6-4 28, do 8-4 42½, do 9-4 50, do 10-4 55, Rosebuds 36 15½, Red Bank 36 12, do 32 10½, Slater J. & W. 36 14, Tuscara 20, Utica 5-4 32½, do 6-4 37½, do 9-4 62½, do 10-4 67½, Waltham X 33 12½, do 42 15, do 6-4 29, do 8-4 40, do 9-4 47, do 10-4 52½, Wamsutta 45 30, do 40½ 27, do 36 22½, Washington 33 11.

**BROWN DRILLS** are dull, and prices hardly sustained. There being but little export demand stocks are accumulating. We quote: Amoskeag 16½, Boott 16½, Graniteville D 16½, Laconia 17, Pepperell 17, Stark A 16½, do H 14.

**PRINT CLOTHS.**—Sales large for the past week with an upward tendency; 64x64 advanced during the week full half a cent a yard, and closed very firm at 8 cents. Market very bare of goods, most of the manufacturers sold from two to three months ahead. The following are the sales: 4,000 pieces 56x60, 6½c; 3,000 do 56x60, 7½c; 2,000 do 56x60, 7c; 2,000 do 60x64, 7½c; 5,000 do 60x61, 7½c; 15,000 do 64x64, 7½c, early in the week; 41,000 do 64x64, 7½c, 30 days; 15,000 do 64x64, 7½c; 60,000 do 64x64, 7½c; 15,000 do 64x64, 7½c; 19,000 do 64x64, 8c. Total, 181,000 pieces. Most of the above sales were made on thirty days.—*Providence Journal*.

**PRINTS.**—The demand is confined to the better class of work, striped effects being the most sought for. The only change of price we have to note is a half cent on Richmond, the result of a clearing out sale of the entire balance of the fall production to one of our leading jobbers. We should not be surprised if this led to a like reduction on other makes

of prints, which seem comparatively high. We quote: Allens 12½, American 12½, Amoskeag 12, Arnolds 11, Cochecho 13½, Conestoga 12½, Dunnell's 12½, Freeman 11, Gloucester 12½, Hamilton 12½, Home 8½, Lancaster 12, London mourning 11½, Mallory 12½, Manchester 12½, Merrimac D 18½, do pink and purple 14, do W 15, Oriental 12, Pacific 12½-13, Richmond's 12, Simpson Mourning 11½, Sprague's purple and pink 13, do blue and white 14, do fancy 12½, do shirtings 13, Victory 10, Wamsutta 9, Wauregan 11½.

**GINGHAMS.**—There is but little demand for these goods at present; prices are steady. Allamance plaid 8, Caledonia 14, Glasgow 15, Hampden 15, Lancaster 16, Manchester 13½.

**MUSLIN DELAINES** are in fair demand at full former rates; the production being light, the goods are taken about as fast as they appear on the market. Armures 22½, do plain 22, Hamilton 21, Lowell 20, Manchester 21, Pacific 21, do Serges 22½, Piques 22, Spragues 19.

**TICKINGS** are in fair demand for the better grades, and prices are well sustained. Lower grades are becoming more plenty, and the tendency is to lower prices. Albany 10½, American 14, Amoskeag A C A 33, do A 27, do B 23, do C 20, do D 19, Blackstone River 17, Conestoga 25, do extra 30, Cordis 30, do BB 17, Hamilton 25, do D 20, Lewiston 36 31½, do 32 28, do 30 23, Mees. and Wkm's 29, Pearl River 30, Pemberton AA 26, do E 17½, Swift River 17, Thorndike 17, Whittenden A 22½, Willow Brook 27½, York 30 25, do 32 31.

**STRIPES** are dull; and on low grades a reduction has been made of a half to one cent. Albany 10, American 14½, Amoskeag 21, Boston 15, Everett 13, Hamilton 2½, Haymaker 16, Sheridan A 14, do G 14½, Uncasville dark 15½, do light 14½, Whittenton AA 23, do A 20, do BB 15, do C 14, do D 12, York 21.

**CHECKS** remain unchanged; in the absence of any demand prices are somewhat nominal. Caledonia No. 70 26, do 60 25, do 10 24, do 8 19, do 11 20, do 15 27½, Kennebeck 25, Lanark No. 2 12, Park No. 60 15, do 70 20, do 90 27½, Pequa No. 1,200 12½, Star Mills 600 12, do 800 16, Union No. 20 25, do 50 27½.

**DENIMS** are slowly accumulating; but prices remain steady, as the goods cannot be produced to pay a profit at any lower rates. Amoskeag 29, Blue Hill 15, Beaver Cr. blue 26, do CC 17½, Columbian extra 29, Haymaker 18, Manchester 18, Otis AXA 27½, do BB 25, do CC 20, Pearl River 26, Thorndike 17½, Tremont 20.

**COTTONADES** are being closed out at low prices. Far. & Mec. Cass 33, Lewiston 37½, New York Mills 30, Plow. L. & Anv. 37½.

**COTTON YARNS** are becoming more plenty, and prices are easier; best Southern yarns, which have been held at 42½, are now offered at 40.

**COTTON BAGS** are more enquired for; but stocks are fully equal to the demand, and prices are bare maintained.

**SPOOL THREAD** has been reduced ten cents per dozen on six cord, and five cents on three cord. We quote Coats, Clarks and other best makes at \$1; Orr & McNaughts 90c; Green & Daniel, and Williston at 50c.

**BLANKETS** continue in good demand. Stocks, especially in light weights, are very low. We quote the best makes in light weights at 50 cents a pound for brown grays, and 55c for blue gray; heavy weights, say 8 to 10 lb. blankets can be found at 2½ to 5c lower.

**LADIES' SACKINGS** and Repellants are becoming more plenty, and prices are tending downward. We quote Albermarle at \$1 50, and the Raratans at \$1 30.

**BALMORAL SKIRTS** are in less demand, and prices are decidedly in favor of buyers for such makes as have accumulated. We find the Pontoosuc Imperial, which have been selling at \$39, reduced to \$31 50. There is a fair demand for skirts especially adapted to the skating season, such as are manufactured by the Novelty Company. These skirts being made of the finest stock, are of course sold at high prices. We quote La Belle H. iene at \$60, and the Novelty skating skirt at \$54.

**FOREIGN GOODS** are dull, except for specialties adapted to the holiday trade. The auction sales are about over for the season. There have been no important sales this week, importers preferring to hold over what goods they may have left, rather than force them upon unwilling buyers at a great sacrifice.

#### IMPORTATIONS OF DRY GOODS AT THE PORT OF NEW YORK.

The importations of dry goods at this port for the week ending Dec. 10, 1868, and the corresponding weeks of 1866 and 1867, have been as follows:

ENTERED FOR CONSUMPTION FOR THE WEEK ENDING DECEMBER 10, 1868.

80 BEAVER STREET.

LARGE FIRE!

Brooklyn, May 15, 1868

Messrs. MARVIN &amp; Co., New York,

Gentlemen,—Our planing mill, with Fifty Thousand  
feet of lumber was destroyed by fire last night, and  
we are happy to say your Alum and Dry Plaster Safe  
preserved our books, papers, and money in excellent  
order.We want another and larger one, and will call on  
you as soon as we have time.

Yours truly,

SHEARMAN BROS.

This Safe was red hot for several hours, and the ca-  
iron feet were actually melted.

It can be seen at our store, NO. 265 BROADWAY.

GOLD

\$15 HUNTING WATCHES \$20

THE

Collins Oroide Watch Factory.

CASES OF THE COLLINS METAL.

## SPECIAL NOTICE.

Our superior Oroide Watches having recently been  
imitated, and worthless Watches sold in New York,  
Boston, Chicago, and other cities, represented as our  
Watches, we hereby caution the public against them  
and give notice that we are in no way responsible for  
these bogus concerns, and only those purchasing  
directly from us can secure a genuine Watch of our  
manufacture. We have recently greatly improved  
our Oroide in appearance and durability, and, to pro-  
tect the public from imposition hereafter, have named  
it the "COLLINS METAL," and we give notice that  
any one making use of this name will be prosecuted  
to the extent of the law.

This metal has all the brilliancy and durability of  
Gold; cannot be distinguished from it by the best  
judges; retains its color till worn out, and is equal to  
gold excepting in intrinsic value. All our gentle-  
men's Watches are FULL-JEWELLED PATENT LEVERS;  
those for Ladies an Improved Escapement, better  
than a Lever for a small Watch; all in Hunting Cases  
and fully guaranteed by special certificate. The \$15  
Watches are equal in neatness, style of finish, general  
appearance, and for time, to a Gold one costing \$150.  
Those of \$20 are of EXTRA fine finish, and are fully  
equal to a Gold Watch costing \$200. Chains of every  
style, from \$2 to \$6. Also, Jewelry of the Collins  
Metal in every style.

TO CLUBS:—Where Six Watches are ordered at  
one time, we will send one extra Watch free of  
charge.

Goods sent to any part of the United States by ex-  
press, to be paid for on delivery. Money need not be  
sent with the order, as bills can be paid when goods  
are taken from the express office. Customers must  
pay all express charges. We employ no agents; orders  
must therefore be sent directly to us. Customers in  
the city will remember that our ONLY OFFICE IS

NOS. 37 & 39 NASSAU STREET, OPPOSITE THE  
POST OFFICE (up stairs), N.Y.

**VIRGINIA AND TENNESSEE RAILROAD.**—The funded debt of the company stands as follows:

1st mortgage bonds	\$494,000 00
2d mortgage bonds	23,500 00
Enlarged bonds	990,000 00
Income bonds	188,500 00
Salt Works Branch bonds	9,500 00
8 per cent bonds of the \$1,000,000 so far issued	736,000 00
And in 8 per cent. registered certificates	61,852 36

The revenue of the road for the fifteen months preceding the termination of the fiscal year, as now fixed was \$1,108,537 01, and its current expenses for that period \$933,710 27.

**LEASE OF THE ATLANTIC AND GREAT WESTERN RAILWAY.**—The Erie Railroad Company has leased the property of the Atlantic and Great Western Railroad Company. We understand, upon official information, that the lease is for a term of twelve years, renewable at the option of the Atlantic and Great Western Company. The Erie Company engages to pay 30 per cent of the gross receipts of the leased road, or \$1,800,000 per annum, in the event of the said per centage of earnings not reaching that amount. The minimum receipts of the Atlantic and Great Western Company will more than cover the interest upon its bonded debt as recently consolidated. The Erie Company engages to keep the track, buildings and rolling stock of the road in good running order.

**BALTIMORE AND OHIO RAILROAD.**—At the regular meeting of Directors recently held in Baltimore Mr. Garrett was unanimously re-elected President of the company. After the transaction of the regular business, a form of lease, which had been previously approved by the board of the Washington County Railroad Company, was submitted, and after discussion was unanimously adopted. Under the lease six per cent per year is to be paid to the stockholders on the cost of that line, and it is to be equipped and worked exclusively by the Baltimore and Ohio Railroad Company. The meeting then adjourned.

**MORRIS AND ESSEX RAILROAD.**—The *Tribune* says: We understand that the final papers and agreements between the Morris and Essex and the Delaware, Lackawanna and Western Railroad were this day signed, by virtue of which the latter pay to the former 7 per cent, free of all taxes whatever, perpetually, and a contingent 1 per cent in addition after a certain period.

## PRICES CURRENT.

In addition to the duties noted below, a discriminating duty of 10 per cent. ad val. is levied on all imports under flags that have no reciprocal treaties with the United States.

On all goods, wares, and merchandise, of the growth or produce of Countries East of the Cape of Good Hope, when imported from places this side of the Cape of Good Hope, a duty of 10 per cent. ad val. is levied in addition to the duties imposed on any such articles when imported directly from the place or places of their growth or production; Raw Cotton and Raw Silk excepted. The ton in all cases to be 2,240 lb.

STORES { 485 BROADWAY, near Broome Street.  
27 JOHN STREET, Middle of the Block.

**All Goods Warranted Genuine.**  
Pipes cut to order, Repaired and Mounted, Amber  
Work and Boiling Done.

**THE ONLY  
Genuine Oroide Watches**

\$12

\$20

These watches have a world-wide reputation, are in hunting cases (gentlemen's and ladies' sizes), guaranteed exact time-keepers, and sold at the low price of \$12 each, and are equal in appearance and wear to gold cases. Also, a large variety of beautifully-chased and enameled watches, \$15 and \$20 each. Also, hunting-case silver watches, American and Swiss movements. Fifty styles of Oroide chains, from \$3 to \$8. Gents' pins, sleeve-buttons, collar-studs, &c, ladies' sets in great variety, from \$3 to \$8.

Good, active agents wanted. Send two red stamps for circular. All goods can be paid for on delivery. Customers allowed to examine before paying. To any one

ordering six watches at one time we will send an extra watch free. Address  
**JAS. GERARD & CO., Sole Agents,**  
85 NASSAU STREET, NEW YORK CITY.

**Steamship Companies.**

PACIFIC MAIL STEAMSHIP COMPANY'S  
**THROUGH LINE**

**To CALIFORNIA,**

Touching at Mexican Ports

AND

CARRYING THE UNITED STATES MAILS FOUR  
TIMES A MONTH.

**On the 1st, 9th, 16th and 24th of Each  
Month.**

Leave PIER 42 NORTH RIVER, foot of Canal street at 12 o'clock noon, as above (except when those dates fall on Sunday, and then on the preceding Saturday), for ASPINWALL, connecting via Panama Railway with one of the Company's Steamships from Panama for SAN FRANCISCO, touching at ACAPULCO.

Departures of 1st and 16th connect at Panama with steamers for SOUTH PACIFIC and CENTRAL AMERICAN PORTS. Those of the 1st touch at MANZANILLO.

One hundred pounds baggage allowed each adult. Baggage-masters accompany baggage through, and attend to ladies and children without male protectors. Baggage received on the dock the day before sailing, from steamboats, railroads, and passengers who prefer to send them down early. An experienced surgeon on board. Medicine and attendance free.

For passage tickets or further information apply at the Company's ticket office, on the wharf, foot of Canal street, North River, New York.

**F. R. BABY, Agent.**

## Insurance.

## Iron and Railroad Materials.

ESTABLISHED 1856.

**S. W. Hopkins & Co.,**

69 & 71 Broadway, New York,  
Negotiations of every description of  
Railroad, Town, County, City and  
STATE BONDS,

In connection with the purchase and sale of

**Railroad Iron,**

**LONDON HOUSE, 53 OLD BROAD ST.**

**To Iron Manufacturers.**

We beg to announce to the proprietors and managers of Rolling Mills and Iron Manufacturers throughout the United States and Canada, that we are constantly receiving from both American and Foreign Railroad Companies heavy shipments of

**Old Rails.**

We are, therefore, always in a position to furnish to consumers any quantity desired for IMMEDIATE OR REMOTE DELIVERY at all points in the United States and Canada, and when required will contract to supply mills with their monthly or yearly consumption at the lowest current market prices.

We are also prepared to transmit by mail or through the cable to our

**LONDON HOUSE,**

53 OLD BROAD STREET,  
Orders for old rails off of Foreign Railroads for shipments at stated periods to any ports in America at a fixed price in sterling or for execution on commission at the current market prices abroad when the order is received in London. In this department of our business our facilities are unsurpassed and our experience unequalled by any house in America. Our yearly transactions in Old Rails being very much greater than all other houses combined. Address

**S. W. Hopkins & Co.,**

69 & 71 Broadway, New York.

**To Railroad Companies.**

We beg to call the attention of Managers of Railways and Contractors throughout the United States and Canada to our superior facilities for executing orders at manufacturers' prices, for all descriptions of both AMERICAN and FOREIGN

**Railroad Iron.**

We are always in a position to furnish all sizes, patterns and weight of rail for both steam and horse roads, and in any quantities desired either for IMMEDIATE OR REMOTE delivery, at any port in the United States or Canada and always at the very lowest current market prices. We are also prepared to supply

**Bessemer Steel Rails,**

of American and Foreign manufacture, rolled to any desired pattern and weight for lineal yard and of approved lengths. Contracts for both IRON AND STEEL RAILS will be made payable in United States currency for America, and in either currency or gold (at the option of the buyer) for Foreign; when desired, we will contract to supply roads with their monthly or yearly requirements of STEEL OR IRON RAILS, taking their

**OLD RAILS IN TRADE FOR NEW**

furnished, receiving the difference in cash, and allowing the highest market price for their Old Rails, and, if necessary, receiving the latter after the delivery of the New Rails.

Orders for Foreign Rails, both Steel and Iron, will be taken for transmission by Mail or through the cable to our

**LONDON HOUSE,**

53 OLD BROAD STREET,

for execution at a fixed price in Sterling or on commission at the current market price abroad when the order is received in London; shipments to be made at stated periods to ports in America and at the lowest possible rates of freights. Address
