THE COMMERCIAL AND FINANCIAL CHRONICLE is issued on Saturday morning, with the latest news up to midnight of Friday.

The Publishers cannot be responsible for Cemittances unless made by Drafts or Post-Office Money Ordera. The A neat file for holding current numbers of the CHRONICLE is sold at the office for 50 cents. Volumes bound for subscribers at \$1 25. The first and accoud volumes of the CHRONICLE are wanted by the publishera.

## OBJECTIONS TO MR. BOUTWELL'S PROGRAMME.

The l'reasury programme for this month has given considerable dissatisfaction. It contemplates the sale of 10 millions of gold and the purchase of 10 millions of bonds. But as the price of bonds is likely to range above the price of gold, the anticipation is that a much smaller amount of bonds will be purchased than is proposed, and that consequently the excess of gold sales will cause a large drain of greenbacks from the banks into the Sub-Treasury. If this anticipation be realized, the money market in its present unstable condition could scarcely fail to respond, and the ease which has been fexpected and desired would be slow to return.

Mr. Boutwell seems to have been actuated in making his arrangements by the belief which was for some days current here that we were likely to have a large export demand for coin, because of the rumored intention of the Bauk of England to increase its rate of discount. For the reasons we gave last week, however, it is doubted whether that institution is in a position to make such an advance, or to sustain it if made. Accordingly, the appreheusion from this source has subsided in Wall street, and Mr. Boutwell's pro gramme founded upon it is out of favor.

Still there are a considerable number of persons who argue that we shall have an active outflow of specie this aummer to meet the Government interest, and the trade balance

accounts. They found this opinion on the allegation that there is but little cotton to go forward, and that the export trade in other products promises to be moderate, while our specie remittances to Europe during the last nine montha have been comparatively small, and the foreign balances must have been running heavily against us. These the Bureau of Statistics reports at 42 millions for the first six months of the fiscal year; and the aggregate interest on our stocks and bonds held abroad must have greatly increased the aggregate. Moreover, the Treasury has paid to European holders of five-twenties, 94 millions of gold, against 75 millions collected from the London Syndicate for the sale of the new 5 per cent. bonds. There are also in the hands of foreign holders the further amount of 20 millions of called bonds of 1862, on which the interest ceased in December and March. These will soon be presented for redemption in coin.

The question how all these combined claims are to be met is variously discussed. And one of the results was the advance of gold yesterday to 113<sup>§</sup>. The weakness of foreign exchange seems to indicate, however, that this advance was in part due to speculative manipulations. And for the present the appearance of any considerable gold export seema to be passing away.

Another error of policy which is charged against Mr. Boutwell is the calling in of \$1,300,000 of Clearing House Certificates. The time for this call is certainly unpropitious. The banks are short of reserves; and these certificates are relied on to form a part of it; being, as they are, equivalent to greenbacks. The notice of this withdrawal, therefore, is interpreted as a measure of contraction, and is analogous to the withdrawal of so much legal tender currency. Still, it Is not to take effect till 30th June, when the reflux of greenbacks from the country will be at its height, and when the withdrawal will, consequently, be the less perceptible. Why the notice, contrary to custom, has been given so early, and why this precise moment has been chosen for the announcement, when the loan market is excited, and the clique of tight-money men and their manœuvres are still regarded with fear, we are not told. A month hence the announcement would have been equally timely and less mischievous.

A third charge against Mr. Boutwell is the increase in his currency balance, which is reported May 1 at \$14,375,-199, against \$10,431,299 last month. If he carries out his programme this month his balance, it is said, will accumulate to the amount of twenty millions at least. The condition of this carrency balance will be watched from day to day with no small anxiety. To prevent its undue increase two remedies are proposed. One is for the Secretary to eall 50 millions more of bonds of 1862, held in this country; but this method would be too slow in its operation, as thirty days notice is required by law. The other is to alter his programme for the sale of gold for this month, so that no more gold shall be sold than will cover the purchase of bonds. Hence if as happened this week, but \$700,000 of bonds can be had at the price limited, the sale of gold also would be limited to that sum.

Probably the latter of these alternatives is that, which Mr. Boutwell will choose, if it should be needful to make any new arrangements. 'But in view of the heavy coin disbursements for interest and on many other accounts, it might have been much to be preferred, and would have prevented all embarrassment, if the Treasury sales of gold had been limited to five millions instead of ten for the month.

# THE ALABAMA CLAIMS DIFFICULTY SETTLED.

The conflicting views of Great Britain and the United States as to the indirect claims under the Alabama treaty may be almost regarded as satisfactorily adjusted. THE CHRONICLE, a fortnight ago, proposed a method which till then had not been publicly mentioned, or discussed by the press, for harmonizing the views of the two governments in regard to this adjustment. Our plan was founded on the belief that the sole objection of England to allow these elaims to be presented for arbitration before the Geneva tribunal was because she was determined to pay no money on account of them. We proposed to remove this object tion by two stipulations; first that this country shall waive all demand for pecuniary damages arising out of these indirect causes; and secondly that these claims shall be discussed solely with a view to a better settlement of the prineiples of international law, and of the rights of belligerents and neutrals. This proposition has been discussed by both Governments, and has proved as we expected mutually acceptable. The statements of the London Times a day or two ago prove this, so far as the British Government is concerned. And as to our own Government there have been several authentic announcements during the past ten days of similar purport. The most recent of these appeared in a Washington dispatch on Thursday which gives a semiofficial review of the policy of the Administration in regard to the treaty. This dispatch has several points of importance. First it states that before and during the negotiation of the treaty the claims for indirect damages were prominently before the public mind, and required to be presented to the Geneva Convention to prevent their being hereafter brought up to disturb the harmony of the two nations. Consequently the President adheres to his original intention to have these claims presented before that august tribunal. "He has not withdrawn any part of the case. He does not contemplate any such withdrawal. He has made no proposal for any such withdrawal. In the correspondence which has taken place with the British Government on the subject. the Secretary of State has most strenuously insisted on the propriety and the right of this Government to present its own case in its own way, without dictation or suggestion from the opposite party. He insists that the indirect claims are properly included in the submission to the Geneva tribunal."

The next point is as to the object and purpose of this presentation of the indirect claims, which has been misrepreaented and misunderstood." No money damages are asked tor or can be awarded on account of them. These indirect claims were included in the American "case," not as were the claims for property destroyed, accompanied with a de. mand for payment; but as a part of the case which the United States had the right to lay before the tribunal for its equitable consideration. They are consequently not accompanied is approaching when in the world's

with any money-demand. No pecuniary award is or will be asked for. The claims are not susceptible of such an award, and the American Government has always held them to be "of a different nature, and perhaps of more questionable legal advisability than those which are called direct claims."

Real of the Assort

Such appears from the dispatch to be the general tenor of the views of our Cabinet, and there is little reason to doubt that it substantially represents the correspondence between the two Governments, or that it offers a basis on which the whole difficulty may be and perhaps has been set at rest. Soon a number of questions will arise as to what changes are needful to be agreed upon as to the rights and obligations of neutrals and belligerents, and as to proposed reforms of international law. These abstract questions can offer little ground for dispute or ill-feeling; and will, no doubt, be discussed in an enlightened, conciliatory spirit on both sides of the Atlantic.

Obviously, indeed, they involve a very broad, comprehensive inquiry, and at present no more than one or two of the preliminary points have been raised. Others will suggest themselves as the controversy advances. Our Government has wisely determined to begin by selecting the most practicable reforms of international law, and has made them indispensable as a basis for the coming negotiations. The despatch to which we have referred, shows how far the discussion as to this matter has advanced :

"Great Britain, by her acts during the war, has put herself in a position to have the question tried upon her, and the United States does not think it wise to abandon the question without either a decision or an agreement and stipulation which will re lieve the United States in the future, and before incurring the possible liability which now rests upon Great Britain, from the presentation of like complaints in case of any omission on their part to observe their neutral obligations in the event of Great Britain being belligerent while they are neutral. Should Great Britain propose to atipulate that, in the event last contemplated. she will make no complaints or claims against the United States for any indirect, remote or consequential injuries or losses resulting from a failure to observe their neutral duties, the United States, by accepting the suggestion, would gain an important concession.

"In consideration thereof, the United States might very well agree to say that they will refrain from pressing for pecuniary compensation for the indirect claims before the Geneva tribunal, leaving the tribunal to make such expression of opinion as it may think proper on that question. The apprehension of Great Britain of an award in moneyed damages on account of these claims would thus be relieved, and the United States would disclaim asking for any moneyed award which they have not asked from the tribunal, and which their people do not expect or desire. If by such agreement the two nations could be brought into accord on the subject of submission the arbitration could proceed."

The arrangement, then, as it stands at present between the two Governments is, that as England is not to be asked by us for pecuniary damages on account of our indirect claims, so in any future wars that she may be engaged in, she shall ask for no indirect and consequential damages from us in any similar contingencies.

The principle here established is so equitable and so reasonable as to commend itself to the common sense of every man. It has also a more extensive scope than at first sight appears. But we repeat that our people will not be satisfied if this reform be all that is to be attempted in the principles of international law as applied to the duties of neutrals and belligerents. Something more beneficent, pacificatory and comprehensive is looked for. Prior to our civil war this country had always been as she will probably be hereafter, prominent in the advocacy of such reforms They are, moreover, in harmony with the progressive spirit of the age. It would seem that the time disputes and

international conflicts the dread appeal to war shall be more rare; because it is too destructive, sanguinary, costly, and ruinous to be frequently indulged. The trlbunals created in the Alabama treaty have functions far transcending in scope and importance the valuation and arithmetical edjustment of.20 or 25 millions of losses between two growing commercial high spirited nations, both of whom are too rich to eare much about such details, and too closely linked in commerce and trade to want to go to war. The higher work these tribunals have to do is to devise and establish some method of arbitrament which, making future wars between the two high contracting parties all but impossible, shall set a beneficent example before the civilized nations of two hemispheres, and exert an effectual moral influence in favor of peace throughout Christendom.

## THE EQUITABLE TRUST COMPANY, THE PUBLIC AND THE LEGISLATURE.

"A burnt child dreads the fire" says a trite old adage. We presume it is on this principle that ever since the failure of the Ohio Loan and Trust Company in 1857, and the terrific panic which it eaused here and all over the country, Trust Companies and similar banking institutions have been looked on with some suspicion and distrust; and new charters for these corporations were almost invariably refused at Albany. Of late there has been less of this wholesome dread among our legislators; and a multitude of corporations have been created calling themselves Trust Companies or by some analogous name; and exercising banking powers without the publicity, supervision and other guarantees for sound management which the law provides for other iestitutions that lend and borrow money. The rapid growth of such corporations offers one of the numerous illustrations of that prevailing expansion of credits which forms one of the most formidable features of the financial situation. Public opinion demands that all such money corporations should be placed under the most rigid supervision, just as are our National Banks. Their stockholders should be made individually responsible, their directors and officers should be compelled by law to make good their engagements both to the public and the stockholders, and the capital of the companies should be held as a guarantee by the deposit of National or State securities with the proper officials at Albany. No Trust Company or banking institution, under any pretence whatever, should be permitted to do business in this metropolis without such guarantees. Had they been adopted in the case of the Ohio Life and Trust Company the disasters which overwhelmed thousands and tens of thousands of our people when that rotten institution exploded would either have been prevented altogether or would have spent their force within a very narrow area. With an immense papermoney system-with no solid rock of specie payments underlying the vast fabric of our financial machinery it is certain that every irresponsible corporation which is permitted to open its doors here and to organize for the lending and borrowing of money helps to heap up the combustible elements which in some monetary crisis may burst forth in an irrepressible explosion, and sweep the whole country with the fiery scourge of financial desolation.

We are gratified to see that multitudes of applications for such charters at Albany have met with less success than usual. But they are still clamorous; and as the Legislature has still a month to sit, their ambitious promoters are sanguine and hopeful. Let it be understood that the general law we have indicated shall be passed this session, and not one of these schemes will survive except those, if any there be, Trust Company. They are encouraged to hope that they

which the public really wants, and which possess within themselves the requisite elements of vitality, permanence and solid capital.

Against such sound lending institutions as these, conducted by men of experience, there is no valid objection. We are at present unwilling to exclude from this class two or three of the new schemes which have recently been launched here. Still too little is known as yet of their real basis and of the guarantees they offer to the public. Perhaps the most conspicuous of the number is the Equitable Trust Company, whose prospectus recently sent to us announces to have opened its books of subscription at the Bank of Commerce with a very respectable board of trustees. They ask for one million of capital, on which they promise to subscribers the handsome dividend of 15 per cent. the first ycar. How these large profits are to be safely carned is thus explained : First, the company will have little to pay for taxes. It is organized under the laws of Connecticut, and that State limits its taxes to one per cent, on the stock of non-resident stockholders, while the stock is not taxable in any other State. Secondly, this lightly-taxed corporation proposes to lend its money at high rates on first mortgages at the West, and to sell such mortgages at lower rates herc. After paying expenses, it expects to make a net profit of 2 per cent. on all the business done. This business it proposes shall for the coming year consist of three items: 1. The company will lend their own capital of \$1,000,000 at 9 per cent.; 2, they will sell \$2,000,000 of the mortgage bonds in which it is their specialty to deal; 3, they will "guarantee" onc-half of these bonds, principal and interest, for an average charge of  $\frac{1}{2}$  per cent. a year. On these three departments of business the profits of the first year are set down as follows:

#### PROFITS OF THE FIRST YEAR.

Capital atock, \$1,000,000, invested at 9 per cent. interest... .. \$90.000 40,000

Capital atock, \$1,000,000, invested at 9 per cent. interest. \$2,000,000 of securities sold with average profit on sale, after deduct-ing office and other expenses, 2 per cent. Say that one-half of securities sold will have prompt payment of in-terest and eventnal payment of principal gnaranteed by the com-pany, at an average charge of half of ona per cent. per annum, aver-age of securities run four years, and whole average guarantee charge 2 per cent. on \$1,000,000. 20.000

In other words the capital of this concern is to be \$1,000,-000, its deposits \$2,000,000, its loans \$3,000,000 and its cash reserves nil. The first point, therefore, on which the public demand information is as to this question of reserves. Without auch reserves, how does the Equitable Trust Company expect to keep its engagements ? How will it be able to keep its place among the solid solvent corporations of this city ? We do not now undertake to affirm positively that its solvency cannot be maintained; but in the interests of the public, and with a view to the general stability of our financial system, we have a right to ask how this financial feat is to be accomplished. Here is a company which, besides other engagements to twice the amount of its capital, guarantees \$1,000,000 of new bonds every year, with the accruing interest; and promises prompt payment thereof in New York, whether its western debtors pay up or not. And yet it has no cash reserve to fall back upon in case of failure. When some inevitable financial crisis comes, either here or in the West, would the Equitable Company foreclose its mortgages? And even in ordinary easy times would not such foreclosure be too tardy a process for safety in the absence of all reserve? The Company must give early information to the public as to its intentions and plans.

Secondly, there is the question as to the ordinary guarantees of lending institutious. One of these is the liability of atockholders. The prospectus boldly announces that there is no such liability incurred by stockholders in the Equitable can gain 15 per cent by borrowing money at low rates and lending it at high rates, and yet incur no personal liability. If as we suppose the charter of the corporation professes to grant such an exemption, as is often done in such charters, the Connecticut legislature have no right to enforce the exemption here; and the anomaly should be met by some adequate provision in the general law which we have recommended. This law should declare that all stockholders in Trust Companies and lending institutions, organized or owned or doing business in this State, should be made personally liable to an amount equal to the par value of their stock, just as is the case with the national banks.

The prospectus before us closes with the assurance that the investments of the company will be safe, because they are to be based exclusively on first mortgage of real estate, and because several well-known business men are stockholders and trustees for the management of its funds. These are good reasons, if care be taken as to the locality and valuation of the real estate, and if the gentlemen mentioned could really be held responsible at law, and could be relied on for the permanent retention of their places at the head of the concern. But it is notorious that prominent men in these days are too ready to lend their names to enterprises of which they know little, and from whose management they soon retire in disgust. The public have had too much recent experience of this sort in regard to the bankrupt insurance companies. To meet the difficulty the amount of stock actually subscribed and paid for hy the highly-respectable men who are advertised as tru-tees might, if announced, have been of no s nall servic .

The company will do well to be more frank and communicative on all these points, as well as on some others, if it wishes to gain popular confidence and to silence popular distrust. And meanwhile let the Legislature at Albany give us without delay a good, comprehensive, general law for the regulation of all our trust companies and other corporations exercising banking functions and wielding the important power of borrowing and lending money.

### FINANCIAL REVIEW OF THE MONTH OF APRIL.

The month opened with one of the closest money markets ever experienced in this city, and rates paid by stock brokers sometimes ranged as high as  $\frac{1}{2}$  of 1 per cent a day, in addition to the legal interest of 7 per cent per annum. The banks, as in the previous month, were extremely poor in their legal tender reserves and held at the first of the month about \$5,000,000 in excess of the 25 per cent legal requirement, and this excess was subsequently reduced to the insignificant sum of \$892,675, as appeared by their statement of the 13th of the month.

This low condition of the bank reserves was taken advantage of by parties operating for a decline in stocks, to withdraw from business channels about five millions of greenbacks, and by this means to reduce the supply of loanable funds to such an extent as to embarrass most seriously all those who were carrying stocks.

The funds so withdrawn were returned about the middle of the month and the market was subsequently much easier, though naturally attended with irregularity in rates for two weeks afterward.

The interferences with legitimate financial business in every department, from this "lock-up" of legal tenders, was so great as to cause more than the usual indignation against the parties engaged in it. The Clearing House Association held an excited meeting, at which a motion was made to expel the Tenth National Bank for supposed complicity in the locking up movement, as the bank was credited on Friday, April 5, in the sum of \$4,-700,000 for the account of one of its customers, known to be in the conspiracy. The motion failed, however, and the following resolution was adopted as a substitute:

Re-olved. That the Clearing House Committee be, and is bereby directed, whenever it appears in its judgment that legst tender notes have been withdrawn from use through the agency of any bank, member of this Association, o make an immediate examination of the hank in question, and should here appear to be any complicity on the part of the bank'or its officers, to snspend each hank from the Clearing House nutil action of the Associaion shall be taken thereon. It is strongly urged by some that a repeal of the Usury law would prove an effectual remedy against a lock-up of legal tenders, by bringing a large amount of money into use, at high rates, which cannot now be used better than 7 per cent. It is not clear, however, that this would prove a remedy, although the repeal of the law is quite generally advocated by business men, on other substantial grounds.

Government securities were depressed for a time by the extreme ettingency in money, but advanced rapidly as soon as the loan market became easier. The demand for bonds appeared to be well distributed, and the floating supply in this market is not large, so that with the exception of one or two issues, it is difficult to purchase round lots of any large amount.

The stock market was feverish and depressed during the early part of the month by the excessive stringency in the money mar ket. When the exorbitant rates were continued much longer than had been expected, many of those who had been carrying stocks tenaciously for some time, became discouraged, and sold out, and under this influence, and with no immediate prospect of easier money, the market declined, and touched about the lowest point on many stocks on the 11th, when New York Central sold at 96<sup>2</sup>/<sub>8</sub>, Lake Shore 94<sup>1</sup>/<sub>8</sub>, Wabash 77<sup>1</sup>/<sub>8</sub>, Northwest 78<sup>2</sup>/<sub>8</sub>, Rock Island 110<sup>1</sup>/<sub>2</sub>, St. Paul 59<sup>1</sup>/<sub>4</sub>, Ohio and Mississippi 46<sup>4</sup>/<sub>8</sub>, Union Pacific 37, Western Union 71<sup>1</sup>/<sub>9</sub>, and Pacific Mail 61<sup>2</sup>/<sub>8</sub>. Erie was lowest on the 9th at 61<sup>1</sup>/<sub>8</sub>, as it transpired that the two parties in London had come together, thus preventing any prospect of a contest for control at the next election.

But subsequent to the relaxation in monsy, stocks became more buoyant and generally recovered, in whole or in part, from the previous decline; some specialties also advanced to higher prices than had been made before.

The following table will show the opening, highest, lowest and closing prices of railway and miscellaneous stocks during the months of March and April, 1872:

The gold market was without features of special interest during the early part of the month, and the high rates for money tended to prevent any buoyancy in the price, as gold was too heavy for carrying. Immediately siter the relaxation in money, however, the gold market took an upward turn, and advanced to 1134 on the 26th of the month.

This upward movement, though resulting immediately from the operations of a party favoring an advance in gold, was supported by the idea that there will probably be a very considerable demand for coin to export during the next few months, to make up our balance of trade with foreign countries. To this influence was also added the circumstance that the Secretary of the Treasury cannot make large disbursements of coin by selling it, without disturbing the money market, unless bonds are purchased to balance the gold sales, and the price of bonds was relatively so high in the latter part of the month as to encourage the expectation that very few bonds would be bonght at the equivalent of par in gold for some time to come.

Foreign exchange was quite duil during all the early part of the month, but subsequently became strong and advanced to specie shipping point. The advance from 3 to 4 per cent. In the Bank of England rate of discount had some effect in stiffening the rates for short sight bills, but the principal cause for the higher rates was apparently found in the general feeling that exchange would now rule near specie shipping point, unless there should be a large export of United States and other securities.

## CURRENT TOPICS.

HOW THE BANK OF FRANCE GETS GOLD .- An intelligent corespondent referring to the article on " the Price of Gold and the Bank of England rate of Discount," quotes our observation that the Bank of France must have some better method than the Bank of Eogland to roplenish its gold reserves, and that it may so some simple but effective method, such as the buying of gold rom foreign markets." In confirmation of this remark he oberves that Mr. R. H. Patterson, from whom we quoted, the author of the "Science of Finance," and a high authority in England, gives substantially the same explanation in his work The Economy of Capital." On page 242, In Blackwood's Lonion elition, published in 1865, Mr. Patterson says : "It is worthy f notice that in times of crises the Bank of France adopts a difcrent system from that pursued by the Bank of England. The Bank of England seeks to obtain gold by raising its rate of disount, whereby our whole industry is checked and employment s restricted. The Bank of France, on the other hand, avoids aising its rate to a similar extent-it refuses to check industry, nd subject the community to such a strain ; nevertheiess, it obains gold by a process quite as efficient as that adopted by the Bank of England. When the drain upon it is great, it purchases commercial bills upon other countries, as a trader might do, forwards them to be cashed-at London, Vienna, Hamburg-and gets the specie; or it contracts with some great capitalists to do this for it. The difference between the two methods is that in supplying itself with specie, the one bank gets high rate of discount, and the other gives them. The Bank of England in times of crisis makes a profit at the expense and to the detriment of the community in order to fortify its position and fulfill its engagements. \* \* \* The Bank of France assumes that those who profit by banking and by the issue of notes, should bear the exponses incidental to banking. \* \* \* The Bank of England holds the opposite doctrine ; it takes no steps to obtain specie, but simply deters its customers (at what cost to the community we have shown) from asking for gold or for notes either. Referring to the same statistics which you quote, showing the comparative fluctuations of coin and bullion, and the rate of interest in the two banks during the panic of 1866, Mr. Patterson remarks, in his "Science of Finance," on page 695, London Edi tion, published in 1868, as foliows : " The logic of these facts is unanswerable. Here are two great banks, within twelve hours distance of one another-one of which holds 21 millions of specie and lends its currency to the public at 31 per cent., while the other has less than 13 millions of specie, and charges 7 per cent. According to the theories which have so long been held sacred, such a condition of things ought to have been impossible. Only a few months before, Baron Rothschild had declared to the French Government inquiry, that if the Bank of France were at any time to lend its money at 2 or 3 per cent. below the banks of other countries, it would forthwith be drained of its last sover. eign. In spite of this dogmatic theorising, at the beginning of May, 1866, we beheld the Bank of France charging only hall as much for its loans as the Bank of England, yet no drain at all set in from the former bank to the latter. Although within a few hours distance, the specie remained unmaved at Paris, while on this side of the channel the public was forced by the bank to pay 7 per cent, instead of the 34 in France, "According to the so-called established theory, such a position of affairs was an Impossibility, but here it was. Moreover, what happened when the terrible crisis begau ? Instead of disappearing, when the bank screw was still further put on, the difference between the two neighboring banks only grew greater and greater. "While the Bank of England charged 10 per cent. for three months, with no result in increasing its stock of goid, the specie In the Bank of France shot up from 21 to 281 millions sterling, while its rate of discount was only from 34 to 4 per cent. In fact, as is well known, so totaily inefficacious was the raising

585

of the bank rate, that specie actually flowed from England to France, although the rate was 300 per cent, higher in the former country than in the latter." Without quoting further, I will remark that the root of the trouble is in the law, which grants a monopoly to the Bank of issuing bills within 65 miles of London, then forbids the directors to use their discretion in issuing currency as formerly, and establishes an automatic arrangement to expand its issuing power when not needed, and contract it as soon as the general coufidence in the ordinary means of exchange has vanished.

POSTAL TELEGRAPHY AGAIN .-- The new postal telegraph bill introduced to the notice of Congress by Mr. Ramsey is, we think, devised in the hope of popularizing a scheme which has never found any favor with those who have given the subject careful and intelligent consideration. In this bill the hook set to catch the popular fancy is covered with the tempting baits of low rates upon messages, the extension of the telegraph system to include many points not now provided with telegraphic facilities, &c. To secure these advantages a private company, acting as the agent and representative of the Government is to be given a monopoly of the business of telegraphing within the limits of the United States. This company is to shape its policy of management, appoint its clerks, operatives and assistants as the Government shall direct-in other words, it is to be a political machine, through the agency of which the Government will have the disposition of a vast amount of political patronage. Such a scheme is wholly objectionable. Indeed, we do not see how anything could be said in its favor, for according to our view it would injure the efficiency of our telegraphic system and deprive the business community of all assurance of promptness and accuracy in the transmission of messages. Cheap telegraphy is, doubtless, desirable, and all proper efforts to secure it will receive the hearty co-operation and approval of all classes of the community; but accuracy and promptness is vastly more important than cheap. ness, and a government pure and free from political intrigue is more important than either; hence we think that a large majority of the people are and always will be opposed to the passage of the measure in question or any similar measure.

#### THE DEBT STATEMENT FOR MAY, 1872.

The following is the official statement of the public debt. as appears from the books and Treasurer's returns at the close of business on the last day of April, 1872:

#### [From our own correspondent.]

#### LONDON, Saturday, April 20.

The bank return published this week is more satisfactory, and has produced an easier tone in the money market. A marked improvement was naturally expected, as a large amount of busi ness had been crowded into the previous return, and consequently the effect of that pressure is now seen, much of the discount work of the present week having been anticipated. The anpply of money seeking employment has considerably increased, and In the open market the rates of discount are generally lower. Money is now obtainable at 32 per cent, and a feature of some importance is that six months' bank bills are decidedly cheaper. The following are the present quotations:

Per cent.	Per cept.
Bank rate 4	4 months' bank bills 4 @
Open-market rates:	6 months' bank bills 4 @
80 and 60 days' bills 3%@ ]	4 and 6 months' trade bills. 4 @1%
3 months' bills	

The rates of loterest allowed by the joint stock banks and discount houses for deposits are as follows :

Per cent. Joint stock banks. Disconnt houses at call Disconnt houses with 7 days' notice. Disconnt houses with 11 days' notice. 35

The following are the quotations for money at the leading

Commental cities.

The advance in the rates for discount has had the effect of Improving the exchanges. Sovereigns continue to be sent to Sonth America on account of the recent loans, but for bar gold for export to the continent there is no inquiry. Silver is lower, the Indian demand having entirely coased. Old Mexican dollars are very firm, but for new dollars there is very little inquiry. The follow ing prices of bullion are from Messrs. Pixley, Abell, Langley & P. lake's circular:

• Price April 11.

Messrs. J. P. Morgan & Co., have issued the prospectus of the Unlted States Mortgage Company, with a capital of \$1,000,000. The bonds of the company are to bear interest at the rate of six per cent per annum, and the price of issue is 951 per £100. This is the second issue of capital, the first having been privately subscribed in New York, principally by the parties who have been the means of making the Credit Foncler Companies of France and Austria successful. The bonds, it is stated, are secured by real estate, advances on which, on the part of the company, are limited to half their value. The directors of the company in Europe are Mr. Fremy, Governor of the Credit Foncier of France; Count Germiny, Regent of the Bank of France; M. Mallet, of Mallet, Freres & Co.; Baron de Haber, Director of the Credit Foncier of Austria; the Chevalier von Hopfen, President of the Austrian Reichsrath ; Mr. A. de Laski, and others.

Messrs. Bischoffsheim and Goldschmidt have announced the issue of the balance of £340,000 seven per cent rental bonds of the Atlantic and Great Western Railway Company. The total amount of these bonds is now £1,100,000. They are issued in sums of £200 each, at the price of 88 per cent.

The prospectus of the Atlantic and Great Western Telegraph Company continues to be advertised, so that it may be inferred that the subscription list has not yet been filled. An effort has been made to drive this company out of the field ; but the directors seem determined to carry the scheme through.

We have had a week of very dry weather, and of cold northerly and easterly winds. Last night there was a sharp frost, but the days are brilliant, and, although the wind is cold, the sun shows lts power, and the effect of the wind is greatly mitigated. The contrast, however, between the day and night temperature is very great. The wheat plant looks remarkably strong and vigorous. The late dry weather has, in fact, had an excellent effect, and so far as wheat is concerned, there is a most encouraging prospect. On light soils, however, and on those especially which have been sown extensively with spring corn, a gentle fall of rain would be extremely beneficial. The grass has not made much progress of late, but as there is a good bottom to it, a great change is likely as soon as growing weather has fairly set in. The prospect with regard to fruit is, with the exception of wall fruit, encouraging.

The following statement shows the imports and exports of cereal produce into and from the United Kingdom since harvest, viz., from Aug. 26 to April 13, compared with the corresponding period in the three previous seasons :

	IMPORT	s.

Indian Corn Flour	19,793 43,701	56,9%0 1,285,708	13,7.8	\$2,354

On the whole the stock markets have been firm, with a favor. able tendency as regards prices. On Thursday there was considerable flatness, owing to the statement in one of the daily papers that Germany had sent a communication, couched in very decided terms, to the French Government respecting the military movements of France. With that exception, the tendency of prices has been favorable. The more hopeful view which is taken respecting the arbitration at Geneva and the easier tone of the money market have had a good effect. The favorable weather and the excellent crop prospects have also imparted firmness to the markets. There has been considerable flatness in Spanish stock, owing to the circumstance that the bills which were presented on Monday and Tuesday at the Spanish Financial Agency here were dishonored. They have since been paid; but that the Spanish Government should be unable to procure so small a sum as £300,000 clearly shows that there is a screw loose somewhere. The closing prices of consols and the principal American securities to-day are subjoined :

Messrs. Rothschild & Sons have issued the prospectus of the new Russian loan for £15,000,000. The bonds bear interest at the rate of five per cent, and are issued at the price of 89. The extent of the applications may be judged from the fact that applicants are only likely to receive one-tenth of the amount they applied for.

## COMMERCIAL AND MISCELLANEOUS NEWS.

IMPORTS AND EXPORTS FOR THE WEEK .- The imports this week show a decrease in both dry goods and general merchandise. The total imports amount to \$9,573,956 this week, merchandise. The total imports amount to \$5,57,550 this week, against \$13,104,110 last week, and \$10,670,650 the previous week. The exports are \$4,790,732 this week, against \$3,244,186 last week and \$3,820,952 the previous week. The exports of cotton the past week were 3,996 hales, against 6,513 hales last week. The following are the imports at New York for week ending (for dry goods) April 26 and for the week ending (for general merchandics) April 27 merchandise) April 27.

New Cotton Exchange Building .- This morning, at 12 o'clock, the inauguration of the new Cotton Exchange takes place, and hereafter the meetings of the Exchange will be held on the main floor of its own building, on Hanover Square. Soon after the organization it became evident to the membera that the premises 142 Pearl street, which they then occupied, were too contracted and otherwise unsuited for the purposes of the busi-ness transacted there. Consequently they began to look about for new quarters, and, not quite a year since, purchased the prop-erty known as the Hanover Building, covering the entire front of Hanover square, and at once commenced alterations necessary to its occupation. These alterations are now completed, and the result is an elegant floor, about 65 by 75 feet, fitted up with every convenience for the business of the Exchange, while the basement and second and third floors are rented as offices. The officers-Messrs. S. D. Harrison (of Jewell, Harrison & Co.), Pres-ident; James F. Wenman, Vice President; A. B. Graves, Treas-urer; and B. F. Voorhees, Scoretary-have held the same posi-tions since the first organization. -Messrs. Tanner & Co., the financial agents of the St. Joseph o'clock, the inauguration of the new Cotton Exchange tak

-Messrs. Tanner & Co., the financial agents of the St. Joseph and Denver City Railroad Company, are in receipt of advices to the effect that the construction of the road is going forward with greater rapidity than ever before, and that it will be finished and ready for through business by August. The local business of the ready for through business by August. The local business of the road is increasing as each section is completed, and this alone, it is estimated, will earn the interest on the bonded debt. Constant additions are making to the rolling stock of the road to meet the increasing requirements of business. When the road is opened in August for through business, it will compete for a large part of the Pacific bound freight which centres at St. Louis, the road having a connection with St. Louis on the west as well as the east side of the Missouri River. But a small part of the first mortgage sinking fund land grant 8 per cent. bonds are unsold, and as soon as the remainder is closed out, the agents confidently expect that the price of the bonds will advance, as was the case with the bonds of the eastern division when that loan was closed. bonds of the eastern division when that loan was closed.

-The attention of our readers is directed to the card of the -The attention of our readers is directed to the card of the "Swiss Lloyd" on another page. This Company has been in successful operation for many years as a Marine and Inland Transportation Insurance Company, with a share capital of five million dollars, and assets of about one and a half millions. The "Lloyd" has just established an agency here, selecting for its representative Mr. Hugo Menzel, of the firm of Messrs. Wm. Menzel & Son, corner Cedar and William streets, and in doing So has made a most excellent choice, inasmuch as Mr. Menzel has heen for some ten or fifteen years in business here on his own has made a most extendent choice, mashirden as and, mentor has been for some ten or fifteen years in business here on his own account, principally with the Southern and Western States, and with Europe and China, and joins popularity to character. Mr. G. Henry Koop, also favorably known here, assists him in the management. To the cotton and tobacco, as well as the provision interests, this Company is of great importance.

-We hear very favorable reports of the traffic on the Connecticut Valley Rallroad. It is estimated that already this road is earning sufficient to pay interest on its bonds and a fair dividend on its stock. Messrs. Allen, Stephens & Co. still have a few of the first mortgage bonds of this road, which they offer at 95. They are free of Government and Connecticut State taxes.

-The Equitable Trust Company reports that on the day the books were opened the stock of \$1,000,000 was fully subscribed for immediately; and within a few hours afterwards subscriptions amounted to \$150,000 more than the amount to be issued.

#### BANKING AND FINANCIAL.

BANKING HOUSE OF HENRY CLEWS & Co., 32 Wall street, N. Y.

Circular Notes and Letters of Credit for travelers; also, Commercial Credits issued, available throughout the world.

Bills of Exchange on the Imperial Bank of London, National Bank of Scotland, Provincial Bank of Ireland and all their branches.

Telegraphic Transfers of money on Europe, San Francisco, and the West Indies.

Deposit accounts received in either Currency or Coin, subject to check at sight, which pass through the Clearing-House as if drawn upon any city bank; interest allowed on all daily balances; Certificates of Deposit issued, bearing interest at current rate; Notes and Drafts collected.

State, City, and Railroad Loans negotiated.

CLEWS, HABICHT & Co.,

11 OLD BROAD STREET, LONDON.

## THE ST. JOSEPH AND DENVER CITY RAILROAD CO.'s FIRST MORTGAGE BONDS

ars being absorbed by an increasing demand for them.

Secured as they are by a first mortgage on the road, land grant. franchise, and equipments, combined in one mortgage, they command at once a ready market.

A liberal sinking fund provided in the mortgage deed must advance the price upon the closing of the loan. Principal and interest payable in gold. Interest at eight (8) per cent per annum, payable somi-annually, free of tax. Principal In thirty Denominations, \$1,000, \$500 and \$100, Coupon or vears. Registered.

Price, 974 and accrued interest, in currency, from F bruary 15, 1872.

Maps, circulars, documents, and information furnished.

Trustees-Farmers' Loan and Trust Company of New York.

Can now be had through the principal banks and bankers thronghout the country, and from the undersigned, who unhesitatingly recommend them.

TANNER & CO.. Bankers, No. 11 Wall street.

### NATIONAL CURRENCY HANK.

This bank has removed to No. 92 BROADWAY,

next door to the old location. The Specie, Bank-Note, Revenue Stamp, and Bond Departments will be continued as heretofore. Accounts received on the most favorable terms, and checks pass through the Clearing-house as usual.

> F. F. THOMPSON, President. J. H. L. MORFORD, Cashier.

The Northern Pacific Gold Bonds offered by Messrs. Jay Cooke & Co., 20 Wall st., and the principal Banks and Bankers throughout the country, are a combination of a first-class Railroad Security with a Real Estate Mortgage upon property worth treble the issue of the Bonds. Their large and rapid sale, both at home and abroad, and their absorption by Savings Banks and other conservative moneyed institutions, show at once their popularity with the people and their high credit among financial men.

The Bonds are offered by the agents at par and interest in currency. They are exempt from United States tax, and bear 7.30 per cent. interest in gold. All marketable securities are received in exchange for Northern Pacifics by Messrs. Jay Cooke & Co., without expense to the investor.

THE FIRST MORTGAGE SINKING FUND BONDS OF THE LOGANSPORT, CRAWFORDSVILLE AND SOUTH-WESTERN RAILWAY OF INDIANA, bearing Eight per Cent Interest, gold, free of Government Tax, payable quarterly in -'ow York, are for sale by JONES & SCHUYLER, No. 12 Pine street, at 95 and accrued interest.

#### FRIDAY EVENING, May 3, 1872.

The Money Market .- The money market ruled at fairly easy rates on Saturday and Monday, the days succeeding the issue of our last report, and borrowers were generally accommodated at 6@7 per cent, with some exceptions, as low as 5 per cent. There was subsequently a more active demand for money, and on Tuesday and Wednesday last the rates paid by brokers ranged as high as 7 gold, and in some cases a commission of 1-32 of 1 per cent.

These high rates, however, proved to be only temporary, and the market soon afterward fell back to 6@? per cent as the prevailing rates to all good borrowers.

The Treasury programme for May embraces the sale of \$2,000,-000 gold, each Thursday, and the purchase of \$2,000,000 bonds, each Wednesday, making, in all, \$10,000,000 of each in the month. It is rather difficult at the present moment to foresee precisely the

reault of these transactions, for if the high price of bonds should prevent the purchase of any considerable amount, at or below par in gold, and at the same time the sales of gold should be regularly continued, the tendency would evidently be to make the money market stringent.

This week only \$691,650 of bonds were purchased, against the sale of \$2,000,000, gold.

The Secretary of the Treasury has called in \$1,300,000 more of three per cent certificates, bearing date from August I, 1868, to August 10, 1868, of the denomination of \$5,000, between the numbers 3,617 and 3,810, inclusive, and of the denomination of \$10,000, between the numbers 3,781 and 3,951, inclusive; and from the 30th day of June, 1872, such certificates will cease to bear interest, and will be no longer available as a portion of the lawful money reserve of any National Banking Association.

The last statement of our associated city banks showed a considerable increase in legal tenders, and a consequent improve-ment in their excess above legal reserve. The total liabilities stood at \$230,979,100, and the total reserve at \$63,639,900, being \$5,895,125 in excess of 25 per cent of the liabilities. The following statement shows the changes from previous week and a comparison with 1871 and 1870.

and a comparison with 1871 and 1870:

		1812	and the second second second second	1871.	1870.

UnitediStates Bonds.—Government Scenritics continue firm at near the same quotations as last week. The demand continues to be well distributed, and the supply of bonds is relatively small, so that it is difficult to make a purchase of any large amonnt in round lots. The Treasury schedule for May calls for the purchase of \$2,000,000 each Wednesday, or \$10,000,000 in the month, but it seems extremely doubtful whether any considerable amount can be obtained at or below par in gold. At the first pur-chase on Wednesday last, only \$982,650 were offered, and \$691, 650 were purchased. Closing prices daily, and the range since Larger in

State and; Italiroad Bonds.-State Bonds are rather quiet, and transactions generally limited to relatively small amounts. Tennessees have receded from the advance previously made, and South Carolinas are also less firm. Virginia consols are decidedly stronger, and it would appear that these bonds are not now very high, provided the State will continue to pay four per cent. a year on them, in accordance with the present law. The great difficulty in regard to Southern State bonds seems to be that the holders do not know what legislation may take place in regard to their honds State and;Railroad Bonds .- State Bonds are rather quiet, in regard to Southern State bonds seems to be that the holders do not know what legislation may take place in regard to their bonds another year; if they could rely upon laws already passed being strictly carried out, and that they would not be reversed or mate-rially changed by the next legislature, there would be far more confidence in purchasing Southern State bonds for investment. Railroad bonds continue in good demand at pretty firm prices. Closing prices daily and the range since Jan. 1 have been :

This is the price bid, no sale was made at the Board. Railroad and Miscellaneous Stocks .- The stock market has been comparatively quiet on the general list, while one or

two specialties have at times created considerable interest. Pacific Mail and Columbus, Chicago & Indiana Central—or C. C. & I. C., as it is called—have been the principal speculative feat-ures. The latter stock had been almost unnoticed for a long time. past, until brought into prominence by the present movement, and the real cause for this activity is not yet accounted for at all satisfactorily. The road is one of the Pennsylvania leased lines, and its annual report for the year 1871, just recently issued, shows the following:

Earnings.	
From freight From passengers. From mails, express, &c	\$2,852.014 1,145,831 172,492
Total for 1871	\$1,170,337 3,531,013
Increase, 18 1-10 per cent Earnings per mile of road	\$639,319 \$7.104
Expenses.	
For conducting transportation For molive power. For maintenance of way. For maintenance of ears	\$969,783 1,135,853 658,384 277,017 89,062
Total expenses 1871 Total expenses 1870	\$3,130,106 2,856,910
Increase, 9 56-100 per cent. Per cent of carnings absorbed by expenses 1871, 75 1-10. Per cent of carnings absorbed by expenses 1870, 80 9-10.	\$273,196
The net carnings of this road were. From which deduct for rental from February 1 to December 1, 1871, being 30 per cent of gross earnings. Less difference in adjustment to A pril 1. assumed by Pennsyl-	1,010,231
vania Railroad Company 135,088	1,019,225
Profit in operating C. C. & I. C. Rallway Sundry cluims paid belonging to previous years	\$21,006 51,606
Actual loss in 1871	\$30,000

It is difficult to understand from this statement how there can

be any increased value in the road itself. To-day the market was rather heavy towards the close, and showed, on some stocks, the lowest prices of the week. There has been somo little excitement in Northwest in view of the approaching election, but it seems doubtful whether any change of importance will take place in the management of the company.

The Gold Market.—Gold, after selling at 113 on Saturday last declined early in the week to 1124, but has since been stronger, and sold to-day at 1134, closing at 1124. The market has still been subject to speculative control, and in addition to the influ-ences noticed in our last report, the rumors of possible hostilities between the United States and Spain has been used to advance the premium. In regard to an export demand for specie it should be remembered that the shipments of last year had no speedy and remarkable effect upon the price of gold, as the highest price made in May was 1124, in June 1134, and in July 1134. At the Treasury sale of \$2,000,000 on Thursday, bids amounted to \$6,430,000. Customs receipts of the week have been \$2,976,000. The following table will show the course of the gold premium each day of the past week: The Gold Market .- Gold, after selling at 113 on Saturday last

"Foreign Exchange.-The exchange market has varied some what in tone, but has been upon the whole pretty firm. Nominal rates have been maintained, but a concession has sometimes been made on transactions of considerable amount. The subject of the export of United States bonds or other American scentities to expert of officiency in our trade balance is considerably dis-cussed, and if the experience of the past few years may be taken as a guide, it would be concluded that the export of bonds of one class or another is likely to be large. Nominal rates remain as follows:

# BANKING AND FINANCIAL.

HABVEY FISK.

FISK & HATCH, BANKERS,

A. S. HATCH.

No. 5 Nassan st., New York.

No one needs now to be assured that Government Bonds are good. But, at present market prices, the rate of interest which they pay upon their cost is too low to meet the views of most investors. Hence the constant inquiry for something safe that will pay better.

To meet this inquiry estisfactorily to ourselves and customere, we can recommend only such securities as we know to possess the essential qualifications of unquestionable security. The securities to which we have given the necessary attention to enable us to recommend them are:

THE BONDS OF THE CENTRAL PACIFIC RAILROAD COMPANY. Originally negotiated by us, and which we now buy and seli at market rates, They are widely known and highly estcemed in all the principal money markets of the world, and are dealt in at all the principal Stock Exchanges in this country and Europe, where they take rank in popularity and market value next to the Bonds of the United States Government. Present market price shont 102%.

THE SIX PER CENT BONDS OF THE CHESAPEAKE AND OHIO RAILROAD COMPANY,

secured by a First Mortgage upon their great East and West Trunk Line of Railroad, extending from the Chesapeake Bay to the Ohio River, forming a short, easy, low grade, and economical through route for the transportation of Western products to the sea, and traversing the wonderful Iron and Coai deposits of Virginia and West Virginia, which are well known to be among the most important, varied and valuable on this Continent.

We have these bonds still for sale, for account of the Company, at 94 and accrued interest. Interest payable May and November. Principal and interest payable in Gold in the City of New York. Denominations: \$1,000 \$500, \$100, Coupon or Registered.

Full information furnished on application.

We buy and sell GOVERNMENT and CENTRAL PACIFIC BONDS; receive deposits, and allow interest on balances; make collections; issue certificates of deposit, and do a general banking business.

593

#### GENERAL QUOTATIONS OF STOCKS AND BONDS. The most active stocks and bonds are quoted on a previous page. In New York, prices represent the per cent value, whatever the par may be, "Southern Scentities," (except states), and N. Y. "Local Sceurities" are quoted in scenarate lists.

value, whatever t in separate lists.	hej	par	may be, "Southern Se	eenr	itle	s," (except states), and		x	Local Securities" are	que	=

#### INVESTMENTS-PRICES OF NEW RAILROAD BONDS.

It is an exceedingly interesting subject for the observation of investors to notice the large difference between the prices at which new loans are brought forward in our market. It might be supposed that there would be a certain price at or near which every legitimate enterprise would enter the market with its demands for capital, and that those which fell below the usual rate would fail to attract investors, while those which exceeded it would excite suspicions of their unsoundness. But such does not appear to be precisely the fact ; and there are numerous railroad enterprises always competing for loans in this city at very different rates of interest, all of them claiming to have good prospects of becoming prosperous and substantial companies. Taking, for instance, the list of new loans, as published on page 550 of THE CHRONICLE of April 27th, we find that among twenty-five leading railroad loans, the prices vary all the way from 94 for a 6 per cent gold bond to 95 for an 8 per cent. gold bond, showing a vast difference in the rates which different companies pay on their loans. It is not an altogether fair conclusion to assume that the soundness and prospect. of ultimate success of each company is exactly proportionate to the rate of interest which they pay for money, though such is unquestionably the general view taken by capitalists and financiers. There are, however, some other elements to be considered besides that of credit-the skill and reputation of the bankers negotiating a loan, the near or remote location of the railroad under construction, and the length of time allowed for selling the bonds-are all elements which have an important bearing upon the price of negotiation, although these are not immediately connected with the ultimate success of the road as a paying concern.

In regard to new loans we desire to place before our readers the details of each of them, together with the names of the bankers by whom they are offered, and thus enable them to form their own opinion of the security and probable success of each particular enterprise. It would not be within our province to speak decidedly in favor of certain leans or against any others, but, with the facts before them, our subscribers can form a satisfactory opinion in regard to the merits of each.

#### State, City and Ratiroad Bonds on which Interest is paid in June, in New York.

For the convenience of investors, we have compiled from our extended stock and bond tables the following list of State, City, and Railroad bonds, upon which the semi-annual or quarterly interest is payable in June. In buying or selling bonds, the periods of interest payment are essential to be known, and the table below will show at a glance the various bonds which will be sold ex-interest ln June.

Alabama Finances.—PURCHASE OF THE ALABAMA & CHAT-TANOOGA RAILHOAD.—On the 26th of February, 1872, an act of the Legislature of Alabama was approved, entitled " An act to protect the State in its liability on account of railroads." The provisions of the act are the tollowing:

That is any case where it shall be necessary, under judicial process issuing from any of the counts of the United States, to sell any railroad of this State, either in whole or in part, for which the State is, or may become itable on account of having indorsed or issued honds in all of the construction of such road, the Governor is hereby authorized to bid for such read, at any such saic, to the full extent of the lisbility of the State so contracted; and, if the State shall become the purchaser, to resell the same for the simult of such liability, including the principal and interest, retaining the title and if ach chase moncy shall be paid, and taking such further security for its payment as may be necessary.

may be necessary. Under this act the Governor recently bought in the Alabama & Chattanoega Railroad at the sale in bankruptcy. His action, however, seems to be very differently regarded, for while it is approved by some it is severely criticised by others, as an unfav-orable move for the State. We find the following in an Alabama paper :

Regarding the State now as the purchaser of the road, the estimated liabilities of the State on account of the company may be roughly stated in round numbers, as follows:

be roughly stated in round numbers, as forced by the Indored bonds on which interest has siready been paid by the Governor \$1,720.000 830,000 

_nor	150,000
Fees of lawyers employed by the Governor in Alabama, Mississippi.	
Georgia and Tenneasce	100.000
Taxes due on property of company to State	50,000
	2,000,000
Interest on same, with premium on gold	352,000
Jutereat on indoracd bonds, falling due 1st July next, with premium	004,000
on gold	200.000
United States claim	
Contest States claim	20,000
Georgia State claim and interest	235,000
Porchase money hid by Governor for the property	812,000

If the Governor had not bought the property for the State yes-terday, but had allowed the bidder who bid \$311,000 for the property to become the purchaser, then the purchaser would have held the property subject to every lien of the State, and would also have relieved the State of very heavy items."

Pittsburgh, Cincinnati & St. Louis Raliroad.—ANNUAL REFORT FOR 1871.—The Directors' report states: The annual meeting occurring so soon after the end of the year, it is quite impracticable, in view of the extended operations of the Com-pany, to give the actual results of the years business. Those herewith presented, thereupon, are based upon the set-tlement of the Company's accounts to November 30th, nlt., with an estimate for the additional month of December. The earnings and expenses of the Road operated by your Com-pany during the past year were as follows:

President, Hon. Thomas L. Jawett, and 2,626,618 91 had accrued President, Hon. Thomas L. Jewett, and 2,020,018 of had accreded to April 1, 1871, the date at which your Board assumed the active charge of the property. It has been arranged to pay \$3,000,000 of this debt by an issue of an equal amount of preferred stock at par, the Pennsylvania Railroad Company having signified its willingness to receive such stock in payment. You will, there-fore, be r-quested to vote npon the question of authorizing an increase of \$3,500,000 of preferred stock, the excess of \$500,000 to be held in reserve for future continguescies. The remainder of the

fore, be r. quested to vote hoot the question of authorizing an increase of \$3,500,000 of preferred stock, the excess of \$500,000 to be held in reserve for future contingencies. The remainder of the debt due the Pennsylvania R. R. Company, \$49,893 21, is payablo in the income bonds of the Columbus, Chicago & Iudiana Central Railway Company at par, receivable by your Company in payment of betterments made to that road. The independent access of the line of your Company to the great starting point for the Sonth, at Louisville, had become so impor-tant, and was so entirely dependent upon mere comity, which might any day be terminated by the intervention of rival interests, that your Board has taken action to secure an approach to Louis-ville, by a lease of the Jeffersonville, Madison & Indianapolis Railroad, which lease will also be presented to you for your consideration, and you are asked to ratify and coulirm it at your present meeting. It provides for a rental to be paid equivalent to the interest and sinking fund on the funded debt of the pro-pri-tary Company, and a dividend of seven per cent per annum on its capital stock of \$2,000,000. Its terms are guaranteed by the Pennsylvania Railroad Company, and it is believed that the property it embraces will be solt-sustaining, besides forming an indispensable link in the lines of your Company. ndispensable link in the lines of your Company.

Northeastern Railroad Company of South Carolina.-The following is the anunal report for the fiscal year ending February 29, 1872:

Balance...... \$101,653 Comparing these results with those of the preceding year, we find as follows:

	1870-71.	1871-72.	Decrease.
Receip's from freights	\$200,472 22	\$190,067 44	\$10,404 78

ensuing year. The liabilities of the Company in stock and bonds are stated in detail in the monthly stock and bond tables of THE CHRONICLE; these, with floating liabilities, amount to \$2,226,798 08.

Profit and loss-Balance at	debit	\$2,223,417 . 3,880	
PT2 4 . 3		40.000 000	00

Of the new first mortgage bonds (\$\$20,000) we have on haud \$22,500, to be applied to the redemption of the old bonds and (\$322,000) we hold \$46,500 for the redemption of an equal amount of the old still outstanding.

(\$322,000) we hold \$46,500 for the redemption of an equal amount of the old still outstanding. The amount of second mortgage bonds originally issued was \$300,000, of which \$115,000 were sold; the remaining \$155,000 were subsequently pledged and deposited with trustees, as a security for a corresponding amount of preferred stock. This preferred stock is then, virtually, a substitute for and representa-tive of that amount of second mortgage bonds. Upon their maturity the new issue of bonds for their redemp tion was increased to \$320,000 (to cover accrued interest thereon), and as the bonds and the preferred stock then bore the same rate of interest, the conversion of the one into the other, as might be desired by their respective holders, has been allowed. The preferred stock has the single advantage of being registered and transferable on the Company's books, but many prefer foregoing this, for the convenience of collecting their interest by coupons, and the greater facilities of transfer, &c., afforded by the bonds. The total interest for which the Company is annually responsi-ble on its bonded and other obligations is about \$100,000. The prospects of the Company are much involved in the exten-sions of its communications northward from Cheraw to Salisbury —in the construction of the South Carolina Central Railroad from Lace's Station to Sumter—and, especially, in the improvement of its connection with the Savannah and Charleston road. The completion of the road from Fredricksburg to Washington, and of the tunnel at Baltimore, both now in active progress, will relieve the Atlantic Coast Line of the present transfers and delays at those points, and should render it an attractive route to the passenger. Equipment." The means whereby this outlay was met, were derived mainly from the Pennsylvania Railroad Company, and with similar expenditures previous to 1871, form the greater part of the indebtedness to that Company, which as stated above is \$3,049,893 21. Of the whole amount of this debt \$2,122,571 28 was incurred prior to January 1, 1871, as certified by your late

May 4, 1872,]

the Atlantic & Great Western Railroad Company placed apon the regular list of stocks called at the Stock Board. The Committee regular list of stocks called at the Stock Board. The Committee on Securities at once began an investigation of the affairs of the Company, and their report will be made officially next Wednes-day. The following interesting facts are found in it:

Total ..... 507 The Company has also an interest in the lease of the Cincinnati Hamilton & Dayton road, the length of which is 67 miles. The financial condition of the road is as follows :

\$18,000,000

12,000,000

29.000.000 

 Total capital
 \$109,000,000

 Receipts for October, 1871
 \$307,931 74

 Receipts for November, 1871
 301,376 26

 Receipts for December, 1871
 337,102 67

Out of the first mortgago bonds \$9,500,000 worth are held by the company to redeem outstanding bonds e.o.o.o.o. of the road and the outstanding bonds on the Ohio division of the road and the outstanding stock of the reorganization trus-tees. \$1,500,000 ln these bonds are still in the Treasury, leaving \$7,000,000 to the creditors of the old company. Of the second nortgage bonds \$5,000,000 are issued to the creditors of the old commute, and the remeinder the company with hold in the company, and the remainder the company still hold in the treasury.

New York, West Shore & Chiengo Hallway .- The Journal of Commerce says: The condition of the Company, as near as has been ascertained, is as follows: The West Shore Hudson River Railroad Company is under the management of Mr. Allan Hay, President, and a board of directors, composed of John Van Ness, C. D. Van Wagenen, T. J. S. Flint, and ten others. The Company has not been successful, and the bonds have no market value at this time. C. D. Van Wagenen, T. J. S. Flint, and ten others. The Company has not been successful, and the bonds have no market value at this time. Sales have been made recently at prices ranging from 22 to 10 cents on the dollar. The New York, West Shore & Chicago Railway Company, Mr. J. M. Courteuay, Chicago, Presi-dent, has agreed with the first-named Company to take up its bonds at the rate of 50 cents on the dollar on or before the 26th day of January, 1873, and to give in exchange bonds of \$1,000 of the New York, West Shore & Chicago Railway Company, secured by its first mortgage, or cash. Mr. Courtenay has appointed Messrs, C. D. Van Wagenen, John Van Ness and Allan Hay trustees to receive the bonds of the West Shore Indson River Railroad Company on the above terms. The office of the trustees is at 33 Brond street, New York.

Ruttand Rattroad Affairs .- An informal meeting of quite a number of the large stockholders in connection with the direc tor and advisory committee, was held in Boston a few days ago. After a full discussion of the present condition of the corporation, it was, on motion, voted "That as the sense of this meeting the plan of freeing the company from its floating debt by a subscrip-tion to its preferred capital stock will best promoto the interests of stockholders, and we hereby pledge ourselves to subscribe for our proportion of said stock." Acting upon the pledge thus given, gentlemen proceeded to redeem the same, and upon the spot subscribed for over \$100,000 of stock at par. Soveral expressed a willingness to take more than their proportion to make the plan a success. This sum, with former subscriptions, makes over one-third of the amount required. makes over one-third of the amount required.

Kennebee & Portland,-The case of the Kennebee & Portland Railroad Company against the Portland & Kennebec Railroad Company and others, to set aside the foreclosure of the mortgage under which the latter company was organized, decided by the Supreme Court of Maine in favor of the defendants, and carried by the plaintiffs to the Supreme Court of the defendants, and earried by the plaintiffs to the Supreme Court of the United States by writ of error, was decided in favor of the defendants, and the case dismissed for want of jurisdiction. This decision terminates the litigation, and confirms the title of the Portland & Kennebec Railroad Company to the property.

United Companies of New Jersey, -Consolidation, -Resolutions in favor of consolidation have been passed by the stockholders of each company, under an act of the New Jersey Legislature, approved March, 1872, authorizing a consolidation of the Delaware & Baritan Canal Co., the Camaen & Amboy Rail-road and the New Jersey Railroad into one corporation, having thirteen directors, of whom, at its first election, each company is to choose four, while the Legislature is to elect one

to choose four, while the Legislature is to elect one. The capital stock of the new corporation will be about \$19,000,000. The elections of the Camden & Amboy and Delaware 419,000,000. The elections of the Camden & Amboy and Delaware & Raritan Canal Companies will take place in May, and that of the New Jersey Railroad in Jane, during the latter part of which meant the consolidated companies will probably be fully organ-Ized

Erie Railway. -Notico is given, as required by law, that is the intention of the Eric Railway Company to create a consoli-dated mertgage on the property of the company for the purpose of providing funds for laying a third rait, and for other necessary purposes. Dated New York, April 20, 1872. New Jersey Midland,....The track of the northern and south-ern division of the New Jersey Midland railroad has been con-nected, making a continuous line from New Durham, three miles above the Erle tunnel, to the State line, connecting the New Jer-sey Midland with the Unionville railroad at Unionville, and with the New York well Opproximately Midland railroad at Unionville. the New York and Oswego Midland railroad at Middletown.

The following announcement has been made at the New York Stock Exchange

"The New Jersey Southern Railroad Company have resolved to increase the capital stock of the company by an issue of ten thousand additional shares of one hundred dollars each, making the whole amount (after such increase) of the capital stock five multilons of dollars. The object for which such issue of stock is about to be made is to furnish money for parchase of steamboats; the obtaining of requisito pier accommodations, and the cancellation of existing contracts with partners for steamboat service." (Signed) GEO. M. BARTHOLEMEN, Pres't N.J. S. R.R. Co.

**Roston, Hartford and Erle.**—The Boston Commercial Bulle-tin replies to a correspondent who inquires how many different sorts of Hartford and Erle securities there are affoat, as follows: "The old first mortgage bonds amount to \$600,000. They mature in 1881, and the seven per cent. interest la due March 1 and Sep-tember 1. There are \$14,000,000 of the new first mortgage bonds (Berdells) due in 1889, with interest at seven per cent, payable January I and July 1. There are also \$3,000,000 of these new first mortgage bonds, in addition to the \$14,000,000 which are guaranteed by Erle, due also in 1889, with interest at seven per cent, payable semi-annually. And besides all these, there are \$4,000,000 first mortgage (*new* Berdells) which the State of Mas-sachusetts holds as security for \$3,000,000 loan to the road. The share capital of this road amounts to \$18,039,960, and the par value is \$100. The road is to-day in the hands of W. T. Hart, C. P. Clark, and G. T. Oliphant, trustees of the mortgage bondhold-ers. The receivers are out of office. C. Bladley et Providence, Mr. Chapin of Springfield, and George M. Barnard of Boston aru assignees of the road, for the whole thing is in bankruptey. These assignees will take all left after the settlement with the mortgage bondholders, and pay the same to fleating creditors. Hoston, Hartford and Erle .- The Boston Commercial Bulle-We are not to-day able to give our correspondent the exact amount that will remain to pay floating debt."

The Schuylkill Navigation Company. - An adjourned meeting of the stockholders of the Schuylkill Navigation Compaay was receatly held to decide what action should be taken on the report of the committee appointed last February. Mr. C. D'Invilliers offered the following:

Mr. C. D'Invilliers offered the following: Resolved, That the current expenses of the company be reduced by the man-agers to five thonsand dollars a year on and after January 1, 1873. Resolved, That a semi-annual dividend of 50 cents per share on the preferred stock and 25 cents per share on the common stock be paid to the stockholders, clear of taxes, in July and January of each year, commencing July, 1872, and continuing until the floating debt be paid, and that the surplus income beyond the \$5,000 allowed for current expenses be applied towards the payment of the floating debt until it be discharged? Resolved, That a committee, composed of one stockholder, one leanholder, and one manager of the company, be appointed to consider what further measures may be necessary, and to report the same at the next annual meet-ing, and that said committee have anthority to convene a special meeting. These resolutions were accred to.

These resolutions were agreed to.

The chair then appointed the following gentlemen as the com-mittee designated: Messrs. C. D'Invilliers, stockholder; Horatio C. Wood, loanholder, and J. B. Townsend, manager. Upon motion, the committee of February was then discharge J.

Adjourned.-Philadelphia Press, April 25.

Littie Rock, Pine Bluff & N. O. Raffroad.\_The follow. ing despatch, published in the Memphis Appeal, is sent to us for publication :

#### NEW ORLEANS, April 15, 1872.

Editors Appeal: I have just shipped to Chicot City twenty miles of railroad iron for the Little Rock, Pine Bluff and New Orleans Railroad. I am awaiting the arrival of several cargoes more of iron, purchased for that road, which will be forwarded as soon as it reaches this port. The company has purchased enough iron to complete the road to Pine Bluff, and track-laying will i resumed inmediately. A. II. RYAN, General Agent.

Alexandria & Fredricksburg Railroad,-Construction trains now cross the bridge over Occoquan Creek, at Colchester, daily, and the track from that point to Quantico, a distance of 12 miles, is being laid as rapidly as possible, and that is half a mile a day. An effort was made to prosecute the track laying from the Quantico end of the line, but it was unsuccessful. A half a mile a day, however, will complete the connection in twenty-four good working days, as the bridges are all finished except that over the Neabsco, and that will be by the time the track layers reach there, and it is expected that the other end of the line will be reached, and that trains will run through to Richmond In six weeks at the furthest.-Alexandria (Va.) Gazette.

Sale of the Shelbyville Battroad .\_ The Louisville, Cincinnati and Lexington Railroad has purchased the Louisville and Shelbyville Railroad (from Anchorage Station to Shelbyville, 18 miles), paying for the road \$25,000 per mile, and assuming all the liabilities. It is said the road will be extended to Frankfort, Lawrenceburg and Danville. A meeting of the stockholders to ratify the sale will be held in May. The extension of the road to Lawrenceburg will sent \$435,000 Lawrenceburg will cost \$425,000.

Mobile & Ohto Railroad .- This company is reported to have made arrangements for an extension to Calro, III., thus filling up the gap which had hitherto existed between their northern terminus and the Illinois railway system centering at Cairo. This extension will complete a close all rail connection between Mobile and Chicago and other cities of the West lying north of the Ohip river. the Ohio river.

# The Commercial Times.

### COMMERCIAL EPITOME.

FRIDAY NIGHT. May 3, 1872.

Trade has been fairly active this week, but with frequent fluctuations in prices of leading staples. The weather has become pleasant and settled. Some further progress has been made in rcopening inland navigation, and all physical obstacles to business promise to be soon removed; but there is a partial pause in the speculative action of the previous fortnight; which is in part due to the action of the Federal Treasury Department in increasing materially its sales of gold. Stocks of merchandise, it will be seen, are generally pretty tull.

The following is a statement of the stocks of leading articles of domestic and foreign merchandise, at dates given:

			372	1871.
		May 1.	April 1.	May 1.

Msuila Hemp	bales.	17,806	28,239	38,331
Ashes		144	189	
There has been a 11				-

Flour has become dull, and shipping extras closed at \$7 15@7 50. Wheat has been salable, but closed quiet at \$1 63@1 68 for No. 2 spring. Urn has been variable; prime new mixed closed at 76c. efloat. Groceries have been very unsottled, owing partly to the repeal of the duty on tea and coffee. Provisions have fluctuated daily. The market for hogs has shown much less buoyancy; in fact, there has been a reaction in prices from the late advance. The demand has been good, but the large number of hogs which are slaughtered daily serve to keep up the supply. There has been some recovery, owing in part to the circumstance that the stock of pork on the first instant was found to be about 47,000 bbls. less than at the correspond-ing date last year. To-day pork was again firmer at \$3 88 for new mess, on the spot, \$14 sciler, June, and \$14 25 for later months. Lard was also firmer, at  $9\frac{2}{8}@9$  7-16c. for prime Western steam on the spot, and 95c. for June. Bacon was dull and short clear sold at 8 5-16c. Beef has been more active for mess, at full prices, but tierce beef has re-mained quict and nominal. Butter and cheese have further declined, but at the close seemed to have " touched bottom." The spring has been dry and cold, and the production during April was much smaller than in the same month in previous years.

Tobacco has continued in good demand, and, with stocks so newhat reduced, prices have ruled very firm, with a slight upward tendency. The sales of Kentucky have amounted to about 500 hhds., half for export, at  $8\frac{1}{2}@9\frac{1}{2}c$ . for lugs, and  $9\frac{3}{4}$ @14½c. for common to fine leaf. Seed leaf has con-tinued to move freely, mainly for export, but, with considerable pressure to sell, no higher prices have been obtained. The sales have been 300 cases old crop Ohio, for export, p. t.; 200 cases old crop sundry kinds, 20@40c.; 543 cases new crop Connecticut and Massachusetts seconds and fillers, seconds at 25@30c., fillers at 13@15c.; 100 cases new crop Connecticut wrappers, 45@55c.; 200 cases new crop State, 11@18c.; 1,100 cases new crop Pennsylvania, 15@22c.; 2,400 cases new crop Ohi, 9½@14c.; 400 cases new crop Wisconsin, 9@10c.; also 400 bales Havana, 95@\$1 15. Manufactured tobacco has been in fair request, and with an increased firmness on black work for export. A better demand for bright work has been manifest, several sales having been made for California as well as neighboring markets. We quote (in bond): black work, common and medium, 16@18c.; do., good and fine, 19@25c.; bright work, common and medium, 25@30c.; do., good and fine, 35@55c.

Exports of Leading Articles from New York. Th following table, compiled from Custom House returns, chows the exports of leading articles from the port of New York since January 1, 1872, to all the principal foreign countries, and also the totals for the last week, and since January 1. The last two lines show total values, including the value of all other articles besides those mentioned in the table.

#### COTTON

FRIDAY, P. M., May 3, 1872.

b

dy special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening May 3. From the figures thus obtained it appears that the total receipts for the seven days have reached 18,545 bales against 00000 bits to be 20000 bits the performance of 25,159 total receipts for the seven days have reached 18,045 bales against 26,512 bales last week, 38,031 bales the previous week, and 35,153 bales three weeks since, making the total receipts since the first of September, 1871, 2,553,269 bales against 3,623,373 bales for the same period of 1870-71, showing a decrease since September 1 this year of 1,040,104 bales. The details of the receipts for this week (as per telegraph) and the corresponding week of 1871 are as follows:

EROEIPTe Rec'd this week at-	1872.	1871.	BECEIPTS Rec'd this week at-	1872.	1871.
New Orleans bales Mobile Charleston	6,105 1 413 1,325 2,251	3,229	Floridabalea. North Carolinabalea. Virginia.	672 3,209	42 978 8,458
Tennessee, &c	532 2,814	6,490 7,529 7,745	Total receipta Decrease this year	18,549 82,594	

The exports for the week ending this evening reach a total of 33,022 bales, of which 24,253 were to Great Britain, 2,668 to France, and 6,102 to rest of the Continent, while the stocks as made up this evening, are now 33,023 bales. Below we give the exports and atocks for the week, and also for the correspond ing week of last season, as telegraphed to us from the various ports to-night:

		xported	to	Totalthis	Same w'k	Stock.		
Week ending May 3.	0.Brit.	France	Contin't		1871.	1872.	1871.	
New Orleans. Mobile Charl :ston Bavanuah Texas New York Other ports	4,463 2,522 8,996	2,668	6,102	21,718 4,468 2,522 8,976 823	34,503 8,063 746 8,550 729 18,903 73	88,584 17,922 14,125 17,889 7,557 80,661 82,000	156.928 85,747 19,214 40,217 62,818 82,000 80,000	
Total Since Sept. 1	24,252 1,315,604	2,665	6,102 800,147	33,022 1,777,330	71,087 2,687,962	258,988	436,344	

From the foregoing statement it will be seen that, compared From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is a decrease in the exports this week of 38,065 bales, while the stocks to night are 163,005 bales less than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to April 26, the latest mail dates. We do not include our telegams to night, as we cannot insure the accuracy or obtain the detail necessary by telegraph.

The market the past week for spot cotton has been quiet, but there has been an upward tendency in prices, and the close, though without animation, was firm. The favorable influences operating have been the very small receipts at our ports and a slight improvement at Liverpool. Our quotations, however, are slight improvement at Liverpool. Our quotations, however, are so high as to prevent any export movement, and the sales have been almost entirely for consumption. For future delivery the business has been largely for May. Parties, who had contracts out for that month have sought, therefore, to cover themselves. Con-fidence in prices for the summer months seems also to have in-creased, while the quotations for the next crop have been well sustained. The prices last reported for futures were thesis how ereased, while the quotations for the next crop have been well sustained. The prices last reported for futures were (basis low midding) 23 1-16c. for May, 23 11-16c. for June, 23 15-16c. for July, 23 c. for August, 22 c. for September, and 20 3-16c. for Oc-tober. The total sales of this description for the week are 84,850 bales, including — free on board. For immediate delivery the total sales foot up this week 3,275 bales, including 71 for export, 2,606 for consumption, 298 for speculation, and 300 in transit. Of the above, — bales were to arrive. The following are the closing constations: closing quotations :

WEATHER REPORTS BY TELEONAPH .- The weather during the WEATHER REPORTS BY TELEORAPH.—The weather during the past week appears to have been favorable in some actions, but unseasonably cold in others. From Galveston our telegram states that they have had one day on which it rained, but the rest of the week has been pleasant; a good stand of cotton has been secured, the fields are in good condition, and the plant looks strong and healthy. At New Orleans and Mobile there has been no rain except on one day, and that was alight; our Mobile telegram 11

16

states that more rain is needed. Our telegram from Selma also states that more rain is needed. Our telegram from Selma also states that they need rain; the week has been warm, except the last two days, which have been quite cool, but pleasant. Com-plaint of too cold weather is likewise made in our Montgemery telegram, much of the seed planted failing to come up. At Macon and Columbus there has been no rain except one slight shower reported at Macen, with the weather cool today. At Au-gusta there was a heavy rain Weduesday night, and since then it has been cool. From Savannah our telegram states that they have had rain on one day with the rest of the week warm and has been coel. From Savannah our telegram states that they have had rain on one day, with the rest of the week warm and dry. It has also been warm and dry at Charleston; some replanting on the coast is reported. At Memphis there has been no rain; more rain is needed; not over two-thirds of the plant-ing is completed. Our correspondents at Nashville state that it has rained there one day, with a light froat last night, but is warmer to day. Thermometer at Galveston has averaged 74, at Selma 74, Mobile SI, Montgomery 74, Macon 77, Savannah 71, Columbus 75, Charleston 73, and Memphis 71. OUR SPINNERS WANTS OUT OF THIS CROP.—The supply of sninners from the ports up to the present time (mail returns) has

spinners from the ports up to the present time (mail returns) has been as follows:

Receipts at the ports to April 27	2,564,721	
Stock on hand Sept. 1, 1871		
Stock at Northern interior ports (Providence,		
&c.), Sept. 1		
Total supply up to Sept. 27		2,709,0
Experts to April 27, 1872.	1,744,308	
Stock at out ports April 37	219,407	
Stock at Northern interior ports (Providence,		0.010.0
&c.), April 27	22,601	2,016,3

Taken by mills up to April 27, from the ports...... Surplus stock in hands of spinners, Sept. 1, 1871..... 662,695 80.000 Overland, direct to mills, say about ...... 170,000

912.695 Leaving to be obtained from ports, bales .... 112.305

Total required for the year's consumption..... 1.025.000 These figures would indicate that the mills need about 112,000 bales more from the ports out of this crop.

BOMBAY SHIPMENTS.—Our bombay telegram received to-night gives the shipments to Great Britain for the week at 48,000 bales and to the continent, 6,000 bales, while the receipts at Bombay, during the same time have been 35,000 bales. The movement since the first of January is as follows. These are the figures of W. Nicol & Co., of Bombay, and are for the week ending Monday:

Shipments this week to Great Cont Streat S -Shipments since Jan. 1 to-

GUNNY BAOS, BAGGING, &C.—There has been a mederate de mand for cloth, and with some lots offered on the market at a de-cline from former prices a number of small sales have been made. The close is reported rather firm at 15c. for native, and 151@16c. for domestic.

Bags have ruled very quiet since our last, and but few sales have been made. Hemp has been dull, and the price is quite nominal, with no sales reported. We quote, 11½@11§c., gold. Jute is quiet, with sales of 1,000 bales rejection at 4c., gold, 60

days. Jute butts centinue in fair demand at former prices, which are pretty steady. The sales are 1,000 bales in lots on spot at  $3\frac{1}{2}$  $3\frac{1}{5}$ c., part 60 days, 400 bales to arrive at 3c. gold, and 600 bales in Boston at  $3\frac{1}{5}$ c., 60 days.

The following figures are as made up by Messrs. J. C. Rogers & Co. on the 1st of May :

		72		71

VISIBLE SUPPLY OF COTTON MADE UP BY CABLE AND TELE-GRAPH.—By cable we have to-night the stocks at the different European ports, the India cotton afloat for all of Europe, and the night of this week:

American afloat for each port as given below. From figures thus received, we have prepared the following table, showing the quantity of cetton in sight at this date (May 3) of each of the two past seasons:

	1872.	1871.
Stock in Liverpoel bales.	844,000	994,000
Stock in London	211,000	91,500
Stock in Glasgow	600	700
Stock in Havre	187,000	30,000
Stock in Marsoilles	15,500	15,600
Stock in Bremen	18,750	52,000
Stock rest of Centinent*	100,000	35,000
Afloat for Great Britain (American)	171,000	230,000
Afloat for Havre (American and Brazil)	17,750	42,500
Atloat for Bremen (American)	12,750	42,000
Tetal Indian cotton afloat for Europe	466,000	165,800
Stock in United States ports	258,938	426,944
Stock in inland towns	36,352	58,632
Total	9 220 640	2,184,676
L'Undelse eve estessessessessessesses	~,000,010	~,101,010

\*Stock at Amsterdam, as received by cable to-night (May 3) is 72,000 bales, and at Antwerp 31,000 bales. These tigures indicate an increase in the cotton in sight to-night of 151,964 bales compared with the same date of 1871.

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports—receipts and shipmen's for the week, and stock to night and for the corresponding week of 1871:

	-Week en	ding May 8,	1872-	-Week en	ding May	5,1871 -
	Receipts.	Shipments.	Stock.	Receipts.	Shipment	s. Stock.
Augusta	689	1,620	7,190	928	2,415	17,430
Columbus	. 258	544	3,728	386	456	5,635
Macon	. 145	1,007	2,656	179	1,045	4,461
Montgomery	256	778	2,216	491	1,311	5,214
Selma	309	609	1,298	473	478	2,384
Memphis	2,496	2,438	14,431	5,139	4,833	19.000
Nashville	333	273	4,833	1,241	2,022	4,498
	4.491	7,269	36,352 -	8,767	12,559	58,622

The above totals show that the interior stocks have decreased dur-ing the week 2,778 bales, and are to-night 22,270 bales less than at the same period last year. The receipts have also been 4,276 bales less than the same week last year.

The exports of cotton this week fast year. The exports of cotton this week from New York show a de crease since last week, the total reaching 3,996 bales, agains 6,518 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1871; and in the last column the total for the same weight of the previous year: period of the previous year :

Exports of Cotton (bales) from New York since Sept. 1, 1871.

Of the present stock of cotton in Liverpool 41 per cent is American, against 61 per cent last year. Of Indian cotton the proportion is 29 per cent against 12 per cent.

LONDON, April 20 .- There is again but little change to notice in our market, transactions being atill limited, but our quotations aro only occasionally reduced 1d. per lb. from those of last week. The following are the particulars of the imports, deliveries and stocks:

5	Imports Deliveries	1870. bales. 43,710 125,409 40,545	1871, bales. 76,369 68,797 85,905	1872. 1.ales. 178,447 127,114
3	Stocka:	40,545	85,395	211,717

## BREADSTUFFS

FRIDAY P. M., May 3, 1872.

The whole market for flour and grain has been feverish and unsettled during the past week.

The receipts of flour have been only moderate, but the domand has fallen off materially. Prices have been generally held with much firmness. In fact, some receivers, under orders from their consignors, have withdrawn samples and demanded an advance; but the trade has been supplied with all its requirements at rather lower prices. Latterly there has been a demand for common extras to ship South, owing to the higher prices demanded in the Western markets, whence the South has been accustomed to draw supplies. Rye flour has been in speculativo demand, and prices have advanced. Corn meal has been only moderately active. To-day the market was firmer for all grades, but more in sympathy with wheat than from any improvement In the demand.

Wheat has been more active, both for export and home use, but there has not been much buoyancy resulting therefrom, owing to more disposition to sell and reduce stocks. Receipts at the Western markets have somewhat increased, but are still far short of former seasons, and the demand has increased more than the receipts. It is notorious that the stock o' flour in the country is not more than one-half and probably not more than one-third as large as last year; millers, consequently, are much better employed now than then, and buyers for export are in constant competition with them. It will he seen that the visible supply of wheat was greatly reduced last week,

that the visible supply of wheat was greatly reduced last week. No. 2 Chicago Spring, on the canal, near tide-water, sold yester day at \$1 60½@\$1 61 to arrive. To-day there was a smart advance, with alles of 150,000 bush., mainly for export, closing at \$1 66½@\$1 68½ for No. 2 Chicago and Milwankee afloat. There has been great activity in the market for Incian corn, especially for future delivery; the leading prices have been for prime new Westorn mixed afloat, 71½@72c. for the first half of May, and 69c. for the last half of May, and 68c. for all June. The supply on the spot has been moderate, and the stock in store is greatly reduced; yet prices have declined, selling on Wednesday at 73½c., but recovering yesterday afternoon to 75c. To-day corn at 734c., but recovering yesterday afternoon to 75c. To-day, corn was scarce and new mixed advanced to 76c., afloat.

Rye has been doing better, but closed rather unsettled. Barley Rye has been doing better, but closed rather discribed. Barley has ruled dull; parties are generally apart in their views; about 15,000 bush, strained two-rowed State sold for export to Glasgow at 65c.@66c., while prime Canada West brought \$1 15. Oats have been active and firmer, but stocks do not seem to undergo any material reduction.

### GROCERIES.

## FRIDAY EVENINO, May 3, 1872.

The general tone of this market has improved considerably during the week, and all goods are now held with much firmness and confidence. The most noticeable feature has been the passage of the bill abolishing the duty on teas and coffee, and a revival of interest in these articles, an increased trade call pre-valing, and some inquiry for speculation. It is as yet somewhat vorite," 4,050 do. Laguayra, per "Jenny," and 651 do. sundries. revival of interest in these articles, an increased trade call pre-

early for the fullginfluence of the change to become known, but dealers now know exactly where they stand, and the possibility of operating understandingly restores confidence. Sugars, too have increased in value, and all other goods are firm. The prospect of an early opening of the canals encourages the belief that interior buyers will soon be in attendance in larger numbers

The entries direct for consumption, and the withdrawals from bond, showing together the total thrown on the market for the week, were as follows:

ļ	Tsa, black	771 pkgs.	Laguayra	1,156		Sugar, Brazil. 3,300 bage.

TEA.

The movement early in the week was a little slow and uncertain, inficenced to some extent by the continued delay in the settlement of the duty question, buyers still holding their orders close down to a basis of actual necessities. Holders, however, as a rule, were disposed to look upon the position as generally favorable, and while none were arging sales, a few had entirely withdrawn their stocks of desirable grades and louked for a higher range of values. Fine and choice grecus were undoubtedly the best sustained, and indeed had somewhat advanced of late, but other qualities could only be bought at full former figures, and in a general way ruled steady. The somewhat endden announcement of the removal of the duty however. at once put an entire new face upon the position of affairs, and in place of the previous spathy, buyers not only became anxious but excited, and the call for goods in bond was quite liberal with advanced rates bid, and sellers in many cases very materially increased. Oolongs met with the greatest amount of attention, with extensive sales effected in part to the trade and partly for speculation, and desirable parcels are now quite scarce. Other styes, however, sympathise, and are thought likely to move soon, the general market for invoices showing quite a healthy tone. The line trade has not improved, and it is thought will continue slow until after July 1st when the new law goes into effect. Sales of about 20,001 pkgs. Oolongs, 5,600 pkgs. greens, and 4.800 pkgs. Japans.

There have been no direct imports this week. The receipts indirectly have been 224 pkgs, by steamer and 1,011 by rail overland. The following table shows the imports of Tea into the United States (not

Including San Francisco)	from Januar	v 1 to date. In	n 1872 and 1871:	
-	Black.	Green.	Japan.	Total.
1873	8,882,272	11,717,881	3,791,718	23,891,871
1871	10,145,273	11,255,840	4,393,081	25,797,196
The indirect importation				
Aspinwall, have been 52,0	01 pkgs. since	January 1, ag	ainst 20,874 last	year.

COFFEE.

The opening of the past week was again quite a dull one on the wholesale market, and importers generally were obliged to carry the large and accumulating stocks and make still further additions to their expenses, simply because there was a fixed determination on the part of buyers to handle just as few coffees as possible, nntil the duty question became solved. Stocks in store were low, some jobbers in fact almost bare of supplies, but they held to the idea that their safety lay in purchasing merely enough to carry them through known and urgent needs, and hence the very light general call. Values continued nominal to a great extent, but the recent declines noted in our tables seams to have reached about sellers' limits, for the present at least, and further concassions of importance were not allowed, though now and then a slight shading was made in order to hurry negotiations. Late Wednesday afternoon, however, the trade were agreeably surprised by the announcement that the tariff question had at last been settled, and since that time the market has shown a material improvement, and the tone as compared with last week is healthy and encouraging. As the duty is not removed until July 1, it is thought that purchases by small jobbers, consumers, &c., will drag somewhat until that time, but there is every proba-bility of more liberal sales in bend, and knowing now just where they stand, an immense relief is afforded the trade generally, and they can work understandingly. A great many operators, under the excitement of the change from complete prostration to a good prospect of doing a fair business, are inclined to talk very baoyantly, and call prices decidedly higher, but as yet we do not see any warrant for quoting much of an advance. Buyers now simply name a price, something above what forced sales could have been effected at a short time ago, and in many cases are not yet up to the quotations for some time given as nominal values, and these would, in fact, have to be reduced rather than advanced to show the actual position of the market. Still as the new order of things has scarcely had time to fully develop as yet, all figures had best be looked upon as nominal, with the understanding that probably within a week or ten days matters will assume a somewhat more definite shape. The greatest attention has been given to Brazils, and several sales have been effected, both here and at the outports, but as the market is somewhat irregular as yet, operators are rather reticent, and the full particulars, are not known. Java moderately active, but appears to show little buoyancy. West Indis grades have been bought to some extent by the trade, and are now held with much firmness. Sales of 520 bags Rin, 4,650 bags Laguayrs,

#### SUGAR,

The more encouraging tone on raws noted in our last has greatly increased and the general market during the period under review has developed much strength, with probably a healthler feeling extant than at any time since the appearance of the new crop. The arrivals have been fair, indeed rather ceeded the outlet, and stocks accumulated on all grades, but receivers were quite willing to store, and only edd lots of common from pler were offered with any show of freedom whatever. The recent upward turn of gold was of some advantage to the selling interest, but importers look much further than this, and seem to consider the prospect as very encouraging The supplies ars by no means marketed yet, of course, but the first general rush is over and future receipts are likely to come along in such a sleady, uniform manner as to be controlled with comparative ease and an undue accumulation affest prevented ; the accounts from Cuba are very firm as to values, and in many cases show no profit at ruling rates here, while advices from Europe indicate that the markets in that direction are improving, and will in all probability attract considerable supplies. There is also a better outlook on the domestic distribution, as reports again come to hand of small accumulations in the interior, and a probability that buyers will soon commence to re-stock with the opening of navigation. The demand during the period under review has been a cautions one, buyers rather objecting to and resisting the advance, but still the wants of refiners have increased, and they were compelled to handle very fair amounts of stock, while there has also been some speculative inquiry and a few purchases for export, the latter mainly from the very choice grades of centrifugal goods. Refined goods have been in pretty quick demand, and the production disposed of about as fast as ready, with prices still on npward turn and a further advance established on most grades. The sales of raw Include 6,759 hhds. Cubs; 260 hhds. Porto Ricc; 198 hhds. Demetrars, 200 hhds. Trinidad, P. S.; 81 hhds. Scotch; 15 hhds. New Orieans; 10,160 boxes Havana; 18,619 bags Manlla; 4,300 bags Pernambuco; and 1,078 hhds. Melado.

imports at New York, and stock in first hands, May 2, were as follows:

The market for foreign descriptions has developed no new features of general interest since our last report, the volume of business proving fair, but not active, and prices about as before, with probably a slight shading on some of the poorer qualities. From grocers the call is more or less restricted by the absence of interior buyers and orders, and the purchases for trade use have heen simply of such parcels as were required by the most absolute necessity. while refiners though handling a few cargoes were by no means anxious, and seemed to be quite particular as to quality, and their wants as to quantity easily met. Importers, however, finding only a small accumulation to carry and the prospect that arrivals are not likely to run very large, have refrained displaying any nuusual anxiety, and ask comparatively full figures for all the apper grades. Domestic has ruled very firm and bueyent, the stock being all under complete control, and owners naming pretty much their own terms. The demand was not active, but still a fair number of buyers were in attendance every day, and appeared to accept the position quite willingly. Syrups were dull carly in the weck, but have since met with a little better demand and are firmer, especially the fine grades, which are influenced by the advance in sugar. Sugar house molasses fairly active, but prices a shade easier, except for small lots of choice. Sales of 1,865 hhds. Cuba Muscovado, 54 hhds. Cuba clayed, 75 hhds. Trinidad, P. S.; 155 hhds Porto Rico, 69 hhds. English Island, and 424 bbls New Orleans.

### SPICES.

An absence of involve movements of magnitude has again been a notice. able feature on this market during the greater portion of the week, the business from day to day footing up quite small. The position, hewerer has lost no strength, gained in fact, if anything, and holders appear to have just as much confidence as ever in the future. There is a little nervousness in the formula of the strength of the future. There is a little nervousness in the formula of the strength of the future. There is a little nervousness in the formula of the strength of the future. There is a little nervousness in the formula of the strength of the future. There is a little nervousness in the formula of the strength of the strength of the future. There is a little nervousness in the formula of the strength of the future. There is a little nervousness in the formula of the strength of the future. There is a little nervousness in the formula of the strength of the strength of the formula of the strength of the strength

regard to the probabilities that Congress may unexpectedly sttempt some changes in the tariff, and this undonhtedly serves to retard operations somewhat, but just as soon as this danger is past and communication with the interior becomes cheaper, a decided increase of the call is looked for in view of the fact that grinders, small jobbers and retail desiers are all in low stock and must replenish. Pimento and pepper are still the two best sustained grades and on the latter there is a considerable amount of quiet working to bring the stock iters and re to constrain the process are difficult to approach and the concentration policy has not been fully carried out as yet. Some export orders are here for pepper, but at too low a margin to be filled. Cassis is probably the easiest in price of any style, but cannot be bought lower. Jobbers are selling fairly from store, and realizing about former prices. At the close the stock of cloves is withdrawn, being all under; one holder's control, and higher prices are asked.

#### FRUITS, &c.

The speculative movement in layer raisins noticed at the close of our last has entirely subsided, but a moderate amonnt has been taken by the trade during the week, for the purpose of replenishing their depleted stocks. The supply in first hands is small and well under control, so that the advance has been firmly maintained. Currants do not show any material change. Turkish prunes have been moderately active but prices continue weak and buyers have the advantage. Citron is a shado lower, but steady at the decline. Dates have sold more freely to the trade at steady figures. Figs quiet. Sardines duil. Foreign nots of all kinds are scarcely moving at all. The market, as a whole, rules in a duil uninteresting position.

Foreign Green.—The arrivals of this class of fruit continue liberal, but notwithstanding the free sales by public auction, there being four advertised for to-day alone, prices keep about steady for peinte goods. We quote in a jobbing way, \$3 25 for Palermo lemons; \$3 50@\$3 75 for Meesina do; \$3 50@\$4 for Sorrento and Meesina oranges; \$3 for common Palermo, and \$3 50@\$4 for Mountain do. Baracos cocoanuts \$35 per 1,000; Bananas \$1 75@\$2 75.

Domestic Green.—Apples are a trific more plenty, and the tone of the market is easier. Cranberries have been reduced to a mere nominal stock, and sell at about former prices. Strawberries have arrived in moderate amounts, and rule at an average of \$1 25 per quart. We quote as follows: Apples—mixed lots, fair, \$3 50@\$4 50; do. prime \$5@\$5 25; selected varieties, \$5 50@\$6 50. Cranberries—fine, \$16 50@\$18 per bbl.; and in crates, \$6@\$6 50.

Domestic Dried.—Apples are in only moderate request, and to force a lot on the market lower figures would have to be accepted. Peeled peaches are quiet, but steady. Unpeeled dull and lower to sell, though no quotable decline can be noticed. Raspberries, cherries and plums are rather scarce and firm. Peannts have been more active on a speculative inquiry, but prices not materially charged. Other desc. iptions quiet and unchanged.

#### PHICES OURRENT.

# THE DRY GOODS TRADE.

FRIDAY, P. M., May 3, 1872 The distribution of piece goods has been increased somewhat during the current week by the demands of houses in the interior for goods to replenish stocks which had become somewhat de pleted by the improved demand from consumers which has sprung up within the week. The weather has been very mild throughout the country, and the retail demand coming somewhat later than usual has been more than ordinarily active. In the large cities a liberal trade has been done, and second orders have come in by mail for large amounts of staple and fancy goods. Resident buyers for out of town houses are in the markst to some extent mainly for some of the less staple qualities of goods, as their large purchases of staples made earlier in the season have not become exhausted as yet. The general business of the season thus far has been fully up to expectations and in the aggregate a considerable increase over the trade of last spring is reported, notwithstanding the fact the trade began unusually late. Collections have been fairly prompt, and the finances of the trade are in a reasonably healthy condition. Long credits have been granted in many cases, but outstanding bills are met at maturity.

DOMESTIC COTTON GOODS.—The features of the trade in do mestic cotton fabrics have not been particularly marked, and there is but little to note beyond a continued steadiness in the tone, with, perhaps, some improvement in the aggregate movement in consequence of the increased demand from the interior. Prints have sold well in light effects, with the choice continuing for trailing patterns and fresh colors. Prices are stiff, but without improvement. Brown and bleached cottons are moving with some freedor: in assorted lots, and continue fairly firm at previous quotations. Colored cottons are quiet and firm at full figures. DOMESTIC WOOLEN GOODS.—There have been no important

changes in the market since our last report, and the feeling is not one of marked buoyancy. The supply of light weight fancies in first hands has been pretty well reduced by the purchases of jobbers, and agents are nominally firm in their asking prices. Jobbers are well stocked up, but have had a fair call from distributors within the past week.- Cheviots and other suitings are selling well, and bring better prices relatively than some of the less popular effects. Manufacturers continue to run on full time as the rule, and are turning off a large amount of heavy weights for the fall trade. Prices have not varied quotably since our last report.

FOREIGN GOODS—Have not sold very freely this week, but have shared to some extent the improvement noted above as occurring in other departments of the market. In silks, millinery goods had a fair inquiry, considering the advanced time of year. Of these may be mentioned crape imperatrice, satin De Chambray in both black and colors, Turquoise, and Lyons Gros de Naples. The demand for fancy dress silks continues on a limited scale, and Japanese, Pongees and fancy popline meet with a steady if a slow sale at former values. The demand for first-rate blacks appears to have partially revived, and twilled makes of heavy weights meet with attention. Dress goods still sell freely in alpace and mohairs, both black colors, the shades in colored goods most run upon being novel mixtures of drabs, stones and grays, with well brought out lavendere. Ginghams are taken readily at a cent below the usual quoted prices. Woolens are quiet for the moment, but a fair State trade is doing among late buyers as well as in the East, the goods most in request being still lowpriced foreign blues and blacks, with a selection of fine Yorkshire, Scotch and West of England novelties. Importers are mostly dull, and the trade doing is chiefly with the jobbers.

dull, and the trade doing is chiefly with the jobbers. We annex a few particulars of leading articles of domestic manufacture, our prices quoted being those of leading Jobbers :
