WE OFFER FOR SALE

proposals will be received on Monday and Thursday

Assistant Treasurer.

Bankers and Brokers.

HARVEY FISE.

A. 8. HATCH. Office of FISK & HATCH, Bankers & Dealers in Gov't Securities, No. 5 Nassau Street, New York.

Opposite U. S. Sub Treasury.

We receive the accounts of Banks. Bankers, Corporations, and others, subject to check at sight, and allow interest on balances. We make collections on all points in the United States and Canada, and issue Certificates of Deposit available in all parts of the Union.

We buy and sell, at current rates, all classes of Government Securities,

the Bonds of the Central Pacific Railroad Company; also Gold and Silver coin and Gold coupons.

We buy and sell at the Stock Exchange miscellaneous Stocks and Bonds, on commission, for cash.

We offer also the United States Sixper-cent. Thirty Year Currency Bonds, issued in aid of the Pacific Railroad, which are widely esteemed by moneyed corporations, as the longest Six-percent. Government Bond in the market.

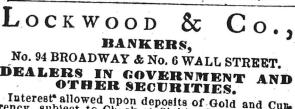

Communications and inquiries by Mail or Telegraph will receive attention.

FISK & HATCH. L. Brownell & Bro.,

BANKERS & BROKERS,

28 BROAD STREET, NEW YORK, Stocks, Bouds. Government Securities and Gold Bought and Sold exclusively on commission. Accounts of Banks, Bankers and Individuals receiv-ed on favorable terms.

J. H. FONDA, Pres. National Mech. Banking Ass. N Y. C. B. BLAIF, Pres. Merchants' Nat. Bank Chicago.

The Chronicle.

THE COMMERCIAL AND FINANCIAL CHRONICLE is issued every Satur day morning by the publishers of Hunt's Merchants' Magazine, with the latest news up to midnight of Friday.

TERMS OF SUBSCRIPTION-PAYABLE IN ADVANCE. For THE COMMERCIAL AND FINANCIAL CHEONICLE, delivered by carrier to city subscribers, and mailed to all others, (exclusive of postage,) For One Year. For Six Months The CHRONICLE will be sent to subscribers until ordered discontinued by letter. Postage is 20 cents per year, and is paid by the subscriber at his own post-office. WILLIAM B. DANA, JOHN G. FLOYD, JR. WILLIAM B. DANA & CO., Publishers, 79 and 81 William Street, NEW YORK. Post Office Box 4,592. Remittances should invariably be made by drafts or Post Office Money Orders.

Bound volumes of the CHRONICLE for the six months ending Jan. 1, 1869, and also previous volumes, can be had at the office.

TABLE OF STATE SECURITIES.

and disturb the money market by rendering currency scarce. And this tendency would be liable to be increased by the payment of the revenue tax, which will shortly attract into the Treasury some fifty millions of greenbacks. The currency balance in the Treasury cannot be greatly increased without endangering the smooth working of the financial machinery. To avoid these dangers it seems inevitable that the Treasury shall buy two or three millions of bonds a week, or else shall in some other appropriate way increase its disbursements so as to deplete the vaults of their accumulating greenbacks. One method which has been proposed for this purpose is to allow the national banks to hold large government deposits. If the Treasury refrains from drawing on these institutions the expected spasm will, it is supposed, be avoided.

Such are some of the arguments to which this new policy of the Treasury has given rise. Without attempting to, unravel at present the intricate problem which they suggest, we may with propriety point out the anomalous position which they show our National Treasury to sustain towards the banks. These institutions it is well known do their business in such a way as to make a small amount of currency suffice for the payment of a large amount of debts. On the average one hundred millions of indebtedness is settled every morning in our Clearing House by the use of no more than three millions of currency. With the Tresury, however, it is far otherwise. Three millions of payments to the government can only be made by three millions of currency, that is it imposes more than thirty times as much pressure on the financial machinery to pay debts to the government as to pay them to business firms and private citizens. This cumbrous and expensive method of making payments into the Treasury is peculiar to this country, and it would be tolerated nowhere else. In England and France no such trouble is experienced, although the annual transactions of their Treasuries are, at least, as large as our own. It would well repay the investigations of a competent person to trace out for us the precise methods by which the French and English fiscal payments are collected and disbursed, and the gradual improvements which each revenue system has received, till it has reached its present state of comparative perfection. When Mr. Wells the Special Commissioner of Revenue, was in Europe he perhaps obtained some valuable information on this subject. If so, it should at once be published for the information of Congress and of the public. If not, he should set about supplying the defect. During the next session of Congress these important questions will certainly be up for discussion. The problem how to enable our Government to ion about it. If two millions of gold are sold every week do its business without disturbing the money market, and how to collect its dues and make its disbursements without aiding in the production of financial stringency is one, the urgency

Our usual table of City and State securities will be found on page 463 of this number of the CHRONICLE. We call particular attention to the fact, as we have received so many inquiries with regard to it of late. We are able to make room for this table only about once a month.

GOVERNMENT SALES OF GOLD.

Yesterday it was announced from Washington that, until otherwise ordered the Treasury would sell two millions of gold a week instead of one million as heretofore. The propriety and expediency of this announcement are discussed with some excitement of feeling, but of its immediate effects there can be no doubt. The further advance of gold was stopped and the price receded 2 or 3 per cent almost immediately. The rumor is that some of our merchants have strongly urged this policy on Mr. Boutwell and the President, and that the latter gave peremptory orders to have it adopted. Of course it is premature at present to offer any positive opinwhile only one million of bonds are bought, more than a million of greenbacks a week will be locked up in the Treasury. This absorption of greenbacks could scarcely fail to derange of which does not admit of delay.

[May 22, 1869.

We must not omit to call attention in this point of view to Mr. Van Dyck's admirable arrangements for the recent s ales of gold and purchase of bonds. These transactions were commenced when the money market was in a highly sensitive and feverish state; and yet so well adjusted was the time and manner of payment for gold and bonds, that one set of trans actions just "washed" the other, and not a ripple was produced on the surface of the money market and its fluctuating currents.

THE GOVERNMENT PURCHASES OF BONDS.

The most prominent feature of the administration of the finances under Mr. Boutwell, is the inauguration of the purchase of Government bonds in the open market. The Secretary has determined, apparently as a permanent policy, upon devoting the proceeds of the Treasury sales of gold to the purchase of the Five-Twenty obligations. We presume that, in doing this, he is satisfied there will be a surplus of revenue, beyond all probable contingencies, sufficient to enable him to undertake this operation. It is to be assumed that he is competent, from his position, to form a safe judgment as to the extent of his surplus means. Under the recent changes both in taxation and expenditure, it may appear, to ordinary observers, that there is someuncertainty as to how the revenues and disbursements of the Government will square with each other; the public, however, will be content to accept the Secretary's judgment on the matter. The current customs revenue is certainly unusually large, and will leave a heavy surplus of coin for conversion into currency. It is not improbable that the gold revenue for the current year may be close upon \$175,000,000, or fully \$50,000,000 in excess of the coin payments, equal to say \$67,500,000 currency. What proportion of this will be required to compensate for the deficiency of currency income, and what balance may be left for the purchase of bonds, remains to be seen. We presume, however, that Mr. Boutwell will promptly suspend his purchases of securities when he finds his funds are required for other purposes; and it is rerhaps too much to expect that the selling of gold and the buying of bonds will be continued regularly the year round.

In considering then the policy of the present purchases of bonds, it should be rememb. red that the Secretary has on hand a surplus of revenue. The question is not whether the taxes should be reduced, or should be continued on the present scale for the purpose of paying off the Debt; but, circumstanced as the Secretary now is, with a large surplus of funds, and with authority to reduce the Debt, we do not see how he could do otherwise than employ his surplus in some manner calculated to improve the public credit and economize the expenditures. The purchase of bonds is certainly calculated to secure both these objects. The spectacle of a country reducing one per cent annually of its Debt is something so uncommon in the financial history of nations, as to have a very direct tendency to enhance its credit. The taking in of bonds saves to the Government a high rate of interest for a succession of years; which, as an economy of expenses, also redounds to the public credit. There is room, however, for diversity of opinion as to whether the Secretary best employs his funds and secures the foregoing objects, by the purchase of Five-Twenties. It may be truly urged in favor of the selection of the Five-Twenty bonds that, in buying them, he makes the largest economy of interest; and that, by making them comparatively scarce and enhancing the price, he prepares the way for the ultimate conversion of this class of securities into obligations bearing a lower rate of interest; and this argument is the stronger because it involves, not only the largest sity of ever touching a resource provided for a much more

present saving of interest, but also an improvement of the prospect of an ultimate economy of interest upon nearly the whole of the gold-bearing Debt. So far, the Secretary's policy is supported by weighty and statesmanlike considerations.

It must, however, be allowed that there are certain features in the present position of the finances which go far toward counteracting these wholesome bearings of the Secretary's course. There are now outstanding \$410,000,000 of demand obligations; upon seven eights of which payment is still suspended, while the remainder, consisting of Three per cent Certificates are liable to payment on presentation. At home, we have become so accustomed to financial derangements as to be comparatively insensible to the effect of this suspension, upon our currency obligations. In Europe, however, our credit is regulated to a very great extent by this consideration; and probably little benefit will result in foreign markets from our thus buying up our long obligations while nothing is being done to provide for the payment of our demand indebtedness. This difference in the estimate of Mr. Boutwell's policy at home and abroad will, in part, account for the fact that, since its adoption, Five-Twenties have advanced 6 per cent at New York, while they have actually declined 2 per cent in Europe. Of course, however, the fall in the foreign markets must be partly attributed to the action of the Bank of England, designed to discourage speculation in our securities. Unfortunately, this discrepancy in prices has induced a large advance in the gold premium; which became necessary to equalize the gold value of bonds at both points; incidentally, therefore, we have a very inconvenient and demoralizing result from the earlier purchases of bonds.

This condition of affairs suggests the inquiry, whether it would not be wise to suspend the purchases for a time. Besides, there are important reasons claiming the devotion of at least a portion of the Treasury surplus to the retiring of the 3 per cent Certificates. These obligations are in the nature of a temporary loan. They were issued less for the convenience of the Treasury than the banks, which suffered embarrassment from the sudden deprival of the Compound legal-tenders, and desired to have a temporary substitute which might afterward be gradually withdrawn. It is not supposable that this form of legal-tender reserve is to be permanent; and there seems to be no special reason why its gradual retirement should be undertaken hereafter rather than now. There are \$53,240,000 of these obligations outstanding, and principally In the hands of the banks, who can present them in any amount for payment on demand. This exposure of the Treasury balance to a sudden drain would be a matter of little importance were the balance kept, as formerly, at from \$25,000,000 to \$40,000,000; but it is a matter of settled policy with Mr. Boutwell to keep his currency balance at about one-third the former high figures, and, as a collateral policy, it seems necessary that he should guard himself against any heavy or sudden demand upon his resources. Desirable as the Certificates may be to the banks, as a reserve, yet in periods of severe monetary pressure they are apt to present them for redemption in large amounts. During October last \$7,000,000 were tendered for redemption, and in December \$2,725,000; and with a currency balance in the Treasury ranging, as of late, between \$5,000,000 and \$10,000,000, it appears necessary either that the Secretary should keep a larger currency reserve or that he should lessen his liability to demands from this source. It is true that Mr. Boutwell is provided, under section 3 of the Act of July 11, 1862, with a reserve of \$50,000,000 of United States Notes, which could be made available for paying off the Certificates; but, in the interest of conservative finance, it is high time this reserve were withdrawn, and the Treasury so managed as to obviate the neces-

THE CHRONICLE.

critical condition of affairs than now exists. The retiring of these obligations, up to a certain limit, would involve no con. traction of the currency; for the reduction of the currency in the hands of the Treasury has thrown a correspondingly increased amount of money into general circulation; and the retirement of Certificates to an extent corresponding to that reduction could therefore involve no disturbance of the equilibrium of the money market. Nor, again, is it to be overlooked that, so far as the Secretary might diminish the amount of these temporary obligations, he would remove one important obstacle to the resumption of specie payments; which would be an important step toward the improvement of the public credit. It is true, the Government has not the option of calling in these Certificates at its discretion; the Secretary has however, the same right to purchase them that he has to buy any other obligation; for section 1 of the Act of July, 1862, provides that the Secretary of the Treasury "may purchase, at rates not exceeding that of the current market, and cost of purchase not exceeding $\frac{1}{8}$ of one per cent, any bonds or certificates of debt of the United States as he may deem advisable."

In some quarters, the authority of the Secretary to make purchases of bonds has been called in question; but, as it appears to us, upon very slender grounds. The Secretary has a double authorization for his action; first, under section 5 of the Act of Feb. 25th, 1862, which requires that the income from customs shall be devoted primarily to the payment of the coin interest upon the Debt, and next "to the *purchase* or payment of 1 per centum of the entire Debt of the United States, to be made within each fiscal year;" and, second, under the first section of the Act of July 11th, 1862, above quoted. The Sinking Fund provision of the former of these acts must be regarded as mandatory.

So long as the management of the finances was embarrased by constantly maturing short obligations, or was attended with an increase of the Debt, the fulfilment of this law might perhaps be regarded as more punctilious than prudent; but now that the Debt is in a comparatively consolidated condition, there is no longer any valid excuse for neglecting the requirements of the Sinking Fund. There may be differences of opinion as to the principle of a sinking fund; and it may be regarded as a mistake that the management of the finances has been encumbered by such a provision; but arguments based upon such considerations can be of no force against Mr. Boutwell's carrying out this law. While the law exists, it must be enforced. It is, however, suggested that the terms of the Public Credit Bill, passed last session, virtually hold the Sinking Fund provision in abeyance, so long as the suspension of specie payments continues. This we take to be a total misconception. The chief, indeed sole, object of that bill was to assure the public creditors, and by so doing, to facilitate the ultimate reduction of the interest upon the Debt. The bill, therefore, requires that the Government shall not undertake the redemption of any of its bonds before maturity, unless it shall have resumed the payment of United States Notes in gold. This stipulation was designed not to prevent any reduction of the Debt previous to resumption, but to give double assurance of the payment of Five-Twenties in coin, by determining that there shall be no redemption of them until coin has again become the common currency. How, then, can a promise not to pay the bonds, otherwise than in coin, be construed into an intention not to fulfill a previous engagement to "purchase" them in the open market? Had the Public Credit Bill been designed to supersede the Sinking Fund, its framers could hardly have failed to include a repealing clause; but, so far from this, the spirit and object of both laws is the same, while there is not a word in the bill to prohibit the purchase of heads. The Public Credit bill energes |

that there shall be no compulsory payment of the bonds in a depreciated currency; the Sinking Fund law authorizes the Secretary to accept a voluntary surrender of the bonds, upon terms satisfactory to both parties; in what sense can the two laws be considered as opposed, or as nullifying each other?

THE BANK OF ENGLAND BATE OF INTEREST.

The city article of the London *Times*, of the 7th instant, gives an explanation of the motives for the advancing of the bank rate to $4\frac{1}{2}$ per cent, which has attracted much attention here, and has contributed to the rapid advance in the gold premium this week. The *Times* speaks with an air of positiveness which, whatever may have been its real occasion, is construed by many among us as warranting the supposition that its utterances are semi-official; and it is this inference alone which has given its statements any serious practical importance. The advance of the rate is attributed entirely to a desire on the part of the Bank directors to check the London speculation in American securities. Says the writer:

Whether the advance of the Bank rate to $4\frac{1}{2}$ per cent will create pressure and distrust sufficient to check the ardor of those who are placing their money on these securities, is the point to be solved. All that can be positively known is that if $4\frac{1}{4}$ per cent will not suffice the movement will go on to the requisite point, whether that point be 5 per cent or 10 per cent. We cannot keep up the New York inflation beyond a certain range any more than we could perpetuate the London inflation of 1866.

It is difficult to determine what reliance is to be placed upon these confident assertions, and whether what is said to be "positively known," represents official inspiration or private opinion. Judging, however, from the remarks of other London journals upon the Times' article, it would appear that its announcement was received with much local distrust. The course of the Bank managers, since the advance of the 6th instant, has not been confirmatory of these vaticinations. The advance of the rate produced but a momentary pressure, which fell as heavily upon consols and legitimate discounts as upon Five-Twenties; and considering the advance in gold, our bonds have since been more than steady at London, while probably not less than \$7,500,000 have been sent there and to Frankfort, within the last two weeks. Moreover, a prom. inent banking house has failed here, with important connections in London and on the Continent; a fact calculated to excite distrust in New York credits. These facts show conclusively that the first turn of the Bank screw has failed to effect the object attributed to it by the Times; and as two weeks have elapsed, with a continuance of the bond movement and yet without a second "twist," there is good reason for doubting the accuracy of its version of the policy of the Bank. The directors of the Bank of England have a weak conception of their mission and power if they imagine that they can exercise any permanent control over the present investment demand for our securities. The demand has been stimulated by a real improvement in the credit of our Government; and it indicates that there is a surplus of capital in England which selects this as the most desirable form of investment. It may be true that more than the usual amount of Five-Twenties is now being "carried" by London bankers; but this is no more than naturally results from the enlarged legitimate inquiry, and cannot be an element of sufficient magnitude to threaten the equilibrium of the London money market. When the legitimate investment demand ceases, the distrusted speculation will decline. Moreover, in the matter of this class of securities, the London market always has a safety valve in the Continental markets, which are at all times ready to take them when the former is over supplied. The interference of the Bank might force a certain amount of Five-Twenties from London to Frankfort, to the loss of the Exchange and the gain of the Bourse; but, only for a moment, could it check the natural outflow of our securities, or the speculation naturally attendant thereon. We scarcely think the Bank managers need to be taught these elementary lessons; although their apparently too-ready spokesman of the Times may,

THE ALABAMA QUESTION HERE AND IN ENGLAND.

It is reported that it was a singular letter of Professor Goldwin Smith, to an English journal, which gave the first impulse to the downward movement in United States securities abroad last week, and the same letter has evidently given rise to much of the excitement which appears in the English journals. We fear Mr. Smith was the victim of some Yan kee's practical jokes, for certainly when he writes that the wrath of our people makes it inexpedient for Englishmen to emigrate to this country, he may alarm the English, but he only makes people here laugh.

If an Englishman were to inquire here, diligently, among all classes of the community in town and country, as to the state of feeling on the Alabama question, he would discover that, the treaty having been rejected, there is absolutely no feeling about it. There is no doubt that Mr. Reverdy Johnson's treaty was distasteful to the American people; they were not willing to submit to arbitration, in the manner they understood that treaty to propose, the question whether we had suffered wrong at the hands of Great Britain during the late war. That question they believe is not open to argument. Nor were they content with an arrangement which lumped the Alabama claims with the claims, well or ill-found. ed, of British blockade runners and other vermin of that kind. But the treaty being rejected, they would have forgotten the question before now had not Mr. Sumner's speech created such intense, and to us here amusing excitement in England, As to the Sumner speech, we doubt if one voter in fifty thousand has read it. It was delivered in secret session of the Senate; it was not printed until after its object-the rejection of the treaty-was accomplished; it was very long, and our people do not read long speeches. Those who did read it regarded it, so far as we have heard, chiefly as a curiosity. Mr. Sumner has long been known here as the strong friend of England and Englishmen. It is pretty generally understood that he knows more English public men than any other of our politicians; that he keeps up a pretty lively correspondence with such men; and it is believed that he is especially averse to any trouble between England and this country. People who read his speech were therefore amazed to find him presenting so strong a case against England; if he had made a speech for the treaty no one would have been surprised.

any one who adopts Mr. Sumner's speech as a basis of settlement. He would find plenty of people who relish the speech as a rather good joke of the Senator's; and a goo many more who are vexed that he should have muddled the matter, by a pretence of "constructive damages."

And if the Englishman enquired further, he would find it to be the very general, and, indeed, almost universal opinion of our people, that we need not trouble ourselves about the Alabama claims; that the precedent set by the British Government during our late war is so embarrassing now to Great Britain that she can afford to pay any reasonable bill of damages rather than remain open to such a retort as we could and undoubtedly would make if she should go to war with any other nation; and that, England being thus caught in her own trap, we may as well let her get out of it as best she can. "If the English want to settle the Alabama claims let them send over a minister, with power to do so. Why should we be running over there with our hats off and our little bill in our hands? We are not pinched;" that is what the average American says. That does not mean war, as the English journals are apparently trying to persuade their readers; it means that Brother Jonathan sees his cousin John Bull in what he would call an "ugly fix," and he enjoys Mr. Bull's embarrassment, and does not mean to help him out of it.

That is the whole of the Alabama question on this side. Nobody here expects a war with England, not only that, nobody here wants a war with England; but one thing is very certain,-if England gets into a war with another country before she settles the question, not all the proclamations which the President could issue, nor all the navy to back them, could prevent the fitting out here of privateers, to retort upon the commerce of Great Britain what she suffered her ships and seamen to inflict upon ours.

As to the terms of settlement, it would be well for English statesmen to remember that the United States are committed, by every tradition and precedent to any plan which will totally abolish, not merely privateering, but also the capture of private property at sea by armed vessels of any kind. From the days of Franklin to this time, we have been ready at all times to agree with all the great nations to make private property sacred on the high seas. Our envoys made that proposition at the last Paris Conference upon international maritime regu-But an enquiring Englishman would seek in vain here for lations, and it was rejected. We do not doubt that our gov-

THE CHRONICLE

ernment would agree to such a law now; but, of course, we should expect that England, making such an agreement, would acknowledge that in the late war she wronged and outraged us, and pay our shipowners for the losses which her illconduct inflicted upon them.

CHANGES IN THE REDEEMING AGENTS OF NATIONAL BANKS.

The following are the changes in the Redeeming Agents of National Bucks for the week ending May 20, 1869. These weekly changes are furnished by, and published in accordance with an arrangement made with the Comptroller of the Currency.

[From our own Correspondent.]

LONDON, Saturday, May 8, 1869. In a financial point of view, the past week has been one of great excitement. On Wednesday the demand for money became very strong, and no bills were taken under the Bank minimum of 4 per cent. On Thursday the directors advanced their rates of discount to the minimum of $4\frac{1}{2}$ per cent, and the Bank return shows that they were not only fully justified in pursuing such a course, but that an advance to 5 per cent would have been a more prudent course to adopt. The reserve of the Bank is now only £6,504,995, against £11,948,107 last year, while the stock of bullion has been reduced advances they make. The following are the present quotations for money, compared with those of last year :

open-market rates:	1868. 1869. Per cent. Per cent. 4 months, ba'k bills 3 @— 5 @— 6 months' ba'k bills 3 @— 5 @— 4 and 6 trade bills
The rates of interest allowed by houses for deposits are as follows :	the joint stock banks and discount

'68. Joint stock banks1 Discount houses, at call1	'69. 3¥ 8¥	Disc't hous	ses, 7 dayı 14	notice	'68. . 1½ . 1½	'69. 3¾ 4

Money on the Continent is firm, with an upward tendency in the quotations. The following are the rates at the leading cities :

40 A		
Frankfort. 25 35 13-2 35	1868. 1869. Turin 5 5	Op. m'kt 1869. 1869 2×-3 2×-3 1× 4× 7× 6-6×

The following statement shows the present position of the Bank of England, compared with the state of its resources at this date since 1865. It also exhibits the *minimum* rate of discount, the price of Consols, wheat, middling Upland cotton, and No. 40 mule yarn at this date since 1865:

..........

from £20,402,992 to £16,582,068. This state of things has caused an uneasy feeling to prevail, and as the altered position of affairs is due to the heavy speculation in foreign securities, there has been quite a panic and also a very heavy fall in prices in the Stock Exchange.

In addition, however, to the recent foreign loans and to the demand for Five Twenties, there has been undoubtedly an improvement in the state of business during the last few months. The readiness with which Five-Twenty bonds have been taken on this side has enabled the Americans to make more extensive purchases of us, and the home trade has also been facilitated and increased by the more abun lant wheat crop and by the cheapness of bread. The clearing-house returns of the 4th of the month for the current year show a total clearing of £70,177,000, against £63,253,000 in the same period last year, being an increase of nearly £7,000,000. During the twelve months ending with Wednesday last, the total passing through the clearing house was as much as £3,534,039,000, against £3,257,'00,000 in the previous twelve months, showing an increase of about £270,0.0,000. The clearances of the 4th were £161,861,000, against £147,113,000; and on the 24th, Stock Exchange settling days, they were £550,622,(00, against £444,430,^00. Since Thursday money has been very tight and it is fully expected that the Bank minimum will be shortly raised to 5 per cent. In the open market the charges for the best descriptions of short-dated paper is 47, and, consequently, the pressure upon the Bank is very strong. A heavy fall having taken place in the value of foreign securities, the banks are extremely cautious in the

It is understood that the charge for messages to New York on and after the 1st of Jane will be $\pounds 2$ for every ten words or under, and 4s for every additional word. The address will have to be paid for.

Although much inactivity still prevails, the markets for cereal produ e are attracting more attention, and, so far as wheat is concerned prices have had an upward tendency. At Liverpool, this week, wheat has realized an improvement in value of 2d. to 3d. per cental ; and in other parts of the country a slight advance has nlso taken place. I mentioned in my last letter that our imports in April were about 1,200,000 cwt. less than they were in the corresponding month last year; that the present crop of English wheat has been about ten months under consumption; and that three months have yet to elapse before, in the ordinary course of things we can expect any considetable supplies of new home-grown produce at market. The early period at which the last crop was gathered in was a manifest advantage to us at the time. Our supplies of home grown wheat at the close of June last year was not only small, but they were also cf very poor quality, and consequently the harvesting of the wheat crop a month earlier than usual was a month's gain to us. Prices declined much earlier than was expe ted, and the necessity was avoided of purchasing considerable supplies of foreign produce at a high price. Now, however, we are beginning to feel the effects of last year's early harvest. The supply of wheat in the hands of the farmers has naturally been very largely ciminished, while the uninterrupted fall in prices since last July has checked a free importation of produce from al road. The diminution, however,

650

THE CHRONICLE.

[May 22, 1869.

up to the present time does not exceed 5,350,000 cwt., which, taking into consideration our large crop, cannot by any means be looked upon as serious. On the other hand, it may be considered as somewhat remarkable that, with constantly drooping prices on this side, our importations have been so well maintained. Latterly, however, that is to say, during the last six weeks, the diminution in our importations has been greater than at any former period during the current season, and just at the time when our stocks of home-grown produce are becoming considerably re luced. In consequence of these facts, there is more steadiness in the trade, and there is some belief in rather higher prices. No great improvement nowever is expected to take place so long as the harvest prospect is so good. There is no doubt that sufficient remains of the last crop to meet our consumption until next harvest, even with a moderate importation from abroad, and, consequently, if the agricultural prospect continues favorable, millers will not be inclined to buy in excess of their actual wants.

The failure in the corn trade, to which allusion was made last week, has led some to infer that more than one firm is in an embarrassed condition. That or the importation of feeding stuffs, such as grinding barley, cats, beans, peas, and Indian corn, there has latterly been a heavy loss is evident. But it must be borne in mind that the Greeks, on whom much of the loss will fall, have of late years made large sums of money in their operations in cereal produce, and that if they have deceived themselves with regard to the price of Spring corn, and have been losers by the error they have committed, they are fully capable of, meeting all the engagements they have entered into. Very probably the importers have been unprepared for so large an importation, and it is also likely that they omitted from their calculations the fact that the diminished supply of stock and the mildness of the Winter had both very considerably reduced the requirements of the farmers and graziers for feeding stuffs. The drought of last Summer necessitated the destruction of a large quantity of stock, or what may be considered as equivalent, it compelled the farmers and grazers to forward much of their stock to market long before it was fully matured. Many animals were sent to market in July, which, in the ordinary course of affairs, would not have been ready before December, January, or February, and, consequently, the requirements of the grazier for feeding stuffs were much reduced. This is now telling seriously upon the trade for butchers' meat, all descriptions being at a very high price. Throughout the Winter there was also a good supply of grass in the pastures, and this again caused less demand for foreign food.

The following return shows the prices of cereal produce at three peri ods in the current season, viz : when new produce commenced to arrive freely at market, when Spring corn was at its highest point, and, lastly, during the present week. The downward movement in wheat has been uninterrupted, and it is believed that, as it was fully enticipated, no losses have been incurred, so much caution having been exercised throughout the season. Barley and oats, however, advanced to a high point by the commencement of November, but from that period a semewhat rapid downward movement set in, and the result has been that prices have declined (as in the case of foreign feeding barley) as much as 13p. per quarter, or about 30 per cent. Beans have declined from 1(s. to 15s.; peas, 3s to 8s.; and Indian corn 8s. to 9s. per quarter :

Business during the present week in the manufacturing districts has been extremely quiet. There has, however, been a fair amount of buying on the part of the United States ; but, with few exceptions, the greatest caution has been observed, and but few purchases have been made in excess of actual requirements. Cotton is lower in price, owing to the augmented shipments from American and Indian ports; but it is stated that the shipments during May and June will be very small. The trade demand is very Guiet, and at Manchester, although there has been no pressure to sell, buyers have refrained from operating largely, except at some concession in prices on the part of producers.

The following return shows the extent of our exports of the principal cotton, linen, silk, and woolen goods to the United States and France during the first three months of the present and last two years :

During the past three months of the current year our imports of wheat into the United Kingdom were 1,400,000 cwt. less than they were in the corresponding period in 1868. The more important feature in the return is the diminution of about 1,000,000 cwt. in our receipts from Egypt. The following are the chief particulars of our imports of wheat and flour in the first three months of the present and last two years:

r have been very large, more especially from Australia. They were as follows during the first three months of the present and last two years :

	1867.	1868.	· 1869.

English Market Reports-Per Cable.

The daily closing quotations in the markets of London and Liver pool for the past week, have been reported by submarine telegraph as shown in the following summary :

London Money and Stock Market .- The market was interrupted early in the week by the occurrence of the Whitsuntide Holidays, which caused a total suspension of business on Monday. Later in the week Consuls ruled better, and at higher figures, closing to night at 931 for money and 938 for the account. American Securities have generally been depressed, consequent on the high price of gold ruling at New York. The market closed quiet at the figures below. Bonds at Frankfort have rule 1 quiet, attributed also to the same reason given above.

Consols for money for account U. S. 6's (5 20's) 1862. Illinois Central shares. Erie Railway shares Atl. & G. W. (consols).	9234 785% 96 2014	Mon. Holi- day.	Tues. 9234 9236 7836 9556 1956 9556	Wed. 9234 9276 7856 9536 1954	Thu. 9314 9314 9314 7814 96 1534	Fri 93¼ 93¾ 78¥ 94¥ 19¼

Liverpool Cotton Market .-- See special report of cotton.

Liverpool Breadstuff's Market .- There was very little doing in this market during the carlier part of the week, business being wholly suspended on Monday, and partially so during the two or three following days, on account of the holidays referred to above. The market closed a little firmer for wheat and corn, and prices slightly advanced.

ADJUSTABLE GAUGE FREIGHT CARS.—A correspondent of the Boston Ccmmercial Bulletin speaks as follows of the changeable gauge cars which now run from Chicago to Portland:

i have made some inquiry regarding this new Northern through line, but found my neighbor merchants were not much better informed as to the working of the line than I was myself, which led me to visit the Lowell Railroad depot, where I saw several of the cars of the line loading with furniture, shoes, and other merchandise, for different points in the West. These cars make quick trips, and work satisfactorily. The change from the New England narrow gauge to the Grand Trunk broad gauge is made at Montreal, with another change at Port Huron, Michiga n, from the Grand Trunk, or broad gauge, to the four feet eight and a half inch gauge, which is the general gauge of the Western States. The cars are built and owned by an incorporated company, and are rented to the different railroads forming the through line, at a fixed rate per car, per mile; it thus becomes the interest of the Car Company to see that their cars are kept moving, and hence the freight with which they are laden must have dispatch. The personal attention and vigilance of the directors will secure for general treight the quick dispatch heretofore attained by express companies from the close supervision outside of the railroad management."

RAILBOADS OF THE UNITED STATES. — We have received to day a copy of the "MANUAL OF THE RAILBOADS OF THE UNITED STATES 1869-70," by Henry V. Poor, Esq, The publication of this Manual of Railroads was first commenced in 1868 in a handsome volume of about 450 pages, giving the best and most complete information in regard to all the railroads of the country that had ever been published. The present volume for 1869-70 is nearly double the size of its predecessor, and is more perfect in all respects. It is beyond comparison the best, and indeed the only valuable, publication containing information as to the railroads of this country that is to be had. An account of every steam road in the United States is given in this "Manual," and also of all the horse-railroad of the principal cities and towns.

NEW ADVERTISEMENTS.—Attention is called to the card of Messrs. Bigelow & Johnston on the last page. This firm, as No. 48 Pine street, deals in iron, new and old rails, fish bars, bolts, nuts, chairs, spikes, wheels, axles, and other material for the building and equipment of railroads.

-Mr. W. N. Worthington, Banker and Broker at No. 14 Wall street, as will be seen by his card on another page, gives special attention to the purchase and sale of stocks, bonds, gold and exchange; also receives deposits subject to check, at sight, and allows 4 per cent interest thereon. -The card of Messrs. Veinam & Hoy, Bankers and Brokers at No. 14 and 16 Wall street, will be found on the first page. All the usual business in the purchase and sale of stocks, bonds, gold, &c., is attended to by this firm and interest is allowed on balances. FRIDAT, May 21, 1869, P. M.

THE MONEY MARKET.—Money has exhibited a slight hardening tendency during the week. The receipts of currency from the interior appear to have partially declined; and money has flowed more freely into the Treasury, under the liberal payments on account of income tax; while some shipments of currency have been made to Boston. The advance in gold, stocks and bonds has also increased the amount required on brokers' loans. Under these influences there has be n quite an active demand for money for the last three days, although there has been no difficulty in borrowing on stocks and bonds at 7 per cent.

Discounts have partially sympathised with the activity in call' loans, but the rate for prime paper is still generally 7@8 per cent with exceptions at 9 per cent. The advance in gold has been attended with the failure of the foreign banking house of Schepeler & Co., which involved the suspension of two or three minor firms. There has also been a suspension of a house in the Brazil trade, from the same cause; and other commercial houses have been reported as in difficulties from their connection with speculations in gold. It has now become so common for houses in the foreign trade to take heavy risks in gold, in connection with their business, that in times of wide fluctuations in gold there is an unusually close scrutiny into the speculative position of such firms; and this has been a prominent feature in the discounting of paper within the last few d ys, the caution having been encouraged by the failures alluded to

The following are the quotations for loans of various classes :

UNITED STATES BONDS .- The bond market has been very active At London and Frankfort Five-Twenties have and buoyant. showed more steadiness than was expected under the uneasy feeling created by the action of the Bank of England. Bonds, indeed, have gone to Europe by almost every mail since the advance in the Bank rate, the shipments last week being estimated at \$3,000,000, and for this week probably over \$4,000,000. This steady foreign demand has taken off all the bonds attracted into the market by the advance in prices and has kept the stock in dealers' hands light, compelling them to buy at each advance, almost against their convictions as to the safety of their purchases. The price of gold having advanced 5@71 points, while prices abroad remained compara tively steady, a further rise in bonds here has been necessitated to equalise quotations in the home and foreign markets. Under these influences Sixty-Twos have sold up to 1231 and Sixty-Sevens to 1201; but, at the close, quotations were a fraction below these figures.

The purchase of \$1,000,000 Five-Twenties by the Government naturally helped the upward tendency of prices. The proposals of the Secretary required the offers to be made upon the principal only, the accrued interest being paid to the sellers by the Treasury, in gold. The Government purchases included \$704,000 coupon Sixty-Sevens at 116.88, \$150,000 reg. Sixty-Fives at 116.78, \$50,000 Sixty-Fours reg. at 116.75, \$46,000 Sixty Twos reg. at 116.74, and \$50,000 Sixty-Fours reg. at 1167. These prices are exclusive of interest, and were somewhat below the average quotations of the day. Some interest is felt in the question as to whether the Secretary of the Treasury will equalise his purcha es of bonds with his increased sales of gold ; no reliable information on the matter, however, is attainable; although it is vaguely rumcred that he will come into the market as a purchaser of the 3 per cent Certificates. The following are the closing prices of leading government, securities, compared with preceding weeks :

[May 22, 1839.

652

-Seven per cent twenty year bonds of the city of Louisville, interest payable April and October in New York, are offcred by Messrs. Wm. Alexander Smith & Co., Bankers, at No. 40 Wall street. City bonds are regarded by many investors as much preferable to either State or United States securities, and we believe that purchasers of Louisville bonds will be quite secure as to their interest and principal.

STATE BONDS.—This class of securities has shown rather more movement than last week; although the excitement in other depart. ments of the Stock Exchange has operated unfavorably to high figures. The general tendency of the market has been downward, but no very important changes are recorded. North a Carolinas have been quite heavily pressed for sale, and both issues were forced down

THE CHRONICLE.

one per cent, owing to the unfavorable condition of the State finances. The Tennessee bonds were about $\frac{3}{4}$ per cent lower, on continued rumors of new issues. Virginias have been steady, and the dealings limited. Southern securities have been generally strong, except on Louisiana Levce Sixes, and Alabama Eights, which have declined one per cent, with no obvious explanation of the cause. The other bond: have been without important changes.

The following are the closing quotations compared with last week:

North Carolina Sixes, x.c 554 Virginia Sixes, old	68¼ 65% 59 51% 57%	Louisiana Sixes, lev. e 70 68% Louisiana Eights, levee 89% Alabama Fives
	6214 7315	

RAILROAD AND MISCELLANEOUS STOCKS .- The feverish activity in stocks has been continued through the week, the transactions having been large, and the fluctuations in prices unusually wide; at the close, however, quotation, do not vary materially from our last. The cliques controlling the principal stocks do not appear to be disposed to force at present any extreme advance, but are probably taking the moderate policy of "feeding" the market as frcely as possible at current prices. There is a growing distrust of the present high scale of prices, and outside operators are too ready to realize upon a moderate profit to admit of prices being easily carried up. Yesterday the Governor signed the New York Central Certificate bi'l, the Consolidation bill, the Harlem Depot bill and the bi'l extending the tenure of office of the Erie directors. This brings the culmination of one of the chief inflation sclemes which have helped to carry up stocks to the present high figures, and has been attended with much excitement in the stocks directly affected, New York Central having sold up to 1925, Hudson River to 1641 and Harlem to 1514. Ohio and Mississippi has been especially strong, having sold up to 365, an advance of 31 upon our last quotation. Pacific Mail, notwithstanding the declaration of a dividend of 3 per cent, closes 23 lower. The Toledo and Wabash Co. has announced its purpose to issue \$4,000,000 new stock, for the building and equipping of an additional line and the erection of grain elevators; the stock has remained steady under the announcement. Fort Wayne is weak, 1 otwithstanding that it has been given out that the Pennsylvania Central, in its proposal to lease the road, engages to pay the interest on the bords, the usual contribution to the Sinking Fund and 12 per cent dividend upon the present amount of stock. The Directors contemplate, in the event of conc'udi g this arrangement, to make a scrip dividend of 711 per cent increasing the capital stock to \$20,000,000 and a cash dividend of $2\frac{1}{2}$ per cent. The market closes barely steady, except on the Vanderbilt stocks, which are strong.

The following were the closing quotations of the regular board compared with those of the six preceding weeks ;

THE GOLD MARKET.-Gold has advanced from 1384, our last quotation, to 1447, yesterday, but again reacted to-day to 1401, and closes at 1411@§. On Monday the failure was announced of Messrs. Schepeler & Co., foreign bankers, upon "short" contracts on gold, said to amount to \$8,000,000. The buying of gold to cover these contracts precipitated a rapid advance, and an effort was nade to compel other parties known to be largely "short" to close their contracts. The transactions connected with these speculative maneuvers were immense, and largely contributed to the high pric s reached yesterday. The chief outside influence fostering the upwird movement has been the comments of the London Times upon the advance in the Bank of England rate on the 6th inst., the purport and bearing of which are explained in our editorial pages. Until to-day the advance in foreign exchange to the specie shipping point has encouraged the upward tendency of the premium; this afternoon, however, rates fell off $\frac{1}{2}$ per cent. The break in the price to-day, from 1437 in the morning to 140¹/₅ this afternoon, appears to have b en due first to the circumstance that several large holders sold out yesterday and were to-day depressing the market, so as to be able to get in gold at lower figure, preparatory to a fresh rise; and, next, to the fact that their efforts happened to be seconded by an announcement from Secretary Boutwell that, until further notice, he will sell \$1,000,000 gold each Monday, additional to the sales of that amount on the Thursday.

The fluctuations in the gold market, and the business at the Gold Board during the week closing with Friday, are shown in the following table :

CENTBAL OHIO RAILBOAD.-At the recent meeting of the directors of the Central Ohio Railroad Company the the following officers were elected : H. J. Jewett, President ; Dar iel Applegate, Treasurer ; Wm. Wing, Secretary. The lease of the Sandusky, Mansfield and Newark

Railroad was confirmed by a vote of over two millions of Central Ohio stock ; also a modification of the lease to the Baltimore and Ohio Railroad was sustained. This vote fixes the period of both leases to twenty years, less the time elapsed. -At the recent meeting of the Directors of the Chesapeake and Ohio Railroad, at Richmond, called to consider a proposition from cer-

tain wealthy capitalists to furnish \$12,000,000 in money, at six per cent interest in gold, to build and equip the above road, provided they are allowed to buy the State's interest and have control of the entire road when finished, a resolution was passed to accept the proposition.

THE CHICAGO, ROCK ISLAND AND PACIFIC RAILBOAD is now completed to Council Bluffs. In addition to the traffic to come to the roadon the through business, the road has opened up a rich farmir g district which can now be reached and cultivated with profit. The Chicago Railroad Review says of the road : "The country opened up by the extension is no less rich in resources than that this side of Des Moines. Leaving Polk C unty, it passes on the line between Dallas and Guthrie Counties on the north, and Madison and Adair on the south, first along the fertile bottom lands of the Coon River and the valley of Bulger Creek, from which, twentyeight miles from Des Moines, it as ends by easy grades to the splendid section of the Quaker Divide, twenty miles in extent. Passing through the region of the 'divides,' it emerges, in Cass County, into a charming, a magnificent country, which continues far into Pottawottamie County, in which it finds its terminus at Council Bluffs. Not only on account of local resources, however, but its Iowa railway connections, would the line have been wisely built. The extension to Ottumwa of the Muscatine Division (now running from Wilton to Muscatine and Washington) will be doubtless made at an early day; and the pushing of this to Comeron is only a question of time, connecting not only with established routes in Iowa, Missouri, and Kansas, but with prospective lines to the Indian Territory and Texas." In addition to the work on the extension, extensive repairs have been made upon the road; 150,000 new ties were laid, and 125,000 will be added this year. Two heavy grades have been cut down, one at Davenport and another at Iowa City. The gross earnings of the road for the year ending March 31, 1869, were \$5,231,979 74. The operating expenses are stated at a fraction less than fifty per cent, including tixes. The annual report will be ready to be presented to the Directors at the annual meeting, to be held the first week in June at Chicago.

THE CHRONICLE.

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, May 21.

The advance in gold begins to be felt in currency prices, but only partially, and not at all in proportion to that advance. The result is extremely unfavorable to importers. To effect sales, they are obliged to submit to an average decline of five per cent in gold prices, although in many instances former quotations did not save them from loss.

Cotton has latterly been more active, but without advance · Breadstuffs continue somewhat irregular. Groceries have been very dull. Tobacco continues active and buoyant.

Hides and skins are very unsettled. Dry Buenos Ayres cannot be quoted over $20@20\frac{1}{2}c$., gold, but city slaughters have advanced to $12\frac{1}{4}c$. Leather more active, at full currency prices.

Petroleum was unsettled early in the week by the suspension of a heavy importer, and has not since recovered tone. Oils have been quiet, except in crude whale, which sold freely early in the week, at \$1 $02\frac{1}{2}@$ \$1 05. Naval stores have been active and variable for Spirits Turpentine, but Rosins have been depressed by the advance in ocean freights.

Hops are steady, especially for the finer sorts. The production of the last crop is estimated at the enormous quantity of 175,000 bales, of which brewers have already taken 75,000 bales, and we have exported about 45,000 bales, leaving a stock on hand of 45,000 bales, of which at least one-half may be expected to be carried over into next year. Hay has ruled firm. Tallow has done better, being taken largely for export. Whiskey, with reduced production, has advanced to \$1 02, tax paid. Building materials are generally lower, but the most marked decline has been in Brick.

Metals are wholly unsettled by the advance in gold, and the same remark applies to East India Goods. Only a partial improvement has taken place in Fruits, and Fish remains unchanged. Wool shows more inquiry and prices are firmer.

Freights have been active in the shipment of grain, but otherwise have been quiet, although a large number of charters have been made at full rates. The Liverpool steamers took Wheat yesterday at 4d.@4 $\frac{1}{2}$ d.; the Glasgow steamer filled up with Wheat at 7d.@7 $\frac{1}{2}$ d.; and the London steamer took 2,500 bbls. Flour at 1s. 6d. The grain charters have been with wheat to Cork for orders at 4s. 6d.@4s. $7\frac{1}{2}$ d., and to Bristol Channel, 4s. To-day the Liverpool steamers obtained 5d.@ $5\frac{1}{2}$ d. for wheat and 3 16d. for Cotton. Petroleum charters have been mainly at 4s. to the North of Europe.

Provisions have latterly shown some buoyancy in hog products, but the close is quiet, with some reaction from the highest point. The leading shipping demand has been for Bacon and Lard. Beef remains quiet. Butter and Cheese are without further decline, but close weak, with full receipts for the season.

Exports of Leading Articles from New York.

The following table, compiled from Custom House returns, shows the exports of leading articles of commerce from the port of New York since January 1, 1869. The export of each article to the everal ports for the past week can be obtained by deducting the amount in the last number of the CHRONICLE from that here given.

COTTON.

FRIDAY, P. M., May 21, 1869.

By special telegrams received by us to-night from each of the Southern ports we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, May 21. From the figures thus obtained it appears that the total receipts for the seven days have reached 18,098 bales, (against 22,201 bales last week, 22,450 bales the previous week, and 21,087 bales three weeks since,) making the aggregate receipts since September 1, 1868 up to this date, 2,224,083 bales (of which 241,000 bales are overland shipments direct to the mills), against 2,285,644 bales (of which 175,000 bales are overland shipments), for the same period in 1867, being an excess last season over this season of 61,561 bales. The details of the receipts for this week (as per telegraph) and the corresponding week of 1868 are as follows:

	-Rece	ipts		Recei	pts 1868

*Under this head we have added the overland shipments direct to manufacturer to April 24, as follows: for the present year 241,000 bales, and for last year 175,000 bales.

The market the past week was very quiet early in the week, but later became more active, until to day, with the decided fall in gold, it returned to its dull quiet state. Prices have been without change, though much of the time rather weak on the low grades, but very firm on the high grades. Saturday the offerings were fair but not pressed, the tone of the market being less buoyant, without, however, any change in quotations either here or at Liverpool. Monday, with the upward movement in gold, prices hardened a little, especially for the better grades, but the market was quiet. On Tuesday there was no market at Liverpool, and very little doing here, and the close was heavy and dull. Wednesday gold rose to 144, closing at 1433, which left a margin for the execution of some shipping orders, and led to considerable activity, although the Liverpool market closed flat at 11 @11 d. for middling uplands. Thursday, Liverpool returned to its old quotation of 111d. for middling uplands, and with gold steady, the market became quite active, and the offerings at the close very limited, the sales reaching 5,883 bales. But to-day gold has declined to $141\frac{3}{4}$, under the announcement of further sales by the Treasury, and consequently cotton is dull, with the foreign advices unfavorable, the closing quotations at Liverpool being 11⁸d. for middling uplands. For future delivery the sales only reach 300 bales, of which 100 were for July, at 274c.; 100 for June, at 274c.; and 100 on private terms. The total sales for immediate delivery this week foot up 17,308 bales (including 944 bales to arrive), of which 5,913 bales were taken by spinners; 1,155 bales on speculation; 8,356 bales for export; 1,884 bales in transit, and the following are the closing quotations:

662

The exports for the week ending this evening reach a total of 41,626 bales, of which 28,605 were to Great Britain, and 13,021 bales to the Continent, while the stocks at all the ports as made up this evening, are now 199,898 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us by our own correspondents at the various ports to-night:

Week ending	Export	ed to	Total S	ame week	Sto	ck
- May 21. (l't Britain,	Contin't.	this week.	1868.	1869.	1868.

the monotool .						

Total...... 28,605 13,021 41,626 22,757 199,898 169,115 From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 18,869 bales, while the stocks tonight are 30,783 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports since Sept. 1, according to the latest mail returns. We do not include our telegrams to-night, as

attended with cold and unseasonable weather, in Alabama, in portions of Mississippi and all along the Atlantic const, and consequently receive discouraging accounts as to the condition of the cotton plant in those sections. In Texas, Louisiana, and in that vicinity, the weather has leen more favorable; but the overflow of the rivers in those States has for some time threatened considerable damage—as yet, however, without serious results. But, taken as a whole, the crop is now withou do ubt very backward and unpromising. Replanting has become necessary in some districts, and is going forward as rapidly as circumstances will permit.

RECEIPTS.—The receipts at the ports this week are again in excess of the amount generally anticipated for this period, and yet the month began with the interior stocks so much larger than last year, and they are being so rapidly diminished that the receipts are easily accounted for. Stocks at the inland ports are now reduced to about 24,000 bales, against 55,000 bales on the 1st of May, and 14,000 bales at this time last year. With this reduction, it is probable that next week's receipts will be considerably less than the total we give to night for the past seven days, and that after that a marked falling off may be looked for. There seems to be a general impression here that more cotton remains in planters' hands now than at this time last season. Be this as it may, there is little reason for supposing that it will be hurried to market as long as the present uncertainties hang about the growing crop.

THE CHRONICLE.

The exports of cotton this week from New York show a small decrease, the total reaching 7,465 bales, against 8,962 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last fou: weeks; also the total exports and direction since September 1, 1868; and in the list column the total for the same period of the previous year:

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per latest mail returns, have reached 30,449 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in the CHRONICLE last Friday, except Galveston, and the figures for that port are the exports for two weeks back. With regard to New York, we include the manifests only up to Tuesday night, to make the figures correspond with the official week. Below we give a list of the vessels in which these shipments from all ports, both North and South, have been made:

EUROPEAN AND INDIAN COTTON MARKETS .- In reference to these markets, our correspondent in London, writing under the date of May 8, states :

LIVERPOOL, May 8.-A further decline has taken place in the value of cotton during the present week. There has been only a moderate demand, and very little business has been done on speculation. The total sales of the week are 46,650 bales, of which 2,650 bales are on speculation; 7,160 bales are declared for export; leaving 36,840 bales to the trade. American cotton has fallen $\frac{1}{2}$ ($\frac{3}{2}$ d; Brazilian $\frac{1}{2}$ ($\frac{1}{2}$ d; Egyptian $\frac{1}{2}d$, and East Indian $\frac{1}{8}@$ [§]d per lb.

Cotton to arrive was neglected until yesterday afternoon, when a large business was done. The latest quotations are : American, basis of Middling, from Savannah, steamer and ship named, 114d; New Orleans, ship named, 113d; Maranham, basis of fair, ship named, 12d; Broach fain d

### TOBACCO.

FRIDAY, P. M., May 21, 1869.

There is a decrease in the exports of crude tobacco this week, the total from all the ports reaching 2,253 hhds., 470 cases, and 456 bales, against 4,927 hhds., 1,259 cases, 411 bales, 167 hhds. stems, and 77 tierces for the previous seven days. Of these exports for this week, 1,891 hhds., 440 cases, and 42 bales were from New York; 7 hhds. from Baltimore: 13 hhds, 4 cases, and 114 bales from Boston. The direction of the shipments of hhds. was as follows: To Bremen, 646; to Havre, 1,189; to Liverpool, 63; to Gibraltar, 212, and the balance to different ports. During the same period the exports of manufactured tobacco reached 147,954 lbs., of which 68,196 were to Liverpool. The full particulars of the week's shipments from all the ports were as follows:

Exp'd this week from New York.	Hhds. 1,891	Case. 440	Bales.	IIhds. Stems.	Tcs.	Pkgs. 107	Man'd lbs. 147,954

Below we give our usual table showing the total export of Tobacco from all the ports of the United States, and their direction, since November 1, 1868:

Exports of Tobacco from the United Stat

The market the past week has continued active and buoy ant for Kentucky Leaf, and otherwise quiet.

Kentucky Leaf has met with an active export demand, and prices of low grades are again a half cent per lb higher. The sales for the week amount to 1,500 hhds, including lines to fill government contracts for France, Spain and Italy. There has also been some business for the North of Europe. But the local trade and cutters view the movement with indifference, and do not believe the advance can be maintained. We have the usual reports of damage to the plants of the growing crops, and there seems no doubt that the crop of last year was generally over-estimated by at least 10,000 hhds. But trade is dull, and no doubts are entertained of an adequate supply.

Seed Leaf has been quiet, though generally pretty firm. The accounts from Brazil have led to some movement in fillers, but the market is dull and weak. The advance in gold had no perceptible effect on currency prices. The sales of the week embrace 400 cases Old, New Ohio, State and Pennsylvania fillers, at 8@9 c.; 110 Old Crop Connecticut wrappers at 18@22 c.; 200 State wrappers, crop of 1868, at 16@22 c. Spanish tobacco is sparingly offered, except at some advance in currency prices, which buyers are unwilling to pay. Sales, 250 bales Havana, at \$1 02@\$1 10; 100 do., Yara, private terms. Manufactured tobacco remains quiet. The receipts of tobacco at New York this week, and since Nov. 1 have been as follows:

## BREADSTUFFS.

FRIDAY, May 21, 1869, P. M.

The market for breadstuffs has been very unsettled the past week and so closes.

Flour has arrived more freely, and the trade has been very dull, but good lines of extra State have been more saleable for export, favored by the advance in Exchange, by which prices have been sustained-about 12,000 bbls. having been sold, mostly for London, at \$6 35@\$6 45, with freight 1s. 3d. @1s. 6d. But other brands of Flour, whether low or high grade, have met with a slow sale. Prices have been with difficulty supported. Receivers at this season are unwilling to store Flour and press sales from wharf, which contributes to the weakness of prices.

Wheat has arrived to a moderate extent from the Canal, and these supplies have been quickly taken up for export mostly at \$1 45 for No. 2 Spring, though there has been some business for shipment at \$1 50 for No. 1 Spring, and \$1 55@\$1 57 for Red Winter Canada, in bond. The decline abroad was counterbalanced by the rise in gold, until to-day, with an advance of one penny per cental in Liverpool,

THE CHRONICLE.

we have a decline of two per cent in gold. The advance in ocean freights has added to the difficulty of sustaining prices. At to-day's market the offerings of Spring were but limited, aud No. 2 closed quiet at \$1 45, and White California at \$1 67@\$1 70.

Corn has been very unsettled. Much of the receipts of new Corn have been in a very damaged condition, and with no distilling demand to afford support very low prices have been accepted. The range has been from 50c. to 90c. per bushel, but mostly at 65c.@85c. for new mixed. Old Corn is becoming scarce, and in view of the bad condition of the new, brings full prices.

Oats were pressed down by liberal receipts and a desire to reduce stocks in store, but at the decline became active and closed more steady. Rye has also been dull and drooping, though in reduced stock. Barley is very dull; some parcels new Hungarian have been closed out at \$1 75. Barley Malt is in large supply and dull. In Canada Peas we notice the sale of a cargo of 7,800 bushels which arrived through this Spring by Canal, at \$1 23, for Liverpool, with 4d freight. If The receipts of grain at the Western Ports were again s maller last week than the corresponding week of 1868, but

for the week just closing will show a considerable increase :

### GROCERIES.

FRIDAY EVENING, May 21, 1869.

The controlling cause in the direction of the markets for Groceries this week, as for others, has been the rapidly varying and exciting phases of the market for gold. This has been enhanced by the heavy failure of Messrs. Schepeler & Co. and some attendant ones of minor importance; none of them, however, in the direct line of the business under review. The effect of the rise in the price of gold has been uniformly to check the operations of jobbers and subdue such life as there may previously have been in the different branches of the Grocery trade. There has been no material advance in current prices, but the consequent unsettling of values whereever gold is an element of calculation has operated to the temporary disadvantage of all lines of Groceries. Yesterday and to-day, with the decline in gold, matters begin to assume a more encouraging look, and a better general trade is expected.

Coffee has been inactive and during the latter portion of the week entirely unmoved. The price of gold placing it beyond the power of jobbers to buy at such terms, paying gold, as would give them any margin for resale, Teas have been taken during the week at prices which have been irregular and weaker.

Sugars have been strengthened by the state of the gold market, but rendered quiet until toward the close, when refiners purchased more freely. Molasses has been steady, with a good demand for all the better grades.

Imports of the week have included only one cargo of teaof Japans; 13,194 bags of Rio coffee, and cargoes also of Maracaibo and Laguayra. Imports of sugar have been liberal in boxes, bags and hogsheads. Of molasses the receipts are only moderate. In regard to the sugar movement at Havana and Matanzas, the Havana Weekly Report says:

The receipts at the warehouses from 1st Jan. to date amount to 879,436 bxs. against 959,380 bxs during the same period in 1868; the exports up to date from Havana and Matanzas exceed those of ast year by 48,079 bxs; and the stocks at both ports to-day amount to 339,382 bxs, a decrease of 126,571 bxs when compared with those at same date list year.

The imports at New York for the week, and the several ports since January 1, are given below under the respective heads. The totals are as follows:

	At	N. York.	Total at a - From Jan	all ports

### TEA.

Prices for all descriptions have been very much unsettled. Some holders have demanded full rates, while others have disposed of their stocks at the best current figures. It may safely be said that most of the sales of the week under review have been made at poor prices. Paying in gold and selling at advanced currency prices, jobbers have been unable to purchase except when induced by concessions. The idea is prevalent among the trade that the present is the worst stage of the market, and with some movement at the ruoment of more importance, they look for a more encouraging state of affairs to come. Sales include 4,559 half-chest Greens and 6,290 do Oolongs.

Imports of tea for the week include only one cargo per "Caractacus," from Yokohama, composed of 691,632 lbs of Japans. Dates from China are no later than those previously reported,

The following table shows the shipments of Tea from China and Japan to the United States from June 1, 1868, to March 22, 1869, the date of latest advices by mail; and importations into the United States (not including San Francisco), from Jan. 1 to date, in 1868 and 1869.

### COFFEE.

The week has been one of almost entire quiet in Coffee. The advance in gold has put the prices, which are paid in gold, beyond the reach of jobbers, and the sales have been much restricted. Prices have been nominally unchanged, but in the absence of any actual transactions, hardly afford any criterion of actual values. The telegram from Rio, received early in the week, intimates that future shipments to this market will probably be light, but the news produced no effect here. At the close, with the downward turn in gold, dealers see some signs of a better trade. Sales include 3,446 bags of Rio and 895 do of Java.

Imports of coffee for the week have been small, including 4,614 bags of Rio, per "Emma Sophia," 3,622 do per "Wayfarer," 300 do per "Roseland," 4,500 do per "Kate," and 158 do per "Canada." Of other sorts the receipts include 2,553 bags of Maracaibo per "Lark," 588 bags of Laguayra per "Ir s," 2,017 do per "Thos. Dallett," and 324 bags of sundries.

The stock of Rio May 20, and imports since Jan. 1, are as follows:

In Bags.	'ew York.	Phila- del.	Balti- more.		Savan. & Mobile.		Total.

### SUGAR.

For the greater part of the week past the market for Raw Sugars was very quiet. Refiners had previously supplied themselves quite freely, aad with the rise in gold the views of importers strengthened very perceptibly, and only stocks that could not bear carrying were offered for sale, The result was a very light trade, confined almost entirely to the grades suitable for grocers' use. The firmness of holders has obtained an advance of  $\frac{1}{5}$ , at which the market closes firm and more active with refiners again in the part of purchasers. Refined Sugars have been in good demand and have gained  $\frac{1}{2}$ . Sales include 2,556 hhds of Cubas, 109 do Porto Rico, some 100 hhds Demeraras and New Orleans, 5,600 bags of Pernambuco and 2,792 boxes of Havana.

Imports for the week at New York, and stock on hand May 20, were as follows:

Imports this week	Cuba, bxs. 20,531	P. Rico, *hhds. 1,059	Other, *hhds. 1,362	Brazil, bgs. 9,000	Manila, bgs.

SPICES.

There has been no unusual feature in the business of the week. The demand remains very light, and the sales have been in a small way to jobbers. The 750 cases nutmegs, part of the cargo of the racket just arrived at Boston, is reported to have been sold previous to arrival mainly for export.

### FRUITS.

Foreign Fruit-The high price in gold has operated disadvantageously to this market. The trade has been thoroughly checked by it, and while prices are at the same point in currency as when gold was 10 per cent lower no benefit to the trade has resulted from the fact. Stocks of all kinds are large. Prunes show a moderate animation, going into consumption quite steadily at our quotations. Domestic dried have been generally steady, but close with less firmness, and are more difficult to place at the hitherto prevailing rates. Foreign green fruit from the Mediterranean is becoming scarce. Messina oranges are j bbing at \$7 5 @3 00 per box; do lemons at \$5 00@5 50. Palermo oranges at \$7 00@8 00; do lemons at \$4 00@5 00. West India cocoa nuts are in good supply and selling at \$45 00@50 CO per M for Barracoa, and \$70 00@75 00 for Carthagena. Pineapples are bringing \$15 00@17 00 per C.

### MOLASSES.

We have a continued good demand for all the better qualities of Molasses, including domestic, and firm and advancing prices, which have brought out various lots of the best kinds. There has been but little inquiry for the lower grades and prices for these are unimproved. Sales comprise 1,254 hhds of Cuha of the better grades, 554 do made up of Demeraras, St. Kitts and Porto Ricos, 352 hhds and 68 bbls of St. Croix, and 241 bbls New Orleans.

The receipts of the week at New York, and the stock on hand May 20, were as follows:

### THE DRY GOODS TRADE.

FRIDAY, P. M., May 21, 1869.

.. @

The favorable features to be noticed in the market are—a better demand and improving prices for handsome dress goods, a smaller accumulation in stocks of domestic goods, both cotton and woolen, and, we think also, a rather more settled feeling and greater confidence in the stability and credit of the trade in general. On the other hand, there has been very little improvement in business, prices continue to be low, and there is now hardly a person to be found who anticipates any activity in the market before the beginning of a new season-about the middle of June or first of July.

It might also be considered a favorable circumstance that, there is very little speculation this season in dry goods; the cotton market has ruled so much higher than in the early part of 1868, that with the possibility of a considerable decline

at any moment, there has been no inducement to purchase cotton goods on speculation, even at the comparatively low prices at which they could be bought.

In the market the principal demand has been for the better styles of dress goods, which have advanced above previous figures. In this branch of of the trade there has been decided improvement, and business is better than was generally expected a month ago. A report of the principal sales at auction is given below. Brown sheetings have been weak in price, but can hardly go much lower without a material decline in cotton. In some other kinds of cotton goods prices have been kept firm by the smaller quantity of goods on hand.

The exports of dry goods for the past week, and since January 1, 1868, and the total for the same time in 1867 and 1860 are shown in the following table:

117						

We annex a few particulars of leading articles of domestic manufacture, our prices quoted being those of the leading jobbers:

BROWN SHEETINGS AND SHIRTINGS through the influence of weakness noticed in our last report, and the light the trade doing, have been very unsettled in price; No. 1 Standards selling generally at 15 cents, and all others at 141. At these prices the goods can but be considered cheap, and were it not for the lack of confidence existing generally, we should certainly look for a speculative movement to arise, and an advance in price to follow. Fine browns are mainly unchanged in price, and with few exceptions little accumulation is noticeable. Agawam 36 inches  $12\frac{1}{2}$ , Amoskeag A 36 15, do B 36 —, Atlantic A 36 15, do H 36 14¹/₄, do P 36 12¹/₂, do L 36 13¹/₃, do V 33 12¹/₄, Appleton A 36 14¹/₄, Augusta 36 14¹/₄, do 30 13¹/₄, Bedford R 30 10, Boott H 27 11, do O 34 11¹/₄, do S 40 13¹/₄, do W 45 18, Commonwealth O 27 81, Grafton A 27 9, Graniteville AA 36 -, do EE 36 15, Great Falls M 36 121, do S 83 111, Indian Head 36 15, do 30 -, Indian Orchard A 40 -, do C 36 13, do BB 36 12, do W 34 114, do NN 36 144, Laconia O 39 14, do B 37 —, do E 36 13, Lawrence A 36 13, do E 36 —, do F 86 13, do G 34 11 $\frac{1}{2}$ , do H 27 11, do LL 36 12 $\frac{1}{2}$ , Lyman C 36 14, do E 36 15, Massachusetts BB 36 13, do J 30 11 $\frac{3}{4}$ , Medford 36 14 $\frac{1}{2}$ , Nashua fine 33 14, do 36 151, do E 89 17, Newmarket A 121, Pacific extra 36 141, do H 36 14, do L 36  $13\frac{1}{2}$ , Pepperell 6-4 30, do 7-4  $32\frac{1}{2}$ , do 8-4  $37\frac{1}{2}$ , do 9-4 45, do 10-4 50, do 11-4 55, Pepperell E fine 39 15, do R 36 14, do O 33 13, do N 30 12, do G 30 12, Pocasset F 30 10, do K 36 124, do 40 154, Saranac fine O 33 14, do R 36 15, do E 39  $16\frac{1}{2}$ , Sigourney 36 10, Stark A 36 141, Swift River 36 12, Tiger 27 9, Tremont M 83 11.

BLEACHED SHEETINGS AND SHIRTINGS continue without material change, but the very limited distribution, coupled with the marked reductions in heavy browns, must cause a tendency towards low prices in many of the lines. Wide goods are in rather less re-quest, though prices are fairly steady. Amoskeag 46 20, do 54 28, do A 36 15, Androscoggin 36 171, Appleton 36 17, Attawaugan XX 36 14, Atlantic Cambric 36 26, Ballou & Son 36 14, do 33 12, Bartletts 36 161, do 33 141, do 30 131, Bates 36 181, do B 33 15, Blackstone 36 141, do D 36 121, Boott B 36 151, do C 38 14, do E 85 121, do H 28 11, do O 30 13, do R 28 10, do L 36 151, do W 45 19, Dwight 40 22, Ellerton E 42 20, do 27 10, Elmwood 36 221, Forestdale 36 161, Fruit of the Loom 36 18, Globe 27 -, Gold Medal 36 15, Greene M'fg Co 36 111, do 30 101, Great Falls K 86 16, do M 33 13, do S \$1 12, do A 33 14, Hill's Semp. CORSET JEANS are rather less firm, and by the package lower prices have been named. Amoskeag 15, Androscoggin 16, Bates 12¹/₂, Everette 15¹/₂, Indian Orch. Imp 13¹/₂, Laconia 15¹/₂, Naumkeag 15¹/₂, Newmarket 14, Washington satteen 17.

CAMBRICS are without quotable change, with a limited trade. Amoskeag 10, Portland 8, Pequot 10¹/₂, Victory H 9, do A 10, Washington 10. COITON BAGS are unchanged, and accumulations have been worked off to a considerable extent. American 42¹/₂, Androscoggin 42¹/₂, Arkwright A 45, Great Falls A 45, Lewiston 45, Ludlow AA 45, Ontarios 44¹/₂, Stark A 47, do C 3 bush 65, Union A 30.

44¹/₂, Stark A 47, do C 3 bush 65, Union A 30. COTTON YARNS dull, and prices unchanged. Best Georgia Cotton Yarns Nos. 6 to 12 40, Best South Carolina small skeins 44.

SPOOL COTTONS firm, and higher prices talked of.

FOREIGN DRESS GOODS have grown more scarce, especially in desirable fabrics, and full prices are readily obtained, with an occasional advance for choice styles. The sales at auction have, with one or two exceptions, offered little attractions, being mainly made up of broken lots and balances of importations; prices even for the better styles ruling rather low.

On Tuesday Messrs. Wilmerdings & Mount held a sale of dress goods, silks and linen goods, which attracted considerable attention, especially the black silks, of which there were some full lines and fine qualities. The dress goods mainly were slow; but a few lots of seasonable fabrics were readily taken, though at pretty low rates.

On Wednesday Messrs. Townsend, Montant & Co. had a sale of some 200 lots, mostly silk goods. The plain and fancy colored Poult de Sole brought rather low prices, but the lots were mainly balances of importations, and owners seemed disposed to close out the goods. The black silks not selling up to their ideas were largely withdrawn.

silks not selling up to their ideas, were largely withdrawn. Field, Morris Fenner & Co. had a sale of lace goods, principally in Llama and real thread points, which attracted some attention. The Llama goods went at fair prices in the lower qualities, and were freely taken at \$14 00@18 00; the better grades sold rather low, and owners were disposed to hold back on the goods, prices randing from \$19 50@ 29 50, a few choice Points bringing \$30 00@42 50. The real thread goods went at \$62 50@82 50 for the first line and \$97 50@150 00 for the finer. The designs in both lines were good, but none were of extra texture

On Thursday the principal effering was at Wilmerding, Hoguet & Co.'s, who had a sale of dress goods, silks and linen goods. The latter sold slow, and were not all taken. The dress goods were mostly odd lots, though a few regular lines were offered. Printed Piques  $21\frac{1}{2}@26\frac{1}{2}c$ , Chene printed Grenadine  $13\frac{1}{2}@15\frac{1}{2}c$ , Striped Poplin Skirting 28@31c., Striped Grenadine Barege  $22\frac{1}{2}c$ , Checked Lenos  $18@19\frac{3}{4}$ , Mailed do  $22\frac{1}{2}c$ , Striped Chene Poplins  $22\frac{1}{2}@23c$ . There were some very desizable lots of fancy silks in checks and stripes, but buyers were indifferent even to these, and, with few exceptions, prices were lather low. Black and White Solid Check \$1 79, White Ground do (hair check) \$1 80, Colored Striped \$1 60@1 68, Black and White do (hair line) \$1,89, plain colored P. de Soie 20 inch \$1  $f2@1 67\frac{1}{2}$ , extra do \$1 79, Black Gros Grain, Lisle filling, \$1 67 $\frac{1}{2}@1 70$ .

BROWN DRILLS have shown less firmness, and prices of standard makes have been scarcely maintained. Amoskeag 17, Boott 16¹/₂. Graniteville D 16¹/₂, Laconia 17, Pepperel 17, Stark A 16¹/₂, do H 15¹/₂.

PRINTS continue somewhat irregular, though good styles of all p pular brands are taken without much hesitation at full current rates, and we look for no material change in price for the balance of the season. Allens 12, American 12, Amoskeag —, Arnolds 10, Cocheco 14, Conestoga 12, Dunnell's 12¹/₂, Freeman 10, Gloucester 12, Hamilton 12¹/₂, Home  $8^{1}/_{2}$ , Lancaster 12, London mourning 11-11¹/₂, Mallory 11¹/₂, Manchester  $11^{1}/_{2}-12$ , Merrimac D 12¹/₂, do pink and purple 15, do W 14¹/₂, Oriental 12, Pacific 12¹/₂, Richmond's 12, Simpson Mourning 11-11¹/₂, Sprague's purple and pink 18, do blue and white  $13^{1}/_{3}$ , do shirtings 13, Wamsutta  $8^{1}/_{2}-9^{1}/_{2}$ .

GINGHAMS have shown some additional movement, and prices are firmly maintained. Allamance plaid 18, Caledonia 14, Earlston 221-25, Glasgow 16, Hampden 16, Lancaster 17, Manchester 181.

MUSLIN DELAINES are not in any special demand even for best styles, and but few fresh goods appear on the market. Pacific Armures 20, do Alpacas 8-4 25, do 6-4 26, Pekins 224, Oriental Luetres 18,

### IMPORTATIONS OF DRY GOODS AT THE PORT OF NEW YORK.

The importations of ary goods at this port for the week ending May 20, 1869, and the corresponding weeks of 1867 and 1868, have been as follows:

ENTERED FOR CONSUMPTION FOR THE WEEK ENDING MAY 20, 1869.
