FIRST MORTGAGE

30 YEARS SEVEN PER CENT BONDS

INTEREST PAYABLE JANUARY AND JULY,

AT THE NATIONAL BANK OF COMMERCE IN NEW YORK

The Road is completed and in operation from ST. LOUIS to BRUNSWICK, on the Missouri River, and to ATLANTA, in Northeast Missouri, 242 MILES.

The entire length of road which will be completed in NOVEMBER OF THIS YEAR, 332 1-2 MILES.

Amount in Actual Cash Expended in Construction to date, \$11,340,000.

The only lien upon the Road is this First Mortgage of Six Millions, and which is LESS THAN \$16,000 PER

MILE.

This Road connects with the Union Pacific at Kansas City, already completed westward 350 miles, and with the Iowa Central and the Cedar Rapids Railroads in Iowa, forming by the Iowa Central a direct connection with St. Paul, and by the latter with Dubuque.

It runs through the choicest agricultural and coal lands in the State of Missouri, and by its connections will have the finest and most populous portions of Iowa and Minnesota tributaries to it. The road now completed is constructed in the most substantial manner.

We recommend the above loan as an undoubted security, and are authorized to offer a limited amount of the Bonds at \$3 1-2 and accrued interest. For the character of the security we refer, by permission, to

SPECIAL REPORT ON THE REVENUE.

The third annual report of Mr. David A. Wells, the Special Commissioner of Revenue, is a valuable document. It deserves, and will, no doubt, receive more attention from Congress than has been practically accorded to Mr. Wells' previous reports. A large part of this statistical document on the revenue is taken up with discussions about national development, irredeemable currency, the growth of wealth, the future financial policy, the refunding of the debt, the legalizing of coin contracts and the desirableness of allowing the banks to issue more notes than the 300 millions now allowed by law. The introduction of such extraneous matters into a revenue report, either extends it to an inordinate length, or else leads, as in the present case, to the omission and crowding out of facts and evidence which are of paramount importance.

The two great topics of Mr. Wells' report—the tariff and the internal revenue system—are treated with considerable ability. As to the first, he protests against any further general increase of the customs duties. He would also enlarge the free list, reduce certain duties and increase a few others, with a view to increase the revenue. He would also convert the *ad valorem* rates into specific duties, and he would protect home industry by lightening the duties on imported materials and appliances used in our manufactures.

The general views of Mr. Wells on the tariff are worthy of examination, and not the less so because they are more or less distasteful in both the hostile camps of protection and free trade. The nation during the past few years has rapidly learned to appreciate the effect of a universal and indiscriminate system of internal taxation in the enhancement of prices and in the restriction of production; but Mr. Wells declares the inevitable tendency which the adoption of a similar system of taxation under the tariff has to produce results corresponding and analogous. He illustrates his assertion by a reference to the fact that we have ruined the ship-building trade by excessive taxation, so that now "we can neither build, buy nor sell an American vessel." We cannot but think that Mr. Wells has somewhat overdrawn his picture, but the reasons he gives for the decadence of this branch of our industrial enterprises merit careful investigation, for they affect other departments of trade besides that of ship-building. These reasons are as follows:

"While protecting the ships, we have also protected to nearly an equal degree the separate constituents that enter into the construction of ships, viz., the timber, the iron, the copper, the cordage and the canvass; and these two agencies have so far neutralized and counterbalanced each other that neither party, within this particular sphere of industry, has been benefited; the ships not having been built, or the constituents of their construction created or applied, while the community at large, whose interest it is that all these branches of industry should prosper, has likewise received no benefit, but rather detriment from the suspension or diversion of labor and capital from its previous employments. The same system, moreover, of checks and balances growing out of the indiscriminate and universal taxation under the tariff which we have thus shown to exist in ship-building, has been also so far extended to every other branch of production, that if ships available for foreign trade were to-day furnished to hand, without cost, their use must be exceedingly limited, for the reason that the high prices of all domestic commodities would effectually prevent that exchange with foreign countries which in itself constitutes commerce."

As the tariff now stands, Mr. Wells believes that it is injurious and destructive, and denies that it affords to American industry that stimulus and protection which are claimed as its chief merit. He opposes, however, the advances asked in the bills now before Congress, because in his opinion they would not only aggravate the difficulties of the country, and impair the revenues of the Government, but would even hinder the return to specie payments. In behalf of these opinions Mr. Wells appeals to the true friends of American industry for countenance and support, predicting that if unnecessary and iniquitous burdens of taxation under the tariff continue to be laid upon the people, the day is not far distant when a reaction of public sentiment will compel either a sweeping reduction of duties, or induce through agitation such an instability in legislation as will in itself prove most injurious and destructive. It is to be regretted that Mr. Wells has not entered upon some specific details of a tariff revision, but the precise changes required in his judgment he promises to lay down in an additional report, or personally to the Finance Committees of Congress. As a bill proposing a

change in the existing warehouse system is now pending before Congress, some recommendations in respect to this system are given in an appendix.

Of the internal revenue system, Mr. Wells gives a much better account. He shews that since the taxes began to be levied, in 1863, more than 1,100 millions of dollars have been raised, and that "so long as the war continued and the demand for manufactured products—owing to the enormous consumption of the army and the withdrawal of labor from its accustomed avocations—was fully equal to, or in excess of supply, so long taxation under the internal revenue was not regarded by the majority of producers as at all oppressive; but on the contrary, by reckoning taxation in common with labor and material as an element of cost, and profit as a per centum on the whole, it was very generally the case that the aggregate profit of the producer was actually enhanced." With the close, of the war, however, a change came. "The wheels of industry were clogged and the productive machinery of the country was deranged by the tax burden which had previously been scarcely felt. Congress interposed. Vexations, unproductive and needless taxes were taken off, to the amount of at least 170 millions a year. We have now so perfected our system, that, as Mr. Wells justly observes, "it approximates closely to that which the experience of more than three quarters of a century in England has shown capable of yielding the most revenue at the least sacrifice of the productive forces of the people.

As to the improvements of which our internal revenue system is capable, Mr. Well's statements are as vague and general as those about the tariff. He makes the remark that but little legislation is required to still further perfect the system. It should repeal the taxes now levied upon telegraph and express companies; upon the gross receipts of

railroads, steamboats, and other common carriers for the transportation of passengers; and the percentage taxes on the sales of merchandise; the gross receipts from all of which is less than one-half the annual expenditures during the last two fiscal years for the equalization of bounties. When this shall have been accomplished, he says that the entire internal revenue system will have been made wholly subordinate to the more important end of creating national wealth; and under it no direct obstacle whatever will be imposed by the Government, which can prevent the domestic producer from placing his product upon the market at the lowest possible cost.

As to the effect produced on prices by repealing taxation Mr. Wells tells us that "thus far the abatement of prices consequent upon the large annual reduction of taxes has not been what was anticipated, or what the large amount of revenue abandoned would seem to have warranted. In the case of not a few articles, as pig iron, manufactured lumber and salt, the prices since the removal of taxation have actually advanced, while in other instances, as in the case of agricultural implements, sewing-machines, hoop-skirts, manufactures of silk, newspapers, and, in fact, most articles which are the products of monopolies created by patents, established custom or other circumstances, the repeal of the internal tax, through the maintenance of former price, has been only equivalent to legislating a bounty into the pockets of the producer." This confirms the general remark which has often been made by European political economists that prices adjust themselves slowly and with difficulty to changes which taxation introduces into the cost of production, but that generally the advance of prices when a new tax is imposed is instantaneous, while the fall of prices from the repeal of the tax is slower, being forced down by the law of demand and supply.

THE NEW YEAR IN EUROPE.

The year 1869 opens to Europe the prospect, says the *London Times*, of a "most precarious peace." These words from the organ of the commercial classes of Great Britain, are, to be sure, less significant than the famous phrases addressed by the Emperor of the French to the Austrian Ambassador, at the Tuilleries, on New Year's Day, in 1859. Yet they are not to be lightly received. For, though a British journal, unlike a French emperor, can neither make nor break the peace whereof it speaks, there are so many threatening features in the present aspect of European affairs, that the *Times* could hardly boast very loudly of its prophetic wisdom were the summer of 1869 to justify, in a "blood-red blossom of war," the fears with which it tempers the holiday rejoicings of the winter.

The perils which overcast the immediate future of the world's peace may be divided into two great classes: the perils *imminent* in certain actual political crises, and the perils *contingent* upon certain highly possible political accidents. Of the first class, the most conspicuous where in the political crisis through which Spain is now passing, and in the issue which has at last been boldly taken by the Turkish government with Greece. Of the second class, the most important attach themselves to the political situation in France and in Germany. Let us consider each class in its turn.

The Spanish Revolution, which promised so much at its outset, has thus far failed to keep its promise. The dynasty of the Bourbons has indeed been overthrown, and the Spanish people have been restored to a sort of control over their own affairs. But that control is after all imperfect; nor is there much in the history of the last two months to encourage the belief that were it as complete as it is incomplete, the Spanish people would be found capable of administering their own affairs as judiciously or as successfully as many sanguine lovers of popular government were led by the events of last fall to anticipate. The protracted *interregnum* of the Provisional Government has only resulted, so far, in exasperating what began as a local rising in the most important of the Spanish colonies, into something very like a genuine revolution, and in damaging the republican cause by the opportunities it has given to violent and fanatical men of identifying the Republican party in Spain with aimless and disheartening outbreaks of popular violence. Whether this unsatisfactory state of affairs in Spain has been connived at or instigated by the Government of France, cannot be positively known. But it is certain that the Emperor Napoleon has gained by it, at least in respect to the strength of the hold which his system has upon the French people, in virtue of the fact that it is their only real alternative from a French Republic. It is clear that Spain would long ere this have been settled upon a practicable basis of constitutional monarchy, had it not been for the difficulty of finding a satisfactory monarch. Now the French people are perfectly well aware that in this particular a revolution would leave France no better off than Spain now is. Neither the pretender of the elder French line, Henry V., commonly called the Count of Chambord, nor the Princes of the younger line of Orleans can be said to be any more popular with the people of France, than Don Carlos, Don Sebastian, Don Ferdinand, the Duke of Montpensier, or the Duke of Aosta have proved to be with the people of Spain. It may very well have seemed worth while to Napoleon III. to keep Spain for a few months in a condition of dangerous effervescence, for the purpose of impressing this lesson by example upon his own subjects. Be this as it may, however, there is a point beyond which it will neither be safe for Spain, for France nor for Europe that Spain should be allowed to go in the process of fermentation. That point, we judge, is nearly reached. And it is not by any

means improbable that upon the failure of the Spanish *plebiscitum* (soon now to be taken) to settle the dynastic question for Spain, a system modelled upon the Napoleonic system, with General Prim at its head, may be sprung and fixed upon that country. This system might not and probably would not carry with it any guarantee of permanency for itself; but it would at least remove the Spanish question for the time from the list of the active disturbing forces in European politics. The strength of the Spanish army, and its apparent fidelity to its leaders conspires with the practical disintegration of Spanish political parties, and the comparative weakness in Spain of those great material and social interests which are so powerful in more thoroughly modernized countries, to favor the success of any well-calculated step towards the establishment of such a system. We may therefore conclude the Spanish question to be less really and immediately dangerous to the peace of Europe than it might from a superficial observation of the state of affairs abroad be inferred to be.

The same thing, we are convinced, is true of the Eastern question, in its present shape. The Atlantic Cable has throbbled for weeks past with warlike mutterings from the Levant. The names of Syra, of Hobart Pasha, and of the Greek steamer Enosis, have been reiterated in the columns of the daily press till they have become at once as familiar to the eyes, as formidable to the fancy, and as vague of meaning to the minds of most people as once were the names of Dupel, and Schleswig-Holstein, and the Duke of Augustenbourg. Once more, too, we have had the Emperor Napoleon coming forward with his political panacea of a European conference; and these signs and wonders in the air are interpreted not unnaturally to signify the near approach of that long-dreaded grapple of the Moslem with the Christian in the East from which the politicians and the statesmen of the world have so long looked for the "beginning of the end" of the so-called "balance of power" in the Old World.

But the truth is, we think, that the decisive declaration by Turkey of her determination to exact of Greece a strict fulfilment of her international duties, even at the price of war, is more likely to abate than it is to aggravate the political dangers of the Eastern question.

Of all the greater European powers, Austria alone is just now in a condition to make the notion of a war on the Eastern question not absolutely disagreeable to her. And this not because Austria either desires war really, or feels herself equal to enduring a great war without a very serious strain upon her resources, but because Austria foresees clearly the coming of a great collision between herself and Russia in the east of Europe, and, foreseeing this collision, may reasonably think the present as favorable a moment as she is likely in a long time to come upon, for confronting the peril. For at this moment Russia, for grave financial and social reasons, is greatly averse from war; nor can either of the other great powers be said to desire war. Prussia, upon which Russia leans as her ally, is just now in such a crisis of her German relations as would make it particularly vexatious for her to find herself dragged into a conflict in behalf of Russian aggrandizement against Austrian consolidation. England is too much intent upon strengthening her Indian frontiers towards the North, where, from her Himalayan fortresses, she descries afar off the advancing cross of St. Andrew and the green uniforms which fought at the Alma and at Inkermann, to be willing to see herself compelled to open the battle prematurely on the Levant and the Euxine also. France has the Suez canal on her hands, and the growing Prussian ascendancy to watch. Were the East to get into a blaze now, Austria might hope for something at least in the way of a reinforcement of her exposed position on the Lower

upon the other great powers whether the assertion of her rights by Turkey, backed by Austria, shall or shall not lead to a real conflict with Greece, and through that to a general European war. We have already shown why it is extremely unlikely that these other great powers, no matter what may be their feelings for or against either Turkey or Greece, should suffer such results to follow. And as such results can only be averted by a practical diplomatic defeat of the Greeks, we may expect to see such a defeat. The aspirations of the "Hellenes" will be once more thwarted. The Cretan insurrection, extinguished in Crete, will not be suffered to be rekindled elsewhere.

If the actual political difficulties of the hour in Europe then are not so full of peril as the *Times* would have us believe them to be, can the same thing be said of the political contingencies of the year in Europe?

Hardly, we think. And this, in the first place, for the simple reason that they are contingencies. It may happen at any Danube; and Austria, therefore, may be reasonably supposed to have stimulated Turkey to the energetic course which has just been taken by the Sublime Porte. But it will depend time that the Emperor of the French, now past his sixtieth year, should cease to live. It is not very likely that while he lives he should cease to reign. But he ceasing to live, who can forecast the future of France, or of Europe? It has become fashionable of late to sneer at the political skill and genius of Napoleon III. But take him out of the way, and who will not do homage, if it be only the reluctant homage of fear and dismay, to the great qualities which have enabled him so long to master the French people and so brilliantly to illustrate the renown of France? In like manner, were Bismarck to be removed suddenly from his unfinished task of the unification of Germany nothing is more likely than that the French Government should avail itself of the opportunity to press upon and interrupt that task. This could not be done without setting Europe on fire.

Finally, then, we find in the chances upon which political confusion in Europe may supervene during the year 1869, a much more adequate ground for the justification of the alarm with which large numbers of practical people are looking forward to the coming twelvemonth, than is to be found in the actual condition either of Spain or of the Levantine countries.

REVIEW OF THE MONTH.

The course of monetary affairs, during December, has been, in some respects, very unusual. The artificial stringency in money during November interfered with the forwarding of produce from the interior, postponing the movement to a period about a month later. The result has been that money has been flowing to Chicago, Cincinnati and other Western cities, until late in December, for moving the hog crop, while at the same time, the high price and the fair receipts of cotton have induced a very active demand for currency from the South, so that the shipments to that section have been much larger than at the same period of last year. Hence the city banks have been parting with large amounts of currency at a time when it usually begins to flow back into their vaults, and at the close of the year they held only \$48,000,000 of legal tenders, against \$62,000,000 at the same period of 1867, and \$65,000,000 in 1868. On the 4th of January they were required to make their quarterly statement, and the preparations for that return, under the circumstances indicated, were naturally attended with considerable calling in of loans and a momentary curtailment of loaning facilities. The result of this conjuncture of unfavorable circumstances was to make borrowers almost wholly dependent upon street lenders; who, as usual under such conditions, exacted extravagant rates of interest for several days before the close of the month, call loans ranging from 7 per cent in gold to that rate with a commission of $\frac{1}{2}$ to $\frac{3}{4}$ per cent. This condition of affairs has added another to the numerous crises growing out of the present system of periodical bank statements and the lack of elasticity in our currency system. These evils, however, have now become so chronic that their regular recurrence scarcely excites remark. The periods at which they occur are indeed welcomed by a class of speculators, who make them the occasion of locking up money to promote stock ventures; or turn them to account by exacting usurious rates of interest. Needy borrowers have been driven to every conceivable expedient for raising money. Unable to obtain currency, they have pledged their collaterals against gold, which they have sold, taking the risk of being able to buy it back again at the same price. Some capitalists have loaned their currency upon gold at full legal interest and a heavy commission, and have again loaned the gold so received upon stocks at 7 per cent, thus making 14 per cent and a brokerage charge of $\frac{1}{2}$ to $\frac{3}{4}$ per cent. Banking arrangements which tend to produce such a condition of things as this, surely call for prompt revision.

The stock market has sympathized less with the stringency of money than might have been expected. Brokers have become accustomed to these periodical crises, and provide against them in anticipation by time loans, so that the only parties to suffer are the smaller holders dependent upon margins, whose sales have comparatively little effect upon prices. The declaration of a special dividend upon New York Central, putting up the price to 160, and considerations affecting favorably some other leading stocks, have had a tendency to strengthen the whole market, and some shares have realized unusually high figures, in spite of the adverse influence of the loan market. The amount of ordinary transactions in stocks

has been quite limited, but a considerable extent of business has been done in the way of "turning" stocks—that is selling for immediate delivery—in order to get money, and buying them in again deliverable next day, or at the buyer's option. The total sales at both boards, for the month, were 1,093,730 shares, against 1,760,721 in December, 1867. The total transactions for the year at the two boards have been 19,713,402 shares, against 21,271,036 in 1867, showing a material falling off in this branch of speculation.

United States bonds have not exhibited the buoyancy that usually characterizes the market in December. The customary advance just previous to the maturing of the January interest has not occurred; nor has the anticipation of the large demand in January for the employment of dividends and interest had its usual effect in stimulating speculative purchases. The stringency of money has been unfavorable to these movements, while it has prevented the banks and financial institutions from buying for the employment of their balances during the ease which usually sets in during January. From these causes prices closed at near the opening figures of the month. The total transactions of the month, of all classes of bonds,

amount to \$20,060,550, against \$13,589,050 for the same month of 1867; for the whole year, the sales aggregate \$245,245,240, against \$206,980,430 in 1867.

from breaking down the premium. For several days next preceding the close of the month, holders of gold have had to pay from 1-16 to $\frac{1}{2}$ per cent per day for having it carried. The exports of coin during the month have been only \$1,234,000, against \$6,843,000 for the same period of last year, and there is consequently a correspondingly large supply of gold upon the market.

The following formula will show the movement of coin and bullion during the month of December, 1867 and 1868, respectively:

PRICES OF MERCHANDISE.

In the table which follows, a comparison is made of the prices of the principal articles of commerce in the New York market about the first of January in the past eight years. This comparison is extremely interesting, as it shows the course of prices at the several periods, from the commencement of the war to the period of greatest inflation and thence down to the present time. As the peculiar value of this statement is seen at a glance, any extended comment upon it is unnecessary.

FRIDAY, January 8, 1869, P. M.

THE MONEY MARKET.—The last bank statement was regarded with more than usual interest, as it indicated the condition of the books on the eve of the quarterly statement, at a period of extraordinary stringency in money. The statement showed an increase of \$2,491,000 in the surplus over legal reserve, and was so far satisfactory. This gain, however, was almost entirely in specie, the increase in which was \$2,795,000, while the addition to the legal-tenders was only \$196,000. The net deposits showed a gain of \$1,986,000, while the loans were down \$2,252,000. This exhibit was, on the whole, a decided improvement upon that of the previous week, and the return of to-morrow afternoon is likely to show a still more conservative condition of the banks.

The week opened with a very excited and easy condition of the loan market. The banks had little to lend and the supply of loanable funds appeared to be in the hands of parties disposed to exact the highest possible interest. Money was loaned mainly through agents, who used their position on the stock board for exciting competition. The consequence was that, in addition to the legal rate, a commission of ¼@½ per cent per day was very generally paid. The brokers, finding that the loan market was thus placed under the control of a few money dealers, adopted a rule forbidding their members to deal in money at their respective boards or in the long room, under penalty. At the same time, the legality and the safety of transactions at beyond the legal rate of interest became a matter of some solicitude among lenders. From these causes there was a sudden suspension of the attempts to control the supply of money and to exact special rates, and for the last two days loans have been made almost exclusively at 7 per cent currency. Consequently with these influences, there has been a return of currency from the West in moderate amounts; which is to be regarded as the beginning of a general reflux movement from that section. Money withdrawn last week by corporations, in preparation for the payment of dividends, is now finding its way back into the banks, and is again available for street loans. Currency is still being sent to the South; but not in amounts sufficient to neutralise the case accruing from other causes. The crisis has now evidently passed its climax, and it may be safely concluded that we have entered upon the reflux movement which always, at this season, brings back

a large amount of money sent to other sections for moving the crops, producing an ease which continues until about the middle of March.

For the last two or three days there has been more disposition to buy paper; but the supply having accumulated freely during the late high rates on call loans, the rates remain firm, on the basis of 8@10 per cent for the best names.

The following are the quotations for loans of various classes:

	Per cent.		Per cent.
Callloans	7 @	Good endorsed bills, 3 &	
Loans on bonds & mort.	7 @	4 months	8 @ 10
Prime endorsed bills, 2		do single names	9 @ 11

UNITED STATES BONDS.—The Governments have this week exhibited the firmness toward which we have recently represented the market as tending. The easier feeling in money has facilitated speculative buying, and the dealers have consequently been free purchasers. The money disbursed the payment of interest and dividends has to a large extent sought reinvestment in this class of securities, while from the country and city banks there has been an active demand. A very large amount of bonds has in this way been taken off the market, without any proportionate increase of the supply, and prices have consequently advanced 1@1½ on the bonds chiefly held at home, and 1½ on Sixty-Twos and 2½ on Sixes of 1871. The market exhibits a remarkably strong undertone, and dealers show a desire to contract for future delivery at anything near the current prices. Investors are holding securities with more steadiness and the supply on the market is strictly limited.

The following are the closing prices of leading government securities, compared with preceding weeks:

	Dec. 4.	Dec. 11.	Dec. 18.	Dec. 24.	Dec. 31.	Jan. 8.

RAILROAD AND MISCELLANEOUS STOCKS.—The easier tone of the money market has given a freer scope to the strong upward tendency of the share market. The policy of Mr. Vanderbilt in declaring stock dividends has been so successful as a speculative maneuver that the management of other roads has become infected with the idea, and stock dividends by other companies are now said to be in contemplation. The efforts of the New York Central and Erie Companies to secure through routes to the Western cities and the Pacific road have affected more or less most of the Western stocks represented on the Stock Exchange, producing in some cases an extravagant advance. Under these influences the whole market has been unusually buoyant, and for the last three days the transactions have been very large. The chief advance has been on Rock Island, which from 118½, our last quotation, has to-day sold at 123½; Fort Wayne has advanced 5½; St. Paul, 4; Wabash, 3½; Pacific Mail 1½; and Michigan Southern, 3½. Outside operators do not appear to have taken much part in this movement; but the cliques show very considerable confidence in the programme to be developed by the Central and Erie roads developing an ultimately large demand for stocks. Erie has to-day sold up to 40½@½, apparently in consequence of the Directors having now secured a through broad guage route to the Mississippi. The Company having failed in its negotiations with the Cincinnati, Hamilton and Dayton road, has made arrangements for the building of a line at once from Dayton to Cincinnati, on the old Air Line route, which gives Erie a through line to St. Louis, via the Ohio and Mississippi road, and obviates the payment of toll to the Cincinnati, Hamilton and Dayton road.

The following were the closing quotations at the regular board compared with those of the six preceding weeks:

THE GOLD MARKET.—Gold has been steady. The chief feature appears to be the important "short" interest growing out of sales by brokers who, in the late stringency, borrowed gold against stocks, and sold it as a means of raising money. There is an enlarged demand for customs, and the exports are increasing, exchange having reached figures at which bars can be shipped at a small profit. The Sub-Treasury has paid, up to the close of today, \$10,300,000 of coin on account of January interest. The market closed strong at 135½.

The fluctuations in the gold market, and the business at the Gold Board during the week closing with Friday, are shown in the following table:

FOREIGN EXCHANGE.—Bills have been more in demand, partly owing to remittances on account of interest and partly from the purchases of importers. The supply of cotton bills and local produce paper, however, has been on a strictly moderate scale, and rates are consequently firmer.

Naval stores have been quite excited in Spirits Turpentine and Rosins, with a material advance in prices; but freer receipts toward the close, and the subsidence of demand, caused a slight decline from the highest quotations and a quiet close. Petroleum has been unsettled; there has been some business for shipment, but the leading influences in the market have been speculative, and prices difficult to fix. Oils have been rather quiet, but prices for Fish and Lard Oils have had an upward tendency—the former owing to reduced stocks, and the latter in sympathy with Lard.

Fish are firm. Hops are more steady on the home demand, although there is less doing for export. Hay is slightly lower. Building materials have become very dull. Tallow has been more active for export. Whiskey has advanced 10c. per gallon, to \$1 10, tax paid—the result of the probable success of a movement to increase the excise.

Freights, with a better supply of room on the berth for British ports, have materially declined for grain, with large shipments; the room for cotton has been mostly taken up, and there is very little else offering. At the close the market, owing to the non-arrival of steamers, is again bare of room.

Wool has been quiet. The stocks Jan. 1, three years, have been as follows:

	1867.	1868	1869.
Foreign, pounds	14,902,500	8,313,650	5,694,200
Domestic, pounds.....	7,830,000	6,511,000	11,138,000
Total pounds.....	22,732,500	14,824,650	16,832,200

The market for Hog products has been excited; Mess Pork has advanced to \$28 50@ \$29 50, and Prime Mess to \$27 25 @ \$28 50 per bbl.; Prime Steam Lard to 20c., and Cumberland Bacon to 14 $\frac{1}{4}$ @ 14 $\frac{3}{4}$ c. per pound. But the close is quiet. The speculative basis of the advance is the alleged short crop of swine at the West. We have seen no decided verification of this statement, when we take the increased weight into the account. If current high prices have any sound basis, it is in the delay of Great Britain to purchase the supplies which she obviously needs until she must do so in competition with the South, as the cotton growers are about to enter upon their planting season. Beef has been doing better, and Cheese is higher, but Butter is unchanged.

The following table, compiled from Custom House returns, shows the exports of leading articles of commerce from the port of New York since January 1, 1869.

COTTON.

FRIDAY, P. M., January 8, 1869.

By special telegrams received by us to-night from each of the Southern ports we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, Jan. 8. From the figures thus obtained it appears that the total receipts for the seven days have reached 73,827 bales, (against 86,159* bales last week, 89,113* bales the previous week, and 81,481 bales three weeks since,) making the aggregate receipts since September 1, 1868 up to this date, 1,336,827 bales, against 1,047,091 bales for the same period in 1867, being an excess this season over last season of 289,736 bales. We have this week added to our aggregate receipts the shipments overland, up to Jan. 1, direct to manufacturers, as more fully explained in a subsequent part of this report. The details of the receipts for this week (as per telegraph) and the corresponding week of 1867 are as follows:

*Corrected by the addition of the movement Christmas and New Year day.

The exports for the week ending this evening reach a total of 43,941 bales, of which 27,600 were to Great Britain, and 16,341 bales to the Continent, while the stocks at all the ports as made up this evening, are now 298,494 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us by our own correspondents at the various ports to-night:

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is a decrease in the exports this week of 4,492 bales, while the stocks to-night are 68,305 bales less than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports since Sept. 1, according to the latest mail returns. We do not include our telegrams to night, as we cannot insure the accuracy or obtain the detail necessary, by telegraph:

*Under this head we have added the overland shipments direct to manufacturers to January 1.

The market the past week has been excited and higher. During the early part of the week this was especially true, and again to-day there is great activity, with a further advance, closing at 28c. for Middling Uplands. The principal operators are speculators, though spinners have been rather free purchasers, being encouraged by the upward movement and activity in the market for goods. Considering the season of the year, the dry goods business is unusually large, though rather of a speculative nature. Agents find no difficulty in closing out their entire stock at the ruling figures, while jobbers are receiving considerable orders from the interior. Prices of sheeting and prints have been and even now are very low, if the raw material is to be maintained at present rates, and there appears to be no prospect of any considerable decline in cotton until there is materially diminished consumption in Manchester, and an improvement in the stock at Liverpool. Besides, the large short interest at prices much below present rates, must have a tendency to keep the market firm. Sales for delivery this month have been made both here and at Liverpool which must be covered, and if they are of the extent claimed, may continue to impart considerable excitement to the market, especially while the South is sending forward orders to purchase, having confidence in much higher rates, based on reduced estimates of the crop. The business for forward delivery has been quite limited this week until to-day, the total reaching only about 1,600 bales (all low middling), there being very few sellers even at the high rates obtained. But to-day there have been further sales amounting to 1,800 bales. We note sales of 450 bales for February at 26½c., and 150 bales for March at same price; 300 bales for February or March, 100 for January or February, and 100 bales for February at 26c., and 50 bales for each February and March at 26½c.; and to-day 400 bales for February and 200 bales for January at 26½c., and 1,200 bales terms private. For immediate delivery the total sales of the week foot up 32,169 bales (including 3,590 bales to arrive), of which 8,296 bales were taken by spinners, 12,171 bales on speculation, 6,717 bales for export, 4,985 in transit, and the following are the closing quotations:

TRANSIT COTTON.—The sales of transit Cotton this week reach 4,985 bales, embracing about all the lots offering. We note sales as follows: Liverpool Middling, New York to Liverpool, sail, &d., freight at 27c.; Low Middling, Mobile to Liverpool, 9-16d., freight at 24@24 1/2c.; Middling Uplands, Charleston to Liverpool, steamer, &d., freight 25c.; Low Middling Orleans, New Orleans to Liverpool, 9-16d., freight 24 1/2c.; Strict Good Ordinary, Texas, to Liverpool, freight &d., 24c.

CONSUMPTION AND RECEIPTS.—In accordance with the notice given in this report a few weeks since, we add to our receipts of cotton to-day the amount sent overland since September 1, 1868, direct to the mills. Heretofore it has been customary to wait till the close of the year before making these additions; but as the shipments overland have increased each season since the war closed, running tables kept on the old plan have become less and less satisfactory, furnishing little indication of the cotton movement. The figures we give to-day are to January 1, 1869. Hereafter we shall correct our table on the second Friday of each month, so that on the first of September next it will only be necessary to add the Southern consumption (which this year will not exceed 100,000 bales) and the usual slight corrections for the Southern ports to complete the crop statement. It will be seen that for the four months ending January 1, 1869, the direct shipments to the mills have reached 193,000 bales, making the total receipts up to this time (including the telegrams of to-night) 1,263,000 bales. For the satisfaction of our readers we give the following statement of the sources and direction of shipment:

From Memphis.....	bales 118,000
From Nashville and elsewhere.....	162,000
Shipped direct to New York and other ports.....	65,000
Shipped to New Orleans.....	22,000
Shipped direct to Manufacturers.....	193,000
	280,000

The table below will indicate the total movement of the crop thus far, the closing figures showing the consumption of the Northern mills:

Stock September 1, 1868.....	bales 38,130
Receipts since September 1, 1868, to January 4, 1869.....	1,263,000
Total supply to January 4, 1869.....	1,301,130
Exported to foreign countries since September 1, 1868.....	549,000
Stocks at the ports, North and South, January 4, 1869.....	306,000
Stocks now in mills or in transit and not counted in Southern stocks.....	bales 161,000
Less stock of mills September 1, 1868.....	30,000
	131,000
	986,000

Consumption of Northern mills since Sept. 1, 1868..... bales 315,180

—which is about 17,500 bales per week, or about 500 bales per week less than the consumption of the Northern mills, as indicated by the returns of the Manufacturers' and Planters Association. The statement of stock at and in transit for mills, given above, is also a few thousand bales less than the figures of the same Association which they have furnished us under date of the 5th instant. These returns show how important this overland movement is becoming, and how defective tables are which make no account of it.

The exports of cotton this week from New York show a further decrease, the total reaching 4,467 bales, against 8,943 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last three weeks; also the total exports and direction since September 1, 1868; and in the last column the total for the same period of the previous year:

GOLD EXCHANGE AND FREIGHTS.—Gold has fluctuated the past week between 134 1/2 and 135 1/2, and the close yesterday was 134 1/2. Exchange closes firm, with only a moderate supply of commercial bills offering. Bankers are buying freely against United States coupons and other interest. The closing rates were 109 1/2 for prime bankers 60 days, and 110 1/2 for prime bankers sight drafts. Freights have ruled moderately active, and, at the close, owing to the non arrival of steamers, room is bare. The closing rate to Liverpool, by steam, was 5-16 @ &d.

By TELEGRAPH.—The following despatches from the Southern ports and from Liverpool contain some matters of interest not given above:

NORFOLK, Va., Jan. 8.—Net receipts of the week, 3,308 bales; coastwise, 520 bales—total, 3,828 bales. Exports—coastwise, 2,883 bales; to the Continent and Great Britain, none. Stock on hand, 2,097 bales. The market is excited. Low Middling, 24 1/2 @ 24 3/4c.

TOBACCO.

FRIDAY, P. M., January 8, 1869.

There is a decrease in the exports of crude tobacco this week, the total at all the ports reaching 1,000 hhds., 444 cases, 2 bales, against 715 hhds., 1,328 cases, 3,609 bales and 503 cercoons for the previous seven days. Of these exports for this week, 670 hhds., 444 cases, and 2 bales were from New York; 300 hhds. from Baltimore and 10 hhds. from New Orleans. The direction of the shipments of hhds. was as follows: 300 hhds. and 436 cases to Bremen; 214 hhds. to Gibraltar, 41 hhds. to Liverpool, and the balance to different ports. During the same period the exports of manufactured tobacco reached 86,945 lbs., of which 49,075 were to Melbourne. The full particulars of the week's shipments from all the ports were as follows:

The market this week has been more active and low grades have brought very full prices.

In Kentucky Leaf the demand has been quite brisk, both for the Mediterranean and cutting, and the sales of the week amount to about 900 hhds., nearly equally divided between shippers and consumers. The business has been mainly in lower grades, which have brought rather more money—one lot being bought on speculation. The medium grades were also in fair request, but the finer qualities were dull.

Seed Leaf has also met with a brisk trade, especially in the cheaper qualities, the business being in part for export. The sales embrace 304 cases old Pennsylvania, 9½c.; 380 cases old Connecticut, 14@20c.; 146 cases new Ohio, 8½c.; 5 cases inferior State, 5½c.; 5 cases Connecticut wrappers 5½c.

There has been nothing of moment done in Spanish nor in manufactured tobaccos.

BREADSTUFFS.

FRIDAY, Jan. 8, 1869, P. M.

The whole market took an upward turn early in the week, but since Wednesday there has been but little doing and prices are only partially sustained.

Flour has arrived rather more freely, but the shipping demand for low grades has been much better, at higher prices, and those qualities have brought more money. The sales for British markets have been about 8,000 bbls., mainly at \$7 10@7 25 for good Extra State, but many holders have put up prices above the limits of shippers, and it would be difficult for large orders to be executed except at a material advance. The medium and better grades of Flour have met with only a limited demand and prices are barely maintained.

Wheat has been firmer on export orders. Shippers have been able to buy about 150,000 bushels this week, mainly at about \$1 59@1 63 for No. 2 Spring, in store and afloat, and holders have latterly been firm with buyers to some extent at \$1 61@1 62. Millers have done but little, not wishing to compete with shippers. The liberal receipts of California Wheat have caused a decline in that quality to \$2 10@2 20. Winter Wheats have ruled very quiet. The receipts of Wheat at the Western markets are largely increased, and have attracted some attention here. By some it has been thought that they would cause sales to be pressed here; this may be the case to some extent. But parties selling here, in consequence of these increased receipts at the

West, will probably replace at those markets, whenever it can be done at prices that will enable them to lay down No. 2 Spring here in the Spring at prices 15@20c. per bushel lower than current quotations here.

Corn advanced on the reduced receipts and lower ocean freights, but the improvement was speedily lost on the diversion of the attention of shippers to Wheat, and the close is at 95c. for good Mixed. Oats have fluctuated with Corn. Rye has been dull and drooping. Barley is nearly nominal. Canada Peas entirely so.

GROCERIES.

FRIDAY EVENING, January 8, 1869.

The new year has scarcely begun in the Grocery trade, for the inactivity prevailing has been more like the latter part of an old than the first of a new season. The prime grades of Rio Coffee and New Orleans Molasses are the only articles which can be said to have been in good demand, and for these the inquiry has been good and prices are decidedly firm. In Sugar and foreign Molasses the business has been very prices weak.

Imports of the week have been considerable of Rio coffee, of which 43,625 bags have been received, all at New York, except one cargo at New Orleans. Of tea only a single cargo of Japans and 600 packages from England have come to hand. The imports of sugar and molasses for the week ending with the 6th inst., were very small, but within the past two days arrivals have been free. Full details of the imports at the several ports for the week, and since Jan. 1, are given below under the respective heads. The totals are as follows:

	This week.	From Jan 1 to date.	1868.

TEA.

The business in invoices has been very limited, and we have only to notice a better inquiry in the line trade, to which transactions have been confined. Sales have been made of 3,560 half chests greens part in English order; 3,290 do Oolongs, 1,160 do Japans, and 300 do Souchong.

The only imports of tea during the week, have been one cargo from Yokohama, per "Italy," with 260,474 lbs. of Japans, and 602 pkgs. by steamers from England. Dates from Hong Kong are not later than those given in our last.

The following table shows the shipments of Tea from China and Japan to the United States from June 1, 1868, to Nov. 2, the date of latest advices by mail; and importations into the United States (not including San Francisco), from Jan. 1 to date, in 1868 and 1869.

* This does not include 1,665,236 lbs. shipped in P. M. steamer and two other vessels, of which particulars had not been received.

The indirect import from Jan 1 to date is 602 pkgs.

COFFEE.

The demand has been confined almost entirely to the better grades, of Rio, and for these there has been a fair inquiry and prices are very firmly held. The Rio telegram, received early in the week, was considered favorable to holders, and their views were strengthened as to prime grades. In other sorts only a jobbing trade has been done, and there is nothing to record. Sales have been made of 22,698 bags Rio, 1,500 do Ceylon, and 209 do Laguayra.

Imports of coffee for the week have been considerable, including cargoes of Rio, as follows:

Sea Queen.....	3,365	Catherine Leeds..	4,210	Gellert.....	5,310

Darneborg.....	4,200	Zephyr.....	2,843	Jane Goodyear...	3,849

The receipts of other sorts have also been considerable, including 14,878 mats of Java, per "Euphrosyne," 5,402 St. Domingo per "R Murray, Jr," 1,015 of Jamaica per "Renshaw," and 814 of Manila, per "Orpheus." At Boston 9,223 mats of Java were received, per bark "Mariana."

The stock of Rio coffee Jan. 7, and the imports from Jan. 1 to date in 1869 and 1868 were as follows:

THE CHRONICLE.

SUGAR.

The week has been one of little activity but without noticeable concessions in prices. Refiners have felt disinclined to enter the market and purchase heavily at present rates, and holders, on their part have not pressed sales, but have generally been firmer in their views; the result of this has been that only limited transactions have taken place. Sales have been 3,746 hhds. Cuba, 223 do Porto Rico, 222 do Demerara and 6,183 boxes Havana.

The imports of the week are quite insignificant. At all the ports the ports the receipts foot up 1,214 boxes, against 6,497—and 436 hhds., against 2,912 last week. Details for the week are as follows:

MOLASSES.

Foreign molasses has been very dull, and, with little demand, prices have been weak. In order to effect any considerable sales, a concession would have to be made; but, in the absence of demand holders quote nominally the same rates. New Orleans molasses has met with a good demand, and to some extent for speculation; prices are very firmly maintained and stock is small. Sales have been made of 686 hhds. Cuba, 125 do Demerara, 66 do Surinham, and 2,306 brls New Orleans.

The receipts of the week have been very small. The receipts at all ports foot up 633 hhds. against 4,046 last week. Details for the week are as follows:

SPICES.

Beyond a slight jobbing demand there is nothing to report in this branch of the trade.

FRUITS.

The market has not yet shown any activity since the opening of the year, and with the exception of a better consumption demand for Turkish prunes, the inquiry has been small. To-day there were considerable sales of Mediterranean oranges at auction.

We annex ruling quotations in first hands:

THE DRY GOODS TRADE.

FRIDAY, P. M., January 8, 1869.

In accordance with the predictions which have been given in our report for several weeks past, the new year has opened with a sharp advance in the prices of leading cotton goods. The raw material has not only maintained the high prices established in December, but has shown a further advance, and quotations this week have been higher than at any time since September last. The market for Cotton goods has naturally been buoyant and active, the largest purchases having been made by jobbers both of this city and the West, and to a great extent on speculation, indicating very strongly the confidence which is felt in the firmness of prices hereafter. From the West more favorable reports are received as to the facility of making collections, and we hear on all sides a better feeling expressed as to the stability of dry goods houses and the prospects of a profitable spring trade. Toward the close there has been a slight check on business and less buoyancy, caused by a temporary lull in the cotton market, but prices continue very strong.

Without venturing to give a prediction as to the future course of the cotton market, we would suggest to agents and manufacturers that great caution should be shown in the course which they pursue, and prices should by no means be

advanced too rapidly. If there should be a reaction in the cotton trade, with a considerable fall in prices, which many of the best informed dealers anticipate, too great an advance in the price of goods now would probably be followed by a sharp decline in February or March which would be very injurious to the trade of that season. The interest of the market has centred in cottons, and in other branches there is little of importance to notice.

The exports of dry goods for the past week, and since January 1, 1868, and the total for the same time in 1867 and 1860 are shown in the following table:

We annex a few particulars of leading articles of domestic manufacture, our prices quoted being those of the leading jobbers:

BROWN SHEETINGS AND SHIRTINGS have been very active. Standards have advanced to 16 and 16½ cents. Four yard goods are very firm at 12 to 12½ cents. Fine browns are about one cent higher, with a good demand. Stocks are very low in first hands, but jobbers are well stocked on the leading brands. We quote: Agawam 36 inches 12, Amoskeag A 36 16, do B 36 15½, Atlantic A 36 16½, do H 36 16, do P 36 13½, do L 36 14, do V 33 13½, Appleton A 36 16, Augusta 36 15, do 30 18, Bedford R 30 10½, Boott H 27 11, do O 34 12½, do S 40 14, do W 45 17½, Commonwealth O 27 8, Grafton A 27 8½, Great Falls M 36 13, do S 33 12, Indian Head 36 16½, do 30 14, Indian Orchard A 40 14, do C 36 18½, do BB 36 12½, do W 34 11½, do NN 36 14, Laconia O 39 14, do B 37 13, do E 36 13, Lawrence C 36 15½, do E 36 14, do F 36 13, do G 34 12½, do H 27 11½, do LL 36 13, Lyman C 36 14, do E 36 16, Massachusetts BB 36 13½, do J 30 12½, Medford 36 15, Nashua fine 33 14½, do 36 16, do E 39 17½, Newmarket A 13, Pacific extra 36 16, do H 36 16, do L 36 13½, Pepperell 6-4 30, do 7-4 32½, do 8-4 40, do 9-4 45, do 10-4 50, do 11-4 55, Pepperell E fine 39 15, do R 36 14, do O 33 13, do N 30 12, do G 30 13½, Pocasset F 30 10½, do K 36 13, do 40 15½, Saranac fine O 33 14, do R 36 15½, do E 39 17, Sigourney 36 10½, Stark A 36 15½, Swift River 36 11½, Tiger 27 8½, Tremont M 33 11.

BLEACHED SHEETINGS AND SHIRTINGS have been in good demand, at an advance of about 5 per cent on medium and low grades. Stocks of popular makes have been sold ahead. There is every indication of a further advance if the present price of cotton is maintained. Amoskeag 46 18½, do 42 16½, do A 36 16, Androscoggin 36 17½, Appleton 36 17, Attawaugan XX 36 16, Atlantic Cambric 36 25, Ballou & Son 36 14½, do 33 12½, Bartletts 36 15½, do 33 14½, do 30 13½, Bates 36 18, do B 33 14½, Blackstone 36 15, do D 36 14, Boott B 36 15, do C 33 13, do E 35 13½, do H 28 11, do O 30 12½, do R 27 10½, do L 36 15, do W 45 17½, Dwight 36 20, Ellerton E 42 20, do 27 9½, Forrest Mills 36 14, Forestdale 36 16, Globe 27 8, Fruit of the Loom 36 18, Gold Medal 36 15, Greene Mfg Co 36 12½, do 30 11½, Great Falls K 36 14½, do M 33 1, do S 31 12, do A 33 14, Hill's Semp. BROWN DRILLS are in fair demand at full rates. Leading brands are scarce, and wanted for export. We quote: Amoskeag 17, Boott 17, Graniteville D 16½, Laconia 17, Pepperell 17, Stark A 17, do H 14½.

PRINTS are selling freely. There is a good demand for spring styles which have been offered by a few companies at an advance of one cent. The majority of the print manufacturers have not yet opened their light effects, and consequently have not yet named a price. The general impression is that they will not be less than 14 cents for standard makes. Allens 12½, American 12½, Amoskeag 12½-13, Arnolds 11-11½, Cocheco 13½, Conestoga 12½-13, Dunnell's 13½, Freeman 11, Gloucester 12½, Hamilton 13-14, Home 8½, Lancaster 12½, London mourning 12½, Mallory 12½, Manchester 13, Merrimac D 13½, do pink and purple 14, do W 15, Oriental 12½, Pacific 12½-13, Richmond's 12½-13, Simpson Mourning 12½, Sprague's purple and pink 14, do blue and white 15, do fancy 12½-13½, do shirtings 15, Victory 11, Wamsutta 9½, Wauregan 11½.

GINGHAMS are unchanged in price; the demand is not large for the season. Spring styles are not yet on the market, they will no doubt

open at an advance on the price of dark work. Allamance plaid 18 Caledonia 14, Glasgow 15, Hampden 15, Lancaster 16, Manchester 13½

MUSLIN DELAINES.—There is but little doing in this class of goods. Dark styles are being closed out at irregular prices, and spring goods are not yet offered to the trade. Prices are not yet fixed for the season, but we have reasons for thinking 22½ cents will be the opening price. Dark and medium styles are still selling at 12½c. We quote Armures 21, do plain 22, Hamilton 21, Lowell 20, Manchester 21 Pacific 21, do Serges 22½, Piques 22, Spragues 19.

TICKINGS are in better demand. The better grades are held at an advance of one to two cents. Medium and low grades are unchanged in price, but show a strong upward tendency. Albany 10½, American 14½, Amoskeag A C A 34, do A 30, do B 24, do C 22, do D 20, Blackstone River 17, Conestoga 25, do extra 30, Cordis 30, do BB 17, Hamilton 26, do D 20, Lewiston 36 31½, do 32 28½, do 30 23, Mees. and W'km's 29, Pearl River 31, Pemberton AA 26, do E 17½, Swift River 17, Thorndike 17, Whittenden A 22½, Willow Brook 27½, York 30 26 do 32 32.

DENIMS are firm, at a slight advance on heavy makes. The stock in jobbers hands is said to be large, and we do not look for any material advance, unless the raw staple should go higher. Amoskeag 30, Blue Hill 15, Beaver Cr. blue 27½, do CC 18½, Columbian extra 29, Haymaker 18, Manchester 18, Otis AXA 27½, do BB 25, do CC 20, Pearl River 28, Thorndike 17½, Tremont 20.

STRIPES have been very active, and with large sales prices are hardening. Albany 10, American 14½, Amoskeag 22-23, Boston 15, Everett 13½, Hamilton 22½, Haymaker 16, Sheridan A 14, do G 14½, Uncasville, dark 16, do light 15, Whittenton AA 23, do A 20, do B B 17, do C 15 do D —, York 22½.

CHECKS are unchanged in price, but with a fair demand. Prices are firm. Caledonia No. 70 26, do 50 25, do 10 24, do 8 19, do 11 20, do 15 27½, Kennebeck 25, Lanark No. 2 12, Park No. 60 15, do 70 20, do 90 27½, Pequa No. 1,200 14½, Star Mills 600 12, do 800 16, Union No. 20 25, do 50 27½.

CORSET JEANS are in light stock, and prices are higher for the best makes of colored. Bleached are dull, and prices nominal. Amoskeag 14½, Androscoggin 12, Bates 12, Everetts 15, Indian Orch. Imp. 13, Laconia 15, Lewiston 13½, Naumkeag 14½, Newmarket 13, Washington satteen 16.

COTTON FLANNELS are in less demand, and prices are a shade lower. Sales for the season are about over.

GRAIN BAGS are in better demand, and with the advance in cotton, agents have advanced their prices 2½ cents. Jobbers are offering a few makes under agents prices, but the stock outside of first hands is very small, and jobbers must soon replenish at higher rates.

CARPETS are quiet, notwithstanding a reduction in price by all the leading companies on the first of the year.

WOOLENS are dull, with the exception of fancy cassimeres adapted to the spring trade. The clothing trade are buying very lightly at present; but we look for more activity before the close of the month.

FOREIGN GOODS are very quiet, there being but little demand from the general trade. Spring importations are not yet offered on the market. The indications are that importations will not be as heavy this spring as last; if this should prove to be the case we look for a more prosperous season for importers.

THE
Union Pacific Railroad Company
 OFFER A LIMITED AMOUNT OF THEIR
FIRST MORTGAGE BONDS
AT PAR.

NINE HUNDRED AND SIXTY MILES

Of the line west from Omaha are now completed, and the work is going on through the Winter. As the distance between the finished portion of the Union and Central Pacific Railroads is now less than 400 miles, and both companies are pushing forward the work with great energy, employing over 30,000 men, there can be no doubt that the whole

GRAND LINE TO THE PACIFIC

Will be Open for Business in the Summer of 1869.

The regular Government Commissioners have pronounced the Union Pacific Railroad to be **FIRST CLASS** in every respect, and the Special Commission appointed by the President says:

"Taken as a whole, THE UNION PACIFIC RAILROAD HAS BEEN WELL CONSTRUCTED, AND THE GENERAL ROUTE FOR THE LINE EXCEEDINGLY WELL SELECTED. The energy and perseverance with which the work has been urged forward, and the rapidity with which it has been executed are without parallel in history, and in grandeur and magnitude of undertaking it has never been equalled." The report states that any deficiencies that exist are only those incident to all new roads, and that could not have been avoided without materially retarding the progress of the great work. Such deficiencies are supplied by all railroads companies after the completion of the line, when and wherever experience shows them to be necessary. The report concludes by saying that "the country has reason to congratulate itself that this great work of national importance is so rapidly approaching completion under such favorable auspices." The Company now have in use 137 locomotives and nearly 2,000 cars of all descriptions. A large additional equipment is ordered to be ready in the Spring. The grading is nearly completed, and ties distributed for 120 miles in advance of the western end of the track. Fully 120 miles of iron for new track are now delivered west of the Missouri River, and 90 miles more are EN ROUTE. The total expenditure for construction purposes in advance of the completed portion of the road is not less than eight million dollars.

Besides a donation from the Government of 12,800 acres of land per mile, the Company is entitled to a subsidy in United States Bonds on its line as completed and accepted at the average rate of about \$29,000 per mile, according to the difficulties encountered, for which the Government takes a second lien as security. The Company has already received \$24,078,000 of this subsidy, being in full on the 940 miles that have been examined by the United States Commissioner.

Government Aid—Security of the Bonds.

By its charter the Company is permitted to issue its own **FIRST MORTGAGE BONDS** to the same amount as the Government Bonds; AND NO MORE. These Bonds are a First Mortgage upon the whole road and all its equipments. Such a mortgage upon what, for a long time, will be the only railroad connecting the Atlantic and Pacific States takes the highest rank as a safe security. The earnings from the way or local business for the year ending June 30, 1868, on an average of 472 miles, were over **FOUR MILLION DOLLARS**, which, after paying all expenses, were much more than sufficient to cover all interest liability upon that distance, and the earnings for the last five months have been \$2,386,070. They would have been greater if the road had not been taxed to its utmost capacity to transport its own materials for construction. The income from the great passenger travel, the China freights, and the supplies for the new Rocky Mountain States and Territories must be ample for all interest and other liabilities. No political action can reduce the rate of interest. It must remain for thirty years—**SIX PER CENT PER ANNUM IN GOLD**, now equal to between eight and nine per cent in currency. **THE PRINCIPAL IS THEN PAYABLE IN GOLD.** If a bond with such guarantees were issued by the Government its market price would not be less than from 20 to 25 per cent premium. As these bonds are issued under Government authority and supervision, upon what is very largely a Government work, they must ultimately approach Government prices.

The price for the present is **PAR**, and accrued interest at 6 per cent from July 1, 1868, in currency.

Subscriptions will be received in New York

At the Company's Office, No. 20 Nassau Street

AND BY

John J. Cisco & Son, Bankers, No. 59 Wall Street.

And by the Company's advertised agents throughout the United States.

Bonds sent free, but parties subscribing through local agents, will look to them for their safe delivery.
