# EIGHT PER CENT PER ANNUM IN GOLD,

### FREE FROM UNITED STATES GOVERNMENT TAX,

THE BALANCE OF THE ISSUE OF

# 1,500,000 DOLLARS,

OF THE

# ST. JOSEPH & DENVER CITY RR. CO.,

### NOW FOR SALE BY THE UNDERSIGNED,

These are a 30 Year Sinking Fund Bond, issued only upon a completed road, and bear Eight per cent interest in gold, payable on the 15th August and 15th February, in New York, London, or Frankfort, and are free from tax. These bonds are in denominations of \$1,000 and \$500 coupons or registered, and secured by an absolute and only mortgage upon the entire line, including all descriptions of Rolling Stock and Equipments. This road is 111 miles in length, the largest portion of which is completed and successfully operated in the daily running of regular trains, the earnings of which are now in excess of the interest liabilities on this issue of bonds. Over

# \$1,500,000

Has already been expended upon this road from Stock Subscriptions and Donations, and in addition to this the Company have a Grant from the United States of Superior Lands valued at \$8,000,000. We unhesitatingly recommend them, and will furnish Pamphlets, Maps and all information.

# PRICE 97 1-2 AND ACCRUED INTEREST IN CURRENCY. THE COMPANY IS ENTIRELY FREE FROM DEBT.

For Six Months For Six Months The CHRONICLE will be sent to subscribers until ordered discontinued by letter Postage is 20 cents per year, and is paid by the subscriber at his own post-office. WILLIAM B. DANA, WILLIAM B. DANA & CO., Publishers. JOEN 6. FLOYD, JR. J 79 and 81 William Street, NEW YORK. POST OFFICE Box 4,592.

Remittances should invariably be made by drafts or Post Office Money Orders.

### OUR CURRENCY AND 1TS CHANGEN.

The firm tone of feeling which has been sustained by Wall street in presence of the troubles of the European money markets indicates pretty clearly that the danger which seems to threaten our currency in the near future approaches us almost all from the side of inflation. Whatever forces may hereafter operate in contracting the currency, we may be well ussured that before these forces have time to develope any notable activity, the inflation and expansion let loose in our issued by the Treasury, may thus play an important part in financial system by recent Congressional legislation, may perhaps have deranged, to a very considerable degree, the course of prices and the relative movements of gold and bonds. It may be useful for us just now to pass in review the composite mass of coin and paper of which our circulating legal tender money is made up. The official statements of it show that it consists of three distinct elements. First, government paper, 476 millions; secondly, bank notes, 300 millions; and thirdly, coin in the Treasury, \$112,776,048. To this we may add the coin in the banks and that in general use, and especially on the Pacific coast, where gold passes current as ordinary money. If we estimate this last mentioned mass of coin as nearly equal in amount to that locked up in the law which made greenbacks a legal tender, the new gold notes of the banks would no doubt be made an acceptable Treasury, we shall have an aggregate of circulating money equal to 1,000 millions of dollars.

million, three per cent certificates 451 millions, and gold certificates  $34\frac{1}{2}$  millions, These different sorts of paper money are all to be continued under the recent acts of Congress except the three per cent certificates which are to be withdrawn if Mr. Boutwell can continue to extract from the country a surplus revenue from taxation sufficient to redeem them. Whether this can be done or not, however, an equal quantity of bank notes is to be issued preparatory to the withdrawal of these  $34\frac{1}{2}$  millions of certificates. And there is no legal obstacle why if withdrawn they may not be reissued should the necessities of the Treasury or any other sufficient motive seem to justify and demand a recourse to that expedient.

inancia

IIC.

The lawful aggregate of National bank notes having been raised from 300 millions to 354 millions there is little doubt that the whole of this currency will be appropriated, and that at least one half of it will be actually issued during the next six months. Moreover an unlimited amount of gold certificates has been authorized and banks organised for that purpose may issue gold notes without limit on a pledge of United States bonds on the sole condition that they hold a coin reserve of 25 per cent. On the issue of government gold certificates no other restriction is imposed than that there shall be a coin reserve in the Treasury equal to  $83\frac{1}{5}$  per cent. The law specially enacts that these "certificates shall not at any time exceed 20 per centum beyond the amount of coin or bullion in the Treasury."

How far these arrangements for a gold currency may tend to promote a resumption of specie payments, remains to be seen. The belief is gaining ground that the expansion of the paper currency may have a tendency to unsettle its value so much as to develop a demand for a specie currency, and that the new coin notes of the National banks with the gold notes

The government paper we have stated at 476 mill ions. the notes were made redeemable in New York. To this This includes greenbacks 356 million, fractional currency 40 point, then, the attention of Congress ought to be directed at

bringing us back to specie payments. Whatever plausibility there may be in this anticipation, we cannot but think that it is a grave blunder, and fundamental source of weakness that the gold notes were not made redeemable in New York. Had redemption here been enforced, and had every bank been compelled to provide for the redemption of its gold notes in this metropolis, the new system would have been open to much less objection, and might possibly have turned out to be a valuable help in that stupendous task of reforming our currency to which the course of events will before long drive us with resistless force. Should the Supreme Court declare unconstitutional the

and popular currency. But this would be impossible except

for FRASER

the earliest possible moment. If our paper money, based on unredeemable greenbacks is to pass away speedily and to be replaced by a sounder currency, redeemable in coin, it is indispensable that this sounder currency should be sustained and supported by the inexpugnable buttress of metropolitan redamption.

### CONSOLIDATION OF THE DEBT.

Two leading complaints have been made about our public debt. We do not refer to the croakings about its prodigious amount or its severe pressure on the resources of the people. We have in view other subordinate but extremely important points, namely-first, the high rate of interest which the debt still bears, and, secondly, the bewildering multiplicity of the different species of the national securities. A remedy for both these evils was suggested by Mr. McCulloch when Secretary of the Treasury, and was adopted by Congress in authorizing the issue of consolidated bonds at a lower rate of interest, into which it was intended to absorb the whole of our funded debt, so as to reduce the bonds of the United States to as simple a form as the Consols of England or the Rentes of France. Since Mr. McCulloch's retirement from the Treasury nothing has been done to carry into effect this wise and judicious scheme; and Congress, a month ago, passed another law, which is not only incompatible with it, but which actually adds to the existing bonds several new and unprecedented descriptions. By this law, if it be put in operation, our debt will be further from unification than ever. This law is known as the Funding Bill of 13th July, 1870, and it has one feature which we believe has never been pointed out, either in or out of Congress. We refer to the provision that the bonds it authorizes are to be paid, principal and interest, in coin of precisely the same standard value as that now current in the United States. The importance of this provision is much greater than it appears, and it may hereafter cause some inconvenience. Several projects have been offered to Congress for modifying our present coin standard. In a country with over 700 millions of doilars of paper currency it is impossible to foresee how far the coin standard may be modified during the financial throes and industrial convulsions which may attend resumption. It has heretofore been deemed wise, therefore, by Congress to leave a certain ambiguity over the phrase "payment in coin." By some means a new policy was enforced in this new funding bill, and the bonds it authorizes, should they be issued, will call for coin of the existing standard.

The impracticable character of this new scheme, however, is such that the law may perhaps be set aside by future legis lation before it has done much to undermine or disturb the existing stability of the public debt. The causes of this im practicability are not far to seek. It authorizes the Secretary of the Treasury to issue 1,500 millions of new bonds in exchange for old ones. In making this change the principal of the debt is not to be increased, but the interest is to be lessened  $26\frac{1}{2}$  millions a year. In other words, the bondholders are to give up  $26\frac{1}{2}$  millions of annual income they now get by their investments, and they are not to have even a nominal increase in the capital represented by their securities. The only advantage offered is a commission of  $\frac{1}{2}$  per cent., or  $7\frac{1}{2}$  millions altogether, to the persons who negotiate the new bonds. What inducement is here offered to the bondholder to exchange for new bonds old and more desirable securities with which he is well satisfied at present? But this is not all. The new bonds consist of 200 millions of 5 per cents, redeemable after 10 years; 300 millions of 41 per cents, redeemable after 15 years, and 1,000 millions of 4 per cents, redeemable after 30 years. Here we have repeated the old

ported into American finance by Mr. Chase. He thought it a very essential thing to give the government a "control" over its debt, and to reserve an option to redeem it at par after some limited term of years. For this hobby we have paid very dear, and it is time so venerable, old, superannuated a maxim were done away with. No other great government in the world has its debt in this crude and expensive shape, and no government in good credit would issue bonds with any such option attached.

The practical method by which to redeem a great debt like that of the United States is the method which we have actu. ally adopted and now practice every week, namely, the purchase of our bonds in the open market.

We might mention other obvious reasons why the new funding bill is not a practicable measure. Enough has been said on these topics heretofore, however, to justify the popular hostility to the scheme and to show that the existing form of the public debt will not be likely to receive much change from the operation of this latest product of the financial statesmanship of Congress. Any future funding bill which may be up in Congress it may be hoped will be more judi. cious as well as more practicable, and will tend to consolidate the debt as well as to lower the rate of interest.

### RAILROAD EARNINGS FOR JULY, AND FROM JAN. 1 TO AUG. 1.

The railroad earnings for July have been obtained at an earlier period than usual after the end of the month, and we are thus enabled to present the tables which follow. The traffic upon most of the roads is equal to, or a little above, that of the same month in 1869, although in several instances there is a difference of some importance. The Chicago & Northwestern road shows a decrease of \$76,110; Illinois Central a decrease of \$50,460; Milwaukee & Ilt. Paul an increase of \$50,092; Ohio & Mississippi an increase of \$18,855; Chicago & Alton an increase of \$70,440; while the Pacific and other new roads continue to show their usual large increase.

So far as the earnings are affected by the movement of grain at the West, a comparison of the total quantity received in July, 1870, at the five leading Western ports, and in the same month of 1869 shows an excess of about 2,000,000 bushels in favor of this year, the total receipts for each week of the month being nearly as follows:

Week ending	1870.	5
Week ending July 30bushels.	2,100,000	
ADIV 23	1 800 000	
July 16	1 800 000	
July 9	1,350,000	
matal hushala		
Total bushels	.7,050,000	

As to the earnings for the present month, it seems probable that they will exceed those of the same month in 1869 on most of the grain carrying roads, as we have now reached the period for this year's grain crop to come forward; and the season has been so early that the harvest was fully three weeks ahead of last year, and much produce must be ready for market. In August, 1869, the movement of grain was very dull and backward in consequence of the late harvest and the principal Western roads showed a material decline in their earnings, compared with the previous year, as may be seen in the following table:

\$1 60 in New York, and to day it is worth about \$1 25; but we presume there is less confidence in the firmness of the present price being maintained than there was last year in the price then ruling. Taking, therefore, all things into consideration, it would appear that farmers have fully as much inducement to forward grain as they had last year, and as there is more produce ready for market we may look for large receipts unless the end of the war or a decline in prices should check the movement. For the first week reported in August the roads have shown an uniform increase.

EARNINGS FOR JULY.

Approximate returns by telegraph.

Since January 1, in a period of seven months, the gross earnings, with a few exceptions, continue to show a balance in favor of the present year, but how much of this increase is due to increased mileage and how their expenses may compare with those of last year, it is impossible to tell. A complete public statement of the monthly earnings and expenses of every railroad should be required by the laws of the States in which they are located.

### THE EUROPEAN SITUATION.

Probably the sympathies of a majority of the American people are on the side of Prussia in the present conflict. As to the reasons for this condition of public opinion, or the wisdom or justice of that opinion it would be useless at present to speak; but we think there is one error growing out of it which should be corrected. We refer to the belief which appears to prevail quite generally that because the Prussians have gained the first battle the war is likely to be short. First. It looks to us very improbable that France will make a humiliating peace-or in other words will consent to a close of the war which robs it of a foot of territory until it is near exhaustion. The North-German Confederation is to be sure rich in all the elements that constitute vast national strength; but it ought to be remembered that France, also, is an empire of great resources. United Germany, now as a consolidated nationality, is capable of doing and suffering great things for a great national object. Pride of race and intellectual achievements, the love of independence and influence, and ambition for military prestige to be won from the most renowned military nation of the world, constitute a high and strong inspiration for the Germans; but France is an old and developed nation, with an intensely patriotic people who cherish its traditions with a love that is almost a passion. These traditions they feel that they are called upon to maintain in the present war. All that Germany is am bitious and determined to gain, therefore, France is equally ambitious and determined to keep; and with resources of at 75 cents.

intelligence, skill, wealth and numbers so nearly balanced, it is altogether premature to predict, from one great battle, either the continuous success of Prussia or the permanent defeat of France.

This error grows, we think, out of another which appears to exist, and that is in regarding the French nation and the Napoleonic empire as one and the same thing. They are not at all synonymous. Indeed, it is the fact that they are so little synonymous that caused the war. Napoleon is a man who has made many remarkable successes; but within the last few years he had made some failures which, whether by his own fault or otherwise, were very mortifying to the French national pride. Many think, and not without reason, that if it had not been that Napoleon felt the necessity of retrieving these failures, there would not have been war in Europe to day. If he shall succeed in his present undertaking, he will be welcomed back to Paris with acclamations, and his son's succession will be in a great measure assured. If he fail again, France will most likely dismiss him, and will show the world that Napoleonism is by no means essential to her national success. A republic would probably follow the emperor's dethronement. Whether it would be enduring we are not prepared to say; but in no combination of circumstances could France be nationally conquered or its territory mutilated by Germany, except after a long and exhaustive war, unless we entirely misconcieve the French character.

Then, again, we should remember that although in the recent battle near Würth the Prussians were certainly victorious, it is by no means certain that they are to continue victorious. They once before gained a victory over the French at Radstadt. But against Radstadt the French can place Jena as an offset; and if the generalship which is said to be now leading the Prussians into the heart of France be not equal to the greatest that has ever been displayed, one would naturally expect that the Germans must meet many grave difficulties before they quit French soil. France, we should bear in mind, is not Austria; hence some excellent military critics think that Prussia has erred in so early leaving her strong line of defence to make an aggressive war. Had she allowed France to strike unsuccessfully against her fortifications until weakened and wearied, and then given an offensive blow, it would have been very effective. The present success, however, has simply resulted in arousing and arming the whole of France. Besides, it is very evident, that every mile the Prussians advance eastward removes them further from their base of supplies, and gives a numer. ous and alert enemy additional facilities for attack. Prussia certainly exhibited great generalship in her Austrian campaign, but there is, perhaps, danger that her remarkable success then may make her a little incautious now. At least, after but one victory it is too soon to anticipate the course or close of the war. We throw out these suggestions because we think that a prevailing belief alternating between a continued war and a speedy peace is simply the life of speculation and of great injury to all legitimate business. Let us accept the situation of war, and that fact established will be a source of stability, and may be used so as to result in profit to us as a nation.

-Railroad maps of the Northwestern States are published in a neat form, convenient for the pocket, by Rufus Blanchard, publisher, 146 Lake street, Chicago. The price of these maps is only 25 cents each, and they contain the counties of each State clearly defined, as also the cities, villages, principal rivers, &c. Each map is of one State only, an arrangement which allows the scale of the map to be unusually large, and its usefulness greatly increased. A map in similar shape of the several Northwestern States together is published by Blanchard at 75 cents.

#### |From our own Correspondent.]

LONDON, Saturday, July 30, 1870.

The telegraph will long ago have informed you of the great event of the week-the alleged secret treaty between France and Prussia. The publication of its main features in the Times on Monday morning last caused much surprise, and even the Ministers in the two Houses of Parliament stated that they knew not how that nespaper procured them. It has since transpired, how ever, that such a document does exist, and from Prussian sources it is affirmed that it is in the handwriting of M. Benedetti, the late French Ambassador at the Court of Prussia. The contents of this document are already known to the American public, but from whom the proposals came in the first instance is still a matter of uncertainty. Some say that M. Benedetti and his master have been outwitted by M. Bismarck and the King of Prussia; that the French had made certain proposals to Prussia, and that M. Bismarck had inveigled M. Bendetti to commit them to paper for his further consideration. This may possibly be the origin of the proposals being in the handwriting of the French Minister, and if so, M. Bismarck has been guilty of very sharp practice with the French Minister, and has secured a weapon which may have considerable influence with the countries now endeavoring to stand neutral in the dispute. Many other theories have been suggested, but whatever may be the truth of the origin of the proposed alliance and spoliation, its publication at the present time has been undertaken for the purpose of injuring France in the eyes of Europe. France, however, professes to desire no allies, and as the war question now stands, the contest is simply one for supremacy in Europe. To venture on an opinion on the result of that war would be futile. A bloody struggle is clearly at hand, and perhaps the probabilities are in favor of French valor and French resources. But the resources of Prussia are also great; her army has, within recent years, obtained signal successes, and perhaps she may carry on the contest longer than will suit the temper of the French nation. In this country the general feeling is, of course, in favor of strict neutrality. We have already suffered considerably in consequence of the great depression in the value of securities and merchandise. It is hoped, however, that when the country becomes accustomed to the altered condition of affairs, business will become more active. The directors of the Bank of England have advanced the minimum for money to 5 per cent. The movement was not unexpected, and has already had a favorable effect. Our quotation is now 1 per cent. higher than the Bank of France; but it is expected that an almost immediate rise to five per cent. will be adopted. The effect of the upward movement in the quotations here has been to correct to some extent the exchanges, and to mitigate the drain of gold. The movements in the bullion market, however, are very uncertain. For instance, at the Bank yesterday, £71,000 in gold was taken out for the continent, and at the same time £40,000 was sent in. Silver, a few days back, was quoted at 62d., but it has since receded considerably, and its value is now quoted nominal. The advance, however, in money to five per cent. is regarded as a measure of precaution, the supply here being fully adequate to meet all our legitimate requirements. But in times of war commerce is deranged, and it is not easily

for FRASER

conducted by means of bills of exchange; hence the demand for the precious metals will be considerable, and is not likely to abate until there is some prospect of a termination to the conflict.  $T_0$ quote the rate for discount is very difficult. In the open market no accommodation is obtainable under the bank rate, and the rate for six months' bank bills is about  $5\frac{1}{2}$  per cent. The joint stock banks and discount houses have advanced their rates of inte rest to the extent of 1 per cent. They are now as under: Joint stock banks .... 

On the continent the value of money is very uncertain. At Paris, notwithstanding that the supply of bullion since the 23d ult has de. clined from £52,737,000 to £45,775,000, the rate is only 4 per cent, but, as stated above, an immediate advance is looked forward to. At Berlin the rate is 8; at Hamburg, 7 to  $7\frac{1}{2}$ ; and at Vienna 6 per cent. In other respects the quotations are almost nominal.

The market for continental bills of exchange is very unsettled; but on the whole, the tone is rather more favorable. The movements in bullion have already been alluded to.

Quicksilver, £7 17s. per bottle; discount 3 per cent. none here There have been numerous failures in the Stock Exchange this week owing to the recent heavy fall in prices. Some important houses have stopped, but it is expected that the worst has now been got over, The first consol settlement, however, since the declaration of war, will take place next week, and as consols have fallen from 93 to 89 at a time when an improvement was looked forward to, some further diff. culties may be apprehended. Business in the Stock Exchange is almost at a standstill. Only the very best firms can deal for time, and these probably are indisposed to keep open books. There is, however a demand from the public for investment for British railway shares, Indian guaranteed railway shares, five twenty bonds, ten-forties, and to some extent, Spanish bonds. South American securities-chiefly Brazilian and Argentine-are thought well of, and as at present prices these yield a very satisfactory rate of interest. A fair number of puchases have been effected. We are now anxious to hear of some actual warfare, but the Emperor has admitted that the war will be long and severe, and if such should be the case, speculative business in securities is likely to be kept in abeyance for a long period.

The following are the highest and lowest prices of Consols and of the principal American securities on each day of the week:

ek:

Trade shows increased depression, owing to the numerous failures which are taking place. At Liverpool, this week, the suspensions have been numerous, and it is believed that many firms will have to succumb. In London, also, there is a great want of confidence, and very little business is in progress, owing to the little credit given. The following relates to the trade of Munchester :

The following relates to the trade of Minchester: This has been a week of comparative disorganization in business and great iregularity in prices. This market has not exactly been in the panic-stricken state which has characterized the cotton and stock markets, because producers state which has characterized the cotton and stock markets, because producers state which has characterized the cotton and stock markets, because producers state which has characterized the cotton and stock markets, because producers state which has characterized the cotton and stock markets, because producers have held light stocks, and have not been under the necessity of forcing sales have held light stocks, and the lower they have gone the more accelerated has been would rapidity, and the lower they have gone the more accelerated has been the speed of the fall. Prices have retrograded since Tuesday, and both spin-ners and manufacturers have to-day been willing sellers at rates which they were not prepared to entertain on Monday and Tuesday. In consequence of were not prepared to entertain on Monday and Tuesday. In consequence of were not greater instances not having been able to fulfill their contracts producers in several instances not having been able to fulfill their contracts within the time originally stipulated, many of these have been cancelled with the severest rigidity, and some remorselessly, if not without scruple. In ex-ceptional times like the present, however, producers who over-sold themselves cannot expect to look for much consideration on the part of buyers, who are experimening heavy losses. Buyers have engagements to fulfill as well as ellers, and can scarcely be expected to bear all the weight and consequences of infulfilled contracts.

ellers, and can be used by be expressed to bear an one weight and consequences of unfulfilled contracts. The bank rate was again advanced one per cent yesterday, making an ad-rance of two per cent within eight days. This advance has created neither suprise nor uneasiness, as it has been looked upon as a precautionary meas-suprise nor uneasiness, as it has been looked upon as a precautionary meas-suprise nor uneasiness, as it has been looked upon as a precautionary meas-suprise nor uneasiness, as it has been looked upon as a precautionary meas-suprise nor uneasiness, as it has been looked upon as a precautionary meas-suprise nor uneasiness, as it has been looked upon as a precautionary meas-suprise nor uneasiness, as it has been looked upon as a precautionary meas-suprise between France and Crussia created so much disquictude that confi-dence was shaken, and a relapse took place. Only a small business was done during the week. Had spinners chosen to make speculative sales in anticipa-tion of a decline in cotton, they might have sold heavily on Monday and Tues-day at prices which they would gladly have accepted to-day. It is evident, however, that the lower prices go the safer they become, and therefore pro-ducers are wary about making large sales for future delivery, lest a sudden reaction might occur some day from some unforescen cause and renewal of confidence. confidence

The public sales of colonial wool were brought to a close on Wednesday. The supply available was 273,735 bales, but of that quantity about 64,000 bales were held over until November, owing to the commencement of hostilities on the Rhine and Moselle. Regarding the result of the sales, observe Messrs. Schwartze, it must be pronounced satisfactory up to the point where the outbreak of war paralysed all action on the part of the foreign trade. For a whole month enormous catalogues had been daily dispose i of with remarkable firmness and regularity; from all quarters business was reported in a satisfactory condition, and despite the unprecedentedly heavy supplies, the tendency pointed to improvement. How sound the position of the article was, was shown by the slight impression which the war fears made, as long as they remained only fears. Any peaceful turn in the aspect of affairs was seized with alacrity to resume suspended operations, and the general conviction among the trade seemed to be that, even if it came to the worst, the moderate price of wool could not suffer any material decline. With the actual commencement of war, however, the foreign competition, representing about one half of the whole purchasing power, ceased almost entirely, and the market was made dependent on the support of the home trade alone. Nor can that support be said to have failed in vigor ; large numbers of English buyers came up from the country, the sale-room was crowded, and for a day or two it appeared as if the remainder of the wools would be cleared at the comparatively moderate reduction-about 1d. per lb.which had then been established. But the continued absence of all foreign demand soon told upon the market, and though the sales have not been wanting in spirit to the last, prices have given way markedly during the last four or five days. What the exact decline is it is difficult to state, since various sorts of wool-according to their greater or less suitability for foreign requirements-have been variously affected. But it is probably correct to give the average decline-and during the last few days all classes of wool participated in it—as about  $1\frac{1}{2}$  l. to 2d. per lb. from the rates ruling at the beginning of these sales. This places prices for good wools nearly on a level with the lowest quota-

shows a slight advance. Several parcels of new English wheat have already been shown at market. The quality is fine, and the weight heavy, viz., trom 63 to 65 lbs. per bushel.

Annexed is a statement showing the imports and exports of cereal produce into and from the United Kingdom for last week and since September 1, compared with the corresponding periods last season :

The exports of railroad iron in June amounted to 125,474 tons against 95,039 tons last year, and 62,773 tons in 1868. In the six months ending with June 30, the shipments were 562,709 tons, of which 114,454 tons were to Russia, 27,141 tons to Prussia, 19,187 tons to Austria, 197.045 tons to the United States, and 102,564 tons to British North America. The total export in the corresponding period in 1869 was 415,784 tons, and in 1868, 296,541 tons.

#### English Market Reports-Per Cable.

The daily closing quotations in the markets of London and Liverpool for the past week, have been reported by submarine telegraph as shown in the following summary.

London Money and Stock Market .- Consols have been steady throughout the week, closing at 911. United States bonds have generally been quiet throughout the week.

NATIONAL TREASURY .- The following forms present a summary of certain weekly transactions at the National Treasury and Custom House. 1.-Securities held by the U.S. Treasurer in trust for National bank and balance in the Treasury ;

-The Baltimore Sun of August 9th says: Further developments in regard to the over-issue of Parkersburg Branch Railroad stock yes-terday indicated a still larger augmentation of the stock than was before known. A list made up by the Secretary shows some 26,000 shares of the false stock put forth from time to time, of which, however, some (an unknown rumber) have been taken up or cancelled on the maturing of loans. Such an issue would amount to \$1,300,000 of the par of the stock, and it is supposed that nearly \$400,000 has been realized therefrom by borrowing on the notes of the Secretary and others operating with him, and using the over-issue shares as collateral. An assignment of all the assets and claims of the Secretary is being arranged, which it is designed that trustees shall administer for the best interests or all concerned.

Cape Cod Railroad.-All the stock has been taken for the extension of this road from the present terminus at Orleans north to Wellfleet, about twelve miles. On the line of this extension the peninsula is nowhere more than four miles wide,

 $\mathbf{203}$ 

August 13, 1870.] chicago, Burlington and Quincy Railroad. - ANNUAL RE-PORT OF THE DIRECTORS AND OFFICERS FOR THE YEAR ENDING APRIL POBT OF THE LINE REPORT. The following is the report of the President of the company, James F. Joy : The following is a statement of the earnings and expenses, or of the transactions of the company for the year ending April 30, 1870. The gross earnings of the company for the year have been as \$6,621,773 12 \$2,135,752 64 From which has been paid dividends and taxes on same ...... 1,600,831 57 \$534,921 07 \$2,044,524 10 Making a difference in the net earnings..... \$530,497 31 It will be seen that, while the earnings have been less in amount, the expenses have been considerably larger, being during the past year, inclusive of taxes, 60 27-100 per cent. of gross earnings, while last year they were 53 58-100. This increase in the proportion of the operating expenses has been partly owing to the diminished revenue, while the expenses could not be reduced in proportion; and partly because there have been additional roads brought into use where the business, not being fully developed, and comparatively light, the ratio of expenses upon them has been greater in proportion to the business than elsewhere. The reduction of prices, for both passenger and freight business, has also, in some measure, affected the ratio of the expenses, as compared with the gross earnings. There was in operation, including branches belonging to the company, at the date of last year's report, 4771 miles of road. To this has been added, during the year, 1254 miles. The property of the company now consists of 60314 " Of these, the continuation to Quincy, and that to Burlington, connect with main trunk lines across Missouri and Iowa, the one to Kansas, and there connecting with its system of roads, and the other with Omaha and the Union Pacific, and may themselves appropriately be called trunk, or main lines. The average length of road in operation the past, as compared with the year before, has been 532 against 4091 or 1221 miles greater. The gross earnings, therefore, have fallen off more than the statement in figures would indicate, because the extent of territory drained by the road has been greater than at any time before. The chief causes of this diminished revenue has been the loss of the corn crop last year almost entirely, and, to a considerable extent, also the two

years before. Corn is the great staple of the State. A failure in its yield affects the business of the railroad in many indirect ways, as well as directly.

The passenger business of the company has been largely in excess of that of 1868-9, the prior year. The revenues from it have been in excess only \$59,014 77, the fares having been considerably reduced below the average of the former year. The whole net earnings for the year, from both freight and passenger business, above all operating expenses and interest, and the amount paid for bonds for sinking fund and cancelled, has been about 15 per cent. on the average capital of the year. The Lewiston Branch, from Yates City to Lewiston, long since fully paid for itself in the business which it brought to the road of this company. That portion of the road formerly styled the American Central, between Galva, on our main trunk, and New Boston, on the Mississippi, was next opened, a distance of fifty miles, about eight months since. It has since added to the revenues of this company \$184,009 68, with a disastrous year, as it may be styled, for business. That from Burlington to Keokuk has been opened about six months, and has added to our gross revenues \$69,966.26. The Peoria and Hannibal, which is the extension of the Lewiston Branch to Rushville about thirty miles, and which has been open about the same time, has produced \$79,876. The Dixon, Peoria and Hannibal, so called, which is about forty-four miles long, is properly an extension of the Lewiston and Rushville Branch, northward, till it strikes the main truck at Buda, is not quite ready for use, but is doing considerable business. This branch from Buda to Rushville constitutes a direct line running south from Buda one hundred miles, all the business of which will pass over the main line to Chicago, about one hundred and twenty miles, and will, for local traffic, be quite as important as the same distance on the main line, and constitutes the shortest possible line from the country through which it runs to Chicago. The Carthage and Burlington road, though its main line has been some time laid, yet was received by this com- I under the new regime.

pany without side tracks or stations, and not in a condition for business. It can, therefore, hardly be said to have been opened up to the close of the fiscal year. These things have now been to a great degree remedied, and we may reasonably expect a fair contribution from that road in the future. Its traffic will pass two hundred and forty miles over our main line to Chicago.

There has been issued and sold to stockholders at par, during the year, to meet all these extraordinary expenditures :

This money was due to bondholders, and has not been called for, and by order of the court remains in the treasury of the company, subject to the order of the court.

In addition to this are the indirect liabilities of the company, being the amount of bonds issued by the various companies whose lines, or parts of whose lines, this company has aided to construct as above stated, and which have generally, by lease or otherwise, become substantially the property of this company, and all of which portions of road so built, are tributary roads directly furnishing business to our main trunk road to Chicago.

These bonds are secured by mortgages made by the companies upon the portion of roads leased to our company, and are liable to be redeemed from the net earnings of the business added by those roads to the general business of our road.

These bonds are eight per cent. bonds, and issued at different times, and amount in the gross, upon all the branch roads, to \$3,800,000.

The business, or net profits to this company from the business furnished to it by those roads, will, it is believed, in six or eight years, absorb those bonds entirely, leaving the lateral roads the property of this company at only the cost of the money which it has advanced to aid in their completion.

#### TREASURER'S REPORT.

The report of the Treasurer, Amos T. Hall, presents statements of general accounts, income account, sinking fund account, and monthly earnings and operating expenses.

The following is a summary of the general accounts :

5,565 89 Chicago teams for transferring freight..... 5,312 50

Monthly Traffic accounts:

Accounts and bills receivable	597,795 75
Post Office Department	10,369 41
Due from agents and connecting roads	165,947 96
Deposits in New York and Boston and in the Treasury	187,517 85

\$24,294,346 07

The income account gives the receipts as stated in the President's report. The sinking fund account shows \$77,000 of Chicago & Aurora second mortgage bonds, \$724,000 Chicago, Burlington & Quincy inconvertible 8 per cent. bonds, \$11,000 Chicago, Burlington & Quincy convertible 8 per cent. bonds, and \$280,000 Chicago, Burlington & Quincy trust mortgage 7 per cent. bonds; a total of \$1,092,000 of bonds purchasen at a cost of \$1,147,861 13-an average premium of 5 1-9 per cent. The premium on the bonds last purchased (inconvertible 8 per cent.) was 10 per cent.

Hastings and Dakota.-It is now reported that the negotiations for the sale of this road to the Milwaukee and St. Paul Company were at length consummated in New York city a few days since. The sale includes the land grant in aid of its construction, and the transfer took place August 1st. General Le Duc, President of the Hastings and Dakota Company, retains a connection with the operation of the road

[August 13, 1870.

The Railroad Gazette has	the following item :
--------------------------	----------------------

Indianapolis, Bloomington and Western.-The section between Crawfordsville and Danville is being closed up rapidly. Already the track layers are within seven miles of Covington, where the road crosses the Wabash, and next week work will be commenced at Danville, on the other end of the line. There has been some unexpected delays in completing the bridge at Covington, but an effort will be made to complete the line by the first of Septenber. At the other end of the route a connection will be made with the Chicago, Burlington and Quincy line between Peoria and Galesburg, by constructing a bridge at Pekin, and building a road up the river a few miles. When this is done, it is intended to run passenger trans through between Cincinnati and Omaha by way of the Indianapolis, Cincinnati and Lafayette road to Indianapolis, the Indianapolis, Bloomington and Western to Peoria, the Chicago, Burlington and Quincy to Burlington, and the Burlington and Missouri River to Council Bluff.

**Export of Railroad Iron from Great Britain.**—Messrs. S. W. Hopkins & Co., 58 Old Broad street, London, and 71 Broadway, N. Y., furnish the following statement of the export of rails from Great Britain, compiled from official returns:

The Equitable Life Assurance Society.—The war in Europe affects the finances, disturbes the gold and stock markets, enhances the price of produce, but has no perceptible effect upon the condition of a well-managed Life Insurance Compary. Nothing in the commercial world is more stable and reliable. Within the short space of eleven years the managers of the Equitable Life Assurance Society have established an institution possessing 12 million dollars in cash, with yearly receipts amounting to  $6\frac{1}{2}$  millions.

The sum assured by the Society in 1869, new business, was 51 million dollars, being by more than 13 millions, the largest amount insured in that year by any single company in the world.

sured in that year by any single company in the world. The Society is an "all cash" company and transacts more than five times the average amount of life insurance done by all American companies, exceeding the new business of the largest note company by more than 25 million.

It has paid for death claims and dividends about 6 million dollars in ten years.

The Society is limited in its investments, by its own charter, to the most reliable securities only.

It is a purely mutual company, and divides its profits every year among policy holders, beginning, in each case, at the end of the first year.

The Equitable issues all desirable forms of policy, and in this regard keeps fully up to the most advanced experiences growing out of the more purely scientific attributes of the business.

Persons in sound health desirous of becoming assured in "The Equitable" may accomplish two objects at the same time: View the splendid new fire-proof building of the society, corner of Broadway and Cedar street, and take out a policy on their lives.

The Equitable is sound, progressive and liberal —"Good for all engagements."

Taxing Coupons and Dividends of Corporations.-The fol-

-We are in receipt of the semi-annual report of the City Bank, London, made up to June 30, 1870, from which it appears that the reserved fund of the bank has been further increased, so that it now stands at £95,000. The attention of parties having London accounts to place, or desiring letters of credit, is directed to the card of the bank in our advertising columns.

-Burlington, Cedar Rapids, and Minnesota Railroad Company's First Mortgage Seven Per Cent. Fifty-Year Sinking Fund Bonds (principal and interest payable in gold), free of Government tax, coupon or registered, convertible at the option of the holder into stock of the Company at par, which privilege will at no distant day enable the holders of these bonds to realize upon them at a price considerably above parbesides paying about nine (9) per cent. currency interest in the meanwhile. The established character of this road, running as it does through the heart of the most thickly-settled portion of the great State of Iowa, together with its present advanced condition and large ears, ings, warrant us in unhesitatingly recommending these bonds to investors as, in every respect, an undoubted security. A limited quantity are still offered at 90 and interest by

### HENRY CLEWS & Co., No. 32 Wall street.

St. Joseph & Denver City Railroad.-The tollowing corres pondence explains itself:

OFFICE OF
THE COMMERCIAL AND FINANCIAL CHRONICLE.
No. 79 and 81 William Street.
NEW YORK, Aug. 5, 1870
Messrs. TANNER & Co., Bankers, 49 Wall street :
GENTLEMEN: As we have received inquiries from subscribers

GENTLEMEN: As we have received inquiries from subscribers in regard to the St. Joseph and Denver City Railroad bonds, advertised by your firm in THE CHRONICLE, we should be glad to receive from you a brief statement of the present condition of the

road, its progress and prospects of completion.

Very respectfully, yours,

WM. B. DANA & CO.

TANNER & CO.,

BANKING OFFICE, 49 WALL STREET, NEW YORK, August 6th, 1870.

MESSRS. WILLIAM B. DANA & CO:

GENTS.—We are in receipt of your communication of the 5th, enquiring for information relative to the St. Joseph and Denver City Railroad Company and its loan now on the market.

We beg to reply that the line of the St. Joseph and DenverCity Railroad commences at the City of St. Joseph, Mo., or rather Elwood, immediately opposite St. Joseph, and runs west through Kansas to Marysville, and from this point in a northwesterly direction through Nebraska to Fort Kearney, where it intersects the Union Pacific Railroad. St. Joseph is the eastern terminus. Fort Kearny will be the western terminus. Upon the formation of the the company it was intended to construct a line of railway from St. Joseph to Denver City, hence the corporate name of the company. But the resolution of the Kansas Pacific Company to construct their line to Denver City, and the necessary legislation authorizing it, controled the decision of the St. Joseph and Denver City Railroad Company to build their line to a junction with the Union Pacific Railroad at or near Fort Kearny. The distance from St. Joseph to Denver City, via this route, is as short as any constructed or projected route known. The importance of this line of railway can hardly be over-estimated. The main trunk line, of which it forms one of the principal links, commences, in fact, at St. Louis. All know the commanding position this western city occupies towards the through traffic across this continent, beginning at the Atlantic and ending on the Pacific coasts, and the number of railway lines terminating at St. Louis. Here the Mississippi River is being spanned by an extensive railroad bridge, and at St. Charles the railroad bridge over the Missouri is approaching com pletion. The direct line of railway from St. Louis to St. Joseph is perfected by the completion of the St. Louis and St. Joseph Railroad. This line was finished last month, and perfect railway communication between these points is at last established. The St. Joseph and Denver City Company continued on this trunk line, and have completed seventy (70) miles, now in successful operation, trans porting passengers and freight of all kinds. The contractors for grading are rapidly approaching Marysville, a distance of one hundred and eleven miles. The iron is on the ground, and being laid as fast as consistent with the construction of a good road. It is the intention of the company to entirely complete the road to Marysville by November next.

TREASURY DEPARTMENT, OFFICE OF INTERNAL REVENUE,

WASHINGTON, Aug 5, 1870. )

SIE: Yours of 18th inst., enclosing copy of ours, dated 29th ult., respecting terms of section 15, act 14, July, 1870, is received. You say that you have explained: First—That c rporations will

You say that you have explained: First—That c rporations will not be responsible for any tax on interest puid on bonds or coupons for the five months ending 31st December, 1870; and, second, that on the net gains and profits of corporations for these five months, whether distributed in the shape of dividends used in construction, or carried to surplus fund account, they will be required to make return in March and April, 1871, as the annual income of companies not required to withhold the "tax," and inquire if your explanations are correct.

I reply, that where interest and coupons fall due at any time during the five months ending 31st December, 1970, no tax whatever is to be withheld therefrom, but the persons receiving such payments must return the same as half of their income.

Second--Your last "explanation" is not correct. The sixteenth section of the act of 14th July, 1870, provides in what manner the returns of dividends, &c., &c., shall be made, and your attention is called thereto. Respectfully,

J. W. Douglass, Acting Commissioner. JOHN B. KENNEDY, Esq., Assessor, Philadelphia. The company's rolling stock and motive power is of the best make and newest inventions; its depots and works of the most substantial and convenient kind; its local business has developed mer Loa Spe Circ Net Leg C dec exc bar the has of i it Mr the sus 3 p for

beyond the expectation of its projectors; it is already a paying road; the payment of the interest on its bonded debt is more than assured from its earnings; the country through which it passes is unsurpassed for climate and soil, and to Marysville thickly populated; the soil is under an advanced state of cultivation; the country from Marysville to Kearny, though less populated, is rapidly filing up with settlers in anticipation of the construction of the railway. Surveys are being made at St. Joseph, preliminary to the construction of a railroad bridge across the Missouri River the franchises of this bridge are, by Act of Congress, vested in the St. Joseph and and Denver City Railroad Company.

The following railroads converge at St. Joseph, and become feeders to the St. Joseph and Denver Railway: The Hannibal and St. Joseph, Missouri Valley, St. Joseph and Council Bluffs, St. Louis and St Joseph, North Missouri (all completed), besides numerous others in process of construction.

The St. Joseph and Denver City Railroad Company possess a grant of land of great value. This grant has been examined by eminent counsel, and pronounced perfect. This, of itself, insures the safety of the bonds of the company, which you refer to. They are a mortgage at the rate of \$13,500 per mile, which is below the minimum other roads are mortgaged. They have thirty years to run, payable in gold, in New York, with interest at the rate of eight per cent per annum, payable semi-annually, also in gold, in New York or Europe, as may be desired. This interest is paid, free of tax. They are coupon bonds, but can be registered, and if desired converted into registered bonds. The Farmers' Loan and Trust Company are Trustees for the bonds. They issue them only on completed road, or for cash, which cash is paid in lien of bonds as the road is completed. The bonds are firmly held and are not offered in the market except by the company's authorized agents. Very respectfully,

Your obedient servants,

TANNER & CO.

Financial Agents St. J. & D. C. RR

Eureka Mining Co (coin) Adams Express Co	\$2 00	Sept. 1.	Aug. 19 to Sept. 2

#### FRIDAY EVENING, August 12.

THE MONEY MARKET. - The last bank statement showed some important changes, not calculated to encourage expectations of long-continued ease. The average showed a reduction of \$2 500,-000 in legal tenders and of \$3,800,000 in specie, accounting together for a loss of \$6,700,000 in the deposit line; the payment of \$757,000 of loans has also taken a corresponding amount from the deposits. The following statement shows that the condition of the banks is less favorable for meeting the wants of the crop movement than that of a year ago:

little disposition in the foreign trade to accept paper, pending the uncertainty about results connected with the war in Europe.

UNITED STATES BONDS.—The bond market has been firm and higher. So far as respects home investors there has been very little buying or selling. The chief demand has come from foreign bankers, who have been steady buyers on speculation. These purchases have been encouraged by the in proved tone of business at London and the advance there in consols and five-twenties, the former having risen to 91 and the latter to 861, against 885 and 83 respec. tively a week ago. The success of the Prussians is regarded as favorable to the expectation of an early conclusion of the war, and the guaranteeing of the neutrality of Belgium by England and Russia, being favorable to those powers escaping involvement in the struggle, and having therefore benefitted the London markets the event has helped to strengthen the bond market. Yesterday, the Treasury purchased two millions of five-twenties, the total amount offered being \$5,607,600. The purchases next week amount to \$1,000,000. The market closes with a firm feeling throughout the list.

The following were the highest and lowest prices of leading government securities at the Board on each day of the past week:

0					Contraction of the contraction of the

STATE BONDS.—This class of securities was dull, and devoid of special interest. Towards the close of the week, however, there was rather more activity noted, and an advance in prices of some of the more prominent bonds. Old Tennessees sold as high as 64, and New 63; Old North Carolinas 49<sup>2</sup>/<sub>4</sub>, and New 31<sup>1</sup>/<sub>4</sub>; New Virgivias 63, and Georgia Sevens  $92\frac{1}{2}$ , though at the close the las<sup>t</sup> named declined 1 per cent. The dealings in the remainder of the list were unimportant, and we note sales of Louisiana Sixes at 73, Levee Eights at 87, Missouri Sixes at 90<sup>3</sup>/<sub>4</sub>, the Hannibal and St. Joseph issue at 901, and New South Carolinas (January and July) at 71.

The following are the highest and lowest prices of the most

	Aug. 6, 1870.	Aug. 7, 1869.
Loans and Discounts.	\$281,200,000	\$261,900,000
ODECIE	66 500 000	26,00 ,000
	32, 900,000	33,900,000
	220,800,000	200,200,000
Legal Tenders	52,300,000	55,000,000

Compared with the preceding week, the last statement shows a decrease of the surplus over legal reserve of \$4,600 000, the total excess being \$15,300,000. This change in the resources of the banks appears to be due mainly to the shipment of currency to the West and the export of specie to Europe. The loss, however, has scarcely affected the tone of the market, and, still less the rates of interest. The Treasury now holds \$40,000 000 of currency, and it is expected that so soon as the market verges toward activity Mr. Boutwell will let out a considerable amount of this supply in the purchase of bonds. It is this consideration mainly which has sustained the market. On call loans the rate has ranged between 3 per cent and 5 per cent. Discounts may be considered quiet for this season of the year, perhaps owing to the fact that there is some free sales by the cliques, who control the leading shares,

active State Bonds at the Board on each day of the past week :

RAILROAD AND MISCELLANEOUS STOCKS .- The stock market has been active and strong during the week, and prices have advanced 1 to 4 per cent., as will be noticed by the comparative table below. Many of the prominent operators are yet out of town, but in view of the probability that the competition in passenger fares and freights, so long existing between the rival trunk railroads, would cease, and that all pending difficulties would be satisfactorily adjusted, sent large orders for the purchase of the more notable stocks. Under the impetus thus given prices advanced as above noted. It was also noticeable that a decline in gold was followed by a rise in stocks, doubtless on the theory f a short war, which would favorably affect values. Yesterday, under

### $\mathbf{206}$

1

### THE CHRONICLE.

prices took a sharp downward turn, which was further noted to-day; but at the close of business a firmer feeling was developed, and the market closed strong. The principal dealings were in New York Central and Hudson River, Lake Shore, Reading, Rock Islaud, St. Paul and Wabash. In the miscellaneous list, Pacific Mail was noticeably weak, and declined to 36. In Express shares, Adams sold up to 69, the other shares being steady.

The following were the highest and lowest prices of the active list of railroad and miscellaneous stocks on each day of the last week:

### \_\_\_\_\_ The Railway Monitor.

EXPLANATION OF THE STOCK AND BOND TABLES Frices of the Active Stocks and Bonds are given in the 1. Prices of the Active Stocks and Bonds are given in the "Bankers' Gazette" ante; quotations of other securities will be found on the pre-

oding page. 2. Quotations of Southern Securities are given in a separate

Table. 3. No reliable prices of Insurance Stocks can be made. 3. No reliable **of Railroad, Canal and Other Stocks,** 4. **The Table of Railroad, Canal and Other Stocks,** on the next page, comprises all Companies of which the stock is sold in any of the principal cities (except merely local corporations). The figures just after the name principal cities (except merely local corporations). The figures just after the name of the company indicate the No. of the CHRONICLE in which a report of the Com-nany was last published. A star (\*) indicates leased roads; in the dividend column merels = stock or scrip.

of me to any vas last published. A star (\*) indicates leased roads; in the dividend column pary was last published. A star (\*) indicates leased roads; in the dividend column *i=extra*; s=stock or scrip. **5. The Tables of Railroad, Canal and Other Bonds 5. The Tables of Railroad, Canal and Other Bonds 5. The tables of Companies** which have been consolidated are frequently these pages the bonds of Companies which have been consolidated are frequently these pages the bonds of Companies which have been consolidated are frequently given under the name of each Company, indicates the time at which the state-immediately after the name of each Company, indicates the time at which the state-ment of its finances was made. In the "Interest Column" the abbreviations are as follows: J. & J.=January and July; F. & A-=February and August; M. & S.= follows: J. & D.=June and December. Q.-J.=Quarterly, beginning with January; ber; J. & D.=June and December. Q.-J.=Quarterly, beginning with January; d.-F.=Quarterly, beginning with February. Q.-M.=Quarterly, beginning with March.

Narch. 6. The Table of United States and State Securities will be 7. The Table of City Bonds will be published on the third Saturday 7. The Table of City Bonds will be published on the third Saturday of each month. The abbreviations used in this table are the same as those in the tables of railroad bonds mentioned above. The Sinking Fund or assets held by the same are given on the same line with the name each city are given on the same line with the name.

Michigan Railroad Bonds .- The New York World says : The Governor's message first recommends that the bonds already issued be valitated, and then hints that the propriety of submitting an amendment authorizing municipalities to issue bonds in aid of railroads is a question for the Leg slature to consider.

The Legislature did consi ler that, as well as the other and more open recommendation, and on the 31 inst. refused to submit amendments either to validate the bonds now out or to authorize the issue of more. By this support of an eminently proper devision the people of Michigan have been spared an unjust debt of \$5,367,175.50, amounting to an imposition of \$27.44 per capita on the whole vote of the State at the last Presidential election. Beyond this, the decision of the court is so thoroughly sustained that there will be no chance for a collusion of railroad corporations and weak or venal municipal councils to pile up any more five-million debts. The defeat is overwhelming and the lesson salutary. A poverful railroad lobby was in attendance, but as against the fear among members of the Legislature of the popular opposition to State aid, failed to disturb in any way the decision of the court. The law of Michigan, therefore, remains hostile to State aid.

-The Lake Superior and Mississippi Railroad, reaching from St. Paul to Duluth, ran the first train through on August 1st.

St. Louis, Vandalia and Terre Haute.-This road, very 1ecently completed, has entered the field for through business with energy, and seems bound to obtain a large share of the 'business between St. Louis and the East. The distance to Indianapolis by this route is 238 miles-24 miles less than by the Alton route-and trains make the distance in time less by an hour. All trains run through between Indianapolis and St. Louis without change, Pullman sleeping coaches run through between New York and St. Louis.

St. Louis and St. Joseph Road.-The St. Joseph Herald has a three column account of the excursion celebrating the completion, July 22d, of this important connection of the North Missouri Roadgiving a completed line. We condense :

The road is completed from St. Joseph to the Missouri River opposite Lexington. The line, as provided in the franchise, takes it from Lexington to a connection with the Missouri Pacific.

It is well known that the road from Richmond to St. Joseph has been leased by the North Missouri Railroad Company with which it connects. The road gives the North Missouri a direct route from St. Louis to St. Joseph, a consummation that company has devoutly wished ever since it owned a road.

The New Orleans, Mobile and Chattanooga Railroad.-The last rail on the Eastern Division, from Mobile to Pascagoula, of the New Orleans, Mobile and Chattanooga Railroad, was laid on July 30th, and it is now open for traffic. The entire line to New Orleans The great drawbridge at Rigowill be running early in September. lettes is nearly finished. This road, though encountering the gravest engineering difficulties, is declared to be very thoroughly constructed, and equipped in the best manner. It will shorten the time between New York and New Orleans several hours.

-The following is a comparative statement of the earnings and expenses of the Union Pacific Railroad for the months of May and June, during the years 1869 and 1870. The statement is official:

May, 1869	Earnings. \$797,948 49	\$512,276 39	Net Income. \$285,672 10
June	706,603 69	534,675 72 \$1,046,952 11	171.926 97 \$457,599 07
May, 1870 June		479,640 61 419,151 81	
Total May and June, 1870 May and June, 1869	51,549,036 10 51,549,036 10	\$898,792 42 \$898,792 42 \$1,046,952 11	\$650,243 67 \$650,243 67 \$457,599 97
Net gain. Net gain for May Net ga n for June	\$41,484 92 \$37,273 38	\$148,159 69	\$192,644 61
Net gain two months	\$192,614 61		C 11 . TT.

-A despatch from Indianapolis says: The consolidation of the Toledo, Wabash and Western with the Decatur and East St. Louis railroads was effected yesterday, on filing papers with the Secretary of State. The completion of the Decatur and East St. Louis Railroad will form a continuous line from Toledo to St. Louis. The Wabash Company is to pay for the Decatur and East St. Louis Railroad, on completion, at the rate of \$40,000 per mile.

For other Railroad Items, see COMMERCIAL AND MISCEL-LANEOUS NEWS, on a previous page.

## The Commercial Times.

### COMMERCIAL EPITOME.

FRIDAX, P. M., August 12. The state of trade has been largely influenced by the course of European affairs. The victory to the Prussians had a variable effect, causing some staples to advance and others to decline. To-day, people began to think they had been oversanguine of an early peace, and the tone of the markets closes quite unsettled.

Cotton has slightly declined. Breadstuffs have given way materially; the statistical situation, as well as the European news, has been strongly in favor of lower prices. Groceries have been drooping. Tobacco opened the week with more activity, but close dull.

Hides show more demand towards the close at full prices, and leather has further advanced for favorite qualities. Skins are quiet. Tallow at some decline has been fairly active.

Naval stores show a slight improvement in spirits turpentine and rosins, with some activity in the latter. Tar firm at the late advance. Oils have been dull with linseed and sperm oils showing a slight decline, Petroleum for some days past has been in brisk demand for export, and refined, which has been found to be scarce for immediate delivery has advanced one cent per gallon; but for the early future there is no decided improvement.

Whisky has declined under large receipts for the season. Hops are firm; a few bales of new have arrived and sold at 30@35c. per lb. Fruits and fish are lower. Hay continues frm, with a good shipping demand.

East India goods have been quiet and prices rather weak. Metals show no important movement, and prices are somewhat unsettled.

Provisions show a pretty general decline. Mess pork closes at \$28 75, a decline of \$1 50 per bbl. Prime mess pork has mostly passed into the hands of shippers; the speculators having generally realized at \$31 50@\$32, and there is no reliable quotation now. Lard has declined one cent per pound, and closes heavy at 164c. for pure steam. Beef has been comparatively unchanged. Butter has lost part of the late advance. The decline in gold checked the caport movement in cheese, and weakened prices, but the close is steady.

Wool has been quite active, and prices rule very firm; but the views of many holders cannot be met.

Freights have been dull, and rates have declined. Wheat being shipped to Liverpool by steam yesterday and to day at 8d; to other ports, and for Petroleum charters, the decline is not so great, and the close is firm.

#### Receipts of Domestic Produce for the Wesk and since Jan. 1.

The receipts of domestic produce for the week and since Jan. 1

#### Exports of Leading Articles from New York.

The following table, compiled from Custom House returns, show the exports of leading articles of commerce from the port of New York since January 1, 1870, to all the principal foreign countries, and also the *total* export of the same articles for the last week and since January 1.

COTTON.

FRIDAY, P.M., Aug. 12, 1870.

By special telegräms received by us to-night from the Southern ports we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening August 12. From the figures thus obtained it appears that the total receipts for the seven days have reached 5,517 bales (against 5,740 bales last week, 6,612 bales the previous week, and 7,477 bales three weeks since), making the aggregate since September 1, 1869, up to this date, 2,889,079 bales, against 2,119,606 bales for the same period in 1868-9, being an increase this season over last season of 769,473 bales. The details of the receipts for this week (as per telegraph) and the corresponding week of 1869 are as follows:

RECEIPTS. Rec'd this week at—	1870.	1869.	RECEIPTS. Rec'd this week at—	1870.	1869.
New Orleans, bales Mobile Charleston	340	122 189	Floridabales. North Carolina Virginia.	33 241 638	8 51 292
Savannah Texas Tennessee, &c	1,016	178     51     502	Total receipts Increase this year		1,759

The exports for the week ending this evening reach a total of 9,109 bales, of which 7,247 were to Great Britain and 1,862 bales to the Continent, while the stocks at all the ports, as made up this evening, are now 94,702 bales. Below we give the exports and stocks for the week, and also for the corresponding week o last season, as telegraphed to us from the various ports to-night:

Our market has continued without any special movement the past week, though during the most of the week there was a much better feeling, owing to the improvement in tone and price which has taken place at Liverpool. Last Friday Liverpool closed at 74d. for Middling Uplands; Saturday the price had further de. clined to 7<sup>s</sup>d.; but Monday the market took a turn upward, closing on that day at 8<sup>1</sup>/<sub>3</sub>d., on Tuesday at 8<sup>s</sup>/<sub>8</sub>d., on Wednesday at 8<sup>s</sup>/<sub>4</sub>d., on Thursday at  $8\frac{1}{5}$ d., and to-day at the same figure. This rapid ap. preciation in the Liverpool quotation naturally made holders here less desirous to sell, although gold has at the same declined, so that our rates were still above the parity of Liverpool. But our stock is small, money is easy, and therefore sales are not forced while spinners are buying quite fairly, or sufficiently so to absorb the offerings. At the close to-night the feeling was a little less favorable, without, however, any change in the quotations. The stock of best grades is small, and yet sufficient to fully supply our spinning demand. The poorer qualities are in abundance. For forward delivery there has been a fair business doing at about ic. advance on last week's rates, a natural reaction from the low prices ruling. Sales of futures for the week reach 11,400 bales (all low middling or on the basis of low middling), of which 3200 bales were for August-600 at 171, 100 at 17, 200 at 171, 500 at bales were for August—000 at 174, 100 at 17, 200 at 175, 000 at 174, 1, 200 at 175, 000 at 174, 1, 200 at 175, 000 at 171, 1, 300 at 175, 1, 300 at 175, 000 at 171, 1, 300 at 175, 1, 300 at 175, 1, 300 at 175, 1, 300 at 165, 400 at 165, 2, 750 bales for Oct.—600 at 161, 100 at 165, 500 at 165, 1, 000 at 165, 2, 750 bales for November—100 at 157, 1, 200 at 16, 200 at 165, 1, 200 1.300 bales for December-700 at 16, and 600 at 161. The total sales for immediate delivery this week foot up 4,305 bales, of which 4,136 bales were taken by spinners and 169 bales on species. lation, and the following are the closing quotations:

	Upland and Florida.	Mobile.	New Orleans.	Texas

THE CROP.-We are new in receipt of mail advices down to the close of July, from the different sections of the cotton growing States, and from them it appears that the month has been, with very limited exceptions, an extremely favorable one for the healthy development of the plant. August opened, therefore, with good promise of a satisfactory result of the year's labor; first, in point of growth, the average development was fully up to last year; second, the warm, dry weather had given the plant a strong, woody, healthy growth; and, third, it was therefore in a good condition to combat with its numerous future enemies. Since the first of the month, however, reports have come in of injury from the grass worm, and the appearance of the caterpillar at various points. But it should be remembered that the grass worm is not likely to do any extensive harm to cotton, and if the weather continues dry, the caterpillar will be equally innoxious. What is more to be feared now than anything else is a continuation of warm rains, which are reported as prevailing in some portions of the South during the past week. Wet weather would necessarily result in a fresh growth, which would feed and mul-

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 2,003 bales, while the stocks to-night are 77,298 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to August 5, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary, by telegraph.

for FRASER

tiply the few caterpillars which are now apearing, until they were capable of doing great injury.

NEW COTTON.—As an indication of the forward condition of the crop the arrivals of new cotton now being announced are of considerable interest. The first two bales of the year were received at New Orleans on the 28th of July, one of which was from Brownsville, Texas, and the other from the Rio Grande, about thirty-five miles from Brownsville. Both of these bales have arrived in this city and were sold on the 7th inst., the one at 35c. and the other at 36½c. By telegraph we learn that the first bale of Alabama cotton was delivered at Montgomery on the 9th instant and sold there the next day at 35c. To-day the steamship "Cleopatra" arrived at this port from Savannah with one bale of the new Georgia cotton, and another bale of the new Florida crop. Last year the first Texas cotton was reported at New Orleans on the 3d of August; the first bale of Alabama cotton was received at Montgomery on the 11th of August, and at Mobile another bale of same was delivered on the 12th of same month; the same days bale of Georgia cotton was received at Savannah, and another at Macon.

# August 13, 1870.]

THE CHRONICLE.

215

STOCKS OF COTTON AT INTERIOR TOWNS .- Below we give the figures received to-night, showing the stocks of cotton at the interor ports at the close of business to-day, and add those for last nor points the corresponding periods of last year for comparison:

WCOM		0		)	
	Aug. 12.	Aug. 5.	Aug. 12.	Aug. 5.	l
Augusta, Ga	2,715	2,900	515	460	
Augusta, Ga	2,000	2,500	200	272	
Columbus, Ga	3,370	3,475	71	84	
Macon, Ga	2,530	2,680	125	160	Ĺ
Selma, Ala	1,535	1,750	100	125	
Memphis, Tenn	4,609	5,964	131	232	
Nashville, Tenn	3,326	3,389	25	101	
110011					

20,085 22,658 1,167 1,437 Total.... The foregoing shows the interior stocks have decreased during

the week 2,573 bales, and that they are now 18,918 bales in excess of the same period of last year.

VISIBLE SUPPLY OF COTTON .- The following table shows the quantity of cotton in sight at this date of each of the two past essons :

BERROTTO .	1870.	1869.
Stock in Liverpoolbales.	568,000	250,000
Stock in London	26,141	43,334
Stock in Glasgow	800	700
Stock in Havre	148,150	53,070
Stock in Marseilles	10,600	3,950

Stock rest of Continent	35,000	15,000
Afort for Great Britain (American)	35,000	19,000
Affort for France (American and Brazil)	19,078	7,494
Total Indian Cotton afloat for Europe	450,359	746,327
Stock in United States ports	94,702	17,404
Stock in inland towns	20,085	1,167
	-	and the second se

1.167.046

These figures indicate an increase in the cotton in sight to night of 261,000 bales compared with the same date of 1869.

GUNNY BAGS, BAGGING, &C .- Dealers report a better demand this week for cloth from Southern buyers and anticipate shortly renewed activity as it will be required for crop purposes. Sales during the week are 40 bales native at 20c. gold in bond, 200 rolls domestic at 31<sup>1</sup>/<sub>2</sub>c. currency, and a rumored sale of 600 rolls at same price. We quote India in bales 31c., Borneo in bales 314c., and domestic in rolls 314@32c. Bags continue quiet, the season of de-mand does not open until September. A sale has been made in Boston of 200 bales to arrive at 13<sup>§</sup>/<sub>4</sub>c. gold in bond, and here of 50,000 linseed bags on private terms. We quote 14c. gold in bond, and 20@22c. currency duty paid. Jute and jute butts are ne-glected, and prices though nominal tend downward.

The exports of cotton this week from New York show a decrease since last week, the total reaching 2,231 bales, against 3,247 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1869; and in the lust column the total for the same period of the previous year:

SHIPPING NEWS .- The exports of cotton from the United States the pist week, as per latest mail returns, have reached 4,220 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in the CHRONICLE last Friday, except Galveston, and the figures for that port are the exports for two weeks back. With regard to New York, we include the manifest only up to Tuesday night, to make the figures correspond with the official week. Below we give a list of the vessels in which these shipments from all ports, both North and South, have been made:

NEW YORK-TO Liverpool, per steamers Manhattan, 2,064Siberia, 84Italy, 66	balles.
S41taly, 66	2,215
To Mexico, per —, 17 Mobile—To Liverpool, per bark Jonathan Chase CHARLESTON—To Barcelona, per brig Louisa	1,737 252
Total	4,220

The particulars of these shipments, arranged in our usual form, are as follows:

EUROPEAN AND INDIAN COTTON MARKETS .- In reference to these markets, our correspondent in London, writing under the date of July 23 states:

LIVERPOOL, July 30.-The Cotton market assumed some appearance of steadiness on Friday and Saturday, and on Monday the business was considerable, chiefly by the trade, but without advance. The state of the continent, and consequent want of all confidence, both political and commercial, has since had a most unfavorable influence, and the sales during the last three days have been limited, with a decline, and the market to-day is completely disorganized. Sea Island continues very heavy, and prices are irregular at fully 1d. per lb. decline during the

#### TOBACCO.

FRIDAY, P. M., Aug. 12, 1870.

There is a decrease in the exports of crude tobacco this week, the total from all the ports reaching 1,943 hhds., 73 cases, and 904 bales, against 2,714 hhds., 265 cases, 15 bales and 25 tcs. for the previous seven days. Of these exports for this week 893 hhds., 53 cases, 904 bales, were from New York; 71 hhds., 29 cases from Boston, and 963 hhds. from New Orleans. The direction of the shipments of hhds. was as follows : To Liverpool, 470; to London, 261; to Glasgow, 93; to Bristol, 27; to Bordeaux, 963, and the balance to different ports. During the same period the exports of manufactured tobacco reached 202,515 lbs., of which 104,738 lbs. were to Liverpool. The full particulars of the shipments from all the ports were as follows :

small quantity for home consumption. The demand for Germany sprung up on the anticipation of an early peace, which prevailed early in the week; but, with these partially repeated, the close is dull and heavy, princes ranging from 64 to 14c.

Seed Leaf also met with some export demand early in the week but nothing was accomplished, and the close is flat, with sales for the week not exceeding 150 cases in a retail way, mostly State and Connecticut at 16@50c.

Spanish Tobacco has met with a fair demand; sales 200 bales Havana at 85c.@\$1 05, and 50 do. Yara at \$1 07@1 09.

Manufactured Tobacco continues in good request,

The following are the exports of tobacco from New York for the past week:

### BREADSTUFFS.

FRIDAY, P. M. August 19, 1870.

The market for breadstuffs shows a very general decline during the past week and closes more steady. The receipts of flour have been liberal; the flour sold in July for August delivery begins to come forward, and is thrown upon this market to a large extent; but since the news of the victory of the Prussians over the French, which, regarded as presaging an early peace, buyers have insisted upon lower prices, and there is a decline on the week of 50c.@75c. per obl. In fact prices were yesterday nearly down to those ruling before the declaration of war At the reduced prices there is not much improvement in the demand, but the firmness of holders gives a steadier tone to the market. Shipping extras covers pretty wide range owing to their valuable quality and uncertain condition; lines of common sold yesterday at \$5 75, while \$6 10 was refused for another line of prime. At to-day's market a good deal sold yesterday at \$5 75 was rejected, and very little really sound could be had under \$6 00. Southern flour is firm; new wheat has arrived freely and largely declined. Rye flour and corn meal have been drooping.

Wheat has declined to about the current prices previous to the declaration of war. Receipts, especially at Western ports, are largely in excess of last year, and stocks are large. At this decline, there is more speculation-confidence in an early peace in Europe being a good deal disturbed in the past day or two; there has also been more export; inferior to good No. 2 spring sold at

#### GROCERIES.

#### FRIDAY EVENING, August 12, 1870.

The volume of business has been even smaller than last week and with few exceptions the markets are void of any exciting or interesting features. The fluctuations in gold have affected values to some extent, but this is complained of less than the continued small attendance of buyers and the indifferent manner in which they operate—a few unpretending invoices appearing to satisfy the hitherto most liberal purchasers on interior account. The aggregate accumulation of supplies has seldom been larger, and in a general way probably never better assorted, and though current additions are light some holders begin to feel a little anxiety in regard to an outlet for their goods. On the other hand, however, it is asserted that the long period of inactivity must have greatly reduced stocks throughout the entire interior, and that it is advisable to carry goods until the latest possible moment to await the revival of the demand, particularly as everything holding over into next year gets the benefit of the reduced tariff and can be offered so much lower as an inducement to buyers.

Imports this week have included 10,938 bags of Rio coffee, and about 9,551 bags of other sorts; receipts of sugar have been moderate, including 14,712 bags of Manila sugar; receipts of molasses have been fair.

The stocks in New York at date, and imports at the five leading ports since Jan. 1, are as follows :

-	Stocks in New York at date.		Imports at leading port since January 1.

EA.

The general tone of dealers in this market is quite hopeful, the decline in gold having done away with the main objection urged by buyers as a reason for slow movements. Prices remain quite firm, and the changes in currency are very slight, owing to the previous slow response to the upward turn of the gold premium. In lines the sales during the week have been very fair, and a great many job lots are pretty well closed out, at full prices. Invoices have not sold liberally, but quite steadily from day to day, and at very satisfactory rates. Good to prime Greens are still the favorites, though we note pretty quick sales of desirable Japans. The transactions include 4,625 pkgs. Greens, 577 Oolongs, and 1,200 Japans.

Imports this week have included only 86 pkgs by steamer.

The following table shows the comparative shipments of Tea from China and Japan to the United States from June 1, 1869, to June 1, 1870, compared with the previous year, and importations into the United States (not including San Francisco), from January 1 to date, in 1869 to 1870:

		A & JAPAN FOR WO YEARS PAST. 1868-69.	IMPORTS FROM CE INTO THE U.S. 1870.	
Black, lbs Green, lbs Japan, lbs	13.081,057 18,698,318 10,761,245	13,418 37 18,407,607 10,626,794	12,782,938 15,495,684 7,542,874	12,442,040 16,044,050 9,003,005
Total	42,540,620	42,152,738	35,821,496	37,489,095

The indirect importations, including receipts by P. M. Steamers via Aspin<sup>\*</sup> wall, have been 40,265 pkgs since January 1, against 17,961 last year.

#### COFFEE.

There has been less activity in Brazils during the week under, review, and at times the market came to an almost complete stand. Jobbers report the distributive demand as very spasmodic and uncertain, and, having secured fair supplies during the two preceding weeks, are not disposed to take stock unless they can see some indications that it can be resold at an early day; while the large buyers from the interior are still very indifferent, and can seldom be induced to even venture upon a bid. On prices the position is without any de-

cided variation, a firm, uniform tone being retained with very little trouble on the fine and choice grades, as these are scarce and pretty well concentrated, but the common qualities showing considerable irregularity, with the tendency rather downward under a large stock and inclination on the part of some holders to close out on any reasonable offer. West India grades remain in an unusually dull state, even the very best styles being neglected, though this may in a measure be accounted for by the cheapness of Java. The stocks are liberal, but still complained of by the few who give them attention, as containing an undue proportion of undesirable qualities. Java has not shown much activity in a wholesale way, nearly all the leading jobbers holding fair stocks; but with currency values somewhat reduced by the decline in gold, the trade from second hands improved, and quite a number of good-sized parcels were distributed to interior buyers. The sales reported here for the week embrace 13,076 bags Rio, 250 bags Maracaibo, 250 bags Laguayra, 800 bags Ceylon, and 250 bags Costa Rica. At Baltimore the movement has been fair, including some 7,750 bags Rio, part on New York account.

Imports this week have included the following cargoes of Rio: "Musca," 3,736 bags; "Wavelet," 4,502 bags; "Anny Toyen," 2,700 bags. Of other sorts the imports have included 8,453 bags Maracaibo, per "Peder and Niels," "Impulse," and "Ilva"; 405 bags Laguayra, per "A. B. Patterson"; 500 bags St; Domingo, per "Village Belle"; and 193 bags of sundry other kinds.

The stock of Rio, Aug. 11, and the imports since January 1 are as follows:

#### SUGAR.

The market for raws has been very slow and in quite an undecided condition, the absence of business frequently leaving prices entirely nominal. The natural inclination has been downward under the reduction in the gold premium and the withdrawal of all classes of buyers, except in the way of small parcels required for actual and immediate necessities, and nothing like free sales could have been at any time within %c.@%c. of the quoted rates. On the other hand, holders having the stocks in a position where they could easily be carried, and finding current arrivals comparatively small, have persistently resisted the depressing influences, and many withdrew their samples entirely rather than accept reduced rates. There have been a few sales to the trade but only where very choice goods were offered. Refiners, aside from the nclination to hold off for lower prices, have had but little occasion to purchase stock, as their production was gradually receding in value and selling very slowly, particularly to sources of outlet upon which much dependence had been placed. Most advices from the places of growth state that the amount of raw sugars yet to come forward is small, and it is now quite certain that drought and war together will greatly reduce the production of the French beet-root crop. The market closes dull and unsettled, with quotations merely nominal. Sales of 1,996 hhds. Cuba, 1,416 hhds. Porto Rico, 100 hhds. St Croix, 264 hhds. English Island, &c., and 2,986 boxes Havana.

Imports at New York, and stock in first hands, Aug. 11, were as follows:

Cuba, bxs.	Cuba, *hhds.	P. Rico, *hhds.	Other *hhds.	Brazil, bags.	Manila, bags.	Melado hhds.

HAVANA, Aug. 5.-The Weekly Report says: "Sugar. - Claye 1.-The sugar market, especially towards the close, has been more active than during the previous week, buyers for the United States having operated on a larger scale. For the north of Europe and Spain there has been a moderate business done, comparatively. Prices have continued very firm, on the basis of 9%@9% rs. arrobe No. 12 of common train sorts, and 9%@9% rs. for crystalized or Derosne's, the latter value, however, for a very superior article, with which figures the market closes animated and steady.

Fine and dry sorts are becoming very scarce, and in fact the greater part of the stock is composed of low sugara.

The sales which have been reported during the week amount to about 25,000 boxos of all classes against 12.000 last week.

#### MOLASSES.

Immediately following our last, some bids on boiling grades, supposed to be so low that but little attention would be paid them, were suddenly accepted, and a very fair amount of stock changed hands. Subsequently holders offered still easier terms, but the wants of buyers appeared to have become satisfied, and business once more relapsed into a quiet state, except now and then a small irregular call from the trade. Values generally may be called 3@5c. per gallon lower, with a large and well assorted stock freely offered, and scarcely any regular demand prevailing. There has been nothing reported as sold for

#### SPICES.

There is nothing new or particularly interesting in this market. We find that jobbers are doing all the business, and they report the distribution as very fair with full former prices asked and obtained without much difficulty The stocks are not large but fairly assorted, and, with quite a general demand, the impression made upon the accumulation is very uniform. In first hands there is little to offer, and values for invoices are somewhat problematical.

#### FRUITS.

The market has been extremely dull most of the time since our last, but yes. terday and to-day an improvement in the demand was perceptible for most kinds Sardines, under liberal receipts, have softened in price but sell freely at the decline ; yesterday some 2,000 cases quarters having changed hands at 15c. 15%c. gold. Raisins are still held at former prices, and holders are quite confident that they will be able to maintain them, as about all of the last crop has been received, and the new will not begin to come in till about the first of October. Citron is easier, and in little request. Almonds are selling only in small lots, at about former prices.

Foreign Green are in fair demand, and the stock of Lemons has been in. creased by the arrival of two or three cargoes. The trade took them readily at high prices. West India are becoming less plenty, but are slow of sale, on ac count of the abundance and cheapness of domestic. Cocoanuts are firm, with but few Carthagena in market. Pincapples sell at \$50\$8 per C.; Baracoa Cocoanuts at \$40@\$15 per M.; Carthagena at \$62 50 265, and Havana Gingerat 12c. per pound.

Domestic Dried fruits are quiet and without change, a few small lots of new Southern apples, pitted cherries and blackberries have come forward and meet with fair sale, the demand for all kinds is limited and confined to the immediate wants of jobbers, there is a little better inquiry for blackberries which are firm.

The market is pretty well supplied with all kinds of seasonable Domestic Green fruit. Peaches sell more readily than any other kind, at comparatively low prices. During the week, some 200 car-loads have come in, and sold at \$1 @1 50 per basket, and \$1 50@2 25 per crate. Apples sell at \$2@3 50 per bbl. Plums, \$809 per bbl. for Egg and Guages. Water Melons at \$10@25 per C for Jersey and Delaware, and Savannah, \$20@50 per C.

#### THE DRY GOODS TRADE.

#### FRIDAY, P.M., August 12, 1870.

The preparations for the fall trade in dry goods are more active as the season advances, and a general revision of prices has taken place during t'e week. There has been no advance in any kinds as we learn, while the reductions are slight. A tone of confidence mevades all departments of the trade, and there seems no influences at work to prevent a satisfactory trade during the next few months.

DOMESTIC COTTON GOODS are fairly active with some slight changes in prices in both agent's and jobber's hands. The agents report a good call from jobbing houses for all the leading makes of goods and their purchases seem to indicate more than the usual confidence that prices will be maintained, if, in fact, there is not meadvance as soon as trade becomes active. The number of buyers from the interior towns is small as yet, but from the larger cities South and West there is a considerable representation already in town. Their reports from the prospects of the consumptire demand are not wholly unqualified, while some do not look for sactive a trade as holders of goods here have generally expected. But this is thought to be in part for effect, as the crop prospects are favorable for all sections, with the exception of the New Engand States, which are reported suffering from a protracted drouth

Woolen Goods continue to improve in demand but there is no for her advance in prices, as higher prices it is properly thought would restrict trade. There is a better demand for staple goods and the finer grades of coatings for winter consumption, but from the clothing tade there seems no additional activity. The general prospects of the manufacturers of domestic woolens is favorable to amore profitable business, unless this is defeated by higher prices for woo's. Neither manufacturers nor wool-dealers have made any money for the past few years, and with the more favorable prospeets at this time there is some struggle to see which party shall have the lion's share.

FOREIGN GOODS are steady but less active. The lower gold has meffect upon prices, as goods were not advanced to follow the higher premium. Nore goods will be withdrawn from the warehouse and a better stock from which to make selections is expected by jobbers. The trade is rather less active for German silks than was expected, and some disappointment is felt by leading importers. The early prospects of peace causes the belief that the German ports will be open to the export of goods as soon as the wants of

Lawrence A 36 114, do C 36 131, Lyman C 36 13 d) E 36 14, Massachusetts E 3311<sup>1</sup>/<sub>2</sub>, Medford 36 15, Nashua fine 33 12<sup>1</sup>/<sub>2</sub>, do 36 13<sup>1</sup>/<sub>2</sub>, do E 40 154, Newmarket A 111, Pacific extra 36 181, do H 36 141. Pepperell 7-4 30, do 8-4 35, do 9-4 40, do 10-4 45, do 11-4 50, Pepperell E fine 39 131, do R 36 121, Pocasset F 30 83, Saranac fine O 33 12, do R 36 13, Stark A 36 181, Swift River 36 11, Tiger 27.81.

BLEACHED SHEETINGS AND SHIRTINGS are firm and going actively into consumption. We hear of no change in prices. Wamsuttas are held at 21<sup>1</sup>/<sub>2</sub> cents and New York Mills at 22<sup>1</sup>/<sub>2</sub>, not 22, as we stated last week. Amoskeag 46 19, do 42 17<sup>1</sup>/<sub>2</sub>, do A 36 15<sup>1</sup>/<sub>2</sub>, American A 36 12<sup>1</sup>/<sub>2</sub>, Androscoggin L 36 16 Arkwright WT 36 171, Ballou & Son 36 131, Bartletts 36 15, do 33 14, Bates XX 36 17, Blackstone 36 144, Boott B 36 15, do O 30 114, do R 28 9, Clarks 36 19, Dwight 40 18, Ellerton 10-4 391-45,, Forestdale 36 151, Fruit of the Loom 36 17, Globe 27 8, Gold Medal 36, 14, Great Falls Q 36, 161. Hill's Semp. Idem 36 16, Hope 36 14, James 36 15, Lawrence B 36 131 Lonsdale 36 17, Masonville 36 17, Newmarket C 36 131, New York Mills 36 22 Pepperell 6-4 20, do 10-4 50, Tuscarora 36 20, Utica 5 4 27 1, do 6 4 ?2 1, do 9 4 51 1, do 10 4 56 1, Waltham X 33 1112, do 42 18, do 6-4 2712, do 8-4 35, do 9-4 40, do 10-4 45. Wamsutta 36 211

PRINTS show a relatively larger business than is reported in other goods, with increasing firmness in prices, as the water is low at many of the mills, and prod ction is curtailed to some extent. There are a few changes in the prices. American 111, Albion solid 11, Albion ruby 111, Allens 11, do pinks 12, purples 111, Arnolds 9, Atlantic 61, Dunnell's 11<sup>1</sup>/<sub>2</sub>, Hamilton 11<sup>1</sup>/<sub>2</sub>, Hope 7, Lancaster 11, London mourning 10, Mallory 11, Manchester 11<sup>1</sup>/<sub>4</sub>, Merrimac D 11<sup>1</sup>/<sub>2</sub>, do pink and purple  $13\frac{1}{2}$ , do W 121, Oriental 111, Pacific 111, Richmond's 111, Simpson Mourn'g 101, Sprague's pink 12, do blue and White 11, do shirtings 101, Wamsutta 7@71.

PRINT CLOTHS are quiet here, but in the eastern markets there is more activity, and prices are firm at 7c. for 64x64 clath, with the stock at Fall River nearly exhausted from the stoppage of mills, owing to the strike of operatives.

OTHER COTTON GOODS are of more movement, and a more definite position for all kinds is reported. The movement to jobper's hauds is less important than in brown and bleached cottons, but this is usually the case at all times. Our quotations are revised throughout.

### Financial. A CHOICE SECURITY. MIDLAND Bonds. Seven Per Cent Gold, free of Govern-ment Tax.

221

The great railroad on which these securities are based is making good progress. Of the 400 miles embraced in its entire length from the metropolis to the City of Oswego, including the Auburn branch, 150 miles are already completed, fully equipped and in profitable operation. Work is being vigorously pushed on other portions of the line; and it is the expectation of the Company to have at least 100 miles more in operation before the close of the present season.

The portion of this road now in operation, constituting its northern section, extends from the city of Oswego to Sidney Plains, where it intersects the Albany and Susquehaua Railroad. Its local business is already large, and the Company has just concluded a contract with the Delaware and Hudson Canal Co., for transporting the coal of that large and wealthy corporation to the northern sections of the State. This will add so largely to the business and profits of that section of the road that the Company feel confident that its net earnings, without the aid of through business, cannot be less than 7 per cent on its entire cost, which is 100 per cent in excess of the interest on its bonds, For it must be borne in mind that the issue of these bonds is strictly limited to \$20,000 per mile of finished road. They thus possess all the security of the bonds of our oldest and best roads. The road, when completed, will constitute one of the great trunk lines connecting the City of New-York with Canada and the West by shorter routes than any now existing ; and, as its entire course is through fertile and populous districts, it cannot fail to prove one of the most important and best-paying roads in the Union.

BEH ND THESE BONDS IS A PAID-UP CAPI-TAL OF NEARLY \$7,000,000, which affords ample guarancy of the financial strength of the Company.

The popularity of these bonds, as a perfectly safe security, bearing the highest rate of interest authorized by the laws of New, York, payable in Gold Com, free of Government tax, has kept the supply nearly exhausted; but the recent and early future completion of ad itional sections will for a time furnish a liberal supply, to which we respectfully invite the attention" of investors, in the confident belief that no better security can be found on the market.

Price par and accrued interest in currency Governments and other current securities taken in exchange.

# GEORGE OPDYKE & CO., BANKERS, 25 NASSAU ST. THE Central Railroad of Iowa 235 MILES IN LENGTH, IS NOW NEARLY completed. This company are now pushing their work for ward with great rapidity, and the entire line necessary to connect st. Louis and St. Paul is graded and under contract to be finished this season. The road runs through the richest and most thickly settled portion of Iowa, and is built in the interests of the great Northern system of roads which center at St. Paul. The FIRST MORTGAGE BONDS

of the Company pay

7 PER CENT GOLD INTEREST.

and other first-class securities.

The negotiation, in this country and Europe, of Railroad and other Corporate Loans, receives special attention. We make collections of Notes, Drafts, Coupons and Dividends with promptness on all points, and are fully prepared to offer Banking facilities upon either currency or gold basis.

CLEWS, HABICHT & CO.,

5 Lothbury, London.

LOST-OR STOLEN-TWO BONDS, \$1,000 each, Brocklyn City Six Per Cent, Atlantic ave, improvement Bonds, cos. 132 and 133, Principal payable December 3, 1872.

All persons are cautioned against purchasing or ne-gotiating the same-13 Willoughby st., Brooklyn, July 20th, 1870.

J. T. BRUSH, JOHN C. SMITH, H. N. BRUSH, Executors, &c., of Conklin Brush, deceased.

free of Government tax, and are issued for the very small amount of \$16,000 per mile. For the present the unsold portion is offered at 95 and accrued interest. The attention of investors is invited to the fact that the road is now nearly finished, and that the Security is therefore entitled to a high rank. We believe there will be no more tavorable time to sell Govern-ments and buy really first-class Railroad Securities-such as these—than the present. After a full examin-ation we have accepted an agency for the sale of the above first Moitgage Bonds, and desire to recom-mend them to our customers as a thoroughly safe as well as profitable investment.

JAY COOKE & CO., No. 20 Wall street, New York.

Edward C. Anderson, Jr. BANKER, FACTOR AND Merchant, Commission Savannah, Ga.

Special attention given to consignments of Cotton. Gold, Stocks, Bonds and Foreign and Domestic Exchange, bought and sold. Collections promptly remitted for Orders solicited for the purchase of sales of Produce and Securities. Prompt attention guaranteed. New York Correspondents: LAWBENCE BEOS. & C

### 224

### THE CHRONICLE.

### [August 13, 1870.

For Sale by

SWENSON, PERKINS & CO., AGENTS,

P. O. Box 5,724.

These Ties have been used more extensively than any others, and last year or more than one-half of all the cotton baled in the United States, and received the premium at several State fairs.

VIBBARD, FOOTE & CO., AND

CHARLES G. JOHNSEN,

PROPRIETORS AND MANUFACTURERS OF

COTTON TIES,

ENGLAND, NEW YORK AND NEW ORLEANS SELF-FASTENING BUCKLE TIE.

This is for the planter, the compress and the ship; the best and most convenient Tie manufactured. It is recommended by all of the dealers in New Orleans after a thorough investigation as to the merits of the various ties in use. They are made of the best quality of English iron, nicely painted, put up in bundles of uniform weight and are sold under a guaranty to give entire satisfaction.
